India and the Act of 1858

Editorial Note in source publication

The copy of this dissertation was secured from the Columbia University by Dr. Frank F. Conlon of the Department of History, University of Washington, U.S.A. and was presented to Mr. Vasant Moon of Dr. Ambedkar Research Institute, Nagpur, in 1979.

The editors are grateful to the University of Columbia, U.S.A. for their kind permission to publish this unpublished dissertation which is in their ownership and possession. They also appreciate Dr. Conlon's gesture of generosity and the assistance of Dr. Ambedkar Research Institute, Nagpur, for making this paper available for printing to the Government of Maharashtra.

Without going into the historical development of it, the administration of the East India Company may be conveniently described as follows:

1. The Court of Proprietors

It was "composed of the shareholders of the East India stock to a certain amount, who elect from their own body by ballot a certain number of representatives (twenty-four) to whom the proprietary confide the planning and carrying into effect whatever measures may be deemed most conducive to the interests of India and England, reserving to themselves a surveillance and limited control over the proceedings of the delegated authority."

The requirements of a seat and a vote in this Court were as follows:

A proprietor of £ 500 stock was entitled to a seat in this Court.

A proprietor of £ 1,000 stock was entitled to one vote.

A proprietor of £ 3,000 stock was entitled to two votes.

A proprietor of £ 6,000 stock was entitled to three votes.

A proprietor from £ 10,000 to £ 1,00,000 and upward stock was entitled to four votes.

Besides this, the stock must have been held for at least one year before voting. There was no voting by proxy and minors were ruled as incapable of voting.

The voters counted Lords, Commoners, women, clergy, and officers civil and military, both of the king and the company.

The sessions of the Court were quarterly—March, June, September, and December. Nine qualified proprietors were quite sufficient to ask for a special session of the Court. The speaker was ex-officio the chairman who presided at the session, brought forward all motions requiring the sanction

of the Court, and laid before the members the accounts of the Company's transactions.

The Court was authorised—

(1) To elect qualified persons to constitute what is known as the Court of Directors.

(2) To declare the dividends on the capital stock of the company within certain parliamentary restrictions.

(3) To frame, alter, or repeal such of the by-laws as hinder the good government of the East India Company, provided they do not conflict with the Acts of Parliament.

(4) To control in general any increase in a salary or pension above £ 200 a year, or over any gratuity beyond £600.

(5) To confer pecuniary reward for good service.

II. The Court of Directors

It consisted of twenty-four members. The Directors were elected by such of the Proprietors as were qualified for a vote. The qualification of a candidate for the Court of Directors were:

(1) He must be a natural or naturalised subject of Great Britain.

(2) He must possess £2,000 stock (no matter for what previous period).

(3) He must not be a director of the Bank of England or the South Sea Company.

(4) He must be a resident of England for two years after holding office in the Court.

(5) He must not have held any maritime office in the Service of the Company for two years previous to his proposed election.

(6) He must not have under any plea or pretence whatsoever, endeavoured to obtain, directly or indirectly, a vote for the election of himself or any other person to be a Director.

(7) He must take an oath

(a) not to carry on any private trade.

(b) not to have any dealing with the company except as a private individual.

(c) not to hold any place or office of emolument under the Crown.

In order to fulfil the various duties, the work was assigned to several Committees into which the Court was sub-divided. They were:

1	Secret Committee	8	Buying Committee
2	Correspondence Committee	9	Warehouses Committee
3	Treasury Committee	10	India House

4	Govt. Troops and Stores Committee	11	Committee Shipping Committee
5	Legal Proceedings Committee	12	Private Trade Committee
6	Military Proceedings Committee	13	Civil College
7	Accounts Committee	14	Military College

All appointments such as writers, cadets, and assistant surgeons etc. were made by the Directors. The Civil and Military Services were recruited from the graduates of the two colleges, which were merely a burden on the revenues of the Company.

III. The Board of Commissioners for the Affairs of India (The Board of Control).

The powers of the Board are :

(1) "The superintendence and control over all the British territorial possessions in the East Indies, and over the affairs of the United Company of merchants trading thereto."

(2) "To superintend, direct and control all acts, operations, and concerns, which in any wise relate to the civil or military government or revenues of the British territorial possessions in the East Indies, in the manner hereinafter directed."

"All the members of the said Board, at all convenient times, have access to all palers and monuments of the said United Company, and are furnished with such extracts, or copies thereof, as they require. The Court of Directors are directed to deliver to the Board copies of all minutes, orders, resolutions, and other proceedings of all General or Special Courts of Proprietors of the Company, and of the Court of Directors, so far as relate to the civil or military government or revenues of the British territorial possessions in the East Indies, within eight days after the holding of such respective Courts; and also copies of all dispatches which the Directors receive from any of their servants in the East Indies, immediately after the arrival thereof; also copies of all letters, orders and instructions whatsoever, relating to the civil and military government or revenues of the British territorial possessions in the East Indies, proposed to be sent or dispatched by the Court of Directors to any of the servants of the Company in the East Indies; the Court of Directors are required to pay due obedience to, and to be governed and bound by such orders and directions as they shall, from time to time, receive from the Board,

touching the civil or military government and revenues of the British territorial possessions in the East Indies." "Whenever the Court of Directors neglect to transmit to the Board their intended dispatches on any subject, within fourteen days after requisition is made, it is lawful for the Board to prepare and send to the Directors (without waiting for the receipt of the copies of dispatches intended to be sent by the said Court of Directors, as aforesaid), any orders or instructions to any of the governments or presidencies aforesaid, concerning the civil or military government of the British territories and possessions in the East Indies : and the Directors are required to transmit dispatches, in the usual form (pursuant to the tenor of the said orders and instructions to be transmitted to them), to the respective governments and presidencies in India, unless on any representation made by the Directors to the Board, touching such orders or instructions, the Board shall direct any alteration to be made in the same, which directions the Court of Directors are bound to conform to."

The Board of Control was sub-divided into six departments to answer its functions : (1) Accounts, (2) Revenue, (3) Judicial, (4) Military, (5) Secret and Political, (6) Foreign and Public. The mode of local administration in India was as follows :—

The country was divided into three presidencies namely, Bengal, Madras and Bombay, the seat of government being respectively at Fort William, Fort St. George, and Bombay itself.

In the beginning the Supreme Local Administration of India was distributed among these three governments, each one enjoying co-ordinate status. With a view to centralisation, the Supreme Local Administration of India was vested in the Governor of Fort William in Bengal, making the other two Governors subordinate to that of Bengal who was made the Governor-General of India.

The appointment of the Governor-General was made by the Court of Directors subject to the approval of the Crown. The Governor-General was aided by a Council known as the Supreme Council, originally composed of four members, three of whom necessarily had to be the servants of the Company in India of at least ten years' standing. The fourth one must not have belonged to the Company's Service. The Commander-in-Chief of forces in India was an ex-officio member of the Governor-General's office. This Supreme Council of five members was expanded by adding to it in 1853, six Legislative members who were authorised only to sit and vote on the framing of Laws and Regulations. Four of these six Legislative members were required to be the Civil Servants of the

Company of ten years' standing in Bombay, Madras, Bengal and the North-Western Provinces. The two remaining places were filled up by the Chief Justice and one other Judge of the Supreme Court of Calcutta. The Governor-General was authorised to add two more members to this Council of eleven, under Section 22 of Statute 16 and 17 Victoria Chapter 95, but the power was not exercised at best up to the time of the mutiny.

This Supreme Council of India, therefore, was composed of six members including the Governor-General and the Commander-in-Chief for the purposes of Executive Government and twelve members for the purposes of the Legislatures: seven members were deemed sufficient to form a quorum.

The power of the Governor-General was so great that he was nearly an autocrat. He could not only veto all legislation in the Council but could initiate and carry out measures independently of the Council. All "political" appointments including those of the Residents to the native States and the Commissioners to the non-regulated provinces were made by him. He could appoint the Lieutenant Governor of Bengal and of the North-West Provinces and the judges of the lower courts and controlled military patronage in Bengal and the North-West provinces.

All districts not included within the limits of any of the four Subordinate Governments were under the direct jurisdiction of the Governor-General in Council who also exercised such power over the native states as accrued to him through treaty obligation. The official staff of the Governor-General was divided into four departments, each one represented by a Secretary. These were :

- (1) The Foreign Department (foreign in relation to the native states).
- (2) The Home Department, handling the judicial and revenue correspondence.
- (3) The Financial Department.
- (4) The Military Department.

Besides these the Political and Finance Secretaries had their respective Secret Departments which were entrusted with secret dispatches.

The Subordinate Governments of Madras and Bombay were administered thus: Each had its respective Governors and Councils consisting of three members (including the Commander-in Chief). Both the Governors and the Councillors were appointed by the Court of directors. Bengal and the North-West Provinces were each governed by the Lieutenant-Governors who were appointed by the Governor-General. The Subordinate Governments were denied the power of legislation or creating any new office, nor could they "grant any salary, gratuity, or

allowance without the previous sanction of the Governor-General of India in Council.” This extreme strictness though required by law was not required by custom : in order not to overburden the Governor-General, minor matters were executed by the Governor who submitted a quarterly report of the same to the higher authorities who reviewed it and as a matter of fact sanctioned it. The Bombay and Madras Governments were privileged to hold direct correspondence with the Court of Directors and did send the abstracts of their proceedings to the Court and to the Government of India. The instruments of Indian Government were furnished by what was and is known as the Civil (covenanted and uncovenanted), the Military, the Naval and the Ecclesiastical Service. The collection of revenue and administration of justice were relegated to the Civil Service.

For Civil and Military recruitment, the East India Company had maintained two colleges in England (1) the Haileburg College and (2) the Adiscombe Academy : Each student cost the Company about £ 96 a year during his period of training.

All revenue was collected in the name of the Supreme Government of India and was transferred to and controlled by the Supreme Treasury. There was absolutely no local fiscal autonomy : the deficit in one province was made up by the surplus in another and the entire India revenue was held responsible for the debts borrowed for wars in one particular province : in short, both Finance and Administration were absolutely centralised as in France under the ancient regime.

So much for the pure system of Administration. The criticism of it we will postpone till we come to the next chapter.

The last chapter must have made it clear how and why Western Europe was at a death grapple for the control of India. We followed the armies of the different leaders of different nations— fighting for a country the people of which had very little to choose in the final destiny—the Cama, the Albuquerque, the Busseys, the Lallys, the Clives, the Malcolms, the lakes and the shores as though enacting the train of ghosts of Banquo's line all that terrified Shakespeare's Macbeth out of his senses.

II

In this chapter we have more particularly to deal with the East India Company as a Political Sovereign and the Finances without dilating upon its development from a Commercial Concern into a Political Sovereign.

There is nothing strange in the fact that the East India Company succeeded in establishing its suzerainty over India as might have been seen from our past discussion. Having got a foothold in the various provinces it

extended its rule over the entire peninsula and established by law what is known as the British Government in India : in other words, it established the State and carried on the political and commercial functions jointly. As a result of this combined activity the fiscal administration of the Company in India was an entangled phenomenon. The commercial and revenue returns were merged together without any attempt at distinction. Any student of finance, therefore, has to pass over the entire period ending in 1814 when by an Act of Parliament the Company was compelled to keep separate accounts of Finance and Commerce.

With this caution we will now turn to the heads of Revenue.

(1) The Land Revenue

In spite of the early industrialisation in parts of India, the country as a whole may be classed as an agricultural country and land, today as in former times, furnished the state with a major part of its revenue.

The British Government rightly or wrongly established the principle of state landlordship versus the principle of private property regulated its land revenue system in keeping with that policy.

There are different systems of land revenue in India : It may be well to describe them in the words of Parliamentary Blue-Books.

(1) The Zemindary Settlement of Cornwallis

The most obvious feature of advantage in this system is the facility of collection, as it is a much more simple thing to obtain the revenue of a large district from a certain moderate number of Zemindars or contributors, than it is to perform the collection in details by the officers of the government themselves, and another advantage undoubtedly is the greater degree of certainty in the result of 1831 C. 3339.

This system of land tenure arose thus : When the East India Company came into possession of the revenues of the Dewanee of Bengal, Bihar and Orissa, they found the land revenue collected through the mediation of officers (subhedars) under the Mohammedan government, who had charge of districts sometimes of more, sometimes of less extent, with various titles, such as Zemindars and Talookdars, and who paid the revenue into the treasury in one sum, for which they were found managing considerable districts whose obligations consisted in paying a certain annual amount to the Government. Many of them held their districts or estates under this condition hereditarily. [2. of. 1831 C. 3114, 3115, 3215.] On the East India Company becoming possessed of the Bengal territory, great abuses were found to prevail, and to be practised by the different sorts of people employed in the collection of the revenue. The detail of the business was so great, that it frightened Lord Cornwallis and the Government of the

day, and they conceived that no better method for the protection of the Ryots or small cultivators, could be invented, than to create a species of landlords, from whom they expected much benefit to arise: the ground upon which they principally went was this, what those Zemindars, having a permanent interest in the land assigned to them, would have an interest in the prosperity of the Ryots, in the same manner as a landlord in England feels an interest in the prosperity of his tenants : This was expected to produce two good effects, to create a landed aristocracy in the country, and above all to afford protection to the Ryots or small cultivators, from the kind of paternal feeling that was expected to pervade the Zemindars. [1. of. 1831 C. 3136.] With a view to the protection of the whole mass of agricultural population and with the best motives, the Zemindars in 1793, whether cultivators or officers in actual charge of districts, hereditary or by special appointment, were created landholders of the country by which a property in the soil was vested in them, in nearly as full a sense as it is to the holder of a fee-simple in England. The sum which a zemindar had been in the habit of paying was ascertained by the observation of a few prior years, the assessment or tax was *fixed forever*, and an engagement was made that this amount of land revenue should never be raised on him. Such is the nature of the settlement known by the name of 'the Zemindary or Permanent Settlement'. [2. cf. 1831.0.3115,3116,3136,3215; 1832. R.C. p. 21.]

II. Village Land Revenue System

The institution of village community was and is mainly to be found in northern India. The proprietary right of land is vested in the entire community residing in the village. The administration of the village is handed over to a headman elected by the villagers and is subject to their removal. Under this system the lands are let out to men sometimes in the same village, sometimes in the neighbouring village, while certain portions and certain rights are possessed by the different craftsmen or artisans of the village, such as the schoolmaster, the washerman, the barber, the carpenter, the blacksmith, the watchman, the village accountant, etc. who have each a right to a certain portion set aside for certain recognised expenses of the village, and for defraying its hospitality towards strangers [1. of. 1830, L. 398, 399, 405, 406, 529.] These village communities are little republics, having nearly everything that they want within themselves, and almost independent of any foreign relations. dynasty after dynasty tumbles down : revolution succeeds revolution. Hindu, Pathan, Mogul, Maratha, Sikh, English, are all masters in turn, but the village communities remain

the same. In times of trouble they arm and fortify themselves; [2. cf. 1832 Commons' Rev. Committee, p. 29.] It is difficult to state the proportion of the produce of the village paid to the Government: the authorities know little of the precise property of any of the proprietors; it is not the interest or the wish of the village that the Government should scrutinise and know their possessions, therefore if any one of the brotherhood fails to pay his proportion, that is a matter for the villagers at large to settle, and they will often come forward to pay it for him, but these are all private arrangements kept to themselves : and the Moceadim has no power from the Government to enforce this assessment, what each man in the village has to pay is an internal arrangement, which it is desirable for the Government not to interfere in, the villagers settling among themselves what each has to pay, the total assessment being calculated after enquiry into the state of prosperity in the village : what it has hitherto paid : what it is capable of paying : the state of the village lands, and what assessment they ought to bear with reference to the produce. [3. cf. 1830 L. 401,402, 404, 528, 583, 584.]

Surveys of considerable expense have been made by the Government : a minute account taken of the state of the land in each village, the fields examined in the presence of surveying officers with all the assistance they can procure, not only from their own servants, but from the village communities, the people themselves interested, and also the ryots and people of the neighbouring villages who are invited to attend. The exact limits of the village are put down, and even the details of land within the village, the productions, the houses, fruit-bearing trees, and son on : the assessment is grounded upon these particulars [1. cf. 1831 C. 3492.]

III. The Ryotwar System

The peculiar principle of the third sort of assessment termed Ryotwar is to fix a maximum of assessment upon all the lands of the country [2. cf. 1831 C. 45, 65.] The money rent of each individual cultivator for the fields in his occupation is defined with as much permanency as possible, the aggregate of such rents making the total assessment, which varies each year with the increase or decrease of cultivation. Another main principle of the Ryotwar system is to protect the rights of all ryots or cultivators, as they now exist in every village, from infringement : and to prevent all encroachment upon those rights [3 cf. 1831. C. 5156:] Thus, in the Ryotwar system, the details of the interest of the respective Ryots are known completely, and not at all in the Zemindary system; and the former effectually does what the latter proposes to do, but never has done, and never can do, that is, fix an assessment upon all lands in the country.

Under the Ryotwar system, the assessment goes from land to the aggregate: it respects property of every class, that of the largest landholder, and that of the smallest : it measures and assess every portion of an estate, and thus facilitates the transfer of landed property, as the first question when taken into market is—What is the amount of public demand upon the land? [4 cf. 1831 C. 4565, 4567, 4568.] The Ryotwar Settlement is applicable in every state of things: where there are proprietors it may be concluded with farmers or cultivators : it may be equally made for the largest or for the smallest quantity of land, for millions of acres or for only a few. The owner of a single field may make his terms directly with the Government, and turn to his cultivation, knowing that he cannot be called on to pay more than a certain sum : for although the assessment under this system varies according to the value of the land, difference of soil, population, situation, and other localities : and although inferior land, paying a lower assessment, becomes liable when sufficiently improved to pay the higher assessment, there is nevertheless, a maximum for the best land beyond which all produce is for the benefit of the landholder, and there are remissions in cases of urgent distress. [1. of. 1832 C.R. P. No. 20.] Another advantage which the Ryotwar system possesses over the Zemindary is in the creation of a great body of independent proprietors, instead of a few who are proprietors only in name : and there is an advantage for the great mass of the people, but in the case of the Zemindary they accumulate for the benefit of the few, while in the Ryotwar system there is also tendency in a considerable degree to the accumulation of capital. [2. cf. 1831 C. 4577, 4578, 4579.]

Such was and is the system of land revenue in India under the regime of the East India Company. A critical estimation of the system we will reserve for the future.

The next important head of revenue is the *Opium revenue*. The opium revenue yielded next in amount to the land revenue and was levied in two different ways :

(1) "By an exclusive system of cultivation and sale carried on by the Government in Bengal."

(2) "By a high export duty levied in Bombay on opium grown in the native states of Malwa and shipped from Bombay."

By Regulation VI of 1799 section 3, poppy cultivation was prohibited in Bengal, and in the North-West Provinces by Regulation XLI of 1803 Section 2.

"Annual engagements are entered into by the Government with the Ryots in certain selected districts, to sow a certain quantity of land with the

white poppy, under a system of pecuniary advances, the produce to be delivered in the form of opium to the Government at a fixed rate..... The total net receipts from the opium monopoly in Bengal amounted in 1856 to 2,767,136."

The revenue derived from transit of opium has a pretty little history : prior to 1831 the British used to buy the opium from the native states (to keep a strict monopoly of the article) through the Resident and hammer it out at Bombay or at Calcutta. But to prevent the large smuggling into the Portuguese Settlements the monopoly policy was given up in favour of the transit duties recovered by way of "passes" at a specified rate to cover the transportation cost to Bombay. The transit duty was at first fixed at Rs. 175 per chest of 140 Ibs. each. This process showed a diminution in the returns, consequently the rate was reduced to Rs. 125 per chest.

The conquest of Sindh closed the additional gate of smuggling the opium into the Portuguese territories : consequently it was hoped and rightly that a higher transit duty would give added return as the change in the direction of the trade was impossible.' So in 1843 October, the rate was increased to Rs. 200 per chest, : in 1845 to Rs. 300 per chest and in 1847 to Rs. 400 per chest,

IV. The Salt Tax

Salt is obtained in India in different ways and is taxed in different ways in different parts of the country.

It is obtained either by boiling sea water as in Bengal, or by solar evaporation as in Bombay and Madras or from natural resources such as the salt mines in Punjab and the salt lakes in Rajputana.

In Bengal the Company had a salt monopoly. It was manufactured by the natives who contracted to deliver all manufactured salt to the Government at a fixed low price. The Government then sold this quantity of salt at six different agencies, Hidgelee, Tumlook, Chittagong, Hiran, Cuttack, Balasore and Khoredah, at a price which was composed of the actual cost plus the additional amount equivalent to the duty levied on imported salt. As a result of this "the average retail price to the consumer" amounted to about a penny per pound.

The private manufacture of salt was also allowed at Calcutta under a system of excise only equal in amount to the import duty.

But on the recommendation of the select committee of the House of Commons in 1836, there was introduced the system of fixed prices, and open warehouses, at which the sales, instead of being as before periodical "were constantly going on."

In Madras, salt was manufactured on behalf of the Government and

was sold for internal consumption. The duty on imported foreign salt was lowered from Rs. 3 per pound to equal the difference between the cost price and the sale price of the article.

In Bombay the salt manufacture was handed over to the individuals under the system of an excise duty equivalent to the import duty on the article. The salt mines of Punjab were worked by the Government and the salt was sold on the spot.

The North-West Provinces depended upon the Lower Provinces of Bengal, the Sambhur Salt lake in Rajputana and parts of western India for their supply of salt. The duties were so arranged that the salt from all parts when it reached the Northwest Provinces tended to be equal in price.

V. Customs

There were innumerable transit or inland duties levied at every town and on every road in the shape of tolls. But they were abolished in Bengal by Act 14 of 1836 : in Bombay by Act 1 of 1838 : and in Madras by Act 6, of 1844 : and uniform system of customs was established all through British India. The evil effects of these inland transit duties will be discussed later on. There remained two sources of customs revenue :

(1) The sea customs on exports and imports, the former on salt and indigo.

(2) The land customs levied mainly on articles crossing the frontier lines between the native and British territories.

V. Besides the salt and opium monopolies the East India Company had the tobacco monopolies as another source of revenue.

VI. *Abkarree* or revenue obtained from the sale of monopolies to sell spirits and liquors. Licences were sold to the highest bidder who contracted to sell at his own price, the hours of business and the location of the shop being regulated by the Government.

VII. The Wheel-tax was levied upon hackneys, carts, buggys, etc.

VIII. The "Sayer duties" was a collective name for unclassified taxes. In different parts of the country it included different taxes. Once it included the irregular collections made by native revenue officers. In Madras it included the transit duties, in Bengal the pilgrim tax was included under this head. In the Deccan "this source of revenue" was "divided into two great heads the first denominated *mohturfa*, which embraces taxes on shops, trades, etc. : the other *ballootah*,^[f1] which "comprehended" taxes upon the fees in kind received by the village artisans from the cultivators, and upon their *enam* (rent free) lands when they hold them. In one instance, the percentage upon bad coins was found to be included under the head Sayer."

IX. The Judicial Fees were realised in the form of stamps requisite in cases of different amounts in order to defray legal charges; the value of stamps varied with the amount of the suit.

Suits ranging up to Rs. 16	the stamps amounted to Re. 1.
From Rs. 16 to Rs. 32	Rs. 2
From Rs. 32 to Rs. 64	Rs. 4
From Rs. 64 to Rs. 150	Rs. 8
From Rs. 150 to Rs. 300	Rs. 16
From Rs. 300 to Rs. 800	Rs. 32
From Rs. 800 to Rs. 1,600	Rs. 50
From Rs. 1,600 to Rs. 3,000	Rs. 100
From Rs. 5,000 to Rs. 10,000	Rs. 250
From Rs. 10,000 to Rs. 25,000	Rs. 500
From Rs. 25,000 to Rs. 50,000	Rs. 750
From Rs. 50,000 to Rs. 1,00,000	Rs. 1,000
From Rs. 1,00,000 and above	Rs. 2,000

Besides this the exhibits filed, summons, answers, replications, rejoinders, supplemental pleadings, the authorisation to a lawyer to plead (sanad) are required to be stamped, the stamp only varying according to the status of the court.

X. The Stamp Duties first established in Bengal in 1797 were incumbent on all instruments such as contracts, deeds, conveyances, leases, powers of attorney, policies of insurance, promissory notes, receipts, bail bonds, and legal proceeding generally (bills of exchange under Rs. 25 and receipts under Rs. 50 were being exempted).

In Madras stamp paper was first introduced in 1808, chiefly on legal proceedings: and in 1816 the duties were extended to bonds, deeds, leases, mortgages, bills of exchange and receipts..

In Bombay the tax was first introduced in 1815.

The English mode of distributing stamps was adopted in India.

“The stamp vendors receive their supply from the collector : the vendors give security for the stamps, and distribute them to the parties by whom they are required, receiving a percentage on the sales”.

XI. The Mint Revenue was collected in the shape of a seignorage for coining of two percent on the produce, after allowing for the difference of standard and deducting the charges of refining when such were chargeable.

XII. The Marine Revenue was recovered by means of the port and anchorage dues, etc. in order to keep up the useful establishments at

Calcutta, Madras and Bombay.

XIII. Subsidies from the native states payable under treaty obligations, amounting to about a half million pounds.

These were the thirteen sources of revenue under the East India Company, many of which continue to be so even today.

It will be also interesting to note the entire revenue raised from the different sources and the percentage ratio of each to the whole.

First the land tax : its yield and ratio to the entire revenue of British India.

Periods	Land Tax Average Annual Revenue	Ratio of Land Tax to Total Revenue (Per cent)
1792-93 to 1796-97	4,068,000	50.33
1797-98 to 1801-02	4,126,000	42.02
1802-03 to 1806-07	4,582,000	31.99
1807-08 to 1811-12	5,078,000	31.68
1812-13 to 1816-17	9,018,000	52.33
1817-18 to 1821-22	13,263,000	66.17
1822-23 to 1826-27	13,567,000	61.83
1827-28 to 1831-32	13,112,000	60.90
1832-33 to 1836-37	11,942,000	57.00
1837-38 to 1841-42	12,380,000	59.05
1842-43 to 1846-47	13,432,000	55.85
1847-48 to 1851-52	14,947,000	56.06
1852-53 to 1855-56	16,183,000	55.40
1792-93 to 1855-56	10,349,000	54.07

The Opium Revenue : its yield and ratio to the entire revenue of British India.

Periods	Average Annual Revenue	Ratio to The Total Revenue Total Revenue (per cent)
1792-93 to 1796-97	264,000	3.27
1797-98 to 1881-82	312,000	3.18
1802-03 to 1806-07	579,000	4.04
1807-08 to 1811-12	767,000	4.79
1812-13 to 1816-17	958,000	5.56
1817-18 to 1821-22	1,090,000	5.44
1822-23 to 1826-27	1,641,000	7.47
1827-28 to 1831-32	1,747,000	8.12
1832-33 to 1836-37	1,677,000	8.00
1837-38 to 1841-42	1,547,000	7.38
1842-43 to 1846-47	2,965,000	12.33
1847-48 to 1851-52	3,840,000	14.50
1852-53 to 1855-56	4,943,000	16.91
1792-93 to 1855-56	1,667,000	8.71

The Salt Tax : its yield and ratio to the entire revenue of British India

Selected Works of Dr BR Ambedkar

Period	Average Annual Revenue	Ratio to The Total Revenue Total Revenue (per cent)
1792-93 to 1796-97	1,207,000	14.93
1797-98 to 1801-02	1,188,000	12.10
1802-03 to 1806-07	1,589,000	11.09
1807-08 to 1811-12	1,785,000	11.14
1812-13 to 1816-17	1,882,000	10.92
1817-18 to 1821-22	2,256,000	11.25
1822-23 to 1826-27	2,603,000	11.87
1827-28 to 1831-32	2,590,000	12.03
1832-33 to 1836-37	2,036,000	9.72
1837-38 to 1841-42	2,593,000	12.37
1842-43 to 1846-47	2,798,000	11.65
1847-48 to 1851-52	2,438,000	9.14
1852-53 to 1855-56	2,677,000	9.17
1792-93 to 1855-56	2,118,000	11.07

Customs Revenue : its yield and ratio to the entire revenue of British India.

Periods	Average	Ratio to the Total Revenue
---------	---------	----------------------------

	Annual Revenue	(Percent)
1792-93 to 1796-97	192,000	2.38
1797-98 to 1881-82	304,000	3.10
1802-03 to 1806-07	596,000	4.16
1807-08 to 1811-12	807,000	5.04
1812-13 to 1816-17	1,159,000	6.68
1817-18 to 1821-22	1,667,000	8.32
1822-23 to 1826-27	1,663,000	7.58
1827-28 to 1831-32	1,747,000	8.12
1832-33 to 1836-37	1,506,000	7.19
1837-38 to 1841-42	1,418,000	6.76
1842-43 to 1846-47	1,449,000	6.02
1847-48 to 1851-52	1,439,000	5.40
1852-53 to 1855-56	1,611,000	5.52
1792-93 to 1855-56	1,190,000	6.22

Miscellaneous Revenue: its yield and ratio to the Entire Revenue of British India.

Periods	Average Annual Revenue	Ratio to the Total Revenue (Per cent)
1792-93 to 1796-97	2,315,000	28.64
1797-98 to 1801-02	3,809,000	38.79
1802-03 to 1806-07	6,857,000	47.87
1807-08 to 1811-12	7,452,000	46.49
1812-13 to 1816-	3,990,000	23.16

17		
1817-18 to 1821-22	1,392,000	6.94
1822-23 to 1826-27	1,986,000	9.05
1827-28 to 1831-32	1,789,000	8.31
1832-33 to 1836-37	3,059,000	14.60
1837-38 to 1841-42	1,434,000	6.84
1842-43 to 1846-47	1,636,000	6.80
1847-48 to 1851-52	1,977,000	7.40
1852-53 to 1855-56	1,575,000	5.39
1792-93 to 1855-56	3,043,000	15.90

This much for the sources of revenue and amounts raised from each one of them and their proportions to the whole.

On the expenditure side we note the following heads :

- (1) Charges incident to the collection of revenue.
- (2) Military and naval charges.
- (3) Civil, judicial and police.
- (4) Public works.
- (5) Interest on Bond Debt in India.
- (6) Allowances and assignments to native princes under treaties and their engagements.
- (7) Home charges, which included :
 - (a) (a) Interest on Home Bond Debt.
 - (b) (b) Dividends to Proprietors of East India stock.
 - (c) Payments on account of Her Majesty's Troops and establishment.
 - (d) Charges of the East India House and Board of Control.

A tabular arrangement of the expenditure in chronological sequence may be of some value.

Selecting the period 1800 to 1857 we may take every tenth year as a representative year and mark the percentage ratio of Charges to the

Revenue of that particular year.

	Net Revenue	Charges	Military Charges	Interest of Debt.	Civil & Political Charges	Judicial Charges	Provincial Police Charges	Bldgs. & Fortifications
	£.	£.	%	%	%	%	%	%
1809-10	11,238,000	11,076,000	58.877	18.010	7.221	7.525	1.991	1.639
1819-20	13,016,000	12,934,000	64.290	12.805	8.900	6.800	2.093	1.756
1820-30	14,200,000	13,107,000	53.754	12.124	9.575	7.107	1.535	2.810
1830-40	13,742,000	13,004,000	57.721	9.756	12.296	9.565	2.062	1.428
1840-50	19,510,000	16,404,000	51.662	10.512	8.902	7.100	2.062	1.661
1857	33,303,000	28,079,000	45.55	7.19	9.62	9.38		

Public Works

According to Professor Adams the finances of a country are to be judged from the viewpoint of developmental expenditure : and among the developmental expenditure of a country the Public Works take a prominent position.

Applying the same criterion we are compelled to condemn the entire fiscal system of the East India Company.

Before 1853 the administration was engaged in war operations and not only did not project any new scheme of public works, but it allowed the old ones to fall rapidly into decay.

Dr. Spray in his "Modern India" (1837) says "It is in the territories of the independent native chiefs and princes that great and useful works are found and maintained. In our territories the canals, bridges and reservoirs, wells, groves, etc., the works of our predecessors from revenues expressly appropriated for such undertakings are going fast to decay."

Speaking of the Public Works in India, Mr. John Bright said "With regard to public works, if I were speaking for the natives of

India, I would state this fact, that in a single English country there are more roads—more travelable roads—than are to be found in the whole of India; and I would say also, that the single city of Manchester, in the supply of its inhabitants in the single article of water, has spent a larger sum of money than the East India Company has spent in the fourteen years—from 1834 to 1848—in public works of every kind throughout the whole of its dominions. I would say that the real activity of the Indian Government has been an activity of conquest and annexation."

Before the "Department of Public Works" was made uniform for all the Presidencies of India the important branch of administration was conducted in various ways.

In Bombay it was conducted by the Military Board : Though subordinate, the Superintendent of Roads and Tanks was outside the Military Board.

In Bengal the Military Board had the entire control. In Madras the administration of this department was threefold : There was—

- (1) The Public Works Department of the Board of Revenue.
- (2) The Superintendent of Roads.
- (3) The Military Board.

This variety in the system was reduced to uniformity by Lord Dalhousie who created a separate department of the state for dealing with questions connected with Public Works.

We will review in brief the Public Works that were executed under the regime of the East India Company.

(1) Canals Ganges Canal—449 1/2 miles.

East and West Jumna Canal—445 miles of the West Jumna Canal were completed.

Punjab Canals—425 miles of the Boree-Doab Canal in the Punjab were executed in May, 1856.

Madras Irrigation Works—Tanks, reservoirs, and "annicuts" or dams, across the beds of the Cauvery, Godavery, and Krishna Rivers.

(2) Truck Roads

	miles	cost
From Calcutta to Peshawar	1,423	1,423,000
From Calcutta to Bombay	1,002	500,000
From Madras to Bangalore	200	37,121
From Bombay to Agra	734	243,676
From Rangoon to Prome	200	160,000

(3) Railways

From Calcutta to Burdwan	120
From Bombay to Wassind	50
From Bombay to Compoie	10
From Madras to Vellore	81

(4) Electric Telegraphs

From Calcutta to Peshawar	} in all about 4000 miles
From Agra to Bombay	
From Bombay to Madras	

Mr. Hendricks says "Comparative to area and population, the extension of these works has not been either so great or so continuous as might be desired. If we exclude those undertakings that are of a purely military character, and review the items which may be classed under Land and Water Channels of Communication and Irrigation Works, or in other words, the Revenue—productive public Works, in recent years of most activity, it appears that an outlay of about one million and a half sterling has been the maximum for one year. If we take the most immediately productive works, viz. : of Canalisation, Irrigation, it will be seen that not more than 738,015 in the year 1853-54, and 543,333 in the year 1854-55, was thus expended.

"The condition of the Revenue, as preventing a more rapid and extensive outlay, has hitherto been an answer to those who might have been disposed to urge that even these amounts are insignificant, when the British Indian territory of 837,000 square miles, and its 132,000,000 of souls are considered. This answer resolves itself purely into one of alleged difficulty. That this difficulty is only apparent, and might be remedied, is evident, not only from the practical testimony of the productive results of such expenditure in the instances before adverted to, but also from the history and policy of the other branches of the Colonial Empire of this country. And the history of the East India Company, or of the trading companies of other countries, has shown no exception to the general rule, that expenditure on carefully selected objects of enterprise may often appear lavish and purposeless when it is but showing the field whose harvest is the proof of the wise economy of that expenditure."

The Pressure of the Revenue

This branch of our study is entirely out of question : not that it is beyond our scope but there are innumerable drawbacks in our way.

First and foremost is, that we have no absolutely correct statistics regarding population. Census was never known at that period and any estimate of the population is at best a guess too broad and vague to be made the basis of any scientific conclusion.

Another serious handicap in the way of such a study is the fact that every year the East India Company saw its territory extended by several units of miles and one often wonders whether the swell in the revenue is due to the high rate of taxation or the extension of territory.

Thirdly, the Revenue accounts of the East India Company are anything but perfect. As noticed before, they were mixed with the commercial accounts till 1813 and when they were separated by the Parliamentary mandate they were hardly made intelligible.

These serious handicaps consequently compel us to leave aside this important phase of our study. Certain detached statements if grouped together may convey to us some idea regarding the pressure of the Revenue. Speaking about the Land Tax alone, Mr. R. C. Dutt, besides whom there is no better authority on the subject, says, "The Land Tax levied by the British Government is not only excessive, but, what is worse, it is fluctuating and uncertain in many provinces. In England, the Land Tax was between one shilling and four shillings in the pound, i.e. between five and twenty percent of the rental, during a hundred years before 1798, when it was made perpetual and redeemable by William Pitt. In Bengal the Land Tax was fixed at over ninety percent of the rental, and in Northern India at over eighty percent of the rental, between 1793 and 1822. It is true that the British Government only followed the precedent of the previous Mohammedan rulers who also claimed an enormous Land Tax. But the difference was this, that what the Mohammedan rulers claimed they could never fully realise : what the British rulers claimed they realised with rigor. The last Mohammedan ruler of Bengal, in the last year of his administration (1764) realised a land revenue of £817,553 : within thirty years the British rulers realised a land revenue of £2,680,000 in the same Province. In 1802 the Nawab of Oudh ceded Allahabad and some other rich districts in Northern India to the British Government. The land revenue which was claimed by the British rulers within three years of the cessation was £1,682,306. In Madras, the Land Tax first imposed by the East India Company was one-half the gross produce of the land. In Bombay, the land revenue of the territory conquered from the Marattas in 1817 was 800,000 in

the year of the conquest : it was raised to 1,500,000 within a few days of the British rule : and it has been continuously raised since." "No native prince demands the rent which we do," wrote Bishop Heber in 1826, after travelling all through India, and visiting British and native states." "A Land Tax which now exists in India," wrote Colonel Briggs in 1830, "professing to absorb the whole of the landlord's rent, was never known under any government in Europe or Asia."

"The people of Bengal and of Northern India gradually obtained some relief from the heavy land assessment of the early years of the British rule. In Bengal the assessment was made permanent; and it has not been raised with the extension of cultivation, it now bears (including Road and Public Works assessments, which have been since imposed on the rental) a ratio of about 35 per cent on the rental. In Northern India the assessment was not made permanent, but was reduced to slightly over 50 per cent including all assessments, in 1855. But new assessments were added : calculations were made not on the current, but on the prospective rental until the tax rose to close upon 60 per cent on the rental."

In Bombay and Madras things remained pretty much the same. In both these Presidencies the Ryotwar Settlement prevails. The working of this Ryotwar system of land tenure during the regime of the East India Company is best described by Mr. Fullerton (member of the Madras Government)—"Imagine," he says, "the whole landed interest—that is, all the landlords of Great Britain, and even the capital farmers, at once swept away from off the face of the earth : imagine a rent fixed on every field in the kingdom, *seldom under, generally above* its means of payment : imagine the land so rented, allotted out to the villagers according to the number of their cattle and ploughs, to the extent of forty or fifty acres each. Imagine the revenue rated as above, leviable through the agency of one hundred thousand revenue officers, collected or remitted at their discretion, according to their idea of the occupant's means of paying, whether from the produce of his land or his separate property : and in order to encourage every man to act as a spy on his neighbour, and report his means of paying, that he may eventually save himself from extra demand; imagine all the cultivators of a village liable at all times to a separate demand, in order to make up for the failure of one or more individuals of the parish. Imagine collectors to every country acting under the orders of a board, on the avowed principle of destroying all temptation to labour, by a general equalisation of assessment :

seizing and sending back runaways to each other: and lastly, imagine the collector, the sole magistrates, or justice of the peace of the country, through the medium and instrumentality of whom alone, any criminal complaint of personal grievance suffered by the subject can reach the superior courts. Imagine, at the same time, every subordinate officer, employed in the collection of the land revenue to be a police officer, vested with the power *to fine, confine, put in the stocks*, and flog any inhabitant within his range, on any charge, without oath of the accuser, or sworn recorded evidence in the case."

To this Mr. Martin adds, "If anything could open the eyes of those who uphold the Ryotwar System at Madras, these torture revelations ought to do so. The late Mr. Sullivan, member of Council at Madras, declared to the author, that when he saw the cartloads of silver leaving his cutchery (treasury) for Madras, and remembered the poverty of the people from whom it was collected, he shuddered at the thought of their prospect during the ensuing year, as the demands of the government were inexorable and a certain amount of money must be forthcoming."

The Pressure of Inland Transit duties will be considered later when we come to the economic condition of India during the Company's rule.

As over against this pressure of taxation we have very little information regarding the income of the people.

Nothing gives a better idea of the pressure of the tax than its comparison with the income: but our knowledge of the income of the people is very scanty. According to Munro the average wages of an agricultural labourer was between 4s. and 6s. monthly and that the cost of subsistence was between 18s. and 27s. a head per annum.

What was the pressure of the tax we do not know. Circumstantial evidence goes to prove that it must have been great.

IV

Mr. Martin sums up the entire financial history most succinctly as follows:—

"The expectations raised by Clive of the prosperity which would follow the territorial acquisitions of the Company, were so far from being fulfilled, that it was found on this (when the Dewanee of Bengal and Bihar was granted to the Company) and on subsequent occasions, that increase of revenue was almost invariably attended

with more than commensurate increase of expenditure : the cost of government by Europeans, the growth of a standing army in each Presidency, and other sources of legitimate or illegitimate expense, swallowing up all the anticipated surplus, and leaving nothing for the development of the resources of the country or even the maintenance of roads, canals, and other public works constructed by native rulers.”

Strange to say , the financial affairs of the Company were woefully mismanaged. .A writer of the time said, ”We have an army officered by British soldiers, manoeuvred according to European tactics. The spirit and much of the letter of the English law pervades our jurisprudence : our assessments for revenue are supposed to be based upon the doctrines laid down by Adam Smith and his followers (?). Our finance alone is Indian. Our military men study the strategy of Jomini: Blackstone and Bentham, Mills and Ricardo are the text-books of our civilians, but the system of our financiers is almost the same now as that of Abul Fazal, Akbar's minister some three centuries ago.”

Year	Gross Revenue	Gross Expenditure
1792-93	5,512,761	3,873,859

Taking into account the period between 1792 to 1857 Mr. Ramesh Chandra Dutt says, "It will be seen that if there were fourteen years of deficit, there were thirty-two years of surplus; and if the deficit amounted altogether to nearly seventeen millions the surplus amounted to nearly forty-nine millions. The net financial results of Indian administration was therefore a surplus of thirty-two millions during forty-six years. But this money was not saved in India, nor devoted to irrigation or other works of improvement It went as a continuous tribute to England to pay dividends to the Company's shareholders; and as the flow of the money from India was not sufficient to pay the dividends, there was an increasing debt called the Public Debt of India." [I.R.C. Dutt. "India under Early British Rule." p. 408.]—

There were two distinct ways in which loans were raised in England and in India.

In India when the government was in need of money it advertised that the Treasury was open to receive money upon loan at certain rates specified in the advertisement and upon the conditions there contained. So long as the loans remained open, parties were admitted to make what payments they pleased, and to receive what are called loan notes in acknowledgement, and these to any amount. The money raised on loan was all raised in India.

In England a different mode operated. The only mode, it was so stipulated by the Parliament, by which the East India Company was able to raise loan there was analogous to that of other corporations viz. on bonds, and all the Home debt was raised on bonds.

The Public Debt of India, at least under the Company's rule was I entirely the creation of war. We will follow the progress of these two debts separately.

The Indian Debt

In 1792 the Indian Debt was a little over £7,000,000: within seven years it had risen to £10,000,000. In 1800 it was £ 14,625,384 carrying a total interest of £ 1,342,854. Now came the wars of Wellesely with the Marathas and in one sweep he raised the Indian Debt to the amount of £ 30,098,857 in 1807-08 bearing a total annual interest of £ 2,339,087. After the conclusion of peace, attempts were made to lower the debts by redemptions : as a consequence of this policy the Indian Debt was brought down in 1810-11 to £22,545,843 and the interest to £ 1,503,434. But wars were the rule and peace the exception :and in 1819-20 by the Nepal War and the First Maratha War the Indian Debt was raised to £ 31,338,855. By 1823-24, as a result of the intervening peace, the debt was reduced but the next year the First Burmese War of 1824-25 raised it to £ 38,316,486. In 1835-36 the debt was reduced to £31,821,1 18: but a train of military operations were awaiting India. The Afghan War , the Sindh War, the two Sikh Wars, the Second Burmese War increased the debt which in 1852-53 amounted to £52,313,094 and the interest to £2,479,133. In 1853-54, however, the Indian Debt was reduced to £49,762,876. In 1853-54 the Public Works policy was inaugurated and as a consequence of it the Indian Debt increased to £ 55,546,650 in 1855-56. The year 1857-58 witnessed what is known as the Indian Mutiny or the War of Independence, raising the Indian Debt to £ 60,704,084.

The Home Bond Debt (in England) In 1800, the Home Bond Debt amounted to £ 1,487,112 at 5 % interest. But the wars of Wellesly also told upon the Home Debt and increased to £4,205,275 in 1807-08 : in 1811-12 the Home Bond Debt reached its maximum limit of £ 6,565,900 at 5 %. In 1816-17 the rate of interest was reduced to 4 % and it never rose above it. In 1814-15 the Home Bond Debt was reduced to £4,376,976. By occasional reductions it lowered to £ 1,734,300 in 1840-41. As a result of the Afghan War and the Mutiny the Home Bond Debt rose to £ 3,894,400, besides £

40,000,000 as the cost of the Mutiny.

It is likely to be a matter of surprise when one sees the smallness of the Indian Home Bond Debt as compared with the Indian Debt. But the surprise will no longer exist when we know that the capacity of the East India Company to borrow in England was strictly limited by Parliamentary Regulations. The Parliament was ever eager to obtain the advantages of the rule of the Company without its disadvantages. It was eager to obtain command of the Indian Empire, but till the end was achieved always looked upon it as problematical and did not want to jeopardise the interests of the country in a project which in spite of its apparent success looked anything but certain of beneficial results. Hence, the Parliament put a strict embargo on the Company's raising the loans beyond a certain limit lest the Company lose its hold upon India and bring ruin on England by jeopardising English capital.

V

INDIA AND THE ACT OF 1858

The East India Company in spite of the fact that she was a source of great prosperity to England suffered great humiliation at the hands of the British Parliament and people.

The East India Company was jealous of her monopoly of the Indian trade and the British were determined to derive as large a gain as possible for allowing her that privilege. Every weakness in the administration was made an excuse for extortion and interference : and renewal of charter was often an occasion to disgorge her of her wealth accumulated by the monopoly of Indian trade.

Very early in the history of the Company a controversy as to this monopoly of trade had arisen and pros and cons were acrimoniously discussed. Up to 1833 the Company, by means fair or foul, managed to win over the English statesmen to continue her monopoly. But in that year the cry against her monopoly had grown so loud that both the Company and the Ministers had to give in and the East India trade was thrown open to all the English public.

By the Act of 1834 the Company ceased to be a commercial corporation. How the obligations of the Company were met may be seen from the following :

"The tangible commercial property sold under the Act of 1834, realised £15,223,480 which was thus disposed of: £8,191,366 towards discharges of India Debt: £2,218,831 was applied in payment of

territorial charges in England: £ 1,788,525 was applied in liquidation of part of the Home Bond Debt: £ 2,000,000 was paid into the Bank of England, for investment in the funds, to provide a "Security fund" at compound interest, for the ultimate redemption of the capital stock of the Company (6,000,000) in 1874: £561,600 was applied in compensations to ship-owners and other persons : and the remainder of £ 463,135 was retained in England, as an available cash balance for the purposes of government in India. The unavailable assets claimed as commercial by the Company—viz. the India House in Leaden Hall Street, one ware-house retained for a military store department, and house property in India, the whole valued at £ 635,445—remains in the hands of the Company but applicable to the uses of the Indian Government."

Though as a trading body the Company disappeared, she continued her existence as a political sovereign of her territories in India. Unfortunately for the Company her days were fast being numbered.

It is an error to suppose that the East India Company was abolished because of her inefficiency as manifested in the Mutiny of 1857. On the contrary, before the mutiny had actually taken place, the discussion about the direct assumption of the Government of India by the Crown was set afloat, which is indicative of the fact that mutiny or no mutiny, the British statesmen were impatient to have direct control over the "leaves and the fishes" that came but indirectly from their rule in India by a process of disgorging a corporation which directly fed them on beef fat.

This round about process was tiresome and mentally exhausting for impatient minds. Lord Palmerston having been returned by a strong majority in 1857 as a result of his success in the Crimean War immediately notified the Directors of the Company to their great surprise that he proposed to introduce a Bill for the abolition of the Company and the resumption of the direct Government of India by the Crown.

Unfortunately, the mutiny did occur in 1857 and gave a strong impetus to the abolition movement already in full swing.

On the 31st day of December, 1857, the Chairman and the Deputy Chairman of the Company replied to the notification of Palmerston urging that "an intermediate, non-political, and perfectly independent body" similar to the Company was a necessity for the administration of India.

Besides this the Company sent a formal petition to both Houses of Parliament. John Stuart Mill who drafted the petition showed the fallacy in the arguments of the mover of the Bill for the abolition of the Company. From the very beginning the Crown had exercised its control over the Indian Government through its Minister presiding over the Board of Control. Between the Government in India and the Crown Minister there was the Court of Directors which the new Bill wanted to do away with. Mill argued that this Court of Directors (the organ of the East India Company), the embodiment of experience was a good guide for the Crown Minister who really controlled the entire administration of India, and said that if evils have really arisen from the mode of administration the remedy that was sought viz. of doing away with the Court of Directors and thus making the Crown Minister an autocrat was worse than the disease."To believe that the administration of India would have been more from error had it been conducted by a Minister of the Crown without the aid of the Court of Directors, would be to believe that the Minister, with full powers to govern India as he pleased, has governed ill, because he had the assistance of experienced and responsible advisers."

A diversity of opinion prevailed as to the future connection of India with England.

The Stanley Review, an important newspaper in England argued that the East India Company be maintained to keep India away from English politics. It made quite a point of the fact that Englishmen who went over to India became autocrats and that in it there was a danger to democracy. It boldly proclaimed that "India, like a colossal torpedo, will paralyse the beneficent activities and benumb the free moral life of England"... and if....."brought full in sight of England, will serve her as a great school, in which she may learn the principles of the King of Naples and the practices of Mrs. Stowe's Legree."

Others, notably a certain Richard Congreve, a disciple of Conte pleaded that India should be left to work out her own destiny. He maintained that the rule of one people by another is demoralising and not wise for the better development of humanity. In order to prevent any other nation from stepping into India after the English had left he proposed that an international board be appointed to regulate the administration which was ultimately to devolve upon the Indians when they became capable of self-government.

None of these views, however, fall in with those of the British

Parliamentarians who decided differently. They were determined to abolish the East India Company and take the government of India immediately-under the Crown : they desired to substitute direct government for the double government. As a result of this neither the petition nor the independent public opinion proved of any effect and Palmerston introduced his Bill for the Abolition of the Company and the future government of India. Before the Bill was passed, the Conspiracy Bill threw out the government of Palmerston which was succeeded by a conservative one under the leadership of Lord Derby. After Lord Palmerston's Bill had gone out by his overthrow, Benjamin Disraeli, the Chancellor under Lord Derby introduced his India Bill. John Stuart Mill's comparison of the merits of the two bills is very instructing and later events have borne out his contentions. He says :—

"The means which the Bills provide for overcoming these difficulties (of the government of one nation by another) consist of the unchecked power of a minister. There is no difference of moment in this respect between the two Bills. The minister, it is true, is to have a Council. But the most despotic rulers have Councils. The difference between the Council of a despot, and a Council which prevents the ruler from being a despot is, that the one is dependent on him, the other independent; that the one has some power of its own, the other has not. By the first Bill (Lord Palmerston's Bill) the whole Council is nominated by the minister; by the second (Disraeli's Bill) one half of it is nominated by him. The functions to be entrusted to it are left, in both, with some slight exceptions, to the minister's own discretion."

Disraeli's Bill suffered worse fate than the one of Lord Palmerston. It simply fell. A new bill was therefore introduced in August, 1858, and passed designated as an "Act for the better government of India."

The Provision of this Act (of Section 75) which still largely regulate the administration of India may be divided into classes according to their nature :

- (1) Those dealing with the past affairs.
- (2) Those dealing with the future affairs.

We will first consider those that deal with the past affairs—mainly the settlement of the fiscal and commercial obligations of the Company. Section 42 of this Act provided that the dividend on the capital stock of the East India Company, should be charged and

chargeable upon the revenues of India alone."

Amidst all the questions between India and England that had to be settled with equity none was more prominent than the question of the Indian debt. Who should bear the burden of the Indian debt was the burning question of the time. The crux of the question was who was responsible for it and what was its purpose?

The most enlightening commentary on the problem is that of Major Wingate who immediately after the mutiny argued :

"Have the people of India had a voice in the management of their affairs, or have the taxation and expenditure of the Indian Government been regulated with a view to the welfare of India alone, without intervention or interference on the part of the government of this country? By no means, the Government of India, whether viewed with reference to its forms or powers, has been, from the first hour of its existence up to the present time, the creation of the British Parliament. The power vested in the Government of India to contract debt, was a delegation of authority from the British Parliament, which, up to this hour, as in the case of the last debenture loan, exerts a right of interference over its exercise..... The East India Company have been declared by Parliament to have been simply trustees for the British nation, which, in accordance with this view, altered the conditions of their trust from time to time, and finally relieved the trustees of its exercise altogether. When the subject is carefully examined, it will be found that the Government of India, so far from being the Government of a distinct state, has been, from the first, simply a *department of the British Government*. The British ministry, acting through the President of the Board of Control, formed the real motive power which decided the policy of successive Indian administrations, and the East India Company was simply a convenient screen..... If the facts be so, then, and they cannot be gainsaid, we seem to be shut up to the conclusion that the acts of the Government of India, from first to last, have been the acts of the British nation. India has never had even the shadow of a constitution, or of a national government, but has been ruled as a conquered country, according to the views of successive British Parliaments and the British administrations. The Indian debt has really been incurred by the Government of this country : and how, then, can we possibly shake ourselves free of Indian liabilities?"

Mr. Wingate also appealed to the humane part of the British

public by dwelling upon the advantages to England and the injuries to India:

“In proceeding to consider these advantages, there is one most important fact, which should ever be present to the mind of the reader, and that is, that those advantages, be they great or small, have cost the nation nothing to acquire. This may sound as a startling assertion in the ears of Englishmen of this generation, who have not yet forgotten the heavy bills which they have had to pay for Canada rebellions Caffre wars, Ceylon insurrections, and many manumissions of West Indian. Slaves; and who are annually reminded of the cost of governing, or protecting our colonies and dependencies, by the financial estimates submitted to Parliament; but the assertion, nevertheless, is strictly and liberally correct.”Strange,”may we wonderingly exclaim,”that we, who have spent so much on our colonial possessions, and have waged so many costly wars for thankless foreigners, should have laid out no money in the acquisition or improvement of our great Indian Empire. The thing cannot be : it is too astounding for belief.”Astounding indeed it is: but there is something still more astonishing behind; for not only is it a fact that India has been acquired without the expenditure of a single shilling on the part of this country, but it is equally a fact that, so far from involving outlay, India has regularly paid to Great Britain a heavy tribute, which there is reason for thinking has not fallen far short of the almost incredible sum of a hundred millions sterling in the course of the present century.”.....”The Indian tribute, whether weighed in the scales of justice, or viewed in the light of our own true interest, will be found to be at variance with humanity, with common sense, and with the received maxims of economical science.”

Touching the grievances of India, Mr. Wingate asked the English public:

“Has our policy in India been determined out of pure, unselfish, and benevolent regard for the welfare of the people of that country, and without the smallest regard for the manner in which it may affect our own away? Was this the principle which guided us in imposing prohibitive duties upon Indian manufactures imported into this country, and merely nominal duties upon British manufactures imported into India? Was it out of pure regard for India that cotton exported to Great Britain from India, is exempt from duty, while it is taxed on exportation to all parts of the world besides? Was it

Indian interest which dictated the fixing of import duties upon goods brought to India in British ships, at one-half of the amount levied upon similar goods brought in ships to any other country? Were native interests solely concerned in the exemption of Europeans in India from the jurisdiction of the ordinary courts of criminal justice, by which native redress for British wrong-doing, has been made a practical impossibility in ninety-nine cases out of a hundred? Was it out of consideration for the tax paying Hindu and Mohammedan, that the official European in India was provided with a costly ecclesiastical establishment before anything else was done for their education or enlightenment?

Was it unselfish regard for the natives that dictated the policy of obtaining, upholding and extending British dominion in the East, by means of taxes raised in India, in opposition to the rule obtaining in all other British dependencies, of providing for the costs of their military defence from the British Exchequer? And lastly, were the arrangements for defraying what is styled "the home charges," out of the Indian revenues, under which nearly one hundred millions sterling of taxes collected in India, have been transferred to Great Britain in the course of the present century, devised for the purpose of benefiting the people of India alone? Let the candid reader thoughtfully and conscientiously answer these questions for himself, and then say whether British interest as well as Indian interests have not had a share in determining the course of our Indian policy." All the arguments legal and humanitarian failed to win the day. The English Parliament flatly refused to share in the Indian Debt which created the acquisition of the Empire. The entire heavy load of the debt of the East India Company amounting to £ 69,473,484—mostly unproductive—was placed on the shoulders of the poverty-stricken natives who had no voice in the doings of the Company. This was not all : the unfortunate mutiny had cost £ 40,000,000, and as a legitimate expenditure for the acquisition of an empire, England in justice ought to have paid the cost of the mutiny. John Bright who often exposed the cause of the Indian tax-payers appealed to the Parliament saying "that the forty millions which the revolt will cost is a grievous burden to place upon the people of India. It has come from the mismanagement of the Parliament and the people of England. If every man had what was just, no doubt that forty millions would have to be paid out of the taxes levied upon the people of this country (England)."

The practical outcome of these unjust arrangements was that the people of India purchased the empire at many millions for the debt was only a part of the cost, and made an offering of it to the British_Crown : in other words, the Empire was either a gift or a trust.

The arrangements regarding the stock of the East India Company are in the same iniquitous strain. The stock of the Company was redeemed by a loan which was also added to the already enormous debt consolidated into what is known as the India Government Debt.

What the Act really did was to annihilate the Board of Control : the Company though legally extinct continues to live for all practical purposes and enjoys her dividends even to this day in the shape of interest paid out of Indian revenues. The astounding result of this policy was gains to England and costs to India. When every effort at giving justice to India failed in the British Parliament, Lord Derby moved that this enormous debt of India be guaranteed by the Parliament so that on the security of it the interest rate be lowered and the Indian tax-payer be relieved. He said:

“I am aware that the uniform policy of the Parliament and the Government of this country has been to decline all responsibility in regard to the debt of India, which has been held to be a charge only on the Indian Exchequer. Dealing with the present state of affairs I may say at once that I am not going to recommend any change in that policy. I know well the alarm which any such proposition would create and I know the refusal which it would inevitably receive. But this is a question which will recur again and again, and which will have to be considered in the future as well as in the present.

I would likewise ask the House to bear in mind that if ever the time should come when the established policy in this respect should undergo a change, and when a national guarantee should be given for those liabilities, that guarantee would operate to reduce the interest paid upon the Indian Debt by no less than £ 750,000 or even £ 1,000,000 which, formed into a sinking fund, would go far to pay off the whole.”John Bright who through sheer short-sightedness opposed said:

“I object to an Imperial guarantee on this ground—if we left the services of India, after exhausting the resources of India, to put their hands into the pockets of the English people, the people of England having no control over Indian expenditure, it is impossible to say to

what lengths of unimagined extravagance they would not go : and in endeavouring to save India, may we not go far towards ruining England?"

Not only was there no warrant for Mr. Bright to magnify this danger so much, but he failed to see that the people of England would have very soon ceased to neglect the affairs of India, and would have obtained a real control over Indian expenditure, if some share of the liability of the Indian Debt had been thrown on them."

The discussions were all abortive and did not even recompense the breath that was wasted and in no sense did the natives get any relief from the direful spring of woes unnumbered."

Let us now see what the Act willed for the future. Section 55 said, "excepting for preventing or repelling actual invasion of her Majesty's Indian possessions, or under other sudden and urgent necessity, the revenues of India shall not, without the consent of both Houses of Parliament, be applicable to defray the expenses of any military operation carried on beyond the external frontiers of such possessions by her Majesty's forces charged upon such revenues."

With profound respect for the intellect of Mr. R. C. Dutt, one, however, cannot understand on what ground does he characterise this section as "one salutary financial provision". That it was an improvement over the financial administration of the East India Company no one can doubt. But it is by no means salutary in that the revenues of India have been spent outside India for non-Indian purposes, even after the Act. The fatal error lay in this,—the excepting clause in the above section which sanctions the expenditure of Indian revenue outside of India omits the vital word **previous**. The clause in order to be salutary in effect ought to run—"the revenues of India shall not, without the previous consent of both Houses of Parliament, be applicable etc....." and not in the way it does. An unknown writer says, "in all probability that essential proviso was comprised in the original draft, but afterwards eliminated by the same mischievous hand which contrived in Sections 26, 27, 28 to secure the entire immunity, irresponsibility, and personal autocracy of the secretary of state."

After showing that Lord Stanley and the Earl of Derby who had so much to do with the framing of the statute were united in including the neglected proviso the writer quotes the opinion of Mr. Gladstone regarding Section 55 as follows :—

In my view it was the purpose of this clause to require the Preliminary consent of parliament to the issue of Indian money for the purpose of operations carried on by the forces charged upon India beyond the Indian frontier, except in certain special cases, which were very carefully defined. It was, in fact, to prevent the use of Indian money for military operations. I remember this; for I myself was the author of the clause, and the present Lord Derby, who was Secretary of State for India at the time, concurred with me as to its objects.”

The same writer goes on to say :

“There are few, if any causes, that have brought more disaster and financial damage to”India of the Queen”than has the utter disregard of the safeguards ostensibly ordained under these despised and neglected provisions of the Act. We are well aware that, even had the saving word”previous”been included in the Section, the clamour on behalf of pseudoimperial interests, or the exigencies of party schemes, might have sufficed to override the claims and rights of the Indian people. But that word would, at least, have secured an Invaluable respite, during which the voice of reason might have been heard.”

The non-fiscal sections of this Act were :—

(1) The territories of the East India Company were vested in her Majesty, the Queen, and the powers exercised by the East India Company and the Board of Control were vested in the Secretary of State for India. He was to have a Council of fifteen members who would hold office during good behaviour, and each member was to have a salary of £ 1200 a year out of the revenues of India. The pay of the Secretary of State and all his establishment would similarly be charged to India.

(2) The Secretary of State was empowered to act against the majority of the Council except in certain specified matters. And on questions of peace and war (which had hitherto been dealt with by the Board of Control through the Secret Committee of the Court of Directors), the Secretary of State was empowered to send orders to India without consulting his council, or communicating them to the members.

(3) The Governor-General of India and the Governors of Madras and Bombay would henceforth be appointed by Her Majesty the Queen; and the appointments of Lieutenant-Governors would be made by the Governor-General subject to the approbation of Her

Majesty. Rules should be framed by the Secretary of State for admission into the Civil Service of India by competition.

The evil tendencies of the administrative section above referred to have been attested to be (1) autocracy, (2) secrecy, and (3) irresponsibility, all of which are inimical to the good administration of the country. It is lamentable that the Act made no provision for enlisting the voice of the natives in the administration of their own country. In this vital respect, can any one say that the administration of the Company differed very much from the administration of the Crown?

In order to give publicity to the provisions of this Act, Queen Victoria asked Lord Derby (apparently not being satisfied with the first draft of it) to issue a Proclamation which, as she said, "should breathe feelings of generosity, benevolence, and religious toleration, and point out the privileges which the Indians will receive in being placed on an equality with the subjects of the British Crown, and the prosperity following in the train of civilisation."

This Proclamation was read out in India and has been regarded as the Magna Chart of India not that the Magna Chart contained the rights of people but that it was a Great Document. It remains, however, to estimate the contribution of England to India. Apparently the immenseness of India's contribution to England is as much astounding as the nothingness of England's contribution to India. Both are, however true statements if looked at from economic points of view. But from another point of view, if India's tribute cannot be weighed in the scales of justice and humanity then England's contribution cannot be weighed in the scale of gold and silver. The last statement is both literally as well as figuratively true. England has added nothing to the stock of gold and silver in India : on the contrary, she has depleted India—"the sink of the world."—

Her contribution lies in an uneconomic realm: but just the same, it is too great to be measured in terms of coin.

"Englishmen can look back on their work in India, if not with unalloyed satisfaction, at least with some legitimate pride. They have conferred on the people of India what is the greatest human blessing—Peace. They have introduced Western education, bringing an ancient civilised nation in touch with modern institutions and life. They have built up an administration which, though it requires reform with the progress of the times, is yet, strong and efficacious. They have framed wise laws, and have established Courts of Justice,

the purity of which is as absolute as in any country on the face of the earth. These are results which no honest critic of British work in India regards without high admiration."

But whether mere animal peace is to be preferred to economic destitution, let every one decide for himself.

ANCIENT INDIAN COMMERCE

COMMERCIAL RELATIONS OF INDIA IN THE MIDDLE EAST

The imperial Romans flashed their sword both in the East and the West with different results. In the East they conquered the world only to give it to* (.....) in the West however they either Romanised the races who were at first their subjects (.) masters, or left those races to be the willing agents of their own Romanisation.” As a result of this Romanisation the West is proud of her heritage from the Romans. How this rich heritage was accumulated none has taken pains to inquire into.

Justly may we look to the Romans for their military Organisation, the elaboration of law and the wonderful discipline of hordes levied before war and discharged after victory. Hemmed in from all sides—the Etruscans pressing in from the north, the Lygurians from the West, the Sabians from the East and the Greeks from the South, the Latins' summoned the energy by despair. Excepting perhaps the women and youngsters of both sexes the entire population was one huge militia ever ready to rally round the red flag at the call of a trumpet. But Rome gathered in energy too voluminous for the space she had and illustrated the principle that concentration causes explosion and expansion. Goaded by the greed of territory or pressed on by the mania of foreign persecution she started first by consuming the entire Italian peninsula. But imperialism conscious or unconscious knows no stop. Rome by sheer prowess of her arms went on in her career of conquest and made war her only noble profession. She knew not that war like competition destroys itself. In one great sweep, she brought an immense territory under her control but left the circle of her extensive imperium to shrink back towards the center when the propelling energy from within had, as it was sure to be, exhausted itself.

Beside their military exploits and inhuman gladiatorial feats, the Romans (owed) mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_5 credit from the art of road-building and administration; these arts are quite natural and necessary concomitants of imperialism. (Beside these)* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_6 there (was)* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_7 little of the Roman contribution to civilization

that cannot be summed up in the phrase *pax Romana*.

Underneath the canopy of Roman Imperialism there was a constant and "peaceful infiltration", (of the East)*. Philosophy, astronomy, mathematics, medicine constitute her bequests. Scholarship incompatible with the practical genius of the Romans, was the trade of the Orientals. The Roman Court was begemmed by the stars from the East. Egypt lays claim to Ptolemy and Plotinus: Porphyry and Iamblichus are the sons of Syria while Dioscorides and Galen were Asiatics. 'Much of the Roman Civilization was made up by the doings of the Eastern slaves who even conducted the education of the Roman children in the public schools established under the empire. Romans were' the lovers of the powerful rather than of the beautiful:"Rome, in herself inartistic, enlarded art and artists for her own purpose. Her barbaric delight in vivid colouring, which for instance, was exhibited in the gold and scarlet decoration on the great column of Trojan, was stimulated by eastern commerce"mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_8. Even Roman architecture is the product of the oriental slaves. The entire strength of Rome was spent in conquest or if we choose, in the struggle for existence. But after enough of struggle she might have as well utilized the leisure which was hers and availed herself of the varied geniuses brought within her compass by her subject people. Unfortunately Rome never realized or it was too late (that she)* did that"peace hath her victories no less renowned than war"and (her)* militarism pure and simple is thrown in great relief when we notice the (.....)* fact that"although Rome raised a statue to Quiet, she (.....)mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_9 out (.....)* walls"mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_10. Though Rome had some industries, her productive capacity was miserably low; her consumption overran her production which necessitated continual drain of specie. The Latifundia destroyed her agriculture and (drove)* the farmers to beggary and made Rome entirely dependent for her food on Sicily and Egypt. Owing to the great concentration of landed property the land had ceased to be productive, and there was practically no Italian harvest. She received everything mostly from the East and nothing or little to give in return.

"It is in the orient, especially in these countries of old civilization that we must look for industry and riches for technical ability and artistic productions as well as for intelligence and science, even before

Constantine made it [Rome] the center of political power”.mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_11 Nay”all branches of learning were affected by the spirit of the orient”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_12 which”was her superior in extent and precision of its technical knowledge as well as in the inventive genius and ability of its workman”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_13 Descending from the productions of industrial arts to those of industry itself, one might also trace the growing influence of the Orient: one might show how the action of the great manufacturing centers of the East gradually transformed the material civilization of Europe ; one might point out how the introduction in Gaul of Exotic patterns and processes changed the old native industry and gave (their)* products a perfection and a popularity hitherto unknown.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_14 From time immemorial upto the Industrial Revolution, the East enjoyed (the)* pre-eminence of being the workshop of the world and it is significant to (note that)* she was busy in producing the wonderful and massive iron columns that attest to the mechanics and technique of the time when chipping a stone and making a hatchet was a superhuman task with the Western neolith.

Thus”the East gave (impe)mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_15 tus to the West.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_16 It is in the valley of the Nile, the Euphrates, the Yangtse Kang and the Indus that we first witness the misty dawn of civilization, the beginning of knowledge and progress.” To have caught the light from the East and reflected it with manifold luster on the West is the only work of Greece and Rome.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_17

Looked at from this angle the dragon of”Dark Ages”seems to be a fictitious creation of the historian. Were there any such Dark ages in Europe? If so, when was there light? History does not disclose it. Whatever light or civilization there was, was confined to the Eastern basin of the Mediterranean [being constantly fed by the Orient] barring which the entire continent of Europe was in barbarism till very late : the Curve of European Civilization (leaving aside the sources on which it

drew) is constantly rising and what the historian calls Dark ages mark a point of civilization higher than the one reached by preceding centuries. The fiction of the ' Dark ages ' arose from the fallacy of the thinking of whole of Europe in terms of Rome, but nothing is more false than to think of the whole in terms of a part.

To be true to facts the question of the ' Dark Ages ' has to be raised (by the) historian of the Orient. It is he who has to answer why this great (fall) after a high crest, why this sudden darkness after the (dawn):

It is lamentable to see that the earliest and most promising civilizations ran into a blind alley and were arrested all of a sudden when progress was most expected of them. Some of these early civilizations died out leaving us their records on bricks and tablets. Others are lingering on in their way and are in the process of rejuvenation.

The civilization of India is one of the oldest but like all of them has come to a dead stop : but it has lived to revive and we may hope never to die again. The contact of the west has shaken the "fixity" and restored her old dynamic power.

Historians often wonder why civilization begins at one particular spot rather than at another. Is it because of the ability of the inhabitants? Or is it because that providence wills them their civilization? A short consideration will convince us that both these factors play the second fiddle. The first is played by environment. Given a bountiful environment and chances of conservation, isolation or security from foreign invasion, civilization is bound to sprout forth.

India's geographical position just fitted her to be the Early cradle of civilization. Nature has given her that isolation that has been the envy of many of tribal people who are ever in search of a secure abode to develop their capacity and make the most of nature's gifts. Severed from China and Tibet on the north by the Himalaya mountains, on the East from Burma and Assam by the Tenasserim and on the west from Afghanistan by the (Karakoram) mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_18 (Hindukush)* Ranges the entire peninsula forms a world in miniature in itself—(formed)* by strong natural defenses—"the mountains" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_19 forming "a wall on the North-West and the sea. . a moat on all other sides."

This "inverted triangle" conserves the most varied and most abundant of natural resources." Animal life is not only abundant in British India,

but it is remarkably varied. The number of kinds of animals inhabiting India and its dependencies is very large, far surpassing, for instance, that of the species found in the whole of Europe, although the superficial area of Europe exceeds that of the Indian empire by about one-half”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_20Equally is her rich diversity of flora and fauna and her climate that makes possible the existence of such variegated animal life. The richness of vegetable life is unbounded. All these factors have from time immemorial combined to bestow upon her the economic self-sufficiency which has been the privilege of a few nations on the face of this planet today.

Given the materials, man can hardly be expected to remain inactive for the economic motive is the strongest and the most dynamic of all. He tries at once to exploit the environment for his well-being and the early inhabitants of India were no exception to the rule. It would be a mistake if we take a modern average Indian as a prototype of his stalwart ancestor. He may resemble him perhaps in features but that's all. The semblance ends there. The India of antiquity within the span of time in which he held the undisputed possession of the country accomplished much more than could be expected of primitive. We have scanty records of his deeds but what little we have and as will be seen from the following narrative, speaks volumes.

Of the multifarious achievements of the ancient Indians, important as they are, we are not concerned. We have to center our attend on their economic activity alone.

At the outset it would be better to take note of the lampposts or the sources that will help us in our survey. On the nature side there is a lamentable paucity. The Hindoos are loquacious on everything except the economic activity of their life and the reason is not far to see. Education was monopolized by a class of people who were more or less”drones in the hive, gorging at a feast to which they [had] contributed nothing”. The Brahmin or the intellectual caste of India enjoyed”the conspicuous leisure”and”the- conspicuous consumption” vicariously ; consequently the economic activity of the ancient Hindoos found no exponents and no mention in the literature which is purely sacerdotal. This also explains why India did not produce any literature on the Science of Economic as such. Hence we are”compelled to depend entirely on foreign authorities and their scanty reference to India's commerce.

Before we launch on the subject of commerce we shall do better to

take hasty survey of the Economic development of Ancient India. There is no authority on the subject that can take us back to the pre-Buddha times. The Buddha Jatakas—the birth-stories of Buddha—are the earliest source on the subject and contain literary references to the economic organisation of the Indian society which may be supposed to have existed from times very remote from the dates of these Jatakas

1. Agricultural Organisation:

Very early we find the ancient Hindoos living a village life : Each village consisted of from 30 to 1000 families. No isolated houses were to be found but they clustered together. Agriculture is known as the highest occupation and the Indian proverb puts the merchantman second to the farmer and the soldier occupies the last place in social gradation.

Land was cultivated by the farmer and his families and some times by hired labour."The traditional feeling was apparently against land transfer". Yet we see that land was rented out for cultivation. Independent landholder was regarded respectfully but work on the farm of a capitalist was greatly disapproved. There is no evidence to definite say whether or not there was feudalism in village community.

There was a great deal of co-operation among villagers for building and repairing roads and tanks and municipal buildings :

"The sovereign claimed an annual *tilha* on raw produce. This was levied, and in kind amounted to 1/6, 1/8, 1/10 or 1/12." "Grain, pulse, and sugarcane were the chief products: vegetables, possibly also fruit and flowers were cultivated. Rice was reckoned as the staple article of food."

Agriculture was a common occupation for even we see the Brahmin figuring as a goatherd and both as a small and large landholder without losing his caste. The love of the ancient Hindoo and for that matter of the modern for agriculture transcends that of the ancient Greek and is just manifested in the worship of the cow.

The Hindoo devotion to the Cow has been an enigma to most of the foreigners and above all has been an efficient lore in the hands of those half-baked theological failures who go to India to conduct their missionary propaganda for blackmailing the Hindoo.

The origin of cow worship is as much economic as that Roman practice of not offering wine to the Gods from unpruned vines. The cow and for that matter all draft animals, is the soul of the farmers. The cow gives birth to oxen which are absolutely necessary to the cultivation

of the farm. If we kill the cow for meat, we jeopardize our agricultural prosperity. With full foresight, the ancient Hindoos tabooed cow-flesh and thus prevented cow killing. But man hardly pays any attention to dry rulings. It must have religious sanction; hence the grotesque mythology around the cow in old Hindoo religious literature.

II. Organisation of Labour, Industry and Commerce:

Be it said to the credit of the Hindoos that slavery paid a very little role in their economic life. Capture, judicial punishment, voluntary self-degradation and debt were the four principal causes by which individuals become slaves. But there is considerable evidence to show that kindly treatment was the rule and manumission was always possible. Besides few slaves there was a considerable amount of free-labour paid in money or food.

From among the industrial classes the following are mentioned :—

(a) The *vaddhaki* is a genuine term and is an embodiment of a carpenter, ship-builder, cart-maker and an architect.

(b) The *Kammara* is a generic term for a metal craftsman producing iron implement, from a ploughshare or an axe or for that matter, an iron house, down to a razor, or the finest of needles, capable of floating in water, or again, statues of gold or silver work."

(c) The *Pasanakottaka* is a generic term for a mason not only quarrying and shaping stones. but as capable of hallowing a cavity in a crystal, a matter probably of requiring superior tools."

"A considerable degree of Organisation characterized all the trading industries. Certain trades were localised in special villages, either suburban and ancillary to the large cities, or themselves forming centres of traffic with surrounding villages e. g. the wood-work and metal work industries and pottery..... within the cities trades appear to have been localized in special streets e. g. those of ivory workers and of dyers."

The trades were well regulated and were superintended by one or two headmen who were the chiefs or syndics of municipal and industrial Organisation of the cities.

There were numerous guilds (*Seniyo*) under the headship of a President (*Prarnukha*) or elder or older man (*Jethaka*).

Carpenters, smiths, leather workers, painters, and experts in various arts had their grids. Even the sea-men garland-makers and caravan traders.

There was a tendency towards hereditary occupation. But the caste

system in all its hideous rigorousness was not present and even Brahmins were often occupied in low professions.

There was little riverine traffic : it was mostly conducted by the caravans. The industrial centres were connected by good roads which greatly facilitated traffic. The Ramayana refers to a road starting out from Ayodhya the capital of King Dasharatha, known presently as Oudh to Rajagriha the capital of Kekayas in the vicinity of the Himalaya mountains situated on the River Bias, the ancient Vipasa known to the Greeks as the Hypasis passed through Hasdnapur (Delhi) the capital of the Kurus. Alexander's information regarding the roads in ancient India is perhaps the most accurate and the greatest source for the employed surveyors to measure the Indian Roads. We glean from this source that a road ran from Penkelaotis (Pushkalavati) near the modern Attock passed on through Takshila to Patalipura (Pata) after crossing the river Bias. Another road joined Pushkalavathi and Indra-prastha (Delhi) and after connecting Ujjayini (Ujain) descended down the Vindhya range, went into the Deckan through Pratisthana after crossing the Nerbuda and the Tapy. There were the internal highways of traffic and it was carried on by Uday of the Caravans. Early in India the external and internal commerce had assumed such importance that we find mention in the Buddha Jataka a league of caravan leaders. The caravan leader or Sattravaha in Pali headed the caravan on its journey and was looked to "for directions as to halts, watering, precautions against robbers, and in many cases as to routes, fords, etc." The journey of the Caravan was mostly by night.

Trade in early India was not entirely individualistic. There is enough evidence to show the corporate commercial activity and partnership in Trade were occasional, if not general. There was very little government control of business and that too only so far as it concerned the Royal purchases. The prices of articles of Royal purchases were fixed by a Royal valuer who would "also assess the merchants for the duty of a twentieth, presumably *ad valorem*, on each consignment of native merchandise, and of a tenth *ad valorem* plus a sample, on each consignment imported from overseas Finally, he would have to assess merchants for their specific commutation of the "rajaksaya" viz. one article per month sold to the king at a certain discount."

Later on however prices came to be fixed: for Manu says that the king on every 5th or 9th day fixed the rates for the purchase and sale of marketable commodities.

The introduction of money in India whether it was borrowed or

invented at home is a matter of great controversy : but whatever may be said on this, it is true that the use of money in India was early known for”the whole of the Buddhist literature testifies to the fact that the ancient systems of simple barter as well as of reckoning value of cows, or rice measures had for the most part been replaced by the use of metal currency, carrying well understood and generally accepted exchange value”. Currency counted of coins but was not regulated by Royal authority. There was gold coinage for the most part and”all marketable commodities and services had a value expressible in terms of cash”. Banking was not very highly developed—there was no taboo on loaning of money and according to Gautama interest was sought in six different ways.mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_21

With such high type of economic development it is but natural that there should be commercial expansion of colonization by the Early Hindoos. Historians however have been very reluctant to accept the fact : they have either judging the present by the present rule upon the entire Hindoo population as incapable people or have exerted their utmost ingenuity to discount any evidence that antagonises with their preconceived bias. Isolation of India has been a trump card with them and they use it as often as they can. Environmental conditions do delimit the activity of a people subject to it but it could be foolish to say with Hirder”that history is geography set in motion.”We might hold to the truth in the statement that geographic conditions have condemned India to her lot and yet condemn the hyperbole in it.

We may agree, if we like, with Montesquieu when he ascribes the”fixity”of oriental manners, customs and religion to its warm climate. We may believe in Buckle when he holds nature's overpowering mountains and forests in all their stupefying greatness as are to be found in India responsible for the abnormal workings of imagination and superstition or we may follow the scientific geographer when he asserts that India has been condemned to isolation on account of her geographic location : isolated from China by the Himalaya mountains and from Persia and Afghanistan by the Hindu Kush mountains. She has along waterfront but the eastern and the western ghats that fringe the coast from within and cut off the call of the ever beaconing sea to maritime activity.

All these allegations perhaps have a modicum of truth in them: but it would be a mistake to make strong arguments out of them. Barriers, no

matter how strong, are never insuperable to man. He has tried everywhere to control them and has succeeded in his effort.

Hemmed in from all sides, the early Indians burst asunder all impediments natural or otherwise and launched into the Indian ocean at a very early date. The Indian ocean has much in common with the mediterranean. Mr. Zimmurn argues that "land locked on all sidesthe mediterranean seems in summer as gentle as an inland lake. It is in fact double-natured..... a lake when the Gods are kind, and the ocean when they are spiteful." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_22 The Indian ocean which is but the enlarged mediterranean sea with its southern coast removed is neither a ocean nor a lake but is according to Ratzel only half an ocean. The inclosed character of its northern part deprives it of the hydrospheric and atmospheric peculiarities of a true ocean and the winds and currents ran over it in an unorganised way owing to the close by lands. The North-east and South-east monsoons soon enabled the merchants to drag forth in the mid-ocean instead of hugging to the coast.

"From the dawn of history the northern Indian ocean was a thoroughfare. Alexander the Great's rediscovery of the old sea route to the orient sounds like a modern event in relation to the grey ages behind it. Along this thoroughfare Indian colonists, traders and priests carried the elements of Indian civilization to the easternmost Sunda isles; and oriental wares, sciences and religions moved westward to the margin of Europe and Africa. The Indian ocean produced a civilization of its own, with which it coloured a vast semi-circle of land reaching from Java to Abyssinia, and more faintly, owing to the wider divergence of race, the further stretch from Abyssinia to Mozambique." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_23 The Hindus became the dominant commercial nation of the Indian ocean long before the great development of Arabian sea power, and later shared the trade of the East African coast with the merchants of Oman and Yemen. Today they form a considerable mercantile class in the ports of Mascat, Aden, Zanzibar, Pemba and Natal." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_24

With this preliminary disquisition about the natural resources and the economic development of India we will trace her commercial

intercourse from very early times with other countries of ancient civilization.

To begin with Egypt. At the outset it would be better to premise that the evidence of a commercial intercourse between India and other countries at the dim dawn of history is very flimsy and is embedded either in tradition or in articles excavated from early ruins: The evidence however ripens into positiveness with the advance of time.

Situated in the most rarely endowed location in the world the Egyptians were economically independent of the rest of the people—and it is even said that they prided economic self-sufficiency to such an extent that they tabooed foreign intercourse; but this is carrying things too far and though we have no positive records to disprove the statement, the foreign articles found in the process of excavation form a strong proof against it.

It is a matter of great controversy whether or not the Egyptians had direct trade with India. Hypercriticism has ranged on both sides. Herodotus says that Sesostrius whom the Gardiner Wilkin-son identifies with Ramses II flected out a strong fleet and sailed beyond the straits into the Indian ocean conquering all the coastal countries while his land forces carried their sword as far as the Gangesmk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_25

Long before the exodus of the Israelites from Egypt, India had commercial intercourse with her and the port of Philoteris was the emporium of that early trade:

“Whether they (the Egyptians) had a direct communication with India at the same early epoch, or were supplied through Arabia with the merchandise of that country, it is not possible now to determine: but even an indirect trade was capable of opening to them a source of immense of wealth; and that the productions of India did actually reach Egypt we have positive testimony from the tombs of Thebes”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_26 and “the productions of India already came to Egypt at the early period of Joseph's arrival in the country is evident from the spices which the Ishmaelites were carrying to sell there : and the amethysts, haematite, lapis lazuli, and other objects found at Thebes at the time of the Third Thothmes and succeeding pharaohs argue that the intercourse was constantly kept up.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_27

Culture in all times follows the wake of Commerce. This is more true of ancient times than of the modern. The caravans of the olden times were not only the carriers of wares but also of civilization: they disseminated and universalized it. This commercial intercourse with India greatly affected the architecture of Egypt so much so that "James Fergusson (*History of Architecture* 7,142-3) notes that the great *Temple of Akhnaten* is "of Indian inspiration;" the idea Egyptian, but the details Indian. An Indian nine-storied pagoda, translated in Egyptian in the first century of the Christian era" He notes its likeness to such Indian temples as Bodhi-Gaya, and says, it represents "that curious marriage of Indian with Egyptian art which we would expect to find in the spot where the two people came in contact, and enlisted architecture to symbolize their commercial union." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_28

It will not be out of place to note the relation of the Dravidians, the earliest inhabitants of India though by no means aborigines with the people of western Asia. Mr. Gustav Oppert says, "It is established now, beyond any doubt, through the decipherment of the Cuneiform inscription, that the Turanian Empires had advanced to a high degree of culture. This civilization, though tainted with strange materialism proved itself nevertheless able to develop to a high degree of perfection certain branches of arts and science. To these Turanians who differed much among each other in idiom belong also to the Dravidians of India of our days, who in those times occupied Ariana and Persia. In Europe, these Turanians appear to be represented by the Esthonians, and in many places of western and central Asia, they formed the substratum of the population, while they supplied in China the ground work of the civilization of the celestial empire." "These Turanians" had founded empires throughout the old world. The home of the Turanians is assumed to have been the country round Lake Aral. Thence they spread over the greatest part of Asia, reigned there paramount for at least 1500 years." "The Egyptians, the Assyrians the Akkadians, the Sumerians, the Phoenicians are all branches of the same Turanian race." About 250 years after the Egyptian empire had been established i. e. 2500 B. C., and after the Akkadian dynasty had reigned for a long period in Babylon the Aryans invaded Chaldea, and pressing at the same time on the Kannanites of the Persian Gulf and the Dravidians in Persia, drove the former towards the North-west and the latter to the South-east to India". The Aryans when they invaded India met with a stubborn resistance from these Dravidians. For "they did not go beyond the

frontiers of the Punjab till the fifteenth century before Christ”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. [Ancient Indian Commerce.htm - _msocom_29](#) Next in importance and chronology comes the intercourse between India the kingdom of India. 'In spite of the evidences to be found in the Bible, writers have been very little disposed to credit it for historical purpose. The evidence is too strong to be slighted”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. [Ancient Indian Commerce.htm - _msocom_30](#) Situated in the mainland, Judea was not in a position to develop a direct trade with India. She had no water-front at all and consequently no harbours. She had entirely to depend upon the Egyptians and the Syrians who controlled the sea and the trade routes of India. The galleys of India brought their goods to Yemen or Arabia Felix. Yemen was the great mart for Indian goods : it was a distributing centre and from it Indian commodities were taken to Syria by the caravan or to Egypt by the Egyptian Vessels.”From the very earliest ages the refined civilization of Egypt and Syria sought with avidity the spices, the aromatics, the metals, the precious and scented woods, the gems, the ivory in a kind, all the valuable merchandise which the rich soil of India supplied in abundance.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. [Ancient Indian Commerce.htm - _msocom_31](#) King Solomon, however, when he came to the throne, tried to get the control of Indian trade. He saw that the Egyptian power was on its decline and realized that importance of utilizing Idumeas sea port on the Red Sea and which had inherited as the conquest of his father—for materialising his plans of direct trade relations with India. But since the Jews had not been experienced in the art of navigation, he had to seek the cooperation of Hiram, the king of the Phoenicians. The Phoenicians were the pioneers in navigation. Whether they dealt directly with India is a subject of great controversy. Mr. Robertson is favourably inclined. After showing how the poverty of the land compelled the Phoenicians to subsist by commerce, he goes on to say, “among the various branches of their commerce, that with India may be regarded as one of the most considerable and most lucrative as by their situation on the mediterranean, and the imperfect state of navigation, they could not attempt to open a direct communication with India by sea: the enterprising spirit of commerce prompted them to west from the Idumacans some commodious harbours towards the bottom of the Arabian Gulf. From these they held a regular intercourse with India on the one hand, and with the eastern and southern coasts of Africa on the other. The distance, however, from the Arabian Gulf to

Zyre, was considerable, and rendered the conveyance of goods to it by land carriages so heavy and extensive that it became necessary for them to take possession of Phinocolura, the nearest port in the mediterranean to the Arabian Gulf, thither all the commodities brought from India were conveyed overland by a route much shorter, and more practicable, than that by which the productions of the East were carried at a subsequent period from the opposite shore of the Arabian Gulf to the Nile. At Rhinocolura they were re-shipped, and transported by an Easy navigation to Tyre, and distributed throughout the world. This, as it is the earliest route of communication with India of which we have any authentic discription, had so many advantages over any ever known, before the modern discovery of a new course of navigation to the east, that the Phoenicians could apply other nations with the productions of India in greater abundance and at a cheaper rate, than any people of antiquity."mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_32 Another evidence supporting the view of Mr. Robertson is to be found in the fact, that the Phoenicians introduced their letters in India a direct proof of their intercourse. King Solomon, stimulated or otherwise by the neighbouring Phoenicians, joined hands with Hiram, king of Tyre and built a fleet at Elath and Eziongeber. Manned by Phoenician sailors, it sailed to Qphir and brought back many treasures which two kings shared between themselves. The location of Qphir is another unsettled topic. But for all practical purposes Prof. Lassen had closed the controversy by identifying it with Abhira in the province of Gujrat in India. With the interval of three years, the voyage was repeated and the ships laden with all precious articles to enrich the country so much so that "the king made silver to be in Jerusalem as stones, and cedars made her to be as Sycamore trees that are in the vale for abundance"mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_33 Thus all the advantages of trade were secured for the people with exposing to the dangers attendant upon it. Consequently in the words of Dean Stanley (Senai and Palestine p. 261) "To describe the capital as a place where shall go no galley with oars, neither shall gallant ship pass by" (Isaiah XXXIII 21) is not, as according to western notions it would be, an expression of weakness and danger, but of prosperity and security."

The trade between India and Judea does not date with Soloman: it enjoys considerable antiquity; mentions of Qphir are to be found long before the time of Soloman in the I Chronicles XXIX, 4, I kings XXII 48, and in Isaiah, XIII 12. These Biblical evidences may be

supplemented by linguistic evidences, such as the Hebrew word *tuki* which is but a little changed form of the poetical word Tokei i. e. the Tamil-malayalam language for peacock or the Hebrew word *Ahalim* or *Aboloth*—* aloes. *—a corruption of the Tamil-malayalam word, *Aghil*.
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/46. Ancient Indian
[Commerce.htm - _msocom_34](Commerce.htm_-_msocom_34)

The rise of Babylonia marks the high water mark in the ancient commercial activity of India. Situated at the confluence of the Euphrates and the Tigris joining the Persian Gulf with the mediterranean and being a meeting place of upper and lower Asia, Babylon was destined to be the great emporium of the eastern and western trade. It was the meeting place of routes from all parts of the ancient world. There's ample evidence, says Mr. Kennedy, that warrants us in the belief that maritime commerce between India and Babylon flourished in the seventh and sixth and more especially in the sixth century B. C. It was chiefly in the hands of the Dravidians, although Aryans also had a share in it, and as Indian traders settled afterwards in Arabia and on the eastern coast of Africa, and as we find them settling at this very time on the coast of China, we cannot doubt that they had their settlements in Babylon also. But the sixth and seventh centuries are the culminating period of Babylonian greatness. Babylon which had been destroyed by Senkacherib and rebuilt by Esarhaddon: Babylon, which had fused her importance and her fame to the sanctity of her temples flow appears before us of a sudden as the greatest commercial mart of the world. There was no limit to her power. She arose and utterly overthrew her ancient rival and oppressor Nineveh. With Nebuchadnezzar she became the wonder of the world..... But the secret of her greatness lay to her monopoly of the treasures of the east, in the shouting of the Chaldeans in their ships and smartly orientals who frequented her lazars. It moved the envy of the nations. * Paharaoh Necho (612-596 B. C.) vainly sacrificed his subjects in order to reopen the canal which Seti I had made from the Nile to the Red Sea : and he despatched his Phoenician fleet round Africa in the hope of discovering a new world for commerce. And a long ago, the rivalry of the Spaniards and the Portuguese for the treasures of India was anticipated and equalled by the rivalry of Babylonians and Egyptians..... when the world was as yet one and twenty centuries younger.”
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/46. Ancient Indian
[Commerce.htm - _msocom_35](Commerce.htm_-_msocom_35) This commercial intercourse told very decidedly on the literature of India. Sea played an immense role and ' *Mokar* ' the

monster fish was constantly alluded to. The Vedic dieties fall in the back ground and the Hindu mind of the times soared high in inventing fantastic cosmogonies as is to be found in the Vishnu Purana where it is said that "the Supreme Being placed the Earth on the summit of the ocean, where it floats like a mighty vessel and from its expansive surface does not sink beneath the waters," The entire literature smacks of commercialism and is essentially different in nature from the early Vedic literature so much so that Prof. Max Muller in his "History of Ancient Sanskrit Literature" says, "there is throughout the Brahmanas, such a complete misunderstanding of the original intention of the Vedic hymns that we can hardly understand how such an estrangement could have taken place unless there had been at some time or other a sudden and violent breaks in the chain of tradition". This "estrangement" can be accounted by foreign influence which follows the footsteps of commerce." The focus of this foreign influence upon India was therefore in the sixth, seventh and eighth centuries" and certainly not "later than the time of Buddha, for this great teacher found all India believing in metempsychosis, which is not a Vedic doctrine" and must therefore be an exotic.

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_36 It must not however be supposed that the maritime activity of the Hindoos dates from the period : nay sea-farming had become a matter of habit with them : Buddha in the Kevaddhu Sutta of the Digha (fifth century B.C.) says by way of simile "Long ago ocean going merchants were wont to plunge forth upon the sea, on board a ship, taking with them a shore-sighting bird. When the ship was out of sight of land they would set the shore-sighting bird free. And it would go to the east and to the south and to the west and to the north, and to the intermediate points, and rise aloft. If on the horizon it caught sight of land, thither it would go back to the ship again. Just so, brother etc." Mr. Rhys Davids comments that such a Simitic would scarcely be made use of, in ordinary talk, unless the habit referred to were of some standing and matter of general knowledge."

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_37

The decline of Babylon however was as sudden as her rise and dates from the reign of king Darius (579-484 B. C.). From the fifth century on, we no longer find the commercial tablets that were so numerous in earlier times. The Persian conquest not only destroyed Babylon but extended to Egypt. The canals build for riverine traffic decayed and the flow of the rivers was impeded by dams : as a result of this the Arabs

became the caviars of trade and Yemen interests the splendour of Babylon and Palmyrs. The Chaldeans also in spite of the sweeping expeditions of Darius continued their trade by establishing their colonies at Gerrha and other places.

The conquests Darius brought under his rule a vast Empire which became contiguous with that of the empire of Alexander. It was quite impossible for the two emperors full of earth hunger remain as goodly neighbours, friction was bound to arise and Alexander waiting for an opportunity set out on his career of conquest. In one sweep he destroyed the empire of Darius and extended his dominion over Egypt, Central Asia and the northern part of India.

The motives of Alexander's gigantic expedition are a matter of conjecture. Vindication for humiliation suffered at the hands of Darius has been put forth as one of them. Prof. Lassen, however radically enough, ventures to say that greed of gold was the object of Alexander's expedition and that it was whetted by the presence of Indian goods in Greece. The commercial intercourse with Greece as with Judea has left its impress upon the language of the two trading people." Thus the Greek name for rice (*oryza*), ginger (*zingiber*), and cinnamon (*karpion*) have a close correspondence with their Tamil equivalents, viz., *arisi*, *inchiver*, and *karava* respectively; and this identity of Greek with Tamil words clearly indicates that it was Greek merchants who conveyed these articles and their names to Europe from Tamil land. Again, the name *Yavan*, the name by which these Western merchants were known, which in old Sanskrit poetry is invariably used to denote the Greeks, is derived from the Greek word *Jaonis*, the name of the Greeks in their own language." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_38 Another word that may be added to this group of words having a common origin is the parallel words for ivory or elephant in Greek "*Elephas*" in Egyptian "*Ebu*" and "*Ebha*" in Sanskrit which in the opinion of Prof. Lassen indicate a common Sanskrit origin.

Whatever may have been the motives of Alexander, it is quite certain that having known India intimately, he did conceive the idea of bringing the two countries in close commercial relation. Alexander found that this rich trade of India was monopolized by the Phoenicians of Zyre who supplied the rest of the world with Indian commodities. His envy of the Phoenicians was considerably heightened by his personal knowledge of the prosperity of India." The country he had hitherto visited, was so populous and well cultivated, or abounded in so many valuable productions of nature and of art, as that part of India through

which he had let his army. But when he was informed in every place, and probably with exaggerated description, how much the India was interior to the Ganges, and how far all that he had hitherto beheld was surpassed in the happy regions through which that great river flows, it is not wonderful that his eagerness to view and to take possession of them should have prompted him to assemble his soldiers, and to propose that they should resume their march towards that quarter where wealth, dominion, and fame awaited them.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_39 The northern part of India which Alexander subdued was given over by him to Porus, his ally and is said to have contained”no fewer than four thousand towns.”“Even in the most restricted sense”comments Mr. Robertson”that can be given to the vague indefinite appellations of nations and towns, an idea is conveyed of a very great degree of population. As the fleet (of Alexander) sailed down the river (Indus), the country on each side was found to be in no respect inferior to that of which the government was committed to Porus.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_40

The memoirs or journals of his generals Ptolemy, Aristobulus, and Nearchus opened the knowledge of India to Greece and to Europe. Having conquered Egypt, Alexander thought of opening a direct trade between India and Greece. With this object in view he founded the city of Alexandria after his own name which became the greatest emporium of trade in ancient times and continued to be so in spite of many vicissitudes. He cherished many a dreams of permanently joining India to his empire and some of it, not all of them, would have been realized had he lived longer. Unfortunately he died soon after he established his empire which within a short time crumbled to pieces. The governors of the different provinces parcelled out among themselves the whole empire. Goaded by ambition, emulation and personal curiosity / animosity they fought among themselves for supremacy. It would be erroneous to suppose that the commercial relation between India and Greece ceased because of the fall of Alexander's empire : just the reverse, the relations became closer. Seleucus, the most enterprising and ambitious general of Alexander, after seizing for himself the Persian empire, sought to join to his dominions the provinces of India conquered by Alexander. Seleucus was alive to the commercial gains to be derived by such a conquest and determined to carry out his plans by means of his vast armies. But his adversary was more than a match for

him. Chandragupta (Sandracottus of the Greeks) was ruling India as a benevolent despot. Amidst all medievalism he was a modern man endowed with both brain and brawn. Seleucus realized the superior strength of his enemy and wisely concluded peace and to cultivate friendly relations between the two, he sent Magasthenes as an ambassador to the court of Chandragupta. Magasthenes was followed by Daimachus to continue the friendly relations. The Greeks maintained their intercourse with India through the (Graeco)-Bactrian kingdom for a long time though we have very scanty means to judge its magnitude and character. The Chinese historians tell us "that about one hundred and twenty-six years before the Christian Era, a powerful horde of Tartars, pushed from their native seats on the confines of China, and obliged to move towards the west by the pressure of a more numerous body that rolled on behind them, passed the Taxartes, and pouring in upon Bactria, like an irresistible torrent, overwhelmed that kingdom, and put an end to the dominion of the Greeks there, after it had been established near one hundred and thirty years" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_41 Though the land communication was thus interrupted, Alexandria continued to be the emporium of sea trade between Greece and India. Ptolemy, the son of Lagus, during his governorship greatly encouraged the Indian Commerce. His son Ptolemy Philadelphus, in order to carry the articles of India directly to Alexandria started constructing a canal joining the Red Sea and the Nile : the project however was too big and was abandoned. He however built a city on the west coast on the Red Sea and called it Berenice and it continued to be the staple town for Indian trade :

"But while the monarchs of Egypt and Syria laboured with emulation and ardour to secure to their subjects all the advantages of the Indian trade, a power arose in the west which proved fatal to both. The Romans, by the vigour of their military institutions, and the wisdom of their political conduct, having rendered themselves masters of all Italy and Sicily, soon overturned the rival republic of Carthage; A. C. 55, subjected Macedonia and Greece, extended their dominion over Syria, and at last turned their victorious arms against Egypt, the only kingdom remaining of those established by the successor of Alexander the Great."

With the subjugation of Egypt the lucrative commerce from India flowed into Rome; but this was not the only way. There was another trade route for the Indian commodities into the west. It was a land

route and was intended by Solomon to concentrate the Indian trade in Judea. It passed the town of Tadmora or Palmyra situated midway between the Euphrates and the Mediterranean. After the subjugation of Syria by Romans, Palmyra became independent and grew to be a populous and flourishing town. It became a distributing centre. But the Roman cupidity knew no bounds. At the slightest sign of ill-feeling on the part of Zenobia, the queen of Palmyra, the Romans took the city and included it within their empire.

But the inclusion of Palmyra was not enough for the Romans to monopolize the Indian trade for, another power equally strong was rising into the east. The Parthians had dominated central Asia and had made the boundaries of their empire contiguous with that of the Romans. The struggle between Parthia and Rome extended from 55 to 20 B. C. but the struggle for supremacy remained indecisive. "The warfare between 55 and 20 B. C. had left the two empires with a wholesome respect for each other: and Augustus left it as a principle of imperial policy that the west bank of the Euphrates was the proper limit for the Roman empire, beyond which the power of Rome could not with advantage be extended"

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_42 The policy of the Roman Empire during the two centuries following the Christian era was "to encourage direct sea trade with India, cutting out all overland routes through Parthia and thus avoiding the annoyance of fiscal dependence on that consistent enemy of Rome" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_43 Under the Pax Romana, trade between India was greatly fostered and grew so much in importance, guides to the ports of the India and itineraries of land travels and caravans were begun to be written for the benefits of the merchants. It was during the middle of the first century A. D. that Hippolus, a Greek Egyptian, discovered the regularity of the Indian monsoon and thus facilitated the voyage of the traders. It was also about this time that a Greek merchant wrote "The Periplus of the Erythraean Sea" or guide to the Indian ocean. It is the most authentic document we have for the study of the Indian commercial activity. Another Greek adventurer, Isidore of Charax travelled round the Parthian kingdom and gave a full account of the Caravan trade along the land route. Before this it had to receive the oriental goods from the hands of the others. The Arabs concealed all information relating to India to perpetuate their monopoly and the Parthian tolls greatly augmented the value of the Indian

commodities,"so that all this rich trade that flowed to Rome paid its tolls to the empire of Parthia and to the Arab kingdoms, unless Rome could develop and control a sea-borne trade to India" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_44 But this discovery of the monsoons by Hippolus, the columbus of modern times fulfilled much felt want of the Romans."Great shiftings of national power followed this entry of the Roman shipping into the Indian ocean. One by one Petia and Gerra, Palmyra and Parthia itself, their revenues sapped by the diversion of accustomed trade, fell into Roman hands. The Homerite kingdom in South Arabia fell upon hard times, its capital into ruin, and some to its best men northward and as the Ghassanids bowed the neck to Rome, Abyssinia flourished in proportion as its old enemy declined. If this state of things had continued, the whole course of later events might have changed. Islam might never have appeared, and a greater Rome might have left its system of law and government from the Thames to the Ganges. But the logic of history was too strong. Gradually the treasure that fell to the Roman arms was expended in suppressing insurrections in the conquered provinces in civil wars at home, and in a constant drain of specie to the east in the settlement of adverse trade balances; a drain which was very real and menacing to a nation which made no notable advance in production or industry by means of which new wealth could be created." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_45

As regards the Roman trade with India we have a thesaurus of information though by no means unquestionable.

The first kind of evidence is the number of embassies sent to Rome from India and Ceylon.

The first embassy came from Ceylon and is recorded by Pliny. It is impossible to determine its exact date : but certain. circumstantial evidences would warrant us in placing somewhere between A. D. 41 and 54. It was sent to Claudis and reached him at a time when more serious events such as the intrigues of Agrippina and Messalina's violent death too much occupied the minds of the Roman historian to make an adequate mention of it. The embassy was sent by Chundra Muka Siwa King of Ceylon who ruled from 44 to 52 A. D. mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_46

Other embassies soon followed. The second came to Trojan in A. D. 107, third to Antonius Pius A. D. 138, fourth to Julian A. D. 361 and

the fifth to Justinian A. D. 530. The natives of Indian make no mention of these embassies. They are recorded by Roman historian and barely so, consequently it is very difficult to infer regarding the object of these embassies. They however serve to demonstrate that intercourse between India and Rome was constant and alive and that "during the reign of Servius, his son Commodus, and the pseudoantonines", when Alexandria and Palmyra were both occupied with commerce and were both prosperous. Roman intercourse with India was at its height. Then Roman literature gave more of its attention to Indian matters and did not, as of old, confine itself to quotation from the historians of Alexander or the narratives of the Seleucidian Ambassadors, but drew its information from other and independent sources.
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/46. Ancient Indian Commerce.htm - _msocom_47

Other evidences mostly of a literary character strengthen the same conclusion. Dr. Hirth in his "China and the Roman Orient" quotes Sung-Shu, a Chinese historian 500 A. D. writing about the period 420-478 A. D. saying; "As regards Ta-ts'in (Syria) and I'ien Chu (India) far out on the western ocean, we have to say that, although the envoys of the two Han dynasties have experienced the special difficulties of this road. Yet traffic in merchandise has been effected, and the goods have been sent out to the foreign tribes, the force of winds, driving them far away across the waves of the sea. There are lofty ranges of mountains quite different from those we know and a great variety of populous tribes having different names and bearing uncommon designations, they being of a class quite different from our own. All the precious things of land and water come from them, as well as the gems" made of rhinoceros horns and chrysoprase, serpent pearls and asbestos cloth, there being innumerable varieties of these curiosities : and also the doctrine of the abstraction of mind in devotion to the Lord of the world (Buddha)— all this having caused navigation and trade to be extended to these parts."

Another Chinese historian Ma-Touanlin in his Researches into antiquity says "India (A. D. 500-16) carries on a considerable commerce by sea with Ta-Tsin, the Roman empire and the Ansi or ASE".
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/46. Ancient Indian Commerce.htm - _msocom_48

A writer of considerable acumen makes bold to say after the destruction of Palmyra, direct trade between India and Rome never existed. The Romans, he says, established their trading station at Adule, the chief port of Ethiopia and "though under Constantine there was

much economic prosperity ,yet the Roman trading activity never extended beyond Adule”.

Archaeological discoveries and historical references however point to quite the opposite conclusion. Mr. Vincent Smith remarks;”There is good reason to believe that considerable colonies of Roman subjects engaged in trade were settled in southern India during the first two centuries of our era, and that European soldiers, described as powerful Yavanas, and dumb Mlecchas (barbarians) clad in complete armour, acted as body-guards to Tamil kings, while the large ships of the Yavanas lay off Muziris (Cranganore) to receive the cargoes of pepper paid for by Roman gold”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_49](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46.Ancient Indian Commerce.htm - _msocom_49) Not only were there Roman trading colonies but that”Roman soldiers were enlisted in the service of the Pandyas and Other Tamil kings”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_50](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46.Ancient Indian Commerce.htm - _msocom_50). And”during the reign of the Pandya Aryappadai -Kadaretha - Nedunj - Cheliyan, Roman soldiers were employed to guard the jobs of the fort of Madura”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_51](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46.Ancient Indian Commerce.htm - _msocom_51) Numismatic evidences also bear out the intimate commercial relations between India and Rome.

(Half page of the M.S. is left blank—ed.)

This intimate commercial intercourse between Rome and India is very readily accounted for by the fact that”from the time of Mark Antony to the time of Justinian i. e. from B. C. 30 to A. D. 550, their political, importance as allies against the Parthians and Sassanians, and their commercial importance as controllers of one of the main trade routes between the east and the west, made the friendship of the Kusans or Sakas, who held the Indus Valley and Bactria, a matter of highest importance to Rome”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_52](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46.Ancient Indian Commerce.htm - _msocom_52)

With this short sketch of the trade relations of India with foreign countries we will now consider the articles of commerce and trade routes and the important ports of India.

The Periplus, Ptolemy's Geography and the Christian Topography are the chief sources that furnish with information on the articles of commerce and the ports of India.

The Periplus mentions the following as articles of export :

(1) Spikenard, (2) Cortus,(3)Bdellium, (4) Ivory, (5)Qugate, (6) Lycircm, (7) Cotton cloth of all kinds, (8) Silk cloth, (9) Mallow-cloth,

(10) Yarn, (II) Long pepper, (12) Diamonds, (13) Sapphiris, (14) Tortoise shell, (15) Transperent stones of all kinds, (16) Pearls, (17) Malabathrum (18) Incense, (19) Indigo.

Under imports it mentions: (1) Wine,(2) Copper,(3) Tin,(4) Lead, (5) Coral, (6) Thin clothing and Inferior sorts of all kinds, (7) Sweet clover, (8) Flint and crude glass, (9) Antimony, (10) Gold and Silver coins accruing from the favourable balance of trade.

The Periplus or the marine guide book to the Indian ocean mentions the following trading ports of India :

(1) Barygaza or the modern Baroach the principle trading centre of western India. It mentions two inland towns connected with Baroach, Paitlian and Tagara.

(2) Souppara—modern Supara near Bassein.

(3) Kalliean—the present Kalyan.

(4) Semulla—presumably modern Chembur.

(5) Mandagora.

(6) Palaipatami.

(7) Melizeigara.

(8) Tyndis.

(9) Muziris.

(10) Nelkynda.

“Ptolemy's Geography” describes the whole sea coast from the mouths of the Indus to those of the Ganges, and mentions many towns and ports of commercial importance. These are, among others, Syrastra (Surat), Monoglosson (Mangrol) in Guzerat, Ariake (Maharashtra), Soupara, Muziris, Bakarei, Maisoli (Masli-patnam), Kounagara (Konarak), and other places”.

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm://46. Ancient Indian Commerce.htm - _msocom_53

Certain of the Tamil poets have beautifully described some of the commercial ports and towns in southern India. One of them says, “The thriving town of Muchiri, where the beautiful large ships of the Yavans, bringing gold, come splashing the white foam on the waters of the Periplus which belongs to the Cherala, and return laden with pepper.” “Fish is bartered for paddy, which is brought in baskets to the houses,” says another. “Sacks of pepper are brought from the houses to the market: the gold received from ships, in exchange for articles sold, is brought to shore in barges at Muchiri, where the music of the Surging sea never ceases, and where Kudduvan (the Chera king) presents to

visitors the rare products of the seas and mountains." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_54 The description given of Kaviripaddinam (the Kamara of the Periplus and Khabaris of Ptolemy) or Pukar are equally important and inspiring. It was built on the northern bank of the Kaveri river; then a broad and deep stream in which heavily laden ships entered from the sea without slacking sail. The town was divided into two parts, one of which, Maruvar-Pakkarn, adjoined the sea coast. Near the beach in Maruvar-Pakkarn were raised platforms and godowns and warehouses where the foods landed from ships were stored. Here the goods were stamped with the Tiger stamps (the emblem of the Chola kings) after payment of customs duty, and passed on to merchants' warehouses. Close by were the settlements of the Yavana (foreign) merchants, where many articles were always exposed for sale. Here were also the headquarters of the foreign traders who had come from beyond the seas and who spoke various tongues. Vendors of fragrant pastes and powders, of flowers and incense, tailors who worked on silk, wool, or cotton, traders in sandal, aghil, coral, pearl, gold, and precious stones, grain merchants, washermen, dealers in fish baits, butchers, blacksmiths, braziers, carpenters, coppersmiths, painters, sculptors, goldsmiths, cobblers, and toy-makers all had their habitation in Maravar-Pakkam." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. Ancient Indian Commerce.htm - _msocom_55

The trade routes from India to the west may be conveniently divided under two heads. (1) The land routes and (2) The marine route.

It is truly said that individual migration is a habit of civilized man. Ancient folks, because of their strong gregarious instinct or because of the want of security, always moved in bands. This habit of theirs is well depicted in their methods of trade. Compelled to be peddlars, fear of competition was never too strong to break the tradings. Caravan which moved from place to place with their loaded animals under conditions so Unfavourable that easygoing modern man with all the keen business instinct in him will rather quit worshipping the mamon rather than undergo the difficulties ill-compensated by gain. Speaking of the Caravan Mr. Harbursays, "The very course of the Caravan was not a matter of free choice, but of established custom. In the vast steppes' of sandy deserts, which they had to traverse, nature had sparing allotted to the traveller a few scattered places of rest, where, under the shade of palm trees, and beside the cool fountains at their feet, the merchant and the beast of burden might enjoy the refreshment rendered necessary by

so much suffering. Such places of repose became centreparts of commerce, and not infrequently the sites of temples and sancturies, under the protection of which the marchants prosecuted his trade, and to which the pilgrim resorted.

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/46. [Ancient Indian Commerce.htm - _msocom_56](#) Being subject to these conditions the Caravan route was never a straight one, it was always zigzag and when we look at maps of ancient trade we are struck with a network of small roads meeting and crossing each other at various points. However we may decipher two main trade routes from India to the mediterranean. The northern most followed the river Oxus and encircling the northern basin of the Caspian sea converged on the Black sea and thence to Constantinople. The middle one rather followed a straight path, with many bifurcations which meet at market. It starts on alorig the southern basin of the Caspian Sea through, Tebriz, Erzewm Trebizond and through the Black Sea to Constantinople. These were the two main land trade routes between the India and the west.

There were also two marine routes though one of them was only halfway marine. Of these one was the Red Sea route. Ships from Indian ports crossed the Indian ocean either to southern Africa or sailed upwards, and touched at the ports of southern Arabia and Aden and through the *St. of Babel-mandeb* (the gate of Tears) ploughed the waters of the Re'3 Sea, touching at Jedda on the Arabian coast and Bernice on the Egyptian coast. From Bernice goods were taken by Caravan to Thebes and Kos where they were gained through the Nile to Alexandria and from thence to Europe. The other marine route lay through the Persian gulf. Ships sailed from Baroach and kept bugging close to the land and touched at Masket and at Ormuz through the gulf of Oman to Bassora. From Bassora at the mouth of the Persian gulf, the goods were taken by the Caravan along the shores of the Euphrates and Tygris through Babylonia to Antioch on the mediterranean.

These two marine trade routes continued upto the present tittle but the story of the land trade routes is entirely different. They were closed and were closed for ever and the history of their foreclosure is perhaps the only event in the Asiatic continent that profoundly affected the history of Europe.

ANNIHILATION OF CASTE
PREFACE TO THE SECOND EDITION

The speech prepared by me for the Jat-Pat-Todak Mandal of Lahore has had an astonishingly warm reception from the Hindu public for whom it was primarily intended. The English edition of one thousand five hundred was exhausted within two months of its publication. It is translated into Gujarati and Tamil. It is being translated in Marathi, Hindi, Punjabi and Malayalam. The demand for the English text still continues unabated. To satisfy this demand it has become necessary to issue a Second Edition. Considerations of history and effectiveness of appeal have led me to retain the original form of the essay—namely the speech form—although I was asked to recast it in the form of a direct narrative. To this edition I have added two appendices. I have collected in Appendix I the two articles

written by Mr. Gandhi by way of review of my speech in the *Harijan*, and his letter to Mr. Sant Ram, a member of the Jat-Pat-Todak Mandal. In Appendix II, I have printed my views in reply to the articles of Mr. Gandhi collected in Appendix 1. Besides Mr. Gandhi many others have adversely criticised my views as expressed in my speech. But I have felt that in taking notice of such adverse comments I should limit myself to Mr. Gandhi. This I have done not because what he has said is so weighty as to deserve a reply but because to many a Hindu he is an oracle, so great that when he opens his lips it is expected that the argument must close and no dog must bark. But the world owes much to rebels who would dare to argue in the face of the pontiff and insist that he is not infallible. I do not care for the credit which every progressive society must give to its rebels. I shall be satisfied if I make the Hindus realize that they are the sick men of India and that their sickness is causing danger to the health and happiness of other Indians.

B. R. AMBEDKAR

PREFACE TO THE THIRD EDITION

The Second edition of this Essay appeared in 1937, and was exhausted within a very short period. A new edition has been in demand for a long time. It was my intention to recast the essay so as to incorporate into it another essay of mine called "*Castes in India, their Origin and their Mechanism*", which appeared in the issue of the Indian Antiquary Journal for May 1917. But as I could not find time, and as there is very little prospect of my being able to do so and as the demand for it from the public is very insistent, I am content to let this be a mere reprint of the Second edition.

I am glad to find that this essay has become so popular, and I hope that it will serve the purpose for which it was intended.

22, Prithwiraj Road

New Delhi 1st December 1944

B. R. AMBEDKAR

PROLOGUE

On December 12, 1935, I received the following letter from Mr. Sant Ram, the Secretary of the Jat-Pat-Todak Mandal :

My dear Doctor Saheb,

Many thanks for your kind letter of the 5th December. I have released it for press without your permission for which I beg your pardon, as I saw no harm in giving it publicity. You are a great thinker, and it is my well-considered opinion that none else has studied the problem of Caste so deeply as you have. I have always benefited myself and our Mandal from

your ideas. I have explained and preached it in the *Kranti* many times and I have even lectured on it in many Conferences. I am now very anxious to read the exposition of your new formula—"It is not possible to break Caste without annihilating the religious notions on which it, the Caste system, is founded." Please do explain it at length at your earliest convenience, so that we may take up the idea and emphasise it from press and platform. At present, it is not fully clear to me.

* * * * *

Our Executive Committee persists in having you as our President for our Annual Conference. We can change our dates to accommodate your convenience. Independent Harijans of Punjab are very much desirous to meet you and discuss with you their plans. So if you kindly accept our request and come to Lahore to preside over the Conference it will serve double purpose. We will invite Harijan leaders of all shades of opinion and you will get an opportunity of giving your ideas to them.

The Mandal has deputed our Assistant Secretary, Mr. Indra Singh, to meet you at Bombay in Xmas and discuss with you the whole situation with a view to persuade you to please accept our request.

* * * * *

The Jat-Pat-Todak Mandal, I was given to understand, to be an organization of Caste Hindu Social Reformers, with the one and only aim, namely to eradicate the Caste System from amongst the Hindus. As a rule, I do not like to take any part in a movement which is carried on by the Caste Hindus. Their attitude towards social reform is so different from mine that I have found it difficult to pull on with them. Indeed, I find their company quite uncongenial to me on account of our differences of opinion. Therefore when the Mandal first approached me I declined their invitation to preside. The Mandal, however, would not take a refusal from me and sent down one of its members to Bombay to press me to accept the invitation. In the end I agreed to preside. The Annual Conference was to be held at Lahore, the headquarters of the Mandal. The Conference was to meet in Easter but was subsequently postponed to the middle of May 1936. The Reception Committee of the Mandal has now cancelled the Conference. The notice of cancellation came long after my Presidential address had been printed. The copies of this address are now lying with me. As I did not get an opportunity to deliver the address from the presidential chair the public has not had an opportunity to know my views on the problems created by the Caste System. To let the public know them and also to dispose of the printed copies which are lying on my hand, I have decided to put the printed copies of the address in the market. The

accompanying pages contain the text of that address.

The public will be curious to know what led to the cancellation of my appointment as the President of the Conference. At the start, a dispute arose over the printing of the address. I desired that the address should be printed in Bombay. The Mandal wished that it should be printed in Lahore on the ground of economy. I did not agree and insisted upon having it printed in Bombay. Instead of agreeing to my proposition I received a letter signed by several members of the Mandal from which I give the following extract :

27-3-36

Revered Dr. Ji,

Your letter of the 24th instant addressee to Sjt. Sant Ram has been shown to us. We were a little disappointed to read it. Perhaps you are not fully aware of the situation that has arisen here. Almost all the Hindus in the Punjab are against your being invited to this province. The Jat-Pat-Todak Mandal has been subjected to the bitterest criticism and has received censorious rebuke from all quarters. All the Hindu leaders among whom being Bhai Parmanand, M-L.A. (Ex-President, Hindu Maha Sabha), Mahatma Hans Raj, Dr. Gokal Chand Narang, Minister for Local Self-Government, Raja Narendra Nath, M.L.C. etc., have dissociated themselves from this step of the Mandal.

Despite all this the runners of the Jat-Pat-Todak Mandal (the leading figure being Sjt. Sant Ram) are determined to wade through thick and thin but would not give up the idea of your presidentship. The Mandal has earned a bad name.

* * * * *

Under the circumstances it becomes your duty to co-operate with the Mandal. On the one hand, they are being put to so much trouble and hardship by the Hindus and if on the other hand you too augment their difficulties it will be a most sad coincidence of bad luck for them.

We hope you will think over the matter and do what is good for us all.

* * * * *

This letter puzzled me greatly. I could not understand why the Mandal should displease me for the sake of a few rupees in the matter of printing the address. Secondly, I could not believe that men like Sir Gokal Chand Narang had really resigned as a protest against my selection as President because I had received the following letter from Sir Gokal Chand himself :

5 Montgomery Road

Lahore,
7-2-36

Dear Doctor Ambedkar,

I am glad to learn from the workers of the Jat-Pat-Todak Mandal that you have agreed to preside at their next anniversary to be held at Lahore during the Easter holidays, it will give me much pleasure if you stay with me while you are at Lahore. More when we meet.

Yours sincerely,
G. C. NARANG

Whatever be the truth I did not yield to this pressure. But even when the Mandal found that I was insisting upon having my address printed in Bombay instead of agreeing to my proposal the Mandal sent me a wire that they were sending Mr. Har Bhagwan to Bombay to "talk over matters personally" Mr. Har Bhagwan came to Bombay on the 9th of April. When I met Mr. Har Bhagwan I found that he had nothing to say regarding the issue. Indeed he was so unconcerned regarding the printing of the address, whether it should be printed in Bombay or in Lahore, that he did not even mention it in the course of our conversation. All that he was anxious for was to know the contents of the address. I was then convinced that in getting the address printed in Lahore the main object of the Mandal was not to save money but to get at the contents of the address. I gave him a copy. He did not feel very happy with some parts of it. He returned to Lahore. From Lahore, he wrote to me the following letter :

Lahore,
dated April 14, 1936

My dear Doctor Sahib,

Since my arrival from Bombay, on the 12th, I have been indisposed owing to my having not slept continuously for 5 or 6 nights, which were spent in the train. Reaching here I came to know that you had come to Amritsar. I would have seen you there if I were well enough to go about. I have made over your address to Mr. Sant Ram for translation and he has liked it very much, but he is not sure whether it could be translated by him for printing before the 25th. In any case, it would have a wide publicity and

we are sure it would wake the Hindus up from their slumber.

The passage I pointed out to you at Bombay has been read by some of our friends with a little misgiving, and those of us who would like to see the Conference terminate without any untoward incident would prefer that at least the word "Veda" be left out for the time being. I leave this to your good sense. I hope, however, in your concluding paragraphs you will make it clear that the views expressed in the address are your own and that the responsibility does not lie on the Mandal. I hope, you will not mind this statement of mine and would let us have 1,000 copies of the address, for which we shall, of course, pay. To this effect I have sent you a telegram today. A cheque of Rs. 100 is enclosed herewith which kindly acknowledge, and send us your bills in due time.

I have called a meeting of the Reception Committee and shall communicate their decision to you immediately. In the meantime kindly accept my heartfelt thanks for the kindness shown to me and the great pains taken by you in the preparation of your address. You have really put us under a heavy debt of gratitude.

Yours sincerely,
HAR BHAGWAN

P.S.—Kindly send the copies of the address by passenger train as soon as it is printed, so that copies may be sent to the Press for publication.

Accordingly I handed over my manuscript to the printer with an order to print 1,000 copies. Eight days later, I received another letter from Mr. Har Bhagwan which I reproduce below :

Lahore,
22-4-36

Dear Dr. Ambedkar,

We are in receipt of your telegram and letter, for which kindly accept our thanks. In accordance with your desire, we have again postponed our Conference, but feel that it would have been much better to have it on the 25th and 26th, as the weather is growing warmer and warmer every day in the Punjab. In the middle of May it would be fairly hot, and the sittings in the day time would not be very pleasant and comfortable. However, we shall try our best to do all we can to make things as comfortable as possible, if it is held in the middle of May.

There is, however, one thing that we have been compelled to bring to your kind attention. You will remember that when I pointed out to you the misgivings entertained by some of our people regarding your declaration

on the subject of change of religion, you told me that it was undoubtedly outside the scope of the Mandal and that you had no intention to say anything from our platform in that connection. At the same time when the manuscript of your address was handed to me you assured me that that was the main portion of your address and that there were only two or three concluding paragraphs that you wanted to add. On receipt of the second instalment of your address we have been taken by surprise, as that would make it so lengthy, that we are afraid, very few people would read the whole of it. Besides that you have more than once stated in your address that you had decided to walk out of the fold of the Hindus and that that was your last address as a Hindu. You have also unnecessarily attacked the morality and reasonableness of the *Vedas* and other religious books of the Hindus, and have at length dwelt upon the technical side of Hindu religion, which has absolutely no connection with the problem at issue, so much so that some of the passages have become irrelevant and off the point. We would have been very pleased if you had confined your address to that portion given to me, or if an addition was necessary, it would have been limited to what you had written on Brahminism etc. The last portion which deals with the complete annihilation of Hindu religion and doubts the morality of the sacred books of the Hindus as well as a hint about your intention to leave the Hindu fold does not seem to me to be relevant.

I would therefore most humbly request you on behalf of the people responsible for the Conference to leave out the passages referred to above, and close the address with what was given to me or add a few paragraphs on Brahminism. We doubt the wisdom of making the address unnecessarily provocative and pinching. There are several of us who subscribe to your feelings and would very much want to be under your banner for remodelling of the Hindu religion. If you had decided to get together persons of your cult I can assure you a large number would have joined your army of reformers from the Punjab.

In fact, we thought you would give us a lead in the destruction of the evil of caste system, especially when you have studied the subject so thoroughly, and strengthen our hands by bringing about a revolution and making yourself as a nucleus in the gigantic effort, but declaration of the nature made by you when repeated loses its power, and becomes a hackneyed term. Under the circumstances, I would request you to consider the whole matter and make your address more effective by saying that you would be glad to take a leading part in the destruction of the caste system if the Hindus are willing to work in right earnest toward that end, even if they had to forsake their kith and kin and the religious notions. In case you do

so, I am sanguine that you would find a ready response from the Punjab in such an endeavour.

I shall be grateful if you will help us at this juncture as we have already undergone much expenditure and have been put to suspense, and let us know by the return of post that you have condescended to limit your address as above. In case, you still insist upon the printing of the address *in toto*, we very much regret it would not be possible—rather advisable for us to hold the Conference, and would prefer to postpone it *sine die*, although by doing so we shall be losing the goodwill of the people because of the repeated postponements. We should, however, like to point out that you have carved a niche in our hearts by writing such a wonderful treatise on the caste system, which excels all other treatises so far written and will prove to be a valuable heritage, so to say. We shall be ever indebted to you for the pains taken by you in its preparation.

Thanking you very much for your kindness and with best wishes.

I am,
Yours sincerely,
HAR BHAGWAN

To this letter I sent the following reply :

27th April 1936

Dear Mr. Har Bhagwan,

I am in receipt of your letter of the 22nd April. I note with regret that the Reception Committee of the Jat-Pat-Todak Mandal would prefer to postpone the Conference *sine die* if I insisted upon printing the address *in toto*. In reply I have to inform you that I also would prefer to have the Conference cancelled—I do not like to use vague terms—if the Mandal insisted upon having my address pruned to suit its circumstances. You may not like my decision. But I cannot give up, for the sake of the honour of presiding over the Conference, the liberty which every President must have in the preparation of the address. I cannot give up for the sake of pleasing the Mandal the duty which every President owes to the Conference over which he presides to give it a lead which he thinks right and proper. The issue is one of principle and I feel I must do nothing to compromise it in any way.

I would not have entered into any controversy as regards the propriety of the decision taken by the Reception Committee. But as you have given certain reasons which appear to throw the blame on me. I am bound to answer them. In the first place, I must dispel the notion that the views contained in that part of the address to which objection has been taken by

the Committee have come to the Mandal as a surprise. Mr. Sant Ram, I am sure, will bear me out when I say that in reply to one of his letters I had said that the real method of breaking up the Caste System was not to bring about inter-caste dinners and inter-caste marriages but to destroy the religious notions on which Caste was founded and that Mr. Sant Ram in return asked me to explain what he said was a novel point of view. It was in response to this invitation from Mr. Sant Ram that I thought I ought to elaborate in my address what I had stated in a sentence in my letter to him. You cannot, therefore, say that the views expressed are new. At any rate, they are not new to Mr. Sant Ram who is the moving spirit and the leading light of your Mandal. But I go further and say that I wrote this part of my address not merely because I felt it desirable to do so. I wrote it because I thought that it was absolutely necessary to complete the argument. I am amazed to read that you characterize the portion of the speech to which your Committee objects as "irrelevant and off the point". You will allow me to say that I am a lawyer and I know the rules of relevancy as well as any member of your Committee. I most emphatically maintain that the portion objected to is not only most relevant but is also important. It is in that part of the address that I have discussed the ways and means of breaking up the Caste System. It may be that the conclusion I have arrived at as to the best method of destroying Caste is startling and painful. You are entitled to say that my analysis is wrong. But you cannot say that in an address which deals with the problem of Caste it is not open to me to discuss how Caste can be destroyed.

Your other complaint relates to the length of the address. I have pleaded guilty to the charge in the address itself. But, who is really responsible for this? I fear you have come rather late on the scene. Otherwise you would have known that originally I had planned to write a short address for my own convenience as I had neither the time nor the energy to engage myself in the preparation of an elaborate thesis. It was the Mandal who asked me to deal with the subject exhaustively and it was the Mandal which sent down to me a list of questions relating to the Caste System and asked me to answer them in the body of my address as they were questions which were often raised in the controversy between the Mandal and its opponents and which the Mandal found difficult to answer satisfactorily. It was in trying to meet the wishes of the Mandal in this respect that the address has grown to the length to which it has. In view of what I have said I am sure you will agree that the fault respecting length of the address is not mine.

I did not expect that your Mandal would be so upset because I have spoken of the destruction of Hindu Religion. I thought it was only fools

who were afraid of words. But lest there should be any misapprehension in the minds of the people I have taken great pains to explain what I mean by religion and destruction of religion. I am sure that nobody on reading my address could possibly misunderstand me. That your Mandal should have taken a fright at mere words as "destruction of religion etc." notwithstanding the explanation that accompanies them does not raise the Mandal in my estimation. One cannot have any respect or regard for men who take the position of the Reformer and then refuse even to see the logical consequences of that position, let alone following them out in action.

You will agree that I have never accepted to be limited in any way in the preparation of my address and the question as to what the address should or should not contain was never even discussed between myself and the Mandal. I had always taken for granted that I was free to express in the address such views as I held on the subject. Indeed until, you came to Bombay on the 9th April the Mandal did not know what sort of an address I was preparing. It was when you came to Bombay that I voluntarily told you that I had no desire to use your platform from which to advocate my views regarding change of religion by the Depressed Classes. I think I have scrupulously kept that promise in the preparation of the address. Beyond a passing reference of an indirect character where I say that "I am sorry I will not be here. . . etc." I have said nothing about the subject in my address. When I see you object even to such a passing and so indirect a reference, I feel bound to ask ; did you think that in agreeing to preside over your Conference I would be agreeing to suspend or to give up my views regarding change of faith by the Depressed Classes? If you did think so I must tell you that I am in no way responsible for such a mistake on your part. If any of you had even hinted to me that in exchange for the honour you were doing me by electing as President, I was to abjure my faith in my programme of conversion, I would have told you in quite plain terms that I cared more for my faith than for any honour from you.

After your letter of the 14th, this letter of yours comes as a surprize to me. I am sure that any one who reads them will feel the same. I cannot account for this sudden *volte face* on the part of the Reception Committee. There is no difference in substance between the rough draft which was before the Committee when you wrote your letter of the 14th and the final draft on which the decision of the Committee communicated to me in your letter under reply was taken. You cannot point out a single new idea in the final draft which is not contained in the earlier draft. The ideas are the same. The only difference is that they have been worked out in greater

detail in the final draft. If there was anything to object to in the address you could have said so on the 14th. But you did not. On the contrary you asked me to print off 1,000 copies leaving me the liberty to accept or not the verbal changes which you suggested. Accordingly I got 1,000 copies printed which are now lying with me. Eight days later you write to say that you object to the address and that if it is not amended the Conference will be cancelled. You ought to have known that there was no hope of any alteration being made in the address. I told you when you were in Bombay that I would not alter a comma, that I would not allow any censorship over my address and that you would have to accept the address as it came from me. I also told you that the responsibility for the views expressed in the address was entirely mine and if they were not liked by the Conference I would not mind at all if the Conference passed a resolution condemning them. So anxious was I to relieve your Mandal from having to assume responsibility for my views and also with the object of not getting myself entangled by too intimate an association with your Conference, I suggested to you that I desired to have my address treated as a sort of an inaugural address and not as a Presidential address and that the Mandal should find some one else to preside over the Conference, and deal with the resolutions. Nobody could have been better placed to take a decision on the 14th than your Committee. The Committee failed to do that and in the meantime cost of printing has been incurred which, I am sure, with a little more firmness on the part of your Committee could have been saved.

I feel sure that the views expressed in my address have little to do with the decision of your Committee. I have reasons to believe that my presence at the Sikh Prachar Conference held at Amritsar has had a good deal to do with the decision of the Committee. Nothing else can satisfactorily explain the sudden *volte face* shown by the Committee between the 14th and the 22nd April. I must not however prolong this controversy and must request you to announce immediately that the Session of the Conference which was to meet under my Presidentship is cancelled. All the grace has by now run out and I shall not consent to preside even if your Committee agreed to accept my address as it is- *in toto*. I thank you for your appreciation of the pains I have taken in the preparation of the address. I certainly have profited by the labour if no one else does. My only regret is that I was put to such hard labour at a time when my health was not equal to the strain it has caused.

Yours sincerely,
B. R. AMBEDKAR

This correspondence will disclose the reasons which have led to the cancellation by the Mandal of my appointment as President and the reader will be in a position to lay the blame where it ought properly to belong. This is I believe the first time when the appointment of a President is cancelled by the Reception Committee because it does not approve of the views of the President. But whether that is so or not, this is certainly the first time in my life to have been invited to preside over a Conference of Caste Hindus. I am sorry that it has ended in a tragedy. But what can any one expect from a relationship so tragic as the relationship between the reforming sect of Caste Hindus and the self-respecting sect of Untouchables where the former have no desire to alienate their orthodox fellows and the latter have no alternative but to insist upon reform being carried out?

Rajgriha,
Dadar, Bombay 14 15th May 1936
AMBEDKAR

**SPEECH PREPARED BY
Dr. B. R. AMBEDKAR
FOR**

The 1936 Annual Conference of the Jat-Pat-Todak Mandal of
Lahore

BUT NOT DELIVERED

Owing to the cancellation of the Conference by the Reception Committee on the ground that the views expressed in the Speech would be unbearable to the Conference

Friends,

I am really sorry for the members of the Jat-Pat-Todak Mandal who have so very kindly invited me to preside over this Conference. I am sure they will be asked many questions for having selected me as the President. The Mandal will be asked to explain as to why it has imported a man from Bombay to preside over a function which is held in Lahore. I believe the Mandal could easily have found some one better qualified than myself to preside on the occasion. I have criticised the Hindus. I have questioned the authority of the Mahatma whom they revere. They hate me. To them I am a snake in their garden. The Mandal will no doubt be asked by the politically-minded Hindus to explain why it has called me to fill this place of honour. It is an act of great daring. I shall not be surprised if some

political Hindus regard it as an insult. This selection of mine cannot certainly please the ordinary religiously-minded Hindu. The Mandal may be asked to explain why it has disobeyed the *Shastric* injunction in selecting the President. According to the *Shastras* the Brahmin is appointed to be the Guru for the three *Varnas*, *varnanam bramhano garu*, is a direction of the *Shastras*. The Mandal therefore knows from whom a Hindu should take his lessons and from whom he should not. The *Shastras* do not permit a Hindu to accept any one as his Guru merely because he is well versed. This is made very clear by Ramdas, a Brahmin saint from Maharashtra, who is alleged to have inspired Shivaji to establish a Hindu Raj. In his *Dasbodh*, a socio-politico-religious treatise in Marathi verse Ramdas asks, addressing the Hindus, can we accept an Antyaja to be our Guru because he is a Pandit (*i.e. learned*) and gives an answer in the negative. What replies to give to these questions is a matter which I must leave to the Mandal. The Mandal knows best the reasons which led it to travel to Bombay to select a president, to fix upon a man so repugnant to the Hindus and to descend so low in the scale as to select an Antyaja—an untouchable—to address an audience of the *Savarnas*. As for myself you will allow me to say that I have accepted the invitation much against my will and also against the will of many of my fellow untouchables. I know that the Hindus are sick of me. I know that I am not a *persona grata* with them. Knowing all this I have deliberately kept myself away from them. I have no desire to inflict myself upon them. I have been giving expression to my views from my own platform. This has already caused a great deal of heartburning and irritation. I have no desire to ascend the platform of the Hindus to do within their sight what I have been doing within their hearing. If I am here it is because of your choice and not because of my wish. Yours is a cause of social reform. That cause has always made an appeal to me and it is because of this that I felt I ought not to refuse an opportunity of helping the cause especially when you think that I can help it. Whether what I am going to say today will help you in any way to solve the problem you are grappling with is for you to judge. All I hope to do is to place before you my views on the problem.

II

The path of social reform like the path to heaven at any rate in India, is strewn with many difficulties. Social reform in India has few friends and many critics. The critics fall into two distinct classes. One class consists of political reformers and the other of the socialists.

It was at one time recognized that without social efficiency no permanent progress in the other fields of activity was possible, that owing to mischief

wrought by the evil customs, Hindu Society was not in a state of efficiency and that ceaseless efforts must be made to eradicate these evils. It was due to the recognition of this fact that the birth of the National Congress was accompanied by the foundation of the Social Conference. While the Congress was concerned with defining the weak points in the political organisation of the country, the Social Conference was engaged in removing the weak points in the social organisation of the Hindu Society. For some time the Congress and the Conference worked as two wings of one common activity and they held their annual sessions in the same pandal. But soon the two wings developed into two parties, a Political Reform Party and a Social Reform Party, between whom there raged a fierce controversy. The Political Reform Party supported the National Congress and Social Reform Party supported the Social Conference. The two bodies thus became two hostile camps. The point at issue was whether social reform should precede political reform. For a decade the forces were evenly balanced and the battle was fought without victory to either side. It was however evident that the fortunes of the; Social Conference were ebbing fast. The gentlemen who presided over the sessions of the Social Conference lamented that the majority of the educated Hindus were for political advancement and indifferent to social reform and that while the number of those who attended the Congress was very large and the number who did not attend but who sympathized with it even larger, the number of those who attended the Social Conference was very much smaller. This indifference, this thinning of its ranks was soon followed by active hostility from the politicians. Under the leadership of the late Mr. Tilak, the courtesy with which the Congress allowed the Social Conference the use of its pandal was withdrawn and the spirit of enmity went to such a pitch that when the Social Conference desired to erect its own pandal a threat to burn the pandal was held out by its opponents. Thus in course of time the party in favour of political reform won and the Social Conference vanished and was forgotten. The speech, delivered by Mr. W. C. Bonnerji in 1892 at Allahabad as President of the eighth session of the Congress, sounds like a funeral oration at the death of the Social Conference and is so typical of the Congress attitude that I venture to quote from it the following extract. Mr. Bonnerji said :

“I for one have no patience with those who saw we shall not be fit for political reform until we reform our social system. I fail to see any connection between the two. . .Are we not fit (for political reform) because our widows remain unmarried and our girls are given in marriage earlier than in other countries? because our wives and daughters do not

drive about with us visiting our friends? because we do not send our daughters to Oxford and Cambridge?"(Cheers)'

I have stated the case for political reform as put by Mr. Bonnerji. There were many who are happy that the victory went to the Congress. But those who believe in the importance of social reform may ask, is the argument such as that of Mr. Bonnerji final? Does it prove that the victory went to those who were in the right? Does it prove conclusively that social reform has no bearing on political reform? It will help us to understand the matter if I state the other side of the case. I will draw upon the treatment of the untouchables for my facts.

Under the rule of the Peshwas in the Maratha country the untouchable was not allowed to use the public streets if a Hindu was coming along lest he should pollute the Hindu by his shadow. The untouchable was required to have a black thread either on his wrist or in his neck as a sign or a mark to prevent the Hindus from getting themselves polluted by his touch through mistake. In Poona, the capital of the Peshwa, the untouchable was required to carry, strung from his waist, a broom to sweep away from behind the dust he treaded on lest a Hindu walking on the same should be polluted. In Poona, the untouchable was required to carry an earthen pot, hung in his neck wherever he went, for holding his spit lest his spit falling on earth should pollute a Hindu who might unknowingly happen to tread on it. Let me take more recent facts. The tyranny practised by the Hindus upon the Balais, an untouchable community in Central India, will serve my purpose. You will find a report of this in the *Times of India* of 4th January 1928."The correspondent of the *Times of India* reported that high caste Hindus, viz. Kalotas, Rajputs and Brahmins including the Patels and Patwaris of villages of Kanaria, Bicholi-Hafsi, Bicholi-Mardana and of about 15 other villages in the Indore district (of the Indore State) informed the Balais of their respective villages that if they wished to live among them they must conform to the following rules :

- (1) Balais must not wear gold-lace-bordered pugrees.
- (2) They must not wear dhotis with coloured or fancy borders.
- (3) They must convey intimation of the death of any Hindu to relatives of the deceased—no matter how far away these relatives may be living.
- (4) In all Hindu marriages, Balais must play music before the processions and during the marriage.
- (5) Balai women must not wear gold or silver ornaments; they must not wear fancy gowns or jackets.
- (6) Balai women must attend all cases of confinement of Hindu women.

- (7) Balais must render services without demanding remuneration and must accept whatever a Hindu is pleased to give.
- (8) If the Balais do not agree to abide by these terms they must clear out of the villages. The Balais refused to comply; and the Hindu element proceeded against them. Balais were not allowed to get water from the village wells; they were not allowed to let go their cattle to graze. Balais were prohibited from passing through land owned by a Hindu, so that if the field of a Balai was surrounded by fields owned by Hindus, the Balai could have no access to his own field. The Hindus also let their cattle graze down the fields of Balais. The Balais submitted petitions to the Darbar against these persecutions ; but as they could get no timely relief, and the oppression continued, hundreds of Balais with their wives and children were obliged to abandon their homes in which their ancestors lived for generations and to migrate to adjoining States, viz. to villages in Dhar, Dewas, Bagli, Bhopal, Gwalior and other States. What happened to them in their new homes may for the present be left out of our consideration. The incident at Kavitha in Gujarat happened only last year. The Hindus of Kavitha ordered the untouchables not to insist upon sending their children to the common village school maintained by Government. What sufferings the untouchables of Kavitha had to undergo for daring to exercise a civic right against the wishes of the Hindus is too well known to need detailed description. Another instance occurred in the village of Zanu in the Ahmedabad district of Gujarat. In November 1935 some untouchable women of well-to-do families started fetching water in metal pots. The Hindus looked upon the use of metal pots by untouchables as an affront to their dignity and assaulted the untouchable women for their impudence. A most recent event is reported from the village Chakwara in Jaipur State. It seems from the reports that have appeared in the newspapers that an untouchable of Chakwara who had returned from a pilgrimage had arranged to give a dinner to his fellow untouchables of the village as an act of religious piety. The host desired to treat the guests to a sumptuous meal and the items served included *ghee* (butter) also. But while the assembly of untouchables was engaged in partaking of the food, the Hindus in their hundred, armed with lathis, rushed to the scene, despoiled the food and belaboured the untouchables who left the food they were served with and ran away for their lives. And why was this murderous assault committed on defenceless untouchables? The reason given is that the untouchable host was impudent enough

to serve ghee and his untouchable guests were foolish enough to taste it. Ghee is undoubtedly a luxury for the rich. But no one would think that consumption of ghee was a mark of high social status. The Hindus of Chakwara thought otherwise and in righteous indignation avenged themselves for the wrong done to them by the untouchables, who insulted them by treating ghee as an item of their food which they ought to have known could not be theirs, consistently with the dignity of the Hindus. This means that an untouchable must not use ghee even if he can afford to buy it, since it is an act of arrogance towards the Hindus. This happened on or about the 1st of April 1936 !

Having stated the facts, let me now state the case for social reform. In doing this, I will follow Mr. Bonnerji, as nearly as I can and ask the political-minded Hindus "Are you fit for political power even though you do not allow a large class of your own countrymen like the untouchables to use public school? Are you fit for political power even though you do not allow them the use of public wells? Are you fit for political power even though you do not allow them the use of public streets? Are you fit for political power even though you do not allow them to wear what apparel or ornaments they like? Are you fit for political power even though you do not allow them to eat any food they like?" I can ask a string of such questions. But these will suffice, I wonder what would have been the reply of Mr. Bonnerji. I am sure no sensible man will have the courage to give an affirmative answer. Every Congressman who repeats the dogma of Mill that one country is not fit to rule another country must admit that one class is not fit to rule another class.

How is it then that the Social Reform Party lost the battle? To understand this correctly it is necessary, to take note of the kind of social reform which the reformers were agitating for. In this connection it is necessary to make a distinction between social reform in the sense of the reform of the Hindu Family and social reform in the sense of the reorganization and reconstruction of the Hindu Society. The former has relation to widow remarriage, child marriage etc., while the latter relates to the abolition of the Caste System. The Social Conference was a body which mainly concerned itself with the reform of the high caste Hindu Family. It consisted mostly of enlightened high caste Hindus who *did* not feel the necessity for agitating for the abolition of caste or had not the courage to agitate for it. They felt quite naturally a greater urge to remove such evils as enforced widowhood, child marriages etc., evils which prevailed among them and which were personally felt by them. They did not stand up for

the reform of the Hindu society. The battle that was fought centered round the question of the reform of the family. It did not relate to the social reform in the sense of the break-up of the caste system. It was never put in issue by the reformers. That is the reason why the Social Reform Party lost.

I am aware that this argument cannot alter the fact that political reform did in fact gain precedence over social reform. But the argument has this much value if not more. It explains why social reformers lost the battle. It also helps us to understand how limited was the victory which the Political Reform Party obtained over the Social Reform Party and that the view that social reform need not precede political reform is a view which may stand only when by social reform is meant the reform of the family. That political reform cannot with impunity take precedence over social reform in the sense of reconstruction of society is a thesis which, I am sure, cannot be controverted. That the makers of political constitutions must take account of social forces is a fact which is recognized by no less a person than Ferdinand Lassalle, the friend and co-worker of Karl Marx. In addressing a Prussian audience in 1862 Lassalle said :

“The constitutional questions are in the first instance not questions of right but questions of might. The actual constitution of a country has its existence only in the actual condition of force which exists in the country : hence political constitutions have value and permanence only when they accurately express those conditions of forces which exist in practice within a society”

But it is not necessary to go to Prussia. There is evidence at home. What is the significance of the Communal Award with its allocation of political power in defined proportions to diverse classes and communities? In my view, its significance lies in this that political constitution must take note of social organisation. It shows that the politicians who denied that the social problem in India had any bearing on the political problem were forced to reckon with the social problem in devising the constitution. The Communal Award is so to say the nemesis following upon the indifference and neglect of social reform. It is a victory for the Social Reform Party which shows that though defeated they were in the right in insisting upon the importance of social reform. Many, I know, will not accept this finding. The view is current, and it is pleasant to believe in it, that the Communal Award is unnatural and that it is the result of an unholy alliance between the minorities and the bureaucracy. I do not wish to rely on the Communal Award as a piece of evidence to support my contention if it is said that it is not good evidence. Let us turn to Ireland. What does the history of Irish Home Rule show? It is well-known that in the course of the negotiations

between the representatives of Ulster and Southern Ireland, Mr. Redmond, the representative of Southern Ireland, in order to bring Ulster in a Home Rule Constitution common to the whole of Ireland said to the representatives of Ulster :”Ask any political safeguards you like and you shall have them.”What was the reply that Ulstermen gave? Their reply was”Damn your safeguards, we don't want to be ruled by you on any terms.”People who blame the minorities in India ought to consider what would have happened to the political aspirations of the majority if the minorities had taken the attitude which Ulster took. Judged by the attitude of Ulster to Irish Home Rule, is it noting that the minorities agreed to be ruled by the majority which has not shown much sense of statesmanship, provided some safeguards were devised for them? But this is only incidental. The main question is why did Ulster take this attitude? The only answer I can give is that there was a social problem between Ulster and Southern Ireland the problem between Catholics and Protestants, essentially a problem of Caste. That Home Rule in Ireland would be Rome Rule was the way in which the Ulstermen had framed their answer. But that is only another way of stating that it was the social problem of Caste between the Catholics and Protestants, which prevented the solution of the political problem. This evidence again is sure to be challenged. It will be urged that here too the hand of the Imperialist was at work. But my resources are not exhausted. I will give evidence from the History of Rome. Here no one can say that any evil genius was at work. Any one who has studied the History of Rome will know that the Republican Constitution of Rome bore marks having strong resemblance to the Communal Award. When the kingship in Rome was abolished, the Kingly power or the *Imperium* was divided between the Consuls and the Pontifex Maximus. In the Consuls was vested the secular authority of the King, while the latter took over the religious authority of King. This Republican Constitution had provided that, of the two Consuls one was to be Patrician and the other Plebian. The same constitution had also provided that, of the Priests under the Pontifex Maximus, half were to be Plebians and the other half Patricians. Why is it that the Republican Constitution of Rome had these provisions which, as I said, resemble so strongly the provisions of the Communal Award? The only answer one can get is that the Constitution of Republican Rome had to take account of the social division between the Patricians and the Plebians, who formed two distinct castes. To sum up, let political reformers turn to any direction they like, they will find that in the making of a constitution, they cannot ignore the problem arising out of the prevailing social order.

The illustrations which I have taken in support of the proposition that social and religious problems have a bearing on political constitutions seem to be too particular. Perhaps they are. But it should not be supposed that the bearing of the one on the other is limited. On the other hand one can say that generally speaking History bears out the proposition that political revolutions have always been preceded by social and religious revolutions.

The religious Reformation started by Luther was the precursor of the political emancipation of the European people. In England Puritanism led to the establishment of political liberty. Puritanism founded the new world. It was Puritanism which won the war of American Independence and Puritanism was a religious movement. The same is true of the Muslim Empire. Before the Arabs became a political power they had undergone a thorough religious revolution started by the Prophet Mohammad. Even Indian History supports the same conclusion. The political revolution led by Chandragupta was preceded by the religious and social revolution of Buddha. The political revolution led by Shivaji was preceded by the religious and social reform brought about by the saints of Maharashtra. The political revolution of the Sikhs was preceded by the religious and social revolution led by Guru Nanak. It is unnecessary to add more illustrations. These will suffice to show that the emancipation of the mind and the soul is a necessary preliminary for the political expansion of the people.

III

Let me now turn to the Socialists. Can the Socialists ignore the problem arising out of the social order? The Socialists of India following their fellows in Europe are seeking to apply the economic interpretation of history to the facts of India. They propound that man is an economic creature, that his activities and aspirations are bound by economic facts, that property is the only source of power. They, therefore, preach that political and social reforms are but gigantic illusions and that economic reform by equalization of property must have precedence over every other kind of reform. One may join issue on every one of these premises on which rests the Socialists' case for economic reform having priority over every other kind of reform. One may contend that economic motive is not the only motive by which man is actuated. That economic power is the only kind of power no student of human society can accept. That the social status of an individual by itself often becomes a source of power and authority is made clear by the sway which the Mahatmas have held over the common man. Why do millionaires in India obey penniless Sadhus and

Fakirs? Why do millions of paupers in India sell their trifling trinkets which constitute their only wealth and go to Benares and Mecca? That, religion is the source of power is illustrated by the history of India where the priest holds a sway over the common man often greater than the magistrate and where everything, even such things as strikes and elections, so easily take a religious turn and can so easily be given a religious twist. Take the case of the Plebians of Rome as a further illustration of the power of religion over man. It throws great light on this point. The Plebs had fought for a share in the supreme executive under the Roman Republic and had secured the appointment of a Plebian Consul elected by a separate electorate constituted by the *Comitia Centuriata*, which was an assembly of Plebians. They wanted a Consul of their own because they felt that the Patrician Consuls used to discriminate against the Plebians in carrying on the administration. They had apparently obtained a great gain because under the Republican Constitution of Rome one Consul had the power of vetoing an act of the other Consul. But did they in fact gain anything? The answer to this question must be in the negative. The Plebians never could get a Plebian Consul who could be said to be a strong man and who could act independently of the Patrician Consul. In the ordinary course of things the Plebians should have got a strong Plebian Consul in view of the fact that his election was to be by a separate electorate of Plebians. The question is why did they fail in getting a strong Plebian to officiate as their Consul? The answer to this question reveals the dominion which religion exercises over the minds of men. It was an accepted creed of the whole Roman *populus* that no official could enter upon the duties of his office unless the Oracle of Delphi declared that he was acceptable to the Goddess. The priests who were in charge of the temple of the Goddess of Delphi were all Patricians. Whenever therefore the Plebians elected a Consul who was known to be a strong party man opposed to the Patricians or "communal" to use the term that is current in India, the Oracle invariably declared that he was not acceptable to the Goddess. This is how the Plebians were cheated out of their rights. But what is worthy of note is that the Plebians permitted themselves to be thus cheated because they too like the Patricians, held firmly the belief that the approval of the Goddess was a condition precedent to the taking charge by an official of his duties and that election by the people was not enough. If the Plebians had contended that election was enough and that the approval by the Goddess was not necessary they would have derived the fullest benefit from the political right which they had obtained. But they did not. They agreed to elect another, less suitable to themselves but more suitable to the Goddess

which in fact meant more amenable to the Patricians. Rather than give up religion, the Plebians give up material gain for which they had fought so hard. Does this not show that religion can be a source of power as great as money if not greater? The fallacy of the Socialists lies in supposing that because in the present stage of European Society property as a source of power is predominant, that the same is true of India or that the same was true of Europe in the past. Religion, social status and property are all sources of power and authority, which one man has, to control the liberty of another. One is predominant at one stage; the other is predominant at another stage. That is the only difference. If liberty is the ideal, if liberty means the destruction of the dominion which one man holds over another then obviously it cannot be insisted upon that economic reform must be the one kind of reform worthy of pursuit. If the source of power and dominion is at any given time or in any given society social and religious then social reform and religious reform must be accepted as the necessary sort of reform.

One can thus attack the doctrine of Economic Interpretation of History adopted by the Socialists of India. But I recognize that economic interpretation of history is not necessary for the validity of the Socialist contention that equalization of property is the only real reform and that it must precede everything else. However, what I like to ask the Socialists is this : Can you have economic reform without first bringing about a reform of the social order? The Socialists of India do not seem to have considered this question. I do not wish to do them an injustice. I give below a quotation from a letter which a prominent Socialist wrote a few days ago to a friend of mine in which he said, "I do not believe that we can build up a free society in India so long as there is a trace of this ill-treatment and suppression of one class by another. Believing as I do in a socialist ideal, inevitably I believe in perfect equality in the treatment of various classes and groups. I think that Socialism offers the only true remedy for this as well as other problems." Now the question that I like to ask is : Is it enough for a Socialist to say, "I believe in perfect equality in the treatment of the various classes?" To say that such a belief is enough is to disclose a complete lack of understanding of what is involved in Socialism. If Socialism is a practical programme and is not merely an ideal, distant and far off, the question for a Socialist is not whether he believes in equality. The question for him is whether he *minds* one class ill-treating and suppressing another class as a matter of system, as a matter of principle and thus allow tyranny and oppression to continue to divide one class from another. Let me analyse the factors that are involved in the realization of

Socialism in order to explain fully my point. Now it is obvious that the economic reform contemplated by the Socialists cannot come about unless there is a revolution resulting in the seizure of power. That seizure of power must be by a proletariat. The first question I ask is : Will the proletariat of India combine to bring about this revolution? What will move men to such an action? It seems to me that other things being equal the only thing that will move one man to take such an action is the feeling that other man with whom he is acting are actuated by feeling of equality and fraternity and above all of justice. Men will not join in a revolution for the equalization of property unless they know that after the revolution is achieved they will be treated equally and that there will be no discrimination of caste and creed. The assurance of a socialist leading the revolution that he does not believe in caste, I am sure, will not suffice. The assurance must be the assurance proceeding from much deeper foundation, namely, the mental attitude of the compatriots towards one another in their spirit of personal equality and fraternity. Can it be said that the proletariat of India, poor as it is, recognise no distinctions except that of the rich and the poor? Can it be said that the poor in India recognize no such distinctions of caste or creed, high or low? If the fact is that they do, what unity of front can be expected from such a proletariat in its action against the rich? How can there be a revolution if the proletariat cannot present a united front? Suppose for the sake of argument that by some freak of fortune a revolution does take place and the Socialists come in power, will they not have to deal with the problems created by the particular social order prevalent in India? I can't see how a Socialist State in India can function for a second without having to grapple with the problems created by the prejudices which make Indian people observe the distinctions of high and low, clean and unclean. If Socialists are not to be content with the mouthing of fine phrases, if the Socialists wish to make Socialism a definite reality then they must recognize that the problem of social reform is fundamental and that for them there is no escape from it. That, the social order prevalent in India is a matter which a Socialist must deal with, that unless he does so he cannot achieve his revolution and that if he does achieve it as a result of good fortune he will have to grapple with it if he wishes to realize his ideal, is a proposition which in my opinion is incontrovertible. He will be compelled to take account of caste after revolution if he does not take account of it before revolution. This is only another way of saying that, turn in any direction you like, caste is the monster that crosses your path. You cannot have political reform, you cannot have economic reform, unless you kill this monster.

IV

It is a pity that Caste even today has its defenders. The defences are many. It is defended on the ground that the Caste System is but another name for division of labour and if division of labour is a necessary feature of every civilized society then it is argued that there is nothing wrong in the Caste System. Now the first thing is to be urged against this view is that Caste System is not merely division of labour. *It is also a division of labourers.* Civilized society undoubtedly needs division of labour. But in no civilized society is division of labour accompanied by this unnatural division of labourers into watertight compartments. Caste System is not merely a division of labourers which is quite different from division of labour—it is an hierarchy in which the divisions of labourers are graded one above the other. In no other country is the division of labour accompanied by this gradation of labourers. There is also a third point of criticism against this view of the Caste System. This division of labour is not spontaneous; it is not based on natural aptitudes. Social and individual efficiency requires us to develop the capacity of an individual to the point of competency to choose and to make his own career. This principle is violated in the Caste System in so far as it involves an attempt to appoint tasks to individuals in advance, selected not on the basis of trained original capacities, but on that of the social status of the parents. Looked at from another point of view this stratification of occupations which is the result of the Caste System is positively pernicious. Industry is never static. It undergoes rapid and abrupt changes. With such changes an individual must be free to change his occupation. Without such freedom to adjust himself to changing circumstances it would be impossible for him to gain his livelihood. Now the Caste System will not allow Hindus to take to occupations where they are wanted if they do not belong to them by heredity. If a Hindu is seen to starve rather than take to new occupations not assigned to his Caste, the reason is to be found in the Caste System. By not permitting readjustment of occupations, caste becomes a direct cause of much of the unemployment we see in the country. As a form of division of labour the Caste system suffers from another serious defect. The division of labour brought about by the Caste System is not a division based on choice. Individual sentiment, individual preference has no place in it. It is based on the dogma of predestination. Considerations of social efficiency would compel us to recognize that the greatest evil in the industrial system is not: so much poverty and the suffering that it involves as the fact that so many persons have callings which make no appeal to those who are engaged in them. Such callings constantly provoke one to aversion, ill will and the

desire to evade. There are many occupations in India which on account of the fact that they are regarded as degraded by the Hindus provoke those who are engaged in them to aversion. There is a constant desire to evade and escape from such occupations which arises solely because of the blighting effect which they produce upon those who follow them owing to the slight and stigma cast upon them by the Hindu religion. What efficiency can there be in a system under which neither men's hearts nor their minds are in their work? As an economic organization Caste is therefore a harmful institution, inasmuch as, it involves the subordination of man's natural powers and inclinations to the exigencies of social rules

V

Some have dug a biological trench in defence of the Caste System. It is said that the object of Caste was to preserve purity of race and purity of blood. Now ethnologists are of opinion that men of pure race exist nowhere and that there has been a mixture of all races in all parts of the world. Especially is this the case with the people of India. Mr. D. R. Bhandarkar in his paper on *Foreign Elements in the Hindu Population* has stated that "There is hardly a class, or Caste in India which has not a foreign strain in it. There is an admixture of alien blood not only among the warrior classes—the Rajputs and the Marathas—but also among the Brahmins who are under the happy delusion that they are free from all foreign elements." The Caste system cannot be said to have grown as a means of preventing the admixture of races or as a means of maintaining purity of blood. As a matter of fact Caste system came into being long after the different races of India had commingled in blood and culture. To hold that distinctions of Castes or really distinctions of race and to treat different Castes as though they were so many different races is a gross perversion of facts. What racial affinity is there between the Brahmin of the Punjab and the Brahmin of Madras? What racial affinity is there between the untouchable of Bengal and the untouchable of Madras? What racial difference is there between the Brahmin of the Punjab and the Chamar of the Punjab? What racial difference is there between the Brahmin of Madras and the Pariah of Madras? The Brahmin of the Punjab is racially of the same stock as the Chamar of the Punjab and the Brahmin of Madras is of the same race as the Pariah of Madras. Caste system does not demarcate racial division. Caste system is a social division of people of the same race. Assuming it, however, to be a case of racial divisions one may ask : What harm could there be if a mixture of races and of blood was permitted to take place in India by intermarriages between different Castes? Men are no doubt divided from animals by so deep a distinction that science recognizes

men and animals as two distinct species. But even scientists who believe in purity of races do not assert that the different races constitute different species of men. They are only varieties of one and the same species. As such they can interbreed and produce an offspring which is capable of breeding and which is not sterile. An immense lot of nonsense is talked about heredity and eugenics in defence of the Caste System. Few would object to the Caste System if it was in accord with the basic principle of eugenics because few can object to the improvement of the race by judicious noting. But one fails to understand how the Caste System secures judicious mating. Caste System is a negative thing. It merely prohibits persons belonging to different Castes from intermarrying. It is not a positive method of selecting which two among a given Caste should marry. If Caste is eugenic in origin then the origin of sub-Castes must also be eugenic. But can any one seriously maintain that the origin of sub-Castes is eugenic? I think it would be absurd to contend for such a proposition and for a very obvious reason. If Caste means race then differences of sub-Castes cannot mean differences of race because sub-Castes become *ex hypothesia* sub-divisions of one and the same race. Consequently the bar against intermarrying and interdining between sub-Castes cannot be for the purpose of maintaining purity of race or of blood. If sub-Castes cannot be eugenic in origin there cannot be any substance in the contention that Caste is eugenic in origin. Again if Caste is eugenic in origin one can understand the bar against intermarriage. But what is the purpose of the interdict placed on interdining between Castes and sub-Castes alike? Interdining cannot infect blood and therefore cannot be the cause either of the improvement or of deterioration of the race. This shows that Caste has no scientific origin and that those who are attempting to give it an eugenic basis are trying to support by science what is grossly unscientific. Even today eugenics cannot become a practical possibility unless we have definite knowledge regarding the laws of heredity. Prof. Bateson in his *Mendel's Principles of Heredity* says, "There is nothing in the descent of the higher mental qualities to suggest that they follow any single system of transmission. It is likely that both they and the more marked developments of physical powers result rather from the coincidence of numerous factors than from the possession of any one genetic element." To argue that the Caste System was eugenic in its conception is to attribute to the forefathers of present-day Hindus a knowledge of heredity which even the modern scientists do not possess. A tree should be judged by the fruits it yields. If caste is eugenic what sort of a race of men it should have produced? Physically speaking the Hindus are a C3 people. They are a race of Pygmies

and dwarfs stunted in stature and wanting in stamina. It is a nation 9/10ths of which is declared to be unfit for military service. This shows that the Caste System does not embody the eugenics of modern scientists. It is a social system which embodies the arrogance and selfishness of a perverse section of the Hindus who were superior enough in social status to set it in fashion and who had authority to force it on their inferiors.

VI

Caste does not result in economic efficiency. Caste cannot and has not improved the race. Caste has however done one thing. It has completely disorganized and demoralized the Hindus.

The first and foremost thing that must be recognized is that Hindu Society is a myth. The name Hindu is itself a foreign name. It was given by the Mohammedans to the natives for the purpose of distinguishing themselves. It does not occur in any Sanskrit work prior to the Mohammedan invasion. They did not feel the necessity of a common name because they had no conception of their having constituted a community. Hindu society as such does not exist. It is only a collection of castes. Each caste is conscious of its existence. Its survival is the be all and end all of its existence. Castes do not even form a federation. A caste has no feeling that it is affiliated to other castes except when there is a Hindu-Muslim riot. On all other occasions each caste endeavours to segregate itself and to distinguish itself from other castes. Each caste not only dines among itself and marries among itself but each caste prescribes its own distinctive dress. What other explanation can there be of the innumerable styles of dress worn by the men and women of India which so amuse the tourists? Indeed the ideal Hindu must be like a rat living in his own hole refusing to have any contact with others. There is an utter lack among the Hindus of what the sociologists call "consciousness of kind". There is no Hindu consciousness of kind. In every Hindu the consciousness that exists is the consciousness of his caste. That is the reason why the Hindus cannot be said to form a society or a nation. There are however many Indians whose patriotism does not permit them to admit that Indians are not a nation, that they are only an amorphous mass of people. They have insisted that underlying the apparent diversity there is a fundamental unity which marks the life of the Hindus in as much as there is a similarity of habits and customs, beliefs and thoughts which obtain all over the continent of India. Similarity in habits and customs, beliefs and thoughts there is. But one cannot accept the conclusion that therefore, the Hindus constitute a society. To do so is to misunderstand the essentials which go to make up a society. Men do not become a society by living in physical proximity any

more than a man ceases to be a member of his society by living so many miles away from other men. Secondly similarity in habits and customs, beliefs and thoughts is not enough to constitute men into society. Things may be passed physically from one to another like bricks. In the same way habits and customs, beliefs and thoughts of one group may be taken over by another group and there may thus appear a similarity between the two. Culture spreads by diffusion and that is why one finds similarity between various primitive tribes in the matter of their habits and customs, beliefs and thoughts, although they do not live in proximity. But no one could say that because there was this similarity the primitive tribes constituted one society. This is because similarity in certain things is not enough to constitute a society. Men constitute a society because they have things which they possess in common. To have similar thing is totally different from possessing things in common. And the only way by which men can come to possess things in common with one another is by being in communication with one another. This is merely another way of saying that Society continues to exist by communication indeed in communication. To make it concrete, it is not enough if men act in a way which agrees with the acts of others. Parallel activity, even if similar, is not sufficient to bind men into a society. This is proved by the fact that the festivals observed by the different Castes amongst the Hindus are the same. Yet these parallel performances of similar festivals by the different castes have not bound them into one integral whole. For that purpose what is necessary is for a man to share and participate in a common activity so that the same emotions are aroused in him that animate the others. Making the individual a sharer or partner in the associated activity so that he feels its success as his success, its failure as his failure is the real thing that binds men and makes a society of them. The Caste System prevents common activity and by preventing common activity it has prevented the Hindus from becoming a society with a unified life and a consciousness of its own being.

VII

The Hindus often complain of the isolation and exclusiveness of a gang or a clique and blame them for anti-social spirit. But they conveniently forget that this anti-social spirit is the worst feature of their own Caste System. One caste enjoys singing a hymn of hate against another caste as much as the Germans did in singing their hymn of hate against the English during the last war. The literature of the Hindus is full of caste genealogies in which an attempt is made to give a noble origin to one caste and an ignoble origin to other castes. The *Sahyadrikhand* is a notorious instance of this class of literature. This anti-social spirit is not confined to caste alone.

It has gone deeper and has poisoned the mutual relations of the sub-castes as well. In my province the Golak Brahmins, Deorukha Brahmins, Karada Brahmins, Palshe Brahmins and Chitpavan Brahmins, all claim to be subdivisions of the Brahmin Caste. But the anti-social spirit that prevails between them is quite as marked and quite as virulent as the anti-social spirit that prevails between them and other non-Brahmin castes. There is nothing strange in this. An anti-social spirit is found wherever one group has "interests of its own" which shut it out from full interaction with other groups, so that its prevailing purpose is protection of what it has got. This anti-social spirit, this spirit of protecting its own interests is as much a marked feature of the different castes in their isolation from one another as it is of nations in their isolation. The Brahmin's primary concern is to protect "his interest" against those of the non-Brahmins and the non-Brahmin's primary concern is to protect their interests against those of the Brahmins. The Hindus, therefore, are not merely an assortment of castes but they are so many warring groups each living for itself and for its selfish ideal. There is another feature of caste which is deplorable. The ancestors of the present-day English fought on one side or the other in the wars of the Roses and the Cromwellian War. But the descendants of those who fought on the one side do not bear any animosity— any grudge against the descendants of those who fought on the other side. The feud is forgotten. But the present-day non-Brahmins cannot forgive the present-day Brahmins for the insult their ancestors gave to Shivaji. The present-day Kayasthas will not forgive the present-day Brahmins for the infamy cast upon their forefathers by the forefathers of the latter. To what is this difference due? Obviously to the Caste System. The existence of Caste and Caste Consciousness has served to keep the memory of past feuds between castes green and has prevented solidarity.

VIII

The recent discussion about the excluded and partially included areas has served to draw attention to the position of what are called the aboriginal tribes in India. They number about 13 millions if not more. Apart from the questions whether their exclusion from the new Constitution is proper or improper, the fact still remains that these aborigines have remained in their primitive uncivilized State in a land which boasts of a civilization thousands of years old. Not only are they not civilized but some of them follow pursuits which have led to their being classified as criminals. Thirteen millions of people living in the midst of civilization are still in a savage state and are leading the life of hereditary criminals! ! But the Hindus have never felt ashamed of it. This is a phenomenon which in my view is quite

unparalleled. What is the cause of this shameful state of affairs? Why has no attempt been made to civilize these aborigines and to lead them to take to a more honourable way of making a living? The Hindus will probably seek to account for this savage state of the aborigines by attributing to them congenital stupidity. They will probably not admit that the aborigines have remained savages because they had made no effort to civilize them, to give them medical aid, to reform them, to make them good citizens. But supposing a Hindu wished to do what the Christian missionary is doing for these aborigines, could he have done it? I submit not. Civilizing the aborigines means adopting them as your own, living in their midst, and cultivating fellow-feeling, in short loving them. How is it possible for a Hindu to do this? His whole life is one anxious effort to preserve his caste. Caste is his precious possession which he must save at any cost. He cannot consent to lose it by establishing contact with the aborigines the remnants of the hateful Anary as of the *Vedic* days. Not that a Hindu could not *be* taught the sense of duty to fallen humanity, but the trouble is that no amount of sense of duty can enable him to overcome his duty to preserve his caste. Caste is, therefore, the real explanation as to why the Hindu has let the savage remain a savage in the midst of his civilization without blushing or without feeling any sense of remorse or repentance. The Hindu has not realized that these aborigines are a source of potential danger. If these savages remain savages they may not do any harm to the Hindus. But if they are reclaimed by non-Hindus and converted to their faiths they will swell the ranks of the enemies of the Hindus. If this happens the Hindu will have to thank himself and his Caste System.

IX

Not only has the Hindu made no effort for the humanitarian cause of civilizing the savages but the higher-caste Hindus have deliberately prevented the lower castes who are within the pale of Hinduism from rising to the cultural level of the higher castes. I will give two instances, one of the Sonars and the other of the Pathare Prabhus. Both are communities quite well-known in Maharashtra. Like the rest of the communities desiring to raise their status these two communities were at one time endeavouring to adopt some of the ways and habits of the Brahmins. The Sonars were styling themselves Daivadnya Brahmins and were wearing their "dhotis" with folds on and using the word *namaskar* for salutation. Both, the folded way of wearing the "dhoti" and the *namaskar* were special to the Brahmins. The Brahmins did not like this imitation and this attempt by Sonars to pass off as Brahmins. Under the authority of the Peshwas the Brahmins successfully put down this attempt on the part of

the Sonars to adopt the ways of the Brahmins. They even got the President of the Councils of the East India Company's settlement in Bombay to issue a prohibitory order against the Sonars residing in Bombay. At one time the Pathare Prabhus had widow-remarriage as a custom of their caste. This custom of widow-remarriage was later on looked upon as a mark of social inferiority by some members of the caste especially because it was contrary to the custom prevalent among the Brahmins. With the object of raising the status of their community some Pathare Prabhus sought to stop this practice of widow-remarriage that was prevalent in their caste. The community was divided into two camps, one for and the other against the innovation. The Peshwas took the side of those in favour of widow-remarriage and thus virtually prohibited the Pathare Prabhus from following the ways of the Brahmins. The Hindus criticise the Mohammedans for having spread their religion by the use of the sword. They also ridicule Christianity on the score of the inquisition. But really speaking who is better and more worthy of our respect—the Mohammedans and Christians who attempted to thrust down the throats of unwilling persons what they regarded as necessary for their salvation or the Hindu who would not spread the light, who would endeavour to keep others in darkness, who would not consent to share his intellectual and social inheritance with those who are ready and willing to make it a part of their own make-up? I have no hesitation in saying that if the Mohammedan has been cruel the Hindu has been mean and meanness is worse than cruelty.

X

Whether the Hindu religion was or was not a missionary religion has been a controversial issue. Some hold the view that it was never a missionary religion. Others hold that it was. That the Hindu religion was once a missionary religion must be admitted. It could not have spread over the face of India, if it was not a missionary religion. That today it is not a missionary religion is also a fact which must be accepted. The question therefore is not whether or not the Hindu religion was a missionary religion. The real question is why did the Hindu religion cease to be a missionary religion? My answer is this. Hindu religion ceased to be a missionary religion when the Caste System grew up among the Hindus. Caste is inconsistent with conversion. Inculcation of beliefs and dogmas is not the only problem that is involved in conversion. To find a place for the convert in the social life of the community is another and a much more important problem that arises in connection with conversion. That problem is where to place the convert, in what caste? It is a problem which

must baffle every Hindu wishing to make aliens converts to his religion. Unlike the club the membership of a caste is not open to all and sundry. The law of caste confines its membership to person born in the caste. Castes are autonomous and there is no authority anywhere to compel a caste to admit a new-comer to its social life. Hindu Society being a collection of castes and each caste being a close corporation there is no place for a convert. Thus it is the caste which has prevented the Hindus from expanding and from absorbing other religious communities. So long as caste remain, Hindu religion cannot be made a missionary religion and *Shudhi* will be both a folly and a futility.

XI

The reasons which have made *Shudhi* impossible for Hindus are also responsible for making *Sanghatan* impossible. The idea underlying *Sanghatan* is to remove from the mind of the Hindu that timidity and cowardice which so painfully make him off from the Mohammedan and the Sikh and which have led him to adopt the low ways of treachery and cunning for protecting himself. The question naturally arises : From where does the Sikh or the Mohammedan derive his strength which makes him brave and fearless? I am sure it is not due to relative superiority of physical strength, diet or drill. It is due to the strength arising out of the feeling that all Sikhs will come to the rescue of a Sikh when he is in danger and that all Mohammedans will rush to save a Muslim if he is attacked. The Hindu can derive no such strength. He cannot feel assured that his fellows will come to his help. Being one and fated to be alone he remains powerless, develops timidity and cowardice and in a fight surrenders or runs away. The Sikh as well as the Muslim stands fearless and gives battle because he knows that though one he will not be alone. The presence of this belief in the one helps him to hold out and the absence of it in the other makes him to give way. If you pursue this matter further and ask what is it that enables the Sikh and the Mohammedan to feel so assured and why is the Hindu filled with such despair in the matter of help and assistance you will find that the reasons for this difference lie in the difference in their associated mode of living. The associated mode of life practised by the Sikhs and the Mohammedans produces fellow-feeling. The associated mode of life of the Hindus does not. Among Sikhs and Muslims there is a social cement which makes them *Bhais*. Among Hindus there is no such cement and one Hindu does not regard another Hindu as his *Bhai*. This explains why a Sikh says and feels that one Sikh, or one Khalsa is equal to *Sava Lakh* men. This explains why one Mohammedan is equal to a crowd of Hindus. This difference is undoubtedly a difference due to caste. So long as caste

remains, there will be no *Sanghayan* and so long as there is no *Sanghatan* the Hindu will remain weak and meek. The Hindus claim to be a very tolerant people. In my opinion this is a mistake. On many occasions they can be intolerant and if on some occasions they are tolerant that is because they are too weak to oppose or too indifferent to oppose. This indifference of the Hindus has become so much a part of their nature that a Hindu will quite meekly tolerate an insult as well as a wrong. You see amongst them, to use the words of Morris, "*The great reading down the little, the strong beating down the weak, cruel men fearing not, kind men daring not and wise men caring not.*" With the Hindu Gods all forbearing, it is not difficult to imagine the pitiable condition of the wronged and the oppressed among the Hindus. Indifferentism is the worst kind of disease that can infect a people. Why is the Hindu so indifferent? In my opinion this indifferentism is the result of Caste System which has made *Sanghatan* and co-operation even for a good cause impossible.

XII

The assertion by the individual of his own opinions and beliefs, his own independence and interest as over against group standards, group authority and group interests is the beginning of all reform. But whether the reform will continue depends upon what scope the group affords for such individual assertion. If the group is tolerant and fair-minded in dealing with such individuals they will continue to assert and in the end succeed in converting their fellows. On the other hand if the group is intolerant and does not bother about the means it adopts to stifle such individuals they will perish and the reform will die out. Now a caste has an unquestioned right to excommunicate any man who is guilty of breaking the rules of the caste and when it is realized that excommunication involves a complete cesser of social intercourse it will be agreed that as a form of punishment there is really little to choose between excommunication and death. No wonder individual Hindus have not had the courage to assert their independence by breaking the barriers of caste. It is true that man cannot get on with his fellows. But it is also true that he cannot do without them. He would like to have the society of his fellows on his terms. If he cannot get it on his terms then he will be ready to have it on any terms even amounting to complete surrender. This is because he cannot do without society. A caste is ever ready to take advantage of the helplessness of a man and insist upon complete conformity to its code in letter and in spirit. A caste can easily organize itself into a conspiracy to make the life of a reformer a hell and if a conspiracy is a crime I do not understand why such a nefarious act as an attempt to excommunicate a person for daring to act

contrary to the rules of caste should not be made an offence punishable in law. But as it is, even law gives each caste an autonomy to regulate its membership and punish dissenters with excommunication. Caste in the hands of the orthodox has been a powerful weapon for persecuting the reforms and for killing all reform.

XIII

The effect of caste on the ethics of the Hindus is simply deplorable. Caste has killed public spirit. Caste has destroyed the sense of public charity. Caste has made public opinion impossible. A Hindu's public is his caste. His responsibility is only to his caste. His loyalty is restricted only to his caste. Virtue has become caste-ridden and morality has become, caste-bound. There is no sympathy to the deserving. There is no appreciation of the meritorious. There is no charity to the needy. Suffering as such calls for no response. There is charity but it begins with the caste and ends with the caste. There *is* sympathy but not for men of other caste. Would a Hindu acknowledge and follow the leadership of a great and good man? The case of a Mahatma apart, the answer must be that he will follow a leader if he is a man of his caste. A Brahmin will follow a leader only if he is a Brahmin, a Kayastha if he is a Kayastha and so on. The capacity to appreciate merits in a man apart from his caste does not exist in a Hindu. There is appreciation of virtue but only when the man is a fellow caste-man. The whole morality is as bad as tribal morality. My caste-man, right or wrong; my caste-man, good or bad. It is not a case of standing by virtue and not standing by vice. It is a case of standing or not standing by the caste. Have not Hindus committed treason against their country in the interests of their caste?

XIV

I would not be surprised if some of you have grown weary listening to this tiresome tale of the sad effects which caste has produced. There is nothing new in it. I will therefore turn to the constructive side of the problem. What is your ideal society if you do not want caste is a question that is bound to be asked of you. If you ask me, my ideal would be a society based on *Liberty, Equality and Fraternity*. And why not? What objection can there be to Fraternity? I cannot imagine any. An ideal society should be mobile, should be full of channels for conveying a change taking place in one part to other parts. In an ideal society there should be many interests consciously communicated and shared. There should be varied and free points of contact with other modes of association. In other words there must be social endosmosis. This is fraternity, which is only another name for democracy. Democracy is not merely a form of Government. It is primarily a mode of associated living, of conjoint communicated

experience. It is essentially an attitude of respect and reverence towards fellowmen. Any objection to Liberty? Few object to liberty in the sense of a right to free movement, in the sense of a right to life and limb. There is no objection to liberty in the sense of a right to property, tools and materials as being necessary for earning a living to keep the body in due state of health. Why not allow liberty to benefit by an effective and competent use of a person's powers? The supporters of caste who would allow liberty in the sense of a right to life, limb and property, would not readily consent to liberty in this sense, inasmuch as it involves liberty to choose one's profession. But to object to this kind of liberty is to perpetuate slavery. For slavery does not merely mean a legalized form of subjection. It means a state of society in which some men are forced to accept from other the purposes which control their conduct. This condition obtains even where there is no slavery in the legal sense. It is found where, as in the Caste System, some persons are compelled to carry on certain prescribed callings which are not of their choice. Any objection to equality? This has obviously been the most contentious part of the slogan of the French Revolution. The objections to equality may be sound and one may have to admit that all men are not equal. But what of that? Equality may be a fiction but nonetheless one must accept it as the governing principle. A. man's power is dependent upon (1) physical heredity, (2) social inheritance or endowment in the form of parental care, education, accumulation of scientific knowledge, everything which enables him to be more efficient than the savage, and finally, (3) on his own efforts. In all these three respects men are undoubtedly unequal. But the question is, shall we treat them as unequal because they are unequal? This is a question which the opponents of equality must answer. From the standpoint of the individualist it may be just to treat men unequally so far as their efforts are unequal. It may be desirable to give as much incentive as possible to the full development of every one's powers. But what would happen if men were treated unequally as they are, in the first two respects? It is obvious that those individuals also in whose favour there is birth, education, family name, business connections and inherited wealth would be selected in the race. But selection under such circumstances would not be a selection of the able. It would be the selection of the privileged. The reason therefore, which forces that in the third respect we should treat men unequally demands that in the first two respects we should treat men as equally as possible. On the other hand it can be urged that if it is good for the social body to get the most out of its members, it can get most out of them only by making them equal as far as possible at the very start of the race. That is

one reason why we cannot escape equality. But there is another reason why we must accept equality. A Statesman is concerned with vast numbers of people. He has neither the time nor the knowledge to draw fine distinctions and to treat each equitably *i.e.* according to need or according to capacity. However desirable or reasonable an equitable treatment of men may be, humanity is not capable of assortment and classification. The statesman, therefore, must follow some rough and ready rule and that rough and ready rule is to treat all men alike not because they are alike but because classification and assortment is impossible. The doctrine of equality is glaringly fallacious but taking all in all it is the only way a statesman can proceed in politics which is a severely practical affair and which demands a severely practical test.

XV

But there is a set of reformers who hold out a different ideal. They go by the name of the Arya Samajists and their ideal of social organization is what is called Chaturvarnya or the division of society into four classes instead of the four thousand castes that we have in India. To make it more attractive and to disarm opposition the protagonists of Chaturvarnya take great care to point out that their Chaturvarnya is based not on birth but on *guna* (worth). At the outset, I must confess that notwithstanding the worth-basis of this Chaturvarnya, it is an ideal to which I cannot reconcile myself. In the first place, if under the Chaturvarnya of the Arya Samajists an individual is to take his place in the Hindu Society according to his worth. I do not understand why the Arya Samajists insist upon labelling men as Brahmin, Kshatriya, Vaishya and Shudra. A learned man would be honoured without his being labelled a Brahmin. A soldier would be respected without his being designated a Kshatriya. If European society honours its soldiers and its servants without giving them permanent labels, why should Hindu Society find it difficult to do so is a question, which Arya Samajists have not cared to consider. There is another objection to the continuance of these labels. All reform consists in a change in the notions, sentiment and mental attitudes of the people towards men and things. It is common experience that certain names become associated with certain notions and sentiments, which determine a person's attitude towards men and things. The names, Brahmin, Kshatriya, Vaishya and Shudra, are names which are associated with a definite and fixed notion in the mind of every Hindu. That notion is that of a hierarchy based on birth. So long as these names continue, Hindus will continue to think of the Brahmin, Kshatriya, Vaishya and Shudra as hierarchical divisions of high and low, based on birth, and act accordingly. The Hindu must be made to

unlearn all this. But how can this happen if the old labels remain and continue to recall to his mind old notions. If new notions are to be inculcated in the minds of people it is necessary to give them new names. To continue the old name is to make the reform futile. To allow this Chaturvarnya, based on worth to be designated by such stinking labels of Brahmin, Kshatriya, Vaishya, Shudra, indicative of social divisions based on birth, is a snare.

XVI

To me this Chaturvarnya with its old labels is utterly repellent and my whole being rebels against it. But I do not wish to rest my objection to Chaturvarnya on mere grounds of sentiments. There are more solid grounds on which I rely for my opposition to it. A close examination of this ideal has convinced me that as a system of social organization, Chaturvarnya is impracticable, harmful and has turned out to be a miserable failure. From a practical point of view, the system of Chaturvarnya raises several difficulties which its protagonists do not seem to have taken into account. The principle underlying caste is fundamentally different from the principle underlying *Varna*. Not only are they fundamentally different but they are also fundamentally opposed. The former is based on worth. How are you going to compel people who have acquired a higher status based on birth without reference to their worth to vacate that status? How are you going to compel people to recognize the status due to a man in accordance with his worth, who is occupying a lower status based on his birth? For this you must first break up the caste System, in order to be able to establish the *Varna* system. How are you going to reduce the four thousand castes, based on birth, to the four *Varnas*, based on worth? This is the first difficulty which the protagonists of the Chaturvarnya must grapple with. There is a second difficulty which the protagonists of Chaturvarnya must grapple with, if they wish to make the establishment of Chaturvarnya a success.

Chaturvarnya pre-supposes that you can classify people into four definite classes. Is this possible? In this respect, the ideal of Chaturvarnya has, as you will see, a close affinity to the Platonic ideal. To Plato, men fell by nature into three classes. In some individuals, he believed mere appetites dominated. He assigned them to the labouring and trading classes. Others revealed to him that over and above appetites, they have a courageous disposition. He classed them as defenders in war and guardians of internal peace. Others showed a capacity to grasp the universal reason underlying things. He made them the law-givers of the people. The criticism to which Plato's Republic is subject, is also the criticism which must apply to the

system of Chaturvarnya, in so far as it proceeds upon the possibility of an accurate classification of men into four distinct classes. The chief criticism against Plato is that his idea of lumping of individuals into a few sharply marked-off classes is a very superficial view of man and his powers. Plato had no perception of the uniqueness of every individual, of his incommensurability with others, of each individual forming a class of his own. He had no recognition of the infinite diversity of active tendencies and combination of tendencies of which an individual is capable. To him, there were types of faculties or powers in the individual constitution. All this is demonstrably wrong. Modern science has shown that lumping together of individuals into a few sharply marked-off classes is a superficial view of man not worthy of serious consideration. Consequently, the utilization of the qualities of individuals is incompatible with their stratification by classes, since the qualities of individuals are so variable. Chaturvarnya must fail for the very reason for which Plato's Republic must fail, namely that it is not possible to pigeon men into holes, according as he belongs to one class or the other. That it is impossible to accurately classify people into four definite classes is proved by the fact that the original four classes have now become four thousand castes.

There is a third difficulty in the way of the establishment of the system of Chaturvarnya. How are you going to maintain the system of Chaturvarnya, supposing it was established? One important requirement for the successful working of Chaturvarnya is the maintenance of the penal system which could maintain it by its sanction. The system of Chaturvarnya must perpetually face the problem of the transgressor. Unless there is a penalty attached to the act of transgression, men will not keep to their respective classes. The whole system will break down, being contrary to human nature. Chaturvarnya cannot subsist by its own inherent goodness. It must be enforced by law.

That, without penal sanction the ideal of Chaturvarnya cannot be realized, is proved by the story in the Ramayana of Rama killing Shambuka. Some people seem to blame Rama because he wantonly and without reason killed Shambuka. But to blame Rama for killing Shambuka is to misunderstand the whole situation. Ram Raj was a Raj based on Chaturvarnya. As a king, Rama was bound to maintain Chaturvarnya. It was his duty therefore to kill Shambuka, the Shudra, who had transgressed his class and wanted to be a Brahmin. This is the reason why Rama killed Shambuka. But this also shows that penal sanction is necessary for the maintenance of Chaturvarnya. Not only penal sanction is necessary, but penalty of death is necessary. That is why Rama did not inflict on Shambuka a lesser

punishment. That is why Manu-Smriti prescribes such heavy sentences as cutting off the tongue or pouring of molten lead in the ears of the Shudra, who recites or hears the *Veda*. The supporters of Chaturvarnya must give an assurance that they could successfully classify men and they could induce modern society in the twentieth century to reforge the penal sanctions of Manu-Smriti.

The protagonists of Chaturvarnya do not seem to have considered what is to happen to women in their system. Are they also to be divided into four classes, Brahmin, Kshatriya, Vaishya and Shudra? Or are they to be allowed to take the status of their husbands. If the status of the woman is to be the consequence of marriage what becomes of the underlying principle of Chaturvarnya, namely, that the status of a person should be based upon the worth of that person? If they are to be classified according to their worth is their classification to be nominal or real? If it is to be nominal then it is useless and then the protagonists of Chaturvarnya must admit that their system does not apply to women. If it is real, are the protagonists of Chaturvarnya prepared to follow the logical consequences of applying it to women? They must be prepared to have women priests and women soldiers. Hindu society has grown accustomed to women teachers and women barristers. It may grow accustomed to women brewers and women butchers. But he would be a bold person, who would say that it will allow women priests and women soldiers. But that will be the logical outcome of applying Chaturvarnya to women. Given these difficulties, I think no one except a congenital idiot could hope and believe in a successful regeneration of the Chaturvarnya.

XVII

Assuming that Chaturvarnya is practicable, I contend that it is the most vicious system. That the Brahmins should cultivate knowledge, that the Kshatriya should bear arms, that the Vaishya should trade and that the Shudra should serve sounds as though it was a system of division of labour. Whether the theory was intended to state that the Shudra *need not* or that whether it was intended to lay down that he *must not*, is an interesting question. The defenders of Chaturvarnya give it the first meaning. They say, why should the Shudra need trouble to acquire wealth, when the three *Vamas* are there to support him? Why need the Shudra bother to take to education, when there is the Brahmin to whom he can go when the occasion for reading or writing arises? Why need the Shudra worry to arm himself because there is the Kshatriya to protect him? The theory of Chaturvarnya, understood in this sense, may be said to look upon the Shudra as the ward and the three *Vamas* as his guardians. Thus interpreted,

it is a simple, elevating and alluring theory. Assuming this to be the correct view of the underlying conception of Chaturvarnya, it seems to me that the system is neither fool-proof nor knave-proof. What is to happen, if the Brahmins, Vaishyas and Kshatriyas fail to pursue knowledge, to engage in economic enterprise and to be efficient soldiers which are their respective functions? Contrary-wise, suppose that they discharge their functions but flout their duty to the Shudra or to one another, what is to happen to the Shudra if the three classes refuse to support him on fair terms or combine to keep him down? Who is to safeguard the interests of the Shudra or for the matter of that of the Vaishya and Kshatriya when the person, who is trying to take advantage of his ignorance is the Brahmin? Who is to defend the liberty of the Shudra and for the matter of that, of the Brahmin and the Vaishya when the person who is robbing him of it is the Kshatriya? Interdependence of one class on another class is inevitable. Even dependence of one class upon another may sometimes become allowable. But why make one person depend upon another in the matter of his vital needs? Education everyone must have. Means of defence everyone must have. These are the paramount requirements of every man for his self-preservation. How can the fact that his neighbour is educated and armed help a man who is uneducated and disarmed. The whole theory is absurd. These are the questions, which the defenders of Chaturvarnya do not seem to be troubled about. But they are very pertinent questions. Assuming their conception of Chaturvarnya that the relationship between the different classes is that of ward and guardian is the real conception underlying Chaturvarnya, it must be admitted that it makes no provision to safeguard the interests of the ward from the misdeeds of the guardian. Whether the relationship of guardian and ward was the real underlying conception, on which Chaturvarnya was based, there is no doubt that in practice the relation was that of master and servants. The three classes, Brahmins, Kshatriyas and Vaishyas although not very happy in their mutual relationship managed to work by compromise. The Brahmin flattered the Kshatriya and both let the Vaishya live in order to be able to live upon him. But the three agreed to beat down the Shudra. He was not allowed to acquire wealth lest he should be independent of the three *Varnas*. He was prohibited from acquiring knowledge lest he should keep a steady vigil regarding his interests. He was prohibited from bearing arms lest he should have the means to rebel against their authority. That this is how the Shudras were treated by the Tryavarnikas is evidenced by the Laws of Manu. There is no code of laws more infamous regarding social rights than the Laws of Manu. Any instance from anywhere of social injustice must

pale before it. Why have the mass of people tolerated the social evils to which they have been subjected? There have been social revolutions in other countries of the world. Why have there not been social revolutions in India is a question which has incessantly troubled me. There is only one answer, which I can give and it is that the lower classes of Hindus have been completely disabled for direct action on account of this wretched system of Chaturvarnya. They could not bear arms and without arms they could not rebel. They were all ploughmen or rather condemned to be ploughmen and they never were allowed to convert their ploughshare into swords. They had no bayonets and therefore everyone who chose could and did sit upon them. On account of the Chaturvarnya, they could receive no education. They could not think out or know the way to their salvation. They were condemned to be lowly and not knowing the way of escape and not having the means of escape, they became reconciled to eternal servitude, which they accepted as their inescapable fate. It is true that even in Europe the strong has not shrunk from the exploitation, nay the spoliation of the weak. But in Europe, the strong have never contrived to make the weak helpless against exploitation so shamelessly as was the case in India among the Hindus. Social war has been raging between the strong and the weak far more violently in Europe than it has ever been in India. Yet, the weak in Europe has had in his freedom of military service his *physical weapon*, in suffering his *political weapon* and in education his *moral weapon*. These three weapons for emancipation were never withheld by the strong from the weak in Europe. All these weapons were, however, denied to the masses in India by Chaturvarnya. There cannot be a more degrading system of social organization than the Chaturvarnya. It is the system which deadens, paralyses and cripples the people from helpful activity. This is no exaggeration. History bears ample evidence. There is only one period in Indian history which is a period of freedom, greatness and glory. That is the period of the Mourya Empire. At all other times the country suffered from defeat and darkness. But the Mourya period was a period when Chaturvarnya was completely annihilated, when the Shudras, who constituted the mass of the people, came into their own and became the rulers of the country. The period of defeat and darkness is the period when Chaturvarnya flourished to the damnation of the greater part of the people of the country.

XVIII

Chaturvarnya is not new. It is as old as the *Vedas*. That is one of the reasons why we are asked by the Arya Samajists to consider its claims. Judging from the past as a system of social organization, it has been tried

and it has failed. How many times have the Brahmins annihilated the seed of the Kshatriyas! How many times have the Kshatriyas annihilated the Brahmins! The Mahabharata and the Puranas are full of incidents of the strife between the Brahmins and the Kshatriyas. They even quarreled over such petty questions as to who should salute first, as to who should give way first, the Brahmins or the Kshatriyas, when the two met in the street. Not only was the Brahmin an eyesore to the Kshatriya and the Kshatriya an eyesore to the Brahmin, it seems that the Kshatriyas had become tyrannical and the masses, disarmed as they were under the system of Chaturvarnya, were praying Almighty God for relief from their tyranny. The Bhagwat tells us very definitely that Krishna had taken Avtar for one sacred purpose and that was to annihilate the Kshatriyas. With these instances of rivalry and enmity between the different *Vurnas* before us, I do not understand how any one can hold out Chaturvarnya as an ideal to be aimed at or as a pattern, on which the Hindu Society should be remodelled.

XIX

I have dealt with those, who are without you and whose hostility to your ideal is quite open. There appear to be others, who are neither without you nor with you. I was hesitating whether I should deal with their point of view. But on further consideration I have come to the conclusion that I must and that for two reasons. Firstly, their attitude to the problem of caste is not merely an attitude of neutrality, but is an attitude of aimed neutrality. Secondly, they probably represent a considerable body of people. Of these, there is one set which finds nothing peculiar nor odious in the Caste System of the Hindus. Such Hindus cite the case of Muslims, Sikhs and Christians and find comfort in the fact that they too have castes amongst them. In considering this question you must at the outset bear in mind that nowhere is human society *one* single whole. It is always plural. In the world of action, the individual is one limit and society the other. Between them lie all sorts of associative arrangements of lesser and larger scope, families, friendship, co-operative associations, business combines, political parties, bands of thieves and robbers. These small groups are usually firmly welded together and are often as exclusive as castes. They have a narrow and intensive code, which is often anti-social. This is true of every society, in Europe as well as in Asia, The question to be asked in determining whether a given society is an ideal society ; is not whether there are groups in it, because groups exist in all societies. The questions to be asked in determining what is an ideal society are : How numerous and varied are the interests which are consciously shared by the groups? How full and free is

the interplay with other forms of associations? Are the forces that separate groups and classes more numerous than the forces that unite? What social significance is attached to this group life? Is its exclusiveness a matter of custom and convenience or is it a matter of religion? It is in the light of these questions that one must decide whether caste among Non-Hindus is the same as caste among Hindus. If we apply these considerations to castes among Mohammedans, Sikhs and Christians on the one hand and to castes among Hindus on the other, you will find that caste among Non-Hindus is fundamentally different from caste among Hindus. First, the ties, which consciously make the Hindus hold together, are non-existent, while among Non-Hindus there are many that hold them together. The strength of a society depends upon the presence of points of contact, possibilities of interaction between different groups which exist in it. These are what Carlyle calls "organic filaments" *i.e.* the elastic threads which help to bring the disintegrating elements together and to reunite them. There is no integrating force among the Hindus to counteract the disintegration caused by caste. While among the Non-Hindus there are plenty of these organic filaments which bind them together. Again it must be borne in mind that although there are castes among Non-Hindus, as there are among Hindus, caste has not the same social significance for Non-Hindus as it has for Hindus. Ask Mohammedan or a Sikh, who he is? He tells you that he is a Mohammedan or a Sikh as the case may be. He does not tell you his caste although he has one and you are satisfied with his answer. When he tells you that he is a Muslim, you do not proceed to ask him whether he is a Shiya or a Suni; Sheikh or Saiyad ; Khatik or Pinjari. When he tells you he is a Sikh, you do not ask him whether he is Jat or Roda ; Mazbi or Ramdasi. But you are not satisfied, if a person tells you that he is a Hindu. You feel bound to inquire into his caste. Why? Because so essential is caste in the case of a Hindu that without knowing it you do not feel sure what sort of a being he is. That caste has not the same social significance among Non-Hindus as it has among Hindus is clear if you take into consideration the consequences which follow breach of caste. There may be castes among Sikhs and Mohammedans but the Sikhs and the Mohammedans will not outcast a Sikh or a Mohammedan if he broke his caste. Indeed, the very idea of excommunication is foreign to the Sikhs and the Mohammedans. But with the Hindus the case is entirely different. He is sure to be outcasted if he broke caste. This shows the difference in the social significance of caste to Hindus and Non-Hindus. This is the second point of difference. But there is also a third and a more important one. Caste among the non-Hindus has no religious consecration; but among the

Hindus most decidedly it has. Among the Non-Hindus, caste is only a practice, not a sacred institution. They did not originate it. With them it is only a survival. They do not regard caste as a religious dogma. Religion compels the Hindus to treat isolation and segregation of castes as a virtue. Religion does not compel the Non-Hindus to take the same attitude towards caste. If Hindus wish to break caste, their religion will come in their way. But it will not be so in the case of Non-Hindus. It is, therefore, a dangerous delusion to take comfort in the mere existence of caste among Non-Hindus, without caring to know what place caste occupies in their life and whether there are other "organic filaments", which subordinate the feeling of caste to the feeling of community. The sooner the Hindus are cured of this delusion the better.

The other set denies that caste presents any problem at all for the Hindus to consider. Such Hindus seek comfort in the view that the Hindus have survived and take this as a proof of their fitness to survive. This point of view is well expressed by Prof. S. Radhakrishnan in his *Hindu view of life*. Referring to Hinduism he says, "The civilization itself has not, been a short-lived one. its historic records date back for over four thousand years and even then it had reached a stage of civilization which has continued its unbroken, though at times slow and static, course until the present day. It has stood the stress and strain of more than four or five millenniums of spiritual thought and experience. Though peoples of different races and cultures have *been* pouring into India from the dawn of History, Hinduism has been able to maintain its supremacy and even the proselytising creeds backed by political power have not been able to coerce the large majority of Hindus to their views. The Hindu culture possesses some vitality which seems to be denied to some other more forceful current . It is no more necessary to dissect Hinduism than to open a tree to see whether the sap still runs." The name of Prof. Radhakrishnan is big enough to invest with profundity whatever he says and impress the minds of his readers. But I must not hesitate to speak out my mind. For, I fear that his statement may become the basis of a vicious argument that the fact of survival is proof of fitness to survive. It seems to me that the question is. not whether a community lives or dies ; the question is on what plane does it live. There are different modes of survival. But all are not equally honourable. For an individual as well as for a society, there is a gulf between merely living and living worthily. To fight in a battle and to live in glory is one mode. To beat a retreat, to surrender and to live the life of a captive is. also a mode of survival. It is useless for a Hindu to take comfort in the fact that he and his people have survived. What he must consider is what is the quality of their

survival. If he does that, I am sure he will cease to take pride in the mere fact of survival. A Hindu's life has been a life of continuous defeat and what appears to him to be life everlasting is not living everlastingly but is really a life which is perishing everlastingly. It is a mode of survival of which every right-minded Hindu, who is not afraid to own up the truth, will feel ashamed.

XX

There is no doubt; in my opinion, that unless you change your social order you can achieve little by way of progress. You cannot mobilize the community either for defence or for offence. You cannot build anything on the foundations of caste. You cannot build up a nation, you cannot build up a morality. Anything that you will build on the foundations of caste will crack and will never be a whole.

The only question that remains to be considered is—*How to bring about the reform of the Hindu social order? How to abolish caste?* This is a question of supreme importance. There is a view that in the reform of caste, the first step to take, is to abolish sub-castes. This view is based upon the supposition that there is a greater similarity in manners and status between sub-caste than there is between castes. I think, this is an erroneous supposition. The Brahmins of Northern and Central India are socially of lower grade, as compared with the Brahmins of the Deccan and Southern India. The former are only cooks and water-carriers while the latter occupy a high social position. On the other hand, in Northern India, the Vaishyas and Kayasthas are intellectually and socially on a par with the Brahmins of the Deccan and Southern India. Again, in the matter of food there is no similarity between the Brahmins of the Deccan and Southern India, who are vegetarians and the Brahmins of Kashmir and Bengal who are non-vegetarians. On the other hand, the Brahmins of the Deccan and Southern India have more in common so far as food is concerned with such non-Brahmins as the Gujaratis, Marwaris, Baniyas and Jains. There is no doubt that from the standpoint of making the transit from one caste to another easy, the fusion of the Kayasthas of Northern India and the other Non-Brahmins of Southern India with the Non-Brahmins of the Deccan and the Dravid country is more practicable than the fusion of the Brahmins of the South with the Brahmins of the North. But assuming that the fusion of sub-Castes is possible, what guarantee is there that the abolition of sub-Castes will necessarily lead to the abolition of Castes? On the contrary, it may happen that the process may stop with the abolition of sub-Castes. In that case, the abolition of sub-Castes will only help to strengthen the Castes and make them more powerful and therefore more mischievous. This

remedy is therefore neither practicable nor effective and may easily prove to be a wrong remedy. Another plan of action for the abolition of Caste is to begin with inter-caste dinners. This also, in my opinion, is an inadequate remedy. There are many Castes which allow inter-dining. But it is a common experience that inter-dining has not succeeded in killing the spirit of Caste and the consciousness of Caste. I am convinced that the real remedy is inter-marriage. Fusion of blood can alone create the feeling of being kith and kin and unless this feeling of kinship, of being kindred, becomes paramount the separatist feeling—the feeling of being aliens—created by Caste will not vanish. Among the Hindus inter-marriage must necessarily be a factor of greater force in social life than it need be in the life of the non-Hindus. Where society is already well-knit by other ties, marriage is an ordinary incident of life. But where society cut asunder, marriage as a binding force becomes a matter of urgent necessity. *The real remedy for breaking Caste is inter-marriage. Nothing else will serve as the solvent of Caste.* Your Jat-Pat-Todak Mandal has adopted this line of attack.

It is a direct and frontal attack, and I congratulate you upon a correct diagnosis and more upon your having shown the courage to tell the Hindus what is really wrong with them. Political tyranny is nothing compared to social tyranny and a reformer, who defies society, is a much more courageous man than a politician, who defies Government. You are right in holding that Caste will cease to be an operative farce only when inter-dining and inter-marriage have become matters of common course. You have located the source of the disease. But is your prescription the right prescription for the disease? Ask yourselves this question ; Why is it that a large majority of Hindus do not inter-dine and do not inter-marry? Why is it that your cause is not popular? There can be only one answer to this question and it is that inter-dining and inter-marriage are repugnant to the beliefs and dogmas which the Hindus regard as sacred. Caste is not a physical object like a wall of bricks or a line of barbed wire which prevents the Hindus from co-mingling and which has, therefore, to be pulled down. Caste is a notion, it is a state of the mind. The destruction of Caste does not therefore mean the destruction of a physical barrier. It means a *notional* change. Caste may be bad. Caste may lead to conduct so gross as to be called man's inhumanity to man. All the same, it must be recognized that the Hindus observe Caste not because they are inhuman or wrong headed. They observe Caste because they are deeply religious. People are not wrong in observing Caste. In my view, what is wrong is their religion, which has inculcated this notion of Caste. If this is correct, then obviously the enemy, you must grapple with, is not the people who observe Caste, but the

Shastras which teach them this religion of Caste. Criticising and ridiculing people for not inter-dining or inter-marrying or occasionally holding inter-caste dinners and celebrating inter-caste marriages, is a futile method of achieving the desired end. The real remedy is to destroy the belief in the sanctity of the *Shastras*. How do you expect to succeed, if you allow the *Shastras* to continue to mould the beliefs and opinions of the people? Not to question the authority of the *Shastras*, to permit the people to believe in their sanctity and their sanctions and to blame them and to criticise them for their acts as being irrational and inhuman is a incongruous way of carrying on social reform. Reformers working for the removal of untouchability including Mahatma Gandhi, do not seem to realize that the acts of the people are merely the results of their beliefs inculcated upon their minds by the *Shastras* and that people will not change their conduct until they cease to believe in the sanctity of the *Shastras* on which their conduct is founded. No wonder that such efforts have not produced any results. You also seem to be erring in the same way as the reformers working in the cause of removing untouchability. To agitate for and to organise inter-caste dinners and inter-caste marriages is like forced feeding brought about by artificial means. Make every man and woman free from the thralldom of the *Shastras*, cleanse their minds of the pernicious notions founded on the *Shastras*, and he or she will inter-dine and inter-marry, without your telling him or her to do so.

It is no use seeking refuge in quibbles. It is no use telling people that the *Shastras* do not say what they are believed to say, grammatically read or logically interpreted. What matters is how the *Shastras* have been understood by the people. You must take the stand that Buddha took. You must take the stand which Guru Nanak took. You must not only discard the *Shastras*, you must deny their authority, as did Buddha and Nanak. You must have courage to tell the Hindus, that what is wrong with them is their religion—the religion which has produced in them this notion of the sacredness of Caste. Will you show that courage?

XXI

What are your chances of success? Social reforms fall into different species. There is a species of reform, which does not relate to the religious notion of people but is purely secular in character. There is also a species of reform, which relates to the religious notions of people. Of such a species of reform, there are two varieties. In one, the reform accords with the principles of the religion and merely invites people, who have departed from it, to revert to them and to follow them. The second is a reform which not only touches the religious principles but is diametrically opposed

to those principles and invites people to depart from and to discard their authority and to act contrary to those principles. Caste is the natural outcome of certain religious beliefs which have the sanction of the *Shastras*, which are believed to contain the command of divinely inspired sages who were endowed with a supernatural wisdom and whose commands, therefore, cannot be disobeyed without committing sin. The destruction of Caste is a reform which falls under the third category. To ask people to give up Caste is to ask them to go contrary to their fundamental religious notions. It is obvious that the first and second species of reform are easy. But the third is a stupendous task, well nigh impossible. The Hindus hold to the sacredness of the social order. Caste has a divine basis. You must therefore destroy the sacredness and divinity with which Caste has become invested. In the last analysis, this means you must destroy the authority of the *Shastras* and the *Vedas*.

I have emphasized this question of the ways and means of destroying Caste, because I think that knowing the proper ways and means is more important than knowing the ideal. If you do not know the real ways and means, all your shots are sure to be misfires. If my analysis is correct then your task is herculean. You alone can say whether you are capable of achieving it.

Speaking for myself, I see the task to be well nigh impossible. Perhaps you would like to know why I think so. Out of the many reasons, which have led me to take this view, I will mention some, which I regard much important. One of these reasons is the attitude of hostility, which the Brahmins have shown towards this question. The Brahmins form the vanguard of the movement for political reform and in some cases also of economic reform. But they are not to be found even as camp followers in the army raised to break down the barricades of Caste. Is there any hope of the Brahmins ever taking up a lead in the future in this matter? I say no. You may ask why? You may argue that there is no reason why Brahmins should continue to shun social reform. You may argue that the Brahmins know that the bane of Hindu Society is Caste and as an enlightened class could not be expected to be indifferent to its consequences. You may argue that there are secular Brahmins and priestly Brahmins and if the latter do not take up the cudgels on behalf of those who want to break Caste, the former will. All this of course sounds very plausible. But in all this it is forgotten that the break up of the Caste system is bound to affect adversely the Brahmin Caste. Having regard to this, is it reasonable to expect that the Brahmins will ever consent to lead a movement the ultimate result of which is to destroy the power and prestige of the Brahmin Caste? Is it

reasonable to expect the secular Brahmins to take part in a movement directed against the priestly Brahmins? In my judgment, it is useless to make a distinction between the secular Brahmins and priestly Brahmins. Both are kith and kin. They are two arms of the same body and one bound to fight for the existence of the other. In this connection, I am reminded of some very pregnant remarks made by Prof. Dicey in his *English Constitution*. Speaking of the actual limitation on the legislative supremacy of Parliament, Dicey says :”The actual exercise of authority by any sovereign whatever, and notably by Parliament, is bounded or controlled by two limitations. Of these the one is an external, and the other is an internal limitation. The external limit to the real power of a sovereign consists in the possibility or certainty that his subjects or a large number of them will disobey or resist his laws. . . The internal limit to the exercise of sovereignty arises from the nature of the sovereign power itself. Even a despot exercises his powers in accordance with his character, which is itself moulded by the circumstance under which he lives, including under that head the moral feelings of the time and the society to which he belongs. The Sultan could not, if he would, change the religion of the Mohammedan world, but even if he could do so, it is in the very highest degree improbable that the head of Mohammedanism should wish to overthrow the religion of Mohammed ; the internal check on the exercise of the Sultan's power is at least as strong as the external limitation. People sometimes ask the idle question, why the Pope does not introduce this or that reform? The true answer is that a revolutionist is not the kind of man who becomes a Pope and that a man who becomes a Pope has no wish to be a revolutionist.”I think, these remarks apply equally to the Brahmins of India and one can say with equal truth that if a man who becomes a Pope has no wish to become a revolutionary, a man who is born a Brahmin has much less desire to become a revolutionary. Indeed, to expect a Brahmin to be a revolutionary in matters of social reform is as idle as to expect the British Parliament, as was said by Leslie Stephen, to pass an Act requiring all blue-eyed babies to be murdered.

Some of you will say that it is a matter of small concern whether the Brahmins come forward to lead the movement against Caste or whether they do not. To take this view is in my judgment to ignore the part played by the intellectual class in the community. Whether you accept the theory of the great man as the maker of history or whether you do not, this much you will have to concede that in every country the intellectual class is the most influential class, if not the governing class. The intellectual class is the class which can foresee, it is the class which can advise and give lead. In no

country does the mass of the people live the life of intelligent thought and action. It is largely imitative and follows the intellectual class. There is no exaggeration in saying that the entire destiny of a country depends upon its intellectual class. If the intellectual class is honest, independent and disinterested it can be trusted to take the initiative and give a proper lead when a crisis arises. It is true that intellect by itself is no virtue. It is only a means and the use of means depends upon the ends which an intellectual person pursues. An intellectual man can be a good man but he can easily be a rogue. Similarly an intellectual class may be a band of high-souled persons, ready to help, ready to emancipate erring humanity or it may easily be a gang of crooks or a body of advocates of a narrow clique from which it draws its support. You may think it a pity that the intellectual class in India is simply another name for the Brahmin caste. You may regret that the two are one.; that the existence of the intellectual class should be bound with one single caste, that this intellectual class should share the interest and the aspirations of that Brahmin caste, which has regarded itself the custodian of the interest of that caste, rather than of the interests of the country. All this may be very regrettable. But the fact remains, that the Brahmins form the intellectual class of the Hindus. It is not only an intellectual class but it is a class which is held in great reverence by the rest of the Hindus. The Hindus are taught that the Brahmins are *Bhudevas* (Gods on earth) *vernanam brahmnam gurub !*: The Hindus are taught that Brahmins alone can be their teachers. Manu says, "If it be asked how it should be with respect to points of the Dharma which have not been specially mentioned, the answer is that which Brahmins who are Shishthas propound shall doubtless have legal force.":

ANAMNATESHU DHARMEHU KATHAM SYADITI CHEDBHVETA !

YAM SHISHTA BRAHMANAM BRUYUH SA DHARMAH SYADASHNKITAH !!

When such an intellectual class, which holds the rest of the community in its grip, is opposed to the reform of Caste, the chances of success in a movement for the break-up of the Caste system appear to me very, very remote.

The second reason, why I say the task is impossible, will be clear if you will bear in mind that the Caste system has two aspects. In one of its aspects, it divides men into separate communities. In its second aspect, it places these communities in a graded order one above the other in social status. Each caste takes its pride and its consolation in the fact that in the scale of castes it is above some other caste. As an outward mark of this gradation, there is also a gradation of social and religious rights technically

spoken of an *Ashta-dhikaras* and *Sanskaras*. The higher the grade of a caste, the greater the number of these rights and the lower the grade, the lesser their number. Now this gradation, this scaling of castes, makes it impossible to organise a common front against the Caste System. If a caste claims the right to inter-dine and inter-marry with another caste placed above it, it is frozen, instantly it is told by mischief-mongers, and there are many Brahmins amongst such mischief-mongers, that it will have to concede inter-dining and inter-marriage with castes below it ! All are slaves of the Caste System. But all the slaves are not equal in status. To excite the proletariat to bring about an economic revolution, Karl Marx told them :”You have nothing to lose except your chains.”But the artful way in which the social and religious rights are distributed among the different castes whereby some have more and some have less, makes the slogan of Karl Marx quite useless to excite the Hindus against the Caste System. Castes form a graded system of sovereignties, high and low, which are jealous of their status and which know that if a general dissolution came, some of them stand to lose more of their prestige and power than others do. You cannot, therefore, have a general mobilization of the Hindus, to use a military expression, for an attack on the Caste System.

XXII

Can you appeal to reason and ask the Hindus to discard Caste as being contrary to reason? That raises the question : Is a Hindu free to follow his reason? Manu has laid down three sanctions to which every Hindu must conform in the matter of his behaviour *vedah smritih sadacharah uvasy cha priyamatmanah* Here there is no place for reason to play its part. A Hindu must follow either *Veda*, *Smriti* or *Sadachar*. He cannot follow anything else. In the first place how are the texts of the *Vedas* and *Smritis* to be interpreted whenever any doubt arises regarding their meaning? On this important question the view of Manu is quite definite. He says :

*yovamanyet te moole hetushrashtaya dwizah
sa sadhubhirbahishkaryo nashitiko vedandikah*

According to this rule, rationalism as a canon of interpreting the *Vedas* and *Smritis*, is absolutely condemned. It is regarded to be as wicked as atheism and the punishment provided for it is ex-communication. Thus, where a matter is covered by the *Veda* or the *Smriti*, a Hindu cannot resort to rational thinking. Even when there is a conflict between *Vedas* and *Smritis* on matters on which they have given a positive injunction, the solution is not left to reason. When there is a conflict between two *Shrutis*,

both are to be regarded as of equal authority. Either of them may be followed. No attempt is to be made to find out which of the two accords with reason. This is made clear by *Manu*:

shrutidwadham tu yatra syaptatra dharvarvudhau smritau

"When there is a conflict between *Shruti* and *Sinriti*, the *Shruti* must prevail." But here too, no attempt must be made to find out which of the two accords with reason. This is laid down by *Manu* in the following Shloka :

*ya vedabahyah snrityo yashch kashch kridrishtab i
sarvasta nishphalah prety tamonishtha hi tah smritab ii*

Again, when there is a conflict between two *Smritis*, the *Manu-Smriti* must prevail, but no attempt is to be made to find out which of the two accords with reason. This is the ruling given by *Brihaspati*:

*vedayatvopanibandhritavat pramanyam hi manoah smritab
manvrthaviparita tu ya smritih sa na shashyate*

It is, therefore, clear that in any matter on which the *Shrutis* and *Smritis* have given a positive direction, a Hindu is not free to use his reasoning faculty. The same rule is laid down in the *Mahabharat* :

*puranam manvo dharmah sango vedashchikitsitam
agasidhani chatvari na hantavyani hetubhib*

He must abide by their directions. The *Caste* and *Varna* are matters, which are dealt with by the *Vedas* and the *Smritis* and consequently, appeal to reason can have no effect on a Hindu. So far as *Caste* and *Varna* are concerned, not only the *Shastras* do not permit the Hindu to use his reason in the decision of the question, but they have taken care to see that no occasion is left to examine in a rational way the foundations of his belief in *Caste* and *Varna*. It must be a source of silent amusement to many a Non-Hindu to find hundreds and thousands of Hindus breaking *Caste* on certain occasions, such as railway journey and foreign travel and yet endeavouring to maintain *Caste* for the rest of their lives ! The explanation of this phenomenon discloses another fetter on the reasoning faculties of the Hindus. Man's life is generally habitual and unreflective. Reflective thought, in the sense of active, persistent and careful consideration of any belief or supposed form or knowledge in the light of the grounds that support it and further conclusions to which it tends, is quite rare and arises only in a situation which presents a dilemma—a Crisis—Railway journeys

and foreign travels are really occasions of crisis in the life of a Hindu and it is natural to expect a Hindu to ask himself why he should maintain Caste at all, if he cannot maintain it at all times. But he does not. He breaks Caste at one step and proceeds to observe it at the next without raising any question. The reason for this astonishing conduct is to be found in the rule of the *Shastras*, which directs him to maintain Caste as far as possible and to undergo *praynschitia* when he cannot. By this theory of *prayaschitta*, the *Shastras* by following a spirit of compromise have given caste a perpetual lease of life and have smothered reflective thought which would have otherwise led to the destruction of the notion of Caste.

There have been many who have worked in the cause of the abolition of Caste and Untouchability. Of those, who can be mentioned, Ramanuja, Kabir and others stand out prominently. Can you appeal to the acts of these reformers and exhort the Hindus to follow them? It is true that Manu has included *Sadachar* (*sadachar*) as one of the sanctions along with *Shruti* and *Smriti*. Indeed, *Sadachar* has been given a higher place than *Shastras* :

*yaddwacharyate yen dharmya vadharmamev va
deshasyacharanam nityam charitram tadwikirtatam*

according to this, *sadachar*, whether, it is *dharmya* or *adharmya* in accordance with *Shastras* or contrary to *Shastras*, must be followed. But what is the meaning of *Sadachar*? If any one were to suppose that *Sadachar* means right or good acts *i.e.* acts of good and righteous men he would find himself greatly mistaken. *Sadachar* does not mean good acts or acts of good men. It means ancient custom *good* or *bad*. The following verse makes this clear :

*yasmin deshe ya acharah parmpayakramagatah
varnani kil sarvesham sa sadachar uchyate*

As though to warn people against the view that *Sadachar* means good *acts* or acts of good men and fearing that people might understand it that way and follow the acts of good men, the *Smrities* have commanded the Hindus in unmistakable terms not to follow even Gods in their good deeds, if they are contrary to *Shruti*, *Smriti* and *Sadachar*. This may sound to be most extraordinary, most perverse, but the fact remains that *na devacharitam charet* is an injunction, issued to the Hindus by their *Shastras*. Reason and morality are the two most powerful weapons in the armoury of a Reformer. To deprive him of the use of these weapons is to disable him for action. How are you going to break up Caste, if people are not free to consider whether it accords with reason? How are you going to break up Caste if people are

not free to consider whether it accords with morality? The wall built around Caste is impregnable and the material, of which it is built, contains none of the combustible stuff of reason and morality. Add to this the fact that inside this wall stands the army of Brahmins, who form the intellectual class, Brahmins who are the natural leaders of the Hindus, Brahmins who are there not as mere mercenary soldiers but as an army fighting for its homeland and you will get an idea why I think that breaking-up of Caste amongst the Hindus is well-nigh impossible. At any rate, it would take ages before a breach is made. But whether the doing of the deed takes time or whether it can be *done* quickly, you must not forget that if you wish to bring about a breach in the system then you have got to apply the dynamite to the *Vedas* and the *Shastras*, which deny any part to reason, to *Vedas* and *Shastras*, which deny any part to morality. You must destroy the Religion of the *Sbrutis* and the *Smritis*. Nothing else will avail. This is my considered view of the matter.

XXIII

Some may not understand what I mean by destruction of Religion; some may find the idea revolting to them and some may find it revolutionary. Let me therefore explain my position. I do not know whether you draw a distinction between principles and rules. But I do. Not only I make a distinction but I say that this distinction is real and important. Rules are practical ; they are habitual ways of doing things according to prescription. But principles are intellectual; they are useful methods of judging things. Rules seek to tell an agent just what course of action to pursue. Principles do not prescribe a specific course of action. Rules, like cooking recipes, do tell just what to do and how to do it. A principle, such as that of justice, supplies a main head by reference to which he is to consider the bearings of his desires and purposes, it guides him in his thinking by suggesting to him the important consideration which he should bear in mind. This difference between rules and principles makes the acts done in pursuit of them different in quality and in content. Doing what is said to *be*, good by virtue of a rule and doing good in the light of a principle are two different things. The principle may be wrong but the act is conscious and responsible. The rule may be right but the act is mechanical. A religious act may not be a correct act but must at least be a responsible act. To permit of this responsibility, Religion must mainly *be* a matter of principles only. It cannot be a matter of rules. The moment it degenerates into rules it ceases to be Religion, as it kills responsibility which is the essence of a truly religious act. What is this Hindu Religion? Is it a set of principles or is it a code of rules? Now the Hindu Religion, as contained in the *Vedas* and the

Smritis, is nothing but a mass of sacrificial, social, political and sanitary rules and regulations, all mixed up. What is called Religion by the Hindus is nothing but a multitude of commands and prohibitions. Religion, in the sense of spiritual principles, truly universal, applicable to all races, to all countries, to all times, is not to be found in them, and if it is, it does not form the governing part of a Hindu's life. That for a Hindu, Dharma means commands and prohibitions is clear from the way the word Dharma is used in *Vedas* and the *Smritis* and understood by the commentators. The word Dharma as used in the *Vedas* in most cases means religious ordinances or rites. Even Jaimini in his *Purva-Mimansa* defines Dharma as "a desirable goal or result that is indicated by injunctive (*Vedic*) passages". To put it in plain language, what the Hindus call Religion is really Law or at best legalized class-ethics. Frankly, I refuse to cull this code of ordinances, as Religion. The first evil of such a code of ordinances, misrepresented to the people as Religion, is that it tends to deprive moral life of freedom and spontaneity and to reduce it (for the conscientious at any rate) to a *more* or less anxious and servile conformity to externally imposed rules. Under it, there is no loyalty to ideals, there is only conformity to commands. But the worst evil of this code of ordinances is that the laws it contains must be the same yesterday, today and forever. They are iniquitous in that they are not the same for one class as for another. But this iniquity is made perpetual in that they are prescribed to be the same for all generations. The objectionable part of such a scheme is not that they are made by certain persons called Prophets or Law-givers. The objectionable part is that this code has been invested with the character of finality and fixity. Happiness notoriously varies with the conditions and circumstances of a person, as well as with the conditions of different people and epochs. That being the case, how can humanity endure this code of eternal laws, without being cramped and without being crippled? I have, therefore, no hesitation in saying that such a religion must be destroyed and I say, there is nothing irreligious in working for the destruction of such a religion. Indeed I hold that it is your bounden duty to tear the mask, to remove the misrepresentation that as caused by misnaming this Law as Religion. This is an essential step for you. Once you clear the minds of the people of this misconception and enable them to realize that what they are told as Religion is not Religion but that it is really Law, you will be in a position to urge for its amendment or abolition. So long as people look upon it as Religion they will not be ready for a change, because the idea of Religion is generally speaking not associated with the idea of change. But the idea of law is associated with the idea of change and when people come to know

that what is called Religion is really Law, old and archaic, they will be ready for a change, for people know and accept that law can be changed.

XXIV

While I condemn a Religion of Rules, I must not be understood to hold the opinion that there is no necessity for a religion. On the contrary, I agree with Burke when he says that, "True religion is the foundation of society, the basis on which all true Civil Government rests, and both their sanction." Consequently, when I urge that these ancient rules of life be annulled, I am anxious that its place shall be taken by a Religion of Principles, which alone can lay claim to being a true Religion. Indeed, I am so convinced of the necessity of Religion that I feel I ought to tell you in outline what I regard as necessary items in this religious reform. The following in my opinion should be the cardinal items in this reform : (1) There should be one and only one standard book of Hindu Religion, acceptable to all Hindus and recognized by all Hindus. This of course means that all other books of Hindu religion such as *Vedas*, *Shastras* and *Puranas*, which are treated as sacred and authoritative, must by law cease to be so and the preaching of any doctrine, religious or social contained in these books should be penalized. (2) It should be better if priesthood among Hindus was abolished. But as this seems to be impossible, the priesthood must at least cease to be hereditary. Every person who professes to be a Hindu must be eligible for being a priest. It should be provided by law that no Hindu shall be entitled to be a priest unless he has passed an examination prescribed by the State and holds a *sanad* from the State permitting him to practise. (3) No ceremony performed by a priest who does not hold a *sanad* shall be deemed to be valid in law and it should be made penal for a person who has no *sanad* to officiate as a priest. (4) A priest should be the servant of the State and should be subject to the disciplinary action by the State in the matter of his morals, beliefs and worship, in addition to his being subject along with other citizens to the ordinary law of the land. (5) The number of priests should be limited by law according to the requirements of the State as is done in the case of the I.C.S. To some, this may sound radical. But to my mind there is nothing revolutionary in this. Every profession in India is regulated. Engineers must show proficiency, Doctor must show proficiency, Lawyers must show proficiency, before they are allowed to practise their professions. During the whole of their career, they must not only obey the law of the land, civil as well as criminal, but they must also obey the special code of morals prescribed by their respective professions. The priest's is the only profession where proficiency is not required. The profession of a Hindu

priest is the only profession which is not subject to any code. Mentally a priest may be an idiot, physically a priest may be suffering from a foul disease, such as syphilis or gonorrhoea, morally he may be a wreck. But he is fit to officiate at solemn ceremonies, to enter the *sanctum sanctorum* of a Hindu temple and worship the Hindu God. All this becomes possible among the Hindus because for a priest it is enough to be born in a priestly caste. The whole thing is abominable and is due to the fact that the priestly class among Hindus is subject neither to law nor to morality. It recognizes no duties. It knows only of rights and privileges. It is a pest which divinity seems to have let loose on the masses for their mental and moral degradation. The priestly class must be brought under control by some such legislation as I have outlined above. It will prevent it from doing mischief and from misguiding people. It will democratise it by throwing it open to every one. It will certainly help to kill the Brahminism and will also help to kill Caste, which is nothing but Brahminism incarnate. Brahminism is the poison which has spoiled Hinduism. You will succeed in saving Hinduism if you will kill Brahminism. There should be no opposition to this reform from any quarter. It should be welcomed even by the Arya Samajists, because this is merely an application of their own doctrine of *guna-karma*.

Whether you do that or you do not, you must give a new doctrinal basis to your Religion—a basis that will be in consonance with Liberty, Equality and Fraternity, in short, with Democracy. I am no authority on the subject. But I am told that for such religious principles as will be in consonance with Liberty, Equality and Fraternity it may not be necessary for you to borrow from foreign sources and that you could draw for such principles on the *Upanishads*. Whether you could do so without a complete remoulding, a considerable scraping and chipping off the ore they contain, is more than I can say. This means a complete change in the fundamental notions of life—it means a complete change in the values of life. It means a complete change in outlook and in attitude towards men and things. It means conversion but if you do not. like the word, I will say, it means new life. But a new life cannot enter a body that is dead. New life can center only in a new body. The old body must die before a new body can come into existence and a new life can enter into it. To put it simply: the old must cease to be operative before the new can begin to enliven and to pulsate. This is what I meant when I said you must discard the authority of the *Shastras* and destroy the religion of the *Shastras*.

XXV

I have kept you too long. It is time I brought this address to a close. This

would have been a convenient point for me to have stopped. But this would probably be my last address to a Hindu audience on a subject vitally concerning the Hindus. I would therefore like, before I close, to place before the Hindus, if they will allow me, some questions which I regard as vital and invite them seriously to consider the same.

In the first place, the Hindus must consider whether it is sufficient to take the placid view of the anthropologist that there is nothing to be said about the beliefs, habits, morals and outlooks on life, which obtain among the different peoples of the world except that they often differ ; or whether it is not necessary to make an attempt to find out what kind of morality, beliefs, habits and outlook have worked best and have enabled those who possessed them to flourish, *to go strong*, to people the earth and to have dominion over it. As is observed by Prof. Carver, "Morality and religion, as the organised expression of moral approval and disapproval, must be regarded as factors in the struggle for existence as truly as are weapons for offence and defence, teeth and claws, horns and hoofs, furs and feathers. The social group, community, tribe or nation, which develops an unworkable scheme of morality or within which those social acts which weaken it and unfit it for survival, habitually create the sentiment of approval, while those which would strengthen and enable it to be expanded habitually create the sentiment of disapproval, will eventually be eliminated. It is its habits of approval or disapproval (these are the results of religion and morality) that handicap it, as really as the possession of two wings on one side with none on the other will handicap the colony of flies. It would be as futile in the one case as in the other to argue, that one system is just as good as another." Morality and religion, therefore, are not mere matters of likes and dislikes. You may dislike exceedingly a scheme of morality, which, if universally practised within a nation, would make that nation the strongest nation on the face of the earth. Yet in spite of your dislike such a nation will become strong. You may like exceedingly a scheme of morality and an ideal of justice, which if universally practised within a nation, would make it enable to hold its own in the struggle with other nations. Yet in spite of your admiration this nation will eventually disappear. The Hindus must, therefore, examine their religion and then morality in terms of their survival value.

Secondly, the Hindus must consider whether they should conserve the whole of their social heritage or select what is helpful and transmit to future generations only that much and no more. Prof, John Dewey., who was my teacher and to whom I owe so much, has said : "Every society gets encumbered with what is trivial, with dead wood from the past, and with

what is positively perverse... As a society becomes more enlightened, it realizes that it is responsible *not* to conserve and transmit, the whole of its existing achievements, but only such as make for a better future society." Even Burke in spite of the vehemence with which he opposed the principle of change embodied in the French Revolution, was compelled to admit that "a State without the means of some change is without the means of its conservation. Without such means it might even risk the loss of that part of the constitution which it wished the most religiously to preserve, " What Burke said of a State applies equally to a society.

Thirdly, the Hindus must consider whether they must not cease to worship the past as supplying its ideals. The beautiful effect of this worship of the past are best summed up by Prof. Dewey when he says : "An individual can live only in the present. The present is not just something which comes after the past ; much less something produced by it. It is what life is in leaving the past behind it. The study of past products will not help us to understand the present. A knowledge of the past and its heritage is of great significance when it enters into the present, but not otherwise. And the mistake of making the-records and remains of the past the main material of education is that it tends to make the past a rival of the present and the present a more or less futile imitation of the past." The principle, which makes little of the present act of living and growing, naturally looks upon the present as empty and upon the future as remote. Such a principle is inimical to progress and is an hindrance to a strong and a steady current of life.

Fourthly, the Hindus must consider whether the time has not come for them to recognize that there is nothing fixed, nothing eternal, nothing *sanatan*; that everything is changing, that change is the law of life for individuals as well as for society. In a changing society, there must be a constant revolution of old values and the Hindus must realize that if there must be standards to measure the acts of men there must also be a readiness to revise those standards.

XXVI

I have to confess that this address has become too lengthy. Whether this fault is compensated to any extent by breadth or depth is a matter for you to judge. All I claim is to have told you candidly my views. I have little to recommend them but some study and a deep concern in your destiny. If you will allow me to say, *these* views are the views of a man, who has been no tool of power, no flatterer of greatness. They come from one, almost the whole of whose public exertion has been one continuous struggle for liberty for the poor and for the oppressed and whose only reward has been

a continuous shower of calumny and abuse from national journals and national leaders, for no other reason except that I refuse to join with them in performing the miracle—I will not say trick—of liberating the oppressed with the gold of the tyrant and raising the poor with the cash of the rich. All this may not be enough to commend my views. I think they are not likely to alter yours. But whether they do or do not, the responsibility is entirely yours. You must make your efforts to uproot Caste, if not in my way, then in your way. I am sorry, I will not be with you. I have decided to change. This is not the place for giving reasons. But even when I am gone out of your fold, I will watch your movement with active sympathy and you will have my assistance for what it may be worth. Yours is a national cause. Caste is no doubt primarily the breath of the Hindus. But the Hindus have fouled the air all over and everybody is infected, Sikh, Muslim and Christian. You, therefore, deserve the support of all those who are suffering from this infection, Sikh, Muslim and Christian. Yours is more difficult than the other national cause, namely Swaraj. In the fight for Swaraj you fight with the whole nation on your side. In this, you have to fight against the whole nation and that too, your own. But it is more important than Swaraj. There is no use having Swaraj, if you cannot defend it. More important than the question of defending Swaraj is the question of defending the Hindus under the Swaraj. In my opinion only when the Hindu Society becomes a casteless society that it can hope to have strength enough to defend itself. Without such internal strength, Swaraj for Hindus may turn out to be only a step towards slavery. Good-bye and good wishes for your success.

APPENDIX I

A VINDICATION OF CASTE BY MAHATMA GANDHI

(A Reprint of his Articles in the "Harijan")

Dr. Ambedkar's Indictment I

The readers will recall the fact that Dr. Ambedkar was to have presided last May at the annual conference of the Jat-Pat-Todak Mandal of Lahore. But the conference itself was cancelled because Dr. Ambedkar's address was found by the Reception Committee to be unacceptable. How far a Reception Committee is justified in rejecting a President of its choice because of his address that may be objectionable to it is open to question. The Committee knew Dr. Ambedkar's views on caste and the Hindu

scriptures. They knew also that he had in unequivocal terms decided to give up Hinduism. Nothing less than the address that Dr. Ambedkar had prepared was to be expected from him. The committee appears to have deprived the public of an opportunity of listening to the original views of a man, who has carved out for himself a unique position in society. Whatever label he wears in future, Dr. Ambedkar is not the man to allow himself to be forgotten.

Dr. Ambedkar was not going to be beaten by the Reception Committee. He has answered their rejection of him by publishing the address at his own expense. He has priced it at 8 annas, I would suggest a reduction to 2 annas or at least 4 annas.

No reformer can ignore the address. The orthodox will gain by reading it. This is not to say that the address is not open to objection. It has to be read only because it is open to serious objection. Dr. Ambedkar is a challenge to Hinduism. Brought up as a Hindu, educated by a Hindu potentate, he has become so disgusted with the so-called Savarna Hindus for the treatment that he and his people have received at their hands that he proposes to leave not only them but the very religion that is his and their common heritage. He has transferred to that religion, his disgust against a part of its professors.

But this is not to be wondered at. After all, one can only judge a system or an institution by the conduct of its representatives. What is more. Dr. Ambedkar found that the vast majority of Savarna Hindus had not only conducted themselves inhumanly against those of their fellow religionists, whom they classed as untouchables, but they had based their conduct on the authority of their scriptures, and when he began to search them he had found ample warrant for their beliefs in untouchability and all its implications. The author of the address has quoted chapter and verse in proof of his three-fold indictment—inhuman conduct itself, the unabashed justification for it on the part of the perpetrators, and the subsequent discovery that the justification was warranted by their scriptures.

No Hindu who prizes his faith above life itself can afford to underrate the importance of this indictment. Dr Ambedkar is not alone in his disgust. He is its most uncompromising exponent and one of the ablest among them. He is certainly the most irreconcilable among them. Thank God, in the front rank of the leaders, he is singularly alone and as yet but a representative of a very small minority. But what he says is voiced with more or less vehemence by many leaders belonging to the depressed classes. Only the latter, for instance Rao Bahadur M. C. Rajah and Dewan Bahadur Srinivasan, not only do not threaten to give up Hinduism but find

enough warmth in it to compensate for the shameful persecution to which the vast mass of Harijans are exposed.

But the fact of many leaders remaining in the Hindu fold is no warrant for disregarding what Dr. Ambedkar has to say. The Savaraas have to correct their belief and their conduct. Above all those who are by their learning and influence among the Savarnas have to give an authoritative interpretation of the scriptures. The questions that Dr. Ambedkar's indictment suggest are :

- (1) What are the scriptures?
- (2) Are all the printed texts to be regarded as an integral part of them or is any part of them to be rejected as unauthorised interpolation?
- (3) What is the answer of such accepted and expurgated scriptures on the question of untouchability, caste, equality of status, inter-dining and intermarriages? (These have been all examined by Dr. Ambedkar in his address.)

I must reserve for the next issue my own answer to these questions and a statement of the (at least some) manifest flaws in Dr. Ambedkar's thesis

(*Harijan*, July II, 1936)

II

The *Vedas*, *Upanishads*, *Smritis* and *Puranas* including Ramayana and Mahabharata are the Hindu Scriptures. Nor is this a finite list. Every age or even generation has added to the list. It follows, therefore, that everything printed or even found handwritten is not scripture. The *Smritis* for instance contain much that can never be accepted as the word of God. Thus many of the texts that Dr. Ambedkar quotes from the *Smritis* cannot be accepted as authentic. The scriptures, properly so-called, can only be concerned with eternal varieties and must appeal to any conscience *i.e.* any heart whose eyes of understanding are opened. Nothing can be accepted as the word of God which cannot be tested by reason or be capable of being spiritually experienced. And even when you have an expurgated edition of the scriptures, you will need their interpretation. Who is the best interpreter? Not learned men surely. Learning there must be. But religion does not live it. It lives in the experiences of its saints and seers, in their lives and sayings. When all the most learned commentators of the scriptures are utterly forgotten, the accumulated experience of the sages and saints will abide and be an inspiration for ages to come.

Caste has nothing to do with religion. It is a custom whose origin I do not know and do not need to know for the satisfaction of my spiritual hunger. But I do know that it is harmful both to spiritual and national growth. *Varna* and *Ashrama* are institutions which have nothing to do with

castes. The law of *Varna* teaches us that we have each one of us to earn our bread by following the ancestral calling. It defines not our rights but our duties. It necessarily has reference to callings that are conducive to the welfare of humanity and to no other. It also follows that there is no calling too low and none too high. All are good, lawful and absolutely equal in status. The callings of a Brahmin—spiritual teacher—and a scavenger are equal, and their due performance carries equal merit before God and at one time seems to have carried identical reward before man. Both were entitled to their livelihood and no more. Indeed one traces even now in the villages the faint lines of this healthy operation of the law. Living in Segaon with its population of 600, I do not find a great disparity between the earnings of different tradesmen including Brahmins. I find too that real Brahmins are to be found even in these degenerate days who are living on alms freely given to them and are giving freely of what they have of spiritual treasures. It would be wrong and improper to judge the law of *Varna* by its caricature in the lives of men who profess to belong to a *Varna*, whilst they openly commit a breach of its only operative rule. Arrogation of a superior status by and of the *Varna* over another is a denial of the law. And there is nothing in the law of *Varna* to warrant a belief in untouchability. (The essence of Hinduism is contained in its enunciation of one and only God as Truth and its bold acceptance of Ahimsa as the law of the human family.)

I am aware that my interpretation of Hinduism will be disputed by many besides Dr. Ambedkar. That does not affect my position. It is an interpretation by which I have lived for nearly half a century and according to which I have endeavoured to the best of my ability to regulate my life.

In my opinion the profound mistake that Dr. Ambedkar has made in his address is to pick out the texts of doubtful authenticity and value and the state of degraded Hindus who are no fit specimens of the faith they so woefully misrepresent. Judged by the standard applied by Dr. Ambedkar, every known living faith will probably fail.

In his able address, the learned Doctor has over proved his case. Can a religion that was professed by Chaitanya, Jnyandeo, Tukaram, Tiruvailuvar, Rarnkrishna Paramahansa, Raja Ram Mohan Roy, Maharshi Devendranath Tagore, Vivekanand and host of others who might be easily mentioned, so utterly devoid of merit as is made out in Dr. Ambedkar's address? A religion has to be judged not by its worst specimens but by the best it might have produced. For that and that alone can be used as the standard to aspire to, if not to improve upon. (*Harijan*, July 18, 1936)

III VARNA VERSUS CASTE

Shri Sant Ramji of the Jat-Pat-Todak Mandal of Lahore wants me to publish the following: "I have read your remarks about Dr. Ambedkar and the Jat-Pat-Todak

Mandal, Lahore. In that connection I beg to submit as follows :

"We did not invite Dr. Ambedkar to preside over our conference because he belonged to the Depressed Classes, for we do not distinguish between a touchable and an untouchable Hindu. On the contrary our choice fell on him simply because his diagnosis of the fatal disease of the Hindu community was the same as ours, *i.e.* he too was of the opinion that caste system was the root cause of the disruption and downfall of the Hindus. The subject of the Doctor's thesis for Doctorate being caste system, he has studied the subject thoroughly. Now the object of our conference was to persuade the Hindus to annihilate castes but the advice of a non-Hindu in social and religious matters can have no effect on them. The Doctor in the supplementary portion of his address insisted on saying that that was his last speech as a Hindu, which was irrelevant as well as pernicious to the interests of the conference. So we requested him to expunge that sentence for he could easily say the same thing on any other occasion. But he refused and we saw no utility in making merely a show of our function. In spite of all this, I cannot help praising his address which is, as far as I know, the most learned thesis on the subject and worth translating into every vernacular of India.

Moreover, I want to bring to your notice that your philosophical difference between Caste and *Varna* is too subtle to be grasped by people in general, because for all practical purposes in the Hindu society Caste and *Varna* are one and the same thing, for the function of both of them is one and the same *i.e.* to restrict inter-caste marriages and inter-dining. Your theory of *Varnavyavastha* is impracticable in this age and there is no hope of its revival in the near future. But Hindus are slaves of caste and do not want to destroy it. So when you advocate your ideal of imaginary *Varnavyavastha* they find justification for clinging to caste. Thus you are doing a great disservice to social reform by advocating your imaginary utility of division of *Varnas*, for it creates hindrance in our way. To try to remove untouchability without striking at the root of *Varnavyavastha* is simply to treat the outward symptoms of a disease or to draw a line on the surface of water. As in the heart of their hearts *dvijas* do not want to give social equality to the so-called touchable and

untouchable Shudras, so they refuse to break caste, and give liberal donations for the removal of untouchability, simply to evade the issue. To seek the help of the *Shastras* for the removal of untouchability and caste is simply to wash mud with mud."

The last paragraph of the letter surely cancels the first. If the Mandal rejects the help of the *Shastras*, they do exactly what Dr. Ambedkar does, *i.e.* cease to be Hindus. How then can they object to Dr. Ambedkar's address merely because he said that that was his last speech as a Hindu? The position appears to be wholly untenable especially when the Mandal, for which Shri Sant Ram claims to speak, applauds the whole argument of Dr. Ambedkar's address.

But it is pertinent to ask what the Mandal believes if it rejects the *Shastras*. How can a Muslim remain one if he rejects the Quran, or a Christian remain Christian if he rejects the Bible? If Caste and *Varna* are convertible terms and if *Varna* is an integral part of the *Shastras* which define Hinduism, I do not know how a person who rejects Caste *i.e.* *Varna* can call himself a Hindu.

Shri Sant Ram likens the *Shastras* to mud. Dr. Ambedkar has not, so far as I remember, given any such picturesque name to the *Shastras*. I have certainly meant when I have said that if *Shastras* support the existing untouchability I should cease to call myself a Hindu. Similarly, if the *Shastras* support caste as we know it today in all its hideousness, I may not call myself or remain a Hindu since I have no scruples about interdining or intermarriage. I need not repeat my position regarding *Shastras* and their interpretation. I venture to suggest to Shri Sant Ram that it is the only rational and correct and morally defensible position and it has ample warrant in Hindu tradition.

(*Harijan*, August 15, 1936)

APPENDIX II

A REPLY TO THE MAHATMA BY DR. B. R. AMBEDKAR

I appreciate greatly the honour done me by the Mahatma in taking notice in his *Harijan* of the speech on Caste which I had prepared for the Jat Pat Todak Mandal. From a perusal of his review of my speech it is clear that the Mahatma completely dissents from the views I have expressed on the subject of Caste. I am not in the habit of entering into controversy with my opponents unless there are special reasons which compel me to act otherwise. Had my opponent been some mean and obscure person I would not have pursued him. But my opponent being the Mahatma himself I feel I must attempt to meet the case to the contrary which he has sought to put

forth. While I appreciate the honour he has done me, I must confess to a sense of surprize on finding that of all the persons the Mahatma should accuse me of a desire to seek publicity as he seems to do when he suggests that in publishing the undelivered speech my object was to see that I was not "forgotten". Whatever the Mahatma may choose to say my object in publishing the speech was to provoke the Hindus to think and take stock of their position. I have never hankered for publicity and if I may say so, I have more of it than I wish or need. But supposing it was out of the motive of gaining publicity that I printed the speech who could cast a stone at me? Surely not those, who like the Mahatma live in glass houses.

II

Motive apart, what has the Mahatma to say on the question raised by me in the speech? First of all any one who reads my speech will realize that the Mahatma has entirely missed the issues raised by me and that the issues he has raised are not the issues that arise out of what he is pleased to call my indictment of the Hindus. The principal points which I have tried to make out in my speech may be catalogued as follows : (1) That caste has ruined the Hindus ; (2) That the reorganization of the Hindu society on the basis of Chaturvarnya is impossible because the *Varnavym'astha* is like a leaky pot or like a man running at the nose. It is incapable of sustaining itself by its own virtue and has an inherent tendency to degenerate into a caste system unless there is a legal sanction behind it which can be enforced against every one transgressing his *Varna* ; (3) That the reorganization of the Hindu Society on the basis of Chaturvarnya is harmful, because the effect of the *Varnavyavastha* is to degrade the masses by denying them opportunity to acquire knowledge and to emasculate them by denying them the right to be armed ; (4) That the Hindu society must be reorganized on a religious basis which would recognise the principles of Liberty, Equality and Fraternity ; (5) That in order to achieve this object the sense of religious sanctity behind Caste and *Varna* must be destroyed ; (6) That the sanctity of Caste and *Varna* can be destroyed only by discarding the divine authority of the *Shastras*. It will be noticed that the questions raised by the Mahatma are absolutely beside the point and show that the main argument of the speech was lost upon him.

III

Let me examine the substance of the points made by the Mahatma. The first point made by the Mahatma is that the texts cited by me are not authentic. I confess I am no authority on this matter. But I should like to state that the texts cited by me are all taken from the writings of the late Mr. Tilak who was a recognised authority on the Sanskrit language and on

the Hindu *Shastras*. His second point is that these *Shastras* should be interpreted not by the learned but the saints and that, as the saints have understood them, the *Shastras* do not support Caste and Untouchability. As regards the first point what I like to ask the Mahatma is what does it avail to any one if the texts are interpolations and if they have been differently interpreted by the saints? The masses do not make any distinction between texts which are genuine and texts which are interpolations. The masses do not know what the texts are. They are too illiterate to know the contents of the *Shastras*. They have believed what they have been told and what they have been told is that the *Shastras* do enjoin as a religious duty the observance of Caste and Untouchability.

With regard to the saints, one must admit that howsoever different and elevating their teachings may have been as compared to those of the merely learned they have been lamentably ineffective. They have been ineffective for two reasons. Firstly, none of the saints ever attacked the Caste System. On the contrary, they were staunch believers in the System of Castes. Most of them lived and died as members of the castes which they respectively belonged. So passionately attached was Jnyandeo to his status as a Brahmin that when the Brahmins of Paithan would not admit him to their fold he moved heaven and earth to get his status as a Brahmin recognized *by* the Brahmin fraternity. And even the saint Eknath who now figures in the film "Dharmatma" as a hero for having shown courage to touch the untouchables and dine with them, did so not because he was opposed to Caste and Untouchability but because he felt that the pollution caused thereby could be washed away by a bath in the sacred waters of the river Ganges.* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/02.Annihilation of Caste.htm - _msocom_1 The saints have never according to my study carried on a campaign against Caste and Untouchability. They were not concerned with the struggle between men. They were concerned with the relation between man and God. They did not preach that all men were equal. They preached that all men were equal, in the eyes of God a very different and a very innocuous proposition which nobody can find difficult to preach or dangerous to believe in. The second reason why the teachings of the saints proved ineffective was because the masses have been taught that a saint might break Caste but the common man must not. A saint therefore never became an example to follow. He always remained a pious man to be honoured. That the masses have remained staunch believers in Caste and Untouchability shows that the pious lives and noble sermons of the saints have had no effect on their life and conduct as against the teachings of the *Shastras*. Thus it can be a matter of no consolation that there were saints or

that there is a Mahatma who understands the *Shastras* differently from the learned few or ignorant many. That the masses hold different view of the *Shastras* is fact which should and must be reckoned with. How is that to be dealt with except by denouncing the authority of the *Shastras*, which continue to govern their conduct, is a question which the Mahatma has not considered. But whatever the plan the Mahatma puts forth as an effective means to free the masses from the teachings of the *Shastras*, he must accept that the pious life led by one good Samaritan may be very elevating to himself but in India, with the attitude the common man has to saints and to Mahatmas—to honour but not to follow—one cannot make much out of it.

IV

The third point made by the Mahatma is that a religion professed by Chaitanya, Jnyandeo, Tukaram, Tiruvalluvar, Rarnkrishna Paramahansa etc. cannot be devoid of merit as is made out by me and that a religion has to be judged not by its worst specimens but by the best it might have produced. I agree with every word of this statement. But I do not quite understand what the Mahatma wishes to prove thereby. That religion should be judged not by its worst specimens but by its best is true enough but does it dispose of the matter? I say it does not. The question still remains—why the worst number so many and the best so few? To my mind there are two conceivable answers to this question : (1) That the worst by reason of some original perversity of theirs are morally uneducable and are therefore incapable of making the remotest approach to the religious ideal. Or (2) That the religious ideal is a wholly wrong ideal which has given a wrong moral twist to the lives of the many and that the best have become best in spite of the wrong ideal—in fact by giving to the wrong twist a turn in the right direction. Of these two explanations I am not prepared to accept the first and I am sure that even the Mahatma will not insist upon the contrary. To my mind the second is the only logical and reasonable explanation unless the Mahatma has a third alternative to explain why the worst are so many and the best so few. If the second is the only explanation then obviously the argument of the Mahatma that a religion should be judged by its best followers carries us nowhere except to pity the lot of the many who have gone wrong because they have been made to worship wrong ideals.

V

The argument of the Mahatma that Hinduism would be tolerable if only many were to follow the example of the saints is fallacious for another

reason. mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/02.Annihilation of Caste.htm - _msocom_2 By citing the names of such illustrious persons as Chaitanya etc. what the Mahatma seems to me to suggest in its broadest and simplest form is that Hindu society can be made tolerable and even happy without any fundamental change in its structure if all the high caste Hindus can be persuaded to follow a high standard of morality in their dealings with the low caste Hindus. I am totally opposed to this kind of ideology. I can respect those of the caste Hindus who try to realize a high social ideal in their life. Without such men India would be an uglier and a less happy place to live in than it is. But nonetheless anyone who relies on an attempt to turn the members of the caste Hindus into better men by improving their personal character is in my judgment wasting his energy and bugging an illusion. Can personal character make the maker of armaments a good man, *i.e.* a man who will sell shells that will not burst and gas that will not poison? If it cannot, how can you accept personal character to make a man loaded with the consciousness of Caste, a good man, *i.e.* a man who would treat his fellows as his friends and equals? To be true to himself he must deal with his fellows either as a superior or inferior according as the case may be; at any rate, differently from his own caste fellows. He can never be expected to deal with his fellows as his kinsmen and equals. As a matter of fact, a Hindu does treat all those who are not of his Caste as though they were aliens, who could be discriminated against with impunity and against whom any fraud or trick may be practised without shame. *This is to say that there can be a better or a worse Hindu. But a good Hindu there cannot be.* This is so not because there is anything wrong with his personal character. In fact what is wrong is the entire basis of his relationship to his fellows. The best of men cannot be moral if the basis of relationship between them and their fellows is fundamentally a wrong relationship. To a slave his master may be better or worse. But there cannot be a good master. A good man cannot be a master and a master cannot be a good man. The same applies to the relationship between high caste and low caste. To a low caste man a high caste man can be better or worse as compared to other high caste men. A high caste man cannot be a good man in so far as he must have a low caste man to distinguish him as high caste man. It cannot be good to a low caste man to be conscious that there is a high caste man above him. I have argued in my speech that a society based on *Varna* or Caste is a society which is based on a wrong relationship. I had hoped that the Mahatma would attempt to demolish my argument. But instead of doing that he has merely reiterated his belief in Chaturvarnya without disclosing the ground on which it is based.

VI

Does the Mahatma practise what he preaches? One does not like to make personal reference in an argument which is general in its application. But when one preaches a doctrine and holds it as a dogma there is a curiosity to know how far he practises what he preaches. It may be that his failure to practise is due to the ideal being too high, to be attainable; it may be that his failure to practise is due to the innate hypocrisy of the man. In any case he exposes his conduct to examination and I must not be blamed if I asked how far has the Mahatma attempted to realize his ideal in his own case. The Mahatma is a Bania by birth. His ancestors had abandoned trading in favour of ministership which is a calling of the Brahmins. In his own life, before he became a Mahatma, when occasion came for him to choose his career he preferred law to scales. On abandoning law he became half saint and half politician. He has never touched trading which is his ancestral calling. His youngest son—I take one who is a faithful follower of his father—born a Vaishya has married a Brahmin's daughter and has chosen to serve a newspaper magnate. The Mahatma is not known to have condemned him for not following his ancestral calling. It may be wrong and uncharitable to judge an ideal by its worst specimens. But surely the Mahatma as a specimen has no better and if he even fails to realize the ideal then the ideal must be an impossible ideal quite opposed to the practical instincts of man. Students of Carlyle know that he often spoke on a subject before he thought about it. I wonder whether such has not been the case with the Mahatma in regard to the subject matter of Caste. Otherwise certain questions which occur to me would not have escaped him. When can a calling be deemed to have become an ancestral calling so as to make it binding on a man? Must man follow his ancestral calling even if it does not suit his capacities, even when it has ceased to be profitable? Must a man live by his ancestral calling even if he finds it to be immoral? If every one must pursue his ancestral calling then it must follow that a man must continue to be a pimp because his grandfather was a pimp and a woman must continue to be a prostitute because her grandmother was a prostitute. Is the Mahatma prepared to accept the logical conclusion of his doctrine? To me his ideal of following one's ancestral calling is not only an impossible and impractical ideal, but it is also morally an indefensible ideal.

VII

The Mahatma sees great virtue in a Brahmin remaining a Brahmin all his life. Leaving aside the fact there are many Brahmins who do not like to remain Brahmins all their lives. What can we say about those Brahmins

who have clung to their ancestral calling of priesthood? Do they do so from any faith in the virtue of the principle of ancestral calling or do they do so from motives of filthy lucre? The Mahatma does not seem to concern himself with such queries. He is satisfied that these are "real Brahmins who are living on alms freely given to them and giving freely what they have of spiritual treasures". This is how a hereditary Brahmin priest appears to the Mahatma—a carrier of spiritual treasures. But another portrait of the hereditary Brahmin can also be drawn. A Brahmin can be a priest to Vishnu—the God of Love. He can be a priest to Shankar—the God of Destruction. He can be a priest at Buddha Gaya worshipping Buddha—the greatest teacher of mankind who taught the noblest doctrine of Love. He also can be a priest to Kali, the Goddess, who must have a daily sacrifice of an animal to satisfy her thirst for blood ; He will be a priest of the temple of Rama—the Kshatriya God! He will also be a priest of the Temple of Parshuram, the God who took Avatar to destroy the Kshatriyas ! He can be a priest to Bramha, the Creator of the world. He can be a priest to a Pir whose God Allah will not brook the claim of Bramha to share his spiritual dominion over the world ! No one can say that this is a picture which is not true to life. If this is a true picture one does not know what to say of this capacity to bear loyalties to Gods and Goddesses whose attributes are so antagonistic that no honest man can be a devotee to all of them. The Hindus rely upon this extraordinary phenomenon as evidence of the greatest virtue of their religion—namely its catholicity, its spirit of toleration. As against this facile view, it can be urged that what is toleration and catholicity may be really nothing more creditable than indifference or flaccid latitudinarianism. These two attitudes are hard to distinguish in their outer seeming. But they are so vitally unlike in their real quality that no one who examines them closely can mistake one for the other. That a man is ready to render homage to many Gods and Goddesses may be cited as evidence of his tolerant spirit.. But can it not also be evidence of insincerity born of a desire to serve the times? I am sure that this toleration is merely insincerity. If this view is well founded, one may ask what spiritual treasure can there be with a person who is ready to be a priest and a devotee to any deity which it serves his purpose to worship and to adore? Not only must such a person be deemed to be bankrupt of all spiritual treasures but for him to practice so elevating a profession as that of a priest simply because it is ancestral, without faith, without belief, merely as a mechanical process handed down from father to son, is not a conservation of virtue; it is really the prostitution of a noble profession which is no other than the service of religion.

VIII

Why does the Mahatma cling to the theory of every one following his or her ancestral calling? He gives his reasons nowhere. But there must be some reason although he does not care to avow it. Years ago writing on "Caste versus Class" in his *Young India* he argued that Caste System was better than Class System on the ground that caste was the best possible adjustment of social stability. If that be the reason why the Mahatma clings to the theory of every one following his or her ancestral calling, then he is clinging to a false view of social life. Everybody wants social stability and some adjustment must be made in the relationship between individuals and classes in order that stability may be had. But two things, I am sure nobody wants. One thing nobody wants is static relationship, something that is unalterable, something that is fixed for all times. Stability is wanted but not at the cost of change when change is imperative. Second thing nobody wants is mere adjustment. Adjustment is wanted but not at the sacrifice of social justice. Can it be said that the adjustment of social relationship on the basis of caste *i.e.* on the basis of each to his hereditary calling avoids these two evils? I am convinced that it does not. Far from being the best possible adjustment I have no doubt that it is of the worst possible kind inasmuch as it offends against both the canons of social adjustment—namely fluidity and equity.

IX

Some might think that the Mahatma has made much progress inasmuch as he now only believes in *Varna* and does not believe in Caste. It is true that there was a time when the Mahatma was a full-blooded and a blue-blooded Sanatani Hindu. He believed in the *Vedas*, the *Upanishads*, the *Puranas* and all that goes by the name of Hindu scriptures and therefore in *avatars* and rebirth. He believed in Caste and defended it with the vigour of the orthodox. He condemned the cry for inter-dining, inter-drinking and inter-marrying and argued that restraints about inter-dining to a great extent "helped the cultivation of will-power and the conservation of certain social virtue". It is good that he has repudiated this sanctimonious nonsense and admitted that caste "is harmful both to spiritual and national growth," and may be, his son's marriage outside his caste has had something to do with this change of view. But has the Mahatma really progressed? What is the nature of the *Varna* for which the Mahatma stands? Is it the *Vedic* conception as commonly understood and preached by Swami Dayanand Saraswati and his followers, the Arya Samajists? The essence of the *Vedic* conception of *Varna* is the pursuit of a calling which is appropriate to one's natural aptitude. The essence of the Mahatma's

conception of *Varna* is the pursuit of ancestral calling irrespective of natural aptitude. What is the difference between Caste and *Varna* as understood by the Mahatma? I find none. As defined by the Mahatma, *Varna* becomes merely a different name for Caste for the simple reason that it is the same in essence—namely pursuit of ancestral calling. Far from making progress the Mahatma has suffered retrogression. By putting this interpretation upon the *Vedic* conception of *Varna* he has really made ridiculous what was sublime. While I reject the *Vedic Varnavyavastha* for reasons given in the speech I must admit that the *Vedic* theory of *Varna* as interpreted by Swami Dayanand and some others is a sensible and an inoffensive thing. It did not admit birth as a determining factor in fixing the place of an individual in society. It only recognized worth. The Mahatma's view of *Varna* not only makes nonsense of the *Vedic Varna* but it makes it an abominable thing. *Varna* and Caste are two very different concepts. *Varna* is based on the principle of each according to his worthwhile Caste is based on the principle of each according to his birth. The two are as distinct as chalk is from cheese. In fact there is an antithesis between the two. If the Mahatma believes as he does in every one following his or her ancestral calling, then most certainly he is advocating the Caste System and that in calling it the *Varna* System he is not only guilty of terminological inexactitude, but he is causing confusion worse confounded. I am sure that all his confusion is due to the fact that the Mahatma has no definite and clear conception as to what is *Varna* and what is Caste and as to the necessity of either for the conservation of Hinduism. He has said and one hopes that he will not find some mystic reason to change his view that caste is not the essence of Hinduism. Does he regard *Varna* as the essence of Hinduism? One cannot as yet give any categorical answer. Readers of his article on "Dr. Ambedkar's Indictment" will answer "No". In that article he does not say that the dogma of *Varna* is an essential part of the creed of Hinduism. Far from making *Varna* the essence of Hinduism he says "the essence of Hinduism is contained in its enunciation of one and only God as Truth and its bold acceptance of Ahimsa as the law of the human family" But the readers of his article in reply to Mr. Sant Ram will say "Yes". In that article he says "How can a Muslim remain one if he rejects the Quran, or a Christian remain as Christian if he rejects the Bible? If Caste and *Varna* are convertible terms and if *Varna* is an integral part of the *Shastras* which define Hinduism I do not know how a person who rejects Caste, *i.e.* *Varna* can call himself a Hindu?" Why this prevarication? Why does the Mahatma hedge? Whom does he want to please? Has the saint failed to sense the

truth? Or does the politician stand in the way of the Saint? The real reason why the Mahatma is suffering from this confusion is probably to be traced to two sources. The first is the temperament of the Mahatma. He has almost in everything the simplicity of the child with the child's capacity for self-deception. Like a child he can believe in anything he wants to believe. We must therefore wait till such time as it pleases the Mahatma to abandon his faith in *Varna* as it has pleased him to abandon his faith in Caste. The second source of confusion is the double role which the Mahatma wants to play—of a Mahatma and a Politician. As a Mahatma he may be trying to spiritualize Politics. Whether he has succeeded in it or not Politics have certainly commercialized him. A politician must know that Society cannot bear the whole truth and that he must not speak the whole truth; if he is speaking the whole truth it is bad for his politics. The reason why the Mahatma is always supporting Caste and *Varna* is because he is afraid that if he opposed them he will lose his place in politics. Whatever may be the source of this confusion the Mahatma must be told that he is deceiving himself and also deceiving the people by preaching Caste under the name of *Varna*.

X

The Mahatma says that the standards I have applied to test Hindus and Hinduism are too severe and that judged by those standards every known living faith will probably fail. The complaint that my standards are high may be true. But the question is not whether they are high or whether they are low. The question is whether they are the right standards to apply. A People and their Religion must be judged by social standards based on social ethics. No other standard would have any meaning if religion is held to be a necessary good for the well-being of the people. Now I maintain that the standards I have applied to test Hindus and Hinduism are the most appropriate standards and that I know of none that are better. The conclusion that every known religion would fail if tested by my standards may be true. But this fact should not give the Mahatma as the champion of Hindus and Hinduism a ground for comfort any more than the existence of one madman should give comfort to another madman or the existence of one criminal should give comfort to another criminal. I like to assure the Mahatma that it is not the mere failure of the Hindus and Hinduism which has produced in me the feelings of disgust and contempt with which I am charged. I realize that the world is a very imperfect world and any one who wants to live in it must bear with its imperfections. But while I am prepared to bear with the imperfections and shortcomings of the society in which I may be destined to labour, I feel I should not consent to live in a

society which cherishes wrong ideals or a society which having right ideals will not consent to bring its social life in conformity with those ideals. If I am disgusted with Hindus and Hinduism it is because I am convinced that they cherish wrong ideals and live a wrong social life. My quarrel with Hindus and Hinduism is not over the imperfections of their social conduct. It is much more fundamental. It is over their ideals.

XI

Hindu society seems to me to stand in need of a moral regeneration which it is dangerous to postpone. And the question is who can determine and control this moral regeneration? Obviously only those who have undergone an intellectual regeneration and those who are honest enough to have the courage of their convictions born of intellectual emancipation. Judged by this standard the Hindu leaders who count are in my opinion quite unfit for the task. It is impossible to say that they have undergone the preliminary intellectual regeneration. If they had undergone an intellectual regeneration they would neither delude themselves in the simple way of the untaught multitude nor would they take advantage of the primitive ignorance of others as one sees them doing. Notwithstanding the crumbling state of Hindu society these leaders will nevertheless unblushingly appeal to ideals of the past which have in every way ceased to have any connection with the present ; which however suitable they might have been in the days of their origin have now become a warning rather than a guide. They still have a mystic respect for the earlier forms which make them disinclined—nay opposed to any examination of the foundations of their Society. The Hindu masses are of course incredibly heedless in the formation of their beliefs. But so are the Hindu leaders. And what is worse is that. These Hindu leaders become filled with an illicit passion for their beliefs when any one proposes to rob them of their companionship. The Mahatma. is no exception. The Mahatma appears not to believe in thinking He prefers to follow the saints. Like a conservative with his reverence for consecrated notions he is afraid that if he once starts thinking, many ideals and institutions to which he clings will be doomed. One must sympathize with him. For every act of independent thinking puts some portion of apparently stable world in peril. But it is equally true that dependence on saints cannot lead us to know the truth. The saints are after all only human beings and as Lord Balfour said ,”the human mind is no more a truth finding apparatus than the snout of a pig”. In so far as he does think, to me he really appears to be prostituting his intelligence to find reasons for supporting this archaic social structure of the Hindus. He is the

most influential apologist of it and therefore the worst enemy of the Hindus.

Unlike the Mahatma there are Hindu leaders who are not content merely to believe and follow. They dare to think, and act in, accordance with the result of their thinking. But unfortunately they are either a dishonest lot or an indifferent lot when it comes to the question of giving right guidance to the mass of the people. Almost every Brahmin has transgressed the rule of Caste. The number of Brahmins who sell shoes is far greater than those who practise priesthood. Not only have the Brahmins given up their ancestral calling of priesthood for trading but they have entered trades which, are prohibited to them by the *Shastras*. Yet how many Brahmins who break Caste every day will preach against Caste and against the *Shastras*? For one honest Brahmin preaching against Caste and *Shastras* because his practical instinct and moral conscience cannot support a conviction in them, there are hundreds who break Caste and trample upon the *Shastras* every day but who are the most fanatic upholders of the theory of Caste and the sanctity of the *Shastras*. Why this duplicity? Because they feel that if the masses are emancipated from the yoke of Caste they would be a menace to the power and prestige of the Brahmins as a class. The dishonesty of this intellectual class who would deny the masses the fruits of their thinking is a most disgraceful phenomenon.

The Hindus in the words of Mathew Arnold are "wandering between two worlds, one dead, the other powerless to be born". What are they to do? The Mahatma to whom they appeal for guidance does not believe in thinking and can therefore give no guidance which can be said to stand the test of experience. The intellectual classes to whom the masses look for guidance are either too dishonest or too indifferent to educate them in the right direction. We are indeed witnesses to a great tragedy. In the face of this tragedy all one can do is to lament and say—such be thy Leaders, O! Hindus.

THE BUDDHA AND HIS DHAMMA

UNPUBLISHED

PREFACE

April 6, 1956

[Text provided by Eleanor Zelliott, as prepared by Vasant Moon]

A question is always asked to me: how I happen[ed] to take such [a] high degree of education. Another question is being asked: why I am inclined towards Buddhism. These questions are asked because I was born in a community known in India as the "Untouchables." This preface is not the place for answering the first question. But this preface may be the place for answering the second question.

The direct answer to this question is that I regard the Buddha's Dhamma to be the best. No religion can be compared to it. If a modern man who knows science must have a religion, the only religion he can have is the Religion of the Buddha. This conviction has grown in me after thirty-five years of close study of all religions.

How I was led to study Buddhism is another story. It may be interesting for the reader to know. This is how it happened.

My father was a military officer, but at the same time a very religious person. He brought me up under a strict discipline. From my early age I found certain contradictions in my father's religious way of life. He was a Kabirpanthi, though his father was Ramanandi. As such, he did not believe in Murti Puja (Idol Worship), and yet he performed Ganapati Puja--of course for our sake, but I did not like it. He read the books of his Panth. At the same time, he compelled me and my elder brother to read every day

before going to bed a portion of [the] **Mahabharata** and **Ramayana** to my sisters and other persons who assembled at my father's house to hear the Katha. This went on for a long number of years.

The year I passed the English Fourth Standard Examination, my community people wanted to celebrate the occasion by holding a public meeting to congratulate me. Compared to the state of education in other communities, this was hardly an occasion for celebration. But it was felt by the organisers that I was the first boy in my community to reach this stage; they thought that I had reached a great height. They went to my father to ask for his permission. My father flatly refused, saying that such a thing would inflate the boy's head; after all, he has only passed an examination and done nothing more. Those who wanted to celebrate the event were greatly disappointed. They, however, did not give way. They went to Dada Keluskar, a personal friend of my father, and asked him to intervene. He agreed. After a little argumentation, my father yielded, and the meeting was held. Dada Keluskar presided. He was a literary person of his time. At the end of his address he gave me as a gift a copy of his book on the life of the Buddha, which he had written for the Baroda Sayajirao Oriental Series. I read the book with great interest, and was greatly impressed and moved by it.

I began to ask why my father did not introduce us to the Buddhist literature. After this, I was determined to ask my father this question. One day I did. I asked my father why he insisted upon our reading the **Mahabharata** and **Ramayana**, which recounted the greatness of the Brahmins and the Kshatriyas and repeated the stories of the degradation of the Shudras and the Untouchables. My father did not like the question. He merely said, "You must not ask such silly questions. You are only boys; you must do as you are told." My father was a Roman Patriarch, and exercised most extensive Patria Pretestas over his children. I alone could take a little liberty with him, and that was because my mother had died in my childhood, leaving me to the care of my auntie.

So after some time, I asked again the same question. This time my father had evidently prepared himself for a reply. He said, "The reason why I ask you to read the **Mahabharata** and **Ramayana** is this: we belong to the

Untouchables, and you are likely to develop an inferiority complex, which is natural. The value of [the] **Mahabharata** and **Ramayana** lies in removing this inferiority complex. See Drona and Karna--they were small men, but to what heights they rose! Look at Valmiki--he was a Koli, but he became the author of [the] **Ramayana**. It is for removing this inferiority complex that I ask you to read the **Mahabharata** and **Ramayana**."

I could see that there was some force in my father's argument. But I was not satisfied. I told my father that I did not like any of the figures in [the] **Mahabharata**. I said,"I do not like Bhishma and Drona, nor Krishna. Bhishma and Drona were hypocrites. They said one thing and did quite the opposite. Krishna believed in fraud. His life is nothing but a series of frauds. Equal dislike I have for Rama. Examine his conduct in the Sarupnakha [=Shurpanakha] episode [and] in the Vali Sugriva episode, and his beastly behaviour towards Sita."My father was silent, and made no reply. He knew that there was a revolt.

This is how I turned to the Buddha, with the help of the book given to me by Dada Keluskar. It was not with an empty mind that I went to the Buddha at that early age. I had a background, and in reading the Buddhist Lore I could always compare and contrast. This is the origin of my interest in the Buddha and His Dhamma.

The urge to write this book has a different origin. In 1951 the Editor of the Mahabodhi Society's Journal of Calcutta asked me to write an article for the Vaishak Number. In that article I argued that the Buddha's Religion was the only religion which a society awakened by science could accept, and without which it would perish. I also pointed out that for the modern world Buddhism was the only religion which it must have to save itself. That Buddhism makes [a] slow advance is due to the fact that its literature is so vast that no one can read the whole of it. That it has no such thing as a bible, as the Christians have, is its greatest handicap. On the publication of this article, I received many calls, written and oral, to write such a book. It is in response to these calls that I have undertaken the task.

To disarm all criticism I would like to make it clear that I claim no

originality for the book. It is a compilation and assembly plant. The material has been gathered from various books. I would particularly like to mention Ashvaghosha's **Buddhavita** [=**Buddhacharita**], whose poetry no one can excel. In the narrative of certain events I have even borrowed his language.

The only originality that I can claim in [=is] the order of presentation of the topics, in which I have tried to introduce simplicity and clarity. There are certain matters which give headache[s] to the student of Buddhism. I have dealt with them in the Introduction.

It remains for me to express my gratitude to those who have been helpful to me. I am very grateful to Mr. Nanak Chand Rattua of Village Sakrulli and Mr. Parkash Chand of Village Nangal Khurd in the district of Hoshiarpur (Punjab) for the burden they have taken upon themselves to type out the manuscript. They have done it several times. Shri Nanak Chand Rattu took special pains and put in very hard labour in accomplishing this great task. He did the whole work of typing etc. very willingly and without caring for his health and [=or] any sort of remuneration. Both Mr. Nanak Chand Rattu and Mr. Parkash Chand did their job as a token of their greatest love and affection towards me. Their labours can hardly be repaid. I am very much grateful to them.

When I took up the task of composing the book I was ill, and [I] am still ill. During these five years there were many ups and downs in my health. At some stages my condition had become so critical that doctors talked of me as a dying flame. The successful rekindling of this dying flame is due to the medical skill of my wife and Dr. Malvankar. They alone have helped me to complete the work. I am also thankful to Mr. M. B. Chitnis, who took [a] special interest in correcting [the] proof and to go [=in going] through the whole book.

I may mention that this is one of the three books which will form a set for the proper understanding of Buddhism. The other books are: (i) **Buddha and Karl Marx**; and (ii) **Revolution and Counter-Revolution in Ancient India**. They are written out in parts. I hope to publish them soon.

Book Eight, Part III — His Likes and Dislikes

EPILOGUE

THE BUDDHA AND HIS DHAMMA

by Dr. B. R. Ambedkar

INTRODUCTION

Indications of a growth in the volume of interest in Buddhism are noticeable in some sections of the Indian people. Along with it there is naturally a growing demand for a clear and consistent statement of the life and teachings of the Buddha.

Anyone who is not a Buddhist finds it extremely difficult to present the life and teachings of the Buddha in a manner which would make it a consistent whole. Depending on the Nikayas, not only the presentation of a consistent story of the life of the Buddha becomes a difficult thing and the presentation of some parts of his teachings becomes much more so. Indeed it would not be an exaggeration to say that of all the founders of religions in the world the presentation of the life and teachings of the founder of Buddhism presents a problem which is quite puzzling if not baffling. Is it not necessary that these problems should be solved and the path for the understanding of Buddhism be made clear? Is it not time that those who are Buddhists should take up these problems at least for general discussion and throw what light they can on these problems?

With a view to raise a discussion on these problems I propose to set them out here. The first problem relates to the main event in the life of the Buddha, namely, Parivraja. Why did the Buddha take Parivraja? The

traditional answer is that he took Parivraja because he saw a dead person, a sick person and an old person. This answer is absurd on the face of it. The Buddha took Parivraja at the age of 29. If he took Parivraja as a result of these three sights, how is it he did not see these three sights earlier? These are common events occurring by hundreds and the Buddha could not have failed to come across them earlier. It is impossible to accept the traditional explanation that this was the first time he saw them. The explanation is not plausible and does not appeal to reason. But if this is not the answer to the question, what is the real answer?

The second problem is created by the four Aryan Truths. Do they form part of the original teachings of the Buddha? This formula cuts at the root of Buddhism. If life is sorrow, death is sorrow and rebirth is sorrow, then there is an end of everything. Neither religion nor philosophy can help a man to achieve happiness in the world. If there is no escape from sorrow, then what can religion do, what can Buddha do to relieve man from such sorrow which is ever there in birth itself? The four Aryan Truths are a great stumbling block in the way of non-Buddhists accepting the gospel of Buddhism. For the four Aryan Truths deny hope to man. The four Aryan Truths make the gospel of the Buddha a gospel of pessimism. Do they form part of the original gospel or are they a later accretion by the monks?

The third problem relates to the doctrines of soul, of karma and rebirth. The Buddha denied the existence of the soul. But he is also said to have affirmed the doctrine of karma and rebirth. At once a question arises. If there is no soul, how can there be karma? If there is no soul, how can there be rebirth? These are baffling questions. In what sense did the Buddha use the words karma and rebirth? Did he use them in a different sense than the sense in which they were used by the Brahmins of his day? If so, in what sense? Did he use them in the same sense in which the Brahmins used them? If so, is there not a terrible contradiction between the denial of the soul and the affirmation of karma and rebirth? This contradiction needs to be resolved.

The fourth problem relates to the Bhikkhu. What was the object of the Buddha in creating the Bhikkhu? Was the object to create a perfect man?

Or was his object to create a social servant devoting his life to service of the people and being their friend, guide and philosopher? This is a very real question. On it depends the future of Buddhism. If the Bhikkhu is only a perfect man he is of no use to the propagation of Buddhism because though a perfect man he is a selfish man. If, on the other hand, he is a social servant he may prove to be the hope of Buddhism. This question must be decided not so much in the interest of doctrinal consistency but in the interest of the future of Buddhism.

If I may say so, the pages of the journal of the Mahabodhi Society make, to me at any rate, dull reading. This is not because the material presented is not interesting and instructive. The dullness is due to the fact that it seems to fall upon a passive set of readers. After reading an article, one likes to know what the reader of the journal has to say about it. But the reader never gives out his reaction. This silence on the part of the reader is a great discouragement to the writer. I hope my questions will excite the readers to come and make their contribution to their solution.

PROLOGUE

“FROM Time to time men find themselves forced to reconsider current and inherited beliefs and ideas, to gain some harmony between present and past experience, and to reach a position which shall satisfy the demands of feeling and reflexion and give confidence for facing the future. If, at the present day, religion, as a subject of critical or scientific inquiry, of both practical and theoretical significance has attracted increasing attention, this can be ascribed to

(a) the rapid progress of scientific knowledge and thought ; (b) the deeper intellectual interest in the subject ; (c) the widespread tendencies in all parts of the world to reform or reconstruct religion, or even to replace it by some body of thought, more ' rational ' and ' scientific ' or less ' superstitious ' ; and (d) the effect of social, political, and international events of a sort which, in the past, have both influenced and been influenced by religion. Whenever the ethical or moral value of activities or conditions is questioned, the value of religion is involved ; and all deep-stirring experiences invariably compel a reconsideration of the most

fundamental ideas, whether they are explicitly religious or not. Ultimately there arise problems of justice, human destiny, God, and the universe ; and these in turn involve problems of the relation between ' religious ' and other ideas, the validity of ordinary knowledge, and practicable conceptions of 'experience' and 'reality.'

§ 1. *His Kula*

1. 1. Going back to the sixth century B.C., Northern India did not form a single Sovereign State.
2. 2. The country was divided into many States, some large, some small. Of these some were monarchical and some non-monarchical.
3. 3. The monarchical States were altogether sixteen in number. They were known by the name of Anga, Magadha, Kasi, Kosala, Vriji, Malla, Chedi, Vatsa, Kuru, Panchala, Matsya, Saurseana, Asmaka, Avanti, Gandhara and Kambhoja.
4. 4. The non-monarchical States were those of the Sakyas of Kapilvatsu, the Mallas of Pava and Kushinara, the Lichhavis of Vaisali, the Videhas of Mithila, the Koliyas of Ramagam, the Bulis of Allakapa, the Kalingas of Resaputta, the Mauriyas of Pippalvana and the Bhaggas with their capital on Sumsumara Hill.
5. 5. The monarchical States were known as Janapada and the non-monarchical as Sangh or Gana.
6. 6. Not much is known about the nature of the polity of the Sakyas of Kapilvatsu, whether it was republican or oligarchic.
7. 7. This much, however, is definitely known, that there were many ruling families in the Republic of the Sakyas and that they ruled in turns.
8. 8. The head of the ruling family was known as Raja.
9. 9. At the time of the birth of Siddharth Gautama it was the turn of Suddhodana to be the Raja.
10. 10. The Sakya State was situated in the northeast corner of India. It

was an independent State. But at a later stage the King of Kosala had succeeded in establishing his paramountcy over it.

11. 11. The result of this paramountcy was that the Sakya State could not exercise certain sovereign powers without the sanction of the King of Kosala.

12. 12. Of the kingdoms then in existence, Kosala was a powerful kingdom. So was the kingdom of Magadha. Pasanedi, King of Kosala and Bimbisara, King of Magadha, were the contemporaries of Siddharth Gautama.

1. 1. The capital of the Sakyas was the city called Kapilavatsu, perhaps after the name of the great Rationalist Kapila.

2. 2. There lived in Kapilavastu a Sakya by name Jaya Sena. Sinahu was his son. Sinahu was married to Kaccana. Sinahu had five sons, Suddhodana, Dhotodana, Sakkodana, Suklodana and Amitodana. Besides five sons, Sinahu had two daughters, Amita and Pamita.

3. 3. The Gotra of the-family was Aditya.

4. 4. Suddhodana was married to Mahamaya Her father's name was Anjana and mother's Sulakshana. Anjana was a Koliya and was residing in the village called Devadaha.

5. 5. Suddhodana was a man of great military prowess. When Suddhodana had shown his martial powers he was allowed to take a second wife and he chose Mahaprajapati. She was the elder sister of Mahamaya.

6. 6. Suddhodana was a wealthy person. The lands he held were very extensive and the retinue under him was very large. He employed, it is said, one thousand ploughs to till the land he owned.

7. 7. He lived quite a luxurious life and had many palaces.

1. 1. To Suddhodana was born Siddharth Gautama and this was the manner of Gautama's birth.

2. 2. It was a custom among the Sakyas to observe an annual midsummer festival which fell in the month of Ashad. It was celebrated by all the Sakyas throughout the State and also by the members of the ruling family.

3. 3. It was the usual practice to celebrate the festival for seven days.

4. 4. On one occasion Mahamaya decided to observe the festival with

gaiety, with splendour, with flowers, with perfume, but without drinking intoxicants.

5. 5. On the seventh day she rose early, bathed in scented water, bestowed a gift of 4,00,000 pieces of money as alms, adorned herself with all precious ornaments, ate choicest food, took upon herself the fast-day vows, and entered the splendidly adorned royal bedchamber to sleep.

6. 6. That night Suddhodana and Mahamaya came together and Mahamaya conceived. Lying on the royal bed she fell asleep. While asleep she had a dream.

7. 7. In her dreams she saw that the four world-guardians raised her as she was sleeping on her bed and carried her to the tableland of the Himalayas, placed her under a great sal tree and stood on one side.

8. 8. The wives of the four world-guardians then approached and took her to the lake Mansarovar.

9. 9. They bathed her, robed her in a dress, anointed her with perfumes and decked her with flowers in a manner fit to meet some divinity.

10. 10. Then a Bodhisatta, by name Sumedha, appeared before her saying, "I have decided to take my last and final birth on this earth, will you consent to be my mother?" She said, "Yes, with great pleasure." At this moment Mahamaya awoke.

11. 11. Next morning Mahamaya told her dream to Suddhodana. Not knowing how to interpret the dream, Suddhodana summoned eight Brahmins who were most famous in divination.

12. 12. They were Rama, Dhaga, Lakkana, Manti, Yanna, Suyama, Subhoga and Sudatta and prepared for them a befitting reception.

13. 13. He caused the ground to be strewn with festive flowers and prepared high seats for them.

14. 14. He filled the bowls of the Brahmins with gold and silver and fed them on cooked ghee, honey, sugar and excellent rice and milk. He also gave them other gifts such as new clothes and tawny cows.

15. 15. When the Brahmins were propitiated, Suddhodana related to them the dream Mahamaya had, and said, "Tell me what it means."

16. 16. The Brahmins said: "Be not anxious. You will have a son, and if he leads a householder's life he will become a universal monarch, and if he leaves his home and goes forth into a homeless state, and becomes a sanyasi, he will become a Buddha, a dispeller of illusions in the world." 17.

Bearing the Bodhisatta in her womb like oil in a vessel for ten lunar months, Mahamaya, as her time of delivery was coming nearer, desired to go to her parents' home for delivery. Addressing her husband, she said :”I wish to go to Devadaha, the city of my father.”

17. 18.”Thou knowest that thy wishes will be done,”replied Suddhodana. Having seated her in a golden palanquin borne by couriers, he sent her forth with a great retinue to her father's house.

18. 19. Mahamaya, on her way to Devadaha, had to pass through a pleasure-grove of sal trees and other trees, flowering and non-flowering. It was known as the Lumbini Grove.

19. 20. As the palanquin was passing through it, the whole Lumbini Grove seemed like the heavenly Cittalata grove or like a banqueting pavilion adorned for a mighty king.

20. 21. From the roots to the tips of the branches the trees were loaded with fruits, flowers and numberless bees of the fine colours, uttering curious sounds, and flocks of various kinds of birds, singing sweet melodies.

21. 22. Witnessing the scene, there arose a desire in the heart of Mahamaya for halting and sporting therein for a while. Accordingly she told the couriers to take her in the sal-grove and wait there.

22. 23. Mahamaya alighted from her palanquin and walked up to the foot of a royal sal tree. A pleasant wind, not too strong, was blowing and the boughs of the trees were heaving up and down and Mahamaya felt like catching one of them.

23. 24. Luckily one of the boughs heaved down sufficiently low to enable her to catch it. So she rose on her toes and caught the bough. Immediately she was lifted up by its upward movement and being shaken, she felt the pangs of childbirth. While holding the branch of the sal tree she was delivered of a son in a standing position.

24. 25. The child was born in the year 563 B.C. on the Vaishakha Purnima day.

25. 26. Suddhodana and Mahamaya were married for a long time. But they had no issue. Ultimately when a son was born to them his birth was celebrated with great rejoicing, with great pomp and ceremony by Suddhodana and his family and also by the Sakyas. 27. At the time of the birth of the child it was the turn of Suddhodana to be the ruler of

Kapilavatsu and as such was in the enjoyment of the title of Raja. Naturally the boy was called Prince.

1. 1. At the moment when the child was born there dwelt on the Himalayas a great sage named Asita.
2. 2. Asita heard that the gods over the space of the sky were shouting the word "Buddha" and making it resound. He beheld them waving their garments and coursing hither and thither in delight. He thought, what if I were to go and find out the land in which he was born?
3. 3. Surveying with his divine eyes the whole of the Jambudvipa, Asita saw that a boy was born in the house of Suddhodana shining with all brilliance and that it was over his birth that the gods were excited.
4. 4. So the great sage Asita with his nephew Nardatta rose up and came to the abode of Raja Suddhodana and stood at the door of his palace.
5. 5. Now Asita, the sage, saw that at the door of Suddhodana's palace many hundred thousand beings had assembled. So he approached the door-keeper and said, "Go, man, inform the Raja that a sage is standing at the door."
6. 6. Then the door-keeper approached Suddhodana and with clasped hands said, "Know, O Raja, that an aged sage, old and advanced in years, stands at the door, and says that he desires to see you."
7. 7. The king prepared a seat for Asita and said to the door-keeper, "Let the sage enter." So coming out of the palace the door-keeper said to Asita: "Please go in."
8. 8. Now Asita approached King Suddhodana and, standing in front of him, said, "Victory, Victory, O Raja, may you live long, and rule thy kingdom righteously."
9. 9. Then Suddhodana in reverence to Asita fell at his feet and offered him the seat; and seeing him seated in comfort, Suddhodana said, "I do not remember to have seen thee before this, O Sage! With what purpose has thou come hither? What is the cause?"
10. 10. Thereupon Asita said to Suddhodana, "A son is born to thee, O Raja! Desiring to see him, have I come."
11. 11. Suddhodana said, "The boy is asleep, O Sage! Will you wait for a while?" The sage said, "Not long, O King, do such great beings sleep. Such good beings are by nature wakeful."

12. 12. Then did the child out of compassion for Asita, the great sage, make a sign of awaking.
13. 13. Seeing that the child had become awake, Suddhodana took the boy firmly in both hands and brought him into the presence of the sage.
14. 14. Asita observing the child, beheld that it was endowed with the thirty-two marks of a great man and adomed with the eighty minor marks, his body surpassing that of Sakra, Brahma, and his aura surpassing them a hundred thousand-fold, breathed forth this solemn utterance, "Marvellous, verily, is this person that has appeared in the world," and rising from his seat clasped his hands, fell at his feet, made a rightwise circuit round and taking the child in his own hand stood in contemplation.
15. 15. Asita knew the old well-known prophecy that anyone endowed with the thirty-two marks of a great man, as Gautama was, has two careers open to him, and no third. "If he becomes a householder, he will become a universal monarch. But if he goes forth from the home to a homeless life, he will become a fully enlightened Buddha."
16. 16. Asita was sure that the child would not remain a householder.
17. 17. And looking at the child he wept, and shedding tears, sighed deeply.
18. 18. Suddhodana beheld Asita shedding tears, and sighing deeply.
19. 19. Beholding him thus weeping, the hair of his body rose, and in distress Suddhodana said to Asita, "Why, O Sage, dost thou weep and shed tears, and sigh so deeply? Surely, there is no misfortune in store for the child."
20. 20. At this Asita said to the Raja, "O King, I weep not for the sake of the child. There will be no misfortune for him. But I weep for myself."
21. 21. "And why?" asked Suddhodana. Asita replied, "I am old, aged, advanced in years, and this boy will without doubt become a Buddha and attain supreme and complete enlightenment and having done so, will turn the supreme wheel of the Doctrine that has not been turned before him by any other being in the world ; for the weal and happiness of the world will he teach his Doctrine."
22. 22. "The religious life, the Doctrine, that he will proclaim will be good in the beginning, good in the middle, good in the end, complete in the letter and the spirit, whole and pure."
23. 23. "Just as an Oudumbara flower at some time and place arises in the

world, even so at some time and place, after countless cycles, revered Buddhas arise in the world. So also, O Raja! this boy will without doubt obtain supreme, complete enlightenment, and having done so will take countless beings across the ocean of sorrow and misery to a state of happiness.”

24. 24.”But I shall not see that Buddha. Hence, O Raja, I weep and in sadness I sigh deeply, for I shall not be able to reverence him.”

25. 25. The king thereafter offered to the great sage Asita and Nardatta, his nephew, suitable food, and having given him robes made a rightwise circuit round him.

26. 26. Thereupon Asita said to Nardatta, his nephew, ”When thou shalt hear, Nardatta, that the child has become a Buddha, then go and take refuge in his teachings. This shall be for thy weal and welfare and happiness.” So saying Asita took leave of the Raja and departed for his hermitage.

1. 1. On the fifth day the ceremony of name-giving took place. The name chosen for the child was Siddharth. His clan name was Gautama. Popularly, therefore, he came to be called Siddharth Gautama.

2. 2. In the midst of rejoicing over the birth and the naming of the child Mahamaya suddenly fell ill and her illness became very serious.

3. 3. Realising that her end was near she called Suddhodana and Prajapati to her bedside and said :”I am sure that the prophecy made by Asita about my son will come true. My regret is that I will not live to see it fulfilled.”

4. 4.”My child will soon be a motherless child. But I am not worried in the least as to whether after me my child will be carefully nursed, properly looked after and brought up in a manner befitting his future.”

5. 5.”To you Prajapati, I entrust my child, I have no doubt that you will be to him more than his mother.”

6. 6.”Now do not be sorry. Permit me to die. God's call has come and His messengers are waiting to take me.” So saying, Mahamaya breathed her last. Both Suddhodana and Prajapati were greatly grieved and wept bitterly.

7. 7. Siddharth was only seven days old when his mother died.

8. 8. Siddharth had a younger brother by name Nanda. He was the son of Suddhodana born to Mahaprajapati.

9. 9. He had also several cousins, Mahanama and Anuruddha, sons of his uncle Suklodan, Ananda, son of his uncle Amitodan, and Devadatta, son of his aunt Amita. Mahanama was older than Siddharth and Ananda was younger.

10. 10. Siddharth grew up in their company.

1. 1. When Siddharth was able to walk and speak the elders of the Sakyas assembled and asked Suddhodana that the boy should be taken to the temple of the village goddess Abhya.

2. 2. Suddhodana agreed and asked Mahaprajapati to dress the boy.

3. 3. While she was doing so the child Siddharth, with a most sweet voice, asked his aunt where he was being taken. On learning that he was being taken to the temple he smiled. But he went, conforming to the custom of the Sakyas.

4. 4. At the age of eight Siddharth started his education.

5. 5. Those very eight Brahmins whom Suddhodana had invited to interpret Mahamaya's dream and who had predicted his future were his first teachers.

6. 6. After they had taught him what they knew Suddhodana sent for Sabbamitta of distinguished descent and of high lineage in the land of Uddikka, a philologist and grammarian, well read in the Vedas, Vedangas and Upanishads. Having poured out water of dedication from a golden vase, Suddhodana handed over the boy to his charge, to be taught. He was his second teacher.

7. 7. Under him Gautama mastered all the philosophic systems prevalent in his day.

8. 8. Besides this he had learned the science of concentration and meditation from one Bhardawaj, a disciple of Alara Kalam, who had his ashram at Kapilavatsu.

1. 1. Whenever he went to his father's farm and found no work he repaired to a quiet place, and practised meditation.

2. 2. While everything for the cultivation of the mind was provided, his education in the military science befitting a Kshatriya was not neglected.

3. 3. For Suddhodana was anxious not to make the mistake of having cultivated the mind of his son at the cost of his manliness.

4. 4. Siddharth was of kindly disposition. He did not like exploitation of man by man.
5. 5. Once he went to his father's farm with some of his friends and saw the labourers ploughing the land, raising bunds, cutting trees, etc., dressed in scanty clothes under a hot burning sun.
6. 6. He was greatly moved by the sight.
7. 7. He said to his friends, can it be right that one man should exploit another? How can it be right that the labourer should toil and the master should live on the fruits of his labour?
8. 8. His friends did not know what to say. For they believed in the old philosophy of life that the worker was born to serve and that in serving his master he was only fulfilling his destiny.
9. 9. The Sakyas used to celebrate a festival called Vapramangal. It was a rustic festival performed on the day of sowing. On this day custom had made it obligatory on every Sakya to do ploughing personally.
10. 10. Siddharth always observed the custom and did engage himself in ploughing.
11. 11. Though a man of learning, he did not despise manual labour.
12. 12. He belonged to a warrior class and had been taught archery and the use of weapons. But he did not like causing unnecessary injury.
13. 13. He refused to join hunting parties. His friends used to say :”Are you afraid of tigers?”He used to retort by saying, ”I know you are not going to kill tigers, you are going to kill harmless animals such as deer and rabbits.”
14. 14.”If not for hunting, come to witness how accurate is the aim of your friends,”they said. Even such invitations Siddharth refused, saying ;”I do not like to see the killing of innocent animals.”
15. 15. Prajapati Gautami was deeply worried over this attitude of Siddharth.
16. 16. She used to argue with him saying :”You have forgotten that you are a Kshatriya and fighting is your duty. The art of fighting can be learned only through hunting for only by hunting can you learn how to aim accurately. Hunting is a training ground for the warrior class.”
17. 17. Siddharth often used to ask Gautami:”But, mother, why should a Kshatriya fight? And Gautami used to reply :”Because it is his duty.”
18. 18. Siddharth was never satisfied by her answer. He used to ask

Gautami :”Tell me, how can it be the duty of man to kill man?”Gautami argued,”Such an attitude is good for an ascetic. But Ksha-triyas must fight. If they don't, who will protect the kingdom?”

19. 19.”But mother ! If all Kshatriyas loved one another, would they not be able to protect their kingdom without resort to killing?”Gautami had to leave him to his own opinion.

20. 20. He tried to induce his companions to join him in practising meditation. He taught them the proper pose. He taught them to fix their mind on a subject. He advised them to select such thoughts as”May I be happy, may my relations be happy, may all living animals be happy.”

21. 21. But his friends did not take the matter seriously. They laughed at him.

22. 22. On closing their eyes they could not concentrate on their subject of meditation. Instead, some saw before their eyes deer for shooting or sweets for eating.

23. 23. His father and his mother did not like his partiality for meditation. They thought it was so contrary to the life of a Kshatriya.

24. 24. Siddharth believed that meditation on right subjects led to development of the spirit of universal love. He justified himself by saying :”When we think of living things, we begin with distinction and discrimination. We separate friends from enemies, we separate animals we rear from human beings. We love friends and domesticated animals and we hate enemies and wild animals.”

25. 25.”This dividing line we must overcome and this we can do when we in our contemplation rise above the limitations of practical life.”Such was his reasoning.

26. 26. His childhood was marked by the presence of supreme sense of compassion.

27. 27. Once he went to his father's farm. During recess he was resting under a tree enjoying the peace and beauty of nature. While so seated a bird fell from the sky just in front of him.

28. 28. The bird had been shot at by an arrow which had pierced its body and was fluttering about in great agony.

29. 29. Siddharth rushed to the help of the bird. He removed the arrow, dressed its wound and gave it water to drink. He picked up the bird, came to the place where he was seated and wrapped up the bird in his upper

garment and held it next to his chest to give it warmth.

30. 30. Siddharth was wondering who could have shot this innocent bird. Before long there came his cousin Devadatta armed with all the implements of shooting. He told Siddharth that he had shot a bird flying in the sky, the bird was wounded but it flew some distance and fell somewhere there, and asked him if he had seen it.

31. 31. Siddharth replied in the affirmative and showed him the bird which had by that time completely recovered.

32. 32. Devadatta demanded that the bird be handed over to him. This Siddharth refused to do. A sharp argument ensued between the two.

33. 33. Devadatta argued that he was the owner of the bird because by the rules of the game, he who kills a game becomes the owner of the game.

34. 34. Siddharth denied the validity of the rule. He argued that it is only he who protects that has the right to claim ownership. How can he who wants to kill be the owner?

35. 35. Neither party would yield. The matter was referred to arbitration. The arbitrator upheld the point of view of Siddharth Gautama.

36. 36. Devadatta became his permanent enemy. But Gautama's spirit of compassion was so great that he preferred to save the life of an innocent bird to securing the goodwill of his cousin.

37. 37. Such were the traits of character found in the early life of Siddharth Gautama.

§ 8. *Marriage*

1. 1. There was a Sakya by name Dandapani. Yeshodhara was his daughter. She was well known for her beauty and for her 'sila.'

2. 2. Yeshodhara had reached her sixteenth year and Dandapani was thinking about her marriage.

3. 3. According to custom Dandapani sent invitations to young men of all the neighbouring countries for the Swayamvar of his daughter.

4. 4. An invitation was also sent to Siddharth Gautama.

5. 5. Siddharth Gautama had completed his sixteenth year. His parents also were equally anxious to get him married.

6. 6. They asked him to go to the Swayamvar and offer his hand to Yeshodhara. He agreed to follow his parents' wishes.

7. 7. From amongst the young men Yeshodhara's choice fell on Siddharth Gautama.
8. 8. Dandapani was not very happy. He felt doubtful about the success of the marriage.
9. 9. Siddharth, he felt, was addicted to the company of saints and sages. He preferred loneliness. How could he be a successful householder?
10. 10. Yeshodhara, who was determined to marry none but Siddharth, asked her father whether to be in the company of saints and sages was a crime. She did not think it was.
11. 11. Knowing her daughter's determination to marry no one but Siddharth Gautama, the mother of Yeshodhara told Dandapani that he must consent. Dandapani did.
12. 12. The rivals of Gautama were not only disappointed but felt that they were insulted.
13. 13. They wanted that in fairness to them Yeshodhara should have applied some test for her selection. But she did not.
14. 14. For the time being they kept quiet, believing that Dandapani would not allow Yeshodhara to choose Siddharth Gautama so that their purpose would be served.
15. 15. But when Dandapani failed, they made bold and demanded that a test of skill in archery be prescribed. Dandapani had to agree.
16. 16. At first Siddharth was not prepared for this. But Channa, his charioteer, pointed out to him what disgrace his refusal would bring upon his father, upon his family and upon Yeshodhara.
17. 17. Siddharth Gautama was greatly impressed by this argument and agreed to take part in the contest.
18. 18. The contest began. Each candidate showed his skill in turn.
19. 19. Gautama's turn came last. But his was the highest marksmanship.
20. 20. Thereafter the marriage took place. Both Suddhodana and Dandapani were happy. So was Yeshodhara and Mahaprajapati.
21. 21. After a long term of married life Yeshodhara gave birth to a son. He was named Rahula.

§ 9. *Father's Plans to Save His Son*

1. 1. While the king was happy to see his son married and thus enter the

life of a householder the prophecy of the sage Asita continued to haunt him.

2. 2. To prevent the prophecy from coming true, he thought of getting him engrossed in the pleasures and carnal joys of life.

3. 3. With this object in view Suddhodana built three luxurious palaces for his son to live in, one for summer, one for the rainy season and one for winter, furnished with all the requirements and excitements for a full amorous life.

4. 4. Each palace was surrounded by an extensive garden beautifully laid out with all kinds of trees and flowers.

5. 5. In consultation with his family priest Udayin, he thought of providing a harem for the prince with very beautiful inmates.

6. 6. Suddhodana then told Udayin to advise the girls how to go about the business of winning over the prince to the pleasures of life.

7. 7. Having collected the inmates of the harem, Udayin first advised them how they should win over the prince.

8. 8. Addressing them he said :”Ye are all skilled in all the graceful arts, ye are proficient in understanding the language of amorous sentiments, ye are possessed of beauty and gracefulness, ye are thorough masters in your own styles.

9. 9.”With these graces of yours, ye are able to move even sages who have lost all their desires, and to ensnare even the gods, who are charmed by heavenly nymphs.

10. 10.”By your skill in expressing the heart's feelings, by your coquetry, your grace, and your perfect beauty ye are able to enrapture even women, how much more easily men.

11. 11.”Thus, skilled as ye are, each set in your own proper sphere, it should not be beyond your reach to captivate and capture the prince and hold him in your bondage.

12. 12.”Any timid action on your part would be fit for new brides whose eyes are closed through shame.

13. 13.”What though this hero be, great by his exalted glory, yet ' great is the might of woman.' Let this be your firm resolve.

14. 14.”In olden time a great seer, hard to be conquered even by gods, was spurned by a harlot, the beauty of Kasi, planting her feet upon him.

15. 15.”And the great seer Visvamitra, though plunged in a profound

penance, was carried captive for ten years in the forests by the nymph Ghritaki.

16. 16."Many such seers as these have women brought to naught, how much more then a delicate prince in the first flower of his age?

17. 17."This being so, boldly put forth your efforts that the posterity of the king's family may not be turned away from him.

18. 18."Ordinary women captivate simple men; but they are truly women, who subdue the nature of high and hard."

§ 10. *The Failure of the Women to Win the Prince*

1. 1. Having heard these words of Udayin, the women strung to the heart, rose even above themselves for the conquest of the prince.

2. 2. But even with their brows, their glances, their coquetries, their smiles, their delicate movements, the girls of the harem did not feel sure of themselves.

3. 3. But they soon regained their confidence through the command of the family priest and the gentle temperament of the prince, and through the power of intoxication and of love.

4. 4. The women then set upon their task and made the prince wander in the woods like an elephant in the forests of Himavat, accompanied by a herd of females.

5. 5. Attended by women, he shone in that pleasant grove, as the sun surrounded by Apsaras in his royal garden.

6. 6. There, some of them urged by passion, pressed him with their full, firm bosoms in gentle collisions.

7. 7. Others violently embraced him after pretending to stumble, then leaning on him with their shoulders drooping down, and with their gentle creeper-like arms.

8. 8. Others with their mouths smelling of spirituous liquor, their lower lips red like copper, whispered in his ear,"Let my secret be heard."

9. 9. Others, all wet with unguents, as if giving him a command, clasped his hand eagerly and said,"Perform thy rites of adoration here."

10. 10. Another with her blue garments continually slipping down in pretended intoxication, stood conspicuous with her tongue visible like the night with its lightning lashing.

11. 11. Others with their golden ones tinkling, wandered about here and there, showing him their bodies veiled with thin cloth.
12. 12. Others leaned, holding a mango bough in hand, displaying their bosoms like golden jars.
13. 13. Some, coming from a lotus bed, carrying lotuses and with eyes like lotuses, stood like the lotus goddess Padma, by the side of that lotus-faced prince.
14. 14. Another sang a sweet song easily understood and with the proper gesticulations, rousing him, self-subdued though he was, by her glance, as saying, "O how thou art deluded !"
15. 15. Another, having armed herself with her bright face, with its brow drawn to its full, imitated his action, as playing the hero.
16. 16. Another, with beautiful, full bosoms, and having her earrings waving in the wind, laughed loudly at him, as if saying, "Catch me, sir, if you can !"
17. 17. Some, as he was going away, bound him with strings of garlands, others punished him with words like an elephant-driver's hook, gentle yet reproachful.
18. 18. Another, wishing to argue with him, seizing a mango spray, asked, all bewildered with passion, "This flower, whose is it?"
19. 19. Another, assuming a gait and attitude like that of a man, said to him, "You who are conquered. by a woman, go and conquer this earth!"
20. 20. Then another with rolling eyes, smelling a blue lotus, thus addressed the prince with words slightly indistinct in her excitement :
21. 21. "See, my lord, this mango covered with its honey-scented flowers, where the bird *kokila* sings, as if imprisoned in a golden cage.
22. 22. "Come and see this *Asoka* tree, which augments lovers' sorrows, where the bees make a noise as if they were scorched by fire.
23. 23. "Come and see this *Tilaka* tree, embraced by a slender mango branch, like a man in a white garment by a woman decked with yellow unguents.
24. 24. "Behold the *kurubaka* in flower, bright like fresh resin-juice, which bends down as if it felt reproached by the colour of women's nails.
25. 25. "Come and see this young *Asoka*, covered all over with new shoots, which stands as if it were ashamed at the beauty of our hands.
26. 26. "See this lake surrounded by the *Sinduvara* shrubs growing on its

banks, like a fair woman reclining, clad in fine white cloth.

26. 27."See the imperial power of females, yonder *Ruddygoose* in the water, goes behind, his mate following her like a slave.

27. 28."Come and listen to the notes of the intoxicated *Cuckoo* as he sings, while another *cuckoo* sings as if consenting wholly without care.

28. 29."Would that thine was the intoxication of the birds which the spring produces, and not the thought of a thinking man, ever pondering how wise he is ! 30. Thus these young women, their souls carried away by love, assailed the prince with all kinds of stratagems.

29. 31. But although thus attacked, he, having his sense guarded by self-control; neither rejoiced nor smiled.

30. 32. Having seen them in their real condition, the Prince pondered with an undisturbed and steadfast mind.

31. 33."What is it that these women lack that they perceive not that youth is fickle? For old age will destroy whatever beauty has."

32. 34. This round of blandishment went on for months and years with no results.

§ 11. *The Prime Minister's Admonition to the Prince*

1. 1. Udayin realized that the girls had failed and that the Prince had shown no interest in them.

2. 2. Udayin, well skilled in the rules of policy, thought of talking to the prince.

3. 3. Meeting the prince all alone, Udayin said : "Since I was appointed by the king as a fitting friend for thee, therefore, I wish to speak to thee in the friendliness of my heart." So began Udayin.

4. 4."To hinder from what is disadvantageous, to urge to do what is advantageous and not to forsake in misfortune, these are the three marks of a friend.

5. 5."If I, after having promised my friendship, were not to heed when thou turnest away from the great end of man, there would be no friendship in me.

6. 6."It is right to woo a woman even by guile, this is useful both for getting rid of shame and for one's own enjoyment.

7. 7."Reverential behaviour and compliance with her wishes are what

bind a woman's heart; good qualities truly are a cause of love, and women love respect.

8. 8."Wilt thou not then, O large-eyed prince, even if thy heart is unwilling, seek to please them with a courtesy worthy of this beauty of thine?"

9. 9."Courtesy is the balm of women, courtesy is the best ornament ; beauty without courtesy is like a grove without flowers.

10. 10."But of what use is courtesy by itself? Let it be assisted by the heart's feelings ; surely, when worldly objects so hard to attain are in the grasp, thou wilt not despise them. II."Knowing that pleasure was the best of objects, even the god Purandara (Indra) wooed in olden times Ahalya, the wife of the saint Gautama.

11. 12."So too Agastya wooed Rohini, the wife of Soma ; and therefore, as Sruti saith, a like thing befell Lopamudra.

12. 13."The great ascetic Brihaspati begot Bharadvaja on Mamata the daughter of the Maruta, the wife of Autathya.

13. 14."The Moon, the best of offerers, begat Buda of divine nature on the spouse of Vrihaspati as she was offering a libation.

14. 15."So too in old times Parasara, overpowered by passion on the banks of the Yamuna, lay with the maiden Kali who was the daughter of the son of Varuna.

15. 16."The sage Vasishtha through lust begot a son Kapinglada on Akshmalā, a despised low-caste woman.

16. 17."And the seer-king Yayat, even when the vigour of his prime was gone, sported in the Kaitrartha forest with the Apsara Visvaki.

17. 18."And the Kaurava king Pandu, though he knew that intercourse with his wife would end in death, yet overcome by the beauty and good qualities of Madri, yielded to the pleasures of love.

18. 19."Great heroes such as these, pursued even contemptible desires for the sake of pleasure, how much more so when they are praiseworthy of their kind?"

19. 20."And yet thou, a young man, possessed of strength and beauty, despisest enjoyments which rightly belong to thee and to which the whole world is devoted."

§ 12. *The Prince's Reply to the Prime Minister*

1. 1. Having heard these specious words of his, well-supported by sacred tradition, the prince made reply, in a voice like the thundering of a cloud :
2. 2."This speech manifesting affection is well-befitting in thee ; but I will convince thee as to where thou wrongly judgest me.
3. 3."I do not despise worldly objects, I know that all mankind is bound up therein. But remembering that the world is transitory, my mind cannot find pleasure in them.
4. 4."Yet even though this beauty of women were to remain perpetual, still delight in the pleasures of desires would not be worthy of the wise man.
5. 5."And as for what thou sayest as to even those great men having become victims to desire, do not be led away by them ; for destruction was also their lot.
6. 6."Real greatness is not to be found there, where there is destruction, or where there is attachment to earthly objects, or a want of self-control.
7. 7."And when thou sayest, ' Let one deal with women by guile,' I know about guile, even if it be accompanied with courtesy.
8. 8."That compliance too with a woman's wishes pleases me not, if truthfulness be not there ; if there be not a union with one's whole soul and nature, then ' out upon it ' say I.
9. 9."A soul overpowered by passion, believing in falsehood, carried away by attachment and blind to the faults of its objects, what is there in it worth being deceived?
10. 10."And if the victims of passion do deceive one another, are not men unfit for women to look at and women for men?
11. 11."Since then these things are so, thou surely wouldst not lead me astray into ignoble pleasures."
12. 12. Udayin felt silenced by the firm and strong resolve of the prince and reported the matter to his father.
13. 13. Suddhodana, when he heard how his son's mind turned away from all objects of sense, could not sleep all that night. Like an elephant with an arrow in his heart, he was full of pain.
14. 14. He and his ministers spent much of their time in consultation

hoping to find some means to draw Siddharth to the pleasures of carnal life and thus to dissuade him from the likely turn which he may give to his life. But they found no other means besides those they had tried.

15. 15. And the seraglio of women wearing their garlands and ornaments in vain, with their graceful arts and endearments all fruitless, concealing their love deep in their hearts, was disbanded.

§ 13. *Initiation into the Sakya Sangh*

1. 1. The Sakyas had their Sangh. Every Sakya youth above twenty had to be initiated into the Sangh and be a member of the Sangh.

2. 2. Siddharth Gautama had reached the age of twenty. It was time for him to be initiated into the Sangh and become a member thereof.

3. 3. The Sakyas had a meeting-house which they called Sansthaagar. It was situated in Kapilavatsu. The session of the Sangh was also held in the Sansthaagar.

4. 4. With the object of getting Siddharth initiated into the Sangh, Suddhodana asked the Purohit of the Sakyas to convene a meeting of the Sangh.

5. 5. Accordingly the Sangh met at Kapilavatsu in the Sansthaagar of the Sakyas.

6. 6. At the meeting of the Sangh, the Purohit proposed that Siddharth be enrolled as a member of the Sangh.

7. 7. The Senapati of the Sakyas then rose in his seat and addressed the Sangh as follows :”Siddharth Gautama, born in the family of Suddhodana of the Sakya clan, desires to be a member of the Sangh. He is twenty years of age and is in every way fit to be a member of the Sangh. I, therefore, move that he be made a member of the Sakya Sangh. Pray, those who are against the motion speak.”

8. 8. No one spoke against it.”A second time do I ask those who are against the motion to speak,”said the Senapati.

9. 9. No one rose to speak against the motion. Again the Senapati said :”A third time do I ask those who are against the motion to speak.”

10. 10. Even for the third time no one spoke against it.

11. 11. It was the rule of procedure among the Sakyas that there could be no debate without a motion and no motion could be declared carried

unless it was passed three times.

12. 12. The motion of the Senapati having been carried three times without opposition, Siddharth was declared to have been duly admitted as a member of the Sakya Sangh.

13. 13. Thereafter the Purohit of the Sakyas stood up and asked Siddharth to rise in his place.

14. 14. Addressing Siddharth, he said :”Do you realize that the Sangh has honoured you by making you a member of it?””I do, sir,”replied Siddharth.

15. 15.”Do you know the obligation of membership of the Sangh?””I am sorry, sir, I do not. But I shall be happy to know them, sir,”said Siddharth.

16. 16.”I shall first tell you what your duties as a member of the Sangh are”said the Purohit and he then related them one by one :”(1) You must safeguard the interests of the Sakyas by your body, mind and money. (2) You must not absent yourself from the meetings of the Sangh. (3) You must without fear or favour expose any fault you may notice in the conduct of a Sakya. (4) You must not be angry if you are accused of an offence but confess if you are guilty or state if you are innocent.”

17. 17. Proceeding, the Purohit said :”I shall next tell you what will disqualify you for membership of the Sangh : (1) You cannot remain a member of the Sangh if you commit rape. (2) You cannot remain a member of the Sangh if you commit murder. (3) You cannot remain a member of the Sangh if you commit theft. (4) You cannot remain a member of the Sangh if you are guilty of giving false evidence.”

18. 18.”I am grateful to you, sir,”said Siddharth,”for telling me the rules of discipline of the Sakya Sangh. I assure you I will do my best to follow them in letter and in spirit.”

§ 14. *Conflict with the Sangh*

1. 1. Eight years had passed by since Siddharth was made a member of the Sakya Sangh.

2. 2. He was a very devoted and steadfast member of the Sangh. He took the same interest in the affairs of the Sangh as he did in his own. His conduct as a member of the Sangh was exemplary and he had endeared himself to all.

3. 3. In the eighth year of his membership, an event occurred which

resulted in a tragedy for the family of Suddhodana and a crisis in the life of Siddharth.

4. 4. This is the origin of the tragedy.

5. 5. Bordering on the State of the Sakyas was the State of the Koliyas. The two kingdoms were divided by the river Rohini.

6. 6. The waters of the Rohini were used by both the Sakyas and the Koliyas for irrigating their fields. Every season there used to be disputes between them as to who should take the water of the Rohini first and how much. These disputes resulted in quarrels and sometimes in affrays.

7. 7. In the year when Siddharth was twenty-eight, there was a major clash over the waters between the servants of the Sakyas and the servants of the Koliyas, Both sides suffered injuries.

8. 8. Coming to know of this, the Sakyas and the Koliyas felt that the issue must be settled once for all by war.

9. 9. The Senapati of the Sakyas, therefore, called a session of the Sakya Sangh to consider the question of declaring war on the Koliyas.

10. 10. Addressing the members of the Sangh, the Senapati said :”Our people have been attacked by the Koliyas and they had to retreat. Such acts of aggression by the Koliyas have taken place more than once. We have tolerated them so far. But this cannot go on. It must be stopped and the only way to stop it is to declare war against the Koliyas. I propose that the Sangh do declare war on the Koliyas. Those who wish to oppose may speak.”

11. 11. Siddharth Gautama rose in his seat and said :”I oppose this resolution. War does not solve any question. Waging war will not serve our purpose. It will sow the seeds of another war. The slayer gets a slayer in his turn ; the conqueror gets one who conquers him ; a man who despoils is despoiled in his turn.”

12. Siddharth Gautama continued:”I feel that the Sangh should not be in haste to declare war on the Koliyas: Careful investigation should be made to ascertain who is the guilty party.

I hear that our men have also been aggressors. If this be true, then it is obvious that we too are not free from blame.”

12. 13. The Senapati replied :”Yes, our men were the aggressors. But it must not be forgotten that it was our turn to take the water first.”

13. 14. Siddharth Gautama said:”This shows that we are not completely

free from blame. I therefore propose that we elect two men from us and the Koliyas should be asked to elect two from them and the four should elect a fifth person and these should settle the dispute.”

14. 15. The amendment moved by Siddharth Gautama was duly seconded. But the Senapati opposed the amendment, saying :”I am sure that this menace of the Koliyas will not end unless they are severely punished.”

15. 16. The resolution and the amendment had therefore to be put to vote. The amendment moved by Siddharth Gautama was put first. It was declared lost by an overwhelming majority.

16. 17. The Senapati next put his own resolution to vote. Siddharth Gautama again stood up to oppose it.”I beg the Sangh,”he said,”not to accept the resolution. The Sakyas and the Koliyas are close relations. It is unwise that they should destroy each other.”

17. 18. The Senapati encountered the plea urged by Siddharth Gautama. He stressed that in war the Kshatriyas cannot make a distinction between relations and strangers. They must fight even against brothers for the sake of their kingdom.

18. 19. Performing sacrifices is the duty of the Brahmins, fighting is the duty of the Kshatriyas, trading is the duty of the Vaishyas and service is the duty of the Shudras. There is merit in each class forming its duty. Such is the injunction of our Shastras.

19. 20. Siddharth replied :”Dharma, as I understand it, consists in recognising that enmity does not disappear by enmity. It can be conquered by love only.”

20. 21. The Senapati, getting impatient, said :”It is unnecessary to enter upon this philosophical disquisition. The point is that Siddharth is opposed to my resolution. Let us ascertain what the Sangh has to say about it by putting it to vote.”

21. 22. Accordingly the Senapati put his resolution to vote. It was declared carried by an overwhelming majority.

§ 15. *Offer of Exile*

1. 1. Next day the Senapati called another meeting of the Sakya Sangh to have his plan of mobilisation considered by the Sangh.

2. 2. When the Sangh met, he proposed that he be permitted to proclaim an order calling to arms for the war against the Koliyas every Sakya between the ages of 20 and 50.

3. 3. The meeting was attended by both sides— those who at the previous meeting of the Sangh had voted in favour of a declaration of war as well as those who had voted against it.

4. 4. For those who had voted in favour there was no difficulty in accepting the proposal of the Senapati. It was a natural consequence of their earlier decision.

5. 5. But the minority who had voted against it had a problem to face. Their problem was—to submit or not to submit to the decision of the majority. 6. The minority was determined not to submit to the majority. That is the reason why they had decided to be present at the meeting. Unfortunately, none of them had the courage to say so openly. Perhaps they knew the consequences of opposing the majority.

6. 7. Seeing that his supporters were silent, Siddharth stood up, and addressing the Sangh, said: "Friends ! You may do what you like. You have a majority on your side, but I am sorry to say I shall oppose your decision in favour of mobilisation. I shall not join your army and I shall not take part in the war."

7. 8. The Senapati, replying to Siddharth Gautama, said : "Do remember the vows you had taken when you were admitted to the membership of the Sangh. If you break any of them you will expose yourself to public shame."

8. 9. Siddharth replied: "Yes, I have pledged myself to safeguard the best interests of the Sakyas by my body, mind and money. But I do not think that this war is in the best interests of the Sakyas. What is public shame to me before the best interests of the Sakyas?"

9. 10. Siddharth proceeded to caution the Sangh by reminding it of how the Sakyas have become the vassals of the King of Kosala by reason of their quarrels with the Koliyas. "It is not difficult to imagine," he said, "that this war will give him a greater handle to further reduce the freedom of the Sakyas."

10. 11. The Senapati grew angry and addressing Siddharth, said : "Your eloquence will not help you. You must obey the majority decision of the Sangh. You are perhaps counting upon the fact that the Sangh has no power to order an offender to be hanged or to exile him without the

sanction of the king of the Kosalas and that the king of the Kosalas will not give permission if either of the two sentences was passed against you by the Sangh.”

11. 12.”But remember the Sangh has other ways of punishing you. The Sangh can declare a social boycott against your family and the Sangh can confiscate your family lands. For this the Sangh does not have to obtain the permission of the king of the Kosalas.”

12. 13. Siddharth realised the consequences that would follow if he continued his opposition to the Sangh in its plan of war against the Koliyas. He had three alternatives to consider—to join the forces and participate in the war ; to consent to being hanged or exiled ; and to allow the members of his family to be condemned to a social boycott and confiscation of property.

13. 14. He was firm in not accepting the first. As to the third he felt it was unthinkable. Under the circumstances he felt that the second alternative was the best.

14. 15. Accordingly, Siddharth spoke to the Sangh.”Please do not punish my family. Do not put them in distress by subjecting them to a social boycott. Do not make them destitute by confiscating their land which is their only means of livelihood. They are innocent. I am the guilty person. Let me alone suffer for my wrong. Sentence me to death or exile, whichever you like. I will willingly accept it and I promise I shall not appeal to the king of the Kosalas.”

§ 16. *Parivraja-the Way Out*

1. 1. The Senapati said :”It is difficult to accept your suggestion. For even if you voluntarily agreed to undergo the sentence of death or exile, the matter is sure to become known to the king of the Kosalas and he is sure to conclude that it is the Sangh which has inflicted this punishment and take action against the Sangh.”

2. 2.”If this is the difficulty I can easily suggest a way out,”said Siddharth Gautama.”I can become a Parivrajaka and leave this country. It is a kind of an exile.”

3. 3. The Senapati thought this was a good solution. But he had still some doubt about Siddharth being able to give effect to it.

4. 4. So the Senapati asked Siddharth :”How can you become a Parivrajaka unless you obtain the consent of your parents and your wife?”
5. 5. Siddharth assured him that he would do his best to obtain their permission.”I promise,”he said,”to leave this country immediately whether I obtain their consent or not.”
6. 6. The Sangh felt that the proposal made by Siddharth was the best way out and they agreed to it.
7. 7. After finishing the business before the meeting, the Sangh was about to rise when a young Sakya got up in his place and said :”Give me a hearing, I have something important to say.”
8. 8. Being granted permission to speak, he said :”I have no doubt that Siddharth Gautama will keep his promise and leave the country immediately. There is, however, one question over which I do not feel very happy.
9. 9.”Now that Siddharth will soon be out of sight, does the Sangh propose to give immediate effect to its declaration of war against the Koliyas?
10. 10.”I want the Sangh to give further consideration to this question.
In any event, the king of the Kosalas is bound to come to know of the exile of Siddharth Gautama. If the Sakyas declare a war against the Koliyas immediately, the king of Kosalas will understand that Siddharth left only because he was opposed to war against the Koliyas. This will not go well with us.
11. 11.”I, therefore, propose that we should also allow an interval to pass between the exile of Siddharth Gautama and the actual commencement of hostilities so as not to allow the King of Kosala to establish any connection between the two.”
12. 12. The Sangh realised that this was a very important proposal. And as a matter of expediency, the Sangh agreed to accept it.
13. 13. Thus ended the tragic session of the Sakya Sangh and the minority which was opposed to the war but who had not the courage to say so, heaved a sigh of relief that it was able to overcome a situation full of calamitous consequences.

§ 17. Parting Words

1. 1. The news of what happened at the meeting of the Sakya Sangh had travelled to the Raja's palace long before the return of Siddharth Gautama.
2. 2. For on reaching home he found his parents weeping and plunged in great grief.
3. 3. Suddhodana said :”We were talking about the evils of war. But I never thought that you would go to such lengths.”
4. 4. Siddharth replied,”I too did not think things would take such a turn. I was hoping that I would be able to win over the Sakyas to the cause of peace by my argument.
5. 5.”Unfortunately, our military officers had so worked up the feelings of the men that my argument failed to have any effect on them.
6. 6.”But I hope you realise how I have saved the situation from becoming worse. I have not given up the cause of truth and justice and whatever the punishment for my standing for truth and justice, I have succeeded in making its infliction personal to me.”
7. 7. Suddhodana was not satisfied with this.”You have not considered what is to happen to us.”“But that is the reason why I undertook to become a Pariv-rajaka,”replied Siddharth.”Consider the consequences if the Sakyas had ordered the confiscation of your lands.”
8. 8.”But without you what is the use of these lands to us?”cried Suddhodana. Why should not the whole family leave the country of the Sakyas and go into exile along with you?”
9. 9. Prajapati Gautami, who was weeping, joined Suddhodana in argument, saying ;”I agree. **How** can you go alone leaving us here like this?”
10. 10. Siddharth said :”Mother, have you not always claimed to be the mother of a Kshatriya? Is that not so? You must then be brave. This grief is unbecoming of you. What would you have done if I had gone to the battle-field and died? Would you have grieved like this?”
11. 11.”No,”replied Gautami. “That would have been befitting a Kshatriya. But you are now going into the jungle far away from people, living in the company of wild beasts. How can we stay here in peace? I say you should take us along with you.”
12. 12.”How can I take you all with me? Nanda is only a child. Rahul my son is just born. Can you come leaving them here?”He asked Gautami.
13. 13. Gautami was not satisfied. She urged :”It is possible for us all to

leave the country of the Sakyas and go to the country of the Kosalas under the protection of their king.”

14. 14.”But mother! What would the Sakyas say?” asked Siddharth.”Would they not regard it as treason? Besides, I pledged that I will do nothing either by word or by deed to let the king of the Kosalas know the true cause of my Parivraja.

15. 15.”It is true that I may have to live alone in the jungle. But which is better? To live in the jungle or to be a party to the killing of the Koliyas !”

16. 16.”But why this impatience?” asked Sud-dhodana.”The Sakyas Sangh has decided to postpone the date of the hostilities for some time.

17. 17.”Perhaps the hostilities may not be started at all. Why not postpone your Parivraja? May be, it would be possible to obtain the permission of the Sangh for you to stay among the Sakyas.”

18. 18. This idea was repellent to Siddharth.”It is because I promised to take Parivraja that the Sangh decided to postpone the commencement of hostilities against the Koliyas.

19. 19.”It is possible that after I take Parivraja the Sangh may be persuaded to withdraw their declaration of war. All this depends upon my first taking Parivraja.

20. 20.”I have made a promise and I must carry it out. The consequences of any breach of promise may be very grave both to us and to the cause of peace.

21. 21.”Mother, do not now stand in my way. Give me your permission and your blessings. What is happening is for the best.”

22. 22. Gautami and Suddhodana kept silent.

23. 23. Then Siddharth went to the apartment of Yeshodhara. Seeing her, he stood silent, not knowing what to say and how to say it. She broke the silence by saying :”I have heard all that has happened at the meeting of the Sangh at Kapilavatsu.”

24. 24. He asked her:—”Yeshodhara, tell me what you think of my decision to take Parivraja?”

25. 25. He expected she would collapse. Nothing of the kind happened.

26. 26. With full control over her emotions, she replied :”What else could I have done if I were in your position? I certainly would not have been a party to a war on the Koliyas.

27. 27.”Your decision is the right decision. You have my consent and my

support. I too would have taken Parivraja with you. If I do not, it is only because I have Rahula to look after.

28. 28."I wish it had not come to this. But we must be bold and brave and face the situation. Do not be anxious about your parents and your son. I will look after them till there is life in me.

29. 29."All I wish is that now that you are becoming a Parivrajaka leaving behind all who are near and dear to you, you will find a new way of life which would result in the happiness of mankind."

30. 30. Siddharth Gautama was greatly impressed. He realised as never before what a brave, courageous and noble-minded woman Yeshodhara was, and how fortunate he was in having her as his wife and how fate had put them asunder. He asked her to bring Rahula. He cast his fatherly look on him and left.

§ 18. *Leaving His Home*

1. 1. Siddharth thought of taking Parivraja at the hands of Bharadwaja who had his Ashram at Kapila-vatsu. Accordingly he rose the next day and started for the Ashram on his favourite horse Kanthaka with his servant Channa walking along. 2. As he came near the Ashram, men and women came out and thronged the gates to meet him as a newly arrived bridegroom.

2. 3. And when they came up to him, their eyes wide open in wonder, they performed their due homage with hands folded like a lotus calyx.

3. 4. Then they stood surrounding him, their minds overpowered by passion, as if they were drinking him in with their eyes motionless and blossoming wide with love.

4. 5. Some of the women verily thought that he was Kama incarnate, decorated as he was with his brilliant signs as with connate ornaments.

5. 6. Others thought from his gentleness and his majesty that it was the moon with its ambrosial beams as it were visibly come down to the earth.

6. 7. Others, smitten by his beauty, yawned as if to swallow him, and fixing their eyes on each other, softly sighed.

7. 8. Thus the women only looked upon him, simply gazing with their eyes. They spoke not, nor did they smile. They surrounded him and stood aghas thinking of his decision to take Parivraja.

8. 9. With great difficulty he extricated himself from the crowd and entered the gates of the Ashram.
9. 10. Siddharth did not like Suddhodana and Prajapati Gautami to be present to witness his Pariv-rajā. For he knew that they would break down under the weight of grief. But they had already reached the Ashram without letting him know.
10. 11. As he entered the compound of the Ashram he saw in the crowd his father and mother.
11. 12. Seeing his parents he first went to them and asked for their blessing. They were so choked with emotion that they could hardly say a word. They wept and wept, held him fast and bathed him with their tears.
12. 13. Channa had tied Kanthaka to a tree in the Ashram and was standing. Seeing Suddhodana and Prajapati in tears he too was overcome with emotion and was weeping.
13. 14. Separating himself with great difficulty from his parents, Siddharth went to the place where Channa was standing. He gave him his dress and his ornaments to take back home.
14. 15. Then he had his head shaved, as was required for a Parivrajaka. His cousin Mahanama had brought the clothes appropriate for a Parivrajaka and a begging bowl. Siddharth wore them.
15. 16. Having thus prepared himself to enter the life of a Parivrajaka, Siddharth approached Bharad-waja to confer on him Parivraja.
16. 17. Bharadwaja with the help of his disciples performed the necessary ceremonies and declared Siddharth Gautama to have become a Parivrajaka.
17. 18. Remembering that he had given a double pledge to the Sakya Sangh to take Parivraja and to leave the Sakya kingdom without undue delay, Siddharth Gautama immediately on the completion of the Parivraja ceremony started on his journey.
18. 19. The crowd which had collected in the Ashram was unusually large. That was because the circumstances leading to Gautama's Parivraja were so extraordinary. As the prince stepped out of the Ashram the crowd also followed him.
19. 20. He left Kapilavatsu and proceeded in the direction of the river Anoma. Looking back he saw the crowd still following him.
20. 21. He stopped and addressed them, saying: "Brothers and sisters, there is no use your following me. I have failed to settle the dispute

between the Sakyas and the Koliyas. But if you create public opinion in favour of settlement you might succeed. Be, therefore, so good as to return." Hearing his appeal, the crowd started going back.

21. 22. Siddhodana and Gautami also returned to the palace.

22. 23. Gautami was unable to bear the sight of the robes and the ornaments discarded by Siddharth. She had them thrown into a lotus pool.

24. Siddharth Gautama was only twenty-nine when he underwent Parivraja (Renunciation).

25. People admired him and sighed for him; saying : "Here was a Sakya blessed with high lineage, noble parentage, possessed of considerable riches, in the bloom of youthful vigour, accomplished in mind and body, brought up in luxury, who fought his kinsmen for the sake of maintaining peace on earth and goodwill towards men.

23. 26. "Here was a Sakya youth who when outvoted by his kinsmen refused to submit but preferred to undergo voluntary punishment which involved the exchange of riches for poverty, comfort for alms, home for homelessness. And so he goes with none in the world to care for him and with nothing in the world which he could claim as his own.

24. 27. "His was an act of supreme sacrifice willingly made. His is a brave and a courageous act. There is no parallel to it in the history of the world. He deserves to be called a Sakya Muni or Sakya Sinha." 28. How true were the words of Kisa Gotami, a Sakya maiden. When referring to Siddharth Gautama, she said : "Blessed indeed is the mother, blessed indeed is the father, who has such a son. Blessed indeed is the wife who has such a husband."

§ 19. *The Prince and the Servant*

1. 1. Channa too should have gone back home with Kanthaka. But he refused to go. He insisted on seeing the Prince off with Kanthaka at least to the banks of the river Anoma and so insistent was Channa that the Gautama had to yield to his wishes.

2. 2. At last they reached the banks of the river Anoma.

3. 3. Then turning to Channa he said : "Good friend, thy devotion to me has been proved by thy thus following me. I am wholly won in heart by thee, ye who have such a love for your master.

4. 4."I am pleased with your noble feelings towards me, even though I am powerless of conferring any reward.
5. 5."Who would not be favourably disposed to one who stands to him as bringing him reward? But even one's own people commonly become mere strangers in a reverse of fortune.
6. 6."A son is brought up for the sake of the family, the father is honoured by the son for the sake of his own future support ; the world shows kindness for the sake of hope ; there is no such thing as unselfishness without a motive.
7. 7."Thou art the only exception. Take now this horse and return.
8. 8."The king, with his loving confidence, still unshaken, must be enjoined to stay his grief.
9. 9."Tell him, I have left him—with no thirst for heaven, with no lack of love, nor feeling of anger.
10. 10."He should not think of mourning for me who am thus gone forth from my home; union, however long it may last, in time will come to an end.
11. 11."Since separation is certain, how shall there not be repeated severings from one's kindred?
12. 12."At a man's death there are doubtless heirs to his wealth but heirs to his merit are hard to find on the earth or exist not at all.
13. 13."The king, my father, requires to be looked after. The king may say, ' He is gone at a wrong time.' But there is no wrong time for duty.
14. 14."Do thou address the king, O friend, with these and suchlike words ; and do thou use thy efforts so that he may not even remember me.
15. 15."Yes, do thou repeat to my mother my utter unworthiness to deserve her affection. She is a noble person, too noble for words."
16. 16. Having heard these words, Channa, overwhelmed with grief, made reply with folded hands, his voice choked by emotion :
17. 17."Seeing that ye are causing affliction to thy kindred, my mind, O my Lord, sinks down like an elephant in a river of mud.
18. 18."To whom would not such a determination as this of thine, cause tears, even if his heart were of iron—how much more if it were throbbing with love? 19."Where is gone this delicacy of limb, fit to lie only in a palace, and where is the ground of the ascetic forest, covered with the shoots of rough Kusa grass?

19. 20."How could I, O Prince, by mine own will, —knowing this thy decision,—carry back the horse to the sorrow of Kapilavatsu?
20. 21."Surely thou wilt not abandon that fond old king, so devoted to his son, as a heretic might the true religion? .
21. 22."And her, thy second mother, worn with the care of bringing thee up,—thou wilt not surely forget her, as an ingrate does a benefit?
22. 23."Thou wilt not surely abandon thy wife endowed with all virtues, illustrious for her family, devoted to her husband and with a young son.
23. 24."Thou wilt not abandon the young son of Yeshodhara, worthy of all praise, thou the best of the cherishers of religion and fame, as a dissolute spendthrift his choicest glory?
24. 25."Or even if thy mind be resolved to abandon thy kindred and thy kingdom, thou wilt not, O Master, abandon me,—thy feet are my only refuge.
25. 26."I cannot go to the city with my soul thus burning, leaving thee behind in the forest.
26. 27."What will the king say to me, returning to the city without thee, or what shall I say to thy wife by way of telling them good news?
27. 28."As for what thou sayest, ' thou must repeat my unworthiness to the king ' who could think or believe it?"continued Channa."Even if I ventured to speak it with a heart ashamed and a tongue cleaving to my mouth, he may not appreciate it.
28. 29. "Him who is always compassionate and who never fails to feel pity, it ill befits to abandon one who loves; turn back and have mercy on me."
29. 30. Having heard these words of Channa overcome with sorrow, Siddharth Gautama with the utmost gentleness answered:
30. 31."Abandon this distress Channa, regarding thy separation from me,—separation is inevitable in corporeal beings who are subject to different births. 32."Even. if I through affection were not to abandon my kindred, death would still make us helplessly abandon one another.
31. 33."She, my mother, by whom I was born in the womb with great thirst and pains,—where am I now with regard to her, and where is she with regard to me?
32. 34."As birds go to their roosting-tree and then depart, so the meeting of beings inevitably ends in separation.

33. 35."As clouds, having come together, depart asunder again, such I consider the meeting and parting of living things.

34. 36."And since this world goes away, each one deceiving the other,— it is not right to think anything thine own in a time of union which is a dread.

35. 37."Therefore, since it is so, grieve not, my good friend, but go ; or if thy love lingers, then go and afterwards return.

36. 38."Say without reproaching me, to the people of Kapilavatsu, ' Let your love for him be given up, and hear his resolve.'"

37. 39. Having heard this conversation between the master and the servant, Kanthaka, the noblest steed, licked his feet with his tongue and dropped hot tears.

38. 40. With his hand whose fingers were untied with a membrane and which was marked with the auspicious svastika, and with its middle part curved, Gautama stroked him and addressed him like a friend:

39. 41."Shed not tears, Kanthaka, bear with it, thy labours will soon have its fruit."

40. 42. Then Channa, knowing that the time for the parting of the ways had come, forthwith paid honour to the sylvan dress of Gautama.

41. 43. Then Gautama, having bidden good-bye to Kanthaka and Channa, went on his way.

42. 44. While his master, thus regardless of his kingdom, was going to the ascetic-wood in mean garments, the groom, tossing up his arms, wailed bitterly and fell on the ground.

43. 45. Having looked back again he wept aloud, and embraced the horse Kanthaka with his arms: and then, hopeless and repeatedly lamenting, started on his return journey.

44. 46. On the way, sometimes he pondered, sometimes he lamented, sometimes he stumbled and sometimes he fell, and so going along, wretched through his devoted attachment, he performed all kinds of actions on the road knowing not what he was doing.

§20. *The Return of Channa*

1. 1. Then Channa in deep distress, when his master thus went into the forest, made every effort on the road to dissolve his load of sorrow.

2. 2. His heart was so heavy that the road which he used to traverse in one night with Kanthaka, that same road he now took eight days to travel, pondering over his lord's absence.
3. 3. The horse Kanthaka, though he still went on bravely, fagged and had lost all spirit ; and decked though he was with ornaments, he in the absence of his master seemed to have lost all his beauty.
4. 4. And turning round towards the direction in which his master went, he neighed repeatedly with a mournful sound; and though pressed with hunger, he welcomed not, nor tasted any grass or water on the road, as before.
5. 5. Slowly the two at long last reached Kapila-vatsu which seemed empty when deserted by Gautama. They reached the city in body but not in soul.
6. 6. Bright as it was with lotus-covered waters, adorned with trees full of flowers, the citizens had lost all their gladness.
7. 7. When the two, their brightness gone and their eyes dim with tears, slowly entered the city, it seemed all bathed in gloom.
8. 8. Having heard that they had returned with their limbs all relaxed, coming back without the pride of the Sakya race, the men of the city shed tears.
9. 9. Full of wrath, the people followed Channa in the road, crying behind him with tears, "Where is the king's son, the glory of his race and his kingdom?"
10. 10. "This city bereft of him is a forest, and that forest which possesses him is a city ; the city without him has no charms for us."
11. 11. Next the women crowded to the rows of windows, crying to one another, "The prince has returned"; but having seen that his horse had an empty back, they closed the windows again and wailed aloud.

§21 *The Family in Mourning*

1. 1. The members of the family of Suddhodana were anxiously awaiting the return of Channa in the hope that he might persuade Gautama to return home.
2. 2. On entering the royal stable, Kanthaka uttered a loud sound, uttering his woe to the palace people.

3. 3. Then the people, who were in the neighbourhood of the king's inner apartments, thought in their hearts, "Since the horse Kanthaka neighs, it must be that the prince has come."

4. 4. And the women, who were fainting with sorrow, now in wild joy, with their eyes rolling to see the prince, rushed out of the palace full of hope. But they were disappointed. There was Kanthaka without the prince.

5. 5. Gautami, abandoning all self-control, cried aloud—she fainted, and with a weeping face exclaimed:

6. 6."With his long arms and lion gait, his bulllike eye, and his beauty, bright like gold, his broad chest, and his voice deep as a drum or a cloud,—should, such a hero as this dwell in a hermitage?

7. 7."This earth is indeed unworthy as regards that peerless doer of noble actions, for such a virtuous hero has gone away from us.

8. 8."Those two feet of his, tender with their beautiful web spread between the toes, with their ankles, concealed and soft like a blue lotus,—how can they, bearing a wheel mark in the middle, walk on the hard ground of the skirts of the forest?

9."That body, which deserves to sit or lie on the roof of a palace, honoured with costly garments, aloes, and sandalwood, how will that manly body live in the woods, exposed to the attacks of the cold, the heat, and the rain?

10."He who was proud of his family, goodness, strength, energy, sacred learning, beauty, and youth, who was ever ready to give, not ask, how will he go about begging alms from others?

9. 11."He who, lying on a spotless golden bed, was awakened during the night by the concert of musical instruments, how alas! will he, my ascetic, sleep today on the bare ground with only one rag of cloth interposed?"

10. 12. Having heard this piteous lamentation, the women, embracing one another with their arms, rained tears from their eyes, as the shaken creepers drop honey from their flowers.

11. 13. Then Yeshodhara, forgetting that she had permitted him to go, fell upon the ground in utter bewilderment.

12. 14."How has he abandoned me his lawful wife? He has left me widowed. He could have allowed his lawful wife to share his new life with him.

13. 15."I have no longing for the heaven, my one desire was that my

beloved may never leave me either in this world or the next.

14. 16."Even if I am unworthy to look on my husband's face with its long eyes and bright smile, still is this poor Rahula never to roll about in his father's lap?

15. 17."Alas ! the mind of that wise hero is terribly stern, gentle as his beauty seems, it is pitilessly cruel. Who can desert of his own accord such an infant son with his inarticulate talk, one who would charm even an enemy?

16. 18."My heart too is certainly most stern, yea, made of rock or fashioned even of iron, which does not break when its lord is gone to the forest, deserted by his royal glory like an orphan,—he so well worthy of happiness. But what can I do? My grief is too heavy for me to bear."19. So fainting in her woe, Yeshodhara wept and wept aloud—self-possessed though she was by nature, yet in her distress she had lost her fortitude.

17. 20. Seeing Yeshodhara thus bewildered with her wild utterances of grief and fallen on the ground, all the women cried out, with their faces streaming with tears like large lotuses beaten by the rain.

18. 21. Having heard of the arrival of both Channa and Kanthaka, and having learned of the fixed resolve of his son, Suddhodana fell struck down by sorrow.

19. 22. Distracted by his grief for his son, being held up for a moment by his attendants, Suddhodana gazed on the horse with his eyes filled with tears, and then falling on the ground wailed aloud.

20. 23. Then Suddhodana got up and entered his temple, offered prayers, performed auspicious rites and vowed certain sacrifices for the safe return of his son.

21. 24. So Suddhodana, Gautami and Yeshodhara passed their days asking : "How long, O God, how long, before, shall we see him again?"

PART II : RENUNCIATION FOR EVER

1. 1. From Kapilavatsu to Rajagraha.
2. 2. King Bimbisara and His Advice.
3. 3. Gautama answers Bimbisara.
4. 4. Reply by Gautama (concluded).
5. 5. News of Peace.

6. 6. The problem in a New Perspective.

§ 1. *From Kapilavatsu to Rajagraha*

1. 1. Leaving Kapilavatsu, Siddharth Gautama thought of going to Rajagraha, the capital of the kingdom of Magadha.

2. 2. The reigning king was Bimbisara. It was a place which great philosophers and leaders of thought had made their headquarters.

3. 3. With this thought in mind he crossed the Ganges, fearing not her rapid flow.

4. 4. On his way he halted at the hermitage of a Brahmin woman Saki, then at the hermitage of another Brahmin woman by name Padma and then at the hermitage of the Brahmin sage Raivata. All of them entertained him.

5. 5. Having seen his personality and dignity and his splendid beauty, surpassing all other men, the people of that region were all astonished at him wearing the clothes of a sanyasi.

6. 6. On seeing him, he who was going elsewhere stood still, and he who was standing there followed him on the way ; he who was walking gently and gravely ran quickly, and he who was sitting at once sprang up.

7. 7. Some people revered him with their hands' others in worship saluted him with their heads, some addressed him with affectionate words ; not one went on without paying him homage.

8. 8. Those who were wearing gay-coloured dresses were ashamed when they saw him, those who were talking on random subjects fell to silence ; no one indulged in an improper thought.

9. 9. His eyebrows, his forehead, his mouth,—his body, his hand, his feet, or his gait,— whatever part of him anyone beheld, that at once rivetted his gaze.

10. 10. After a long and arduous journey Gautama reached Rajagraha surrounded by five hills, well guarded and adorned with mountains, and supported and hallowed by auspicious and sacred places. II. On reaching Rajagraha he selected a spot at the foot of the Pandava hill and put up a small hut made of the leaves of trees for his sojourn.

11. 12. Kapilavatsu by foot is nearly 400 miles distant from Rajagraha.

12. 13. This long journey Siddharth Gautama did all on foot.

§ 2. *King Bimbisara and his Advice*

1. 1. Next day he got up and started to go into the city with a begging bowl asking for alms. A vast crowd gathered round him.
2. 2. Then Sreniya Bimbisara, the lord of the kingdom of the Magadhas, beheld from the outside of his palace the immense concourse of people, and asked the reason of it ; and thus did a courtier recount it to him :
3. 3."He who was thus foretold by the Brahmins, 'He will either attain supreme wisdom or be the emperor of the earth '—it is he, the son of the king of the Sakyas, who is now an ascetic. It is he at whom the people are gazing at."
4. 4. The king, having heard this and perceiving its meaning in his mind, thus at once spoke to that courtier : "Let it be known whither he is going"; and the courtier, receiving the command, followed the prince.
5. 5. With fixed eyes, seeing only a yoke's length before him, with his voice hushed, and his walk slow and measured, he, the noblest of mendicants, went begging for alms, keeping his limbs and his wandering thoughts under control.
6. 6. Having received such alms as were offered, he retired to a lonely corner of the mountain ; and having eaten it there, he ascended the Pandava hill.
7. 7. In that wood, thickly filled with *lodhra* trees, having its thickness resonant with the notes of the peacocks, he, the sun of mankind, shone, wearing his red dress, like the morning sun above the eastern mountains.
8. 8. That royal courtier having thus watched him there, related it all to the king : and the king when he heard it, in his deep veneration, started himself to go thither with a modest retinue.
9. 9. Like a mountain in stature, the king ascended the hill.
10. 10. There he beheld Gautama, resplendent as he sat on his hams, with subdued senses, as if the mountain was moving, and he himself was a peak thereof.
11. 11. Him, distinguished by his beauty of form and perfect tranquillity, filled with astonishment and affectionate regard, the king of men approached.
12. 12. Bimbisara having courteously drawn nigh to him, inquired as to

the condition of his bodily humours ; and Gautama with equal gentleness assured the king of his health of mind and freedom from all ailments.

13. 13. Then the king sat down on the clean surface of the rock, and being seated, he thus spoke, desiring to convey his state of mind :

14. 14."I have a strong friendship with thy family, come down by inheritance and well proved ; since from this, a desire to speak to thee, my son, has arisen in me, therefore, listen to my words of affection,

15. 15."When I consider thy race, beginning with the sun, thy fresh youth, and thy conspicuous beauty, I wonder whence comes this resolve of thine, so out of all harmony with the rest, set wholly on a mendicant's life, not on a kingdom?

16. 16."Thy limbs are worthy of red sandalwood perfumes,—they do not deserve the rough contact of red cloth, this hand of thine is fit to protect subjects, it deserves not to hold food given by another

17. 17."If, therefore, gentle youth, thou desirest not thy paternal kingdom, then in thy generosity, accept forthwith one half of my kingdom,

18. 18."If thou actest thus, there will be no sorrow caused to thine own people, and by the mere lapse of time imperial power at last flies for refuge to the tranquil mind , therefore, be pleased to do me this kindness. The prosperity of the good becomes very powerful, when aided by the good.

19. 19."But if from thy pride of race thou dost not now feel confidence in me, then plunge with thy arrows into countless armies, and with me as thy ally seek to conquer thy foes.

20. 20."Choose thou, therefore, one of these ends. Pursue according to the rules of religious merit, wealth, and pleasure; pursue love and the rest, in reverse order. These are the three objects in life ; when men die they pass into dissolution as far as regards this world.

21. 21."Do thou, therefore, by pursuing the three objects of life, cause this personality of thine to bear its fruit ; they say that when the attainment of religion, wealth and pleasure is complete in all its parts, then the end of man is complete.

22. 22."Do not thou let these two brawny arms lie useless which are worthy to draw the bow; they are well fitted to conquer the three worlds, much more the earth.

23. 23."I speak this to you out of affection,—not through love of dominion or through arrogance beholding this mendicant-dress of thine, I

am filled with compassion and I shed tears.

24. 24."O, thou who desirest the mendicant's stage of life, enjoy pleasures now, in due time— ere old age comes on and overcomes this thy beauty, well worthy of thy illustrious race.

25. 25."The old man can obtain merit by religion ; old age is helpless, for the enjoyment of pleasures ; therefore, they say that pleasures belong to the young man, wealth to the middle-aged, and religion to the old.

26. 26."Youth in this present world is the enemy of religion and wealth—since pleasures, however much we guard against them, are hard to hold, therefore, wherever pleasures are to be found, there thy youth seize them.

27. 27."Old age is prone to reflection, it is grave and intent on remaining quiet ; it attains unimpassionedness with but little effort, unavoidably, and for very shame.

28. 28."Therefore, having passed through the deceptive period of youth, fickle, intent on external objects, heedless, impatient, not looking at the distance,—they take breath like men who have escaped safe through a forest.

29. 29."Let, therefore, this fickle time of youth first pass by, reckless and giddy,—our early years are earmarked for pleasure, they cannot be kept from the power of the senses.'

30. 30."Or, if religion is really thy one aim, then offer sacrifices,—this is thy family's immemorial custom, climbing to highest heaven by sacrifices.

31. 31."With their arms pressed by golden bracelets, and their variegated diadems resplendent with the light of gems, royal sages have reached the same goal by sacrifice which great sages reached by self-mortification."

§ 3. *Gautama Answers Bimbisara*

1. 1. Thus spoke the monarch of the Magadhas, who spoke well and strongly like Indra ; but having heard it, the prince did not falter. He was firm like a mountain.

2. 2. Being thus addressed by the monarch of the Magadhas, Gautama, in a strong speech with friendly face,—self-possessed, unchanged, thus made answer :

3. 3."What you have said is not to be called a strange thing for thee. 0

King! born as thou art in the great family whose ensign is the lion, and lover as thou art of thy friends, that ye should adopt this line of approach towards him who stands as one of thy friends is only natural.

4. 4."Amongst the evil-minded, a friendship worthy of their family, ceases to continue and fades; it is only the good who keep increasing the old friendship of their ancestors by a new succession of friendly acts.

5. 5."But those men who act unchangingly towards their friends in reverses of fortune, I esteem in my heart as true friends. Who is not the friend of the prosperous man, in his times of abundance?

6. 6."So those who, having obtained riches in the world, employ them for the sake of their friends and religions,—their wealth has real solidity, and when it perishes it produces no pain at the end.

7. 7."This thy suggestion concerning me, O King, is prompted by pure generosity and friendship; I will meet thee courteously with simple friendship, I would not utter aught else in my reply.

8. 8."I am not so afraid even of serpents nor of thunderbolts falling from, heaven, nor of flames blown together by the wind, as I am afraid of these worldly objects.

9. 9."These transient pleasures,—the robbers of our happiness and our wealth, and which float empty and like illusions through the world,—infatuate man's minds even when they are only hoped for,—still more when they take up their abode in the soul.

10. 10."The victims of pleasure attain not to happiness even in the heaven of the gods, still less in the world of mortals; he who is athirst is never satisfied with pleasures, as the fire, the friend of the wind, with fuel.

11. 11."There is no calamity in the world like pleasures, people are devoted to them through delusion; when he once knows the truth and so fears evil, what wise man would of his own choice desire evil?

12. 12."When they have obtained all the earth girdled by the sea, kings wish to conquer the other side of the great ocean ; mankind is. never satiated with pleasures, as the ocean with the waters that fall into it.

13,"When it had rained a golden shower from heaven, and when he had conquered the continents and had even obtained the half of Sakra's throne, Mandhatri was still full of craving for worldly objects.

1. 14."Though he enjoyed the kingdom of the gods in heaven, when

Indra had concealed himself through fear of Vritra, and though in his pride he had made the great Rishis bear his litter, Nahusha was not satisfied.

2. 15."Who would seek these enemies bearing the name of pleasures, by whom even those sages have been overcome, who were devoted to other pursuits, whose only clothes were rags, whose food roots, fruits, and water and who wear their twisted locks as long as snakes?

3. 16."When they hear of the miseries of those who are intent on pleasure and are devoted to worldly pursuits it well befits the self-controlled to fling it away.

4. 17."Success in pleasure is to be considered a misery in the man of pleasure, for he becomes intoxicated when the pleasures of his desire are attained; through intoxication he does what should not be done, not what should be done ; and being wounded thereby he falls into a miserable end.

5. 18."These pleasures which are gained and kept by toil, which after deceiving leave you and return whence they came,—these pleasures which are but borrowed for a time,—what man of self-control, if he is wise, would delight in them?

6. 19."What man of self-control could find satisfaction in these pleasures which are like a torch of hay,—which excite thirst when you seek them and when you grasp them?

7. 20."What man of self-control could find satisfaction in these pleasures which are like flesh that has been, flung away, and which produces misery by their being held in common with kings?

8. 21."What man of self-control could find satisfaction in these pleasures, which, like the senses, are destructive, which bring calamity on every hand to those who abide in them?

9. 22."Those men of self-control who are bitten by them in their hearts, fall into ruin and attain not bliss—what man of self-control could find satisfaction in these pleasures, which are like an angry, cruel serpent?

10. 23."Even if they enjoy them men are not satisfied,—like dogs famishing with hunger over a bone what man of self control could find satisfaction in these pleasures, which are like a skeleton composed of dry bones?

11. 24."He whose intellect is blinded with pleasures, the wretch, who is the miserable slave of hope for the sake of pleasures, well deserves the pain of death even in the world of living.

12. 25."Deer are lured to their destruction by songs, insects for the sake of the brightness fly into the fire, the fish greedy for the flesh swallows the iron hook,— therefore, worldly pleasures produce misery as their end.

13. 26."As for the common opinion, ' pleasures are enjoyment,' none of them when examined are worthy of being enjoyed; fine garments and the rest are only the accessories of things,—they are to be regarded as merely the remedies for pain.

14. 27."Water is desired for allaying thirst; food in the same way for removing hunger; a house for keeping off the wind, the heat of the sun, and the rain; and dress for keeping off the cold and to cover one's nakedness'.

15. 28."So too a bed is for removing drowsiness; a carriage for remedying the fatigue of a journey; a seat for alleviating the pain of standing; so bathing as a means for washing, health, and strength.

16. 29."External objects therefore are to human beings means for remedying pain—not in themselves sources of enjoyment ; what wise man would allow that he enjoys those delights which are only used as remedial?

17. 30."He who, when burned with the heat of bilious fever, maintains that cold appliances are an enjoyment, when he is only engaged in alleviating pain,—he indeed might give the name of enjoyment to pleasures.

18. 31."Since variableness is found in all pleasures, I cannot apply to them the name of enjoyment; the very conditions which mark pleasure, bring also in their turn pain.

19. 32."Heavy garments and fragrant aloe-wood are pleasant in the cold but an annoyance in the heat; and the moonbeams and sandalwood are pleasant in the heat, but a pain in the cold.

20. 33."Since the well-known opposite pairs, such as gain and loss and the rest, are inseparably connected with everything in this world,— therefore, no man is invariably happy on the earth nor invariably wretched.

21. 34."When I see how the nature of pleasure and pain are mixed, I consider royalty and slavery as the same; a king does not always smile, nor is a slave always in pain.

22. 35."Since to be a king involves a wider range of responsibility, therefore, the sorrows of a king are great; for a king is like a peg,—he endures trouble for the sake of the world.

23. 36."A king is unfortunate, if he places his trust in his royalty which is apt to desert and loves crooked turns; and, on the other hand, if he does not trust in it, then what can be the happiness of a timid king?
24. 37."And since after even conquering the whole earth, one city only can serve as a dwelling place and even there only one house can be inhabited, is not royalty mere labour for others?
25. 38."And even in royalty nothing more than one pair of garments is all he needs, and just enough food to keep off hunger ; so only one bed, and only one seat is all that a king needs; other distinctions are only for pride.
26. 39."And if all these fruits are desired for the sake of satisfaction, I can be satisfied without a kingdom ; and if a man is once satisfied in this world, are not all distinctions unnecessary?
27. 40."He then who has attained the auspicious road to happiness is not to be deceived in regard to pleasures. Remembering thy professed friendship, I ask, tell me again and again, are the pleasures worth anything?
28. 41."I have not left home through anger, nor because my diadem has been dashed down by an enemy's arrow ; nor have I set my desires on loftier objects, that I thus refuse thy proposal.
29. 42."Only he who, having once let go a malignant incensed serpent, or a blazing hay-torch all on fire, would strive again to seize it, would ever seek pleasures again after having once abandoned them.
30. 43."Only he who, though seeing would envy the blind, though free, the bound, though wealthy, the destitute, though sound in his reason, the maniac— only he, I say, would envy one who is devoted to wordly objects.
31. 44."He who lives on alms, my good friend, is not to be pitied. He has here the best happiness, perfect calm, and hereafter all sorrows are for him abolished.
32. 45."But he is to be pitied who is overpowered by craving though in the midst of great wealth,—who attains not the happiness of calm here, while pain has to be experienced hereafter.
33. 46."What thou has spoken to me is well worthy of thy character, thy mode of life, and thy family; and to carry out my resolve is also befitting my character, my mode of life, and my family."

§ 4. Reply by Gautama (concluded)

1. 1."I have been wounded by the strife of the world, and I have come out longing to obtain peace; I would not accept any empire in the third heaven, for saving me from all the ills of the earth how much less amongst men?

2. 2."But as for what thou has said to me, O King, that the universal pursuit of the three objects is the supreme end. of man,—and thou saidst that what I regard as the desirable is misery,—thy three objects are perishable and also unsatisfying.

3. 3."And as for what thou saidst, ' wait till old age comes, for youth is ever subject to change';— this want of decision is itself uncertain; for age too can be irresolute and youth can be firm.

4. 4. "But since Fate is so well skilled in its art as to draw the world in all its various ages into its power,—how shall the wise man, who desires tranquillity, wait for old age, when he knows not when the time of death will be?

5. 5. "When death stands ready like a hunter, with old age as his weapon, and diseases scattered about as his arrows, smiting down living creatures who fly like deer to the forest of destiny, what desire can there be in anyone for length of life?

6. 6."It well befits the youthful son or the old man or the child so to act with all promptitude that they may choose the path of the religious man whose soul is all mercy.

7. 7."And as for what thou saidst, be diligent in sacrifices for religion, such as are worthy of thy race and bring a glorious fruit, '—honour to such sacrifices ! I desire not that fruit which is sought by causing pain to others!

8. 8."To kill a helpless victim through a wish for future reward,—it would be unseemly action for a merciful, good-hearted man, even if the reward of the sacrifice were eternal.

9. 9."And even if true religion did not consist in quite another rule of conduct, by self-restraint, moral practice and a total absence of passion,— still it would not be seemly to follow the rule of sacrifice, where the highest reward is described as attained only by slaughter.

10. 10."Even that happiness which comes to a man, while he stays in this world, through the injury of another, is hateful to the wise compassionate heart; how much more if it be something beyond our sight in another life?

11. 11."I am not to be lured into a course of action for future reward,—

my mind does not delight, O King, in future births; these actions are uncertain and wavering in their direction, like plants beaten by the rain from a cloud.”

12. 12. The king himself, folding his hands, replied, ”Thou art obtaining thy desire without hindrance; when thou has at last accomplished all that thou has to do, thou shall show hereafter thy favour towards me.”

13. 13. Having received a firm promise from Gautama to visit him again, the monarch, taking his courtiers with him, returned to the palace.

§ 5. *News of Peace*

1. 1. While Gautama was staying in Rajagraha there came five other Parivrajakas who also put up a hut by the side of the hut which Gautama had erected for himself.

2. 2. These five Parivrajakas were Kaundinya, Ashvajit, Kasyapa, Mahanam and Bhaduka.

3. 3. They too were struck by Gautama's appearance and wondered what could have led him to take Parivraja.

4. 4. They questioned him over the issue in the same way as did King Bimbisara.

5. 5. When he explained to them the circumstances which led him to take Parivraja, they said, ”We have heard of it. But do you know what has happened since you left?” they asked.

6. 6. Siddharth said, ”No.” Then they told him that after he left Kapilavatsu there was a great agitation among the Sakyas against going to war with the Koliyas.

7. 7. There were demonstrations and processions by men and women, boys and girls, carrying flags with such slogans as, ”Koliyas are our brothers,” ”It is wrong for a brother to fight against brother.” ”Think of the exile of Siddharth Gautama,” etc.

8. 8. The result of the agitation was that the Sakya Sangh had to call a meeting and reconsider the question. This time the majority was for compromise with the Koliyas.

9. 9. The Sangh decided to select five Sakyas to act as their envoys and negotiate peace with the Koliyas.

10. 10. When the Koliyas heard of this they were very glad. They too

selected five Koliyas deal with the envoys of the Sakyas.

11. 11. The envoys on the two sides met and agreed to appoint a permanent Council of Arbitration with authority to settle every dispute regarding the sharing of the waters of the river Rohini and both sides to abide by its decision. Thus the threatened war had ended in peace.

12. 12. After informing Gautama of what had happened at Kapilavatsu, the Parivrajakas said, "There is now no need for you to continue to be a Parivrajaka. Why don't you go home and join your family?"

13. 13. Siddharth said : "I am happy to have this good news. It is a triumph for me. But I will not go back to my home. I must not. I must continue to be a Parivrajaka."

14. 14. Gautama asked the five Parivrajakas, what their programme was. They replied, "We have decided to do *tapasya*. Why don't you join us?" Siddharth said, "By and by ; I must examine other ways first."

15. 15. The five Parivrajakas then left.

§ 6. *The Problem in a New Perspective*

1. 1. The news brought by the five Parivrajakas that the Koliyas and Sakyas had made peace, made Gautama very uneasy.

2. 2. Left alone, he began to reflect on his own position and to make sure if any reason was left for him to continue his Parivraja.

3. 3. He had left his people for what?, he asked himself.

4. 4. He had left his home because he was opposed to war. "Now that the war is over is there any problem left to me? Does my problem end because war has ended?"

5. 5. On a deep reflection he thought not.

6. 6. "The problem of war is essentially a problem of conflict. It is only a part of a larger problem.

7. 7. "This conflict is going on not only between kings and nations but between nobles and Brahmins, between householders, between mother and son, between son and mother, between father and son, between sister and brother, between companion and companion.

8. 8. "The conflict between nations is occasional. But the conflict between classes is constant and perpetual. It is this which is the root of all sorrow and suffering in the world.

9. 9."True, I left home on account of war. But I cannot go back home although the war between the Sakyas and Kplyas has ended. I see now that my problem has become wider. I have to find a solution for this problem of social conflict.
10. 10."How far do the old-established philosophies offer a solution of this problem?"
11. 11. Can he accept any one of the social philosophies?
12. 12. He was determined to examine everything for himself.

PART III : IN SEARCH OF NEW LIGHT

1. 1. Halt at Brighu's Ashram.
2. 2. Study of Sankhya.
3. 3. Training in Samadhi Marga.
4. 4. Trial of Asceticism.
5. 5. Abandonment of Asceticism.

§ 1. *Halt at Brighu's Ashram*

1. 1. With the desire to pursue other ways, Gautama left Rajagraha to meet Arada Kalam.
2. 2. On his way he beheld the hermitage of Brighu and entered it out of curiosity.
3. 3. The Brahmin inmates of the Ashram who had gone outside for the sake of fuel, having just come back with their hands full of fuel, flowers, and kusa grass, pre-eminent as they were in penances, and proficient in wisdom, went just to see him, and went not to their cells.
4. 4. Then he being duly honoured by those dwellers of the hermitage paid his homage to the Elders of the Ashram.
5. 5. He, the wise one, longing for liberation, traversed that hermitage, filled with the holy company desirous of heaven,—gazing at their strange penances.
6. 6. He, the gentle one, saw for the first time the different kinds of penances practised by the ascetics in that sacred grove.
7. 7. Then the Brahmin Brighu, well-versed in the technique of penance, told Gautama all the various kinds of penances and the fruits thereof.
8. 8."Uncooked food, growing out of water, and roots and fruits,—this

is the fare of the saints according to the sacred texts ; but the different alternatives of penance vary.

9. 9."Some live like the birds on gleaned corn, others graze on grass like the deer, others live on air like the snakes, as if turned into ant-hills.

10. 10."Others win their nourishment with great effort from stones, others eat corn ground with their own teeth ; some, having boiled for others, keep for themselves what may chance to be left.

11. 11."Others, with their tufts of matted hair continually wet with water, twice offer oblations to Agni with hymns; others, plunging like fishes into the water, dwell there with their bodies scratched by tortoises.

12. 12."By such penances endured for a time,—by the higher they attain heaven, by the lower the world of men, by the path of pain they eventually dwell in happiness,—pain, they say, is the root of merit."

13. 13. On hearing this Gautama said : "Today I is my first sight of such a hermitage and I do not understand this rule of penance.

14. 14."This is all I would say at the moment. This devotion of yours is for the sake of heaven— while my desire is that the ills of life on earth be probed and a solution found. Will you allow me to take your leave. I wish to learn the Sankhya Philosophy and train myself in the Samadhi marga, and see what help it can give me for the solution of my problem.

15. 15."There is sorrow to me when I reflect that I shall have to depart, leaving you who are thus engaged, you who are such a refuge and who have shown such excessive kindness to me,—just as there was when I had to leave my kindred behind.

16. 16."It is not, therefore, any dislike on my part or the wrong conduct of another, which makes me go away from this wood ; for ye are like great sages, standing fast in the religious duties which are in accordance with former sages.

17. 17."I wish to go to Muni Arada Kalam who is known to be the master of the subject."

18. 18. Seeing his resolve Brighu, the chief of the hermitage, said : "Prince, brave indeed is thy purpose, who, young as thou art, having pondered thoroughly between heaven and liberation have made up your mind for liberation, ye are indeed brave!

19. 19."If what you have said is thy settled purpose go quickly to Vindhya-koshtha ; the Muni Arada lives there who has gained an insight

into absolute bliss.

20. 20."From him thou wilt learn the path but as I foresee, this purpose of thine will go further, after having studied his theory."

21. 21. Gautama thanked him, and having saluted the company of sages he departed ; the hermits also, having duly performed to him all the rites of courtesy, entered again into the ascetic grove.

§ 2. *Study of Sankhya*

1. 1. Leaving the Ashram of Brighu, Gautama started to find the abode of Arada Kalam.

2. 2. Arada Kalam was staying at Vaishali. Gautama went thither. On reaching Vaishali he went to his Ashram.

3. 3. Approaching Arada Kalam, he said:"I wish to be initiated into your doctrine and discipline."

4. 4. Thereupon Arada Kalam said : "You are welcome. Such is my doctrine that an intelligent man like you in no long time may of himself comprehend, realise and attain my teaching and abide by it.

5. 5."Verily thou art a worthy vessel to receive this highest training."

6. 6. The prince, having heard these words of Arada, was filled with great pleasure and thus made reply.

7. 7."This extreme kindness which thou showest to me, makes me, imperfect as I am, seem even already to have attained perfection.

8. 8."Will you, therefore, deign to tell me what your doctrine is?"

9. 9. Said Arada,"I am so much impelled by your noble nature, by your sincerity of character and by your resolution that I need not put you to any preliminary examination to test your worthiness.

10. 10."Listen, best of listeners, to our tenets."

11. 11. He then expounded to Gautama the tenets of what was known as the Sankhya Philosophy.

12. 12. At the conclusion of his discourse Arada Kalam said:

13. 13."These are, O Gautama, the tenets of our system. I have told them to you in a summary form."

14. 14. Gautama was greatly pleased with the clear exposition given by Arada Kalam.

§ 3. Training in Samadhi Marga

1. 1. At the time when Gautama was examining the various ways of finding a solution to his problem he thought of getting himself acquainted with the Dhyana Marga (Concentration of the Mind).
2. 2. There were *three* schools of the Dhyana Marga.
3. 3. All of them had one thing in common, namely, that control of breathing was the means of achieving Dhyana.
4. 4. One school followed a way of controlling breathing which is called *Anapanasati*.
5. 5. Another school followed the way of control of breathing known as *Pranayama*. It divided the breathing process into three parts : (1) Breathing *in* (Puraka) ; (2) *holding* the breath (Kumbhaka) ; and (3) breathing *out* (Rechak). The third school was known as Samadhi School.
6. 6. Arada Kalam was well known as the master of Dhyana Marga. Gautama felt that it might be well for him if he could get some training in the Dhyana Marga under Arada Kalam.
7. 7. So he spoke to Arada Kalam and asked him if he would be so good as to give training in the Dhyana Marga.
8. 8. Arada Kalam replied, "With great pleasure."
9. 9. Arada Kalam taught him his technique of the Dhyana Marga. It consisted of seven stages.
10. 10. Gautama practised the technique every day.
11. 11. After acquiring complete mastery over it Gautama asked Arada Kalam if there was anything further to be learned.
12. 12. Arada Kalam replied : "No friend, that is all that I have to teach." With this Gautama took leave of Arada Kalam.
13. 13. Gautama had heard of another yogi, by name Uddaka Ramaputta, who was reputed to have devised a technique which enabled a Dhyani to go one stage higher than that devised by Arada Kalam.
14. 14. Gautama thought of learning his technique and experiencing the highest stage of Samadhi. Accordingly he went to the Ashram of Uddaka Ramaputta and placed himself under his training.
15. 15. Within a short time did Gautama master the technique of Uddaka's eighth stage. After having perfected himself in the technique of Uddaka Rama-putta, Gautama asked him the same question which he had

asked Arada Kalam :”Is there anything further to be learned?”

16. 16. And Uddaka Ramaputta gave the same reply.”No friend, there is nothing more that I can teach you.”

17. 17. Arada Kalam and Uddaka Ramaputta were famous for their mastery of Dhyana Marga in the country of the Kosalas. But Gautama had heard that there were similar masters of Dhyana Marga in the country of the Magadhas. He thought he should have a training in their system also.

18. 18. Gautama accordingly went to Magadha.

19. 19. He found that their technique of Dhyana Marga, though based on control of breathing, was different from what was in vogue in the Kosala country.

20. 20. The technique was not to breathe but to reach concentration by stopping breathing.

21. 21. Gautama learned this technique. When he tried concentration by stopping breathing he found that piercing sounds used to come out of his ears, and his head appeared to him to be pierced as though by a sharp pointed knife.

22. 22. It was a painful process. But Gautama did not fail to master it. 23. Such was his training in the Samadhi Marga.

§ 4. *Trial of Asceticism*

1. 1. Gautama had given a trial to the Sankhya and Samadhi Marga. But he had left the Ashram of the Brighus without giving a trial to Asceticism.

2. 2. He felt he should give it a trial and gain experience for himself so that he could speak authoritatively about it.

3. Accordingly Gautama went to the town of Gaya. From there he reconnoitred the surrounding country and fixed his habitation at Uruvela in the hermitage of Negari, the

Royal Seer of Gaya, for practising asceticism. It was a lonely and solitary place on the banks of the river Nairanjana for practising asceticism.

3. 4. At Uruvela he found the five Parivrajakas whom he had met at Rajagraha and who had brought news of peace. They too were practising asceticism.

4. 5. The mendicants saw him there and approached him to take them with him. Gautama agreed.

5. 6. Thereon they served him reverently, abiding as pupils under his orders, and were humble and compliant.
6. 7. The austerities and self-mortification practised by Gautama were of the severest sort.
7. 8. Sometimes he visited two but not more than seven houses a day and took at each only two but not more than seven morsels.
8. 9. He lived on a single saucer of food a day, but not more than seven saucers.
9. 10. Sometimes he had but one meal a day, or one every two days, and so on, upto once every seven days, or only once a fortnight, on a rigid scale of rationing.
10. 11. As he advanced in the practice of asceticism his sole diet was herbs gathered green, or the grain of wild millets and paddy, or snippets hide, or water-plants, or the red powder round rice-grains within the husk or the discarded scum of rice on the boil, or the flour of oilseeds.
11. 12. He lived on wild roots and fruit, or on windfalls only.
12. 13. His raiment was of hemp or hempen mixture of cerements of rags from the dust-heap, of bark, of the black antelope's pelt either whole or split down the middle, of grass, of strips of bark or wood, hair of men or animals woven into a blanket, or of owl's wings.
13. 14. He plucked out the hair of his head and the hair of his beard, never quitted the upright for the sitting posture, squatted and never rose up, moving only squatting.
14. 15. After this wise, in diverse fashions, he lived to torment and to torture his body—to such a length in asceticism did he go.
15. 16. To such a length in loathliness did he go that there became accumulated on his body the dirt and filth for years till it dropped off by itself.
16. 17. He took up his abode in the awesome depths of the forest, depths so awesome that it was reputed that none but the senseless could venture without his hair standing on end.
17. 18. When the cold season brought chill wintry nights, then it was that in the dark half of the months he dwelt by night in the open air and in the dark thicket by day.
18. 19. But when there came the last broiling month of summer before the rains, he made his dwelling under the baking sun by day and in the

stifling thicket bynight.

19. 20. In a charnel ground did he lay down with charred bones for pillow.

20. 21. Thereafter Gautama lived on a single bean a day—on a single sesamum seed a day—or a single grain of rice a day.

21. 22. When he was living on a single fruit a day, his body grew emaciated in the extreme.

22. 23. If he sought to feel his belly, it was his backbone which he found in his grasp ; if he sought to feel his backbone he found himself grasping his belly, so closely did his belly cleave to his backbone and all because he ate so little.

§ 5. *Abandonment of Asceticism*

1. 1. The austerities and mortification practised by Gautama were of the severest sort. They lasted for a long period of six years.

2. 2. At the end of six years his body had become so weak that he was quite unable to move.

3. 3. Yet he had seen no new light and was no nearer to the solution to the problem of misery in the world on which his mind was centred.

4. 4. He reflected to himself : "This is not the way, even to passionlessness, nor to perfect knowledge, nor to liberation.

5. 5."Some undergo misery for the sake of this world, others meet toil for the sake of heaven ; all living beings wretched through hope and always missing their aim, fall certainly for the sake of happiness into misery.

6. 6. "Has not something like this happened to me?

7. 7. "It is not the effort itself which I blame,— which flinging aside the base pursues a high path of its own.

8. 8."What I ask is, ' Can the mortification of the body be called religion? '

9. 9."Since it is only by the mind's authority that the body either acts or ceases to act, therefore, to control the thought is alone befitting—without thought the body is like a dog.

10. 10."If there was only the body to be considered, merit may be gained by purity of food, but then there is merit also in the doer. But of what good is it?

11. 11."New light cannot be attained by him who has lost his strength and is wearied with hunger, thirst and fatigue with his mind no longer self-possessed through fatigue.
12. 12."How could he who is not absolutely calm, reach the end which is to be attained by his mind?
13. 13."True calm and the self-possession of the mind is properly obtained by the constant satisfaction of the body's wants."
14. 14. At this time there lived at Uruvela a house-holder by name Senani. Sujata was his daughter.
15. 15. Sujata had uttered a wish to a Banyan Tree, and vowed a yearly offering to it if she should have a son.
16. 16. The wish having been fulfilled, she sent her maid Punna to prepare the place for the offering.
17. 17. Punna finding Gautama sitting beneath the Banyan Tree, thought he was the god of the tree who had come down.
18. 18. Sujata came and offered Gautama the food prepared by her in a golden bowl.
19. 19. He took the bowl to the river bank, bathed at a ford or a bathing place called Suppatitthita and ate the food.
20. 20. Thus ended his trial of asceticism.
21. 21. The five ascetics who were with Gautama became angry with him for having given up the life of austerity and self-mortification and in disgust left him.

PART IV : ENLIGHTENMENT AND THE VISION OF A NEW WAY

1. 1. Meditation for New Light.
2. 2. Enlightenment.
3. 3. The Discovery of a New Dhamma.
4. 4. Gautama who was a Bodhisatta after Sammabodhi becomes a Buddha.

§ 1. Meditation for New Light

1. 1. Having refreshed himself with food Gautama sat thinking over his past experiences. He realised that all paths had failed.
2. 2. The failure was so complete that it could have led anyone into a state of frustration. He was, of course, sorry. But frustration as such did not touch him.
3. 3. He was always hopeful of finding a way. So much so that on the night of the day on which he partook of the food sent by Sujata, Gautama had five dreams and when he awoke he interpreted his dreams to mean that he was sure to attain enlightenment.
4. 4. He had also tried to forecast his future. This he did by throwing the bowl of food, Sujata's maid brought, into the river Nairanja, saying :”If I am to have enlightenment let the bowl ascend the stream; if not let it go down.”The vessel, indeed, began to float against the current and at last sank near the abode of Kala, a Naga king.
5. 5. Fortified with hope and determination he left Uruvela and towards evening went along the wide road to Gaya. There he saw a Banyan Tree. He thought of sitting under it in meditation in the hope of a new light dawning upon him and enabling him to find a way which would solve his problem.
6. 6. After trying each of the four directions he chose the East which is always chosen by all the great sages for the removal of all defilements.
7. 7. Gautama sat down cross-legged and upright under the Banyan Tree. Determined to achieve enlightenment, he said to himself,”Skin, sinew and bone may dry up as they will, my flesh and blood may dry in my body, but without attaining complete enlightenment I will not leave this seat.”
8. 8. Then Kala, the king of the Nagas, whose majesty was like the lord of elephants, and his wife Suvarnaprabhasa, having been awakened by the vision of Gautama sitting under the Banyan Tree, uttered this in praise of him being sure that he was destined to attain perfect knowledge.
9. 9.”Inasmuch as the earth, pressed down by thy feet, O Sage, resounds repeatedly, and inasmuch as thy splendour shines forth like the sun, thou shalt assuredly reap the desired fruit.
10. 10.”Inasmuch as flocks of birds fluttering in the sky offer thee reverential salutation, O Lotus-eyed One ; and inasmuch as gentle breezes blow in the sky, thou shalt certainly attain thy object.”
11. 11. As he sat down for meditation a crowd of evil thoughts and evil

passions— mythologically called the children of Mara (Kama), which is another name for evil passions, entered his mind.

12. 12. Gautama was greatly frightened lest they should overpower him and defeat his purpose.

13. 13. He knew that in this battle with evil passions many Rishis and Brahmins had succumbed.

14. 14. So he summoned all the courage he had and said to Mara, "Faith is found in me, and heroism and wisdom. How can ye evil passions defeat me?" "The streams even of rivers may this wind dry up. *Ye* would be unable to dry up my resolutions, when I am so intent." "Better to me is death in battle than that I should be defeated in life.

15. 15. The evil passions entered the mind of Gautama as a crow goes after a stone that looks like a hump of fat, thinking surely, "here I shall find a tender morsel, here perchance is something sweet."

16. 16. And finding no sweetness there, the crow departs thence. So like a crow attacking a rock, the evil passions left Gautama in disgust.

§2. *Enlightenment*

1. To feed himself during the period of meditation Gautama had collected enough food to last him for forty days.

1. 2. Having routed the evil thoughts that disturbed his mind Gautama refreshed himself with food and gained strength. He thus prepared himself for meditation with the aim of obtaining enlightenment. 3. It took Gautama four weeks of meditation to obtain enlightenment. He reached final enlightenment in four stages.

2. 4. In the first stage he called forth reason and investigation. His seclusion helped him to attain it easily.

3. 5. In the second stage he added concentration.

4. 6. In the third stage he brought to his aid equanimity and mindfulness.

5. 7. In the fourth and final stage he added purity to equanimity and equanimity to mindfulness.

6. 8. Thus with mind concentrated, purified, spotless, with defilement gone, supple, dexterous, firm, impassionate, not forgetting what he is after, Gautama concentrated himself on the problem of finding an

answer to the question which had troubled him.

7. 9. On the night of the last day of the fourth week light dawned upon him. He realised that there were two problems. The first problem was that there was suffering in the world and the second problem was how to remove this suffering and make mankind happy.

8. 10. So in the end, after meditation for four weeks, darkness was dispelled, light arose, ignorance was dispelled and knowledge arose. He saw a new way.

§ 3. *The Discovery of a New Dhamma*

1. 1. Gautama when he sat in meditation for getting new light was greatly in the grip of the Sankhya Philosophy.

2. 2. That suffering and unhappiness in the world he thought was an incontrovertible fact.

3. 3. Gautama was, however, interested in knowing how to do away with suffering. This problem the Sankhya Philosophy did not deal with.

4. 4. It is, therefore, on this problem—how to remove suffering and unhappiness—that he concentrated his mind.

5. 5. Naturally, the first question he asked himself was—”What are the causes of suffering and unhappiness which an individual undergoes?”

6. 6. His second question was—”How to remove unhappiness?”

7. 7. To both these questions he got a right answer which is called

'*Samma Bodhi*' (Right Enlightenment). 8. It is because of this that the Banyan Tree has come to be known as the Bodhi Tree.

§ 4. *Gautama who was a Bodhisatta After Sammabodhi Becomes a Buddha*

1. 1. Before enlightenment Gautama was only a Bodhisatta. It is after reaching enlightenment that he became a Buddha.

2. 2. Who and what is a Bodhisatta?

3. 3. A Bodhisatta is a person who is seeking to be a Buddha.

4. 4. How does a Bodhisatta become a Buddha?

5. 5. A Bodhisatta must be a Bodhisatta for ten lives in succession.

What must a Bodhisatta do in order to qualify himself to become a Buddha?

6. 6. In his first life he acquires Mudita (joy). The Bodhisatta having blown off his impurities, as the smith blows the dross from silver, reflects that man who has been reckless and becomes sober brightens up the world like the moon freed from clouds. Joy springs up in him realising this, and he is fervent in his desire to benefit all beings.

7. 7. In his second life he acquires Vimala (Purity). The Bodhisatta has now removed all thoughts of lust ; he is kind ; he is kind to all ; he neither flatters the vices of men nor disparages their virtues.

8. 8. In his third life he acquires Prabhakari (Brightness). The intellect of the Bodhisatta now becomes as bright as a mirror. He fully knows and grasps the truths of Anatta and Anicca. His only wish is for the highest wisdom, and for this he is ready to sacrifice anything.

9. 9. In his fourth life he acquires Arcishmati (Intelligence of Fire). The Bodhisatta in this life fixes his mind on the Eight old Path, the Four Contem- plations, the Fourfold Contest, the Fourfold Will Power, the Fivefold Morality.

10. 10. In his fifth life he acquires Sudurjaya (Difficult to Conquer). He fully understands the connection of the relative and the absolute.

11. 11. In his sixth life he becomes Abhimukhi. In this stage the Bodhisatta is now prepared fully to grasp the evolution of things, its cause, the Twelve Nidanas; and this knowledge, called Abhimukhi, awakens the most profound compassion in his heart for all beings blinded by Avidya.

12. 12. In his seventh life the Bodhisatta becomes a Durangama (going far off). The Bodhisatta is now beyond time and space ; he is one with Infinity, but he still retains nama-rupa out of his great compassion for all beings. He is secluded from others, in that the lusts of the world no more cling to him than water to a lotus leaf. He quenches desires in his fellow beings, practices charity, patience, tactfulness, energy, calmness, intelligence and the highest wisdom.

13. 13. While in this life he knows the Dharma, but presents it in ways understood by the people, he knows he must be tactful and patient. Whatever men do to him he bears with equanimity, for he knows that it is through ignorance they misunderstand his motives. At the same time he never slackens his energy to benefit all beings, nor does he withdraw his mind from wisdom, therefore misfortune can never turn him from the righteous path.

14. 14. In his eighth life he becomes Acala. In the stage of Acala, or 'immovable,' all strivings on the part of the Bodhisatta cease. He follows good spontaneously ; whatever he will do he will succeed in.
15. 15. In his ninth life he becomes Sadhumati. This is the stage or condition of one who has vanquished and penetrated all dharmas or systems, all quarters, and does not enter time.
16. 16. In his tenth life he becomes Dharmamegha. The Bodhisatta attains the infinite divine eye of a Buddha.
17. 17. The Bodhisatta acquires these ten powers which are necessary for him when he becomes a Buddha.
18. 18. The Bodhisatta must not only acquire these ten powers as he evolves from stage to stage but he must also practice to perfection the ten Paramitas.
19. 19. One Paramita is to be the end of one life. Specialisation in the Paramitas must go stage by stage. One Paramita in one life and not a little of one and a little of the other.
20. 20. It is only when he is doubly equipped that a Bodhisatta becomes qualified for becoming a Buddha. The Buddha is a culminating point in the life of a Bodhisatta.
21. 21. The theory of the Jatakas or the birth stages of a Bodhisatta appears analogous to the Brahmanic theory of Avataras, i.e., the theory of incarnations of God.
22. 22. The Jataka theory is based upon the Buddha having the highest degree of purity as the essence of his being.
23. 23. The Avatar theory does not require that the God should be pure in his making. All that the Brahmanic theory of Avatar says is that God saves his followers by taking different forms although the God may be very impure and immoral in his conduct. 24. The theory that to be a Bodhisatta for ten lives as a condition precedent for becoming a Buddha has no parallel anywhere. No other religion calls upon its founder to answer such a test.

PART V: THE BUDDHA AND HIS PREDECESSORS

1. 1. The Buddha and the Vedic Rishis.

2. 2. Kapila—The Philosopher.
3. 3. The Bramhanas.
4. 4. The Upanishads and their Teachings.

§ 1. *The Buddha and the Vedic Rishis*

1. 1. The Vedas are a collection of *Mantras*, i.e., hymns or chants. The reciters of these hymns are called Rishis.
2. 2. The Mantras are mere invocations to deities such as *Indra, Varuna, Agni, Soma, Isana, Prajapati, Bramba, Mahiddhi, Yama* and others.
3. 3. The invocations are mere prayers for help against enemies, for gift of wealth, for accepting the offerings of food, flesh and wine from the devotee.
4. 4. There is not much philosophy in the Vedas. But there were some Vedic sages who had entered into speculations of a philosophical nature.
5. 5. These Vedic sages were : (1) Aghamarsana; (2) Prajapati Parmesthin; (3) Brahmanaspati, otherwise known as Brihaspati; (4) Anila; (5) Dirghatamas; (6) Narayan; (7) Hiranyagarbha; and (8) Visvakar-man.
6. 6. The main problems of these Vedic philosophers were: How did the world originate? In what manner were individual things created? Why have they their unity and existence? Who created, and who ordained? From what did the world spring up and to what again will it return?
7. 7. *Aghamarsana* said that the world was created out of Tapas (heat). Tapas was the creative principle from which eternal law and truth were born. From these were produced the night (tamas). Tamas produced water and from water originated time. Time gave birth to the sun and the moon, the heaven and the earth, the firmament and light and ordained the days and nights.
8. 8. *Brahmanaspati* postulated the genesis of being from non-being. By the term non-existence, he denoted apparently the infinite. The existent originally sprang up from the non-existent. The non-existent (asat, nonens) was the permanent foundation of all that is existent (sat, ens) and of all that is possible and yet non-existent (asat).
9. 9. *Prajapati Parmesthin* started with the problem: "Did being come out of non-being?" His view was that this was an irrelevant question. For him

water was the original substance of that which exists. For him the original matter—water—came neither under the definition of being nor under that of non-being.

10. 10. *Paramesthin* did not draw any distinction between matter and motive power. According to him water transformed itself into particular things by some inherent principle to which he gave the name Kama, Cosmic Desire.

11. 11. *Anila* was another Vedic Philosopher. To him the principal element was air (vayu). It possesses the inherent capacity for movement. It is endowed with the generating principle.

12. 12. *Dirghatamas* maintained that all living beings rest and depend ultimately on the sun. The sun held up and propelled by its inherent force went backward and forward.

13. 13. The sun is composed of a grey coloured substance and so are lightning and fire.

14. 14. The sun, lightning and fire formed the germ of water. Water forms the germ of plants. Such were the views of *Dirghatamas*.

15. 15. According to *Narayana*, Purusha (God) is the first cause of the universe. It is from Purusha that the sun, the moon, the earth, water, fire, air, mid-air, the sky, the regions, the seasons, the creatures of the air, all animals, all classes of men, and all human institutions, had originated.

16. 16. *Hiranyagarbha*. From doctrinal point of view he stood midway between *Parmesthin* and *Narayan*. *Hiranyagarbha* means the golden germ. It was the great power of the universe, from which all other powers and existences, divine and earthly, were derived.

17. 17. *Hiranyagarbha* means fire. It is fire that constituted the solar essence, the generating principle of the universe.

18. 18. From the point of view of *Vishvakarman* it was quite inadequate and unsatisfactory to hold that water was the primitive substance of all that is and then to derive from it this world as a whole by giving it an inherent power of movement. If water be the primitive substance which is endowed with the inherent principle of change, we have yet to account for that from which water derived its being, and derived the motive power, the generating principle, the elemental forces, the laws and all the rest.

19. 19. *Vishvakarman* held the view that it was God which was the motive power. God is first and God is last. He is earlier than the visible universe ;

he had existed before all cosmic forces came into being. He is the sole God who created and ordained this universe. God is one, and the only one. He is the unborn one (aja) in whom all the existing things abide. He is the one who is mighty in mind and supreme in power. He is the maker—the disposer. As father he generated us, and as disposer he knows the fate of all that is.

20. 20. The Buddha did not regard all the Vedic Sages as worthy of reverence. He regarded just ten Vedic Rishis as the most ancient and as the real authors of the Mantras.

21. 21. But in the Mantras he saw nothing that was morally elevating.

22. 22. In his view the Vedas were as worthless as a desert.

23. 23. The Buddha, therefore, discarded the Mantras as a source from which to learn or to borrow.

24. 24. Similarly, the Buddha did not find anything in the philosophy of the Vedic Rishis. They were groping to reach the truth. But they had not reached it.

25. 25. Their theories were mere speculations not based on logic nor on facts. Their contributions to philosophy created no social values.

26. 26. He therefore rejected the philosophy of the Vedic Rishis as useless.

§2. *Kapila— The Philosopher*

1. 1. Among the ancient philosophers of India the most pre-eminent was Kapila.

2. 2. His philosophical approach was unique, and as philosopher he stood in a class by himself. His philosophy was known as the Sankhya Philo-sophy.

3. 3. The tenets of his philosophy were of a startling nature.

4. 4. Truth must be supported by proof. This is the first tenet of the Sankhya system. There is no truth without proof.

5. 5. For purposes of proving the truth Kapila allowed only two means of proof—(1) perception and (2) inference.

6. 6. By perception is meant mental apprehension of a present object.

7. 7. Inference is threefold: (1) from cause to effect, as from the presence of clouds to rain ; (2) from effect to cause, as from the swelling of

the streams in the valleys to rain in the hills, and (3) by analogy, as when we infer from the fact that a man alters his place when he moves that the stars must also move, since they appear in different places.

8. 8. His next tenet related to causality—creation and its cause.

9. 9. Kapila denied the theory that there was a being who created the universe. In his view a created thing really exists beforehand in its cause just as the clay serves to form a pot, or the threads go to form a piece of cloth.

10. 10. This is the first ground on which Kapila rejected the theory that the universe was created by a being.

11. 11. But there are other grounds which he advanced in support of his point of view.

12. 12. The non-existent cannot be the subject of an activity : There is no new creation. The product is really nothing else than the material *of*, which it is composed : the product exists before its coming into being in the shape of its material of which it is composed. Only a definite product can be produced from such material ; and only a specific material can yield a specific result.

13. 13. What then is the source of the empirical universe?

14. 14. Kapila said the empirical universe consists of things evolved (Vyakta) and things that are not evolved (Avyakta).

15. 15. Individual things (Vyakta Vastu) cannot be the source of unevolved things (Avyakta Vastu).

16. 16. Individual things are all limited in magnitude and this is incompatible with the nature of the source of the universe.

17. 17. All individual things are analogous, one to another and, therefore, no one can be regarded as the final source of the other. Moreover, as they all come into being from a source, they cannot constitute that source.

18. 18. Further, argued Kapila, an effect must differ from its cause, though it must consist of the cause. That being so, the universe cannot itself be the final cause. It must be the product of some ultimate cause.

19. 19. When asked why the unevolved cannot be perceived, why does it not show movement which would make it perceivable, Kapila replied :

20. 20. "It may be due to various causes. It may be that its fine nature makes, it imperceptible, just as other things of whose existence there is no doubt, cannot be perceived ; or because of their too great a distance or

proximity ; or through the intervention of a third object, or through admixture with similar matter ; or through the presence of some more powerful sensation, or the blindness or other defect of the senses or the mind of the observer.”

21. 21. When asked :”What then is the source of the universe? What makes the difference between the evolved and unevolved part of the universe?

22. 22. Kapila's reply was: 'Things that have evolved have a cause and the things that have not evolved have also a cause. But the source of both is uncaused and independent.'

23. 23.”The things that have evolved are many in number and limited in space and name. The source is one, eternal and all-pervasive. The things evolved have activities and parts : the source is imminent in all, but has neither activities nor parts.”

24. 24. Kapila argued that the process of development of the unevolved is through the activities of three constituents of which it is made up, Sattva, Rajas and Tamas. These are called three Gunas.

25. 25. The first of the constituents, or factors, corresponds to what we call as light in nature, which reveals, which causes pleasure to men ; the second is that impels and moves, what produces activity ; the third is what is heavy and puts under restraint, what produces the state of indifference or inactivity.

26. 26. The three constituents act essentially in close relation, they overpower and support one another and intermingle with one another. They are like the constituents of a lamp, the flame, the oil and wick.

27. 27. When the three Gunas are in perfect balance, none overpowering the other, the universe appears static (Achetan) and ceases to evolve.

28. 28. When the three Gunas are not in balance, one overpowers the other, the universe becomes dynamic (sachetan) and evolution begins.

29. 29. Asked why the Gunas become unbalanced, the answer which Kapila gave was this disturbance in the balance of the three Gunas was due to the presence of Dukha (suffering).

30. 30. Such were the tenets of Kapila's philosophy.

31. 31. Of all the philosophers the Buddha was greatly impressed by the doctrines of Kapila.

32. 32. He was the only philosopher whose teachings appeared to the

Buddha to be based on logic and facts.

33. 33. But he did not accept everything which Kapila taught. Only three things did the Buddha accept from Kapila.

34. 34. He accepted that reality must rest on proof. Thinking must be based on rationalism.

35. 35. He accepted that there was no logical or factual basis for the presumption that God exists or that he created the universe.

36. 36. He accepted that there was *Dukha* (suffering) in the world.

37. 37. The rest of Kapila's teachings he just bypassed as being irrelevant for his purpose.

§ 3. *The Bramhanas*

1. 1. Next to the Vedas are the religious books known as the Bramhanas. Both were held as sacred books. Indeed the Bramhanas are a part of the Vedas. The two went together and were called by a common name *Sruti*.

2. 2. There were four theses on which the Bramhanic Philosophy rested.

3. 3. The first thesis was that the Vedas are not only sacred but that they are infallible and they are not to be questioned.

4. 4. The second thesis of the Bramhanic Philosophy was that salvation of the soul—that is escape from transmigration—can be had only by the due performance of Vedic sacrifices and observances of religious rites and ceremonies and the offering of gifts to Brahmins.

5. 5. The Brahmins had not only a theory of an ideal religion as contained in the Vedas but they also had a theory for an ideal society.

6. 6. The pattern of this ideal society they named *Chaturvarna*. It is imbedded in the Vedas and as the Vedas are infallible and as their authority cannot be questioned so also *Chaturvarna* as a pattern of society was binding and unquestionable.

7. 7. This pattern of society was based upon certain rules.

8. 8. The first rule was that society should be divided into four classes:

(1) Brahmins; (2) Kshatriyas; (3) Vaishyas; and (4) Shudras.

9. 9. The second rule was that there cannot be social equality among these four classes. They must be bound together by the rule of graded inequality.

10. 10. The Brahmins to be at the top, the Kshatriyas to be kept below the Brahmins but above the Vaishyas, the Vaishyas to be below the Kshatriyas but above the Shudras and the Shudras to be the lowest of all.

11. 11. These four classes were not to be equal to one another in the matter of rights and privileges. The rule of graded inequality governed the question of rights and privileges.

12. 12. The Brahmin had all the rights and privileges which he wished to claim. But a Kshatriya could not claim the rights and privileges which a Brahmin could. He had more rights and privileges than a Vaishya could claim. The Vaishya had more rights and privileges than a Shudra. But he could not claim the rights and privileges which a Kshatriya could. And the Shudra was not entitled to any right, much less any privilege. His privilege was to subsist without offending the three superior classes.

13. 13. The third rule of Chaturvarna related to the division of occupations. The occupation of the Brahmin was learning and teaching and the performance of religious observances. The occupations of the Kshatriya was fighting. Trade was assigned to the Vaishyas. The occupations of the Shudras was service of the three superior classes. These occupations assigned to different classes were exclusive. One class could not trespass upon the occupation of the other.

14. 14. The fourth rule of Chaturvarna related to the right to education. The pattern of Chaturvarna gave the right to education to the first three classes, the Brahmins, Kshatriyas and Vaishyas. The Shudras were denied the right to education. This rule of Chaturvarna did not deny the right to education to the Shudras only. It denied the right to education to all women including those belonging to the class of Brahmins, Kshatriyas and Vaishyas.

15. 15. There was a fifth rule. According to it, man's life was divided into four stages. The first stage was called *Bramhacharya* ; the second stage was called *Grahasashram*; the third stage was called *Vanaprasta* and the fourth stage was called *Sannyasa*.

16. 16. The object of the first stage was study and education. The object of the second stage was to live a married life. The object of the third stage was to familiarise a man with the life of a hermit, i.e., severing family ties, but without deserting his home. The object of the fourth stage was to enable a man to go in search of God and seek union with him.

17. 17. The benefits of these stages were open only to the male members of the three superior classes. The first stage was not open to the Shudras and women. Equally the last stage was not open to the Shudras and women.

18. 18. Such was the divine pattern of an ideal society called Chaturvarna. The Brahmins had idealised the rule and had realised the ideal without leaving any cracks or loopholes.

19. 19. The fourth thesis of Brahmanic Philosophy was the doctrine of Karma. It was part of the thesis of transmigration of the soul. The Karma of the Brahmins was an answer to the question: "Where did the soul land on transmigration with his new body on new birth?" The answer of the Brahmanic Philosophy was that it depended on a man's deeds in his past life. In other words, it depended on his Karma.

20. 20. The Buddha was strongly opposed to the first tenet of Brahmanism. He repudiated their thesis that the Vedas are infallible and their authority could never be questioned.

21. 21. In his opinion, nothing was infallible and nothing could be final. Everything must be open to re-examination and reconsideration whenever grounds for re-examination and reconsideration arise.

22. 22. Man must know the truth and real truth. To him freedom of thought was the most essential thing. And he was sure that freedom of thought was the only way to the discovery of truth.

23. 23. Infallibility of the Vedas meant complete denial of freedom of thought.

24. 24. For these reasons this thesis of the Brahmanic Philosophy was most obnoxious to him.

25. 25. He was equally an opponent of the second thesis of the Brahmanic Philosophy. The Buddha did admit that there was any virtue in a sacrifice. But he made a distinction between true sacrifice and false sacrifice.

26. 26. Sacrifice in the sense of self-denial for the good of others he called true sacrifice. Sacrifice in the sense of killing an animal as an offering to God for personal benefit he regarded as a false sacrifice.

27. 27. The Brahmanic sacrifices were mostly sacrifices of animals to please their gods. He condemned them as false sacrifices. He would not allow them even though they be performed with the object of getting

salvation for the soul.

28. 28. The opponents of sacrifices used to ridicule the Brahmins by saying :”If one can go to heaven by sacrificing an animal why should not one sacrifice one's own father. That would be a quicker way of going to heaven.”

29. 29. The Buddha wholeheartedly agreed with this view.

30. 30. The theory of *Chaturvarna* was as repugnant to the Buddha as the theory of sacrifices was repulsive to him.

31. 31. The organization of society set up by Brahmanism in the name of *Chaturvarna* did not appear to him a natural organization. *Its* class composition was compulsory and arbitrary. It was a society made to order. He preferred an open society and a free society.

32. 32. The *Chaturvarna* of the Brahmins was a fixed order never to be changed. Once a Brahmin always a Brahmin. Once a Kshatriya always a Kshatriya, once a Vaishya always a Vaishya and once a Shudra always a Shudra. Society was based on status conferred upon an individual by the accident of his birth. Vice, however heinous, was no ground for degrading a man from his status, and virtue, however great, had no value to raise him above it. There was no room for worth nor for growth.

33. 33. Inequality exists in every society. But it was different with Brahmanism. The inequality preached by Brahmins was its official doctrine. It was not a mere growth. Brahmanism did not believe in equality. In fact, it was opposed to equality.

34. 34. Brahmanism was not content with inequality. The soul of Brahmanism lay in graded inequality.

35. 35. Far from producing harmony, graded inequality, the Buddha thought, might produce in society an ascending scale of hatred and a descending scale of contempt, and might be a source of perpetual conflict.

36. 36. The occupations of the four classes were also fixed. There was no freedom of choice. Besides, they were fixed not in accordance with skill but in accordance with birth.

37. 37. On a careful review of the rules of *Chatur-varna* the Buddha had no difficulty in coming to the conclusion that the philosophic foundations on which the social order was reared by Brahmanism were wrong if not selfish.

38. 38. It was clear to him that it did not serve the interests of all, much

less did it advance the welfare of all. Indeed, it was deliberately designed to make many serve the interests of the few. In it man was made to serve a class of self-styled supermen.

39. 39. It was calculated to suppress and exploit the weak and to keep them in a state of complete subjugation.

40. 40. The law of Karma as formulated by the Brahmins, thought the Buddha, was calculated to sap the spirit of revolt completely. No one was responsible for the suffering of man except he himself. Revolt could not alter the state of suffering ; for suffering was fixed by his past Karma as his lot in this life.

41. 41. The Shudras and women—the two classes whose humanity was most mutilated by Brahmanism, had no power to rebel against the system.

42. 42. They were denied the right to knowledge with the result that by reason of their enforced ignorance they could not realize what had made their condition so degraded. They could not know that Brahmanism had robbed them completely of the significance of their life. Instead of rebelling against Brahmanism they had become the devotees and upholders of Brahmanism.

43. 43. The right to bear arms is the ultimate means of achieving freedom which a human being has. But the Shudras were denied the right to bear arms.

44. 44. Under Brahmanism the Shudras were left as helpless victims of a conspiracy of selfish Brahmanism, powerful and deadly Kshatriyas and wealthy Vaishyas.

45. 45. Could it be amended? Knowing that it was a divinely ordained social order, he knew that it could not be. It could only be ended.

46. 46. For these reasons the Buddha rejected Brahmanism as being opposed to the true way of life.

§4. *The Upanishads and Their Teachings*

1. 1. The Upanishads constituted another piece of literature. It is not part of the Vedas. It is uneconomical.

2. 2. All the same they did form a part of religious literature.

3. 3. The number of the Upanishads is quite large. Some important, some quite unimportant.

4. 4. Some of them were ranged against the Vedic theologians, the Brahmin priests.
5. 5. All of them agreed in viewing Vedic study as a study of nescience or ignorance (*avidya*).
6. 6. They were all agreed in their estimate of the four Vedas and the Vedic science as the lower knowledge.
7. 7. They were all agreed in questioning the divine origin of the Vedas.
8. 8. They were all agreed in denying the efficacy attributed to sacrifices, to the funeral oblations, and the gifts to the priests which are the fundamentals of the Brahmanic philosophy.
9. 9. This, however, was not the main topic with which the Upanishads were concerned. Their discussions centred round Brahman and Atman.
10. 10. Brahman was the all-pervading principle which binds the universe and that salvation lay in the Atman realizing that it is Brahman. II. The main thesis of the Upanishads was that *Brahmana* was a reality and that *Atmana* was the same as *Brahmana*. The *Atmana* did not realize that it was *Brahman* because of the *Upadhis* in which it was entangled.
11. 12. The question was: Is *Brahmana* a reality? The acceptance of the Upanishadic thesis depended upon the answer to this question.
12. 13. The Buddha could find no proof in support of the thesis that *Brahmana* was a reality. He, therefore, rejected the thesis of the Upanishads.
13. 14. It is not that questions on this issue were not put to the authors of the Upanishads. They were :
14. 15. Such questions were put to no less a person than Yajnavalkya, a great *seer* who plays so important a part in the *Brahadarnyaka* Upanishad.
15. 16. He was asked: "What is *Brahmana*? What is *Atmana*?" All that Yajnavalkya could say : "Neti ! Neti ! I know not ! I know not !"
16. 17. "How can anything be a reality about which no one knows anything," asked the Buddha. He had, therefore, no difficulty in rejecting the Upanishadic thesis as being based on pure imagination.

PART VI : THE BUDDHA AND HIS CONTEMPORARIES

1. 1. His Contemporaries.
2. 2. His attitude to His Contemporaries.

§ 1. *His Contemporaries*

1. 1. At the time when Gautama took Parivraja there was a great intellectual ferment in the country. Besides the Brahmanic Philosophy there were as many as sixty-two different schools of philosophy, all opposed to the Brahmanic Philosophy. Of them at least six were worthy of attention.

2. 2. Of these schools of philosophy there was one headed by *Purana Kassappa*. His doctrine was known as *Akriyavada*. He maintained that the soul was not affected in any way by *Karma*. One may do, or one may get things done. One may do injury or one may get someone to kill. One may commit theft or dacoity or one may get theft or dacoity committed, one may commit adultery or one may get adultery committed, one may tell a lie or one may get a lie told. Nothing affects the soul. An act, however licentious, does not affect the soul with sin. An act, however good, does not bring merit to the soul. Nothing has any *Kriya* (result) on the soul. When a person dies, all the elements of which he is made join in their originals. Nothing survives after death, neither body nor soul.

3. 3. Another school of thought was known as *Niyativada*. Its chief propounder was *Makbali Ghosal*. His doctrine was a kind of fatalism or determinism. He taught that no one can do anything or undo anything. Things happen. No one can make them happen. No one can remove unhappiness, increase it or diminish it. One must undergo one's share of the experiences of the world.

4. 4. The third school was known as *Ucchedavada*. Its chief propounder was *Ajit Kesakambal*. His doctrine was a kind of *Annihilism*. He taught that there was nothing in *Yajna, Haom*; there is no such thing as the fruits or effects of deeds to be enjoyed or suffered by the soul. There is neither heaven nor hell. Man is made up of certain elements of unhappiness in the world. The soul cannot escape it. Whatever sorrow or unhappiness there was in the world the soul cannot escape. This sorrow or unhappiness will come to an end automatically. The soul must undergo rebirth during eighty-four lakhs of cycles of Mahakalpas. Then only the sorrow and unhappiness of the soul will end, not before nor by any other means.

5. 5. The fourth school was known as *Annyonyavad*. The head of this

school was *Pakudha Kacchayana*. He preached that there are seven elements which go to make up a being, namely, Prathvi, Apa, Tej, Vayu, Sukha, Dukha and the Soul. Each is independent of the other ; one does not affect the other. They are self-existent and they are eternal. Nothing can destroy them. If any one chops off the head of man he does not kill him. All that happens is that the weapon has entered the seven elements.

6. *Sanjaya Belaputta* had his own school of philosophy. It was known as *Vikshepavada*, a kind of scepticism. He argued, "if anyone asked me is there heaven, if I feel there was I would say yes. But if I feel there was no heaven I would say no. If I am asked whether human beings are created, whether man has to suffer the fruits of his action whether good

or bad, and whether the soul lives after death, I say nay to all these because I don't think they exist. This is how Sanjaya Belaputta summed up his doctrine.

6. 7. The sixth school of philosophy was known as *Chaturyamsamvarvad*. The head of this school who was alive at the time when Gautama was searching for light was *Mahavir*, who was also called *Nigantha Nathaputta*. Mahavir taught that the soul had to undergo rebirth because of the bad karmas done in the past life and in the present life. One must therefore get over the bad, he suggested, by *tapascharya*. For preventing the doing of bad karmas in this life Mahavira prescribed the observance of chaturyama dharma, i.e., observance of four rules : (1) not to kill ; (2) not to steal ; (3) not to tell a lie ; and (4) not to have property and to observe celibacy.

§ 2. His Attitude to His Contemporaries

1. 1. The Buddha did not accept the teachings of the new philosophers.
2. 2. His rejection of their teaching was not without reasons. He said that :
3. 3. If the doctrines of *Purana Kassyappa* or *Pakudha Kacchayana* were true then one can do any evil or any harm ; one may even go to the length of killing another without involving any social responsibility or social consequences.
4. 4. If the doctrine of *Makhali Ghosal* is true then man becomes the slave of destiny. He cannot liberate himself.

5. 5. If the doctrine of *Ajit Kesakambal* is true then all that man has to do is to eat, drink and make merry.
6. 6. If the doctrine of *Sanjaya Betaputta* was true then man must float about and live without a positive philosophy of life.
7. 7. If the doctrine of *Nigantha Nathaputta* was true then man's life must be subjected to Asceticism and Tapascharya, a complete subjugation and uprooting of man's instincts and desires.
8. 8. Thus, none of the paths of life suggested by the philosophers appealed to the Buddha. He thought they were the thoughts of men who had become hopeless, helpless and reckless. He therefore decided to seek light elsewhere.

PART VII : COMPARISON AND CONTRAST

1. 1. What HE Rejected.
2. 2. What HE Modified.
3. 3. What HE Accepted.

§ 1. *What HE Rejected*

1. 1. This survey of the philosophical and religious thought shows that at the time when the Buddha formulated his Sasana, certain ideas had a firm grip on the mind of the people. They were : (i) Belief in the infallibility of the Vedas ; (ii) Belief in Moksha or Salvation of the soul, i.e., its ceasing to be born again ; (iii) Belief in the efficacy of rites, ceremonies and sacrifices as means of obtaining moksha; (iv) Belief in Chaturvarna as the ideal for social organization; (v) Belief in Iswara as the creator of and in Brahmana as the principle underlying the universe. (vi) Belief in Atmana, or the soul. (vii) Belief in *Sansara*, (wandering together), i.e., transmigration of the soul. (viii) Belief in Karma, i.e., the determination of man's position in present life by deeds done by him in his past life.
2. 2. In formulating the principles of his Sasana the Buddha dealt with this old stock of ideas in his own way.
3. 3. The following are the ideas which he rejected : (i) He condemned indulging in speculation as to the whence, whither and what am I? (ii) He discarded heresies about the soul and refrained from identifying it with

either the body, sensations, volitions and consciousness.

- (iii) He discarded all the Nihilistic views which were promulgated by certain religious teachers. (iv) He condemned such views as were held by heretics. (v) He discarded the theory that the cosmic progress had a known beginning. (vi) He repudiated the theory that a God created man or that he came out of the body of some Bramha. (vii) The existence of the soul he either ignored or denied.

§ 2. *What HE Modified*

- (i) He accepted the great grand law of cause and effect with its corollaries.
 - (ii) He repudiated the fatalistic view of life and other equally foolish view that a God predestined as to what should happen for man and the world. (iii) He discarded the theory that all deeds committed in some former birth have the potency to produce suffering, making present activity impotent. He denied the fatalistic view of Karma. He replaced the view of Karma by a much more scientific view of Karma. He put new wine in old bottle. (iv) Transmigration (sansara) was replaced by the doctrine of re-birth. (v) He replaced the doctrine of moksha or salvation of the soul by the doctrine of Nibbana.
5. The Buddha Sasana is thus an original piece. The little in it which is old is either modified or restated.

§3. *What HE Accepted*

1. 1. The first distinguishing feature of his teachings lay in the recognition of the mind as the centre of everything.
2. 2. Mind precedes things, dominates them, creates them. If mind is comprehended all things are comprehended.
3. 3. Mind is the leader of all its faculties. Mind is the chief of all its faculties. The very mind is made up of those faculties.
4. 4. The first thing to attend to is the culture of the mind.
5. 5. The second distinguishing feature of his teachings is that mind is the fount of all the good and evil that arises within and befalls us from without.

6. 6. Whatsoever there is of evil, connected with evil, belonging to evil—that issues from the mind. Whatsoever there is of good, connected with good, belonging to good—all issues from mind.
7. 7. If one speaks or acts with a pounded mind then affliction follows him as the wheels of the cart follow the feet of the bullocks who pull the cart. The cleaning of the mind is, therefore, the essence of religion¹
8. 8. The third distinguishing feature of his teachings is the avoidance of all sinful acts.
9. 9. The fourth distinguishing feature of his teaching is that real religion lies not in the books of religion but in the observance of the tenets of the religion.
10. 10. Can anyone say that the Buddha's religion was not his own creation?

BOOK TWO: CAMPAIGN OF CONVERSION

- *Part I — Buddha and His Vishad Yoga*
- *Part II — The Conversion of the Parivrajakas*
- *Part III — Conversion of the High and the Holy*
- *Part IV — Call from Home*
- *Part V — Campaign for Conversion Resumed*
- *Part VI — Conversion of the Low and the Lowly*
- *Part VII — Conversion of Women*
- *Part VIII — Conversion of the Fallen and the Criminals*

PART I : BUDDHA AND HIS VISHAD YOGA

1. 1. To preach or not to preach.
2. 2. Proclamation of good news by Bramha Sahampati.
3. **3. Two types of conversion.**

1. To Preach or Not to Preach

1. 1. After having attained enlightenment and after having formulated his way, doubt arose in the mind of the Buddha. Should he go forth and preach his doctrine or should he continue to devote himself to his own

personal perfection.

2. 2. He said to himself: "True, I have gained a new doctrine. But it is too difficult for the common man to accept it and follow it. It is too subtle even for the wise.

3. 3. "It is hard for mankind to liberate itself from the entanglement of God and Soul. It is hard for mankind to give up its belief in rites and ceremonies. It is hard for mankind to give up its belief in Karma.

4. 4. "It is hard for mankind to give up its belief in the immortality of the Soul and accept my doctrine that the Soul as an independent entity does not exist and does not survive after death.

5. 5. "Mankind is intent on its selfishness and takes delight and pleasure in it. It is hard for mankind to accept my doctrine of righteousness overriding selfishness.

6. 6. "If I were to teach my doctrine, and others did not understand it or understanding it did not accept or accepting it did not follow it, it would be weariness to others and a vexation to me.

7. 7. "Whynot remain a sanyasi away from the world and use my gospel to perfect my own self?" He asked himself. "At least I can do good to myself."

8. 8. Thus as he reflected, his mind turned to inaction, not to teaching of the gospel.

9. 9. Then Brahma Sahampati knowing what was passing in the mind of the Buddha thought, "Verily the world is being destroyed, verily the world is going to destruction, if the Tathagata, the fully enlightened, turns to inaction and not to teaching his doctrine." 10. Filled with anxiety Brahma Sahampati left the Brahma world and appeared before the Buddha. And arranging his upper robe on one shoulder he bent down and with clasped hands said: "Thou art no longer Siddharth Gautama, Thou art Buddha. Thou art the Blessed One who is blessed with the fullest enlightenment. Thou art the Tathagatha. How can thou refuse to enlighten the world? How can thou refuse to save erring humanity?"

1. 11. "There are beings full of impurity that are falling away through not hearing the doctrine.

2. 12. "As the Lord knows," proceeded Brahma Sahampati, "Among the Magadhas arose in ancient times, doctrine impure, with many blemishes

devised.

3. 13."Will not the Lord open for them the door of his immortal doctrine?"

4. 14."As one upon a rocky mountain standing, beholdeth all the people round about him even thus, O thou, with wisdom distilled, ascending all, behold, look down, thou griefless one, upon those plunged in their griefs.

5. 15."Rise up, O hero, victor in battle, O caravan-leader, free from the debt of birth, go to the world and not turn away from it.

6. 16."May the Lord in his compassion design to teach his gospel to men and to *gods*"

7. 17."O Brahma, Eminent and Excellent among men, if I did not give public utterance to my gospel, it is because I perceived vexation," was the reply of the Buddha.

8. 18. Knowing that there was so much unhappiness in the world the Buddha realised that it was wrong for him to sit as a sanyasi with folded arms and allow things to remain as they were.

9. 19. Asceticism he found to be useless. It was vain to attempt to escape from the world. There is no escape from the world even for an ascetic. He realised that what is necessary is not escape from the world. What is necessary is to change the world and to make it better.

10. 20. He realised that he left the world because there was so much conflict resulting in misery and unhappiness and for which he knew no remedy. If he can banish misery and unhappiness from the world by the propagation of his doctrine, it was his duty to return to the world and serve it and not sit silent as the personification of inactive impassivity

11. 21. The Buddha therefore agreed to the request of Brahma Sahampati and decided to preach his doctrine to the world.

§ 2. *Proclamation of Good News by Brahma Sahampati*

1. 1. Then, Brahma Sahampati, thinking, "I have been instrumental in persuading the Buddha to agree to preach his doctrine to the masses," felt extremely happy. He saluted the Buddha, went round him passing to the right, took a look and departed.

2. 2. On his way back he kept on proclaiming to the world: "Rejoice at the glad tidings. The Buddha, our Lord, has found the root of all evil and

unhappiness in the world. He knows the way out.

3. 3."The Buddha will bring comfort to the weary and sorrow-laden. He will give peace to those stricken by war. He will give courage to those who are broken in heart. He will give to those who are suppressed and oppressed, faith and hope.

4. 4."Ye that suffer from the tribulations of life, ye that have to struggle and endure, ye that yearn for justice, rejoice at the glad tidings.

5. 5."Heal your wounds, ye that are wounded. Eat your fill, ye that are hungry. Rest, ye that are weary, and quench your thirst, ye that are thirsty. Seek the light, ye that are in darkness. Be of good cheer, ye that are forlorn.

6. 6."In his doctrine there is love to create a longing to own those who are disowned or unowned: to the degraded there is the ennoblement ever present to raise them: to the disinherited and the downtrodden there is equality blazing forth their path to advancement.

7. 7."His doctrine is the doctrine of righteousness and his aim is to establish the kingdom of righteousness on earth.

8. 8."His doctrine is the truth, the whole truth, and nothing but the truth.

9. 9."Blessed is the Buddha for his is the path of reason and his is the way of emancipation from superstition. Blessed is the Buddha who teaches the middle way. Blessed is the Buddha who teaches the law of righteousness. Blessed is the Buddha who teaches the peace of Nibbana. Blessed is the Buddha who preaches love, kindness and fellowship to help fellow beings to obtain salvation."

§ 3. *Two Types of Conversion*

1. 1. In the Buddha's scheme of things conversion has two meanings.

2. 2. Conversion to the Order of Bhikkus called Sangh.

3. 3. Secondly, it means conversion of a householder as an Upasaka or lay follower of the Buddha's Dhamma.

4. 4. Except on four points there is no difference in the way of life of the Bhikku and the Upasaka.

5. 5. An Upasaka remains a householder. A Bhikku becomes a homeless wanderer.

6. 6. Both the Upasakas and the Bhikkus must observe in their life

certain rules.

7. 7. Here again to the Bhikku they are vows the breach of which ends in punishment. To the Upasaka they are precepts. They must be observed to the best of his ability.

8. 8. An Upasaka can have property. A Bhikku cannot have.

9. 9. To become an Upasaka there is no ceremony.

10. 10. To become a Bhikku he must undergo a ceremony called Upasampada.

11. The Buddha converted those who came to him according to their wish either as Bhikku or as Upasaka.

1. 12. An Upasaka could become a Bhikku whenever he felt like it.

2. 13. And a Bhikku had to cease to be a Bhikku when he committed a breach of the major vows or whenever he wished to give up his membership of the Order.

3. 14. It must not be understood that the Buddha converted only those whose names occur in the following pages.

4. 15. The instances are chosen only to show that he did not observe any distinction as to caste or sex in admitting persons to his Sangh or preaching his Dhamma.

PART II: THE CONVERSION OF THE PARIVRAJAKAS

1. 1. Arrival at Sarnath.

2. 2. The Buddha's First Sermon.

3. 3. The Buddha's First Sermon (continued).

4. 4. The Buddha's First Sermon (continued).

5. 5. The Buddha's First Sermon (continued).

6. 6. The Buddha's First Sermon (concluded).

7. 7. The Response of the Parivrajakas.

§ 1. *Arrival at Sarnath*

1. 1. Having decided to preach his doctrine the Buddha asked himself "to whom shall I first teach the doctrine?" The thought of Alara Kalam whom the Buddha adored as the learned, wise, intelligent and of

little impurity ;”What if I first teach him the doctrine?”But he was told that Alara Kalam was dead.

2. 2. Then thought he of preaching it to Uddaka Ramputta. But he too was dead.

3. 3. Then he thought of the five old companions of his who were with him at Niranjana when he was practising austerities and who had left him in anger on his abandonment of austerities.

4. 4.”They did much for me, attended me and looked after me, what if I first teach the doctrine to them?”said he to himself.

5. 5.”He asked for their whereabouts. Having learnt that they were dwelling at Sarnath in the deer park of Isipatana, he left in search of them.

6. 6. The five, seeing him coming, decided among themselves not to welcome him. Said one of them,”This, friends, is the ascetic Gautama coming, who has abandoned austerities and has turned to life of abundance and luxury. He has committed a sin. We must not therefore greet him, nor rise in respect, nor take his bowl and robe. We will only set apart a seat for him. If he wishes, he may sit down.”And they all agreed.

7. 7. But when the Buddha approached, the five Parivrajakas were not able to abide by their decision, so greatly impressed were they by his personality that they all rose in their seats. One took his bowl, one took his robe, and one prepared a seat, and one brought water to wash his feet.

8. 8. It was really a great welcome to an unwelcome guest.

9. 9. Thus those who intended to scoff remained to pray.

§ 2. *The Buddha's First Sermon*

1. 1. After exchange of greetings the five Pariv-rajakas asked the Buddha whether he still believed in asceticism. The Buddha replied in the negative.

2. 2. He said there were two extremes, a life of pleasure and a life of self-mortification.

3. 3. One says let us eat and drink, for tomorrow we die. The other says, kill all *vasanas* (desires) because they bring rebirth. He rejected both as unbecoming to man.

4. 4. He was a believer in the Madhyama Marga (Majjhima Patipada), the middle path, which is neither the path of pleasure nor the path of self-

mortification.

5. 5."Answer me this,"he said to the Parivrajakas,"So long as your self remains active and continues to lust after either worldly or heavenly pleasures, is not all mortification vain?"And they answered,"It is as thou sayest."

6. 6."How can ye be free from self by leading a wretched life of self-mortification if ye do not thereby succeed in quenching the fires of lust?"And they replied,"It is as thou sayest."

7. 7."Only when the self in ye has been conquered that ye are free from lust ; ye will then not desire worldly pleasures, and the satisfaction of your natural wants will not defile ye. Let ye eat and drink according to the needs of your body.

8. 8."Sensuality of all kinds is enervating. The sensual man is a slave of his passion. All pleasure-seeking is degrading and vulgar. But I say unto you that to satisfy the needs of life is not an evil : to keep the body in good health is a duty, or otherwise you shall not be able to keep your mind strong and clear and have the lamp of wisdom burning.

9. 9."Know ye, O Parivrajakas, that there are these two extremes which man ought not to follow—the habitual indulgence on the one hand, of those things whose attraction depends upon the passions, and especially of sensuality—a low and pagan way of seeking satisfaction, unworthy, unprofitable and the habitual practice thereof, and on the other hand, of asceticism or self-mortification, which is painful, unworthy and unprofitable.

10. 10."There is a middle path which avoids both these extremes. Know ye, that, this is the path which I preach."

11. 11. The five Parivrajakas listened to him with attention. Not knowing what to say in reply to the Buddha's middle path, they asked him what he was doing after they had left him. Then the Buddha told them how he left for Gaya, how he sat in contemplation under the Banyan Tree and how after four weeks of contemplation he obtained enlightenment as a result of which he was able to discover a new path of life.

12. 12. On hearing this, the Parivrajakas became extremely impatient to know what the path was and requested the Buddha to expound it to them.

13. 13. The Buddha agreed.

14. 14. He began by saying that his path which is his Dhamma (religion)

had nothing to do with God and Soul. His Dhamma had nothing to do with life after death. Nor has his Dhamma any concern with rituals and ceremonies.

15. 15. The centre of his Dhamma is man and the relation of man to man in his life on earth.

16. 16. This he said was his first postulate.

17. 17. His second postulate was that men are living in sorrow, in misery and poverty. The world is full of suffering and that how to remove this suffering from the world is the only purpose of Dhamma. Nothing else is Dhamma.

18. 18. The recognition of the existence of suffering and to show the way to remove suffering is the foundation and basis of his Dhamma.

19. 19. This can be the only foundation and justification for Dhamma. A religion which fails to recognise this is no religion at all.

20. 20. "Verily, Parivrajakas! whatsoever recluses or Brahmins (i.e., preachers of religion) understand not, as it really is, that the misery in the world and the escape therefrom, is the main problem of Dhamma, such recluses and Brahmins in my opinion are not to be regarded as recluses and Brahmins ; nor have those worthies come to know fully of themselves what in this very life is the real meaning of Dhamma."

21. 21. The Parivrajakas then asked him : "If the foundation of your Dhamma is the recognition of the existence of suffering and the removal of suffering, tell us how does your Dhamma remove suffering !"

22. 22. The Buddha then told them that according to his Dhamma if every person followed (1) the Path of Purity ; (2) the Path of Righteousness ; and (3) the Path of Virtue, it would bring about the end of all suffering.

23. 23. And he added that he had discovered such a Dhamma.

§ 3. *The Buddha's First Sermon—(contd.) The Path of Purity*

1. 1. The Parivrajakas then asked the Buddha to explain to them his Dhamma.

2. 2. And the Buddha was pleased to do so.

3. 3. He addressed them first on the Path of Purity.

4. 4. "The Path of Purity," he told the Parivrajakas, "teaches that a person who wishes to be good must recognise some principles as principles of life.

5. 5."According to my Path of Purity the principles of life recognised by it are : Not to injure or kill : Not to steal or appropriate to oneself anything which belongs to another : Not to speak untruth : Not to indulge in lust : Not to indulge in intoxicating drinks.

6. 6."The recognition of these principles, I say, is most essential for every man. For every man must have a standard by which to judge whatever he does. And these principles according to my teachings constitute the standard.

7. 7."There are everywhere people who are *patit* (fallen). But there are two classes of the *patit* : the *patit* who has a standard and a *patit* who has no standard.

8. 8."The *path* who has no standard does not know that he has fallen. Consequently he always remains fallen. On the other hand a *patit* who has a standard tries to rise from his fallen state. Why? The answer is because he knows that he has fallen

9. 9."This is the difference between having a standard and having no standard for regulating a man's life. What matters is not so much the fall of the man but the absence of any standard.

10. 10."You may ask, ye Parivrajakas ! Why are these principles worthy of recognition as a standard of life.

11. 11."The answer to this question you will find for yourselves, if you ask : "Are these principles good for the individual?" also if you ask : "Do they promote social good?"

12. 12."If your answers to these questions are in the affirmative then it follows that the principles of my Path of Purity are worthy of recognition as forming a true standard of life."

§ 4. *The Buddha's First Sermon—{contd.} Ashtanga Marga or the Path of Righteousness*

1. 1. The Buddha next addressed the Parivrajakas on the Ashtangamarga. He said that there are eight constituents in the Ashtangamarga.

2. 2. He began his discourse with the exposition of *Samma Ditti* (Right Views), the first and foremost element in the *Ashtangmarga*,

3. 3."To realise the importance of *Samma Ditti*," the Buddha said to the

arivrajakas:

4. 4."O, ye, Parivrajakas, you must realise that the world is a dungeon and man is a prisoner in the dungeon.
5. 5."This dungeon is full of darkness. So dark is it that scarce anything at all can rightly be seen by the prisoner. The prisoner cannot see that he is a prisoner.
6. 6."Indeed, man has not only become blind by living too long in the darkness, but he very much doubts if any such strange thing as light is said to be, can ever exist at all.
7. 7."Mind is the only instrument through which light can come to man.
8. 8."But the mind of these dungeon-dwellers is by no means a perfect instrument for the purpose.
9. 9."It lets through only a little light, just enough to show to those with sight that there is such a thing as darkness.
10. 10."Thus defective in its nature, such understanding as this is.
11. 11."But know, ye, Parivrajakas! the case of the prisoner is not as hopeless as it appears.
12. 12."For there is in man a thing called will. When the appropriate motives arise the will can be awakened and set in motion.
13. 13."With the coming of just enough light to see in what directions to guide the motions of the will, man may so guide them that they shall lead to liberty.
14. 14."Thus though man is bound, yet he may be free ; he may at any moment begin to take the first steps that will ultimately bring him to freedom.
15. 15."This is because it is possible to train the mind in whatever directions one chooses. It is mind that makes us to be prisoners in the house of life, and it is mind that keeps us so.
16. 16."But what mind has done, that mind can undo. If it has brought man to thralldom, it can also, when rightly directed, bring him to liberty.
17. 17."This is what *Samma Ditti* can do."
18. 18."What is the end of *Samma Ditti*?"asked the Parivrajakas."The end of *Samma Ditti*,"replied the Buddha,"is the destruction of Avijja (Nescience). It is opposed to Miccha Ditti.
19. 19."And Avijja means the failure to understand the noble truths, of the existence of suffering and the removal of suffering.

20. 20." *Samma Ditti* requires giving up of belief in the efficacy of rites and ceremonies, to have disbelief in the sanctity of the Shasras.

21. 21." *Samma Ditti* requires the abandonment of superstition and supernaturalism.

22. 22." *Samma Ditti* requires the abandonment of all doctrines which are mere speculations without any basis in fact or experience

23. 23." *Samma Ditti* requires free mind and free thought.

24. 24." Every man has aims, aspirations and ambitions. *Samma Sankappo* teaches that such aims, aspirations and ambitions shall be noble and praiseworthy and not ignoble and unworthy. 25." *Samma Vacca* (Right Speech) teaches:

.(1) that one should speak only that which is true;

.(2) that one should not speak what is false ; (3) that one should not speak evil of others ; (4) that one should refrain from slander ; (5) that one should not use angry and abusive language towards any fellow man; (6) that one should speak kindly and courteously to all ; (7) that one should not indulge in pointless, foolish talk, but let his speech be sensible and to the purpose.

1. 26." The observance of Right Speech, as I have explained, is not to be the result of fear or favour. It is not to have the slightest reference to what any superior being may think of his action or to any loss which Right Speech may involve.

2. 27." The norm for Right Speech is not the order of the superior or the personal benefit to the individual.

3. 28." *Samma Kamanto* teaches right behaviour. It teaches that every action should be founded on respect for the feelings and rights of others.

4. 29." What is the norm for *Samma Kamanto*? The norm is that course of conduct which is most in harmony with the fundamental laws of existence.

5. 30." When his actions are in harmony with these laws they may be taken to be in accord with

Samma Kamanto.

1. 31." Every individual has to earn his livelihood. But there are ways and ways of earning one's livelihood. Some are bad ; some are good. Bad

ways are those which cause injury or injustice to others. Good ways are those by which the individual earns his livelihood without causing injury or injustice to others. This is *Samma Ajivo*.

2. 32." *Samma Vyayamo* (Right Endeavour) is primary endeavour to remove Avijja ; to reach the door that leads out of this painful prison house, to swing it open.
3. 33." Right endeavour has four purposes.
4. 34." One is to prevent states of mind which are in conflict with the Ashtangamarga.
5. 35." Second is to suppress such states of mind which may already have arisen.
6. 36." Third is to bring into existence states of mind which will help a man to fulfil the requirements of the Ashtangamarga.
7. 37." Fourth is to promote the further growth and increase of such states of mind as already may have arisen.
8. 38." *Samma Satti* calls for mindfulness and thoughtfulness. It means constant wakefulness of the mind. Watch and ward by the mind over the evil passions is another name for *Samma Satti*.
9. 39." There are, ye Parivrajakas, five fetters or hindrances which come in the way of a person trying to achieve *Samma Ditti*, *Samma Sankappo*, *Samma Vacca*, *Samma Kamanto*, *Samma Ajeevo*, *Samma Vyayamo* and *Samma Satti*.
10. 40." These five hindrances are covetousness, ill-will, sloth and torpor, doubt and indecision. It is, therefore, necessary to overcome these hindrances which are really fetters and the means to overcome them is through *Samadhi*. But know ye Parivrajakas, *Samma Samadhi* is not the same as *Samadhi*, It is quite different.
11. 41." *Samadhi* is mere concentration. No doubt it leads to Dhyanic states which are self-induced, holding the five hindrances in suspense.
12. 42." But these Dhyana states are temporary. Consequently the suspension of the hindrances is also temporary. What is necessary is a permanent turn to the mind. Such a permanent turn can be achieved only by *Samma Samadhi*.
13. 43." Mere *Samadhi* is negative inasmuch as it leads to temporary suspension of the hindrances. In it there is no training to the mind. *Samma Samadhi* is positive. It trains the mind to concentrate and to think of some

Kusala Kamma (Good Deeds and Thoughts) during concentration and thereby eliminate the tendency of the mind to be drawn towards *Akusala Kamma* (Bad Deeds and Bad Thoughts) arising from the hindrances.

14. 44." *Samma Samadhi* gives a habit to the mind to think of good and always to think of good. *Samma Samadhi* gives the mind the necessary motive power to do good."

§ 5. *The Buddha's First Sermon— (contd.) The Path of Virtue*

1. 1. The Buddha then explained to the Pariv-rajakas the Path of Virtue.

2. 2. He told them that the path of virtue meant the observance of the virtues called : (1) *Sila*; (2) *Dana*; (3) *Uppekkha*; (4) *Nekkhamma*; (5) *Virya*; (6) *Khanti*; (7) *Succa*; (8) *Adhithana* ; (9) *Karuna* ; and (10) *Maitri*

3. 3. The Parivrajakas asked the Buddha to tell them what these virtues meant.

4. 4. The Buddha then proceeded to satisfy their desire.

5. 5." *Sila* is moral temperament, the disposition not to do evil and the disposition to do good ; to be ashamed of doing wrong. To avoid to do evil for fear of punishment is *Sila*, *Sila* means fear of doing wrong.

6. 6." *Nekkhamma* is renunciation of the pleasures of the world.

7. 7." *Dana* means the giving of one's possessions, blood and limbs and even one's life, for the good of others without expecting anything in return.

8." *Virya* is right endeavour. It is doing with all

your might whatever you have undertaken to do with never a thought of turning back, whatever you have undertaken to do.

1. 9." *Khanti* is forbearance. Not to meet hatred by hatred is the essence of it. For hatred is not appeased by hatred. It is appeased only by forbearance.

2. 10." *Succa* is truth. A person must never tell a lie. His speech must be truth and nothing but truth.

3. 11." *Adhithana* is resolute determination to reach the goal.

4. 12." *Karuna* is loving kindness to human beings.

5. 13." *Maitri* is extending fellow feeling to all beings, not only to one who is a friend but also to one who is a foe : not only to man but to all

living beings.

6. 14."Uppekka is detachment as distinguished from indifference. It is a state of mind where there is neither like nor dislike. Remaining unmoved by the result and yet engaged in the pursuit of it.

7. 15."These virtues one must practice to his utmost capacity. That is why they are called Paramitas (States of Perfection).

§ 6. *The Buddha's First Sermon—(concl'd.)*

1. 1. Having explained His Dhamma and what it involved, the Buddha then asked the Parivrajakas:

2. 2."Is not personal purity the foundation of good in the world?" And they answered,"It is as thou sayest."

3. 3. And he continued : "Is not personal purity undermined by covetousness, passion, ignorance, the destruction of life, theft, adultery and lying? Is it not necessary for personal purity to build up sufficient strength of character so that these evils should be kept under control? How can a man be the instrument of good if he has no personal purity in him?" And they replied,"It is as thou sayest."

4. 4."Again why do men not mind enslaving or dominating others? Why do men not mind making the lives of others unhappy? Is it not because men are not righteous in their conduct towards one another?" And they answered in the affirmative.

5. 5."Will not the practice of the Ashtanga Marga, the path of right views, right aims, right speech, right livelihood, right means, right mindfulness, right perseverance, and right contemplation, in short, the Path of Righteousness, if followed by every one, remove all injustice and inhumanity that man does to man?" And they said,"Yes."

6. 6. Turning to the path of virtue, he asked,"Is not Dana necessary to remove the suffering of the needy and the poor and to promote general good? Is not Karuna necessary to be drawn to the relief of poverty and suffering wherever it exists? Is not Nekkamma necessary to selfless work? Is not Uppekka necessary for sustained endeavour even though there is no personal gain?"

7. 7."Is not love for man necessary?" And they said" Yes."

8."I go further and say,"Love is not enough ; what is required is

Maitri."It is wider than love. It means fellowship not merely with human beings but with all living beings. It is not confined to human beings. Is not such Maitri necessary? What else can give to all living beings the same

happiness which one seeks for one's own self, to keep the mind impartial, open to all, with affection for every one and hatred for none?"

8. 9. They all said "Yes."

9. 10. "The practice of these virtues must, however, be accompanied by Prajna, *i.e.*, intelligence.

10. 11. "Is not Prajna necessary?" The Pariv-rajakas gave no answer. To force them to answer his question the Buddha went on to say that the qualities of a good man are : "do no evil, think nothing that is *evil*, get his livelihood in no evil way and say nothing. that is evil or is likely to hurt anyone." And they said, "Yes, so it is."

11. 12. "But is doing good deeds blindly to be welcomed?" asked the Buddha "I say, 'no.' This is not enough," said the Buddha to the Pariv-rajakas. "If it was enough," said the Buddha to the Parivrajakas, "then a tiny babe could be proclaimed to be always doing good. For as yet, the babe does not know what a body means, much less will it do evil with its body beyond kicking about : it does not know what speech is, much less will it say anything evil beyond crying ; it does not know what thought is, beyond crying with delight ; it does not know what livelihood is, much less will it get its living in an evil way, beyond sucking its mother.

12. 13. "The Path of Virtue must, therefore, be subject to test of Prajna which is another name for understanding and intelligence.

13. 14. "There is also another reason why Prajna-paramita is so important and so necessary. There must be Dana. But without Prajna, Dana may have a demoralizing effect. There must be Karuna. But without Prajna, Karuna may end in supporting evil. Every act of Paramita must be tested by Prajna Paramita which is another name for wisdom.

14. 15. "I premise that there must be knowledge and consciousness of what wrong conduct is, how it arises ; similarly, there must also be knowledge and consciousness of what is right conduct and wrong conduct. Without such knowledge there cannot be real goodness though the act may be good. That is why I say Prajna is a necessary virtue."

15. 16. The Buddha then concluded his sermon by addressing the following admonition to the Parivrajakas.

16. 17."You are likely to call my Dhamma pessimistic because it calls the attention of mankind to the existence of suffering. I tell you such a view of my Dhamma would be wrong.

17. 18."No doubt my Dhamma recognises the existence of suffering but forget not that it also lays equal stress on the removal of suffering.

18. 19."My Dhamma has in it both hope and purpose.

19. 20."Its purpose is to remove Avijja, by which I mean ignorance of the existence of suffering.

20. 21."There is hope in it because it shows the way to put an end to human suffering.

21. 22."Do you agree with this or not?" And the Parivrajakas said, "Yes, we do."

§ 7. *The Response of the Parivrajakas*

1. The five Parivrajakas at once realised that this was really a new Dhamma. They were so struck by this new approach to the problems of life that they were unanimous in saying : "Never in

the history of the world has any founder of religion taught that the recognition of human suffering was the real basis of religion.

2. 2."Never in the history of the world has any founder of religion taught that the removal of this misery is the real purpose of it !

3. 3."Never in the history of the world had a scheme of salvation been put forth, so simple in its nature, so free from supernatural and superhuman agency, so independent of, even so antagonistic to, the belief in a soul, to the belief in God and to the belief in life after death!

4. 4."Never in the history of the world had a scheme of religion been put forth which had nothing to do with revelation and whose commands are born of the examination of the social needs of man and which are not the orders of a God !

5. 5."Never in the history of the world has salvation been conceived as the blessing of happiness to be attained by man in this life and on this earth by righteousness born out of his own efforts !"

6. 6. These were the sentiments which the Pariv-rajakas uttered after they ad heard the Buddha's Sermon on his new Dhamma.

7. 7. They felt that in him they had found a reformer, full of the most

earnest moral purpose and trained in all the intellectual culture of his time, who had the originality and the courage to put forth deliberately and with a knowledge of opposing views, the doctrine of a salvation to be found here, in this life, in inward change of heart to be brought about by the practice of self-culture and self-control.

8. 8. Their reverence for him became so unbounded that they at once surrendered to him and requested him to accept them as his disciples.

9. 9. The Buddha admitted them into his order by uttering the formula "Ehi Bhikkave" (come in Bhikkus). They were known as the Panchavargiya Bhikkus.

PART III : CONVERSION OF THE HIGH AND THE HOLY

1. 1. Conversion of Yashas.
2. 2. Conversion of the Kassiyapas.
3. 3. Conversion of Sariputta and Moggallana.
4. 4. Conversion of Bimbisara.
5. 5. Conversion of Anathapindika.
6. 6. Conversion of Pasenjit.
7. 7. Conversion of Jeevaka.
8. 8. Conversion of Ratthapala.

§1. *Conversion of Yashas*

1. 1. There lived in the town of Benares a nobleman's son called Yashas. He was young in years and very attractive in appearance. He was beloved of his parents. He lived in abounding wealth. He had a big retinue and a large harem and passed his time in nothing but dancing, drinking and carnal pleasures.

2. 2. As time past, a feeling of disgust came over him. How could he escape from this orgy? Was there any better way of life than the way he was leading? Not knowing what to do, he decided to leave his father's house.

3. 3. One night he left his father's house and was wandering about; He happened to wend his way towards Isipathana.

4. 4. Feeling tired he sat down and as he was seated he said to himself in loud tones: 'Where am I, what is the way? Alas! What distress; alas! What

danger!'

5. 5. This happened on the night of the same day on which the Blessed One preached his first sermon to the Panchavargiya Bhikkus at Isipathana. Just when Yashas was approaching Isipathana, the Blessed One who was staying at Isipathana, having arisen at dawn, was walking up and down in the open air. And the Blessed One saw Yashas, the noble youth coming from after giving utterance to his feelings.

6. 6. And the Blessed One having heard his cry of distress, said: "There is no distress, there is no danger. Come, I will show you the way," and the Blessed Lord preached his gospel to Yashas.

7. 7. And Yashas, when he heard it, became glad and joyful; and he put off his gilt slippers, and went and sat down near the Blessed One and respectfully saluted him.

8. 8. Yashas hearing the Buddha's words, requested the Blessed One to take him as his disciple.

9. 9. Then he bade him come and asked him to be a Bhikku to which Yashas agreed.

10. 10. The parents of Yashas were in great distress on finding that their son had disappeared. The father started in search. Yashas's father passed by the same spot where the Lord and Yashas in the Bhikku's garb were seated, and in passing, he asked the Blessed One: "Pray, have you seen Yashas, my son?"

11. 11. The Lord replied: "Come in. Sir, you will find your son." He went in and sat near his son but he knew him not.

12. 12. The Lord explained to him how Yashas met him and how on hearing him he became a Bhikku. The father then recognised his son and was happy his son had chosen the right path.

13. 13. "My son, Yashas," said the father, "your mother is absorbed in lamentations and grief. Return home and restore your mother to life."

14. 14. Then Yashas looked at the Blessed One, and the Blessed One said to Yashas's father, "Is that your wish that Yashas should return to the world and enjoy the pleasures of a worldly life as he did before?"

15. 15. And Yasha's father replied: "If Yashas, my son, finds it a gain to stay with you, let him stay." Yashas preferred to remain a Bhikku.

16. 16. Before departing Yashas's father said: "May the Blessed One, O Lord, consent to take his meal at my home with the members of my

family.”

17. 17. The Blessed One, having donned his robes, took his alms bowl and went with Yashas to the house of his father.

18. 18. When they arrived there, they met the mother and also the former wife of Yashas. After the meal the Blessed One preached to the members of the family his doctrine. They became very happy and promised to take refuge in it.

19. 19. Now there were four friends of Yashas belonging to the wealthy family of Benares. Their names were Vimala, Subahu, Punyajit and Gavampati.

20. 20. When Yashas's friends learned that Yashas had taken refuge in the Buddha and his Dhamma they felt that what is good for Yashas must be good for them. 21. So they went to Yashas and asked him to approach the Buddha on their behalf to receive them as his disciples.

21. 22. Yashas agreed and he went to the Buddha, saying:”May the Blessed One preach the Dhamma to these four friends of mine.”The Lord agreed and Yashas's friends took refuge in the

Dhamma.

§ 2. Conversion of the Kassiyapas

1. 1. There lived in Benaras a family known as the Kassiyapa family. There were three sons in the family. They were very highly educated and carried on a rigorous religious life.

2. 2. After some time the eldest son thought of taking up Sannyasa. Accordingly he left his home, took Sannyasa and went in the direction of Uruvella where he established his Ashram.

3. 3. His two younger brothers followed him and they too became Sannyasis.

4. 4. They were all Agnihotris or worshippers of fire. They were called Jatilas because they kept long hair.

5. 5. The three brothers were known as Uruvella Kassiyapa, Nadi Kassiyapa (Kassiyapa of the River, i.e., the Niranjana), and Gaya Kassiyapa (of the village Gaya).

6. 6. Of these the Uruvella Kassiyapa had a following of five hundred

Jatilas ; Nadi Kassyapa had three hundred Jatilas as his disciples and Gaya Kassyapa had two hundred Jatilas. Of these the chief was Uruvella Kassyapa.

7. 7. The fame of Uruvella Kassyapa had spread far and wide. He was known to have obtained Mukti (Salvation) while alive. People from far-away places came to his Ashram which was located on the banks of the river Falgu.

8. 8. The Blessed Lord having come to know of the name and fame of Uruvella Kassyapa, thought of preaching his gospel to him and if possible to convert him to his Dhamma.

9. 9. Having come to know of his whereabouts the Blessed Lord went to Uruvella.

10. 10. The Blessed One met him and wanting to have an opportunity to instruct him and convert him, said: "If it is not disagreeable to you, Kassyapa, let me dwell one night in your Ashram."

11. 11. "I am not agreeable to this," said Kassyapa. "There is a savage Naga king called Muchalinda who rules over this place. He is possessed of dreadful powers. He is the deadly enemy of all ascetics performing fire worship. He pays nocturnal visits to their Ashrams and does them great harm. I fear he may do you the same harm as he does to me."

12. 12. Kassyapa did not know that the Nagas had become the friends and followers of the Blessed One. But the Blessed One knew it.

13. 13. So the Blessed One pressed for his request, saying : "He is not likely to do any harm to me : pray, Kassyapa, allow me a place in your fire room, for one night."

14. 14. Kassyapa continued to raise many difficulties and the Blessed One continued to press his request.

15. 15. Then Kassyapa said : "My mind desires no controversy, only I have my fears and apprehensions, but follow your own good pleasure."

16. 16. The Blessed Lord forthwith stepped into the fire grove and took his seat.

17. 17. The Naga king Muchalinda came into the room at his usual time. But instead of finding Kassyapa he found the Blessed One seated in his place.

18. 18. Muchalinda, seeing the Lord seated, his face glowing with peace and serenity, felt as though he was in the presence of a great divinity, and

bending his head, began to worship.

19. 19. That night Kassyapa's sleep was very much disturbed by the thought of what might have happened to his guest. So he got up with great misgivings fearing that his guest might have been burnt up.

20. 20. Then Kassyapa and his followers at morning light came one and all to have a look. Far from the Lord injured by Muchalinda, they found Mucha-linda worshipping the Lord.

21. 21. Beholding the scene, Kassyapa felt that he was witnessing a great miracle.

22. 22. Struck by this miracle Kassyapa requested the Blessed Lord to stay near him and make an Ashram, and, promised to look after him.

23. 23. The Blessed Lord agreed to stay on.

24. 24. The two, however, had different motives. Kassyapa's motive was to obtain protection against Muchalinda Naga. The Blessed Lord thought that one day Kassyapa will give him opportunity to propound his gospel.

25. 25. But Kassyapa showed no such inclination. He thought that the Blessed Lord was only a miracle maker and nothing more.

26. 26. One day the Blessed Lord thought of himself taking the initiative and asked Kassyapa, "Are you an Arhant?"

27. 27. "If you are not an Arhant, what good is this Agnihotra going to do to you?"

28. 28. Kassyapa said: "I do not know what is to be an Arhant? Will you explain it to me?"

29. 29. The Lord then told Kassyapa, "An Arhant is one who has conquered all the passions which disturb a man from pursuing the eight-fold Path. Agnihotra cannot cleanse a man of his sins."

30. 30. Kassyapa was a proud person. But he did feel the force of the Blessed Lord's argument. Making his mind pliant and yielding, until at length prepared to be a vehicle of the true law, he confessed that his poor wisdom could not compare with the wisdom of the world-honoured One.

31. 31. And so, convinced at last, humbly submitting, Uruvella Kassyapa accepted the doctrine of the Lord and became his follower.

32. 32. Following their master, the followers of Kassyapa, virtuously submissive, in turn received the teaching of the law. Kassyapa and all his followers were thus entirely converted. 33. Uruvella Kassyapa, then, lifting his goods and all his sacrificial vessels, threw them together into the river,

which floated down upon the surface of the current.

33. 34. Nadi and Gaya, who dwelt down the stream, seeing these articles of clothing (and the rest) floating along the stream disorderly, said, "These are the belongings of our brother ; why has he thrown them away? Some great change has happened," and were deeply pained and restless. The two, each with five hundred followers, went up the stream to seek their brother.

34. 35. On seeing him and all his followers now dressed as hermits, strange thoughts engaged their minds and they inquired into the reasons. Uruvella Kassyapa told them the story of his conversion to the Buddha's Dhamma.

35. 36. "Our brother having submitted thus, we too should also follow him," they said.

36. 37. They conveyed their wishes to their eldest brother. Then the two brothers, with all their band of followers, were brought to hear the Lord's discourse on the comparison of a fire sacrifice with his own gospel.

37. 38. In his discourse to the two brothers the Blessed Lord said : "The dark smoke of ignorance arises, whilst confused thoughts, like wood drilled into wood, create the fire.

38. 39. "Lust, anger, delusion, these are as fire produced, and these enflame and burn all other things which cause grief and sorrow in the world.

39. 40. "If once this way is found and lust, anger and delusion consumed, then with it is born sight, knowledge and pure conduct.

40. 41. "So when the heart of a man has once conceived distaste for sin, this distaste removes covetous desire, covetous desire extinguished, there is recluse."

41. 42. The great Rishis listening to him, lost all regard for fire worship and wished to be the disciples of the Buddha. 43. The conversion of the Kassyapas was a great triumph for the Blessed Lord. For they had a very strong hold on the imagination of the people.

§ 3. *Conversion of Sariputta and Moggallana*

1. 1. While the Blessed Lord was in Rajagraha there resided a well-known person by name Sanjaya with a great retinue of Parivrajakas numbering about two hundred and fifty as his disciples.

2. 2. Among his disciples were Sariputta and Moggallana—two young Brahmins.
3. 3. Sariputta and Moggallana were not satisfied with the teachings of Sanjaya and were in search of something better.
4. 4. Now one day the venerable Assaji, one of the Panchvargiya Bhikkus, in the forenoon, having put on his under-robcs, and having taken his alms bowl and outer robe, entered the city of Rajagraha for alms.
5. 5. Sariputta was observing the dignified deportment of Assaji and was struck by it. On seeing the venerable Assaji, Sariputta thought, "Indeed this person is one of those monks who are the worthy ones in the world. What if I were to approach this monk and to ask him : 'In whose name, friend, have you retired from the world? Who is your teacher? Whose Dhamma do you profess?'"
6. 6. Now Sariputta thought : "This is not the time to ask this monk ; he has entered the inner yard of a house for alms. What if I were to follow this monk step by step, according to the course recognised by those who want something?"
7. 7. And the venerable Assaji, having finished his alms pilgrimage through Rajagraha, went back with the food he had received. Then Sariputta went to the place where the venerable Assaji was ; having approached him, he exchanged greetings and with complaisant words, he stood at his side.
8. 8. Standing at his side the wandering ascetic Sariputta said to the venerable Assaji: "Your countenance, friend, is serene; your complexion is pure and bright. In whose name, friend, have you retired from the world? Who is your teacher? Whose Dhamma do you profess?"
9. 9. Assaji replied : "There is, friend, the great recluse of the Sakya's clan ; in this Blessed One's name, have I retired from the world ; this Blessed One is my teacher, and it is the Dhamma of this Blessed One that I follow."
10. 10. "And what, venerable Sir, is the doctrine which your teacher holds? And what does he preach to you?"
11. 11. "I am only a young disciple, friend ; I have but recently received ordination ; and I have newly adopted this Dhamma and discipline. I cannot explain to you the Dhamma in detail ; but I will tell you in short what it means."

12. 12. Then Sariputta, the wandering ascetic, said to the venerable Assaji :”So be it, friend, tell me as much or as little as you like, but tell me the meaning, I want just meaning. Why make so much of the letter?”

13. 13. Then the venerable Assaji explained to Sariputta the substance of the teachings of the Buddha and Sariputta was completely satisfied.

14. 14. Sariputta and Moggallana, though not brothers, were bound together as though they were brothers. They had given their word to each other. He who first attains the truth shall tell the same to the other one. That was their mutual engagement.

15. 15. Accordingly Sariputta went to the place where Moggallana was. Seeing him, he said to Sariputta :”Your countenance, friend, is serene ; your complexion is pure and bright. Have you then really reached the truth?”

16. 16.”Yes, friend, I have come to know the truth.”“And how, friend, have you done so?”Then Sariputta told him what happened between him and Assaji.

17. 17. Then Moggallana said to Sariputta,”Let us go, friend, and join the Blessed One ; that he, the Blessed One, may be our teacher.”18. Sariputta replied : “It is on our account, friend, that these two hundred and fifty wandering Parivrajakas live here, and it is we whom they regard ; let us first tell them before taking leave of them ; they will do what they think fit.”

18. 19. Then Sariputta and Moggallana went to the place where they were ; having approached them they said to them,”Friends, we are going to join the Blessed One ; he, the Blessed One, is our teacher.”

19. 20. They replied :”It is on your account. Sirs, that we live here, and it is you whom we regard ; if you. Sirs, will lead the holy life under the great Samana, we all will do the same.”

20. 21. Then Sariputta and Moggallana went to the place where Sanjaya was ; having approached him, they said :”Friend, we go to join the Blessed One ; he, the Blessed One, is our teacher.”

21. 22. Sanjaya replied :”Nay, friends, do not go ; we will all three look after this company.”

22. 23. And a second and third time Sariputta and Moggallana said this and Sanjaya answered as before.

23. 24. Then Sariputta and Moggallana took with them two hundred and fifty wandering ascetics and went to the Veluvana in Rajagraha where the Blessed One was staying.

24. 25. And the Blessed One saw them—Sariputta and Moggallana, coming from afar : on seeing them he thus addressed the monks:”There, monks, arrive two companions,”pointing towards Sariputta and Moggallana,”these will be my chief pair of disciples, and auspicious pair.”

25. 26. When they had arrived at the bamboo grove, they went to the place where the Blessed One was ; having approached him, they prostrated themselves, with their heads at the feet of the Blessed One, and said to the Blessed One :”Lord, let us receive ordination from the Blessed One.”

26. 27. The Blessed One then uttered the usual formula indicating dmission,”Ehi Bhikku”(Come Monks), and Sariputta and Moggallana and the two hundred Jatilas became the disciples of the Buddha.”

§ 4. *Conversion of King Bimbisara*

1. 1. Rajagraha was the capital of Seniya Bimbisara; King of Magadha.

2. 2. Having heard of the conversions of this large number of Jatilas, everyone in the city had begun to talk about the Blessed One.

3. 3. Thus King Bimbisara came to know of his arrival in the city.

4. 4.”To have converted the most orthodox and the most obstinate Jatilas was no mean task.”“Truly so,”said King Bimbisara to himself,”he must be the Blessed, holy, absolute Buddha, proficient in knowledge and conduct, the way-farer, who understands the world, the highest one, who guides men, the teacher of gods and men. He must be teaching the truth, which he understood himself.

5. 5.”He must be preaching that Dhamma which is lovely in the beginning, lovely in the middle, lovely at the end, in the spirit and in the letter ; he must be proclaiming the consummate perfect, pure and holy life. It is good to obtain the sight of a man like him.”

6. 6. So King Bimbisara, surrounded by twelve myriads of Magadha Brahmins and householders, went to the place where the Blessed One was. Having approached him and respectfully saluted the Blessed One, he sat down near him. And of those twelve myriads of Magadha Brahmins and householders, some also respectfully saluted the Blessed One and sat down near him ; some exchanged greetings with the Blessed One, and having done so they sat down near him with complaisant words ; some bent their clasped hands towards the Blessed One and sat down near him ; some

made known their name and family name before the Blessed One and sat down near him ; some sat down near him silently.

7. 7. Now those twelve myriads of Magadha Brahmins and householders saw Uruvella Kassapa among the monks who came with the Blessed Lord. They thought: "How now is this? Does the great Samana follow the holy life under Uruvella Kassapa, or does Uruvella Kassapa follow the holy life under the great Samana?"

8. 8. And the Blessed One, who understood in his mind the reflection which had arisen in the minds of those twelve myriads of Magadha Brahmins and householders, addressed the venerable Uruvella Kassapa : "What has thou seen, O dweller of Uruvella, that thou who art called the great one has forsaken the fire worship? How is it thou has forsaken the fire sacrifice?"

9. 9. Kassapa replied : "It is sights and sounds, and also tastes, and omen of sense desire that the sacrifices promise ; because I understood that these things are impure that I took no more delight in sacrifices and offerings."

10. 10. "But if you don't mind, tell us what made you think so?"

11. 11. Then the venerable Uruvella Kassapa rose from his seat, adjusted his upper robe so as to cover one shoulder, prostrated himself, inclining his head to the feet of the Blessed One, and said to the Blessed One: "My teacher is the Blessed One, I am his pupil." Then those twelve myriads of Magadha Brahmins and householders understood : "Uruvella Kassapa follows the holy life under the great Samana."

12. And the Blessed One, who understood in his mind 'the reflection that had arisen in the minds of those twelve myriads of Magadha Brahmins and householders, preached to them his Dhamma. Just as a clean cloth free from black specks properly takes the dye, thus eleven myriads of those

Magadha Brahmins and householders with Bimbisara at their head, while sitting there, obtained the pure and spotless dye of the Dhamma. One myriad announced their having become lay followers.

12. 13. Then the Magadha king, Seniya Bimbisara, having witnessed the scene, having understood the Dhamma, having penetrated the Dhamma, having overcome uncertainty, having dispelled all doubts, having gained full knowledge, said to the Blessed One : "In former days, Lord, when I was a prince, I entertained five aspirations ; these are now fulfilled.

13. 14.”In former days. Lord, to me when I was a prince, came this thought : ' O that I might be inaugurated king ! ' That was my first aspiration, Lord ; that is now fulfilled. ' And might then a holy one, a fully Enlightened One, come over into my kingdom ! ' This was my second aspiration, Lord ; that is now fulfilled. ' And might I minister to that Blessed One ! ' That was my third aspiration. Lord ; that is now fulfilled. ' And might he, the Blessed One, preach the Dhamma to me ! ' This was my fourth aspiration, Lord ; and that is now fulfilled. ' And might I understand the Dhamma of that Blessed One! ' This was my fifth aspiration, Lord; this is now fulfilled. These were my five aspirations, Lord, which I entertained in former days when I was a prince.

14. 15.”Wonderful, Lord ! Wonderful, just as if one should set up, what had been overturned, or should reveal what had been hidden, or should point out the way to one who had lost his way, or should bring a lamp into the darkness, in order that those who had eyes might see things, thus has the Blessed One preached the Dhamma in many ways. I take refuge. Lord, in that Blessed One, and in the Dhamma, and in the fraternity of Bhikkus (monks). May the Blessed One receive me from this day forth, while my life lasts, as a lay disciple who has taken refuge in him.”

§ 5. *Conversion of Anathapindika*

1. 1. Sudatta was a resident of Shravasti, the capital of the kingdom of Kosala. It was ruled by King Pasenjit. Sudatta was treasurer of the king. From his bounties to the poor, Sudatta was known as Anathapindika.

2. 2. When the Lord was at Rajagraha, Anathapindika happened to visit the place on some private business of his own. He was stopping with his who was married to the guild master of Rajagraha.

3. 3. When he arrived he found the guild master preparing a meal for the Lord and his monks on so great a scale that he thought that a wedding was in progress or that the king had been invited.

4. 4. On learning the truth he became very eager to visit the Lord and he set out in the very night to meet the Blessed One.

5. 5. And the Blessed One saw at once the sterling quality of Anathapindika's heart and greeted him with words of comfort. After taking his seat Anathapindika expressed a desire to hear a discourse on some

religious subject.

6. The Blessed Lord responding to his wishes raised the question, "Who is it that shapes our lives? Is it Ishavara, a personal creator? If Ishavara be the maker, all living things should have silently to submit to their maker's power. They would be like vessels formed by the potter's hand. If the world had been made by Ishavara there should be no such thing as sorrow, or calamity, or sin ; for both pure and impure deeds must come from him. If not, there would be

another cause beside him, and he would not be the self-existent one. Thus, you see, the thought of Ishavara is overthrown.

6. 7."Again, it is said that the Absolute cannot be a cause. All things around us come from a cause as the plant comes from the seed; how can the Absolute be the cause of all things alike? If it pervades them, then certainly it does not make them.

7. 8."Again, it is said that self is the maker. But if self is the maker, why did he not make things pleasing? The cases of sorrow and joy are real and objective. How can they have been made by self?

8. 9."Again, if you adopt the argument, there is no maker, or fate in such as it is, and there is no causation, what use would there be in shaping our lives and adjusting means to an end?

9. 10."Therefore, we argue that all things that exist are not without cause. However, neither Ishavara, nor the Absolute, nor the self, nor causeless chance, is the maker, but our deeds produce results both good and evil.

10. 11."The whole world is under the law of causation, and the causes that act are not un-mental, for the gold of which the cup is made is gold throughout.

11. 12."Let us, then, surrender the heresies of worshipping Ishavara and praying to him; let us not lose ourselves in vain speculations of profitless subtleties; let us surrender self and all selfishness, and as all things are fixed by causation, let us practise good so that good may result from our actions."

12. 13. And Anathapindika said : "I see the truth of what the Blessed One has said and I wish to open my whole mind. Having listened to my words let the Lord advise me what I should do.

13. 14."My life is full of work, and having acquired great wealth, I am

surrounded with cares. Yet do I enjoy my work, and I apply myself to it with all diligence. Many people are in my employ and depend upon the success of my enterprises.

14. 15."Now, I have heard your disciples praise the bliss of the hermit and denounce the unrest of the world. 'The Blessed One,' they say, 'has given up his kingdom and his inheritance, and has found the path of righteousness, thus setting an example to all the world how to attain Nirvana.'

15. 16."My heart yearns to do what is right and to be a blessing unto my fellow-beings. Let me then ask you, must I give up my wealth, my home, and my business enterprises, and, like you, go into homelessness in order to attain the bliss of a religious life?"

16. 17. And the Blessed Lord replied : "The bliss of a religious life is attainable by every one who walks in the noble eight-fold path. He that cleaves to wealth, had better cast it away than allow his heart to be poisoned by it ; but he who does not cleave to wealth, and possessing riches, uses them rightly, will be a blessing unto his fellow-beings.

17. 18."I say unto thee, remain in thy station of life and apply thyself with diligence to thy enterprises. It is not life and wealth and power that enslave men, but the cleaving to life and wealth and power.

18. 19."The Bhikku who retires from the world in order to lead a life of leisure will have no gain. For a life of indolence is an abomination, and lack of energy is to be despised.

19. 20."The Dhamma of the Tathagata does not require a man to go into homelessness or to resign the world unless he feels called upon to do so ; what the Dhamma of the Tathagata requires is for every man to free himself from the illusion of self, to cleanse his heart, to give up his thirst for pleasure, and lead a life of righteousness.

20. 21."And whatever men do, whether they remain in the world as artisans, merchants, and officers of the king, or retire from the world and devote themselves to a life of religious meditation, let them put their whole heart into their task ; let them be diligent and energetic, and, if they are like the lotus, which, though it grows in the water, yet remains untouched by the water, if they struggle in life without cherishing envy or hatred, if they live in the world a life not of self but a life of truth, then surely joy, peace, and bliss will dwell in their minds."

21. 22. Anathapindika perceived that this was the most excellent system of truth, simple and of wisdom-born.
22. 23. Thus firmly settled in the true doctrine he slowly bent in worship at the feet of the Blessed One and with closed hands made his request.

§ 6. *Conversion of King Pasenjit*

1. 1. Then King Pasenjit, hearing that the Lord had come, went in his royal equipage to the Jetavana Vihara. Saluting him with clasped hands, he said:
2. 2."Blessed is my unworthy and obscure kingdom that it has met with so great a fortune. For how can calamities and dangers befall it in the presence of Lord of the World, the Dharma Raja, the King of Truth.
3. 3."Now that I have seen your sacred features, let me partake of the refreshing waters of your teachings.
4. 4."Worldly profit is fleeting and perishable, but religious profit is eternal and inexhaustible. A worldly man, though a king, is full of trouble, but even a common man who is holy has peace of mind."
5. 5. Knowing the tendency of the king's heart, weighed down by avarice and love of pleasure, the Blessed One seized the opportunity and said :
6. 6."Even those who, have been born in low degree, when they see a virtuous man, feel reverence for him, how much more must an independent king, who by his previous conditions of life has acquired much merit, feel?
7. 7."And now as I briefly expound the law, let the Maharaja listen and weigh my words, and hold fast to what I say.
8. 8."Our good or evil deeds follow us continually like shadows.
9. 9."That which is most needed is a loving heart !
10. 10."Regard your people as we do an only son. Do not oppress them, do not destroy them ; keep in due check every member of your body, forsake unrighteous doctrines and walk in the straight path; do not exalt yourself by trampling down others. Give comfort and befriend the sufferer.
11. 11."Neither ponder much on kingly dignity, nor listen to the smooth words of flatterers.
12. 12."There is no profit in vexing oneself by austerities, but meditate

on Dhamma and weigh the righteous law.

13. 13."We are enclosed on all sides by the rocks of sorrow and ill and only by considering the true law can we escape from this sorrow-filled mountain.

14."What profit, then, in practising inequity?

1. 15."All who are wise spurn the pleasures of the body. They loathe lust and seek to promote their spiritual existence.

2. 16."When a tree is burning with fierce flames, how can the birds congregate therein? Truth cannot dwell where passion lives. Without a knowledge of this, the learned man, though he may be praised as a sage, is ignorant.

3. 17."On him who has this knowledge true wisdom dawns. To acquire this wisdom is the one aim needed. To neglect it implies the failure of life.

4. 18."The teachings of all schools should centre here, for without it there is no reason.

5. 19."This truth is not for the hermit alone ; it concerns every human being, priest and layman alike. There is no distinction between the monk who has taken the vows, and the man of the world living with his family. There are hermits who fall into perdition, and there are humble householders who mount to the rank of rishis.

6. 20."The tide of lust is a danger common to all ; it carries away the world. He who is involved in its eddies finds no escape. But wisdom is the handy boat, reflection is the rudder. The slogan of religion calls you to the rescue of your self from the assaults of Mara, the enemy.

7. 21."Since it is impossible to escape the result of our deeds, let us practise good works.

8. 22."Let us inspect our thoughts that we do no evil, for as we sow so shall we reap.

9. 23."There are ways from light into darkness and from darkness into light. There are ways, also, from gloom into deeper darkness, and from the dawn into brighter light. The wise man will use the light as he has to receive more light. He will constantly advance to the knowledge of the truth.

10. 24."Exhibit true superiority by virtuous conduct and the exercise of

reason; meditate deeply on the vanity of earthly things, and understand the fickleness of life.

11. 25. "Elevate the mind, and seek sincere faith with firm purpose; transgress not the rules of kingly conduct, and let your happiness depend, not upon external things but upon your own mind. Thus you will lay up a good name for distant ages.

12. 26. The king listened with reverence and remembered all the words of the Blessed One in his heart and promised to become his lay disciple.

§ 7. *Conversion of Jeevaka*

1. 1. Jeevaka was the son of Salvati, a courtesan of Rajagraha.

2. 2. Immediately after birth the child, being illegitimate, was placed in a basket and thrown on a dust-heap.

3. 3. A large number of people were standing by the dust-heap watching the child. Abhaya, the Rajakumara, happened to pass by the site. He questioned the people who said : "It is alive."

4. 4. For this reason the child was called Jeevaka. Abhaya adopted him and brought him up.

5. 5. When Jeevaka grew in age he learned how he was saved and was charged with the intense desire to qualify himself to save others.

6. 6. He therefore went to the University of Takashila without the knowledge and permission of Abhaya and studied medicine for seven years.

7. 7. Returning to Rajagraha he set up his practice as a doctor and within a very short time acquired a great name and fame in the profession.

8. 8. His first patient was the wife of a sethi of Saketa and for curing her he received sixteen thousand kahapanas, a man-servant, a maid-servant and a coach with a horse.

9. 9. Knowing his eminence, Abhaya gave him residence in his own establishment.

10. 10. At Rajagraha he cured Bimbisara of a troublesome fistula and is said to have received as reward all the ornaments of Bimbisara's five hundred wives.

11. 11. Other noteworthy cures of Jeevaka included that of the sethi of Rajagraha on whom he performed the operation of trepanning and of the

son of the sethi of Benares who was suffering from chronic intestinal trouble due to misplacement.

12. 12. Jeevaka was appointed physician to the king and the king's women.

13. 13. But Jeevaka was greatly attached to the Blessed Lord. Consequently he also acted as a physician to him and the Sangh.

14. 14. He became a disciple of the Lord. The Blessed Lord did not make him a Bhikku as he wanted him to remain free to tend to the sick and the wounded.

15. 15. When Bimbisara died Jeevaka continued to serve his son Ajatsatru and was mainly instrumental in bringing him to the Lord after his crime of parricide.

§ 8. *The Conversion of Ratthapala*

1. 1. Once when the Lord was on an alms pilgrimage in the Kuru country with a great company of almsmen, he stayed at Thullakotthita, which was a township of the Kurus.

2. 2. They came to know of it and went to him to pay their respects.

3. 3. When they were seated, the Lord instructed them with a discourse on the Doctrine. Having received their instruction from the Lord, the Brahmin heads of houses of Thullakotthita gratefully thanked him, rose up and departed with deep obeisance.

4. 4. Seated among them was a young man named Ratthapala, a scion of a leading family of the place, to whom this thought came :”So far as I understand, the Doctrine which the Lord has preached is no easy matter for one who lives in a home to lead the higher life in all its fullness, purity, and perfection.

5. 5.”What if I were to cut off hair and beard, don the yellow robes and go forth from home to homelessness as a pilgrim!”

6. 6. When the Brahmins had not been gone long, then Ratthapala came up and, after salutations, told the Lord the thought which had come to him, and asked to be admitted to, and confirmed in, the confraternity under him.

7. 7.”Have you your parents' consent to this step, Ratthapala?’ asked the Lord.

8. 8."No, Sir."
9. 9."I do not admit those who have not their parents' consent."
10. 10."That consent. Sir, I will take steps to obtain,"said the young man, who rising up and taking a reverential leave of the Lord, went off to his parents, told them his thoughts and asked their consent to his becoming a Bhikku.
11. 11. The parents made answer as follows : "Dear Ratthapala, you are our only son, very dear to us and beloved ; you live in comfort and have been brought up in comfort, with no experience at all of discomfort. Go away ; eat, drink, enjoy yourself, and do good works in all happiness. We refuse our consent.
12. 12."Your death would leave us desolate, with no pleasure left in life ; why, while we have you still, should we consent to your going forth from home to homelessness as a Bhikku".
13. 13. A second and yet a third time did Ratthapala repeat his request, only to be met by the same refusal from his parents.
14. 14. Failing thus to get his parents' consent, the young man flung himself down on the bare ground, declaring that he would either die there or become a Bhikku.
15. 15. His parents entreated him to get up while repeating their objections to his becoming a Bhikku, but the young man said not a word. A second and a third time they entreated him but still he said not a word.
16. 16. So the parents sought out Ratthapala's companions to whom they told all this and besought them to urge, as from themselves, what his parents had said to him.
17. 17. Thrice his companions appealed to him, but still he said not a word. So his companions came to the parents with this report : "There on the bare ground he lies, declaring that he will either die there or become a Bhikku. If you refuse your consent, he will never get up alive. But, if you give your consent, you will see him when he has become a Bhikku. Should he not like being a Bhikku, what alternative will he have! Why, only to come back here. Do give your consent !"they urged.
18. 18."Yes, we consent ; but when he is a Bhikku, he must come and see us."
19. 19. Off now went his companions to Ratthapala, and they told him that his parents had given their consent, but that when he was a Bhikku he

was to come and see them.

20. 20. Thereupon the young man arose and, when he had regained his strength, betook himself to the Lord, and after salutations seated himself on one side, saying: "I have got my parents' consent to my becoming a Bhikku ; I ask the Lord to admit me."

21. 21. Admission and confirmation were granted him under the Lord; and a fortnight afterwards the Lord, having stayed at Thullakotthita as long as he wanted, proceeded on his alms pilgrimage towards Sravasti, where he took up his abode in Jeta's grove in Anathapindika's pleasance.

22. 22. Dwelling alone and aloof, strenuous, ardent and purged of self, the reverend Ratthapala was not long before he won the prize in quest of which young men go forth from home to homelessness as Bhikkus, that prize of prizes which crowns the highest life.

23. 23. Then, he went to the Lord and, seated on one side after salutations, said that with the Lord's permission, he wished to go and see his parents.

24. 24. Scanning with his own heart the thoughts of Ratthapala's heart, and recognizing thereby that he was incapable of abandoning his training and reverting to the lower life of a layman, the Lord bade him go when he would.

25. 25. Hereupon, rising up and taking his leave of the Lord with deep reverence, Ratthapala, after duly putting away his bedding, set out, with his robe and bowl, on an alms pilgrimage to Thullakotthita where he took up his abode in the deer-park of the Kuru king.

26. 26. Early next morning, duly robed and bowl in hand, he went into the town for alms, and there as he passed from house to house on his indiscriminating round, he came to his father's house.

27. 27. Indoors, in the hall within the middle door, his father was having his hair combed and, seeing Ratthapala coming in the distance, he said : "It was these shavelings of reduces who made Bhikku of my only dear and beloved son."

28. 28. So at his own father's house Ratthapala was given nothing, not even a refusal; all he got was abuse.

29. 29. At this moment a slave-girl of the family was about to throw away the previous day's stale rice; and to her Ratthapala said: "If, sister, that is to be thrown away, put it in my bowl here."

30. 30. As the girl was doing so, she recognised his hands and feet and voice, and going straight to her mistress, cried out: "Do you know, madam, the young master is back."

31. 31. "If what you say is true, you are a slave no longer," said the mother, who hurried off to tell her husband that she heard their son was back.

32. 32. Ratthapala was eating that stale rice under the hedge when his father arrived, exclaiming; "Can it be, my dear son, that you are eating stale rice? Should you not have come to your own house?"

33. 33. Said Ratthapala, ' "What house of our own, householder, can we have who are homeless, having gone forth from home to homelessness? I did come to your house, where I was given nothing not even a refusal ; all I got was abuse."

34. 34. ' Come, my son; let us go indoors.' ' Not so, householder; I have finished my eating for today.' said Ratthapala.

35. 35. ' Well then, my son promise to take your meal here tomorrow.'

36. 36. By his silence the reverend Ratthapala gave consent.

37. 37. Then the father went indoors,—where first he ordered great heaps of gold and bullion to be piled up under a covering of mats and then he told his daughters-in-law, who had been the reverend Ratthapala's wives aforetime, to deck themselves out in all the finery their husband liked to see them in.

38. 38. When night had passed, the father, having ordered an excellent meal to be got ready in his house, told his son when it was ready. Early that forenoon, the reverend Ratthapala, duly robed and bowl in hand, came and took the seat set for him.

39. 39. Hereupon, ordering the heap of treasure to be unveiled, the father said: ' This is your mother's fortune, that is your father's and that came from your grand-father. You have the wherewithal both to enjoy yourself and to do good works.

40. 40. 'Come, my son; abandon your training; revert to the lower life of the layman; enjoy your substance and do good works.'

41. 41. ' If you will take my advice, householder, you will cart away all this heaped-up treasure and sink it in the middle of the Ganges. And why? Because thence you will only derive sorrow and lamentation, ills, pain of mind, pain of body and tribulation.'

42. 42. Clinging to his feet, the reverend Ratthapala's whilom wives asked like what were the nymphs divine for whose sake he was leading the higher life.

43. 43."For the sake of no nymphs at all, sisters,"said he.

44. 44. At hearing themselves called sisters, the ladies all fainted and fell to the ground.

45. 45. Said Ratthapala to his father:"If food is to be given, householder, give it; trouble me not."

46. 46."The food is ready, my son ; begin,"said the father as he served that excellent meal without stint till his son had his fill.

47. 47. After taking food he departed to the deer-park of the Kuru king, where he sat down under a tree during the noontide heat.

48. 48. Now the king had given directions to his huntsman to tidy up the park against his coming to see it; and the obedient huntsman was engaged on his task when he saw Ratthapala seated under a tree during the noontide heat, and reported to the king that the park was in. order but that under a tree there was seated Ratthapala, the young gentleman of whom His Majesty had often heard tell.

49. 49."Never mind about the park today,"said the king;"I will pay a call on His Reverence."Ordering, therefore, all the repast which had been prepared to be made ready, he mounted a chariot and drove forth in procession in royal state out of the city to see Ratthapala.

50. 50. Riding as far as the ground was passable for his chariot and proceeding thence on foot with his princely train, the king came at last upon the reverend Ratthapala, whom, after exchange of courteous greetings, the king—still standing—invited to be seated on a clump of flowers.

51. 51."Nay, sire; sit you there, I have got a seat."

52. Seating himself on the seat indicated to him, the king said:"There are four kinds of losses, Ratthapala, which impel men to cut off hair and beard, don the yellow robes, and go forth from

home to homelessness—namely, (i) old age, (ii) failing health, (iii) impoverishment, and (iv) death of kinsfolk.

52. 53."Take a man who, being aged and old, far advanced in life, stricken in years, and at the close of life, recognises his position, and realises the difficulty either of acquiring new wealth or of doing well with

what he has got; so he decides to take to homelessness. This is known as the loss which old age entails. But here are you in the prime of youth and early manhood, with a wealth of coal-black hair untouched by grey, and in all the beauty of your prime;—not yours is the loss old age entails. What have you known or seen or heard to make you take to homelessness?

53. 54.”Or take a man who, being in ill-health or pain, or gravely ill, recognises his position and realises the difficulty either of acquiring new wealth or doing well with what he has already; so he decides to take to homelessness. This is known as the loss which failing health entails. But here are you neither ill nor ailing, with a good digestion maintained by humours neither too hot nor too cold ; not yours is the loss which failing health entails. What have known or seen or heard to make you take to homelessness?

54. 55.”Or take a man who, after being rich and wealthy and of great substance, and after gradually losing it, recognises his, position and realises the difficulty either of acquiring new wealth or of doing well with what he has got; so he decides to become a pilgrim. This is known as the loss which impoverishment entails. But the revered Ratthapala is the son of leading family in this very Thullakotthita, and there is none of this loss of wealth for the revered Ratthapala. What has the good Ratthapala known or seen or heard that he has gone forth from home into homelessness? And what, good Ratthapala, is loss of relations? As to this, good Ratthapala, someone has many friends and acquaintances, kith and kin, but gradually these relations of his diminish. He reflects thus: ' Formerly I had many friends and acquaintances, kith and kin, but gradually these relations of mine have diminished, so it is not easy for me to acquire wealth etc....' So he that is followed by this loss of relations, having cut off hair and beard, having donned saffron garments, goes forth from home into homelessness. This is known as the loss which kinsfolk's death entails. But here are you with a host of friends and relations; not yours is the loss which kinsfolk's death entails. What have you known or seen or heard to make you take to homelessness?”

55. 56.”I have gone forth,”replied Ratthapala,”sire, from home to homelessness because I have known, seen, and heard the following four propositions enunciated by the All-Englightened Lord who knows and sees
:

"(i) The world is in continual flux and change.

(ii) The world has no protector or preserver."(iii) We own nothing; we must leave everything behind."(iv) The world lacks and bankers, being enslaved to craving."57."It is wonderful, it is marvellous,"said the king,"how right in this the Lord was !"

PART IV : CALL FROM HOME

1. 1. Suddhodana and the Last Look.
2. 2. Meeting Yeshodhara and Rahula.
3. 3. Reception by the Sakyas.
4. 4. Last attempt to make Him a Householder.
5. 5. The Buddha's answer.
6. 6. The Minister's reply.
7. 7. The Buddha's Determination.

§ 1. *Suddhodana and the Last Look*

1. 1. After the conversion of Sariputta and Moggallana the Lord stayed in Rajagraha for two months.
2. 2. Having heard that the Lord was residing at Rajagraha, Suddhodana, his father, sent word to him saying : "I wish to see my son before I die. Others have had the benefit of his doctrine, but not his father nor his relatives."
3. 3. The man with whom the message was sent was Kaludayin, the son of one of the courtiers of Suddhodana.
4. 4. And the messenger on arrival said: "O, world-honoured Tathagata, your father looks for your coming, as the lily longs for the rising of the sun."
5. 5. The Blessed One consented to the request of his father and set out on the journey to his father's house accompanied by a large number of his disciples.
6. 6. The Lord journeyed by slow stages. But Kaludayin went ahead of him to inform Suddodhana that the Blessed One was coming and was on his way.
7. 7. Soon the tidings spread in the Sakya country. "Prince Siddharth,

who wandered forth from home into homelessness to obtain enlightenment, having attained his purpose, is coming home to Kapilavatsu.” This was on the lips of every one.

8. 8. Suddhodana and Mahaprajapati went out with their relatives and ministers to meet their son. When they saw their son from afar, they were struck with his beauty and dignity and his lustre and they rejoiced in their heart, but they could find no words to utter.

9. 9. This indeed was their son ; these were the features of Siddharth! How near was the great Samana to their heart and yet what a distance lay between them! That noble muni was no longer Siddharth their son ; he was now the Buddha, the Blessed One, the Holy One, Lord of Truth and Teacher of Mankind!

10. 10. Suddhodana, considering the religious dignity of their son, descended from the chariot and having saluted him first, said :”It is now seven years since we saw you. How we have longed for this moment.”

.11. Then the Buddha took a seat opposite his father, and the king eagerly gazed at his son. He longed to call him by his name but he dared not.”Siddharth,”he exclaimed silently in his heart,

.”Siddharth, come back to your old father and be his son again.”But seeing the determination of his son, he suppressed his sentiments. Desolation overcame him and Mahaprajapati.

11. 12. Thus the father sat face to face with his son, rejoicing in his sadness and sad in his rejoicing. Well may he be proud of his son, but his pride broke down at the idea that his great son would never be his heir.

12. 13.”I would offer thee my kingdom,”said the king,”but if I did, thou would account it but as ashes.”

13. 14. And the Lord said:”I know that the king's heart is full of love and that for his son's sake he feels deep grief. But let the ties of love that bind you to the son whom you lost, embrace with equal kindness all your fellow-beings, and you will receive in his place a greater one than your son Siddharth ; you will receive one who is the teacher of truth, the preacher of righteousness, and the bringer of peace and of Nirvana will enter into your heart.”

14. 15. Suddhodana trembled with joy when he heard the melodious words of his son, the Buddha, and clasping his hands, exclaimed with tears in his eyes :”Wonderful is the change ! The overwhelming sorrow has

passed away. At first my sorrowing heart was heavy but now I reap the fruit of your great renunciation. It was right that moved by your mighty sympathy, you should reject the pleasures of power and achieve your noble purpose in religious devotion. Having found the path you can now preach your Dhamma to all that yearn for deliverance.”

15. 16. Suddhodana returned to his house while the Buddha remained in the grove with his companions.

.17. The next morning the Blessed Lord took his bowl and set out to beg for his food in Kapilavatsu.

.18. And the news spread :”Siddharth is going from house to house to receive alms in the city where he used to ride in a chariot attended by his retinue. His robe is like a red clod and he holds in his hand an earthen bowl.”

16. 19. On hearing the strange rumour, Suddhodana went forth in great haste and exclaimed:”Why do you disgrace me thus? Do you not know that I can easily supply you and your Bhikkus with food?”

17. 20. And the Lord replied:”It is the custom of my Order.”

18. 21.”But how can this be? You are not one of them that ever begged for food.”

19. 22.”Yes, father,”rejoined the Lord,”You and your race may claim descent from kings; my descent is from the Buddhas of old. They begged their food, and always lived on alms.”

20. 23. Suddhodana made no reply, and the Blessed One continued:”It is customary, when one has found a hidden treasure, for him to make an offering of the most precious jewel to his father. Suffer me, therefore, to offer you this treasure of mine which is the Dhamma.”

21. 24. And the Blessed Lord told his father:”If you free yourself from dreams, if you open your mind to truth, if you be energetic, if you practise righteousness, you will find eternal bliss.”

22. 25. Suddhodana heard the words in silence and replied:”My son ! What thou sayst will I endeavour to fulfil.”

§ 2. Meeting Yeshodhara and Rabula

1. 1. Then Suddhodana conducted the Blessed Lord into his house and all the members of the family greeted him with- great reverence.

2. 2. But Yeshodhara, the mother of Rahula, did not make her appearance."Suddhodana sent for Yeshodhara. but she replied:"Surely, if I am deserving of any regard, Siddhartha will come and see me."

3. 3. The Blessed One, having greeted all his relatives and friends, asked:"Where is Yeshodhara?"and on being informed that she had refused to come, he rose straightaway and went to her apartment.

4. 4."I am free,"the Blessed One said to his disciples Sariputta and Moggallana whom he had bidden to accompany him into Yeshodhara's chamber;"But Yeshodhara, however, is not as yet free. Not having seen me for a long time, she is exceedingly sorrowful. Unless her grief be allowed to run its course her heart will cleave. Should she touch the Tathagata, the Holy One, you must not prevent her."

5. 5. Yeshodhara sat in her room in deep reflection. When the Blessed One entered, she was, from the abundance of her affection, like an overflowing vessel, unable to contain herself.

6. 6. Forgetting that the man whom she loved was Buddha, the Lord of the World, the Preacher of Truth, she held him by his feet and wept bitterly.

7. 7. Remembering, however, that Suddhodana was present, she felt ashamed and rose up, sitting herself reverently at a little distance.

8. 8. Suddhodana apologized for Yeshodhara, saying:"This arises from her deep affection, and is more than a temporary emotion. During the seven years that she has lost her husband, when she heard that Siddharth had shaved his head, she did likewise; when she heard that he had left off the use of perfumes and ornaments she also refused their use. Like her husband she has eaten at appointed times from an earthen bowl only.

9. 9."If this is more than a temporary emotion it is not for want of courage."

10. 10. And the Blessed One spoke to Yeshodhara telling of her great merits and the great courage she showed when he took Parivraja. Her purity, her gentleness, her devotion had been invaluable to him as a Bodhisattva when he aspired to the highest aim of mankind to attain enlightenment. This, then, was her karma, and it was the result of great merits.

11. 11. Her grief had been unspeakable, and the glory that surrounded her spiritual inheritance increased by her noble attitude during her life and

had made her a unique person.

12. 12. Then Yeshodhara dressed Rahula, now seven years old, in all the splendour of a prince and said to him:

13. 13.”This holy man, whose appearance is so glorious that he looks like the Great Brahma, is your father. He possesses great mines of wealth which I have not yet seen. Go to him and entreat him to put you in the possession thereof for the son ought to inherit the property of the father.”

14. 14. Rahula replied :”Who is my father. I know of no father but Suddhodana.”

15. 15. Yeshodhara took the boy in her arms and from the window she pointed out to the Lord, who happened to be near, partaking of food among the Bhikkus, informing him that he was his father and not Suddhodana.

16. 16. Rahula then went to him and looking up in his face, said without fear and with much affection:

17. 17.”Aren't thou my father!”And standing near by him, he added:”O Samana, even your shadow is full of bliss !”The Blessed One remained silent.

18. 18. When the Tathagata had finished his repast, he gave blessings and went away from the palace, but Rahula followed and asked him for his inheritance.

19. 19. No one prevented the boy, nor did the Blessed One himself.

20. 20. Then the Blessed One turned to Sariputta, saying:”My son asks for his inheritance.. I cannot give him perishable treasures that will bring cares and sorrows, but I can give him the inheritance of a holy life, which is a treasure that will not perish.”

21. 21. Addressing Rahula with earnestness, the Blessed One said :”Gold and silver and jewels have I none. But if you are willing to receive spiritual treasures, and are strong to carry them and to keep them, I have plenty. My spiritual treasure is the path of righteousness. Do you desire to be admitted to the brotherhood of those who devote their life to the culture of the mind seeking for the highest bliss attainable?”

22. 22. And Rahula replied with firmness:”I do.”

23. 23. When Suddhodana heard that Rahula had joined the brotherhood of the Bhikkus he was greatly grieved.

§ 3. *Reception by the Sakyas*

1. 1. On his return to the country of the Sakyas the Lord found his countrymen divided into two camps. One in favour and the other against him.

2. 2. This recalled to his mind the old clash of opinion that took place in the Sakya Sangh when the issue of war between the Sakyas and Koliyas was fought and in which he had played so prominent a part.

3. 3. Those against him refused even now to do obeisance to him and to recognise his greatness. Those for him had already decided to dedicate a son per household to form a retinue for him. These now decided to enter the Order and set out with the Lord on his return to Rajagraha.

4. 4. Among the families which had decided to dedicate a son there was the family of Amitodana.

5. 5. Amitodana had two sons. One was Anuruddha, who had been very delicately nurtured, and the other Mahanama.

6. 6. And Mahanama went to Anuruddha, saying: "Either do you renounce the world, or I will do so." And Anuruddha replied, "I am delicate. It is impossible for me to go forth from the household life into the homeless state. You do so."

7. "But come now, dear Anuruddha, I will tell you what is incident to the household life. First, you have to get your fields ploughed. When that is done, you have to get them sown. When that is done, you have to get the water led down over them. When that is done, you have to get the water led off again. When that is done, you have to get the seeds pulled up. When that is done, you have to get the crop reaped. When that is done, you have to get the crop carried away. When that is done, you have to get it arranged into bundles. When that is done, you have to get it trodden out. When that is done, you have to get the straw picked out. When that is done you have to get the chaff removed. When that is done, you have to get it winnowed. When that is done, you have to get the harvest garnered. When that is done, you have to do just the same next year, and the same all over again the year after that.

7. 8. "The work is never over ; one sees not the end of one's labour. O, when shall our work be over? When shall we see the end of our labours? When shall we, still possessing and retaining the pleasures of our five

senses, yet dwell at rest? Yes, the work, dear Anuruddha, is never over ; no end appears to our labours.”

8. 9.”Then do you take thought for the household duties. I will go forth from the household life into the houseless state,”said Anuruddha.

9. 10. And Anuruddha, the Sakyan, went to his mother, and said to her.”I want, mother, to go forth from the household life into the houseless state. Grant me thy permission to do so.”

10. 11. And when he had thus spoken, his mother replied to Anuruddha, the Sakyan, saying :”You two, dear Anuruddha, are my two sons, near and dear to me, in whom I find no evil. Through death I shall some day, against my will, be separated from you but how can I be willing, whilst you are still alive, that you should go forth from the household life into the houseless state?”

11. 12. And a second time Anuruddha made the same request, and received the same reply. And a third time Anuruddha made the same request to his mother.

12. 13. Now at that time Bhaddiya, the Sakyan Raja, held rule over the Sakyans ; and he was a friend of Anuruddha. And the mother of Anuruddha, thinking that that being so, the raja would not be able to renounce the world, said to her son:”Dear Anuruddha, if Bhaddiya the Sakyan raja will renounce the world, you also may go forth with him.”

13. 14. Then Anuruddha went to Bhaddiya and said to him :”My renunciation of the world, dear friend, is being obstructed by you.”

14. 15.”Then let that obstruction, dear friend, be removed. I am with you. Renounce the world according to your wish.”

15. 16.”Come, dear friend, let us both renounce the world together!”

16. 17.”I am not capable, dear friend, of giving up the household life. Whatsoever else you can ask of me, that will I do. Do you go forth alone,”said Bhaddiya.

17. 18.”Mother, dear friend, has told me that if you do so, I may. And you have even now declared, ' If your renunciation be obstructed by me, then let that obstruction be removed. Even with you will I renounce the world according to your wish.' Come then, dear friend, let us both renounce the world.”

18. 19. And Bhaddiya, the Sakyan raja said to Anuruddha,”Wait, my friend, for seven years. At the end of seven years we will renounce the

world together.”

19. 20. “Seven years are too long, dear friend. I am not able to wait for seven years.”

20. 21. Bhaddiya reduced the offer to six years and so on down to one year, to seven months and so on down to one month, and a fortnight. To each offer Anuruddha replied, “Too long a time to wait.”

21. 22. Then the raja says : “Wait, my friend, for seven days, whilst I hand over the kingdom to my sons and my brothers.”

22. 23. “Seven days is not too long. I will wait thus far,” was the reply.

23. 24. So Bhaddiya the Sakyan raja and Anuruddha and Ananda and Bhagu and Kimbila and Devadatta— just as they had so often previously gone out to the pleasure-ground with fourfold array—even so did they now go out with fourfold array, and Upali, the barber, went with them, making seven in all.

24. 25. And when they had gone some distance they sent their retinue back and crossed over into the neighbouring district, and took off their fine things and wrapped them in their robes, and made a bundle of them, and said to Upali the barber : “Do you now, good Upali, turn back to Kapilavatsu. These things will be sufficient for you to live upon. We will go and join the Blessed One.” And so they went ahead.

26: They went on and Upali parted company for the purpose of going back home.

§ 4. *Last attempt to make Him a Householder*

1. 1. Suddhodana wept bitterly at the thought of his son going away never to be seen again.

2. 2. Then Suddhodana spoke to his counsellor and his family priest and asked them if they could go and persuade his son to stay back and join the family.

3. 3. The family priest accompanied by the counsellor, in obedience to the wishes of the king, went and overtook him on the way.

4. 4. They paid him honour as was fitting, and having obtained his permission, sat down near him.

5. 5. The family priest addressed the Lord as he sat at the foot of the

tree.

6. 6."O prince, consider for a moment the feelings of the king with his eyes raining tears with the arrow of thy reparation plunged into his heart. He has asked you to come back home. It is then only that he can die peacefully.

7. 7."I know that thy resolve is fixed upon religion, and I am convinced that this purpose of thine is unchanging ; but I am consumed with a flame of anguish like fire at thy going into this homeless state.

8. 8."Come, thou who love duty,—abandon this purpose for the sake of duty.

9. 9."Enjoy for a while the sovereignty of the earth, —thou shall go to the orest at the time provided by the sastras,—do not show disregard for thy unhappy kindred. Compassion for all creatures is the true religion.

10. 10."Religion is not wrought out only in the forests, the salvation of ascetics can be accomplished even in a city ; thought and effort are the true means, the forest and the badge are only a coward's signs.

11. 11."The king of the Sakyas is drowned in a deep sea of sorrow, full of waves of trouble, springing from thee ; do thou therefore deliver him who is helpless and protect or less like an ox drowning in the sea.

12. 12."Consider also the queen, who brought thee up, who has not yet gone to the region inhabited by Agastya—wilt thou not take some heed of 'her, who ceaselessly grieves like a cow that has lost her calf?

13. 13."Surely thou wilt succour thy wife by the. sight of thee, who now mourns as a widow yet with her lord still alive,—like a swan separated from her mate or a female elephant deserted in the forest by her companion."

14. 14. The Lord having heard the words of the family priest, reflected for a moment, knowing all the virtues of the virtuous, and then thus uttered his gentle reply:

§ 5. *The Buddha's Answer*

1. 1."I well know the paternal tenderness of the king, especially that which he has displayed towards me ; yet knowing this as I do, still alarmed at the ill and sorrow which pervades the world, I am inevitably forced to leave my kindred.

2. 2."Who would not wish to see his dear kindred, if but this separation

from beloved ones did not exist? But since even after it has been once, separation will still come again, it is for this that I abandon my father, however loving.

3. 3."I do not however approve that thou should think" the king's grief as caused by me, when in the midst of his dream-like unions, he is afflicted by thoughts of separations in the future.

4. 4."Thus let thy thoughts settle into certainty, having seen the multiform in its various developments; neither a son nor kindred is the cause of sorrow,—this sorrow is caused only by ignorance.

5. 5."Since parting is inevitably fixed in the course of time for all beings, just as for travellers who have joined company on a road,—what wise man would cherish sorrow, when he loses his kindred, even though he loves them?

6. 6."Leaving his kindred in another world, he departs hither, and having stolen away from them here, he goes forth once more ; having gone thither, he goes elsewhere also,—such is the lot of mankind,—what consideration can the liberated have for them?

7. 7."Since from the moment of leaving the womb death is a characteristic adjunct, why, in thy affection for thy son, has thou called my departure to the forest ill-timed?

8. 8."There may be an 'ill time' in one's attaining a worldly object,—time indeed is described as inseparably connected with all things; time drags the world into all its various times ; but all time suits a bliss which is really worthy of praise.

9. 9."That the king should wish to surrender to me his kingdom,—this is a noble thought, well worthy of a father ; but it would be as improper for me to accept it, as for a sick man through greed to accept unwholesome food.

10. 10."How can it be right for the wise to enter royalty, the home of illusion, where are found anxiety, passion, and weariness ; and the violation of all right through another's service?

11. 11."The golden palace seems to me to be on fire ; the daintiest viands seem mixed with poison ; infested with crocodiles is the tranquil lotus-bed."

§6. *The Minister's Reply*

1. 1. Having heard the Buddha's discourse, well suitable to his virtues and knowledge, freed from all desires, full of sound reasons, and weighty,—the counsellor thus made answer :

2. 2."This resolve of thine is an excellent counsel, not unfit in itself but only unfit at the present time : it could not be thy duty, loving duty as thou do , to leave thy father in his old age to sorrow

3. 3."Surely thy mind is not very penetrating, or it is ill-skilled in examining duty, wealth, and pleasure,— when for the sake of an unseen result thou departest disregarding a visible end.

4. 4."Again some say that there is another birth,— others with confident assertion say that there is not, since then the matter is all in doubt, it is right to enjoy the good fortune which comes into thy hand.

5. 5."If there is any activity hereafter, we will enjoy ourselves in it as may offer ; or if there is no activity beyond this life, then there is an assured liberation to all the world without any effort.

6. 6."Some say there is a future life, but they do not allow the possibility of liberation ; as fire is hot by nature, and water liquid, so they hold that there is a special nature in our power of action.

7. 7."Some maintain that all things arise from inherent properties,— both good and evil and existence and non-existence : and since all this world thus arises spontaneously, therefore also all effort of ours is vain.

8. 8."Since the action of the senses is fixed, and so too the agreeableness or the disagreeableness of outward objects,—then for that which is united to old age and pains, what effort can avail to alter it? Does it not all arise spontaneously?

9. 9."The fire becomes quenched by water, and fire causes water to evaporate ; and different elements, united in a body, producing unity, bear up the world.

10. 10."That the nature of the embryo in the womb is produced as composed of hands, feet, belly, back, and head, and that it is also united with the soul,—the wise declare that all this comes of itself spontaneously.

11. 11."Who causes the sharpness of the thorn? Or the various natures of beasts and birds? All this has arisen spontaneously ; there is no acting from desire, how then can there be such a thing as will?

12. 12."Others say that creation comes from Isvara, —what need then is there of the effort of the conscious soul? That which is the cause of the action of the world, is also determined as the cause of its ceasing to act.

13. 13."Some say that the coming into being and the destruction of being are alike caused by the soul, but they say that coming into being arises without effort, while the attainment of liberation is by effort.

14. 14."A man discharges his debt to his ancestors by begetting offspring, to the saints by sacred lore, to the gods by sacrifices ; he is born with these three debts upon him,—whoever has liberation (from these), he indeed has liberation.

15. 15."Thus by this series of rules the wise promise liberation to him who uses effort ; but however ready for effort with all their energy, those who seek liberation will find weariness.

16. 16."Therefore, gentle youth, if thou has a love for liberation, follow rightly the prescribed rule ; thus wilt thou thyself attain to it, and the king's grief will come to an end.

17. 17."And as for thy meditations on the evils of life ending in thy return from the forest to thy home,— let not the thought of this trouble thee, my son,—those in old time also have returned from the forests to their houses."He mentioned Ambarish Drumakesha, Rama and others.

§7. *The Buddha's Determination*

1. 1. Then having heard the affectionate and loyal words of the minister, who was as the eye of the king,—firm in his resolve, the king's son made his answer, with nothing omitted or displaced, neither tedious nor hasty:

2. 2."This doubt whether anything exists or not, is not to be solved for me by another's words ; having determined the truth by asceticism or quietism, I will myself grasp whatever is the truth concerning it.

3. 3."It is not for me to accept a theory which depends on the unknown and is ill controverted, and which involves a hundred prepossessions ; what wise man would go by another's belief? Mankind is like the blind directed in darkness by the blind.

4. 4."But even though I cannot discern the truth, yet still, if good and evil are doubted, let one's mind be set on the good ; even a toil in vain is to be chosen by him whose soul is good.

5. 5."But having seen that this ' sacred tradition ' is uncertain, know that that only is right which has been uttered by the trustworthy; and know that trustworthiness means the absence of faults ; he who is without faults will not utter an untruth.

6. 6."And as for what thou said to me in regard to my returning home, the examples you give are no authority,—for in determining duty, how can thou quote as authorities those who have broken their vows?

7. 7."Even the sun therefore may fall to the earth, even the mountain Himavat may lose its firmness ; but never could I return to my home as a man of the world, with my senses only alert for external objects.

8. 8."I would enter the blazing fire, but not my house with my purpose unfulfilled."Rising up in accordance with his resolve full of disinterestedness, he went his way.

9. 9. Then the minister and the Brahmin, both full of tears, having heard his firm determination, and having followed him awhile with despondent looks, and overcome with sorrow, slowly returned to Kapilavatsu.

10. 10. Through their love for the prince and their devotion to the king they returned, and often stopped looking back, they could neither behold him on the road nor yet lose the sight of him,—shining in his own splendour and beyond the reach of all others, like the sun.

11. 11. Having failed to persuade him to return home, the minister and the priest went back with faltering steps, saying to each other,"How shall we approach the king and see him, who is longing for his dear son?"

PART V : CAMPAIGN FOR CONVERSION RESUMED

1. 1. Conversion of Rustic Brahmins.
2. 2. Conversion of the Brahmins of Uttaravati.

§ 1. Conversion of Rustic Brahmins

1. 1. At the back of the Gridhrakutta mountains, near Rajagriha, there was a village, of some seventy or so families, all of them Brahmins.
2. 2. The Buddha, wishing to convert these people, came to the place and sat down under a tree.

3. 3. The people seeing the dignity of his presence, and the glorious appearance of his body, flocked round him, on which he asked the Brahmins how long they had dwelt in the mountain there, and what their occupation was.
4. 4. To this they replied: "We have dwelt here during thirty generations past, and our occupation is to tend cattle."
5. 5. On asking further as to their religious belief they said : "We pay homage and sacrifice to the sun and the moon, the rain (water), and fire, according to the several seasons.
6. 6. "If one of us dies, we assemble and pray that he may be born in the heaven of Brahma, and so escape further transmigrations."
7. 7. The Buddha replied: "This is not a safe way, not by it can you benefit. The true way is to follow me, become true ascetics, and practise complete self-composure with a view to obtain Nirvana"; and then he added these lines :
8. 8. "They who consider truth as that which is untrue, and regard that which is untrue as truth, this is but to adopt heretical opinions, and can never lead to true advantage.
9. 9. "But to know as truth that which is true, and to regard as false that which is false, this is perfect rectitude, and this shall bring true profit.
10. 10. "Everywhere in the world there is death— there is no escape from it.
11. 11. "To consider this as the condition of all states of being that there is nothing born but must die, and, therefore, to desire to escape birth and death, this is to exercise one's self in Religious Truth."
12. 12. The seventy Brahmins hearing these words, desired at once to become Shamans ; and on being welcomed by Buddha, their hair fell off, and they presented the appearance of true disciples.
13. 13. Then they all set out to return to the Vihara, and on the road certain thoughts about their wives and families troubled them whilst at the same time a heavy downpour of rain prevented their advance.
14. 14. There were some ten houses on the roadside, in which they sought shelter; but on entering one of them it was soon perceived that through the roof the rain found its way, and there was but little protection from the rain.
15. 15. On this the Buddha added these lines, and said, "As when a

house-roof is not properly secured, then the rain finds a way through it and drops within, so when the thoughts are not carefully controlled, the desires (sexual desires) will soon bore through all our good resolutions.

16. 16."But as when a roof is well stopped then the water cannot leak through, so by controlling one's thoughts, and acting with reflection, no such desires can arise or disturb us."

17. 17. The seventy Brahmins, on hearing these lines, although convinced that their desires were reprehensible, yet were not wholly free from doubt, nevertheless they went forward.

18. 18. As they advanced they saw some scented wrapping on the ground, and Buddha took the opportunity of calling their attention to it ; and after this, seeing some fish-gut also lying about, he directed their notice to its ill odour and then added these lines and said:

19. 19."He who consorts with the low and the base, contracts the same character as he who handles a foul substance; he goes from worse to worse, and utterly without reason, he perfects himself in wickedness.

20. 20."But the wise man (consorting with the wise) contracts the same character, even as the scent of a sweet odour adheres to him who handles it; advancing in wisdom, practising virtue, he goes on to perfection, and is satisfied."

21. 21. The seventy Brahmins, hearing these verses, convinced that their desire to return home and enjoy personal indulgence was the evil taint that adhered to them, cast off such thoughts, and, going forward, came to the Vihara, and finally obtained the condition of Arahtas.

§ 2. *Conversion of the Brahmins of Uttaravati*

1. 1. Once the Buddha was residing in the Jetavana, at Shravasti, and preaching his doctrine for the benefit of men and gods, there were in a country to the eastward, called Uttaravati, a company of 500 Brahmins.

2. 2. They had agreed to go together to the residence of a Nirgrantha ascetic on the banks of the Ganges, who, by polluting himself with dirt, etc., aspired to the condition of a Rishi.

3. 3. On their way they were overtaken in the desert with thirst. Seeing a tree, and hoping to find some human habitation near, they hastened to it, but when they arrived there they found no sign of life.

4. 4. On this they raised their voices in lamentation. Suddenly from the tree they heard the voice of the resident Spirit, who asked them why they lamented so, and on hearing the reason, supplied them to the full with drink and meat.

5. 5. The Brahmins, ready to start onward, asked the Spirit what had been his previous history, that he was thus born.

6. 6. On which he explained that having gone to the assembly of priests in Shravasti when Sudatta had bestowed the garden on the Buddha, he had remained all night listening to the law Dhamma and having filled his drinking cup with water as he went, had bestowed it in charity among the priests.

7. 7. On his return next morning, his wife in anger asked him what annoyance he had received that he should stay away all night. On which he replied that he was not annoyed, but he had been to listen to the Buddha preaching at the Jetavana.

8. 8. On this his wife began roundly to abuse the Buddha, and said, "This Gotama is but a mad preacher, who deceives the people," and so on.

9. 9. "On this" he said, "I resented not her statements, but rather submitted to them and so when I came to die I was born as a spirit, but on account of my pusillanimity I was confined to this tree," and then he recited these verses.

10. 10. "Sacrifices and such services are sources of misery, day and night, a continual burden and anxiety.

II. "To escape sorrow, and destroy the elements of the body, a man should attend to the Law (of Buddha), and arrive at deliverance from all worldly Rules of Religion (World Rishis)."

1. 12. The Brahmins having heard these words, resolved themselves to go to Shravasti, to the place where the Buddha was, and having explained the object of their visit, the world-honoured said to them:

2. 13. "Although a man goes naked with tangled hair, or though he clothes himself with a few leaves or garment of bark, though he covers himself with dirt and sleeps on the stones, what use is this in getting rid of impure thoughts?

3. 14."But he who neither contends or kills, or destroys by fire, who desires not to get the victory, who is moved by goodwill towards all the world, there is no ground in such a case for ill-will or hate.
4. 15."To sacrifice to spirits in order to find peace (merit), or, after this life expecting reward, his happiness, is not one quarter of that man's who pays homage to the good.
5. 16."He who is ever intent on good conduct and due reverence to others, who always venerates old age, four happy consequences increasingly attend that man—beauty and strength, and life and peace."
6. 17. On hearing this from her husband the wife became reconciled.

PART VI : CONVERSION OF THE LOW AND THE LOWLY

1. 1. **Conversion of Upali, the Barber.**
2. 2. Conversion of Sunita, the Sweeper.
3. 3. 3. Conversion of Sopaka and Supply a, the Untouchables.
4. 4. Conversion of Sumangala and other Low Castes.
5. 5. Conversion of Suprabuddha, the Leper.

§ 1. *Conversion of Upali, the Barber*

1. 1. While going back Upali, the barber thought:"The Sakyans are afierce people. If I go back with these ornaments they will kill me thinking that I have killed my companions and run away with their ornaments. Why should I not go the way these young men of the Sakya clan have gone?"
2. 2."Why indeed should I not?"asked Upali to himself. And he let down the bundle of ornaments from his back, and hung it on a tree, saying:"Let him who finds it take it as a gift,"and returned to follow the Sakya youths.
3. 3. And the Sakyans saw him coming from afar, and on seeing, they said to him:"What have you come back for, good Upali?"
4. 4. Then he told them what he felt and they replied:"Thou has done well, good Upali, in that thou did not return; for the Sakyans are fierce, and they might have killed thee."
5. 5. And they took Upali the barber with them to the place where the Blessed One was. And on arriving there, they bowed down before the

Blessed One and took their seats on one side. And so seated they said to the Blessed One :

6. 6."We Sakyans, Lord, are haughty. And this Upali, the barber, has long been an attendant, Lord, upon us. May the Blessed One admit him to the Order before us, so that we may render him respect and reverence, and bow down with outstretched hands before him as our senior and thus shall the Sakyan pride be humbled in us !"

7. 7. Then the Blessed One received first Upali, the barber, and afterwards those young men of the Sakya clan, into the ranks of the Order.

§ 2. *Conversion of Sunita, the Sweeper*

1. 1. There lived in Rajagraha a scavenger by name Sunita. He earned his living as a road sweeper, sweeping away the rubbish thrown by the householders on the roadside. His was a low and hereditary occupation.

2. 2. One day in the early hours of the dawn the Blessed One rose, dressed himself and walked into Rajagraha for alms followed by a large number of Bhikkus.

3. 3. Now Sunita was cleaning the street, collecting scraps, rubbish, and so on into heaps and filling therewith the basket which he carried on a yoke.

4. 4. And when he saw the Master and his train approaching, his heart was filled with joy and awe.

5. 5. Finding no place to hide in on the road, he placed his yoke in a bend in the wall and stood as if stuck to the wall, saluting the Lord with clasped hands.

6. 6. Then the Lord when he had come near, spoke to him in voice divinely sweet, saying:"Sunita! What to you is this wretched mode of living? Can you endure to leave home and come into the Order?"

7. 7. And Sunita, experiencing the rapture of one who has been sprinkled with Ambrosia, said:"If even such as the Exalted One may in this life take Orders, why should I not? May the Exalted One suffer me to come forth."

8. 8. Then the Master said:"Come Bhikku !" And Sunita by that word received sanction and ordination and was invested with bowl and robes.

9. 9. The Master leading him to the Vihar taught him the Dhamma and the Discipline and said, "By the discipline of holy life, restraint and mastery of self, a man becomes holy."

10. 10. When asked how Sunita became so great, the Buddha said, "As on a rubbish-heap on highway cast a lily may grow, fragrant and sweet, so among rubbish-creatures, worldlings blind by insight shines the very Buddha's child."

§ 3. *Conversion of Sopaka and Suppiya, the Untouchables*

1. 1. Sopaka was a pariah of Shravasti. In her travail at his birth his mother fell into a long deep swoon, so that her husband and kinsfolk said "She is dead!" And they bore her to the cemetery and prepared to cremate her body.

2. 2. But on account of the storm of wind and rain the fire would not burn. So they went away leaving Sopaka's mother on the funeral pyre.

3. 3. Sopaka's mother was not then dead. She died afterwards. Before her death she gave birth to a child.

4. 4. The child was adopted by the watchman of the cemetery and was brought up by him along with his own child Suppiya. The child was known by the name of the community Sopaka to which its mother belonged.

5. 5. The Blessed Lord one day happened to pass by the cemetery. Sopaka, seeing the Lord, approached him. After saluting the Lord he asked his permission to join him as his disciple.

6. 6. Sopaka was then only seven years old. So the Lord asked him to obtain his father's consent.

7. 7. Sopaka went and fetched his father. The father saluted the Lord and requested him to admit his son to the Order.

8. 8. Notwithstanding that he belonged to the pariah community the Lord admitted him to the Order and instructed him in the doctrine and discipline.

9. 9. Sopaka later became a Thera.

10. Suppiya and Sopaka had grown together from childhood and Sopaka having been adopted and brought up by Suppiya's father, Suppiya learned the Lord's doctrine and discipline from his companion, Sopaka,

and requested Sopaka to admit him to the Order, although Sopaka belonged to a community which was lower in rank than the community to which Suppiya belonged.

10. 11. Sopaka agreed and Suppiya, a member who belonged to the despised community whose occupation was to perform the duties of watchmen in the cemetery, became a Bhikku.

§ 4. *Conversion of Sumangala and other Low Castes*

1. 1. Sumangala was a peasant of Shravasti. He earned his living by work in the fields, working with a little sickle, plough and spade.
2. 2. Channa was a native of Kapilavatsu and was a slave in the house of Suddhodana.
3. 3. Dhanniya was a resident of Rajagraha. He was a potter.
4. 4. Kappata-Kura was a native of Shravasti. The only way he knew of, to support himself, was to go about, clad in rags, pan in hand, seeking for rice-grains. Hence he became known as Kappata-Kura—"Rags and-rice." When grown up, he maintained himself by selling grass.
5. All of them sought from the Buddha permission to become Bhikkus and enter the Order. The Buddha without hesitation and without caring for their low birth or their previous condition, admitted them into the Order.

§5. *Conversion of Supprabuddha, the Leper*

1. 1. Once the Exalted One was staying near Rajagraha, in the bamboo grove, at the squirrels' feeding-ground.
2. 2. Now there lived in Rajagraha at that time a certain man, who was a leper, named Supprabuddha, a poor, wretched, miserable creature.
3. 3. And it happened at that time that the Exalted One was sitting there in the midst of a great multitude, teaching the Dhamma.
4. 4. And Supprabuddha, the leper, saw from afar the multitude gathered together, and at the sight he thought, "Without a doubt an alms-giving of food, both hard and soft, is toward yonder. Suppose I draw near to yonder crowd, I might get there something to eat, food soft or hard."
5. 5. So Supprabuddha, the leper, drew near that crowd, and he beheld the Exalted One sitting there amid a great crowd, preaching the Norm. So,

seeing the Exalted One he thought:”No. There is no alms-giving here of food. It is Gotama the Samana preaching the Dhamma in the assembly. Suppose I were to listen to his teaching.”

6. 6. So he sat down at one side, thinking, ”I too will listen to the teaching.”

7. 7. Now the Exalted One, reading with His thought the thoughts of that whole gathering, said to Himself, ”Who, I wonder, of these present, is able to grasp the Truth?” Then He saw Supprabuddha, the leper, sitting in the crowd : and at the sight of him He knew, ”This one can grasp the Truth.”

8. 8. So for the sake of Supprabuddha, the leper, the Master preached a sermon, dealing in due order with these topics. On alms-giving, on the holy life, and on the heaven-world : and He pointed out the meanness and vileness of sensual desires and the profit of freedom from the asavas.

9. 9. Now when the Exalted One saw that the heart of Supprabuddha, the leper, was softened, pliant, set free, elated, and full of faith, then He set forth to him the Dhamma most excellent of the Buddha, to wit, suffering, the cause of suffering, the ceasing of suffering, and the path.

10. 10. Then, just as a white cloth, free from stains, is ready to receive the dye, even so in Supprabuddha, the leper, as he sat there in that very place, arose the pure stainless insight of the Truth, the knowledge that whatsoever hath a beginning, that also must have an end. And Supprabuddha, the leper, saw the Truth, reached the Truth, perceived the truth, plunged into the Truth, crossed beyond doubting, was freed from all ques-tionings, won confidence, and needing nothing further, being established in the Master's teaching, sprang up from his seat and drew near to Him, and there he sat down at one side.

11. 11. So seated he said to the Exalted One, ”Excellent, O Lord Excellent, O, Lord, just as if, Lord, one should lift up the fallen, discover the hidden, point out the way to one bewildered, show a light in the gloom, saying, ' Now they who have eyes to see can see shapes,' even so in diverse ways has the Exalted One expounded the truth. I, even I, Lord, do go for refuge to the Exalted One, to the Norm and to the Order of Brethren. May the Exalted One accept me as His follower, as one who from this time forth even to life's end has gone to refuge in Him.”

12. 12. Thereupon Supprabuddha, the leper, being taught, established,

roused, and made happy by the Exalted One's pious talk, praised and welcomed His words, gave thanks and rose up from his seat, saluted the Exalted One by the right, and went away.

13. 13. Unfortunately it came to pass that a young calf flung the leper Supprabuddha down and gored him to death.

PART VII : CONVERSION OF WOMEN

1. 1. Conversion of Mahaprajapati Gotami, Yeshodhara and her Companions.

2. 2. Conversion of Prakrati a handalika.

1 Conversion of Mahaprajapati Gotami and Yeshodhara and her Companions

1. 1. When the Blessed One had been on a visit to his father's home the desire to join the Sangh was as keen among the Sakya women as it was among the Sakya men.

2. 2. The leader of such women was no other than Mahaprajapati Gotami.

3. 3. Now at the time when the Blessed One was staying among the Sakyas in the Nigrodharama, Mahaprajapati Gotami went to him and said: "It would be well. Lord, if women were allowed to become Parivrajakas and enter the Sangh under the doctrine and discipline proclaimed by the Tathagata !"

4. 4. "Enough, O Gotami ! Let not such a thought come into your mind." And a second and a third time did Mahaprajapati make the same request in the same words, and a second and a third time did she receive the same reply.

5. 5. Then Mahaprajapati Gotami, sad and sorrowful, bowed down before the Blessed One, and went away weeping and in tears.

6. 6. After the Blessed One had left Nigrodharama for his wanderings, Mahaprajapati and the Sakya women sat together to give further consideration to their request for admission to the Sangh and the refusal of the Lord to grant such a request.

7. 7. The Sakya women refused to take the Lord's refusal as final. They

decided to go further to assume the garb of a Parivrajaka and present the Lord with a *fait accompli*.

8. 8. Accordingly Mahaprajapati Gotami cut off her hair and put on orange-coloured robes and set out with a number of women of the Sakya clan, on her journey to meet the Lord who was at that time staying in Vesali in the Mahavana in the Kutagara Hall.

9. 9. In due course Mahaprajapati Gotami with her companions arrived at Vesali and with swollen feet and covered with dust came to the Kutogara Hall.

10. 10. Again she made the same request to the Blessed Lord which she had made when he was staying at Nigrodharama and he refused it again.

11. 11. On receiving his refusal a second time Mahaprajapati withdrew and was standing outside the entrance of the hall not knowing what to do. While she was so standing Ananda on his way to the hall saw her and recognised her.

12. 12. He then asked Mahaprajapati, "Why standest thou there, outside the porch, with swollen feet, covered with dust, and sorrowful, weeping and in tears?" "Inasmuch, O Ananda, as the Lord, the Blessed One, does not permit women to renounce their homes and enter the homeless state under the doctrine and discipline proclaimed by the Tathagata," said Mahaprajapati.

13. Then did the Venerable Ananda go up to the place where the Blessed One was, and bowed down before the Blessed One, and take his seat on one side. And, so sitting, the Venerable Ananda said to the Blessed One : "Behold, Lord; Mahaprajapati Gotami is standing outside

under the entrance porch, with swollen feet covered with dust, sad and sorrowful, weeping and in tears, inasmuch as the Blessed One does not permit women to renounce their homes and enter the homeless state under the doctrine and discipline proclaimed by the Blessed One. It were well, Lord, if women were to have permission granted to them to do as she desires.

13. 14. "Has not Mahaprajapati proved herself of great service to the Blessed One, when as aunt and nurse she nourished him and gave him milk, and on the death of his mother suckled the Blessed One at her own breast; it were, therefore, well. Lord that women should have permission to go forth from the household life and enter the homeless state, under the

doctrine and discipline proclaimed by the Tathagata.”

14. 15.”Enough Ananda! Let it not, please, that women should be allowed to do so.”A second time and a third time did Ananda make the same request, in the same words, and received the same reply.

15. 16. Then the Venerable Ananda asked the Blessed One :”What can be the ground. Lord, for your refusal to allow women to take Parivraja.

16. 17.”The Lord knows that the Brahmins hold that the Shudras and women cannot reach moksha (Salvation) because they are unclean and inferior. They do therefore not allow Shudras and women to take Parivraja. Does the Blessed One hold the same view as the Brahmins?

17. 18. Has not the Blessed One allowed the Shudras to take Parivraja and join the Sangh in the same way he has done to the Brahmins? What is the ground. Lord, for treating women differently?

18. 19. Does the Blessed One hold that women are not capable of reaching Nibbana under the doctrine and discipline proclaimed by the Blessed One?”

19. 20. The Blessed One replied :”Ananda ! Do not misunderstand me. I hold that women are as much capable as men in the matter of reaching Nibbana. Ananda! do not misunderstand me, I am not an upholder of the doctrine of sex inequality. My rejection of Mahaprajapati's request is not based on sex inequality. It is based on practical grounds.”

20. 21.”I am happy. Lord, to know the real reason. But must the Lord refuse her request because of practical difficulties? Would not such an act bring the Dhamma into discredit and make it open to the charge of upholding sex inequality? Could not the Lord devise some rules to get over such practical difficulties by which the Lord is worried?”

21. 22.”Well, Ananda, I grant if Mahaprajapati insists that women must be allowed to take Parivraja under the doctrine and discipline proclaimed by me. But it shall be subject to eight conditions. Let Mahaprajapati Gotami take upon herself the responsibility of enforcing the Eight Chief Rules. That will be her initiation.”

22. 23. Then the Venerable Ananda, when he learnt from the Blessed One these Eight Chief Rules, went to Mahaprajapati Gotami and told her all that the Blessed One had said.

23. 24.”Just, Ananda, as a man or a woman, when young and of tender years, accustomed to adorn himself, would, when he had bathed his head,

receive with both hands a garland of lotus flowers, or of jasmine flowers or of stimutaka flowers, and place it on the top of his head ; even so do I, Ananda, take upon me these Eight Chief Rules, never to be transgressed during my lifelong,"said Mahaprajapati to Ananda.

24. 25. Then the Venerable Ananda returned to the Blessed One, and bowed down before him, and took his seat, on one side. And, so sitting, the Venerable Ananda said to the Blessed One:"Mahaprajapati Gotami, Lord, has taken upon herself the responsibility for the enforcement of the Eight Chief Rules, she may therefore be regarded as having received the Upasampada initiation,"(entry into the Sangha).

25. 26. Now Mahaprajapati received ordination, and 500 Sakya ladies who had come with her were also ordained at the same time. Thus ordained great Prajapati came before the Master, and saluting him, stood on one side and the Blessed One taught her the Dhamma, the doctrine and the discipline.

26. 27. The other five hundred Bhikkhunis were instructed by Nandaka, one of the disciples of the Blessed One.

27. 28. Among the Sakya women who became Bhikkhunis along with Mahaprajapati was Yeshodhara. After her initiation she came to be known as Bhadda Kaccana.

§ 2. *Conversion of Prakrati, a Chandalika*

1. 1. Once the Blessed Lord was living in Shravasti in the Jetavana Arama of Anathpindika.

2. 2. It so happened that Ananda, his disciple, had gone into the city to beg for alms. After eating his food Ananda was going to the river for drinking water.

3. 3. He saw a girl on the river bank filling her pot. Ananda asked her to give him some water.

4. 4. The girl, whose name was Prakrati, refused, saying she was a Chandalika.

5. 5. Ananda said,"I am concerned with water, I am not concerned with your caste."The girl then gave him some water from her pot.

6. 6. Thereafter Ananda left for Jetavana. The girl followed him and saw where he was staying and found that his name was Ananda and that he was

a follower of the Buddha.

7. 7. On returning home she told her mother Matangi what had happened and falling on the ground started weeping.

8. 8. The mother asked for the cause of her weeping. The girl told the whole story, and said, "If you wish to marry me I can only marry Ananda. I will not marry anybody else."

9. 9. The mother started on an inquiry. On return she told the girl that such a marriage was impossible for Ananda was under a vow of celibacy.

10. 10. On hearing this news the girl was filled with extreme sorrow and gave up food. She was not prepared to take things as though it was a decree of fate. So she said: "Mother, you know the art of sorcery, don't you? Why don't you employ it to achieve our purpose?" The mother said, "I will see what can be done."

11. 11. Matangi invited Ananda to her house for a meal. The girl became very happy. Matangi then told Ananda that her daughter was very anxious to marry him. Ananda replied, "I am vowed to be celibate and therefore I cannot marry any woman."

12. 12. "If you do not marry my daughter, she will commit suicide, so attached she is to you," Matangi told Ananda. "But I cannot help," replied Ananda.

13. 13. Matangi went inside and told her daughter that Ananda refused to marry her.

14. 14. The girl cried: "Mother, where is your sorcery?" The mother said, "My sorcery cannot win against the Tathagata."

15. 15. The girl shouted and said, "Close the door and do not allow him to go out. I shall see that he becomes my husband this very night."

16. 16. The mother did what the girl wanted her to do. As night fell the mother brought in the room a bed. The girl, dressed in her best, stepped in. But Ananda remained unmoved.

17. 17. The mother at last used her sorcery. As a result a fire broke out in the room. The mother then held Ananda by his clothes and said, "If you will not agree to marry my daughter, I will throw you in this fire." However, Ananda did not yield, and the mother and the daughter feeling helpless, left him free.

18. 18. Ananda on his return told the Blessed Lord all that had happened.

19. 19. On the second day the girl came to Jetavana in search of Ananda. Ananda was going out for alms. Ananda saw her and wanted to avoid her. But the girl followed him wherever he went.
20. 20. When Ananda returned to Jetavana he found the girl waiting at the door of his Vihar.
21. 21. Ananda told the Blessed One how the girl was pursuing him. The Blessed One sent for her.
22. 22. When the girl appeared before him the Blessed One asked her why she was pursuing Ananda. The girl replied that she was intent on marrying him "I have heard he is unmarried and I am also unmarried."
23. 23. The Bhagavan said, "Ananda is a Bhikku and he has no hair on his head. If you can get yourself clean shaven I shall see what could be done."
24. 24. The girl replied, "I am prepared for it." The Bhagavan said, "You must get your mother's permission for undergoing tonsure."
25. 25. The girl returned to her mother and said, "Mother! I have achieved what you failed to achieve. The Bhagavan has promised to get me married to Ananda if I undergo tonsure."
26. 26. The mother grew angry and said, "You must not do that. You are my daughter and you must keep hair. Why are you so eager to marry a Shramana Ananda. I can get you married to a better man."
27. 27. She replied, "I will either die or marry Ananda. There is no third alternative for me."
28. 28. The Mother said, "Why are you insulting me?" The girl said, "If you love me you must let me do as I wish."
29. 29. The mother withdrew her objection and the girl underwent tonsure.
30. Then the girl presented herself before the Blessed Lord saying, "I have tonsured my head as directed by you."
1. 31. The Blessed Lord then asked her, "What do you want? What part of his body you cherish?" The girl said, "I am in love with his nose, I am in love with his mouth, I am in love with his ears, I am in love with his voice, I am in love with his eyes and I am in love with his gait."
2. 32. The Blessed Lord then said to the girl, "Do you know that the eyes are the home of tears, the nose is the home of dirt, the mouth is the home of spit, the ear is the home of dirt and the body is the container of

dung and urine.”

3. 33.”When men and women come together they procreate children. But where there is birth there is death also; where there is death there is sorrow also. My dear girl, what are you going to get by marrying Ananda. I do not know.”

4. 34. The girl began to cogitate and agreed that there was no purpose in her marriage with Ananda on which she was so intent and she told the Blessed Lord accordingly.

5. 35. After saluting the Blessed Lord the girl said:”Owing to ignorance I was going in pursuit of Ananda. My mind is now enlightened. I am like a sailor whose ship after a mishap has reached the other bank. I am like an unprotected aged person who has found protection. I am like the blind who has got new sight. The Blessed Lord by his wise words of advice has awakened me from my sleep.”

6. 36.”Blessed art thou, Prakrati, for though you are a Chandalika you will be a model for noblemen and noblewomen. You are of low caste, but Brahmins will learn a lesson from you. Swerve not from the path of justice and righteousness and you will outshine the royal glory of queens on the throne.”

7. 37. The marriage having failed, the only course for her was to join the Bhikkhuni Sangh.

8. 38. Having expressed her wish she was admitted into it, though she belonged to the lowest class.

PART VIII : CONVERSION OF THE FALLEN AND THE CRIMINALS

1. 1. Conversion of a Vagabond. 2. Conversion of Angulimala, the Robber.
2. 3. Conversion of Other Criminals.
3. 4. Risk of Conversion.

§ 1 *Conversion of a Vagabond*

1. 1. There was in olden times a certain disorderly person living in Rajagraha, who neither revered his parents nor paid respect to his

superiors, but always had resort to sacrifice and worship of the sun and moon and fire when he went wrong, hoping thereby to get merit, and feel happy in himself.

2. 2. But notwithstanding all his bodily exercises, in worship and offerings, he found no peace, even after three years' incessant perseverance.

3. 3. He at length resolved to go to Shravasti to inquire of the Buddha. Arrived there, and seeing the glory of his person, he fell down at his feet, and said how he was pleased.

4. 4. Then the Lord explained the folly of animal sacrifice, and the uselessness of all such exercises where the heart was untouched, and where there was no final reverence or dutiful behaviour to those to whom it belonged ; and in conclusion recited certain gathas, which resplendent with glory, lit up the place and all the surrounding country with the brightness of his presence.

5. 5. On this, the villagers, and especially the parents of the children, came near to worship him.

6. 6. On seeing the parents, and hearing their account of the children, Buddha smiled, and recited these gathas.

7. 7."The great man is entirely free from covetous desire; he wells in a place of light himself enlightened. Although perchance he meets with sorrow, he rejoices; without consternation, he exhibits his wisdom.

8. 8."The wise man (bhadrā) concerns himself with no worldly business; he desires neither wealth, children, or possessions (land), always carefully observing the precepts, and walking in the way of supreme wisdom, he bankers not after strange doctrine (or wealth or honour).

9. 9."The wise man, knowing the character of instability, as a tree in the midst of sand (uses every effort) to change his friend whose mind is unfixed, and to bring him back from impurity to virtue (purity)."

§ 2 *Conversion of Angulimala, the Robber*

1. 1. There was, in the realm of Pasenadi, king of Kosala, a robber named Angulimala, a ruffian whose hands were red with blood, who was always killing and wounding, and showed no mercy to any living creature. Because of him, what had been villages were villages no more, what had been townships were townships no more, and what had been countryside

was countryside no more.

2. 2. From every human being whom he slew, he took a finger to make for himself a necklace, and so got his name of "Necklace of Fingers."

3. 3. Once when the Lord was staying in Shravasti in Jeta's grove he had heard of the ravages committed by the robber Angulimala. The Blessed Lord decided to convert him into a righteous man. So one day after taking his meal and after putting away his bedding and then, with robes and bowl, set out on his journey ' to find the robber Angulimala.

4. 4. Seeing him journeying thither, neatherds, goatherds, ploughmen and wayfarers called out: "Don't go that way, recluse! It will take you to the robber Angulimala.

5. 5. "Why, even when, ten, twenty, thirty, or forty people ban themselves together to travel this road, the whole company falls into the robber's hands!" But, without a word, the Lord held on to his way.

6. 6. A second time, and yet a third time those near there and the rest repeated their warning; but still, without a word, the Lord went his way.

7. 7. From some way off the robber saw the Lord coming and marvelled exceedingly that, where even companies of ten to fifty travellers dare not come his way, this solitary recluse should be seen to be forcing his way alone; and the robber was minded to slay ' this recluse.' So, armed with sword and buckler and with his bow and quiver, the robber followed up the Lord's trail.

8. 8. The Lord, while he himself was proceeding at his wonted pace, the robber, for all his efforts, could not catch him up.

9. 9. Thought the robber: "This is a wonderful and marvellous thing. Heretofore, I could always overtake an elephant, or horse, or carriage, or deer, when going full speed; and yet here am I unable, despite all my efforts, to overtake this recluse while he proceeds at his wonted pace." So he stopped and shouted to the Lord to stop.

10. 10. When the two met the Lord said: "I have stopped, Angulimala, for your sake. Will you stop following your career of an evil doer? I have been pursuing you in order to win you over, to cover you to the path of righteousness. The good in you is not yet dead. If you will only give it a chance it will transform you."

11. 11. Angulimala felt overcome by the words of the Blessed One, saying, "At last this sage has tracked me down."

12. 12."And now that thy hallowed words ask me to renounce evil deeds forever, I am prepared to give myself a trial,"replied Angulimala.

13. 13. Angulimala threw into a deep abyss the string of his victims' fingers which he wore round his neck and fell at the Master's feet and craved admission to the Brotherhood.

14. 14. The Lord, the guide of gods and men, said:"Almsman, follow me"; and almsman since that summons Angulimala did become.

15. 15. With Angulimala as his almsman in attendance, the Lord now proceeded on his way to the pleasance in Shravasti. At this very time the portals of King Pasenadi's inner palace were beset by a huge crowd loudly shouting that in the realm he had conquered there was a robber named Angulimala, a ruffian who was committing ravages and was killing and wounding innocent people and who took pride in wearing a necklace made of fingers of victims whom he slew."Suppress him, sire,"they cried. Pasenadi promised to run him down to earth. But he failed. 16. One morning King Pasenadi went to the pleasance to see the Lord. The Blessed Lord inquired:

"What is the matter, sire? Is there trouble with Seniya Bimbisara of Magadha, or with Licchavis of Vesali or with any other hostile power?"

17."No trouble at all of that sort, sir. In my realms there is a robber named Angulimala who is infesting my territories and harassing my subjects. I want to suppress him but I have failed."

1. 18."If now, sire, you were to see Angulimala with his hair and beard off, in the yellow robes, as a pilgrim who kills not, steals not, lies not, eats but one meal a day, and leads the higher life in virtue and goodness,—what would you do to him?"

2. 19."Sir, I would salute him, or rise to meet him or would invite him to be seated or invite him to accept robes and other requisites, or I would extend to him the defence, protection and safeguards which are his due. But how could the shadow of such virtue ever extend to one so wicked and depraved?"

3. 20. At that moment the Reverend Angulimala was seated quite close to the Lord, who stretching forth his right arm, said:"This, sire, is

Angulimala !”

4. 21. At this the king in his alarm became dumbfounded, with every hair of his body standing erect. Seeing this, the Lord said, "Fear not, sire; fear not; there is no cause for fear here."

5. 22. So the king's fears and alarm abated ; and across to the reverend Angulimala he went, saying: "Is your reverence indeed Angulimala?" "Yes, sire."

6. 23. "What sire, was your father's family, and your mother's?" "My father was a Gagga, sire, and my mother a Mantani."

7. 24. "Be of good cheer, Gagga Mantani-putta; I will take care to supply you with all requisites."

8. 25. Now at the time the Reverend Angulimala having pledged to be resident in the wilds, subsisting on alms, and wearing clothes from the dust heap not exceeding three in number, he declined the king's offer on the ground that he had already got his full three robes. 26. Then the king went across to the Lord and after salutations seated himself to the one side, saying; "It is wonderful, sir, it is marvellous, what a tamer of the untamed the Lord is, how he quells the unquelled, and how he calms the uncalmed ! Here is one whom I could not subdue with cudgel and sword; but without either cudgel or sword the Lord has subdued him! And now, sir, I must be going, for I have much to do and attend to."

9. 27. "When Your Majesty pleases." Then, rising from his seat, the king saluted the Lord with deep reverence and withdrew.

10. 28. One day when, duly robed and bowl in hand, Angulimala had gone into Shravasti for alms, he was hit by a clod flung by one man, by a club flung by a second and by a potsherd flung by a third, so that it was with a broken head streaming with blood, with his bowl smashed, and with his cloak in tatters, that he presented himself before the Lord. Seeing him drawing near, the Lord said to Angulimala: "Endure it all, endure it all."

11. 29. Thus did Angulimala the robber become a righteous man by accepting the teachings of the Buddha.

12. 30. Expressing the joy of the bliss of deliverance he said: "Who shows zeal, where zeal was none, who with virtue clokes his past, who in youth to Buddha cleaves, he, like the moon, floods earth with light.

13. 31. "Let my foes hear this gospel, embrace this creed and follow wisdom's sons who cleave to it. Let my foes hear in season, love's message

which is meek forbearance—and conform their lives to it.

14. 32.”As ' Finger Necklace,' I, bandit, lived and whirled downstream, till He brought me to land. As Tinger Necklace, ' I was steeped in blood; saved now am 1.”

§ 3. *Conversion of Other Criminals*

1. 1. There was to the south of Rajagraha a great mountain, distant from the city about 200 li.

2. 2. Through this mountain there was a pass, deep and lonely, through which the road to South India lay.

3. 3. Five hundred robbers had taken up their abode in this defile, who used to murder and rob all travellers that passed that way.

4. 4. The king had vainly sent his forces to capture them, but they always escaped.

5. 5. The Buddha, residing in the neighbourhood, and considering the case of these men, that they understood not the nature of their conduct, and that although he had come into the world to teach them, yet their eyes had not seen him, nor their ears heard the tidings of his law, he resolved to go to them.

6. 6. Consequently he transformed himself into a man richly dighted, on a well-caparisoned steed, with his sword and bow, with bags of silver and gold on his saddle-bow, and precious stones studding his horse's bravery.

7. 7. On entering the defile loud neighed his steed. On hearing the sound the 500 robbers started up, and spying the traveller, exclaimed, ”Never have we had such a prospect of booty; let us be up, and capture him!”

8. 8. So they proceeded to surround the traveller, with a view to prevent his escape; but on seeing him they fell on the ground.

9. 9. On their falling to the ground, they exclaimed, ”What God is this?” “What God is this?”

10. 10. On this the traveller began to explain that such hurts and pains as they give and receive were trivial compared with the pain caused by the sorrow that rules the world, and the wounds of unbelief and doubt, and that nought but the wisdom resulting from earnest attention (hearing) to the Scriptures could heal such wounds; and then he added these words and

said:

11. 11."There is no painful wound so bad as sorrow—no piercing arrow so sharp as folly. Nothing can remedy these but an earnest attention to religious instruction. From this the blind receive sight, the deluded are enlightened.

12. 12."Men are guided and led by this, as eyes, given to them without eyes.

13. 13."This, then, is able to dispel unbelief, to remove sorrow, to impart joy; the highest wisdom is the lot of those who "hear."

14. 14."This is the title of him who has acquired the greatest merit (most to be revered)."

15. 15. On hearing this the robbers repented of their evil lives, and the arrows, of themselves, left their bodies, and their wounds were healed.

16. 16. They then became disciples, and obtained rest and peace.

§ 4. *Risk of Conversion*

1. 1. In olden times, Buddha was residing in a country about 500 li from Rajagraha, full of mountains. In these mountains there lived a certain clan of about 122 persons, who occupied themselves in hunting, and fed themselves on the flesh of the animals they killed.

2. 2. (Buddha goes to the place and converts the women, who 'were left alone during the day, whilst their husbands were hunting, and then adds these lines.)

3. 3."He who is humane does *not* kill (or, it is humane not to kill); he is ever able to preserve (his own?) life.

4. 4."This principle (chu) is imperishable; whoever observes it, no calamity shall betide that man. 5."Politeness, indifference to wordly things, hurting no one, without place for annoyance—this is the character of the Brahma Heaven (or of Brahma Deva).

6."Ever exercising love towards the infirm; pure, according to the teaching of Buddha ; knowing when sufficient has been had; knowing when to stop,—this is to escape (the recurrence of) birth and death."

The women, having heard these words, were converted, and on the men's return, although they wished at first to kill Buddha, they were restrained by their wives ; and, listening to these words of love, they also

were converted.

5. 7. And then he added these lines.

6. 8."There are eleven advantages which attend the man who practices mercifulness, and is tender to all that lives.

7. 9."His body is always in health (happy); he is blessed with peaceful sleep, and when engaged in study he is also composed."

8. 10."He has no evil dreams, he is protected by Heaven (Devas) and loved by man ; he is unmolested by poisonous things, and escapes the violence of war; he is unharmed by fire or water.

9. 11."He is successful wherever he lives, and when dead goes to the Heaven of Brahma. These are the eleven."

1. Having uttered these words, both men and women were admitted into the company of his disciples, and obtained rest.

BOOK III: What the Buddha Taught

Part I — His Place in His Dhamma.

Part II — Different Views of the Buddha's Dhamma.

Part III — What is Dhamma.

Part IV — What is Not Dhamma.

Part V — What is Saddhamma

PART I : HIS PLACE IN HIS DHAMMA

1. 1. The Buddha claimed no place for Himself in His Own Dhamma.

2. 2. The Buddha did not promise to give salvation. He said He was Marga Data (Way Finder) and not Moksha Data (Giver of Salvation).

3. 3. The Buddha did not claim any Divinity for Himself or for His Dhamma. It was discovered by man for man. It was not a Revelation.

1. The Buddha claimed no place for Himself in His own Dhamma

1. 1. Christ claimed to be the Prophet of Christianity.

2. 2. He further claimed that he was the Son of God.

3. 3. Christ also laid down the condition that there was no salvation for

a person unless he accepted that Christ was the Son of God.

4. 4. Thus Christ secured a place for Himself by making the salvation of the Christian depend upon his acceptance of Christ as the Prophet and Son of God.

5. 5. Mohammad, the Prophet of Islam, claimed that he was a Prophet sent by God.

6. 6. He further claimed that no one could get salvation unless he accepted two other conditions.

7. 7. A seeker of salvation in Islam must accept that Mohammad is the Prophet of God.

8. 8. A seeker after salvation in Islam must further accept that he is the last prophet.

9. 9. Salvation in Islam is thus ensured only to those who accept these two conditions.

10. 10. Mohammad thus secured a place for Himself by making the salvation of the Muslim depend upon his acknowledgement of Mohammed as the Prophet of God.

11. 11. No such condition was ever made by the Buddha.

12. 12. He claimed that he was no more than the natural son of Suddhodana and Mahamaya.

13. 13. He carved for himself no place in his religion by laying down any such conditions regarding himself for salvation as Jesus and Mahammad did.

14. 14. That is the reason why we are left to know so little about himself even though abundant material was available.

15. 15. As is known, the first Buddhist congregation was held soon after the death of the Buddha at Rajagraha.

16. 16. Kassappa presided over the congregation. Anand, Upali and many others who belonged to Kapilavatsu and who wandered with him wherever he went and were with him till his death were present.

17. 17. But what did Kassappa the President do?

18. 18. He asked Anand to repeat the Dhamma and put the question to the congregation, "Is this right?" They answered in the affirmative. And Kassappa then closed the question.

19. 19. Thereafter he asked Upali to repeat the Vinaya and put the question to the congregation, "Is this right?" They answered in the

affirmative. Kassyappa then closed the question.

20. 20. Kassyappa then should have put the third question to someone present in the congregation to record some important incidents in the life of the Buddha.

21. 21. But Kassyappa did not. These were the only two questions with which he thought the Sangh was concerned.

22. 22. If Kassyappa had collected the record of the Buddha's life we would have had today a full-fledged biography of the Buddha.

23. 23. Why did it not strike Kassyappa to collect the record about the Buddha's life?

24. 24. It could not be indifference. The only answer one can give is that the Buddha had carved no niche for himself in his religion.

25. 25. The Buddha and his religion were quite apart.

26. 26. Another illustration of the Buddha keeping himself out of his religion is to be found in his refusal to appoint a successor.

27. 27. Twice or thrice the Buddha was requested by his followers to appoint a successor.

28. 28. Every time the Buddha refused.

29. 29. His answer was, "The Dhamma must be its own successor.

30. 30. "Principle must live by itself, and not by the authority of man.

31. 31. "If principle needs the authority of man it is no principle.

32. 32. "If every time it becomes necessary to invoke the name of the founder to enforce the authority of Dhamma then it is no Dhamma."

33. 33. Such was the view he took of his own position regarding his Dhamma.

§2. *The Buddha did not promise to give Salvation. He said He was Marga Data (Way Finder) and not Moksha Data (Giver of Salvation)*

1. 1. Most religions are described as revelations. But the Buddha's religion is not a revelation.

2. 2. A revealed religion is so called because it is a message of God to His creatures to worship their maker (i.e., God) and to save their souls.

3. 3. Often the message is sent through a chosen individual who is called a prophet to whom the message is revealed and who reveals it to the people. It is then called Religion.

4. 4. The obligation of the prophet is to ensure salvation to the faithful.
5. 5. Salvation of the faithful means the saving of their souls, from being sent to hell provided they obey God's commands and recognise the prophet as his messenger.
6. 6. The Buddha never claimed that he was a prophet or a messenger of God. He repudiated any such description.
7. 7. A more important point than this is that his religion is a discovery. As such it must be sharply distinguished from a religion which is called Revelation.
8. 8. His religion is a discovery in the sense that it is the result of inquiry and investigation into the conditions of human life on earth and understanding of the working of human instincts with which man born, the moulding of his instincts and dispositions which man has formed as a result of history and tradition and which are working to his detriment.
9. 9. All prophets have promised salvation. The Buddha is the one teacher who did not make any such promise. He made a sharp distinction between a *moksha data* and a *marga data*, one who gives salvation and one who only shows the way.
10. 10. He was only a *marga data*. Salvation must be sought by each for himself by his own effort.
11. 11. He made this very clear to the Brahmin Moggallana in the following Sutta.
12. 12."Once the Exalted One was staying at Shravasti, in the East Park, at the storeyed house of Migara's mother.
13. 13."Then, the Brahmin Moggallana, the accountant, came to the Exalted One and gave him friendly greeting and after the exchange of courtesies sat down at one side. So seated, the Brahmin Moggallana, the accountant, said this to the Exalted One :
14. 14." Just as. Master Gautama, one gets a gradual view of this storeyed house, a progress, a graduated path, and so on right up to the last step of the stairs, just so is the progressive training of us Brahmins : that is to say, in our course of study in the Vedas.'
15. 15." Just as in a course of archery, Gautama, with us the Brahmins, the training, the progress, the approach is step by step; for instance, in counting.'
16. 16." When we take a private pupil we make him count thus: 'One

one, twice two, thrice three, four times four, and so on up to a hundred.' Now is it possible. Master Gautama, for you to point to a similar progressive training on the part of your followers in your Dhamma.'

17. 17." It is so, Brahmin. Take the case, Brahmin, of a clever horse-trainer. He takes a thoroughbred in hand, gives him his first lesson with bit and bridle, and then proceeds to the further course.'

18. 18." Just so. Brahmin, the Tathagata takes in hand a man who is to be trained and gives him his first lesson, thus : ' Come thou, brother ! Be virtuous. Abide, constrained by the restraint of the obligation.'

19. 19." Become versed in the practice of right behaviour ; seeing danger in trifling faults, do you undertake the training and be a pupil in the moralities.'

20. 20." As soon as he has mastered all that, the Tathagata gives him his second lesson, thus : ' Come thou brother ! Seeing an object with the eye, be not charmed by its general appearance or its details.'

21. 21." Persist in the restraint of that dejection that comes from craving, caused by the sense of sight uncontrolled, these ill states, which would overwhelm one like a flood. Guard the sense of sight, win control over the sense of sight.'

22." And so do with the other organs of sense. When you hear a sound with the ear, or smell a scent with the nose, taste a taste with the tongue, or with body touch things tangible, and when

with mind you are conscious of a thing, be not charmed with its general appearance or its details.'

22. 23." As soon as he has mastered all that, the Tathagata gives him a further lesson, thus : ' Come thou, brother ! Be moderate in eating ; earnest and heedful do you take your food, not for sport not for indulgence, not for adding personal charm or comeliness to body, but do it for body's stabilising, for its support, for protection from harm, and for keeping up the practice of the righteous life, with this thought ; ' I check my former feeling. To no new feeling will I give rise, that maintenance and comfort may be mine.'

23. 24." Then, Brahmin, when he has won restraint in food, the Tathagata gives him a further lesson thus : ' Come thou, brother ! Abide given to watchfulness. By day, when walking or sitting, cleanse your heart from things that may hinder you. By night spend the first watch walking up

and down or sitting and do likewise. By night in the second watch, lie down on the right side in the posture of a lion, and placing one foot upon the other, mindful and self-possessed, set your thoughts on the idea of exertion. Then in the third watch of the night rise up, and walking up and down, or sitting, cleanse the heart of things that may hinder.'

24. 25." Then, Brahmin, when the brother is devoted to watchfulness, the Tathagata gives him a further lesson, thus : ' Come thou, brother ! Be possessed of mindfulness and self-control. In going forth or going back, have yourself under control. In looking forward or looking back, in bending or relaxing, in wearing robes or carrying robe and bowl, in eating, chewing, tasting, in easing yourself, in going, standing, sitting, lying, sleeping or waking, in speaking or keeping silence have yourself under control.'

25. 26." Then Brahmin, when he is possessed of self-control, the Tathagata gives him a further lesson thus : ' Come thou, brother ! Seek out a secluded lodging, a forest or root of a tree, a mountain or a cave or a mountain grotto, a charnel field, a forest retreat, the open air, a heap of straw.' And he does so. And when he has eaten his food he sits down crosslegged, and keeping his body straight up, he proceeds to practise the four ecstasies.'

26. 27." Now, Brahmin, for all brothers who are pupils, who have not yet attained mastery of mind, who abide aspiring, for such is the manner of my training.'

27. 28." But as to those brethren who are arhants, who have destroyed the asavas, who have lived the life, done their task, laid down the burden, won their own salvation, utterly destroyed the fetters of becoming, and are released by the perfect insight, for such as those these things are conducive to ease in the present life and to mindful self-control as well.'

28. 29." When this was said, the Brahmin Moggallana, the accountant, said to the Exalted One :

29. 30." But tell me, Master Gautama. Do the disciples of the worthy Gautama,—do all of them win the absolute perfection which is Nibbana : or do some fail thus to attain?'

30. 31." Some of my disciples. Brahmin, thus advised and trained by me, do so attain. Others do not,"

31. 32." But what is the reason, Master Gautama? What is the cause,

Master Gautama? Here we have Nibbana. Here we have the Path to Nibbana. Here we have the worthy Gautama as instructor. What is the reason, I say, why some disciples thus advised and trained do attain, while others do not attain?"

32. 33."That, Brahmin, is a question that I will answer. But first do you answer me this, so far as you think fit. Now how say you. Brahmin—Are you well skilled in the road to Rajagraha?"

33. 34."I am, master, ' Skilled indeed am I in the road to Rajagraha ! ' "

34. 35."Well, thus instructed, thus advised, he takes the wrong road, and off he goes with his face set to the west.

35. 36."Then a second man comes up with the same request and you give him the same instructions. He follows your advice and comes safe to Rajagraha.

36. 37."That is my business?"

37. 38." What do I in the matter. Brahmin? The Tathagata is one who only shows the way. "

38. 39. Here is a full statement that he does not promise salvation. He only shows the way.

39. 40. Besides what is salvation?

40. 41. With Mohammad and Jesus salvation means saving the soul from being sent to hell by the intercession of the Prophet.

41. 42. With Buddha salvation means Nibbana and Nibbana means control of passions.

42. 43. What promise of salvation can there be in such a Dhamma?

§ 3. The Buddha did not Claim any Divinity for himself or for his Dhamma. It was discovered by man for man. It was not a Revelation

1. 1. Every founder of religion has either claimed divinity for himself or for his teachings.

2. 2. Moses, although he did not claim for himself any divine origin, did claim divine origin for his teachings. He told his followers that if they wished to reach the land of milk and honey they must accept the teachings because they were the teachings of Jehovah the God.

3. 3. Jesus claimed divinity for himself. He claimed that he was the

Son of God. Naturally His teachings acquired a divine origin.

4. 4. Krishna said that he was God himself and the Gita was his own word.
5. 5. The Buddha made no such claim either for himself or his Sasana.
6. 6. He claimed that he was one of the many human beings and his message to the people was the message of man to man.
7. 7. He never claimed infallibility for his message.
8. 8. The only claim he made was that his message was the only true way to salvation as he understood it.
9. 9. It was based on universal human experience of life in the world.
10. 10. He said that it was open to anyone to question it, test it and find what truth it contained.
11. 11. No founder has so fully thrown open his religion to such a challenge.

PART II : DIFFERENT VIEWS OF THE BUDDHA'S DHAMMA

1. 1. What others have understood Him to have Taught.
2. 2. The Buddha's Own Classification.

1. What others have understood Him to have Taught

1. 1. "What are the teachings of the Buddha?"
2. 2. This is a question on which no two followers of the Buddha or the students of Buddhism agree.
3. 3. To some Samadhi is his principal teaching.
4. 4. To some it is Vipassana (a kind of Pranayam).
5. 5. To some Buddhism is esoteric. To others it is exoteric.
6. 6. To some it is a system of barren metaphysics.
7. 7. To some it is sheer mysticism.
8. 8. To some it is a selfish abstraction from the world.
9. 9. To some it is a systematic repression of every impulse and emotion of the heart.
10. 10. Many other views regarding Buddhism could be collected.
11. 11. This divergence of views is astonishing.
12. 12. Some of these views are those of men who have a fancy for

certain things. Such are those who regard that the essence of Buddhism lies in Samadhi or Vipassana, or Esoterism.

13. 13. The other views are the results of the fact that the majority of the writers on Buddhism are students of ancient Indian history. Their study of Buddhism is incidental and occasional.

14. 14. Some of them are not students of Buddhism.

15. 15. They are not even students of anthropology, the subject matter which deals with the origin and growth of religion.

16. 16. The question that arises is—"Did the Buddha have no Social Message?"

17. 17. When pressed for an answer, students of Buddhism refer to the two points. They say—

18. 18."The Buddha taught Ahimsa."

19. 19."The Buddha taught peace!"

20. 20. Asked—"Did the Buddha give any other Social Message?"

21. 21."Did the Buddha teach justice?"

22. 22."Did the Buddha teach love?"

23. 23."Did the Buddha teach liberty?"

24. 24."Did the Buddha teach equality?"

25. 25."Did the Buddha teach fraternity?"

26. 26."Could the Buddha answer Karl Marx?"

27. 27. These questions are hardly ever raised in discussing the Buddha's Dhamma.

28. 28. My answer is that the Buddha has a Social Message. He answers all these questions. But they have been buried by modern authors.

§ 2. *The Buddha's Own Classification*

1. 1. The Buddha adopted a different classification of Dhamma.

2. 2. The first category he called Dhamma.

3. 3. He created a new category called Not-Dhamma (Adhamma) though it went by the name of Dhamma.

4. 4. He created a third category which he called Saddhamma.

5. 5. The third category was another name for Philosophy of Dhamma.

6. 6. To understand His Dhamma one must understand all the three—Dhamma, Adhamma and Saddhamma.

PART III : WHAT IS DHAMMA?

1. 1. To Maintain Purity of Life is Dhamma.
2. 2. To Reach Perfection in Life is Dhamma.
3. 3. To Live in Nibbana is Dhamma.
4. 4. To Give up Craving is Dhamma.
5. 5. To believe that all compound things are impermanent is Dhamma.
6. 6. To believe that Karma is the instrument of Moral Order is Dhamma.

§ 1. *To Maintain Purity of Life is Dhamma*

1. 1. "There are these three forms of purity... And of what sort is purity of body?
2. 2. "Herein a certain one abstains from taking life, from stealing, from sinful living. This is called 'purity of body.'
3. 3."And of what sort is purity of speech?
4. 4."Herein a certain one abstains from falsehood...
5. 5."And of what sort is purity of mind?
6. 6."Herein a monk, if he have some personal sensual desire, is aware: 'There is in me sensual desire.' If there be none he is likewise aware of it. Also he is aware of how the arising of sensual desire not yet arisen comes about, and how it is abandoned when it has arisen, and how in the future there is no such arising.
7. 7."If he have some personal malevolence, he is aware ; 'There is within me malevolence.' Also he is aware of the arising . . . and the abandoning thereof, and of how in future there is no recurrence thereof.
8. 8."If he have some personal sloth-and-torpor . . . excitement and flurry . . . if he have some personal doubt-and-wavering, he is aware of the fact. Also of how (each of these) arises, is abandoned and recurs not again in future. This is called 'purity of mind.'
9. 9."He who is pure in body, speech, and mind,"Sinless and clean and blessed with purity,—"*Sin-washer' is the name men give to him."
1. 1."There are three forms of purity . . . Purity of body, purity of

speech, purity of mind.”

2. 2.”And of what sort is purity of body?”

3. 3. “Herein a certain one abstains from taking life, from stealing from wrong practice in sensual lusts. This is called 'purity of body'.”

4. 4. “And of what sort is purity of speech?”

5. 5. “Herein a certain one abstains from falsehood . . . from idle babble. This is called 'purity of speech.'“

6. 6. “And of what sort is purity of mind?”

7. 7.”Herein a certain one is not covetous or malevolent of heart and has right view. This is called *purity of mind.' These are the three forms of purity.”

1. 1. There are these five weaknesses, which are a source of weakness to training. What five?

2. 2. Taking life; taking what is not given; lustful, evil practices ; lying ; and indulging in spirituous liquors, which cause idleness.

3. 3. These are the five causes which lead to failure.

4. 4. When these five sources of weakness to training are put away, four arisings of mindfulness should be made to become.

5. 5. Herein a monk abides contemplating the body as body, strenuous, mindful and self-possessed, having overcome both the hankering and discontent common in the world.

6. 6. He abides contemplating the feelings as feelings ...

7. 7. He abides contemplating the mind as mind . . .

8. 8. He abides contemplating ideas as ideas, strenuous, mindful and self-possessed, having overcome both the hankering and discontent common in the world.

9. 9. When these five sources of weakness to training are put away, these four arisings of mindfulness should be made to become.

1. 1. There are these three failures. Failure in morals, failure in mind, failure in view.

2. 2. And of what sort is failure in morals? A certain one takes life, steals, is a wrong-doer in sensual desires, a liar, a slanderer, of bitter speech, an idle babbler. This is called”failure in morals.”

3. 3. And of what sort is failure in mind?

4. 4. A certain one is covetous and malevolent of heart. This is called "failure in mind."
5. 5. And of what sort is failure in view?
6. 6. Herein a certain one holds the depraved, the perverse view that there is no (virtue in) alms giving, in sacrifice, in offerings : that there is no fruit, no result of good and evil deeds: that this world is not, that there is no world beyond: that there is no mother, no father, no beings of spontaneous birth : that in the world are no recluses and Brahmins who have won the summit, who have won perfection, who of themselves by their own in tuitional powers have realised the world beyond and can proclaim it. This, monks, is called "failure in view."
7. 7. Monks, it is due to failure in morals, failure in mind and in view that beings, when body breaks up after death, are reborn in the Waste, the Way of Woe, in the Downfall, in Purgatory. Such are the three failures.
8. 8. Monks, there are these three successes. What three? Success in morals, success in mind, success in view.
9. 9. Now of what sort is success in morals?
10. 10. A certain one abstains from taking life and the rest . . . from bitter speech and idle babbling. This is called "success in morals."
11. 11. And of what sort is success in mind?
12. 12. Herein a certain one is not covetous or malevolent of heart. This is called "success in mind."
13. 13. And of what sort is success in view?
14. 14. Herein a certain one has right view: he holds with certainty that there is (virtue in) almsgiving, in sacrifice, in offerings: that there is fruit and result of good and evil deeds: that this world is, that there is a world beyond: that mother, father and beings of spontaneous birth do exist: that in the world there are recluses and Brahmins who have realised the world beyond and can proclaim it. This, monks, is called "success in view."15. It is owing to success in these three things that beings, when body breaks up after death, are reborn in the Happy Lot, in the Heaven World. Such, monks, are the three successes.

§2. *To Reach Perfection in Life is Dhamma*

1. 1. There are these three perfections.

2. 2. Perfection in body, speech and mind.
3. 3. And of what sort is perfection in mind?
4. 4. By the destruction of the asavas, realising in this very life himself, knowing it thoroughly—the heart's release, the release by insight which is free from the asavas, having attained it abides therein. This is called "perfection in mind." These are the three bodily perfections.
5. 5. There are other perfections. The Buddha explained them to Subhuti.
6. 6. SUBHUTI : What is a Bodhisattva's perfection of giving?
7. 7. THE LORD : Here a Bodhisattva, his thoughts associated with the knowledge of all modes, gives gifts, i.e., inward or outward things, and, having made them common to all beings, he dedicates them to supreme enlightenment ; and also others he instigates thereto. But there is nowhere an apprehension of anything.
8. 8. SUBHUTI : What is a Bodhisattva's perfection of morality?
9. 9. THE LORD : He himself lives under the obligation of the ten ways of wholesome acting, and also others he instigates thereto.
10. 10. SUBHUTI : What is a Bodhisattva's perfection of patience?
11. 11. THE LORD : He himself becomes one who has achieved patience, and others also he instigates to patience.
12. 12. SUBHUTI : What is a Bodhisattva's perfection of vigour?
13. 13. THE LORD : He dwells persistently in the five perfections, and also others he instigates to do likewise.
14. 14. SUBHUTI : What is the Bodhisattva's perfection of concentration (or meditation)?
15. 15. THE LORD : He himself, through skill in means, enters into the trances, yet he is not reborn in the corresponding heavens of form as he could ; and others also he instigates to do likewise.
16. 16. SUBHUTI : What is a Bodhisattva's perfection of wisdom?
17. 17. THE LORD : He does not settle down in any dharma, he contemplates the essential original nature of all dharmas ; and others also he instigates to the contemplation of all dharmas.
18. 18. It is Dhamma to cultivate these perfections.

§ 3. *To Live in Nibbana is Dhamma*

1. 1."Nothing can give real happiness as Nibbana."So said the Buddha.
2. 2. Of all the doctrines taught by the Buddha the doctrine of Nibbana is the most central one.
3. 3. What is Nibbana? Nibbana as taught by the Buddha has a totally different meaning and content than what has been given to it by his predecessors.
4. 4. By Nibbana they meant the salvation of the soul.
5. 5. Thus there were four ways in which Nibbana was conceived of: (1) Laukik (material, eat, drink and be merry type) ; (2) Yogic ; (3) Brahmanic and (4) Upanishadic.
6. 6. There was one common feature of the Brahmanic and Upanishadic conceptions of Nibbana. They involved the recognition of a soul as an independent entity—a theory which the Buddha had denied. The Buddha had therefore no difficulty in rejecting the Brahmanic and Upanishadic teaching of Nibbana.
7. 7. The Laukik conception of Nibbana was too materialistic to appeal to the Buddha. It meant nothing but the satisfaction of man's animal appetites. There was nothing spiritual in it.
8. 8. To accept such a conception of Nibbana the Buddha felt was a gross wrong that can be done to a human being.
9. 9. For the satisfaction of appetites can result only in creating more appetites. Such a way of life could bring no happiness, he thought. On the contrary, such happiness was sure to bring more unhappiness.
10. 10. The Yogic conception of Nibbana was a purely temporary state. The happiness it brought was negative. It involved disassociation from the world. It avoided pain but gave no happiness. Whatever happiness it may be said to bring lasted as long as the yoga lasted. It was not permanent. It was temporary.
11. 11. The Buddha's conception of Nibbana is quite different from that of his predecessors.
12. 12. There are three ideas which underlie his conception of Nibbana.
13. 13. Of these the happiness of a sentient being as distinct from the salvation of the soul is one.
14. 14. The second idea is the happiness of the sentient being in *Samsara* while he is alive. But the idea of a soul and the salvation of the soul after death are absolutely foreign to the Buddha's conception of Nibbana.

15. 15. The third idea which underlies his conception of Nibbana is the exercise of control over the flames of the passions which are always on fire.

16. 16. That the passions are like burning fire was the text of a sermon which the Buddha delivered to the Bhikkus when he was staying in Gaya. This is what he said:

17. 17."All things, O Bhikkus, are on fire. And what, O Priests, are all these things which are on fire?"

18. 18."The eye, O Bhikkus, is on fire ; forms are on fire ; eye-consciousness is on fire ; impressions received by the eye are on fire ; and whatever sensation, pleasant, unpleasant, - or indifferent, originates in dependence on impression received by the eye, that also is on fire."

19. 19."And with what are these on fire?"

20. 20."With the fire of passion say I, with the fire of hatred, with the fire of infatuation ; with birth, old age, death, sorrow, lamentation, misery, grief and despair are they on fire."

21. 21."The ear is on fire ; sounds are on fire ; the nose is on fire ; odours are on fire ; the tongue is on fire ; tastes are on fire ; the body is on fire ; ideas are on fire ; and whatever sensation, pleasant, unpleasant, or indifferent, originates in dependence on impression received by the mind, that also is on fire.

22. 22."And with what are these on fire?"

23. 23."With the fire of passion, say I ; with the fire of hatred ; with the fire of infatuation ; with birth ; old age, death, sorrow, lamentation, misery, grief, and despair are they on fire."

24. 24."Perceiving this, O Bhikkus, the learned and noble conceives an aversion. And in conceiving this aversion, he becomes divested of passion, and by the absence of passion he becomes free, and when he is free he becomes aware that he is free."

25. 25. How can Nibbana give happiness? That is the next question which calls for explanation.

26. 26. The common notion is that man is unhappy because he is in want. But this is not always true. Man is unhappy even though he is in the midst of plenty.

27. 27. Unhappiness is the result of greed, and greed is the bane of life of those who have as well as of those who have not.

28. 28. This the Buddha has made clear in a sermon delivered to the

Bhikkus in which he said.

29. 29."Excited by greed (lobha), brothers, furious with anger (dosa), blinded by delusion (moha), with mind overwhelmed, with mind enslaved, men reflect upon their own misfortune, men reflect upon the misfortune of others, men experience mental suffering and anguish.

30. 30. If, however, greed, anger and delusion are done away, men reflect neither upon their own misfortune nor on mental suffering and anguish.

31. 31. Thus, brothers, is Nibbana visible in this life and not merely in the future ; inviting, attractive, accessible to the wise disciple."

32. 32. Herein lies the explanation of what consumes man and makes him unhappy. By using this analogy of burning fire to the working of human passions the Buddha has given the most forceful explanation for the unhappiness of man.

33. 33. What makes man unhappy is his falling a prey to his passions. These passions are called fetters which prevent a man from reaching the state of Nibbana. The moment he is free from the sway of his passions, i.e., he learns to achieve Nibbana, man's way to happiness is open to him.

34. These passions, according to the Buddha's analysis, fall under three groups.

1. 35. First: that which refers to all degrees of craving or attachment—such as lust, infatuation and greed (lobha).

2. 36. Second: that which refers to all degrees of antipathy—hatred, anger, vexation or repugnance (dosa).

3. 37. Third: that which refers to all degrees of ignorance—delusion, dullness and stupidity (moha or avidya).

4. 38. The first and second fires relate to the emotions and over the whole scale of one's attitudes and feelings towards other beings, while the third fire relates to all ideas that are in any way removed from the truth.

5. 39. There are certain misunderstandings about the Buddha's doctrine of Nibbana.

6. 40. The word Nibbana etymologically means outblowing, extinguishing.

7. 41. Taking hold of this root meaning of the word, critics have tried to make nonsense of the doctrine of Nibbana.

8. 42. They hold that Nibbana means extinction of all human passions which is equivalent to death.
9. 43. They have by this means tried to throw ridicule over the doctrine of Nibbana.
10. 44. That such is not the meaning of Nibbana is quite clear if one examines the language of the fire sermon.
11. 45. The fire sermon does not say that life is burning and death is extinction. It says passions are on fire.
12. 46. The fire sermon does not say that the passions must be extinguished completely. It says do not add fuel to the flame.
13. 47. Secondly, critics have failed to make a distinction between Nibbana and Parinibbana.
14. 48. As the Udana says: "Parinibbana occurs when the body becomes disintegrated, all perceptions become stopped, all sensations die away, the activities cease and consciousness goes away. Thus Parinibbana means complete extinction."
15. 49. Nibbana can never have this meaning. Nibbana means enough control over passion so as to enable one to walk on the path of righteousness. It was not intended to mean anything more.
16. 50. That Nibbana is another name for righteous life is made clear by the Buddha himself to Radha.
17. 51. Once the venerable Radha came to the Exalted One. Having done so he saluted the Exalted One and sat down at one side. So seated the venerable Radha thus addressed the Exalted One: "Pray Lord, what for is Nibbana?"
18. 52. "Nibbana means release from passion" replied the Lord.
19. 53. "But Nibbana, Lord,—what is the aim of it?"
20. 54. "Rooted in Nibbana, Radha, the righteous life is lived. Nibbana is its goal. Nibbana is its end."
21. 55. That Nibbana does not mean extinction is also made clear by Sariputta in the following sermon:
22. 56. "Once the Blessed Lord was staying at Shravasti in Anathpindika's Arama where Sariputta was also staying.
23. 57. "The Lord, addressing the brethren, said : ' Almsmen, be ye partakers not of the world's goods but of my doctrine; in my compassion for you all I am anxious to ensure this.'

24. 58."Thus spoke the Lord, who thereupon rose and passed to his own cell.
25. 59."Sariputta remained behind and the brethren asked him to explain what is Nibbana.
26. 60."Then Sariputta in reply to the brethren said : ' Brethren, know ye that greed is vile, and vile is resentment.
27. 61."To shed this greed and this resentment, there is the Middle Way which gives us eyes to see and makes us know, leading us on to peace, insight, enlightenment and Nibbana.
28. 62." What is this Middle Way? It is naught but the Noble Eightfold Path of right outlook, right aims, right speech, right action, right means of livelihood, right effort, right mindfulness, and right concentration; this, almsmen is the Middle Way.
29. 63." Yes, sirs: anger is vile and malevolence is vile, envy and jealousy are vile, niggardliness and avarice are vile, hypocrisy and deceit and arrogance are vile, inflation is vile, and indolence is vile.
30. 64." For the shedding of inflation and indolence there is the Middle Way—giving us eyes to see, making us know, and leading us on to peace, insight, enlightenment.
31. 65."Nibbana which is naught but that Noble Eightfold Path."“
32. 66. Thus spoke the revered Sariputta—Glad at heart, the almsmen rejoiced at what he had said.
33. 67. That the idea underlying Nibbana is that it is the path of righteousness. No one will mistake Nibbana for anything else.
34. 68. Complete annihilation is one extreme and Parinibbana is another extreme. Nibbana is the Middle Way.
35. 69. So understood all confusion about Nibbana will disappear. §4. *To Give up Craving is Dhamma*

1. 1. In the Dhammapada the Buddha says:"There is no greater benefit than. health and there is nothing more valuable than the spirit of contentment."
2. 2. This spirit of contentment is not to be understood to mean meekness or surrender to circumstances.
3. 3. Because that would be quite contrary to the other teachings of the Buddha.

4. 4. The Buddha has not said, "Blessed are they who are poor."
5. 5. The Buddha has not said that the sufferer should not try to change his condition.
6. 6. On the other hand, he has said that riches are welcome and instead of listless suffering he taught Virya which is energetic action.
7. 7. What the Buddha meant when he said that contentment is the highest form of wealth is that man should not allow himself to be overpowered by greed which has no limits.
8. 8. As the Bhikku Rathapala has said: "Rich men I see who, folly-led, never give, but still amass, athirst for pleasures new; the king whose conquests to the sea extend, for sway over empires overseas will pine, still craving, kings and subjects pass away; lacking, still lacking, they their bodies quit; never on earth can pleasures' measure be filled."
9. 9. In the Maha-Nidan-Suttanta the Buddha has explained to Ananda the necessity of controlling greed. This is what he said.
10. 10. "This it is, Ananda, that craving comes into being because of desire for gain, when desire for gain becomes a passion for possession when the spirit of possession gives rise to tenacity of possession it becomes avarice.
11. 11. "Avarice or possession due to uncontrolled acquisitive instinct calls for watch and ward.
12. 12. "Why is this craving or greed to be condemned? Because of this," said the Buddha to Ananda, "many a bad and wicked state of things arises—blows and wounds, strife, contradiction and retorts ; quarrelling, slander and lies."
13. 13. That this is the correct analysis of class struggle there can be no doubt.
14. 14. That is why the Buddha insisted upon the control of greed and craving.

§ 5. To believe that all compound things are impermanent is Dhamma

1. 1. This doctrine of impermanence has three aspects.
2. 2. There is the impermanence of composite things.
3. 3. There is the impermanence of the individual being.

4. 4. There is the impermanence of the self nature of conditioned things.
5. 5. The impermanence of composite things has been well explained by the great Buddhist philosopher Asanga.
6. 6."All things," says Asanga, "are produced by the combination of causes and conditions and have no independent noumenon of their own. When the combination is dissolved, their destruction ensues.
7. 7."The body of a living being consists of the combination of four great elements, viz., earth, water, fire and air, and when this combination is resolved into the four component elements, dissolution ensues.
8. 8."This is what is called the impermanence of a composite entity."
9. 9. Impermanence of the living individual is best described by the formula—being is becoming.
10. 10. In this sense a being of a past moment has lived, but does not live nor will he live. The being of a future moment will live but has not lived nor does he live ; the being of the present moment does live but has not lived and will not live.
11. 11. In short, a human being is always changing, always growing. He is not the same at two different moments of his life.
12. 12. The third phase of the doctrine of impermanence is somewhat difficult for a common man to follow.
13. 13. To realise that everyliving being will die sometime or other is a very easy matter to understand.
14. 14. But it is not quite so easy to understand how a human being can go on changing—becoming— while he is alive.
15. 15. **“How** is this possible?”The Buddha's answer was,“This is possible because all is impermanent.”
16. 16. This later on gave rise to what is called Sunnya Vad.
17. 17. The Buddhist Sunnyata does not mean nihilism out and out. It only means the perpetual changes occurring at every moment in the phenomenal world.
18. 18. Very few' realise that it is on account of Sunnyata that everything becomes possible ; without it nothing in the world would be possible. It is on the impermanence of the nature of all things that the possibility of all other things depends.
19. 19. If things were not subject to continual change but were

permanent and unchangeable, the evolution of all of life from one kind to the other and the development of living things would come to a dead stop.

20. 20. If human beings died or changed but had continued always in the 'same state what would the result have been? The progress of the human race would have come to a dead halt.

21. 21. Immense difficulty would have arisen if Sunnya is regarded as being void or empty.

22. 22. But this is not so. Sunnya is like a point which has substance but neither breadth nor length.

23. 23. All things are impermanent was the doctrine preached by the Buddha.

24. 24. What is the moral-of this doctrine of the Buddha? This is a much more important question.

25. 25. The moral of 'this doctrine of impermanence is simple. Do not be attached to anything.

26. 26. It is to cultivate detachment, detachment from property, from friends, etc., that he said" All these are impermanent."

§ 6. *To believe that Karma is the instrument of Moral Order is Dhamma*

1. 1. There is an order in the physical world. This is proved by the following phenomenon.

2. 2. There is a certain order in the movements and actions of the starry bodies.

3. 3. There is a certain order by which seasons come and go in regular sequence.

4. 4. There is a certain order by which seeds grow into trees and trees yield fruits and fruits give seeds.

5. 5. In Buddhist terminology these are called Niyamas, laws which produce an orderly sequence such as Ritu Niyam, Bija Niyam.

6. 6. Similarly is there a moral order in Human Society. How is it produced? How is it maintained?

7. 7. Those who believe in the existence of God have no difficulty in answering the question. And their answer is easy.

8. 8. Moral order, they say, is maintained by Divine Dispensation. God created the world and God is the Supreme Governor of the world. He is

also the author of moral as well as of physical law.

9. 9. Moral law, according to them, is for man's good because it ensues from Divine will. Man is bound to obey God who is his maker and it is obedience to God which maintains the moral order.

10. 10. Such is the argument in support of the view that the moral order is maintained by Divine Dispensation.

11. 11. The explanation is by no means satisfactory. For if the moral law has originated from God, and if God is the beginning and end of the moral order and if man cannot escape from obeying God, why is there so much moral disorder in the world?

12. 12. What is the authority of the Divine Law? What is the hold of the Divine Law over the individual? These are pertinent questions. But to none of them is there any satisfactory answer from those who rely on Divine Dispensation as the basis for the moral order.

13. 13. To overcome these difficulties the thesis has been somewhat modified.

14. 14. It is said : no doubt creation took effect at the command of God. It is also true that the cosmos entered upon its life by his will and by his direction, It is also true that He imparted to the cosmos once for all the energy which served as the driving power of a stupendous mechanism.

15. 15. But God leaves it to Nature to work itself out in obedience to the laws originally given by him.

16. 16. So that if the moral order fails to work out as expected by God, the fault is of Nature and not of God.

17. 17. Even this modification in the theory does not solve the difficulty. It only helps to exonerate God from his responsibility. For the question remains, why should God leave it to Nature to execute His laws? What is the use of such an absentee God?

18. 18. The answer which the Buddha gave to the question,—”How is moral order maintained?” is totally different.

19. 19. His answer was simple.”It is the Kamma Niyam and not God which maintains the moral order in the universe.”That was the Buddha's answer to the question.

20. 20. The moral order of the universe may be good or it may be bad. But according to the Buddha the moral order rests on man and on nobody else.

21. 21. Kamma means man's action and Vipaka is its effect. If the moral order is bad it is because man does Akusala (Bad) Kamma. If the moral order is good it is because man does Kusala (Good) Kamma.
22. 22. The Buddha was not content with merely speaking of Kamma. He spoke of the law of Kamma which is another name for Kamma Niyam.
23. 23. By speaking of the law of Kamma what the Buddha wanted to convey was that the effect of the deed was bound to follow the deed, as surely as night follows day. It was like a Niyam or rule.
24. 24. No one could fail to benefit by the good effects of a Kusala Kamma and no one could escape the evil effects of Akusala Kamma.
25. 25. Therefore, the Buddha's admonition was: Do Kusala Kamma so that humanity may benefit by a good moral order which a Kusala Kamma helps to sustain ; do not do Akusala Kamma for humanity will suffer from the bad moral order which an Akusala Kamma will bring about.
26. 26. It may be that there is a time interval between the moment when the Kamma is done and the moment when the effect is felt. It is so, often enough.
27. 27. From this point of view, Kamma is either (1) Ditthadamma Vedaniya Kamma (Immediately Effective Kamma); (2) Upapajjavedaniya Kamma (Remotely Effective Kamma); and (3) Aporapariya Vedaniya Kamma (Indefinitely Effective Kamma).
28. 28. Kamma may also fall into the category of Ahosi Kamma, i.e., Kamma which is non-effective. This Ahosi Kamma comprises all such Kammass which are too weak to operate, or which are counteracted by a more Kamma, at the time when it should have worked.
29. 29. But making allowance for all these considerations, it does not in any sense derogate from the claim made by the Buddha that the law of Kamma is inexorable.
30. 30. The theory of the law of Kamma does not necessarily involve the conception that the effect of the Kamma recoils on the doer of it and there is nothing more to be thought about it. This is an error. Sometimes the action of one affects another instead of the doer. All the same it is the working of the law of Kamma because it either upholds or upsets the moral order.
31. 31. Individuals come and individuals go. But the moral order of the universe remains and so also the law of Kamma which sustains it.

32. 32. It is for this reason that in the religion of the Buddha, Morality has been given the place of God.

33. 33. Thus the Buddha's answer to the question—"How the moral order in the universe is sustained?" is so simple and so irrefutable. 34. And yet its true meaning is scarcely grasped.

Often, almost always, it is either misunderstood or misstated or misinterpreted. Not many seem to be conscious that the law 'of Kamma was propounded by the Buddha as an answer to the question—"How the moral order is maintained?"

1. 35. That, however, is the purpose of Buddha's Law of Kamma.

2. 36. The Law of Kamma has to do only with the question of general moral order. It has nothing to do with the fortunes or misfortunes of an individual.

3. 37. It is concerned with the maintenance of the moral order in the universe.

4. 38. It is because of this that the law of Kamma is a part of Dhamma.

PART IV : WHAT IS NOT—DHAMMA

1. 1. Belief in the Supernatural is Not—Dhamma.

2. 2. Belief in Ishwara (God) is Not Essentially Part of Dhamma.

3. 3. Dhamma Based on Union with Brahma is a False Dhamma.

4. 4. Belief in Soul is Not—Dhamma.

5. 5. Belief in Sacrifices is Not—Dhamma.

6. 6. Belief Based on Speculation is Not—Dhamma.

7. 7. Reading Books of Dhamma is Not—Dhamma.

8. 8. Belief in the Infallibility of Books of Dhamma is Not— Dhamma.

§ 1. Belief in the Supernatural is Not-Dhamma

1. 1. Whenever any phenomenon occurs, humanity is always wanting to know how it has happened, what is the cause of it.

2. 2. Sometimes cause and the effect are so proximate and so close that it is not difficult to account for the occurrence of the event.

3. 3. But often-times the effect is so far away from the cause for the effect is not accountable. Apparently there appears to be no cause for it.
4. 4. Then the question arises: How has this event occurred?
5. 5. The commonest answer is that the occurrence of the event is due to some supernatural cause which is often called a miracle.
6. 6. The Buddha's predecessors gave very different answers to this question.
7. 7. Pakauda Katyana denied that there was a cause for every event. Events, he said, occurred independently.
8. 8. Makhali Ghosal admitted that an event must have a cause. But he preached that the cause is not to be found in human agency but is to be sought in nature, necessity, inherent laws of things, predestination or the like.
9. 9. The Buddha repelled these doctrines. He maintained that not only every event has a cause but the cause is the result of some human action or natural law.
10. 10. His contention against the doctrine of Time, Nature, Necessity, etc., being the cause of the occurrence of an event, was this.
11. 11. If Time, Nature, Necessity, etc., be the sole cause of the occurrence of an event, then who are we?
12. 12. Is man merely a puppet in the hands of Time, Nature, Chance, Gods, Fate, Necessity?
13. 13. What is the use of man's existence if he is not free? What is the use of man's intelligence if he continues to believe in supernatural causes?
14. 14. If man is free, then every event must be the result of man's action or of an act of Nature. There cannot be any event which is supernatural in its origin.
15. 15. It may be that man is not able to discover the real cause of the occurrence of an event. But if he has intelligence he is bound one day to discover it.
16. 16. In repudiating supernaturalism the Buddha had three objects.
17. 17. His first object was to lead man to the path of rationalism.
18. 18. His second object was to free man to go in search of truth.
19. 19. His third object was to remove the most potent source of superstition, the result of which is to kill the spirit of inquiry.
20. 20. This is called the law of Karma or Causation.

21. 21. This doctrine of Kamma and Causation is the most central doctrine in Buddhism. It preaches Rationalism and Buddhism is nothing if not rationalism.

22. 22. That is why worship of the supernatural is Not—Dhamma.

§ 2. *Belief in Ishwara (God) is Not Essentially Part of Dhamma*

1. 1. Who created the world is a common question. That the world was created by God is also a very common answer.

2. 2. In the Brahmanic scheme this God is called by a variety of names—Prajapati, Ishwar, Brahma or Maha Brahma.

3. 3. To the question who this God is and how He came into being there is no answer.

4. 4. Those who believe in God describe Him as a being who is *omnipotent*, i.e., all-powerful. *Omni present*, i.e., he fills the whole universe, and *Omniscient*, i.e., he knows everything.

5. 5. There are also certain moral qualities which are attributed to God. God is said to be good, God is said to be just and God is said to be all-loving.

6. 6. The question is did the Blessed Lord accept God as the creator of the universe,

7. 7. The answer is, "No." He did not.

8. 8. There are various grounds why he rejected the doctrine of the Existence of God.

9. 9. Nobody has seen God. People only speak of God.

10. 10. God is unknown and unseen.

11. 11. Nobody can prove that God has created the world. The world has evolved and is not created.

12. 12. What advantage can there be in believing in God? It is unprofitable.

13. 13. The Buddha said that a religion based on God is based on speculation.

14. 14. A religion based on God is, therefore, not worth having.

15. 15. It only ends in creating superstition.

16. 16. The Buddha did not leave the question there. He discussed the question in its various aspects.

17. 17. The grounds on which he rejected the doctrine were various.
18. 18. He argued that the doctrine of the Existence of God is not based on truth.
19. 19. This he made clear in his dialogue with the two Brahmins, Vasettha and Bhardvaja.
20. 20. Now a dispute arose between them as to which was the true path of salvation and which false.
21. 21. About the time the Blessed One was journeying through Kosala with a great company of the brethren he happened to halt at the Brahmin village called Manaskata and stayed in the mango grove on the bank of the river Akiravati.
22. 22. Manaskata was the town in which Vasettha and Bhardvaja lived. Having heard that the Blessed Lord was staying in their town, they went to him and each one put forth his point of view.
23. 23. Bhardvaja said :”The path of Tarukkha is the straight path, this is the direct way which makes for salvation, and leads him, who acts according to it, into a state of union with Brahma.”
24. 24. Vasettha said:”Various Brahmins, O Gotama, teach various paths. The Addhariya Brahmins, the Tittiriya Brahmins, the Kanchoka Brahmins, the Bheehuvargiya Brahmins. They all lead those who act according to them, into a state of union with Brahma.
25. 25.”Just as near a village or a town there are many and various paths yet they all meet together in the village—just in the same way all the various paths taught by the various Brahmins lead to union with Brahma.”
26. 26.”Do you say that they all lead aright, Vasettha?”asked the Buddha.”I say so, Gautama,”replied Vasettha.
27. 27.”But Vasettha, is there a single one of the Brahmins versed in the three Vedas who has ever seen Brahma face to face.”
28. 28.”No, indeed, Gautama.”
29. 29.”Is there a single one of the teachers of the Brahmanas versed in the three Vedas who has seen Brahma face to face?”
30. 30.”No, indeed, Gautama.”
31. 31.”Nobody has seen Brahma. There is no perceptual knowledge about Brahma.”“So it is,”said Vasettha.”How then can you believe that the assertion of the Brahmins that Brahma exists is based on truth?
- 32.”Just, Vasettha, as when a string of blind men are clinging one to

the other, neither can the foremost see nor can the middle one see nor can the hindmost see—just even so, methinks, Vasettha, is the talk of the Brahmins nothing but blind talk. The first sees not, the middle one

sees not, nor can the latest one. The talk of these Brahmins turns out to be ridiculous, mere words, a vain and empty thing.

32. 33."Is this not a case, Vasettha, of a man falling in love with a woman whom he has not seen?" "Yes, it is," replied Vasettha.

33. 34."Now what think you Vasettha? If people should ask you, 'Well! Good friend! This most beautiful woman in the land, whom you thus love and long for, who is she? Is she a noble lady, or a Brahmin woman, or of the trader class, or a Sudra?'

34. 35."With regard to the origin of Maha Brahma, the so-called creator," the Blessed Lord said, addressing Bhardvaja and Vasettha, "Friends, that being who was first born thinks thus: I am Brahma, the Great Brahma, the Vanquisher, the Unvanquished, the All-seeing, the Disposer, the Lord, the Maker, the Creator, the Chief, the Assignor, the Master of Myself, the father of all that are and are to be. By me are these beings created.

35. 36."This means that Brahma is the father of those that are and are to be.

37."You say that the worshipful Brahma, the Vanquisher, the Unvanquished, Father of all that are and are to be, he by whom we were created, he is permanent, constant, eternal, unchanging, and he will remain so for ever and ever. Then why are we who are created by that Brahma, have come hither, all impermanent, transient, unstable, short-lived, destined to pass away?"

1. 38. To this Vasettha had no answer.

2. 39. His third argument had reference to the Omnipotence of God."If God is Omnipotent and is also the efficient cause of creation, then because of this man cannot have any desire to do anything, nor can there be any necessity to do anything, nor can he have the will to do anything or to put forth any effort. Man must remain a passive creature with no part to play in the affairs of the world. If this is so, why did Brahma create man at all?

3. 40. To this also Vasettha had no answer.

4. 41. His fourth argument was that if God is good then why do men become murderers, thieves, unchaste, liars, slanderers, abusive babblers, covetous, malicious and perverse? The cause of this must be Ishwara. Is this possible with the existence of God who is good?

5. 42. His fifth argument was related to God being Omniscient, just and merciful.

6. 43."If there is a supreme creator who is just and merciful, why then does so much injustice prevail in the world?" asked the Blessed Lord."He who has eyes can see the sickening sight ; why does not Brahma set his creatures right? If his power is so wide that no limits can restrain, why is his hand so rarely spread to bless? Why are his creatures all condemned to suffering? Why does he not give happiness to all?" Why do fraud, lies and ignorance prevail? Why does falsehood triumph over truth? Why does truth and justice fail? I count your Brahma as one of the most unjust, who made a world only to shelter wrong.

7. 44."If there exists some Lord all-powerful to fulfil in every creature, bliss or woe, and action, good or ill, then that Lord is stained with sin. Either man does not work his will or God is not just and good or God is blind."

8. 45. His next argument against the doctrine of God was that the discussion of this question about the existence of God was unprofitable.

9. 46. According to him the centre of religion lay not in the relation of man to God. It lay in the relation between man and man. The purpose of religion is to teach man how he should behave towards other men so that all may be happy.

10. 47. There was also another reason why the Blessed Lord was against belief in the existence of God.

11. 48. He was against religious rites, ceremonies, and observances. He was against them because they were the home of superstition and superstition was the enemy of *Samma Ditthi*, the most important element in his Ashtangmarg.

12. 49. To the Blessed Lord belief in God was the most dangerous thing. For belief in God gave rise to belief in the efficacy of worship and prayer and the efficacy of worship and prayer gave rise to the office of the priest and the priest was the evil genius who created all superstition and thereby destroyed the growth of *Samma Ditthi*.

13. 50. Of these arguments against belief in the existence of God some were practical but the majority of them theological. The Blessed Lord knew that they were not fatal to the belief in the existence of God.

14. 51. It must not, however, be supposed that he had no argument which was fatal. There was one which he advanced which is beyond doubt fatal to belief in God. This is contained in his doctrine of *Patit Samutpad* which is described as the doctrine of Dependent Origination.

15. 52. According to this doctrine, the question whether God exists or does not exist is not the main question. Nor is the question whether God created the universe the real question. The real question is how did the creator create the world. The justification for the belief in God is a conclusion which follows from our answer to the question how was the world created.

16. 53. The important question is : Did God create something out of nothing or did he create something out of something?

17. 54. It is impossible to believe that something could have been created out of nothing.

18. 55. If the so-called God has created something out of something, then that something out of which something new was created has been in existence before he created anything. God cannot therefore be called the Creator of that something which has existed before him.

19. 56. If something has been created by somebody out of something before God created anything then God cannot be said to be the Creator or the first Cause.

20. 57. Such was his last but incontrovertible argument against belief in the existence of God.

21. 58. Being false in premises, belief in God as the creator of the universe is Not—Dhamma. It is only belief in falsehood.

§ 3. *Dhamma Based on Union with Brahma is a False Dhamma*

1. 1. When the Buddha was preaching his religion there was current a doctrine called Vedantism.

2. 2. The tenets of this doctrine are few and simple.

3. 3. Behind the universe there is omnipresent a common principle of life called *Brahma* or *Brahman*.

4. 4. This Brahma is a reality.
5. 5. The Atman or the individual soul is the same as Brahma.
6. 6. Man's liberation lies in making Atman to be one with Brahma. This is the second principle.
7. 7. This unity with Brahma the Atman can achieve by realising that it is the same as Brahman.
8. 8. And the way to make the Atman realise that it is the same as Brahman is to give up Sansara.
9. 9. This doctrine is called *Vedantism*.
10. 10. The Buddha had no respect for the doctrine. He regarded it as based on false premises and producing nothing of value and, therefore, not worth having.
11. 11. This he made clear in his discussion with two Brahmins, Bharadvaj and Vasettha.
12. 12. The Buddha argued that there must be proof before one can accept a thing to be a reality.
13. 13. There are two modes of proof, perception and inference.
14. 14. The Buddha asked, "Has anybody perceived Brahma ; have you seen Brahma ; have you spoken to Brahma ; have you smelt Brahma?"
15. 15. Vasettha said, "No.
16. 16. "The other mode of proof is inadequate to prove the existence of Brahma."
17. 17. "From what is Brahma the inference of?" asked the Buddha. There again was no answer.
18. 18. There are others who argue that a thing exists although it is invisible. So they say that Brahma exists although it is invisible. 19. In this bald statement it is an impossible position.
19. 20. But for argument's sake let it be granted that a thing exists although it is invisible.
20. 21. The best illustration of it is electricity. It exists although it is invisible.
21. 22. This argument is not enough,
22. 23. An invisible thing must show itself in some other form that is visible. Then alone it can be called real.
23. 24. But if an invisible thing does not show itself in any visible form then it is not a reality.

24. 25. We accept reality of electricity although it is invisible because of the results it produces.
25. 26. Electricity produces light. From light we accept the reality of electricity although it is invisible.
26. 27. What does this invisible Brahma produce? Does it produce any visible results?
27. 28. The answer is in the negative.
28. 29. Another illustration may be given. In law too it is common to adopt as a basic concept a fiction— a proposition, the existence of which is not proved but which is assumed to be true.
29. 30. And we all accept such a legal fiction.
30. 31. But why is such a legal fiction accepted?
31. 32. The reason is that a legal fiction is accepted because it gives a fruitful and just result.
32. 33. "Brahma is a fiction. What fruitful result does it give?"
33. 34. Vasettha and Bharadvaj were silent.
34. 35. To drive the argument home he turned to Vasettha and asked "Have you seen Brahma?"
35. 36. "Is there a single one of the Brahmanas versed in three, Vedas who has ever seen Brahma face to face?"
36. 37. "No, indeed, Gautama."
37. 38. "Is there a single one of the teachers of the Brahmanas versed in the three Vedas who have seen Brahma face to face?"
38. 39. "No, indeed, Gautama."
39. 40. "Is there, Vasettha, a single one of the Brahmanas upto the seventh generation who has seen Brahma face to face?"
40. 41. "No, indeed, Gautama."
41. 42. "Well then, Vasettha—did the ancient Rishis of the Brahmanas— did even they speak thus, saying : We know it, we have seen it, where Brahma is, whither Brahma is? "
42. 43. "Not so, Gautama."
43. 44. The Buddha continued his questioning of the two Brahmin boys and said :
44. 45. "Now what think you, Vasettha? Does it not follow, this being so, that the talk of the Brahmanas about union with Brahma turns out to be foolish talk?"

45. 46."Just, Vasettha, as when a string of blind men are clinging one to the other, neither can the foremost see, nor can the middle one see, nor can the hindmost see—just even so, methinks, Vasettha, is the talk of the Brahmanas all but blind talk? The first sees not, the middle one sees not, nor can the last one. The talk of these Brahmanas turns out to be ridiculous, mere words, a vain and empty thing.

46. 47."Just, Vasettha, as if a man should, say, How I long for, how I love the most beautiful woman in this land.'

47. 48."And people should ask him, ' Well ! good friend ! This most beautiful woman in the land, whom you thus love and long for, do you know whether that beautiful woman is a noble lady or a Brahmin woman, or of the trader class, or a Sudra? '

48. 49."But when so asked, he would answer: 'No.'

49. 50."And when people should ask him, ' Well ! good friend ! This most beautiful woman in all the land, whom you love and long for, do you know what the name of that most beautiful woman is, or what her family name, whether she be tall or short or of medium height, dark or brunette or golden in colour, or in what village or town or city she dwells? ' But when so asked, he would answer : 'No. '

50. 51."Now what think you, Vasettha? Would it not turn out that being so, that the talk of that man was foolish talk?"

51. 52."In sooth, Gautama, that would be so,"said the two Brahmins.

52. 53. So Brahma is not real and any religion based upon it is useless.

§ 4. *Belief in Soul is Not Dhumma*

1. 1. The Buddha said that religion based on soul is based on speculation.

2. 2. Nobody has seen the soul or has conversed with the soul.

3. 3. The soul is unknown and unseen.

4. 4. The thing that exists is not the soul but the mind. Mind is different from the soul.

5. 5. Belief in soul He said is unprofitable.

6. 6. A religion based on soul is therefore not worth having.

7. 7. It only ends in creating superstition.

8. 8. The Buddha did not leave the question there. He discussed it in all

its aspects.

9. 9. Belief in the existence of soul is as common as the belief in the existence of God.

10. 10. Belief in the existence of soul was also a part of the Brahmanic Religion.

II. In the Brahmanic Religion the soul is called *Atma* or *Atman*.

1. 12. In the Brahmanic Religion, Atman is the name given to an entity which was held to be abiding separate from the body, but living inside the body constantly existing from the moment of his birth.

2. 13. Belief in the soul included other beliefs, connected with it.

3. 14. The soul does not die with the body. It takes birth in another body when it comes into being.

4. 15. The body serves as an external clothing for the soul.

5. 16. Did the Buddha believe in the soul? No. He did not. His doctrine about the soul is called Anatta, no soul.

17. Given a disembodied soul various questions arise : What is the soul? Where did it come from? What becomes of it on the death of the body? Where does it go? In what form does it exist"hereafter."

How long does it remain there? These questions the Buddha tried to argue out with the upholders of the doctrine of the soul.

6. 18. He first tried to show how vague was the idea about the soul by his usual method of cross examination.

7. 19. He asked those who believed in the existence of the soul, what the soul was like in size and in shape.

8. 20. To Ananda he said the declarations concerning the soul are abounding. Some declare : "My soul has a form and it is minute." Others declare the soul to have form and to be boundless and minute. Others declare it to be formless and boundless.

9. 21. "In so many ways, Ananda, are declarations made concerning the soul."

10. 22. "How is the soul conceived by those who believe in the soul?" was another question raised by the Buddha. Some say, "My soul is feeling." Others say, "Nay, my soul is not feeling, my soul is not sentient"; or again : "Nay, my soul is not feeling, nor is it non-sentient ; my soul has

feeling, it has the property of sentience.”Under such aspects as these is the soul conceived.

11. 23. The Buddha next asked those who believed in the existence of the soul as to the condition of the soul after the death of the body.

12. 24. He also raised the question whether the soul was visible after the death of the body.

13. 25. He found infinite number of vague statements.

14. 26. Does the soul keep its form after the death of the body? He found that there were eight different speculations.

15. 27. Does the soul die with the body? There were innumerable speculations on this.

16. 28. He also raised the question of the happiness or misery of the soul after the body is dead. Is the soul happy after the death of the body? On this also the Recluses and Brahmins differed. Some said it was altogether miserable. Some said it was happy. Some said it is both happy and miserable and some said it is neither happy nor miserable.

17. 29. His answer to all these theories about the existence of the soul was the same which he gave to Cunda.

18. 30. To Cunda he said :”Now, Cunda, to those recluses and Brahmins, who believe and profess any one of these views, I go and say this : ' Is this so, friends? ' And if they reply: ' Yes. This alone is true, any other view is absurd.' I do not admit their claim. Why is this? Because persons hold different opinions on such questions. Nor do I consider this (or that) view on a level with my own, let alone higher.”

19. 31. Now the more important question is what were the arguments of the Buddha against the existence of the soul.

20. 32. The general arguments he advanced in support of his denial of the soul were the same as those which he advanced in support of his denial of the existence of God.

21. 33. He argued that the discussion of the existence of the soul is as unprofitable as the discussion of the existence of God.

22. 34. He argued that the belief in the existence of the soul is as much against the cultivation of *Samma Ditthi* as the belief in the existence of God.

23. 35. He argued that the belief in the existence of the soul is as much a source of superstition as the belief in God is. Indeed in his opinion the belief in the existence of a soul is far more dangerous than the belief in

God. For not only does it create a priesthood, not only is it the origin of all superstition but it gives the priesthood complete control over man from birth to death.

24. 36. Because of these general arguments it is said that the Buddha did not express any definite opinion on the existence of the soul. Others have said that he did not repudiate the theory of the existence of the soul.

Others have said that he was always dodging the issue.

25. 37. These statements are quite incorrect. For to Mahali he did tell in most positive terms that there is no such thing as a soul. That is why his theory of the soul is called Anatta, i.e., non-soul.

26. 38. Apart from the general arguments against the existence of the soul, the Buddha had a special argument against the existence of the soul which he regarded as fatal to the theory of the soul.

27. 39. His theory against the existence of the soul as a separate entity is called Nama-Rupa.

28. 40. The theory is the result of the application of the Vibhaja test, of sharp, rigorous analysis, of the constituent elements of Sentient being otherwise called Human Personality.

29. 41. Nama-Rupa is a collective name for a Sentient Being.

30. 42. According to the Buddha's analysis, a Sentient Being is a compound thing consisting of certain physical elements and certain mental elements. They are called *Khandas*.

31. 43. The Rupa Khanda primarily consists of the physical elements such as earth, water, fire and air. They constitute the Body or Rupa.

32. 44. Besides Rupa Khanda, there is such a thing as Nama Khanda which goes to make up a Sentient Being.

33. 45. This Nama Khanda is called Vinana, or consciousness. This Nama Khanda includes the three mental elements : Vedana (sensation springing from contact of the six senses with the world), Sanna (perception); Sankhara (states of mind). Chetana (consciousness) is sometimes spoken of along with the three other mental states as being one of them. A modern psychologist would say that consciousness is the mainspring from which other psychological phenomena arise. Vinana is the centre of a sentient being.

34. 46. Consciousness is result of the combination of the four elements, Prithi, Apa, Tej and Vayu.

35. 47. An objection is raised to this theory of consciousness propounded by the Buddha.

36. 48. Those who object to this theory ask, "How is, consciousness produced?"

37. 49. It is true. that consciousness arises with birth and dies with death. All the same, can it be said that consciousness is the result of the combination of the four elements?

38. 50. The Buddha's answer was not that the co-existence or aggregation of the physical elements produces consciousness. What the Buddha said was that wherever there was rupa or kaya there was consciousness accompanying it.

39. 51. To give an analogy from science, there is an electric field and wherever there is an electric field it is always accompanied by a magnetic field. No one knows how the magnetic field is created or how it arises. But it always exists along with the electric field.

40. 52. Why should not the same relationship be said to exist between body and consciousness?

41. 53. The magnetic field in relation to the electric field is called an induced field. Why cannot consciousness be called an induced field in relation to Rupa-Kaya.

54.' The Buddha's argument against the soul is not yet complete. He had further to say something of importance.

1. 55. Once consciousness arises man becomes a sentient being. Consciousness is, therefore, the chief thing in man's life.

2. 56. Consciousness is cognitive, emotional and volitional.

3. 57. Consciousness is cognitive when it gives knowledge, information, as appreciating or apprehending, whether it be appreciation of internal facts or of external things and events.

4. 58. Consciousness is emotional when it exists in certain subjective states, characterised by either pleasurable or painful tones, when emotional consciousness produces feeling.

5. 59. Consciousness in its volitional stage makes a being exert himself for the attainment of some end. Volitional consciousness gives rise to what we call will or activity.

6. 60. It is thus clear that all the functions of a sentient being are performed by the sentient being through and as a result of consciousness.
7. 61. After this analysis the Buddha asked what in are the functions which are left to be performed by the soul? All functions assigned to the soul are performed by consciousness.
8. 62. A soul without any function is an absurdity.
9. 63. This is how the Buddha disproved the existence of the soul.
10. 64. That is why. the existence of the soul cannot be a part of Dhamma. § 5. *Belief in Sacrifices is Not—Dhamma*

(i)

1. 1. The Brahmanic religion was based upon sacrifices.
2. 2. Some sacrifices were classified as *Nittya* and other sacrifices were classified as *Naimittik*.
3. 3. The *Nittya* sacrifices were obligations and had to be performed whether one got any fruit therefrom or not.
4. 4. The *Naimittik* sacrifices were performed when the performer wanted to gain something by way of worldly advantage.
5. 5. The Brahmanic sacrifices involved drinking, killing animals and merry-making.
6. 6. Yet these sacrifices were held as religious observances.
7. 7. The Buddha declined to regard a religion based on sacrifices as worth having.
8. 8. He has given his reasons to many a Brahmin who went to have a controversy with him as to why sacrifices were not part of religion.
9. 9. It is reported that there were three Brahmins who had a controversy with him on the subject.
10. 10. They were Kutadarita, Ujjaya and the third was Udayin.
11. 11. Kutadanta the Brahmin requested the Blessed One to tell him what he thought about the value of a sacrifice.
12. 12. The Blessed One said: "Well then, O Brahmin, give ear and listen attentively and I will speak."
13. 13. "Very well, sir," said Kutadanta in reply ; and the Blessed One spoke as follows :
14. 14. "Long ago, O Brahmin, there was a king by name Maha Vigeta,

mighty, with great wealth and large property; with stores of silver and gold, of aids to enjoyment, of goods and corn ; with his treasure-houses and his garner full.

15. 15."Now when King Maha Vigeta was once sitting alone in meditation he became anxious at the thought: ' I have in abundance all the good things a mortal can enjoy. The whole wide circle of the earth is mine by conquest to possess. It were well if I were to offer a great sacrifice that should ensure me weal and welfare for many days.'

16. 16."Thereupon the Brahmin who was chaplain said to the king : ' The king's country, sire, is harassed and harried. There are dacoits abroad who pillage the villages and townships and who make the roads unsafe. Were the king, so long as that is so, to levy a fresh tax, verily his majesty would acting wrongly.

17. 17." But perchance his majesty might think : 'I'll soon put a stop to these scoundrels' game by degradation and banishment, and fines and bonds and death ! ' But their licence cannot be satisfactorily put a stop to. The remnant left unpunished would still go on harassing the realm.

18. 18."Now there is one method to adopt to put a thorough end to this order. Whosoever there be in the king's realm who devote themselves to keeping cattle and the farm, to them let His Majesty the King give food and seed-corn. Whosoever there be in the king's realm who devote themselves to trade, to them let His Majesty the King give capital. Whosoever there be in the king's realm who devote themselves to government service, to them let His Majesty the King give wages and food.

19. 19. "' Then those men, following each his own business, will no longer harass the realm; the king's revenue will go up; the country will be quiet and at peace.; and the populace, pleased one with another and happy, dancing their children in their arms, will dwell with open doors without fear.'

20. 20."Then King Maha Vigeta, O Brahmin, accepted the word of his chaplain, and did as he had said. And those men, following each his business, harassed the realm no more. And the king's revenue went up. And the country became quiet and at peace. And the populace, pleased one with another and happy, dancing their children in their arms, dwelt with open doors.

21. 21."When peace and order was restored. King Maha Vigeta had

his chaplain called again and said :

* The disorder is at an end. The country is at peace. I want to offer that great sacrifice—let the Venerable One instruct me how—for my weal and my welfare for many days.'

1. 22."The chaplain, replying to the king, said, * Be it so. Let His Majesty the King send invitations to those in the town and the country in his realm who are Kshatriyas, vassals of his; who are ministers and officials of his or who are Brahmins of position, or who are householders of substance, saying: ' I intend to offer a great sacrifice. Let the Venerable Ones give their sanction to what will be to me for weal and welfare for many days.'

2. 23."Then the king, 0 Brahmin Kutadanta, accepted the word of his chaplain, and did as he had said. And they each—Kshatriya and Ministers and Brahmins and householders—made a like reply: ' Let His Majesty the King celebrate the sacrifice. The time is suitable, 0 King ! '

3. 24."King Vigeta was wise and gifted in many ways. And his chaplain was equally wise and gifted.

4. 25."The chaplain, 0 Brahmin, before the sacrifice had begun, explained to the king what it would involve.

5. 26. ' ' Should His Majesty the King, before starting on the great sacrifice or whilst he is offering the great sacrifice, or when the great sacrifice has been offered, feel any such regret as : ' Great alas, has been the portion of my wealth used up herein,' let not the king harbour such regret,

6. 27."And further, 0 Brahmin, the chaplain, before the sacrifice had begun, in order to prevent any compunction that might afterwards arise as regards those who had taken part therein, said: ' Now there will come to your sacrifice, sire, men who destroy the life of living things, and men who refrain therefrom— men who take what has not been given, and men who refrain therefrom, men who act evilly in respect of lusts, and men who refrain therefrom, men who speak lies, and men who do not, men who slander, and men who do not, men who speak rudely, and men who do not, men who chatter vain things and men who refrain therefrom, men who covet, and men who covet not, men who harbour ill will and men who harbour it not, men whose views are Wrong, and men whose views

are right. Of each of these let them, who do evil, alone with their evil. For them who do well let Your Majesty offer, for them, sire, arrange the rites, them let the king gratify, in them shall your heart within find peace.'

7. 28."And further, 0 Brahmin, at that sacrifice neither were any oxen slain, neither goats, nor fowls, nor fatted pigs, nor were any kinds of living creatures put to death. No trees were cut down to be used as posts, no Dabbha grasses mown to strew around the sacrificial spot. And the slaves and messengers and workmen there employed were driven neither by rods nor fear, nor carried on their work weeping with tears upon their faces. Whose chose to help, he worked who so chose not to help, worked not. What each chose to do, he did; what they chose not to do, that was left undone. With ghee, and oil and butter, and milk and honey, and sugar only was that sacrifice accomplished.

8. 29."Let your sacrifice be such as that of King Vigeta if you at all wish to perform any sacrifice. Sacrifices are a waste. Animal sacrifices are cruelties. Sacrifices cannot be part of religion. It is a worst form of religion which says you can go to heaven by killing an animal."

9. 30. I was inclined to ask"Is there, 0 Gautama, any other sacrifice with more fruit and more advantage than killing animals?"

10. 31."Yes, 0 Brahmin, there is."

11. 32."And what, 0 Gautama, may that be?"

33."When a man with trusting heart takes upon himself the precepts—abstinence from destroying life; abstinence from taking what has not been given; abstinence from evil conduct in respect of lusts; abstinence from lying words; abstinence from strong, intoxicating, maddening drinks, the

root of carelessness that is a sacrifice better than open largesse, better than perpetual alms, better than the gift of dwelling places, better than accepting guidance."

12. 34. And when he had thus spoken, Kutadanta the Brahmin said to the Blessed One:"Most excellent, 0 Gautama, are the words of thy mouth, most excellent."

(ii)

1. 1. Now the Brahmin Ujjaya said this to the Exalted One:

2. 2."Pray does the worthy Gautama praise sacrifice?"

3. 3."No Brahmin, I do not praise every sacrifice. Yet I would not withhold praise from every sacrifice. In whatever sacrifice. Brahmin, cows are slaughtered, goats and sheep are slaughtered, poultry and pigs are slaughtered and divers living creatures come to destruction— such sacrifice. Brahmin, which involves butchery, I do not praise." "Why so?"

4. 4."To such a sacrifice. Brahmin, involving butchery, neither the worthy ones nor those who have entered on the worthy way draw near.

5."But in whatever sacrifice. Brahmin, cows are not slaughtered—and living creatures come not to destruction, such sacrifice not involving butchery,

I do praise; such as, for instance, a long-established charity, an oblation for the welfare of the family."

5. 6."Why so?" "Because, Brahmin, the worthy ones, those who have entered on the worthy way, do draw near to such- a sacrifice which involves not butchery."

(iii)

1. 1. The Brahmin Udayin asked the same question to the Exalted One as was asked by the Brahmin Ujjaya:

2. 2."Pray, does the worthy Gautama praise sacrifice?" The Buddha gave the same answer which he gave to Ujjaya. 3. He said:

"Fit sacrifice performed in season due And free from cruelty, to such draw near Those well trained in the God-life, even those Who have the veil rolled back while (yet on earth), Who have transcended time and going. Such do the enlightened praise,' those skilled in merit," Whether in sacrifice or act of faith, Oblation fitly made with heart devout To that good field of Merit,— those who live . The Good—life, sacrificed, conferred,—so given Lavish the offering; devas therewith are pleased, Thus offering, the thoughtful, thereby becoming wise, Wins the blissful world from suffering free"

§6. Belief Based on Speculation is Not—Dhamma

(i)

1. It was usual to ask such questions as (1) Was I in ages past? (2)

Was I not in ages past? (3) What was I then? (4) From what did I pass to what? (5) Shall I be in ages to come? (6) Shall I not be in ages to come? (7) What shall I then be? (8) How shall I then be? (9) From what shall I pass to what? Or, again, it is Self today about which he is in doubt, asking himself—(1) Am I?

(2) Am I not? (3) What am I? (4) How am I? (5) Whence came my being? (6) Whither will it pass?”

2. 2. As regards the Universe various questions were raised. Some of them were as follows -

3. 3.”How was the Universe created? Is it everlasting?”

4. 4. In answer to the first question some said everything was created by Brahma—others said it was created by Prajapati.

5. 5. In answer to the second question some said it was everlasting. Others said it was not. Some said it was finite. Others said. it was infinite.

6. 6. These questions the Buddha refused to entertain. He said that they could only be asked and entertained by wrong-headed people. –

7. 7. To answer these questions required omniscience which nobody had.

8. 8. He said that he was not omniscient enough to answer these questions. No one could claim to know all that is to be known nor what we wish to know at any time is known at the time. There is always something that is unknown.

9. 9. It is for these reasons that the Buddha excluded such doctrines from his religion.

10. 10. He regarded a religion which made such doctrines a part of it as a religion not worth having.

(ii)

1. 1. The doctrines with which the contemporaries of the Buddha had made the basis of their religion were concerned with (1) Self; and (2) the origin of the Universe.

2. They raised certain questions about the self. They asked :”(1) Was I in ages past? (2) Was I not in ages past? (3) What was I then? (4) From what did I pass to what? (5) Shall I be in ages to come? (6) Shall I not be in ages to come? (7) What shall I then be? (8) How. .shall I then be?

(9) From what shall I pass to what? Or, again, it is Self today about which he is in doubt, asking himself—(1) Am I? (2) Am I not? (3) What am I, (4) How am I, (5) Whence came my being? (6) Whither will it pass?”

2. 3. Others raised the question regarding the origin of the Universe.

3. 4. Some said it was created by Brahma.

4. 5. Others said it was .created by Prajapati sacrificing himself.

5. 6. Other teachers had other questions to raise :”The world is everlasting,—the world is not everlasting—the world is finite,—the world is infinite, the body is the life (jiva),—the body is the one thing and the life another,—truth-finder exists after death,—a truth-finder does not exist after death,—he both exists and does not exist after death,—he neither exists nor does not exist after death.”

6. 7. These were questions which the Buddha said could be asked by wrong-headed persons.

7. 8. There were three reasons why the Buddha condemned these religious theories.

8. 9. In the first place, there was no reason to make them part of religion. ’

9. 10. In the second place, to answer these questions required omniscience which nobody had. He emphasised this in his addresses.

10. 11. He said that at one and the same time, no one can know and see everything. Knowledge is never final. There is always something more to be known.

11. 12. The third argument against these theories was that they were merely speculative. They are not verified nor are they verifiable.

12. 13. They were the result of imagination let .loose. There was no reality behind them.

13. 14. Besides of what good were these speculative theories to man in his relation to men? None whatever.

14. 15. The Buddha did not believe that the world was created. He believed that the world had evolved.

§ 7. *Reading Books of Dhamma is Not— Dhamma*

1. 1. The Brahmins put all their emphasis upon knowledge. They taught that knowledge was the be-all and end-all of every thing. Nothing further

was to be considered.

2. 2. The Buddha was on the other hand an upholder of education for all. Besides, he was more concerned with the use of knowledge a man is likely to make than with knowledge itself.

3. 3. Consequently he was very particular to emphasise that he who has knowledge must have Sila (Virtue) and that knowledge without Sila (Virtue) was most dangerous.

4. 4. The importance of Sila as against Prajna is well illustrated by what he told the Bhikku Patisena.

5. 5. In olden times when Buddha was residing at Sravasti, there was an old mendicant called Patisena who being by nature cross and dull, could not learn so much as one Gatha by heart.

6. 6. The Buddha accordingly ordered 500 Arahatas day by day to instruct him, but after three years he still was unable to remember even one Gatha.

7. 7. Then all the peoples of the country (the four orders of people) knowing his ignorance, began to ridicule him, on which the Buddha, pitying his case, called him to his side, and gently repeated the following stanza : “He who guards his mouth, and restrains his thoughts, he who offends not with his body, the man who acts thus shall obtain deliverance.”

8. 8. Then Patisena, moved by a sense of the Master's goodness to him, felt his heart opened, and once he repeated the stanza.

9. 9. The Buddha then addressed him further—”You now, an old man, can repeat a stanza only, and men know this, and they will still ridicule you, therefore, I will now explain the meaning of the verse to you, and do you on your part attentively listen.”

10. 10. Then the Buddha declared the three causes connected with the body, the four connected with the mouth, and the three connected with the thoughts, by destroying which men might obtain deliverance, on which the mendicant, fully realizing the truth thus explained, obtained the condition of an Arahata.

11. 11. Now, at this time, there were 500 Bhikkhunis dwelling in their Vihara, who sent one of their number to the Buddha to request him to send them a priest to instruct them in the Dhamma.

12. 12. On hearing their request the Buddha desired the old mendicant Patisena to go to them for this purpose.

13. 13. On knowing that this arrangement had been made, all the nuns began to laugh together, and agreed on the morrow, when he came, to say the Gatha wrong (backward), and so confuse the old man and put him to shame.

14. 14. Then on the morrow when he came, all the Bhikkhunis, great and small, went forth to salute him and as they did so, they looked at one another and smiled.

15. 15. Then sitting down, they offered him food. Having eaten and washed his hands, they then begged him to begin his sermon. On which the aged mendicant ascended the elevated seat, and sitting down, began:

16. 16. "Sisters! My talent is small, my learning is very little. I know only one Gatha, but I will repeat that and explain its meaning. Do you listen with attention and understand."

17. 17. Then all the young nuns began to attempt to say the Gatha backwards; but lo! they could not open their mouths; and filled with shame, they hung down their heads in sorrow.

18. 18. Then Patisena having repeated the Gatha, began to explain it, as the Buddha instructed him.

19. 19. Then all the Bhikkhunis hearing his words, were filled with surprise, and rejoicing to hear such instruction, with one heart they received it, and became Arahatas.

20. 20. On the day after this, the King Prasenjit invited the Buddha and the whole congregation of priests to assemble at his palace to partake of hospitality.

21. 21. The Buddha therefore recognizing the superior and revered appearance of Patisena, desired him to bear his alms-dish and follow him as he went.

22. 22. But when they came to the palace gate, the porter, knowing his character (antecedents), would not let him go into the hall, saying: "We have no hospitality for a priest who knows but one Gatha; there is no room for such common fellows as you— make place for your betters and begone."

23. 23. Patisena accordingly sat down outside the door.

24. 24. The Buddha now ascended the dais, after having washed his hands, and to the arm of Patisena, with the alms-dish in its hand, entered the room.

25. 25. Then the king, the ministers, and all the assembly seeing this

sight, were filled with astonishment, and said, "Ah ! Who is this?"

26. 26. On which the Buddha replied, "It is Patisena, the mendicant. He has but just obtained enlightenment, and I desired him to bear my alms-dish behind me; but the porter has refused him admission."

27. 27. On this he was admitted and entered the assembly.

28. 28. Then Prasenjit, turning, to Buddha, said : "I hear that this Patisena is a man of small ability, and knows only one Gatha, how, then, has he obtained the supreme wisdom?"

- 29. To which Buddha replied : "Learning need not be much, conduct (Sila) is the first thing.

30. "This, Patisena, has allowed the secret virtue of the words of this one Gatha to penetrate his spirit ; his body, mouth, and thoughts have obtained perfect quietude; for though a man knows ever so much, if his knowledge reaches not to his life, to deliver him from the power which leads to destruction, what benefit can all his learning be?"

31, Then the Buddha . "Although a man repeats a thousand stanzas (sections), but understands not the meaning of the lines he repeats, his performance is not equal to the repetition of one sentence well understood, which is able when heard to control thought. To repeat a thousand words without understanding, what profit is there in this? But to understand one truth, and hearing it, to act accordingly, this is to find deliverance.

1. 33. "A man may be able to repeat many books but if he cannot explain them what profit is there in this? But to explain one sentence of the law and to walk accordingly, this is the way to find supreme wisdom."

2. 34. On hearing these words, the two hundred bhikkhus, the king and his ministers were filled with joy.

§ 8. *Belief in the infallibility of Books of Dhamma is Not— Dhamma*

1. 1. The Brahmins had declared that the Vedas were not only sacred but in point of authority they were final.

2. 2. Not only were the Vedas declared by the Brahmins to be final but they were declared by them to be infallible.

3. 3. The Buddha was totally opposed to the Brahmins on this point.
4. 4. He denied that the Vedas were sacred. He denied that whatever the Vedas said was final. He denied that the Vedas were infallible.
5. 5. There were many teachers who had taken the same position as he had done. However, later on they or their followers all gave in order to win respect and goodwill from the Brahmins for their systems of philosophy. But the Buddha never yielded on this issue.
6. 6. In the Tvijja Sutta the Buddha declared that the Vedas were a waterless desert, a pathless jungle, in fact perdition. No man with intellectual and moral thirst can go to the Vedas and hope to satisfy his thirst.
7. 7. As to infallibility of the Vedas, he said nothing is infallible, not even the Vedas. Everything, he said, must be subject to examination and re-examination.
8. 8. This he made clear in his sermon to the Kalamas.
9. 9. Once the Blessed One, while passing through the land of the Kosalas accompanied by a large following of disciples, came to the town of Kesaputta which was inhabited by the Kalamas.
10. 10. When the Kalamas came to know of his arrival they betook themselves thither where the Blessed One was and sat down on one side. So seated, the Kalamas of Kesaputta spoke thus to the Blessed One :
 11. 11."There are, Lord, some ascetics and recluses who come to Kesaputta and who elucidate and exalt their own views, but they break up, crush down, revile and oppose the views of others. And there be other ascetics and recluses, Lord, who come to Kesaputta, and they too expound and magnify their own beliefs, but destroy, suppress, despise and set themselves against the beliefs of others.
 12. 12."And so, Lord, we are in uncertainty and doubt, knowing not which among these venerable ascetics speaks truth and which falsehood."
 13. 13."Good cause, indeed, have you Kalamas to be uncertain ; good cause have you to doubt,"said the Blessed One."Truly, upon just occasion has uncertainty and doubt arisen in you."
 14. 14."Come, O you Kalamas,"continued the Lord,"do not go merely by what you hear ; do not go merely by what has been handed down from one to another ; do not go by what is commonly reported ; do not go merely by what is found written in the scriptures ; do not go by subtleties of

reasoning, do not go by subtleties of logic ; do not go merely by considerations based upon mere appearances ; do not go merely by agreeable beliefs and views ; do not go merely by what looks to be genuine ; do not go merely by word of some ascetic or superior.”

14. 15.”What, then, should we do? What test should we apply?”asked the Kalamas.

15. 16.”The tests are these,”replied the Blessed One;”ask. yourselves, do we know whether : ' These things are insalutary ; these things are blameworthy ; these things are reprehended by the wise ; these things being done or attempted lead to ill-being and to suffering.' "

16. 17.”Kalamas, you should go further and ask whether the doctrine taught promotes craving, hatred, delusion, and violence.

17. 18.”This is not enough, Kalamas, you should go further and see whether the doctrine is not likely to make a man captive of his passions, and is not likely to lead him to kill living creatures ; take what has not been given to him ; go after another's wife ; utter falsehood, and cause others to practise like deeds?

18. 19.”And finally you should ask : ' Whether all this does not tend to his ill-being and suffering.' "

19. 20.”Now, Kalamas, what think you?

20. 21.”Do these things tend to man's ill-being or well-being?”

21. 22. -"To his ill-being, Lord,”replied the Kalamas.

22. 23.”What think you, Kalamas,—are these things salutary or insalutary?”

23. 24.”They are insalutary. Lord.”

24. 25.”Are these things blameworthy?”

25. 26.”Blameworthy, Lord,”replied the Kalamas.

26. 27.”Reprehended by the wise or approved by the wise?”

27. 28.”Reprehended by the wise,”replied the Kalamas.

28. 29.”Being done or attempted, do they lead to ill-being and to suffering?”

29. 30.”Done or attempted, Lord, they lead to ill-being and to suffering.”

30. 31.”A scripture which teaches this cannot be accepted as final or infallible?”

31. 32.”No, Lord,”said the Kalamas.

32. 33.”But this, O Kalamas, is just what I have said. What I have said

is”do not go merely by what you hear; do not go merely by what has been handed down from one to another; do not go merely by subtleties of reasoning; do not go by subtleties of logic ; do not go by considerations based upon mere appearances ; do not go merely by agreeable beliefs and views ; do not go merely by the word of some ascetic or superior.

33. 34.”Only when of yourselves you indeed know : These things are insalutary ; these things are blameworthy ; these things are reprehended by the wise ; these things being done or attempted lead to ill-being and to suffering '—then, Kalamas, you should put them away.”

34. 35.”Wonderful, Lord, most wonderful! We go to Lord, the Blessed One, for refuge, and to his Teachings. As followers. Lord, may the Blessed One accept us, from this day henceforth long as life shall last, we take our refuge in you.”

35. 36. The substance of the argument is plain. Before you accept anybody's teachings as authoritative, do not go by the fact that it is contained in the scriptures, do not go by the subtleties of logic ; do not go by considerations based upon mere appearances; do not go merely by the fact that beliefs and views preached are agreeable ; do not go merely because they look to be genuine; do not go merely by the fact that the beliefs and views are those of some ascetic or superior.

36. 37. But consider whether the beliefs and views sought to be inculcated are salutary or insalutary, blameworthy or blameless, lead to well-being or ill-being.

37. 38. It is only on these grounds that one can accept the teachings of anybody.

PART V : WHAT IS SADDHAMMA

Section I—*The Functions of Saddhamma.*

1. To cleanse the Mind of its impurities.
2. To make the world a Kingdom of Righteousness.

Section II—*Dhamma to be Saddhamma must promote Pradnya.*

1. 1. Dhamma is Saddhamma when it makes learning open to all.
2. 2. Dhammaris Saddhamma when it teaches that mere learning is not enough. It may lead to pedantry.
3. 3. Dhamma is Saddhamma when it teaches that what is needed is Pradnya.

Section III—*Dhamma lo be Saddhamma must promote Maitri.*

1. 1. Dhamma is Saddhamma only when it teaches that mere Pradnya is not enough. It must be accompanied by Sila.
2. 2. Dhamma is Saddhamma only when it teaches that besides Pradnya and Sila what is necessary is Karuna.
3. 3. Dhamma is Saddhamma only when it teaches that more than Karuna what is necessary is Maitri. Section IV—*Dhamma lo be Saddhamma must pull down all social barriers.*

1. 1. Dhamma to be Saddhamma must break down barriers between man and man.
2. 2. Dhamma to be Saddhamma must teach that worth and not birth is the measure of man.
3. 3. Dhamma to be Saddhamma must promote equality between man and man.

THE FUNCTIONS OF SADDHAMMA

§ 1. *To Cleanse the Mind of its Impurities*

1. 1. Once when the .Blessed Lord was residing at Shravasti, Prasenjit, the king of the Kosalas, came to the place where he was staying and descending from his chariot, approached the Teacher with the deepest reverence.
2. 2. And invited him on the morrow to enter the city and partake of his hospitality, with a view to exhibit to the people the excellence of his person and doctrine, that they might believe in him.
3. 3. The Buddha having consented, on the morrow entered the city

with all his disciples, and having passed through the four cross streets of the town, he came to the place appointed and sat down.

4. 4. After finishing the meal, he began, on the request of the king, to preach in the midst of the four highways, whilst his auditors were very many.

5. 5. At this time there were two merchants listening to him.

6. 6. One of them reflected, "What excellent wisdom on the part of the king to have such doctrines as these publicly preached! How wide their application, how searching their character!"

7. 7. The other reflected thus, "What folly is this on the part of the king, bringing this man here to preach!

8. 8. "Like the calf that follows the cow, here and there, fastened to a vehicle she draws, by eating as it goes, so is- this Buddha following the king." The two merchants having departed from the city came to an inn where they put up.

9. 9. In taking some wine the good merchant was restrained and protected by the four guardian spirits that watch over the world.

10. 10. The other on the contrary was incited by an evil spirit to drink on, till he was overpowered by sleep, and lay down in the road near the inn.

11. 11. Early in the morning, the merchants' wagons leaving the place, the drivers not perceiving the man lying in the road, crushed him to death by the wagon wheels.

12. 12. The other merchant, having come to a distant country, was selected by the genuflection of a sacred horse to succeed the king; and he accordingly was appointed to the throne.

13. 13. After this, considering the strange turn, events had taken, he returned and invited the Buddha to visit him, and preach to his people.

14. 14. On which occasion the World-honoured One declared the reason of the death of the evil-minded merchant, and the prosperity of him who thought wisely, and then added these lines:

15. 15. "The mind is the origin of all this is; the mind is the master, the mind is the cause.

16. 16. "In the midst of the mind there are evil thoughts, then the words are evil, the deeds are evil, and the sorrow which results from sin follows that man, as the chariot wheel follows him (or it) who draws it,

17. 17. "The mind is the origin of all that is; it is the mind that commands, it is the

mind that contrives.

18. 18. "If in the mind there are good thoughts, then the words are good and the deeds good, and the happiness which results from such conduct follows that man, as the shadow accompanies the substance."

19. 19. On hearing these words, the king and his ministers, with countless others, were converted, and became disciples.

§ 2. To Make the World a Kingdom of Righteousness

1. 1. What is the purpose of Religion?
2. 2. Different religions have given different answers.
3. 3. To make man seek after God and to teach him the importance of saving his soul is the commonest answer one gets to this question.
4. 4. Most religions speak of three kingdoms.
5. 5. One is called the kingdom of heaven. The second is called the kingdom of earth and the third is called the kingdom of hell.
6. 6. This kingdom of heaven is said to be ruled by God. The kingdom of hell is described to be a place where the supremacy of the Evil One is undisputed. The kingdom of earth is a disputed field. It is not under the dominance of the Evil One. At the same time God's sovereignty does not extend to it. It is hoped that one day it will.
7. 7. In some religions the kingdom of heaven is said to be a kingdom in which Righteousness prevails no doubt because it is directly ruled by God.
8. 8. In other religions the kingdom of heaven is not on earth. It is another name for heaven. It can be reached by one who believes in God and his Prophet. When he reaches heaven all the carnal pleasures of life are placed within the reach of all those who are faithful.
9. 9. All religions preach that to reach this kingdom of heaven should be the aim of man and how to reach it is the end of all.
10. 10. To the question "What is the purpose of religion?" the Buddha's answer is very different.
11. 11. He did not tell people that their aim in life should be to reach some imaginary heaven. The kingdom of righteousness lies on earth and is to be reached by man by righteous conduct.
12. 12. What he did was to tell people that to remove their misery each

one must learn to be righteous in his conduct in relation to others and thereby make the earth the kingdom of righteousness.

13. 13. It is this which distinguishes his religion from all other religions.

14. 14. His religion emphasizes Panch Sila, the Ashtanga Marga and the Paramitas.

15. 15. Why did the Buddha make them the basis of his religion? Because they constitute a way of life which alone can make man righteous.

16. 16. Man's misery is the result of man's inequity to man.

17. 17. Only righteousness can remove this inequity and the resultant misery.

18. 18. That is why he said that religion must not only preach but must inculcate upon the mind of man the supreme necessity for being righteous in his conduct

19. 19. For the purpose of inculcating righteousness religion, he said, had certain other functions to undertake.

20. 20. Religion must teach man to know what is right and to follow what is right.

21. 21. Religion must 'teach man to know what is wrong and not to follow what is wrong.

22. 22. Besides these purposes of religion he emphasised two other purposes which he regarded as of supreme importance.

23. 23. The first is training of man's instincts and dispositions as distinguished from offering prayers or performing observances or doing sacrifices.

24. 24. This the Buddha has made clear in his exposition of Jainism in the Devadaha Sutta.

25. 25. What Mahavira, the founder of Jainism, affirmed was that whatsoever the individual experiences—be it pleasant or unpleasant, all comes from acts done in former births.

26. 26. That being so, by expiration and purge of former misdeeds and by not committing fresh misdeeds, • nothing accrues for the future: as nothing accrues for the future, the misdeeds die away; as misdeeds die away, misery dies away : as misery dies away, feelings die away : and as feelings die away, all misery will wear out and pass.

27. 27. This is what Jainism affirmed,

28. 28. On this the Buddha asked this question:”Do you know that, here

and now, wrong dispositions have been got rid of and right dispositions acquired?"

29. 29. The answer was "No."

30. 30. "What is the use," asked the Buddha, "of a purge for former misdeeds, what is the use of not committing fresh misdeeds, if there is no training of the mind to turn bad disposition into good disposition."

31. 31. This was in his opinion a very serious defect in religion. *A good disposition is the only permanent foundation of and guarantee of permanent goodness.*

32. 32. That is why the Buddha gave the first place to the training of the mind which is the same as the training of a man's disposition.

33. 33. The second thing to which he gave great importance is courage to stand by what is right even if one is alone.

34. 34. In the Sallekha-Sutta the Buddha has emphasised this point.

35. 35. This is what he has said :

36. 36. "You are to expunge by resolving that, though others may be harmful, you will be harmless.

37. 37. "That though others may kill, you will never kill.

38. 38. "That though others may steal, you will not.

39. 39. "That though others may not lead the higher life, you will.

40. 40. "That though others may lie, traduce, denounce, or prattle, you will

41. 41. "That though others may be covetous, you will covet not.

42. 42. "That though others may be malignant, you will not be malignant.

43. 43. "That though others may be given over to wrong views, wrong aims, wrong speech, wrong actions, and wrong concentration, you must follow (the Noble Eightfold Path in) right outlook, right aims, right speech, right actions, right mode of livelihood, right effort, right mindfulness and right concentration.

44. 44. "That though others are wrong about the truth and wrong about Deliverance, you will be right about truth and right about Deliverance.

45. 45. "That though others may be possessed by sloth and torpor, you will free yourselves therefrom.

46. 46. "That though others may be puffed up. you will be humble-minded.

47. 47. "That though others may be perplexed by doubts, you will be free

from them.

48. 48."That though others may harbour wrath, malevolence, envy, jealousy, niggardliness, avarice, hypocrisy, deceit, imperviousness, arrogance, forwardness, association with bad friends, slackness, unbelief, shamelessness, unscrupulousness, lack of instruction, inertness, bewilderment, and unwisdom, you will be the reverse of all these things.

49. 49."That though others may clutch at and hug the temporal nor loose their hold thereon, you will clutch and hug the things that are not temporal, and will ensue Renunciation.

50. 50."I say it is the development of the will which is so efficacious for right states of consciousness, not to speak of act and speech. And therefore, Cunda, there must be developed the will to all the foregoing resolves I have detailed."51. Such is the purpose of religion as conceived by the Buddha.

SECTION II

DHAMMA TO BE SADDHAMMA MUST PROMOTE

PRADNYA

§ 1. Dhamma is Saddhamma when it Makes Learning Open to All

1. 1. The Brahminic doctrine was that acquisition of knowledge cannot be thrown open to all. It must necessarily be limited to a few.

2. 2. They permitted acquisition of knowledge only to the Brahmins, Kshatriyas and Vaishyas. But it was only to the male sex of these three classes.

3. 3. All women, no matter whether they belonged to the Brahmin, Kshatriya and Vaishyas, and all Shudras, both males and females, were prohibited from acquiring knowledge, even from acquiring literacy.

4. 4. The Buddha raised a revolt against this atrocious doctrine of the Brahmins.

5. 5. He preached that the road to knowledge must be open to all—to males as well as to females.

6. 6. Many Brahmins tried to controvert his views. His controversy with

the Brahmin Lohikka throws great light on his views.

7. 7. The Exalted One, when once passing on a tour through the Kosala districts with a multitude of the members of the Order, arrived at Salavatika, a village surrounded by a row of sala trees.

8. 8. Now at the time, Lohikka the Brahmin was living at Salavatika, a spot teeming with life, with much grassland and woodland and corn, on a royal domain granted him by King Pasenadi of Kosala, as a royal gift, with power over it as if he were the king.

9. 9. Lohikka the Brahmin was of opinion that if a Samana or a Brahmana acquired knowledge, he should not communicate it to the women or to the Shudras.

10. 10. Then the Brahmin Lohikka heard that the Blessed Lord was staying in Salavatika.

11. 11. Having heard of this he said to Bhesika the barber :”Come now, good Bhesika, go where the Samana Gotama is staying, and, on your arrival, ask in my name as to whether his sickness and indisposition has abated, as to his health and vigour and condition of ease ; and speak thus :”May”the venerable Gotama, and with him the brethren of the Order, accept tomorrow's meal from Lohikka the Brahmin.”

12. 12.”Very well, sir,”said the barber.

13. 13. Acquiescing in the word of Lohikka the Brahmi'i, he did so even as he had been enjoined. And the Exalted One consented, by silence, to his request.

14. 14. Early next morning, the Exalted One went robed, and carrying his bowl with him, with the brethren of the Order, towards Salavatika.

15. 15. Bhesika, the barber, who had been sent by Lohikka to fetch the Blessed One, walked step by step, behind the Exalted One. On the way he told the Blessed One that Lohikka the Brahmin held the wicked opinion that a Samana or a Brahmana shall not communicate any knowledge or learning to women and the Shudras.

16. 16.”That may well be, Bhesika, that may well be,”replied the Blessed One.

17. 17. And the Exalted One went on to the dwelling place of Lohikka the Brahmin, and sat down on the seat prepared for him.

18. 18. And Lohikka the Brahmin served the Order, with the Buddha at its head, with his own hand, with sweet food both hard and soft, until they

refused any more.

19. 19. And when the Exalted One had finished his meal, and had cleansed the bowl and his hands, Lohikka the Brahmin, brought a low seat and sat down beside him.

20. 20. And to him, thus seated, the Exalted One said : "Is it true, what they say, Lohikka, that you hold the view that a Samana or a Brahmana should not communicate any knowledge or learning to women and Shudras,?"

21. 21. "That is so, Gotama," replied Lohikka.

22. 22. "Now what think you, Lohikka? Are you not established at Salavatika?" "Yes, that is so, Gotama."

23. 23. "Then suppose, Lohikka, one were to speak thus: ' Lohikka the Brahmin has a domain at Salavatika. Let him alone enjoy all the revenue and all the produce of Salavatika, allowing nothing to anybody else!' Would the utterer of that speech be a danger-maker as touching the men who live in dependence upon you or not?"

24. 24. "He would be a danger-maker, Gotama."

25. 25. "And making that danger, would he be regarded as a person who sympathised with their welfare?"

26. 26. "No. He would not be considering their welfare, Gotama," replied Lohikka.

27. 27. "And not considering their welfare, would his heart stand fast in love towards them or in enmity?"

28. 28. "In enmity, Gotama."

29. 29. "But when one's heart stands fast in enmity, is that unsound doctrine, or sound?"

30. 30. "It is an unsound doctrine, Gotama."

31. 31. "Now what think you, Lohikka? Is not King Pasenadi of Kosala in possession of Kasi and Kosala?"

32. 32. "Yes, that is so, Gotama."

33. 33. "Then suppose, Lohikka, one were to speak thus : ' King Pasenadi of Kosala is in possession of Kasi and Kosala. Let him enjoy all the revenue and all the produce of Kasi and Kosala, allowing nothing to anybody else.' Would the utterer of that speech be a danger-maker as touching the men who live in dependence on King Pasenadi of Kosala—both you yourself and others—or not?"

34. 34."He would be a danger-maker, Gotama."
35. 35."And making that danger, would he be a person who sympathised with their welfare?"
36. 36."He would not be considering their welfare, Gotama."
37. 37."And not considering their welfare, would his heart stand fast in love towards them, or in enmity?"
38. 38."In enmity, Gotama."
39. 39."But when one's heart stands fast in enmity, is that unsound doctrine, or sound?"
40. 40."It is an unsound doctrine, Gotama."
41. 41."So then, Lohikka, you admit that he who should say that you, being in occupation of Salavatika, should therefore yourself enjoy all the revenue and produce thereof, bestowing nothing on anyone else ; and he who should say that King Pasenadi of Kosala, being in power over Kasi and Kosala, should therefore himself enjoy all the produce thereof, bestowing nothing on anyone else, would be making danger for those living in dependence on you; or for those, you and others, living in dependence upon the king. And that those who thus make danger for others, must be wanting in sympathy and have their hearts set fast in enmity. And that to have one's heart set fast in enmity is unsound doctrine.
42. 42."Then just so, Lohikka, is he who should say that a Samana or a Brahmin should not communicate his knowledge and learning to women and Shudras.
43. 43."Just so, he who should say thus, would be putting obstacles in the way of others and would be out of sympathy for their welfare.
44. 44."Being out of sympathy for their welfare his heart would become established in enmity ; and when one's heart is established in enmity, that is unsound doctrine."

§2. *Dhamma is Saddhamma when it Teaches that Mere Learning is Not Enough: it may Lead to Pedantry*

1. 1. Once when the Buddha was residing in the country of Kausambi, in a certain Vihara called the "Beautiful Voice," preaching to the people assembled there was a certain Brahmacharin.
2. 2. The Brahmacharin felt that he was unrivalled for knowledge of

scriptures and being unable to find anyone equal to himself in argument, was accustomed to carry, wherever he went, a lighted torch in his hand.

3. 3. One day a man in the market place of a certain town, seeing him thus, asked him the reason of his strange conduct, on which he replied:

4. 4."The world is so dark, and men so deluded, that I carry this torch to light it up so far as I can."

5. 5. Seeing this the Buddha forthwith called out to the Brahmacharin,"What ho there ! What are you about with that Torch?"

6. 6. The Brahmacharin replied,"All men are so wrapped in ignorance and gloom, that I carry this torch to illumine them."

7. 7. Then the Blessed Lord asked him again,"And are you so learned as to be acquainted with the four treatises (Vidyas) which occur in the midst of the Sacred Books, to wit, the treatise on ' Literature ' (Sabdavidya) ; the treatise on the ' Heavenly Bodies and their Paths ' ; the treatise on ' Government ' and the treatise on 'Military Art'?"

8. 8. On the Brahmacharin being forced to confess he was unacquainted with these things, he flung away his torch, and the Buddha added these words:

9. 9."If any man, whether he be learned or not, considers himself so great as to despise other men he is like a blind man holding a candle—blind himself, he illumines others."

§3. *Dhamma is Saddhamma when it Teaches that what is Needed is Pradnya*

1. 1. The Brahmins regarded Vidya (Knowledge, Learning) as in itself a thing of value. A man of mere learning and knowledge was to them an object of veneration irrespective of the question whether or not he was a man of virtue.

2. 2. Indeed they said that a king is honoured in his own country but a man of learning is honoured all over the world, suggesting thereby that a man of learning is greater than the king.

3. 3. The Buddha made a distinction between Vidya and Pradnya, i.e.,

4. 4. It may be said that the Brahmins also made a distinction between Pradnya and Vidya.

5. 5. That may be true. But there is a vast difference between the Pradnya of the Buddha and the Pradnya of the Brahmins.

6. 6. This distinction has been well brought out by the Buddha in his sermon reported in Anguttara Nikaya.
7. 7. On a certain occasion the Exalted One was staying near Rajagraha, in the bamboo grove at the squirrels' feeding ground.
8. 8. Now on that occasion Vassakara the Brahmin, a great official of Magadha, came to visit the Exalted One, and on coming to him greeted him courteously, and after exchange of greetings and courtesies sat down at one side. As he' sat thus Vassakara the Brahmin said this to the Exalted One :
9. 9."Master Gotama, we Brahmins proclaim a man, if he possesses four qualities, as one of great wisdom, as a great man. What are the four qualities?
10. 10."Herein, Master Gotama, he is learned. Of whatsoever he hears he understands the meaning as soon as it is uttered, saying: ' This is the meaning of that saying! ' Moreover, he has a good memory, he can remember and recall a thing done long ago, and said long ago.
11. 11."Again, in all the business of a householder he is skilled and diligent, and therein he is resourceful and capable of investigating what is proper to be done, what should be arranged.
12. 12."Now, master Gotama, if a man possesses these qualities, we proclaim him as one of great wisdom, as a great man. If the worthy Gotama thinks me worthy of commendation herein, let him commend me. On the contrary, if he thinks me blameworthy, let him blame me therefor."
13. 13."Well, Brahmin I neither commend you nor blame you herein. I myself proclaim a man to be one of great wisdom, if he possesses the following four qualities which are quite different from those mentioned by you,
14. 14."Herein, Brahmin, we have a man given to the welfare of many folk, to the happiness of many folk. By him are many folk established in the Ariyan Method, to wit : in what is of a lovely nature, in what is of a profitable nature.
15. 15."To whatsoever train of thought he wishes to apply himself, to that train of thought he applies himself : to whatever train of thought he desires not to apply himself, to that train of thought he applies not himself.
16. 16."Whatever intention he wishes to intend, he does so or not if he so wishes. Thus is he master of the mind in the ways of thought.

17. 17."Also he is one who attains at will, without difficulty and without trouble the four musings which belong to the higher thought, which even in this very life are blissful to abide in.
18. 18."Also by destruction of the asavas (fetters) in this very life thoroughly comprehending it by himself, he realises the heart's release, the release by wisdom, and attaining it abides therein.
19. 19."No Brahmin, I neither commend nor blame you herein, but I myself proclaim a man possessed of these four different qualities to be one of great wisdom, to be a great man."
20. 20."It is wonderful, Master Gotama! It is marvellous. Master Gotama, how well this has been said by the worthy Gotama !
21. 21."I myself do hold the worthy Gotama to be possessed of these same four qualities. Indeed, the worthy Gotama is given to the welfare of many folk, to the happiness of many folk. By him are many folk established in the Ariyan 'Method, to wit: in what is of a lovely nature, in what is of a profitable nature.
22. 22."Indeed, the worthy Gotama, to whatever train of thought he wishes to apply himself, to that train of thought applies himself . . . Surely the worthy Gotama is master of the mind in the ways of thought.
23. 23."Surely the worthy Gotama is one who attains at will . . . the four musings . . . Surely the worthy Gotama by destruction of the asavas . . . realises the heart's release, the release by wisdom . . . and attaining it abides therein."
24. 24. Herein is stated in the clearest terms the difference between Pradnya according to the Buddha and Pradnya, according to the Brahmins.
25. 25. Herein is set out his case why the Buddha regarded Pradnya as more important than *Vidya*.

DHAMMATOBESADDHAMMAMUSTPROMOTEMAITRI

§ 1. *Dhamma is Saddhamma only when it Teaches that Mere Pradnya is Not Enough: it must be accompanied by Sila*

1. 1. Pradnya is necessary. But Sila is more necessary. Pradnya without Sila is dangerous.
2. 2. Mere Pradnya is dangerous.

3. 3. Pradnya is like a sword in the hand of a man.
4. 4. In the hand of a man with Sila it may be used for saving a man with danger.
5. 5. But in the hand of a man without Sila it may be used for murder.
6. 6. That is why Sila is more important than Pradnya.
7. 7. Pradnya is Vichar Dhamma or thinking aright. Sila is Achar Dhamma, acting aright.
8. 8. The Buddha prescribed five basic principles regarding Sila.
9. 9. One relating to taking life.
10. 10. Second relating to stealing,
11. 11. Third relating to sexual immorality.
12. 12. Fourth relating to telling a lie.
13. 13. Fifth relating to drink.
14. 14. On each of these the Blessed Lord directed the people not to kill; not to steal; nor to tell a lie; nor to indulge in sex immorality and not to indulge in drinking.
15. 15. The reason why the Buddha gave greater importance to Sila than to knowledge is obvious.
16. 16. The use of knowledge depends upon a man's Sila. Apart from Sila, knowledge has no value. This is what he said.
17. 17. At another place, he said, "Sila is incomparable in this world.
18. 18. "Sila is the beginning and the refuge, Sila is the mother of all good. It is the foremost of all good conditions. Therefore, purify your Sila."

§ 2. *Dhamma is Saddhamma only when it Teaches that besides Pradnya and Sila what is Necessary is Kamma*

1. 1. There has been some difference of opinion on the issue as to foundation of Buddha's Dhamma.
2. 2. Is *Pradnya* alone the foundation of his religion? Is *Kamma* alone the foundation of his religion?
3. 3. The controversy had divided the followers of the Buddha into two schools. One school held that Pradnya alone is the foundation of the Buddha's religion. The other school held that Karuna alone is the foundation of the Buddha's religion.
4. 4. These two schools still remain divided.

5. 5. Both the schools seem to be wrong if judged in the light of the Buddha's own words.
6. 6. There is no difference of opinion that Pradnya is one of the two pillars of the Buddha's religion.
7. 7. The dispute is whether Kamna is also a pillar of his religion.
8. 8. That Karuna is a pillar of his religion is beyond dispute.
9. 9. His own words can be quoted in support of it.
10. 10. In days gone by there was a country called Gandhara, in which was a very old mendicant afflicted with a very loathsome disease, which caused him to pollute every place he occupied.
11. 11. Being in a certain Vihara belonging to the place, no one would come near him or help him in his distress.
12. 12. On this Buddha came with his 500 followers, and obtaining all sorts of necessary utensils and warm water, they together visited the place where the old mendicant lay.
13. 13. The smell in the place was so offensive that all the Bhikkus were filled with contempt for the man; but the World-honoured, causing Sakra-deva to bring the warm water, then with his own hand began to wash the body of the mendicant and attend to his maladies.
14. 14. Then the earth shook, and the whole place was filled with a supernatural light, so that the king and the ministers, and all the heavenly host (Devas, Nagas, etc.) flocked to the place, and paid adoration to Buddha.
15. 15. Having done so, they all addressed the World-honoured, and quired how one so highly exalted could lower himself to such offices as these, on which Buddha explained the matter thus :
16. 16."The purpose of Tathagata in coming into the world, is to befriend those poor and helpless and unprotected, to nourish those in bodily affliction, whether they be Samanas or men of any other religion—to help the impoverished, the orphan and the aged, and to persuade others so to do."

§ 3. *Dhamma is Saddhamma only when it Teaches that More than Karuna what is Necessary is Maitri*

1. 1. The Buddha did not stop with teaching Karuna.

2. 2. Karuna is only love for human beings. Buddha went beyond and taught Maitri. Maitri is love for living beings'.
3. 3. The Buddha wanted man not to stop with Karuna but to go beyond mankind and cultivate the spirit of Maitri for all living beings.
4. 4. This he has well explained in a Sutta when the Blessed One was staying in Shravasti.
5. 5. Speaking about Maitri, the Blessed Lord told the almsmen:
6. 6."Suppose a man comes to dig the earth. Does the earth resent?"
7. 7."No, Lord,"the almsmen replied.
8. 8."Supposing a man comes with lac and colours to paint pictures in the air. Do you think he could do it?"
9. 9."No, Lord."
10. 10."Why?" "Because there are no dark patches in the air,"said the Bhikkus.

II."In the same way you must not have any dark patches in your mind which are the reflections of your evil passions."

1. 12."Suppose a man comes with a blazing wisp of bracken to set the River Ganges on fire. Could he do it?"
2. 13."No, Lord."
3. 14."Why?" "Because the Ganges has no combustibility in its water."
4. 15. Concluding his address, the Blessed Lord said : "Just as the earth does not feel hurt and does not resent, just as the air does not lend to any action against it, just as the Ganges water goes on flowing without being disturbed by the fire so also you Bhikkus must bear all insults and injustices inflicted on you and continue to bear Maitri towards your offenders.
5. 16."So almsmen, Maitri must flow and flow for ever. Let it be your sacred obligation to keep your mind as firm as the earth, as clean as the air and as deep as the Ganges.. If you do so your Maitri will not be easily disturbed, by an act however unpleasant. For all who do injury will soon be tired out.
6. 17."Let the ambit of your Maitri be as boundless as the world and let your thought be vast and beyond measure in which no hatred is thought of.
7. 18."According to my Dhamma, it is not enough to practise Karuna. It is necessary to practise Maitri."

8. 19. In the course of the sermon the Blessed Lord told a story to the almsmen which is worth remembering.

9. 20."Once upon a time there lived in Shravasti a lady named Videshika, who was reputed gentle and meek, and mild. She had a maid servant named Darkie, a bright girl, an early riser and a good worker. ' I wonder,' thought Darkie, ' whether my mistress, who is so well spoken of, has really got a temper of her own which she does not show or whether she has got no temper at all? Or do I do my work so well, that though she has got a temper, she does not show it? I will try her.'

10. 21."So next morning she got up late. ' Darkie ! Darkie ! cried the mistress.' ' Yes, madam,' answered the girl. ' Why did you get up so late? ' ' Oh, that's nothing, madam.' ' Nothing , indeed, you naughty girl!' thought the mistress, frowning with anger and displeasure.

11. 22." So she has got a temper, though she does not show it,"thought the maid : ' It is because I do my work so well that she does not show it ; I will try her further.' So she got up later next morning. 'Darkie! Darkie!' cried the mistress. 'Yes, madam,' answered the girl. ' Why did you get up so late? ' ' Oh that's nothing, madam.' ' Nothing, indeed, you naughty girl ! ' exclaimed the mistress, giving vent in words to her anger and displeasure.

12. 23." Yes,' thought the maid,"she has got a temper though she does not show it because I do my work so well; I will try her yet further.' So next morning she got up later still. ' Darkie ! Darkie ! cried her mistress.' ' Yes, madam,' answered the girl. ' Why did you get up so late?' 'Oh, that's nothing, madam.'

13. 24." Nothing indeed you naughty girl, to get up so late!' exclaimed the mistress and in her anger and displeasure she picked up the lynch-pin and struck the girl on the head with it, drawing blood.

14. 25."With her broken head streaming with blood, Darkie roused the neighbourhood with shrieks: ' See, lady, what the gentle one has done! See, lady, what the meek one has done ! See, lady, what the mild one has done. What for? Just because her only maid got up late, she was so angry and displeased that she just jumped with the lynch-pin to strike her on the head and break it.'

15. 26."In the result the lady Videshika got the reputation of being violent, anything but meek and mild.

16. 27."In like manner an almsman may be gentle and meek, and mild

enough so long as nothing unpleasant is said against him. It is only when unpleasant things are said against him that you can test if he has Maitri—fellowship in him.”

17. 28. Then he added, “I do not call an almsman Charged with the spirit of Maitri if he shows it only to get clothes and food. Him only do I recognise as a true almsman whose Maitri springs from the doctrine.”

18. 29. “None of the means employed to acquire religious merit, 0 Monks, has a sixteenth part of the value of loving kindness. Loving kindness, which is freedom of heart, absorbs them all ; it glows, it shines, it blazes forth.

30. “And in the same way, 0 Monks, as the light of all the stars has not a sixteenth part of the value of the moonlight, but the moonlight absorbs it and glows and shines and blazes forth ; in the same way, 0 Monks, none of the means employed to acquire religious merit has a sixteenth part of the value of loving kindness. Loving kindness, which is freedom of heart, absorbs them; it glows, it shines, it blazes forth.

31. “And in the, same way, 0 Monks, as at the end of the rainy season, the sun, rising into the clear and cloudless sky, banishes all the dark spaces and glows and shines and blazes forth ; and in the same way again, as at night's end the morning star glows and shines and blazes forth; so, 0 Monks, none of the means employed to acquire religious merit has a sixteenth part of the value of loving kindness. Loving kindness, which is freedom of heart, absorbs them; it glows, it shines, it blazes forth.”

DHAMMA TO BE SADDHAMMA MUST PULL DOWN ALL SOCIAL BARRIERS

§ 1. *Dhamma .to be Saddhamma must break down barriers between Man and Man*

1. 1. What is an ideal society? According to the Brahmins, the Vedas have defined what is an ideal society and the Vedas being infallible, that is the only ideal society which man can accept.

2. 2. The ideal society prescribed by the Vedas is known by the name Chaturvama.

3. 3. Such a society, according to the Vedas, must satisfy three conditions.
4. 4. It must be composed of four classes. Brahmins, Kshatriyas, Vaishyas and Shudras.
5. 5. The interrelations of these classes must be regulated by the principle of graded inequality. In other words, all these classes are not to be on equal level but to be one above the other, in point of status, rights and privileges.
6. 6. The Brahmins were placed at the top ; the Kshatriyas were placed below the Brahmins but above the Vaishyas; the Vaishyas were placed below the Kshatriyas but above the Shudras and the Shudras were placed the lowest of all.
7. 7. The third feature of Chaturvama was that each class must engage itself in an occupation assigned to it. The Brahmins' occupation was to learn, teach and officiate at religious ceremonies. The Kshatriyas' occupation was to bear arms and to fight. The occupation of the Vaishyas was trade and business. The Shudras' occupation was to do menial service for all the three superior classes.
8. 8. No class is to transgress and trench upon the occupation of the other classes.
9. 9. This theory of an ideal society was upheld by the Brahmins and preached to the people.
10. 10. The soul of this theory, it is obvious, is inequality. This social inequality is not the result of historical growth. Inequality is the official doctrine of Brahminism.
11. 11. The Buddha opposed it root and branch.
12. 12. He was the strongest opponent of caste and the earliest and staunchest upholder of equality.
13. 13. There is no argument in favour of caste and inequality which he did not refute.
14. 14. There were many Brahmins who challenged Buddha on this issue. But he silenced them completely.
15. 15. The story is told in the Assalayana-Sutta that once the Brahmins persuaded one of them, by name Assalayana, to go to the Buddha and controvert his views against caste and inequality.
16. 16. Assalayana went to the Buddha and placed before him the case in

favour of the superiority of the Brahmins.

17. 17. He said, "Brahmins maintain, Gotama, that only Brahmins form the superior class, all other classes being inferior ; that only Brahmins form the white class, all other classes being black fellows ; that purity resides in Brahmins alone and not in non-Brahmins; and that only Brahmins are Brahma's legitimate sons, born from his mouth, offspring of his, creations of his, and his heirs. What does Gotama say hereon?"

18. 18. The Buddha's answer simply pulverized Assalayana.

19. 19. The Buddha said : "Assalayana, are not the Brahmin wives of Brahmins known to have their periods, and to conceive, and to lie and give birth? Notwithstanding this do Brahmins really maintain all what you have said though they are themselves born of women like everybody else?"

20. 20. Assalayana gave no answer.

21. 21. The Buddha went further and asked Assala;-yana another question.

22. 22."Suppose, Assalayana, a young noble con-softs with a Brahmin maiden, what would be the issue? Will it be an animal or human being?"

23. 23. Again Assalayana gave no answer.

24. 24."As to the possibility of moral development, is it only a Brahmin and not a man of the other three classes, who in this country, can develop in his heart the love that knows no hate or ill-will?"

25. 25."No. All four classes can do it,"replied Assalayana.

26. 26."Assalayana ! Have you ever heard,"asked the Buddha,"that in the Yona and Kamboja countries and in other adjacent countries, there are only two classes, namely, masters and slaves, and that a master can become a slave and *vice versa*?"

27. 27."Yes, I have heard so,"replied Assalayana.

28. 28."If your Chaturvarna is an ideal society, why is it not universal?" .

29. 29. On none of these points was Assalayana able to defend his theory of caste and inequality. He was completely silenced. He ended by becoming a disciple of the Buddha.

30. 30. A Brahmin by name Vasettha had embraced the religion of the Blessed Lord. The Brahmins used to abuse him for his conversion.

31. 31. One day he went to Buddha and disclosed to him what the Brahmins said of him.

32. 32. Then Vasettha said : "The Brahmins, Lord, say thus : ' Only a

Brahmin is of the best social grade ; other grades are low. Only a Brahmin is of a clear complexion ; other complexions are swarthy. Only Brahmins are of pure breed ; not they that are not of the Brahmins. Only Brahmins are genuine children of Brahma, born of his mouth, offspring of Brahma, created by Brahma, heirs of Brahma.

33. 33." As for you, you have renounced the best rank and have gone over to that low class, to the shaven recluses, to vulgar rich, to them of swarthy skins, to the foot-born descendants. Such a course is not good, such a course is not proper, even this, that you, having forsaken that upper class, should associate with an inferior class, to wit, with shavelings, fair folks, menials, swarthy of skin, the offspring of our kinsmen's heels.'

34. 34."In these terms. Lord, do the Brahmins blame and revile me with characteristic abuse, copious, not at all stinted."

35. 35."Surely, Vasettha,"said the Buddha,"the Brahmins have quite forgotten the ancient lore when they say so. On the contrary, the wives of Brahmins, like all women of other classes, are seen to be with child, bringing forth and nursing children. And yet it is these very womb-born Brahmins who say that Brahmins are genuine children of Brahma, born from his mouth ; his offspring ; his creation ; and his heirs ! By this they make a travesty of the nature of Brahma."

36. 36. Once the Brahmin Esukari went to the Buddha to argue with him three questions.

37. 37. The first question he raised related to the permanent division of occupations. In defence of the system he began by saying : "I have come to ask you a question. The Brahmins say they shall serve nobody because they stand above all. Everyone else is born to serve them.

38. 38."Service, Gotama, is divided into four— service of Brahmin, service of noble, service of a middle-class man, or by a peasant; while a peasant may be served only by a peasant,—for who else could?"What does the reverend Gotama say hereon?"

39. 39. The Buddha answered him by asking a question : "Is the whole world in accord with Brahmins in their fourfold division of service?"asked the Lord.

40. 40."For myself, I neither assert that all service is to be rendered nor that all service is to be refused. If the service makes a man bad and not good, it should not be rendered; but if it makes him better and not bad,

then it should be rendered.

41. 41."This is the guiding consideration which should decide the conduct alike of nobles, of Brahmins, of middle-class men and of peasants ; each individual should refuse service which makes him bad and should accept only the service which makes him a better man."

42. 42. The next question raised as by Esukari. "Why should ancestry and lineage not have a place in determining the status of a man?"

43. 43. To this question the Buddha replied thus : "As against pride of ancestry, the station into which a man happens to be born determines only his designation be it noble or Brahmin or middle-class or peasant. Even as a fire is called after the material out of which it is kindled, and may thus be called either a wood-fire, or a chip-fire, or a bracken-fire, or a cowdung fire, just in the same way the noble, transcendent doctrine, I aver, is the source of true wealth for every man, birth merely determining his designation in one of the four classes.

44. 44."Lineage does not enter into a man's being either good or bad : nor do good looks or wealth. For, you will find a man of noble birth who is a murderer, a thief, a fornicator, a liar, a slanderer, a man of bitter tongue, a tattler, a covetous person, a man of rancour or of wrong views, and therefore I assert that noble birth does not make a good man. Or again you will find a man of noble birth who is innocent of all these vices ; and, therefore, I assert that it is not lineage which makes a man bad."

45. 45. The third question which Esukari raised was with regard to the ways of earning a living assigned to each class.

46. 46. The Brahmin Esukari said to the Lord:"Brahmins give a fourfold assignment of income, from alms, for Brahmins ; from his bow and arrows, for the noble; from ploughing and tending cattle, for the middle-class man ; and for the peasant, by the carriage of crops on the pole slung over his shoulder. If anyone of these deserts his vocation for something else, he does what he should not do, not less than a guardian who appropriates what is not his. What does the reverend Gotama say on this?"

47. 47."Is the whole world in accord with this Brahmin classification?"asked the Lord.

48. 48."No,"replied Esukari.

49. 49. To Vasettha he said : "What is important is high ideals and not noble birth.

50. 50."No caste ; no inequality ; no superiority ; no inferiority ; all are equal. This is what he stood for.

51. 51."Identify yourself with others. As they, SOI. As I, so they,"so said the Buddha.

§ 2. Dhamma to be Saddhamma must Teach that Worth and not Birth is the Measure of Man

1. 1. The theory of Chaturvama, preached by the Brahmins, was based on birth.

2. 2. One is a Brahmin because he is born of Brahmin parents. One is a Kshatriya because he is born of Kshatriya parents. One is a Vaishya because one is born of Vaishya parents. And one is a Shudra because one is born of Shudra parents.

3. 3. The worth of a man according to the Brahmins was based on birth and on nothing else.

4. 4. This theory was as repulsive to the Buddha as was the theory of Chaturvama.

5. 5. His doctrine was just the opposite of the doctrine of the Brahmins. It was his doctrine that worth and not birth was the measure of man.

6. 6. The occasion on which the Buddha propounded his doctrine has its own peculiar interest.

7. 7. Once the Blessed One was staying in Anath-pindika's Asram. One day in the forenoon he took his begging bowl and entered Shravasti for alms.

8. 8. At that time a sacrificial fire was burning and an offering was prepared. Then the Blessed One, going for alms from house to house in Shravasti, approached the house of the Brahmin Aggika.

9. 9. The Brahmin, seeing the Blessed One coming at a distance, became angry and said : "Stay there, O Shaveling ! There, stay, ye wretched monk ! Stay there, ye miserable outcast."

10. 10. When he spoke thus, the Blessed One addressed him as follows: "Do you know, O Brahmin, who an outcast is, or the things that make a person an outcast?"

11. 11."No, Gotama, I do not know who an outcast is. Nor indeed do I know what things make a man an outcast."

12. 12. The Lord pleaded that nothing would be lost in knowing who is an outcast."Now that you insist on my knowing it,"the Brahmin Aggika said,"well go on and explain."

13. 13. The Brahmin having responded, the Blessed One speak as follows :

14. 14."The man who is irritable, rancorous, vicious, detractive, perverted in views, and deceitful— know ye that he is an outcast.

15. 15."Whosoever in this world harms living beings once-born or twice-born, in whom there is no compassion for living beings—know ye that he is an outcast.

16. 16."Whosoever destroys and besieges villages and hamlets, and is known as an oppressor—know ye that he is an outcast.

17. 17."Whether in the village or in the forest whosoever appropriates by theft what belongs to others, or what is not given—know ye that he is an outcast,

18. 18."Whosoever, having really taken a debt, flees, when pressed, saying, ' There is no debt to you,'— know ye that he is an outcast.

19. 19."Whosoever, desiring some trifle, kills a man going alone on the road, and pillages him—know ye that he is an outcast.

20. 20."Whosoever for his own sake, or for the sake of others, or for the sake of wealth, utters lies when asked as a witness—know ye that he is an outcast.

21. 21."Whosoever by force or with consent is seen transgressing with the wives of relatives or friends

- know ye that he is an outcast.

1. 22."Whosoever, being rich, does not support aged mother and father who have passed their youth— know ye that he is an outcast.

2. 23."Whosoever, when questioned about what is good, counsels what is wrong and teaches in a concealing way—know ye that he is an outcast.

3. 24."No one is an outcast by birth—and no one is a Brahmin by birth."

4. 25. Aggika, on hearing this, felt greatly ashamed for the abuse he had buried against the Blessed Lord.

§ 3. *Dhamma to be Saddhamma must*

Promote Equality between Man and Man

1. 1. Men are born unequal.
2. 2. Some are robust, others are weaklings.
3. 3. Some have more intelligence, others have less or none.
4. 4. Some have more capacity, others have less.
5. 5. Some are well-to-do, others are poor.
6. 6. All have to enter into what is called the struggle for existence.
7. 7. In the struggle for existence if inequality be recognised as the rule of the game the weakest will always go to the wall.
8. 8. Should this rule of inequality be allowed to be the rule of life?
9. 9. Some answer in the affirmative on the ground that it results in the survival of the fittest.
10. 10. The question, however, is: Is the fittest the best from the point of view of society.
11. 11. No one can give a positive answer.
12. 12. It is because of this doubt that religion preaches equality. For equality may help the best to survive even though the best may not be the fittest.
13. 13. What society wants is the best and not the fittest.
14. 14. It is, therefore, the primary reason why religion upholds equality.
15. 15. This was the viewpoint of the Buddha and it was because of this that he argued that a religion which does not preach equality is not worth having.
16. 16. Can you respect or believe in a religion which recommends actions that bring happiness to oneself by causing sorrow to others, or happiness to others by causing sorrow, to oneself or sorrow to both oneself and others?
17. 17. Is not that a better religion which promotes the happiness of others simultaneously with the happiness of oneself and tolerates no oppression.
18. 18. These were some of the most pertinent questions which he asked the Brahmins who opposed Equality.
19. 19. The religion of the Buddha is perfect justice springing from a

man's own meritorious disposition.

BOOK IV: Religion and Dhamma

Part I—Religion and Dhamma.

Part II—How Similarities in Terminology Conceal Fundamental Difference.

Part III—The Buddhist Way of Life.

Part IV—:His Sermons.

PART I : RELIGION AND DHAMMA

1. 1. What is Religion?
2. 2. How Dhamma Differs From Religion.
3. 3. The Purpose of Religion and the Purpose of Dhamma.
4. 4. Morality and Religion.
5. 5. Dhamma and Morality.
6. 6. Mere Morality is not Enough. It must be Sacred and Universal.

RELIGION

§ 1. *What is Religion?*

1. 1. The word "religion" is an indefinite word with no fixed meaning.
2. 2. It is one word with many meanings.
3. 3. This is because religion has passed through many stages. The concept at each stage is called Religion though the concept at one stage has not had the same meaning which it had at the preceding stage or is likely to have at the succeeding stage.
4. 4. The conception of religion was never fixed.
5. 5. It has varied from time to time.
6. 6. Because most of the phenomena such as lightning, rain and floods, the occurrence of which the primitive man could not explain, any weird performance done to control the phenomenon was called magic. Religion therefore came to be identified with magic.

7. 7. Then came the second stage in the evolution of religion. In this stage religion came to be identified with beliefs, rituals, ceremonies, prayers and sacrifices.

8. 8. But this conception of religion is derivative.

9. 9. The pivotal point in religion starts with the belief that there exists some power which causes these phenomena which primitive man did not know and could not understand. Magic lost its place at this stage.

10. 10. This power was originally malevolent. But later it was felt that it could also be benevolent.

II. Beliefs, rites, ceremonies and sacrifices were necessary both to propitiate a benevolent power and also to conciliate an angry power.

1. 12. Later that power was called God or the Creator.

2. 13. Then came the third stage that it is this God who created this world and also man.

3. 14. This was followed by the belief that man has a soul and the soul is eternal and is answerable to God for man's actions in the world.

4. 15. This is, in short, the evolution of the concept of Religion.

5. 16. This is what Religion has come to be and this is what it connotes—belief in God, belief in soul, worship of God, curing of the erring soul, propitiating God by prayers, ceremonies, sacrifices, etc.

§2. *How Dhamma Differs From Religion*

1. 1. What the Buddha calls Dhamma differs fundamentally from what is called Religion.

2. 2. What the Buddha calls Dhamma is analogous to what the European theologians call Religion.

3. 3. But there is no greater affinity between the two. On the other hand, the differences between the two are very great.

4. 4. On this account some European theologians refuse to recognise the Buddha's Dhamma as Religion.

5. 5. There need be no regrets over this. The loss is theirs. It does no harm to the Buddha's Dhamma. Rather, it shows what is wanting in Religion.

6. 6. Instead of entering into this controversy it is better to proceed to give an idea of Dhamma and show how it differs from Religion.
7. 7. Religion, it is said, is personal and one must keep it to oneself. One must not let it play its part in public life.
8. 8. Contrary to this, Dhamma is social. It is fundamentally and essentially so.
9. 9. Dhamma is righteousness, which means right relations between man and man in all spheres of life.
10. 10. From this it is evident that one man if he is alone does not need Dhamma.
11. 11. But when there are twomen living in relation to each other they must find a place for Dhamma whether they like it or not. Neither can escape it.
12. 12. In other words. Society cannot do without Dhamma.
13. 13. Societyhas to choose one of the three alternatives.
14. 14. Society may choose not to have any Dhamma, as an instrument of Government. For Dhamma is nothing if it is not an instrument of Government.
15. 15. This means Society chooses the road to anarchy.
16. 16. Secondly, Society may choose the police, i.e., dictatorship as an instrument of Government.
17. 17. Thirdly, Society may choose Dhamma plus the Magistrate wherever people fail to observe the Dhamma.
18. 18. In anarchy and dictatorship liberty is lost.
19. 19. Only in the third liberty survives.
20. 20. Those who want liberty must therefore have Dhamma.
21. 21. Now what isDhamma? and why isDhamma necessary?
According to the Buddha, Dhamma consists of Prajna and Karuna.
22. 22. What is Prajna? And why Prajna? Prajna is understanding. The Buddha made Prajna one of the two corner-stones of His Dhamma because he did not wish to leave any room for superstition.
23. 23. What is Karuna? And why Karuna? Karuna is love. Because, without it Society can neither live nor grow, that is why the Buddha made it the second corner-stone of His Dhamma.
24. 24. Such is the definition of the Buddha's Dhamma.
25. 25. How different is this definition of Dhamma from that of

Religion.

26. 26. So ancient, yet so modern is the definition of Dhamma given by the Buddha.
27. 27. So aboriginal yet so original.
28. 28. Not borrowed from anyone, yet so true.
29. 29. A unique amalgam of Pradnya and Karuna is the Dhamma of the Buddha.
30. 30. Such is the difference between Religion and Dhamma.

§ 3. *The Purpose of Religion and the Purpose of Dhamma*

1. 1. What is the purpose of Religion? What is the purpose of Dhamma? Are they one and the same? Or are they different?
2. 2. The answer to these questions are to be found in two dialogues—one between the Buddha and Sunakkhatta and the other between the Buddha and the Brahmin Potthapada.
3. 3. The Exalted One was once staying among the Mallas at Anupiya, one of their towns.
4. 4. Now the Exalted One having robed himself in the early morning, put on his cloak and took his bowl and entered the town for alms.
5. 5. On the way he thought it was too early to go for alms. Therefore he went to the pleasance where Bhaggava the wanderer dwelt and called on him.
6. 6. On seeing the Blessed One Bhaggava got up, saluted him and said, "May it please you, sire, to be seated ; here is a seat made ready for you."
7. 7. The Exalted One sat down thereon, and Bhaggava taking a certain lowstool sat down beside him. So seated, Bhaggava, the wanderer, spake thus to the Exalted One :

8 "Some days ago, Lord, a good many days ago, Sunakkhatta of the Licchavis called on me and spake thus: 'I have now given up the Exalted One, Bhaggava. I am remaining no longer under him (as my teacher).' Is the fact really so, just as he said?"
1. 9. "It is just so Bhaggava, as Sunakkhatta of the Licchavis

said,"replied the Riessed One.

2. 10."Some days ago, Bhaggava, a good many days ago, Sunakkhatta, the Licchavi, came to call on me, and spake thus : ' Sir, I now give up the Exalted One. I will henceforth remain no longer under him (as my teacher).' When he told me this, I said to him : ' But now, Sunakkhatta, have I

ever said to you, Come, Sunakkhatta, live under *me* (as my pupil)? ' 11."

No, sir, you have not.'

1. 12."Or haveyou ever said to me: ' Sir, I would fain dwell under the Exalted One (as my teacher)?'

2. 13."No, sir, I have not.'

3. 14."Then I asked him 'If I said not the one, and you said not the other, what are you and what am I that you talk of giving up? See, foolish one, in how far the fault here is your own.'

4. 15."Well, but, sir, the Exalted One works me no mystic wonders surpassing the power of ordinary men'

5. 16."Why, now Sunakkhatta, have I ever said to you: ' Come, take me as your teacher, Sunakkhatta, and I will work for you mystic wonders surpassing the power of ordinary men? '

6. 17."You have not, sir.'

7. 18."Or have you ever said to me: ' Sir, I would fain take the Exalted One as my teacher, for he will work for me mystic wonders beyond the powers of ordinary men? '

8. 19." I have not, sir.'

9. 20."But if I said not the one, and you said not the other, what are you and what am I, foolish man, that you talk of giving up? What think you, Sunakkhatta? Whether mystic wonders beyond the power of ordinary man are wrought, or whether they are not is the object for which I teach the Dhamma: that it leads to the thorough, destruction of ill for the doer thereof? '

10. 21. "'Whether, sir, they are so wrought or not, that is indeed the object for which the Dhamma is taught by the Exalted One.'

11. 22." If then, Sunakkhatta, it matters not to that object whether mystic wonders are wrought or not, of what use to you would be the

working of them? See, foolish one, in how far the fault here is your own.'

12. 23."But, sir, the Exalted One does not reveal to me the beginning of things.'

13. 24."Why now, Sunakkhatta, have I ever said to you: ' Come, Sunakkhatta, be my. disciple and I will reveal to you the beginning of things? '

14. 25." Sir, you have not '

15. 26."Or have you ever said to me: ' I will become the Exalted *One's* pupil, for he will reveal to me the beginning of things? '

16. 27." Sir, I have not.'

17. 28." But if I have not said the one and you have not said the other, what are you and what am I, foolish man, that you talk of giving up on that account? What think you, Sunakkhatta? Whether the beginning of things be revealed, or whether it be not, is the object for which I teach the Dhamma that it leads to the thorough destruction of ill for the doer thereof? '

18. 29." Whether, sir, they are revealed or not, that is indeed the object for which the Dhamma is taught by the Exalted One.'

19. 30." If then, Sunakkhatta, it matters not to that object whether the beginning of things be revealed, or whether it be not, of what use to you would it be to have the beginning of things revealed? "

20. 31. This illustrates that Religion is concerned with revealing the beginning of things and Dhamma is not.

The other differences between Religion and Dhamma are brought out in the discussion between the Blessed One and Potthapada.

1. 1. The Blessed One was once staying at Shravasti in Anathapindika's pleasure of the Jeta's wood. Now at that time Potthapada, the wandering mendicant was dwelling in the hall put up in Queen Mallika's park for a debate on general systems of philosophical opinion.

2. 2. There was with him a great following of mendicants; to wit, three hundred. A dialogue took place between the Blessed Lord and Potthapada. Potthapada asked:

3. 3."Then, sir, if that be so, tell me at least: Is the world eternal? Is this alone the truth, and any other view mere folly? "

4. 4."That, Potthapada, is a matter on which I have expressed no

opinion,”replied the Blessed Lord.

.5. Then, in the same terms, Potthapada asked each of the following questions : (i) ' Is the world not eternal? '

.(ii) ' Is the world finite? '

.(iii) ' Is the world infinite? '

.(iv) ' Is the soul the same as the body? '

.(v) ' Is the soul one thing, and the body another? '

.(vi) ' Does one who has gained the truth live again after death? '

.(vii) ' Does he not live again after death? '

.(viii) ' Does he both live again and not live again, after death? '

.(ix) ' Does he neither live again, nor not live again, after death? '

5. 6. And to each questions the Exalted One made the same reply :—

6. 7.”That too, Potthapada, is a matter on which I have expressed no opinion.”

7. 8.”But why has the Exalted One expressed no opinion on that?”

.9.”Because this question is not calculated to profit, it is not concerned with the Dhamma, it does not redound even to the elements of right conduct, nor to detachment, nor to purification from lusts, nor to quietude, nor to tranquillisation of heart, nor to real knowledge, nor to the insight .(of the higher stages of the Path), nor to Nirvana. Therefore is it that I express no opinion upon it.”

8. 10.”Then what is it that the Exalted One has determined? ' '

9. 11.”I have expounded, Potthapada, what Dukkha is ; I have expounded what is the origin of Dukkha; I have expounded what is the cessation of Dukkha : I have expounded what is the method by which one may reach the cessation of Dukkha.”

10. 12.”And why has the Exalted One put forth a statement as to that?”

11. 13.”Because that question, Potthapada, is calculated to profit, is concerned with the Dhamma, redounds to the beginnings of right conduct, to detachment, to purification from lusts, .to quietude, to tranquillisation of heart, to real knowledge, to the insight of the higher stages of the Path and to Nirvana. There-fore is it, Potthapada, that I have put forward a statement as to that.”

12. 14. In this dialogue it is clearly put forth what is the subject matter of Religion and what is not the subject matter of Dhamma. The two are poles apart

13. 15. The purpose of Religion is to explain the origin of the world. The purpose of Dhamma is to reconstruct the world.

§ 4. *Morality and Religion*

1. 1. What is the place of morality in Religion?
2. 2. As a matter of truth morality has no place in Religion.
3. 3. The content of religion consists of God, soul, prayers, worship, rituals, ceremonies and sacrifices.
4. 4. Morality comes in only wherein man comes in relation to man.
5. 5. Morality comes in into religion as a side wind to maintain peace and order.
6. 6. Religion is a triangular piece.
7. 7. Be good to your neighbour because you are both children of God.
8. 8. That is the argument of religion.
9. 9. Every religion preaches morality but morality is not the root of religion.
10. 10. It is a wagon attached to it. It is attached and detached as the occasion requires.
11. 11. The action of morality in the functioning of religion is therefore casual and occasional.
12. 12. Morality in religion is therefore not effective.

§ 5. *Dhamma and Morality*

1. 1. What is the place of morality in Dhamma?
2. 2. The simple answer is Morality is Dhamma and Dhamma is Morality.
3. 3. In other words, in Dhamma morality takes the place of God although there is no God in Dhamma.
4. 4. In Dhamma there is no place for prayers, pilgrimages, rituals, ceremonies or sacrifices.
5. 5. Morality is the essence of Dhamma. Without it there is no Dhamma.
6. 6. Morality in Dhamma arises from the direct necessity for man to love man.

7. 7. It does not require the sanction of God. It is not to please God that man has to be moral. It is for his own good that man has to love man.

§ 6. *Mere Morality is not Enough. It must be Sacred and Universal*

1. 1. When is a thing sacred? Why is a thing sacred?
2. 2. In every human society, primitive or advanced, there are some things or beliefs which it regards as sacred and the rest as profane.
3. 3. When a thing or belief has reached the stage of being sacred (pavitra) it means that it cannot be violated. Indeed it cannot be touched. It is taboo.
4. 4. Contrary to this, a thing or a belief which is profane (apavitra), i.e., outside the field of the sacred, may be violated. It means one can act contrary to it, without feeling any fear or qualms of conscience.
5. 5. The sacred is something holy. To transgress it is a sacrilege.
6. 6. Why is a thing made sacred? To confine the scope of the question to the matter in hand, why morality should have been made sacred?
7. 7. Three factors seem to have played their part in making morality sacred.
8. 8. The first factor is the social need for protecting the best.
9. 9. The background of this question lies imbedded in what is called the struggle of existence and the survival of the fittest.
10. 10. This arises out of the theory of evolution. It is common knowledge that evolution takes place through a struggle for existence because the means of food supply in early times were so limited.
11. 11. The struggle is bitter. Nature is said to be red in claw and tooth.
12. 12. In this struggle which is bitter and bloody only the fittest survive.
13. 13. Such is the original state of society.
14. 14. In the course of ancient past someone must have raised the question, Is the fittest (the strongest) the best? Would not the weakest if protected be ultimately the best for advancing the ends and aims of society?
15. 15. The then prevailing state of society seems to have given an answer in the affirmative.
16. 16. Then comes, the question what is the way to protect the weak?
17. 17. Nothing less than to impose some restraints upon the fittest.

18. 18. In this lies the origin and necessity for morality.
19. 19. This morality had to be sacred because it was imposed originally on the fittest, i.e., the strongest.
20. 20. This has very serious consequences.
21. 21. First, does morality in becoming social become anti-social?
22. 22. It is not that there is no morality among thieves. There is morality among businessmen. There is morality among fellow castemen and there is also morality among a gang of robbers.
23. 23. But this morality is marked by isolation and exclusiveness. It is a morality to protect "group interest." It is therefore anti-social.
24. 24. It is the isolation and exclusiveness of this kind of morality which throws its anti-social spirit in relief.
25. 25. The same is true where a group observes morality because it has interests of its own to protect.
26. 26. The results of this group organisation of society are far-reaching.
27. 27. If society continues to consist of anti-social groups, society will remain a disorganised and a factional society.
28. 28. The danger of a disorganised and factional state of society is that it sets up a number of different models and standards.
29. 29. In the absence of common models and common standards society cannot be a harmonious whole,
30. 30. With such different models and standards it is impossible for the individual to attain consistency of mind.
31. 31. A society which rests upon the supremacy of one group over another irrespective of its rational or proportionate claims inevitably leads to conflict.
32. 32. The only way to put a stop to conflict is to have common rules of morality which are sacred to all.
33. 33. There is the third factor which requires morality to be made sacred and universal. It is to safeguard the growth of the individual.
34. 34. Under the struggle for existence or under group rule the interests of the individuals are not safe.
35. 35. The group set-up prevents an individual from acquiring consistency of mind which is possible only when society has common ideals, common models. His thoughts are led astray and this creates a mind whose seeing unity is forced and distorted.

36. 36. Secondly the group set-up leads to discrimination and denial of justice.
37. 37. The group set-up leads to stratification of classes. Those who are masters remain masters and those who are born in slavery remain slaves. Owners remain owners and workers remain workers. The privileged remain privileged and the serfs remain serfs.
38. 38. This means that there can be liberty for some but not for all. This means that there can be equality for a few but none for the majority.
39. 39. What is the remedy? The only remedy lies in making fraternity universally effective.
40. 40. What is fraternity? It is nothing but another name for brotherhood of men which is another name for morality.
41. 41. This is why the Buddha preached that Dhamma is morality and as Dhamma is sacred so is morality.

PART II : HOW SIMILARITIES IN TERMINOLOGY CONCEAL FUNDAMENTAL DIFFERENCE

Section I—Rebirth

1. 1. Preliminary.
2. 2. Rebirth of What?
3. 3. Rebirth of Whom?

Section II—Karma

1. 1. Is the Buddhist doctrine of Karma the same as the Brahminic doctrine?
2. 2. Did the Buddha believe in past Karma having effect on future life?
3. 3. Did the Buddha believe in past Karma having effect on future life?—concluded.

Section III—Ahimsa

1. 1. The different ways in which it is interpreted and followed.
2. 2. The true meaning of Ahimsa.

Section IV—*Transmigration* Section V—*Causes of his Misunderstandings*
SECTION I

REBIRTH §

1. Preliminary

1. 1. What happens after death is a question often asked,
2. 2. The contemporaries of the Buddha held two different views. One set was called Eternalist and the other was called Annihilationist.
3. 3. The Eternalist said that the soul knows no death: therefore life is eternal. It is renewed by rebirth.
4. 4. The thesis of the Annihilationists was summed up in one word, *Ucchedvad*, which meant that death is the end of everything. There is nothing left after death.
5. 5. The Buddha was not an eternalist. For it involved a belief in the existence of a separate, immortal soul to which he was opposed.
6. 6. Was the Buddha an annihilationist? With his belief in the non-existence of the soul, the Buddha would naturally be expected to be an annihilationist.
7. 7. But in the *Alagaddupamma-Sutta* the Buddha complains that he is called an annihilationist when as a matter of fact he is not.
 8. This is what he says :”Though this is what I affirm and what I preach yet some recluses and Brahmins, wrongly, erroneously and falsely charge me in defiance of facts, with being an annihilationist and with preaching the disintegration, destruction and extirpation of human beings.
 8. 9.”It is just what I am not, and what I do not affirm, that is wrongly, erroneously, and falsely charged against me by these good people who would make me out to be an annihilationist.”
 9. 10. If this statement is a genuine one and is not an interpolation by those who wanted to foist a Brahmanic doctrine on Buddhism the statement raises a serious dilemma
 10. 11. How can the Buddha not believe in the existence of the soul and yet say that he is not an annihilationist?
 11. 12. This raises the question : Did the Buddha believe in rebirth?

§ 2. *Rebirth of What?*

1. 1. Did the Buddha believe in rebirth?
2. 2. The answer is in the affirmative.
3. 3. It is better to split this question further into two parts : (1) Rebirth of What and (2) Rebirth of Whom.
4. 4. It is better to take each one of these two questions separately.
5. 5. Here we may consider the first. *Rebirth of What.*
6. 6. This question is almost always ignored. It is because of the mixing of the two questions that so much confusion has arisen.
7. 7. According to the Buddha there are four elements of Existence which go to compose the body. They are (1) Prithvi ; (2) Apa ; (3) Tej ; and (4) Vayu.
8. 8. Question is when the human bodydies what happens to these four elements? Do they also die along with dead body? Some say that they do.
9. 9. The Buddha said no. They join the mass *of* similar elements floating in (Akash) space.
10. 10. When the four elements from this floating mass join together a new birth takes place.
11. 11. This is what the Buddha meant by rebirth.
12. 12. The elements need not and are not necessarily from the same bodywhich is dead. They may be drawn from different dead bodies.
13. 13. It must be noted that the body dies. But the elements are ever living.
14. 14. This is the kind of rebirth in which the Buddha believed.
15. 15. Great light is 'thrown upon the subject by Sariputta in his dialogue with Maha-Kotthita.
16. 16. It is said that once when the Lord was staying at Shravasti in Jeta's Grove in Anathapindika's Aram, the Maha-Kotthita rising up at even-tide from his meditations, went to Sariputta and asked him to elucidate some of the questions which troubled him.
17. 17. The following was one of them.
18. 18. *Maha-Kotthita* asked :”How many factors has the first ecstasy (Dhyana) put from it and how many does it retain?”
19. 19. *Sariputta* replied:”Five of each. Gone are lusts, malevolence,

torpor, worry and doubt. Observation, reflection, zest, satisfaction and a focussed heart persist.”

20. 20. *Maha-Kotthita* asked:”Take the five senses of sight, sound, smell, taste and touch,—each with its own particular province and range of function, separate and mutually distinct. What ultimate base have they? Who enjoys all their five provinces and ranges?”

21. 21. *Sariputta* replied:”Mind (Mano).”

22. 22. *Maha-Kotthita* asked :”On what do these five faculties of sense depend?”

23. 23. *Sariputta* replied :”On vitality.”

24. 24. *Maha-Kotthita* asked:”On what does vitality depend?”

25. 25. *Sariputta* :”On heat.”

26. 26. *Maha-Kotthita* asked:”On what does heat depend?”

27. 27. *Sariputta* replied :”**On** vitality.”

28. 28. *Maha-Kotthita* asked : “You say that vitality depends on heat, you also say that heat depends on vitality! What precisely is the meaning to be attached to this?”

29. 29. *Sariputta* replied :”I will give you an illustration. Just as in the case of a lamp, the light reveals the flame and the flame”the light, so vitality depends upon heat and heat on vitality.

30. 30. *Maha-Kotthita* asked :”How many things must quit the body before it is flung aside and cast away like a senseless log?”

31. 31. *Sariputta* answered: “Vitality, heat and consciousness.”

32. 32. *Maha-Kotthita* asked :”What is the difference between a lifeless corpse and an almsman in trance, in whom perception and feelings are stilled?”

33. 33. *Sariputta* replied :”In the corpse not only are the plastic forces of the body and speech and mind stilled and quiescent but also vitality is exhausted, heat is quenched and the faculties of sense broken up ; whereas in the almsman in trance vitality persists, heat abides, and the faculties are clear, although respiration, observation and perception are stilled and quiescent.”

34. 34. This probably is the best and most complete exposition of Death or Annihilation.

35. 35. There is only one lacuna in this dialogue. *Maha-Kotthita* should have asked *Sariputta* one question. What is heat?

36. 36. What answer Sariputta would have given it is not easy to imagine. But there can be no doubt that heat means energy.
37. 37. Thus amplified, the real answer to the question : What happens when the body dies? is : The body ceases to produce energy.
38. 38. But this is only a part of the answer. Because death also means that whatever energy that had escaped from the body joins the general mass of energy playing about in the Universe.
39. 39. Annihilation has therefore a two-fold aspect. In one of its aspects it means cession of production of energy. In another aspect it means a new addition to the stock of general floating mass of energy.
40. 40. It is probably because of this two-fold aspect of annihilation that the Buddha said that he was not an absolute annihilationist. He was an annihilationist so far as soul was concerned. He was not an annihilationist so far as matter was concerned.
41. 41. So interpreted it is easy to understand why the Buddha said that he was not an annihilationist. He believed in the regeneration of matter and not in the rebirth of the soul.
42. 42. So interpreted, the Buddha's view is in consonance with science.
43. 43. It is only in this sense that the Buddha could be said to have believed in rebirth.
44. 44. Energy is never lost. That is what science affirms. Annihilation in the sense that after death nothing is left would be contrary to science. For it would mean that energy is not constant in volume.
45. 45. This is the only way by which the dilemma could be solved.

§3. *Rebirth of Whom?*

1. 1. The most difficult question is Rebirth of Whom.
2. 2. Does the same dead person take a new birth?
3. 3. Did the Buddha believe in this thesis? The answer is "Most improbable."
4. 4. The answer depends upon the elements of existence of the dead man meeting together and forming a new body then the possibility of the Rebirth of the same Sentient being is possible.
5. 5. If a new body is formed after a mixture or the different elements of the different men who are dead then there is rebirth but not the rebirth

of the same sentient being.

6. 6. This point has been well explained by sister Khema to King Pasenadi.

7. 7. Once the Exalted One was staying near Savatthi at Jeta Grove in Anathapindika's Aram.

8. 8. Now on that occasion the sister Khema, after going her rounds among the Kosalana, took up her quarters at Toranavatthu, between Shravasti and Saketa.

9. 9. Now the Rajah Pasenadi of Kosala was journeying from Saketa to Shravasti, and midway between Saketa and Shravasti he put up for one night at Toranavatthu.

10. 10. The Rajah Pasenadi of Kosala called a certain man and said :”Come thou, good fellow ! Find out some recluse or brahmin such that I can wait upon him today.”

11. 11.”Even so, your majesty,”said that man in reply to the Rajah Pasenadi of Kosala, and after wandering through all Toranavatthu he saw not any one, either recluse or brahmin, on whom the Rajah Pasenadi might wait.

12. 12. Then that man saw the sister Khema, who had come to reside at Toranavatthu. And on seeing her he went back to the Rajah Pasenadi of Kosala, and said:—

13. 13.”Your Majesty, there is no recluse or brahmin in Toranavatthu such that your majesty can wait upon him. But, your majesty, there is a sister named Khema, a woman-disciple of that Exalted One. Now of this lady a lovely rumour has gone abroad, that she is sage, accomplished, shrewd, widely learned, a brilliant talker, of goodly ready wit. Let your majesty wait upon her.”

14. 14. So the Rajah Pasenadi of Kosala went to visit the sister Khema, and on coming to her saluted and sat down at one side. So seated he said to her:—

15. 15.”How say you, lady? Does the Tathagata exist after death?”

16. 16.”That also, maharajah is not revealed by the Exalted One.”

17. 17.”How then, lady? When asked ' Does the Tathagata exist after death?' you reply,”That is not revealed by the Exalted One,' and, when I ask . . . the other questions, you make the same reply. Pray, lady, what is the reason, what is the cause, why this thing is not revealed by the Exalted

One?”

18. 18.”Now in this matter, maharajah, I will question you. Do you reply as you think fit. Now how say you, maharajah? Have you some accountant, some ready reckoner or calculator, able to count the sand in Ganges, thus : There are so many hundred grains, or so many thousand grains, or so many hundreds of thousands of grains of sand?”

19. 19.”No, indeed, lady.”

20. 20.”Then have you some accountant, ready reckoner or calculator able to reckon the water in the mighty ocean, thus : There are so many gallons of water, so many hundreds, so many thousands, so many hundreds of thousand gallons of water?”

21. 21.”No, indeed, lady.”

22. 22.”How is that?”

23. 23.”Mighty is the ocean, lady, deep, boundless, unfathomable.”

24. 24.”Even so, maharajah, if one should try to define the Tathagata by his bodily form, that bodily form of the Tathagata is abandoned, cut down at the root, made like a palm-tree stump, made some thing that is not, made of a nature not to spring up again in future time. Set free from reckoning as body, maharajah, is the Tathagata. He is deep, boundless unfathomable, just like the mighty ocean. To say, ' The Tathagata exists after death ' does not apply. To say, ' The Tathagata exists not after death,' does not apply. To say, ' The Tathagata both exists and exists not, neither exists nor not exists after death,' does not apply.

25. 25.”If one should try to define the Tathagata by feeling,—that feeling of the Tathagata is abandoned, cut down at the root . . . Yet free from reckoning as feeling is the Tathagata, maharajah, deep, boundless, unfathomable like the mighty ocean. To say, ' The Tathagata exists after death . . . exists not after death,' does not apply.

26.”So also if one should try to define the Tathagata by perception, by the activities, by consciousness . . . set free from reckoning by consciousness is the Tathagata, deep, boundless,

unfathomable as the mighty ocean. To say, ' The Tathagata exists after death . . . exists not after death,' does not apply.”

26. 27. Then the Rajah Pasenadi of Kosala was delighted with the words of the sister Khema, and took pleasure therein. And he rose from his seat, saluted her by the right and went away.

27. 28. Now on another occasion the Rajah went to visit the Exalted One, and on coming to him saluted him and sat down at one side. So seated he said to the Exalted One:
28. 29."Pray, Lord, does the Tathagata -exist after death?"
29. 30."Not revealed by me, maharajah, is this matter."
30. 31."Then Lord, the Tathagata does not exist after death."
31. 32."That also, maharajah, is not revealed by —me."me.
32. 33. He then asks the other questions and gets the same reply.
33. 34."How then. Lord? When I ask the question, ' Does the Tathagata exist? . . . does he not exist after death? ' you reply, ' It is not revealed by me.' Pray, Lord, what is the reason, what is the cause why this thing is not revealed by the Exalted One?"
34. 35."Now, maharajah, I will question you. Do you reply as you think fit. Now what say you, maharajah? Have you some accountant . . . (the rest is exactly as before)."
35. 36."Wonderful, Lord! Strange it is, Lord, how the explanation both of Master and disciple, both in spirit and in letter, will agree, will harmonise, will not be inconsistent, that is, in any word about the highest.
36. 37."On a certain occasion. Lord, I went to visit the sister Khema, and asked her the meaning of this matter, and she gave me the meaning in the very words, in the very syllables used by the Exalted One. Wonderful, Lord! Strange it is. Lord, how the explanation both of Master and disciple will agree, will harmonise, in spirit and in letter, how they will not be inconsistent,— that is, in any word about the highest.
37. 38."Well, Lord, now we must be going. We are busy folk. We have many things to do.
38. 39."Do now what you think it is time for, maharajah."
39. 40. Thereupon the Rajah Pasenadi of Kosala was delighted with the words of the Exalted One and welcomed them. And he rose from his seat, saluted the Exalted One by the right and went away.

KARMA

§ 1 .1§ *the Buddhist Doctrine of Karma the same as the Brahminic Doctrine?*

1. 1. There is no doctrine in the Buddha's Dhamma which has created

so much confusion as this doctrine of Karma.

2. 2. What is its place in the Buddha's Dhamma and what is its significance which has already been told.
3. 3. Ignorant Hindus out of sheer want of understanding say by comparing merely the similarity of words that Buddhism is the same as Brahmanism or Hinduism.
4. 4. The educated and orthodox section of the Brahmins also do the same. They do so deliberately to mislead the ignorant masses.
5. 5. The educated Brahmins know full well that the Buddhist Law of Karma is quite different from the Brahminic Law of Karma. Yet they keep on saying that Buddhism is the same as Brahmanism and Hinduism.
6. 6. The similarity in terminology gives them an easy handle for their false and malicious propaganda.
7. 7. It is, therefore, necessary to examine the position closely.
8. 8. The Buddha's Law of Karma, however much may be similarity of words cannot be the same in its connotation as the Brahminic Law of Karma.
9. 9. The premises of the two are so widely different, indeed so widely opposed that the result of the two cannot be the same. They must be different.
10. 10. The principles of the Hindu Law of Karma may be stated seriatim for convenience.
11. 11. The Hindu Law of Karma is based on the soul. The Buddhist is not. In fact there is no soul in Buddhism.
12. 12. The Brahminic Law of Karma is hereditary.
13. 13. It goes on from life to life. This is so because of the transmigration of the soul.
14. 14. This cannot be true of the Buddhist Law of Karma. This is also because there is no soul.
15. 15. The Hindu Law of Karma is based on the existence of a soul which is distinct from the body. When the body dies the soul does not die. The soul flies away.
16. 16. This is not true of the Buddhist Law of Karma.
17. 17. According to the Hindu Law of Karma what happens when a man does a karma is this. His act produces two-fold results. It affects the doer and secondly it produces an impress upon his soul.

18. 18. Each act he does produces an impress upon his soul.
19. 19. When a man dies and when his soul escapes, the soul is full of such impressions.
20. 20. It is these impressions which determine his birth and status in his future life.
21. 21. This Hindu theory is inconsistent with the Buddhist theory of no-soul.
22. 22. For these reasons the Buddhist doctrine of Karma cannot be and is not the same as the Hindu doctrine of Karma.
23. 23. It is therefore simply foolish to talk about the Buddhist doctrine of Karma being the same as the Brahminic doctrine of Karma.
24. 24. All that one can say is beware of this jugglery.

§ 2. Did the Buddha believe in Past Karma having effect on Future Life?

1. 1. The Law of Karma was enunciated by the Buddha. He was the first to say: "Reap as you sow."
2. 2. He was so emphatic about the Law of Karma that he maintained that there could be no moral order unless there was a stern observance of the Law of Karma.
3. 3. The Buddha's Law of Karma applied only to Karma and its effect on present life.
4. 4. There is, however, an extended doctrine of Karma. According to it Karma includes Karma done in past life or lives.
5. 5. If a man is born in a poor family it is because of his past bad karma. If a man is born in a rich family it is because of his past good karma.
6. 6. If a man is born with a congenital defect it is because of his past bad karma.
7. 7. This is a very pernicious doctrine. For in this interpretation of karma there is no room left for human effort. Everything is predetermined for him by his past karma.
8. 8. This extended doctrine is often found to be attributed to the Buddha.
9. 9. Did the Buddha believe in such a doctrine?

10. 10. To examine this extended doctrine properly it is better to change the language in which it is usually expressed.
11. 11. Instead of saying that past karma is transmitted it should be better if it was said that past karma is inherited.
12. 12. This change of language enables us to test it by the law of heredity. At the same time it does no harm to the doctrine either to its *de jure* or *de facto* connotation.
13. 13. This restatement makes it possible to pose the two questions which could not otherwise be posed and without answering which the matter could not be made clear.
14. 14. The first question is how is past karma inherited? What is the process?
15. 15. The second question is what is the nature of past karma in terms of heredity? Is it an inherent characteristic or acquired characteristic?
16. 16. What do we inherit from our parents?
17. 17. Starting with science the new individual begins when a sperm enters the egg. Fertilisation consists in fusion of the head of the sperm with the nucleus of the egg.
18. 18. Each human being takes its origin from the union of two bits of living matter, an egg from the mother which has been fertilised by a single sperm from the father.
19. 19. That human birth is genetic is told by the Buddha to a Yakkha who came to discuss the matter with him.
20. 20. The Exalted One was then staying near Rafagraha, on the hill called Indra's Peak.
21. 21. Now that Yakkha drew near to the Exalted One and addressed him as follows: ' Material form is not the living soul ' So says th' Enlightened One. Then how doth soul possess this body? Whence to soul doth come Our bunch of bones and bowels? How doth soul within the mother-cave suspended bide?
22. 22. To this the Exalted One replied:

At first the *Kalala* takes birth, and thence the *abudde*. Therefrom the *pesi* grows, Developing as *ghana* in its turn. Now in the *ghana* doth appear the hair, The down, the nails.

And whatsoever food and drink the mother of him takes, thereby the man in mother's womb doth live and grow.

1. 23. But the Hindu doctrine differs.
2. 24. It says that the body is genetic. But the soul is not. It is implanted into the body from outside— the doctrine is unable to specify the source.
3. 25. Turning to the second question as to what is the nature of past karma, it must be determined whether it is an inherent characteristic or an acquired characteristic.
4. 26. Unless an answer to this question is forthcoming it cannot be tested by the scientific theory of heredity.
5. 27. But assuming there is an answer one way or the other to this question how is it possible to get any help from science whether it is a sensible theory or senseless theory.
6. 28. According to science a child inherits the characteristics of his parents.
7. 29. In the Hindu doctrine of karma a child inherits nothing from its parents except the body. The past karma in the Hindu doctrine is the inheritance of the child by the child and for the child.
8. 30. The parents contributes nothing. The child brings everything.
9. 31. Such a doctrine is nothing short of an absurdity.
10. 32. As shown above the Buddha did not believe in such an absurdity.
11. 33. "Yes, if it were not reborn; but if it were, no." no.
12. 34. "Give me an illustration."
13. 35. "Suppose, O king, a man were to steal another man's mangoes, would the thief deserve punishment?"
14. 36. "Yes"
15. 37. "But he would not have stolen the mangoes the other set in the ground. Why would he deserve punishment?"
16. 38. "Because those he stole were the result of those that were planted."
17. 39. "Just so, great king, this name-and-form commits deeds, either pure or impure, and by that karma another name-and-form is reborn. And therefore is it not set free from its evil deeds?"
18. 40. "Very good, Nagasena !"
19. 41. The king said : "When deeds are committed, Nagasena by one

name-and-form, what becomes of those deeds?”

20. 42.”The deeds would follow it, O king, like a shadow that never leaves it.”

21. 43.”Can any one point out those deeds, saying: ' Here are those deeds or there? '

22. 44.”No.”

23. 45.”Give me an illustration.”

24. 46.”Now what do you think, O king? Can any one point out the fruits which a tree has not yet produced, saying:

25. 47. ' Here they are, or there? '“

26. 48.”Certainly not, sir,”

27. 49.”Just so, great king, so long as the continuity of life is not cut off, it is impossible to point out the deeds that are done.”

28. 50.”Very good, Nagasena.”

§ 3. *Did the Buddha believe in Past Karma having effect on Future Life? —concluded*

1. 1. The Buddha's doctrine of Past Karma is thus in keeping with science.

2. 2. He did not believe in the inheritance of Past Karma.

3. 3. How can he, having held to the view that birth is genetic and whatever inheritance comes to the child it comes through its parents?

4. 4. Apart from logic there is more direct evidence on the point contained in a sutta called the Cula— Dukkha—Khanda—Sutta which contains a dialogue between the Buddha and the Jains.

5. 5. In this dialogue this is what the Buddha says :—”Niganthas, you have done evil in the past ; extirpate it by these severe austerities. Every present restraint on body, 'speech and mind will hereafter undo the evil doings of the past. Hence, by expelling through penance all past misdeeds, and by not committing fresh misdeeds, the future becomes cleared; with the future cleared, the past is wiped out ; with the past wiped out, is no more ; with no more (Painful) feelings are no more; and, with painful feelings now no more, all will be outworn.—This teaching commends and approves itself to us, and we rejoice in it.”

6. 6. Thereupon, I said to those Niganthas :—”Do you know, reverend

sirs, whether you had an existence before this or you were not non-existent?"

7. 7."No, Sir."

8. 8."Do you know that, in a former existence, you were guilty, and not guiltless, of misdeeds?"

9. 9."No."

10. 10."Do you know that (in that former existence) you were guilty, and not guiltless, of this or that specific misdeed?"

11. 11."No

12. 12. Secondly the Buddha asserts that the status of a man may be governed not so much by heredity as by his environment.

13. 13. In the Devadaha—Sutta this is what the Buddha says : Some recluses and Brahmins there are who affirm and hold the view that, whatsoever the individual experiences—be it pleasant or unpleasant or neither—all comes from former actions. Hence, by expiation and purge of former misdeeds and by not committing fresh misdeeds, nothing accrues for the future, the misdeeds die away ; as misdeeds die away, dies away ;'as dies away, feelings die away ; and as feelings die away, all will wear out and pass. This is what the Niganthas affirm.

14. 14. If it is because of their birth's environment that creatures experience pleasure and pain, the Niganthas are blameworthy, and they are also blameworthy, if environment is not the cause.

15. 15. Now these statements of the Buddha are very relevant. How could the Buddha throw doubt on past karma if he believed in it? How could the Buddha maintain pain and pleasure in present life being due to environment if he believed that it was due to past karma?

16. 16. The doctrine of past karma is a purely Brahminic doctrine. Past karma taking effect in present life is quite consistent with the Brahminic doctrine of soul, the effect of karma on soul. But it is quite inconsistent with the Buddhist doctrine of non-soul.

17. 17. It has been bodily introduced into Buddhism by some one who wanted to make Buddhism akin to Hinduism or who did not know what the Buddhist doctrine was.

18. 18. This is one reason why it must be held that the Buddha could not have preached such a doctrine.

19. 19. There is another and a more general reason why it must be held

that the Buddha could not have preached such a doctrine. 20. The basis of the Hindu doctrine of past karma as the regulator of future life is an iniquitous doctrine. What could have been the purpose of inventing such a doctrine?

20. 21. The only purpose one can think of is to enable the state or the society to escape responsibility for the condition of the poor and the lowly.

21. 22. Otherwise such an inhuman and absurd doctrine could never have been invented.

22. 23. It is impossible to imagine that the Buddha who was known as the Maha Karunika could have supported such a doctrine.

§ 1. The different ways in which it was interpreted and followed

1. 1. Ahimsa or non-killing forms a very important part of the Buddha's teachings.

2. 2. It is intimately connected with Karuna and Maitri.

3. 3. The question has, however, been raised whether His Ahimsa was absolute in its obligation or only relative. Was it only a principle? Or was it a rule?

4. 4. People who accept the Buddha's teachings find it difficult to accept Ahimsa as an absolute obligation. They say that such a definition of Ahimsa involves the sacrifice of good for evil, the sacrifice of virtue for vice.

5. 5. This question requires to be clarified. There is no subject which is a matter of greater confusion than this subject of Ahimsa.

6. 6. How have the people of Buddhist countries understood and actised Ahimsa?

7. 7. This is an important question which must be taken into account.

8. 8. The monks of Ceylon fought against and asked the people of Ceylon to fight against the foreign invaders.

9. 9. On the other hand the monks of **Burma** refused to fight against the foreign invaders and asked the Burmese people not to fight.

10. 10. The Burmese people eat eggs but not fish.

11. 11. This is how Ahimsa is understood and followed.

12. 12. Recently the German Buddhist Association passed a resolution by which they accepted all the Panch Silas except the first which deals with

Ahimsa.

13. 13. This is the position about the Doctrine of Ahimsa.

§ 2. *True Meaning of Ahimsa.*

1. 1. What does Ahimsa mean?

2. 2. The Buddha has nowhere given any definition of Ahimsa. In fact he has very seldom, if at all, referred to the subject in specific terms.

3. 3. One has, therefore to spell out his intention from circumstantial evidence.

4. 4. The first circumstantial evidence on the point is that the Buddha had no objection to eating meat if it was offered to him as part of his alms.

5. 5. The monk can eat meat offered to him provided he was not a party to the killing of it.

6. 6. He resisted the opposition of Devadatta who insisted that the monks should be prohibited from eating meat given to them by way of alms.

7. 7. The next piece of evidence on the point is that he was only opposed to the killing of animals in yajna (sacrifice). This he has himself said.

8. 8. Ahimsa PermoDharma is an extreme Doctrine, It is a Jain Doctrine. It is not a Buddhist Doctrine.

9. 9. There is another piece of evidence which is more direct than circumstantial which almost amounts to a definition of Ahimsa. He has said: "Love all so that you may not wish to kill any." This is a positive way of stating the principle of Ahimsa.

10. 10. From this it appears that the doctrine of Ahimsa does not say "Kill not. It says love all."

11. 11. In the light of these statements it is quite easy to have a clear understanding of what the Buddha meant by Ahimsa.

12. 12. It is quite clear that Buddha meant to make a distinction between will to kill and need to kill.

13. 13. He did not ban killing where there was need to kill.

14. 14. What he banned was killing where there was nothing but the will to kill.

15. 15. So understood there is no confusion in the Buddhist doctrine of

Ahimsa.

16. 16. It is a perfectly sound or moral doctrine which everyone must respect.

17. 17. No doubt he leaves it to every individual to decide whether the need to kill is there. But with whom else could it be left. Man has Pradnya and he must use it.

18. 18. A moral man may be trusted to draw the line at the right point.

19. 19. Brahminism has in it the will to kill.

20. 20. Jainism has in it the will never to kill.

21. 21. The Buddha's Ahimsa is quite in keeping with his middle path.

22. 22. To put it differently the Buddha made a distinction between Principle and Rule. He did not make Ahimsa a matter of Rule. He enunciated it as a matter of Principle or way of life.

23. 23. In this he no doubt acted very wisely.

24. 24. A principle leaves you freedom to act. A rule does not. Rule either breaks you or you break the rule.

1. 1. The Blessed Lord preached that there was rebirth. But the Blessed Lord also preached that there was no transmigration.

2. 2. There were not wanting people who criticise the Lord for preaching what they regarded as two such contradictory doctrines.

3. 3. How can there be rebirth unless there is transmigration? asked the critics.

4. 4. There is here a case of rebirth without transmigration, they said. Can this be?

5. 5. There is no contradiction. There can be rebirth although there is no transmigration.

6. 6. This has been well explained by Nagasena in his replies to the questions of King Milinda.

7. 7. Milinda, King of Bactria, asked Nagasena—"Did the Buddha believe in Rebirth (Transmigration)?"

8. 8. His reply was "Yes"

9. 9. "Is this not a contradiction?"

10. 10. Nagasena replied, "No."

11. 11. "Can there be rebirth without a soul?"

12. 12. Nagasena said, "Of course, yes, there can be."

13. 13."Explain how it can be."
14. 14. The king said : "Where there is no transmigration, Nagasena, can there be rebirth?"
15. 15."Yes, there can."
16. 16."But how can that be? Give me an illustration."
17. 17."Suppose a man, O king, were to light a lamp from another lamp, can it be said that the one transmigrates from, or to, the other?"
18. 18."Certainly not."19."Just so, great king, is rebirth without transmigration."
19. 20."Give me a further illustration."
20. 21."Do you recollect, great king, having learnt, when you were a boy, some verse or other from your teacher?"
21. 22."Yes. I recollect that."
22. 23."Well then, did that verse transmigrate from your teacher?"
23. 24."Certainly not."
24. 25."Just so, great king, is rebirth without transmigration."
25. 26."Very good, Nagasena !"
26. 27. The king said : "Is there such a thing, Nagasena, as the soul?"
27. 28."In the highest sense, O king, there is no such thing."
28. 29."Very good, Nagasena !"

1. 1. What the Buddha preached was heard by his audience, which largely consisted of the Bhikkus.
2. 2. It is the Bhikkus who reported to the people at large what the Buddha had said on any particular matter.
3. 3. The art of writing had not yet developed. The Bhikkus had therefore to memorise what they had heard. Not every Bhikku cared to memorise what he heard. But there were some that had made it their profession to memorise. They were called Bhanakas.
4. 4. The Buddhist canonical literature is as vast as ocean. To memorise all this was indeed a great feat.
5. 5. In reporting the Buddha it has often been found that he has been misreported.
6. 6. Many cases of misreporting had been brought to the knowledge of the Buddha while he was alive.
7. 7. Reference may be made by way of illustration to five such cases.

One is mentioned in the Alagaddupama Sutta and the other in the Maha-Kamma-Vibhanga Sutta, a third in the Kannakatthala Sutta, fourth in the Maha-Tanha-Sankhya Sutta and fifth in the Jivaka Sutta.

8. 8. There were perhaps many more such cases of misreporting. For we find that even the Bhikkus going to the Buddha asking him to tell them what they should do in such contingencies.

9. 9. The cases of misreporting are common with regard to karma and rebirth.

10. 10. These doctrines have also a place in the Brahminic religion consequently it was easy for the Bhanakas to incorporate the Brahminic tenets into the Buddhist Religion.

II. One has therefore to be very careful in accepting what is said in the Buddhist canonical literature as being the word of the Buddha.

1. 12. There is however one test which is available.

13. If there is anything which could be said with confidence it is : He was nothing if not rational,

if not logical. Anything therefore which is rational and logical, other things being equal, may be taken to be the word of the Buddha.

2. 14. The second thing is that the Buddha never cared to enter into a discussion which was not profitable for man's welfare. Therefore anything attributed to the Buddha which did not relate to man's welfare cannot be accepted to be the word. of the Buddha.

3. 15. There is a third test. It is that the Buddha divided all matters into two classes. Those about which he was certain and those about which he was not certain. On matters which fell into class I, he has stated his views definitely and conclusively. On matters which fell into class II, he has expressed his views. But they are only tentative views.

4. 16. In discussing the three questions about which there is doubt and difference it is necessary to bear these tests in mind before deciding what the view of the Buddha was thereon.

PART III : THE BUDDHIST WAY OF LIFE

1. 1. On good, evil and sin.

2. 2. On craving and lust.
3. 3. On hurt and ill-will.
4. 4. **On** anger and enmity.
5. 5. On man, mind and impurities.
6. 6. On self and self-conquest.
7. 7. On wisdom, justice and good company.
8. 8. On thoughtfulness and mindfulness.
9. 9. On vigilance, earnestness and boldness.
10. 10. On sorrow and happiness; On Charity and Kindness.
11. 11. On hypocrisy.
12. 12. On following the Right Way.
13. 13. Mix not true Dhamma with false Dhamma.

§ 1. *On Good, Evil and Sin*

1. 1. Do good. Be no party to evil. Commit no sin.
2. 2. This is the Buddhist way of life.
3. 3. If a man should do that which is good, let him do it again and again, let him turn the desires of his heart thereto. Happy is the heaping of good.
4. 4. Think not casually of the good saying, "It will not come to me." Drop by drop is the water pot filled. By little added to little does good grow.
5. 5. But well done is that deed which brings one no regrets, the fruit whereof is received with delight and satisfaction.
6. 6. Well done is the deed which done brings no regrets, the fruit whereof is received with delight and satisfaction.
7. 7. If a man does what is good, let him do it again ; let him delight in it; the accumulation of good is delightful.
8. 8. Even a good man sees. evil days so long as his good deed does not ripen; but when his good deed ripens, then does the good man see good things.
9. 9. Let no man think lightly of good, saying in his heart, it will not come right unto me. Even by the falling of water drops a water-pot is filled—the wise man becomes full of good, even if he gathers it little by little.

10. 10. Far surpassing the fragrance of sandal or incense or lotus or jasmine, is the fragrance of virtue.
11. 11. Faint is this fragrance of incense and sandal, **but** the fragrance of virtue ascends to the highest place.
12. 12. Treat not lightly of evil, saying it will not come to me. Drop by drop is the water pot filled. By little added to little evil accumulates.
13. 13. It is not well to do a deed which done brings regrets, the fruit whereof is received with tears and lamentations.
14. 14. If a man speaks or acts evil of mind, suffering follows him close as the wheel the hoof of the beast that draws the cart.
15. 15. Follow not after things evil. Dwell not in negligence. Cherish not false ideas.
16. 16. Hasten towards the excellent, suppress all evil thoughts. Who so is backward in doing good, his mind delights in evil.
17. 17. It is not well to do that deed which done brings regrets, the fruit whereof is received with tears and lamentations.
18. 18. Even an evil-doer sees happiness so long as his evil deed does not ripen; but when his evil deed ripens, then does the evil-doer see evil.
19. 19. Let no man think lightly of evil saying in his heart ' It will not come right unto me.' Even by the filling of water drops a water-pot is filled ; the fool becomes full of evil, even if he gathers it little by little.
20. 20. A man should hasten towards the good, and should keep his thought away from evil; if a man does what is good slothfully, his mind delights in evil.
21. 21. If a man commits a sin, let him not do it again, let him not delight in sin ; the accumulation of evil is painful.
22. 22. Follow the law of virtue; do not follow that of sin. The virtuous rests in bliss in this world.
23. 23. From lust is born sorrow, from lust is born fear. To him who is wholly free from lust there is neither sorrow nor fear.
24. 24. Hunger is the worst of diseases (component), existence the worst of distress. This knowing in accordance with truth and fact, Nibbana becomes the highest happiness.
25. 25. The evil done by oneself, self-begotten, self-bred, crushes the doer as a diamond breaks even a precious stone.
26. 26. He whose wickedness is very great brings himself down to that

state where his enemy wishes him to be, as a creeper does with the tree which it surrounds.

27. 27. Bad deeds, and deeds hurtful to ourselves, are easy to do ; difficult to do what is beneficial and good.

§ 2. *On Craving and Lust*

1. 1. **Do** not be possessed by Craving nor by Lust.
2. 2. This is the Buddhist way of life.
3. 3. Not in a rain of riches is satisfaction of desire to be found."Unsatisfying, grievous are desires,"so the wise man well knows. .
4. 4. Even in the pleasures of the heaven-worlds he takes no delight; his delight is in the ending of craving, he is the disciple of the Supremely Awakened One, the Buddha.
5. 5. From craving is born sorrow, from craving is born fear. To him who is wholly free from craving there is neither sorrow nor fear.
6. 6. From craving is born sorrow, from craving is born fear. To him who is wholly free from craving there is neither sorrow nor fear.
7. 7. He who gives himself to vanity, forgetting (the real aim of life) and grasping at pleasure, will in time envy him who has exerted himself in meditation.
8. 8. Let no man have attachment to anything; loss of it gives pain. Those who love nothing, and hate nothing have no fetters.
9. 9. From pleasure comes grief, from pleasure comes fear; he who is free from pleasure knows neither grief nor fear.
10. 10. From attachment comes grief, from attachment comes fear; he who is free from attachment knows neither grief nor fear.
11. 11. From lust comes grief, from lust comes fear; he who is free from lust knows neither grief nor fear.
12. 12. From greed comes grief, from greed comes fear; he who is free from greed knows neither grief nor fear.
13. 13. He who possesses virtue and intelligence, who is just, speaks the truth, and does what is his own business, him the world will hold dear.
14. 14. Kinsmen, friends and lovers salute a man who has been long away, and returns safe from afar.

15. In like manner his good works receive him who has done good, and has gone from this world as kinsmen receive a friend on his return.

§ 3. *On Hurt and Ill-will*

1. 1. Cause no hurt ; Cherish no ill-will,
2. 2. This is the Buddhist Way of Life.
3. 3. Is there in all the world a man so blameless that he gives no occasion for reproach, as a spirited horse gives no occasion for the stroke of the lash?
4. 4. By confidence, by virtue, by energy, by meditation, by investigation into the Truth, by perfection in knowledge and conduct, by recollectedness, leave ye this great suffering behind
5. 5. The most excellent of ascetic practices is the practice of forbearance, of long suffering ;”most excellent of all is Nibbana”; so says the Buddha. He is no ascetic who does hurt to others ; he is no disciple who works another's woe.
6. 6. To speak no ill, to do no harm, to practise restraint in conformity with the discipline, this is the counsel of the Buddha.
7. 7. Kill, nor cause slaughter.
8. 8. He who seeking his own happiness does not punish or kill beings who also long for happiness, will find happiness.
9. 9. If, like a shattered, metal plate (gong), thou utter nothing, then thou has reached Nibbana ; anger is not known to thee.
10. 10. He who inflicts pain on innocent and harmless person, will soon come to grief.
11. 11. He who, dressed in fine apparel of tranquillity, is quiet, subdued, restrained, chaste, and has ceased to find fault with all other beings, he indeed is an ascetic (Samana), a friar (Bhikku).
12. 12. Is there in this world any man so restrained by shame that he does not provoke reproof, as a noble horse the whip?
13. 13. If a man offend a harmless, pure, and innocent person, the evil falls back upon that fool, like light dust thrown up against the wind.

§4. *On Anger and Enmity*

1. 1. Cherish no anger. Forget your enmities. Win your enemies by love.

2. 2. This is the Buddhist Way of Life..
3. 3. The fire of anger should be stilled.
4. 4. One who harbours the thought :”He reviled me, maltreated me, overpowered me, robbed me,”in him anger is never stilled.”
5. 5. He who harbours not such a thought, in him anger is stilled.
6. 6. Enemy works evil to enemy, hater to hater, but whose is the evil.
7. 7. Let a man overcome anger by love, let him overcome evil by good ; let him overcome the greedy by liberality, the liar by truth.
8. 8. Speak the truth, do not yield to anger ; give, if thou art asked for little.
9. 9. Let a man leave anger, let him forsake pride, let him overcome all bondage ; no sufferings befall the man who is not attached to name and form, and who calls nothing his own.
10. 10. He who holds back rising anger like a rolling chariot, him I call a real driver, other people are but holding the reins.

II. Conquest begets enmity; the conquered lie down in distress. The tranquillised lies down in happiness, dismissing alike victory and defeat.

1. 12. There is no fire like lust, no ill-fortune like hatred. There is no misery like the constituents of existence, no happiness higher than the Peace of Nibbana.
2. 13. For hatred does not cease by hatred at any time : hatred ceases by love, this is an old rule.

§ 5. *On Man, Mind and Impurities*

1. 1. Man is what his mind makes him.
2. 2. The training of the mind to seek the good, is the first step in the path of Righteousness.
3. 3. This is the main teaching in the Buddhist Way of Life.
4. 4. In everything the primal element is mind. Mind is pre-eminent.
5. 5. If a man speaks or does evil suffering follows him, close as the wheel of the hoof of the beast that draws the cart.
6. 6. If a man speaks or acts from uprightness of mind, happiness follows him, close like his never-departing shadow.

7. 7. This fickle, unsteady mind, difficult to guard, difficult to guide—the wise man makes it straight as the fletcher makes straight the arrow.
8. 8. As quivers and throbs the water-dwelling fish, when thrown up out of the water on to the land, so quivers and throbs the mind forsaking
9. 9. Hard to control, unstable is this mind, ever in quest of delight. Good is it to subdue the mind. A mind subdued brings happiness.
10. 10. Make thyself an island, work hard, when thy impurities are blown away, and thou art free from guilt, thou wilt enter into the heavenly world of the elect.
11. 11. Let a wise man blow off the impurities of himself, as a smith blows off the impurities of silver, one by one, little by little, and from time to time.
12. 12. As the impurity which springs from the iron, when it springs from it, destroys it ; thus to a transgressor's own works, lead him to the evil path.
13. 13. But there is a taint worse than all taints. Ignorance is the greatest taint. O ! mendicants, throw off that taint, and become taintless.
14. 14. Life is easy to live for a man who is without shame, a crow here, a mischief maker, an insulting, bold and wretched fellow.
15. 15. But life is hard to live for a modest man, who always looks for what is pure, who is disinterested, quiet, spotless and intelligent.
16. 16. He who destroys life, who speaks untruth, who in the world takes what is not given him, who goes to another man's wife.
17. 17. And the man who gives himself to drinking intoxicating liquors, he even in this world, digs up his own grave.
18. 18. O man, know this, that the unrestrained are in a bad state; take care that greediness and vice do not bring thee to grief for a long time.
19. 19. The world gives according to its faith or according to its pleasure; if a man frets about the food and the drink given to others, he will find no rest either by day or by night.
20. 20. He in whom that feeling is destroyed, and taken out with the very root, finds rest by day and by night.
21. 21. There is no fire like passion, there is no torrent like greed.
22. 22. The fault of others is easily perceived, but that of oneself is difficult to perceive; a man winnows his neighbour's faults like chaff but his own faults he hides, as a cheat hides the bad dice from the player.

23. 23. If a man looks after the faults of others, and is always inclined to be offended, his own passions will grow, and he is far from the destruction of passions. 24. Refrain from all evil; cultivate the good ; cleanse your own thoughts; this is the teaching of the Buddha.

§ 6. *On Self and Self-Conquest*

1, If one has self, let him practise self-conquest.

1. 2. This is the Buddhist Way of Life.

2. 3. Self is the lord of self, who else could be the lord? With self well subdued, a man finds a lord such as few can find.

3. 4. The foolish man who scorns the rule of the venerable (arahat), of the elect (ariya), of the virtuous and follows a false doctrine, he bears fruit to his own destruction, like the fruits of the Katthaka reed.

5. Byoneself the evil is done, by oneself one suffers; by oneself evil is left undone, by oneself one is purified. The pure and the impure (stand and fall) by themselves, no one can purify another.

6. He who loves looking for senses uncontrolled, immoderate in his food, idle and weak, will certainly be overthrown by his own overdoing as the wind throws down a weak tree.

4. 7. He who lives without looking for pleasures, his senses well controlled, moderate in his food, faithful and strong, he will not be overthrown any more than the wind throws down a rocky mountain.

5. 8. If to himself a man is dear, let him keep close watch upon himself.

6. 9. First establish thyself in the right then thou mayest counsel others. Let not the wise man give occasion for reproach.

7. 10. Oneself, they say is hard to control. If one shapes oneself according as one counsels others, thus well controlled one will have control over others. II. A man pays in himself for the evil he has done and in himself is purified. The good and evil are purified severally, no one purifies another.

8. 12. Though one should conquer in battle thousands and thousands of men, who shall conquer himself, he is the greatest of warriors.

9. 13. First establish thyself in the right, then thou mayest counsel others. Let not the wise man give occasion for reproach.

10. 14. If one shapes oneself according as one counsels others, thus well controlled, one will have control over others. Oneself they say, is hard to control.

11. 15. Verily oneself is the guardian of oneself. What other guardian should there be. Guarded by oneself, one gets a guardian the like of which is not likely gotten.

12. 16. If to himself a man is dear, let him keep close watch upon himself.

13. 17. A man pays in himself for the evil he has done, and in himself is purified. The good and evil are purified severally, no one purifies another.

14. 18. Verily oneself is the guardian of oneself; what other guardian should there be? Guarded by oneself, one gets a guardian the like of which is not easily gotten.

§ 7. *On Wisdom, Justice and Good Company*

1. 1. Be wise, be just and choose good company.

2. 2. This is the Buddhist Way of Life.

3. 3. If you see a man who shows you what is to be avoided, who administers reproofs, and is intelligent, follow that wise man as you would one who tells of hidden treasures ; it will be better, not worse, for him who follows him.

4. 4. Let him admonish, let him teach, let him forbid what is improper—he will be beloved of the good, by the bad he will be hated.

5. 5. Do not have evil-doers for friends, do not have low people for friends ; have virtuous people for friends, have for friends the best of men.

6. 6. He who drinks in the Dhamma lives happily with a serene mind; the sage rejoices always in the Dhamma as preached by the elect.

7. 7. Well-makers lead the water (wherever they like), fletchers bend the arrow ; carpenters bend a log of wood ; wise people fashion themselves.

8. 8. As a solid rock is not shaken by the wind, the wise people falter not amidst blame and praise.

9. 9. Wise people, after they have listened to the Dhamma become serene, like a deep, smooth and still lake.

10. 10. Good men indeed walk (warily) under all circumstances; good men speak not out of a desire for sensual gratification; whether touched by

happiness or sorrow wise people never appear elated or depressed.

11. 11. It is sweet as honey, so thinks the fool, while as yet the evil has not ripened. But when the evil ripens the fool comes to grief.

12. 12. A fool does not know when he commits his evil deeds ; but a wicked man burns by his own deeds, as if burnt by fire.

13. 13. Long is the night to him who is awake ; long is a mile to him who is tired ; long is life to the foolish who do not know the true Dhamma. 14.

If a traveller does not meet with one who is his better, or his equal, let him firmly keep to his solitary journey; there is no companionship with a fool.

14. 15."These sons belong to me, and this wealth belongs to me,"with such thoughts a fool is tormented. He himself does not belong to himself ; how much less sons and wealth?

15. 16. The fool who knows his foolishness, is wise at least so far. But a fool who thinks himself wise, he is called a fool indeed.

16. 17. If a fool be associated with a wise man even all his life, he will perceive the truth as little as a spoon perceives the taste of soup.

17. 18. If an intelligent man be associated for one minute only with a wise man, he will soon perceive the truth, as the tongue perceives the taste of soup.

18. 19. Fools of poor understanding have themselves for their greatest enemies, for they do evil deeds which bear bitter fruits.

19. 20. That deed is not well done of which a man must repent and the reward of which he receives crying and with a tearful face.

20. 21. Know, that deed is well done of which a man does not repent and the reward of which he receives gladly and cheerfully.

21. 22. As long as the evil deed done does not bear fruit, the fool thinks it is like honey, but when it ripens, then the fool suffers grief.

22. 23. And when the evil deed, after it has become known, turns to sorrow for the fool, then it destroys his bright lot, nay, it cleaves his head.

23. 24. Let the fool wish for a false reputation, for precedence among the Bhikkus, for lordships in the convents, for worship among other people.

24. 25. A man is not an elder because his head is grey ; his age may be ripe, but he is called "old-and- vain."

25. 26. He in whom there is truth, virtue, pity, restraint, moderation, he who is free from impurity and is wise, he is called an elder.

26. 27. An envious, stingy, dishonest man does not become respectable

by means of much talking only, or by the beauty of his complexion.

27. 28. He in whom all this is destroyed, and taken out with the very root, he when freed from hatred and wise, is called respectable.

28. 29. A man is not just if he carries a matter by violence; no, he who distinguishes both right and wrong, who is learned and guides others, not by violence, but by the same Dhamma, being a guardian of the Dhamma and intelligent, he is called just.

29. 30. A man is not learned simply because he talks much ; he who is patient, free from hatred and fear, is called learned.

30. 31. A man is not a supporter of the Dhamma because he talks much ; even if a man has learnt little, but sees the Dhamma bodily, he is supporter of the Dhamma, a man who never neglects the Dhamma.

31. 32. If a man find a prudent companion who walks with him, is wise, and lives soberly, he may walk with him, overcoming all dangers, happy, but considerate.

32. 33. If a man finds no prudent companion to walk with him, is wise, and lives soberly, let him walk alone, like a king who has left his conquered country behind, like an elephant in the forest.

33. 34. It is better to live alone, there is no companionship with a fool ; let a man walk alone, let him commit no sin, with few wishes, like an elephant in the forest.

34. 35. If the occasion arises, friends are pleasant ; enjoyment is pleasant, whatever be the cause; a good work is pleasant, whatever be the cause ; a good work is pleasant in the hour of death ; the giving up of all grief is pleasant.

35. 36. Pleasant in the world is the state of a mother, pleasant the state of a father, pleasant the state of a Samana.

36. 37. Pleasant is virtue lasting to old age, pleasant is a faith firmly rooted ; pleasant is attainment of intelligence, pleasant is avoiding of sins.

37. 38. He who walks in the company of fools suffers a long way ; company with fools as with an enemy, is always painful ; company with the wise is pleasure. like meeting with kinsfolk.

38. 39. Therefore, one ought to follow the wise, the intelligent, the learned, the much enduring, the dutiful, the elect, one ought to follow such a good and wise man, as the moon follows the path of the stars.

39. 40. Follow not after vanity, nor after the enjoyment of love and lust.

He who is earnest obtains ample joy.

40. 41. When the learned man drives away vanity by earnestness, he, the wise, climbing the terraced heights of wisdom, looks down upon the fools, free from sorrow he looks upon the sorrowing crowd, as one that stands on a mountain looks down upon them) that stand upon the plain

41. 42. Earnest among the thoughtless, awake among the sleepers, the wise man advances like a richer, leaving behind the hack.

§ 8. *On Thoughtfulness and Mindfulness*

1. 1. In everything be thoughtful; in everything be mindful ; in all things be earnest and bold.

2. 2. This is the Buddhist Way of Life.

3. 3. All that we are is the result of what we have thought ; it is founded on our thoughts, it is made up of your thoughts. If a man speaks or acts with an evil thought, pain follows him. If a man speaks or acts with a pure thought, happiness follows him. Therefore pure thoughts are important.

4. 4. Be not thoughtless, watch your thought! Draw yourself out of the evil way, like an elephant sunk in mud.

5. 5. Let the wise man guard his thoughts, for they are difficult to perceive, very artful, and they rush whenever they list; thoughts well-guarded bring happiness.

6. 6. As rain breaks through an ill-thatched house, passion will break through an unreflecting mind.

7. 7. As rain does not break through a well-thatched house, passion will not break through a well-reflecting mind.

8. 8. This mind of mine went formerly wandering about as it liked, as it listed, as it pleased ; but I shall now hold it in thoroughly, as the Elder who holds the hook holds the furious elephant.

9. 9. It is good to tame the mind, which is difficult to hold in and tightly, rushing wherever it listeth; a tamed mind brings happiness.

10. 10. Those who bridle their mind which travels far, will be free from the bonds of temptation.

11. 11. If a man's faith is unsteady, if he does not know the true Dhamma, if his peace of mind is troubled, his knowledge will never be perfect.

12. 12. Whatever a hater may do to a hater, or an enemy to an enemy, a wrongly directed mind will do him greater mischief.

13. 13. Not a mother, not a father will do so much, nor any other relatives as a well directed mind will do us.

§9. *On Vigilance, Earnestness and Boldness*

1. 1. When, vigilant, the wise man puts from him negligence, ascending the tower of wisdom he looks down, free from sorrow, upon the sorrow-laden race of mankind. As from a mountain top, the wise man looks upon the fools in the valley.

2. 2. Vigilant among the negligent, awake among those asleep, as a fleet courser leaves behind a sorry nag, so go the wise.

3. 3. Give not yourselves unto negligence. Have naught to do with the lust of the flesh. The vigilant is given to meditation.

4. 4. Earnestness leads to where death is not'; heedlessness is the way to death. Those who continue in earnestness do not die, but the heedless are as if already dead.

5. 5. Fall not away from your purpose for the sake of another, however great this latter may be. When once you have seen your goal, hold it firm and fast.

6. 6. Be watchful! Have done with indolence! Travel the True Path ! Whoso walks thereon happy he lives in the world.

7. 7. Idleness is a disgrace; constant sloth is defilement. By strenuous striving and with the help of insight you should pull out the poisoned arrow of indolence.

8. 8. Give not yourselves unto negligence. Have not to do with the lust of the flesh. The vigilant, the given to meditation, these attain an overflowing happiness.

9. 9. If an earnest person has roused himself, if he is not forgetful, if his deeds are pure, if he acts with consideration, if he restrains himself, and lives according to Dhamma, his glory will increase.

§ 10. *On Sorrow and Happiness; On Chanty and Kindness*

1. 1. Poverty gives rise to sorrow.

2. 2. But removal of poverty does not necessarily give rise to happiness.
3. 3. Not high standard of living but a high standard of culture is what gives happiness.
4. 4. This is the Buddhist Way of Life.
5. 5. Hunger is the worst of diseases.
6. 6. Health is the greatest of gifts, contentedness the best riches; trust is the best of relationships, Nibbana the highest happiness.
7. 7. We must learn to live happily indeed, not hating those who hate us !
8. 8. We must learn to live happily indeed, free from ailments among the ailing men.
9. 9. We must learn to live happily indeed, free from greed among the greedy.
10. 10. Mankind is ruined by passion, just as fields are damaged by weeds : therefore charity done to the passionless brings great reward.
11. 11. Mankind is damaged by vanity, just as fields are damaged by weeds. Therefore charity done to those who are free from vanity brings great reward.
12. 12. Mankind is ruined by lust, just as fields are damaged by weeds. Therefore charity done to those who are free from Just brings great reward.
13. 13. Charity to Dhamma exceeds all gifts. The sweetness of the Dhamma exceeds the Dhamma. The delight in the Dhamma exceeds all delights.
14. 14. Victory breeds hatred, for the conquered is unhappy. He who has given up both victory and defeat, he, the contented, is happy.
15. 15. There is no fire like passion ; there is no losing throw like hatred; there is no pain like this body; there is no happiness higher than the rest.
16. 16. Fix not your gaze upon the ill-words and ill-deeds of others, upon what others do or leave undone. Look rather at what by yourself have done or left undone.
17. 17. Hard always is life for the modest, the seeker after purity, the detached, the retiring, the cleanly of life, the discerning.
18. 18. Is there in the world a man so blameless that he gives no occasion for reproach, as a spirited horse gives no occasion for the stroke of the lash? Like a spirited horse that needs not the lash be fiery, be fleet.
19. 19. Do not speak harshly to anybody: those who are spoken to will

answer thee in the same way. Angry speech is painful, blows for blows will touch thee.

20. 20. Liberty, courtesy, good-will and unselfishness—these are to the world what the lynch-pin to the Chariot.

21. 21. This is the Buddhist Way of Life.

§ II. *On Hypocrisy*

1. 1. Let not anyone speak falsely. Let not anyone lead another to speak falsely, nor yet approve of the action of one who speaks falsely. Let every kind of lying and false speech be put away from among you.

2. 2. As the Perfect One speaks, so He acts. As the Perfect One acts, so He speaks. And because He speaks as He Acts and acts as He speaks, therefore is He Called the Perfect One.

3. 3. This is the Buddhist Way of Life.

§ 12. *On following the Right Way*

1. 1. Choose the Right Way. Depart not from it. 2. There are many paths ; not all lead to the Right Way.

2. 3. The Right Path is for the happiness not of the few but of all.

3. 4. It must be good at the beginning, good in the middle and good at the end.

4. 5. To follow the right way is to lead the Buddhist Way of Life.

5. 6. The best way is the eightfold way ; the best of truths the four words ; the best of virtues passionlessness; the best of men he who has eyes to see.

6. 7. This is the way, there is no other that leads to the purifying of intelligence. Go on this path.

7. 8. If you so on this way, you will make an end of pain ! The way was preached by me, when I had understood the removal of the thorns (in the flesh).

8. 9. You yourself must make an effort. The Tathagatas are only preachers.

10. 'All created things perish,' he who knows and sees this becomes passive in pain.

1. 11. 'All forms are unreal,' he who knows and sees this becomes passive in pain.
2. 12. He who does not rouse himself when it is time to rise, who, though young and strong, is full of sloth, whose will and thought are weak, that lazy and idle man never finds the way to knowledge.
3. 13. Watching his speech, well restrained in mind, let a man never commit any wrong with his body ! Let a man but keep these three roads of action clear, and he will achieve the way which is taught by the wise.
4. 14. Through real knowledge is gotten, through lack of real knowledge is lost ; let a man who knows this double path of gain and loss thus place himself that knowledge may grow.
5. 15. Cut out the love of self, like an autumn lotus, with thy hand! Cherish the road of peace. Nirvana has been shown by the Sugata
6. 16. Do not follow the evil law ! Do not live on in thoughtlessness ! Do not follow false doctrine !
7. 17. Rouse thyself! Do not be idle! Follow the law of virtue ! The virtuous rests in bliss in this world.
8. 18. He who formerly was reckless and afterwards became sober brightens up this world, like the moon when freed from clouds.
9. 19. He whose evil deeds are covered by good deeds, brightens up this world, like the moon when freed from clouds.
10. 20. If a man has transgressed the one law, and speaks lies, there is no evil he will not do.
11. 21. Those who are ever watchful, who study day and night, and who strive after Nirvana, their passions will come to an end.
12. 22. This is an old saying. * They blame him who sits silent, they blame him who speaks much, they also blame him who says little ' ; there is no one on earth who is not blamed.
13. 23. There never was, there never will be, nor is there now, a man who is always blamed, or a man who is always praised.
14. 24. Beware of the anger of the tongue, and control thy tongue. Leave the sins of the mind, and practise virtue with thy mind.
15. 25. Earnestness is the path of Nirvana, thoughtlessness the path of death. Those who are in earnest do not die, those who 'are thoughtless are as if dead already.

§ 13. *Mix not True Dhamma with False Dhamma*

1. 1. Those who mistake false for true and true for false, there abides wrong-mindedness—they arrive not at the truth.
2. 2. Those who know true as true and false as false, there abides right-mindedness—these arrive at the truth.
3. 3. As rain gets into an ill-thatched house, so craving gets into an ill-trained mind.
4. 4. As rain gets not into a well-thatched house, so craving gets not into a well-trained mind.
5. 5. Arise! Be not negligent! Walk the Good Way of the Teaching! Who walks in the way of the teaching, happy is he in this and in all worlds.
6. 6. Walk the Good Way of the teaching; walk not in ways that are evil. Who walks in the way of the teaching, happy he lives in this and in all worlds.

PART IV : HIS SERMONS

Section I—*Sermons for Householders.*

1. 1. The Happy Householder.
2. 2. Daughter may be better than a son.
3. 3. Husband and wife.

Section II —*Sermons on the need for maintaining character,*

1. 1. What constitutes the downfall of man.
2. 2. The wicked man.
3. 3. The best man.
4. 4. The enlightened man.
5. 5. Man—just and good.
6. 6. Need for doing good deeds.
7. 7. Need for making good resolutions.

Section III -*Sermons on Righteousness.*

1. 1. What is Righteousness.
2. 2. Need for Righteousness.
3. 3. Righteousness and the claims of the world.
4. 4. How to reach perfection in Righteous Conduct.
5. 5. One need not wait for a companion to tread on the path of Righteousness.

Section IV-Sermons on Nibbana,

1. 1. What is Nibbana.
2. 2. The roots of Nibbana.

Section v —Sermons on Dhamma.

1. 1. Why right views rank first.
2. 2. Why bother about life after death.
3. 3. Prayers and invocations to God are a futility.
4. 4. It is not what you eat that makes you holy.
5. 5. Not food but evil actions that matter.
6. 6. Not enough is outward washing.
7. 7. What is holy life?

Section VI -Sermons on Socio'political questions.

1. 1. Do not depend on the favour of princes.
2. 2. If the king is righteous his subjects will be righteous.
3. 3. It is the social system on which depends political and military strength.
4. 4. War is wrong.
5. 5. The duties of a victor, who has won peace.

§ 1. The Happy Householder

1. 1. Once Anathapindika came to where the Exalted One was, made obeisance to the Exalted One and took a seat at one side.
2. 2. Anathapindika was anxious to know wherein lay the happiness of a householder.

3. 3. Accordingly Anathapindika asked the Lord to explain to him the secret of the householder's happiness.
4. 4. The Lord said first is the happiness of possession. A householder is possessed of wealth, justly and righteously acquired by great industry, amassed by strength of the arm, and earned by sweat (of the brow). At the thought ' I am possessed of wealth justly gained ' he gains happiness.
5. 5. Second is the happiness of enjoyment. A householder is possessed of wealth justly and righteously acquired by great industry amassed by strength of the arm, and earned by sweat (of the brow), enjoys his wealth and performs acts of merit. Thus at the thought ' I am doing meritorious deeds with my wealth which was justly gained ' and so forth he gains happiness.
6. 6. Third is the happiness of freedom from debt. A householder, owes no one any debt great or small, thus he gains happiness, thus he at the thought of ' I owe no man anything' and so forth, gains happiness.
7. 7. Fourth is the happiness of blamelessness. A householder, who is endowed with blameless action of body, blameless speech and blameless thinking, gains happiness of blamelessness.
8. 8. Verily, Anathapindika, these four kinds' of happiness are constantly obtainable by the householder, if he strives for them.

§ 2. *Daughter may be better than a Son*

- I. When the Exalted One was once at Shravasti, the king of the Kosalas, Pasendi, had come to visit him.
1. 2. While the king was engaged in a conversation with the Blessed Lord a messenger from the Palace arrived and approaching the king, announced to his private ear that Queen Mallika had given birth to a daughter.
2. 3. The king appeared very sad and depressed. The Blessed Lord asked the king the reason of his sadness.
3. 4. The king replied that he had just received the sad news that Queen Mallika had given birth to a daughter.
4. 5. Thereupon the Exalted One, discerning the matter said : ' A woman child, O lord of man, may prove even a better offspring than a male. For she may grow up wise and virtuous, her husband's mother

reverencing true wife, a daughter.

5. 6. The boy that she may bear may do great deeds and rule great realms, yea, such a son of a noble wife becomes his country's guide.

§ 3. *Husband and Wife*

I. At one time, the Exalted One had entered the high road between Madhura and Neranja. Also many householders and their wives had joined the high road between Madhura and Neranja.

1. 2. Then the Exalted One having left the road took a seat under a certain tree, and these householders and their wives saw the Exalted One seated under it.

2. 3. So seeing they came to where the Exalted One 'was. Having come they made obeisance to the Exalted One and sat at one side and asked the Blessed One the right relations between the husband and wife. To the householders and their wives so seated the Exalted One spake thus :

3. 4."Householders, there are four ways for a husband and wife, of living together. A vile man lives with a vile woman, a vile man lives with a goddess, a god lives with a vile woman and a god lives with a goddess. 5."Householders! a husband kills, steals; commits impurity, lies and indulges in fermented liquor, is wicked and sinful, with his heart possessed by avarice he lives the life of a householder and abuses and reviles virtuous people. Also his wife kills ; . steals, commits impurity, lies, and indulges in fermented liquor, is wicked and sinful, with her heart possessed by avarice she lives the life of the family and abuses and reviles virtuous people. Thus indeed, householders, a vile man lives with a vile woman.

4. 6."Householders! A husband kills, steals, commits impurity, lies and indulges in fermented liquor, is wicked and sinful, with his heart possessed by avarice, he lives the life of a householder and abuses and reviles virtuous people. But his wife abstains from killing, thieving, sexual impurity, lying and indulgence in fermented liquor. His wife is virtuous and of good behaviour , with her heart freed from the taint of avarice she lives the family life and abuses not nor reviles virtuous people. Thus indeed, householders, a vile man lives with a goddess.

7."Householders ! A husband abstains from killing, thieving,

impurity, lying and indulgence in fermented liquor, is virtuous and of good behaviour; with his mind freed from the stains of avarice, he lives the family life and abuses not nor revile virtuous people. But his wife kills, steals, commits impurity, lies and indulges in fermented liquor, is wicked and sinful ; with her

heart possessed by avarice she lives the family life and abuses and reviles virtuous people. Thus indeed, householders, a god lives with a vile woman.

5. 8.”Householders! Herein, a husband and a wife both abstain from killing, thieving, impurity, lying and indulgence in fermented liquor, are virtuous and of good behaviour, with mind freed from taints of avarice they live the family life and abuse not nor revile virtuous people. Thus indeed, householders, a god lives with a goddess.

6. 9.”These, householders, are the four ways of living together.”

§ 1. *What Constitutes the Downfall of Man*

1. 1. On one occasion the Blessed One was dwelling in the monastery of Anathapindika, in the Jeta Grove, near Shravasti.

2. 2. Now when the night was far spent a certain Deva whose splendour illuminated the whole Jeta Grove, came to the presence of the Blessed One, and, drawing near, respectfully saluted Him and stood at one side. Standing thus, he addressed the Blessed **One** in verse:

3. 3. “Having come to interrogate the Blessed One, I ask thee, O Gotama, about the falling man. Pray, tell me the cause of one's downfall.”The Blessed One consented to explain the causes of man's downfall.

4. 4. “Easily known is the progressive one, easily known is the declining one. A lover of the Dhamma is the progressive one, a hater of the Dhamma is the declining one.

5. 5.”The vicious are dear to him, in the virtuous he finds nothing pleasing; he favours the creeds of the vicious—this is the second cause of one's downfall.

6. 6.”The man who is drowsy, fond of society, not industrious, indolent, and who manifests anger— this is the third cause of one's downfall.

7. 7.”Whosoever, being rich, does. not support his aged mother and

father, who have passed their youth—this is the fourth cause of one's downfall.

8. 8."He who, by falsehood, deceives a Brahmana or an ascetic or any other medicant—this is the fifth cause of one's downfall.

9. 9. "The man who owns much property, who has gold and food, but alone enjoys his delicacies— this is the sixth cause of one's downfall.

10. 10."The man who prides in birth or wealth or clan, and despises his own kinsmen—this is the seventh cause of one's downfall.

11. 11."The man who is a debauchee, drunkard, a gambler, who squanders whatever he possesses— this is the eighth cause of one's downfall.

12. 12."Not contented with one's own wives, if one is seen amongst courtesans and the wives of others —this is the ninth cause of one's downfall.

13. 13."He who places in authority an intemperate spend-thrift woman, or a man of similar nature— this is the eleventh cause of one's downfall.

14. 14."He who, of slender means, but vast ambition, of warrior birth, aspires to sovereignty—this is the twelfth cause of one's downfall.

15. 15."Know these causes of downfall, ye noble Deva, and if ye succeed in overcoming them ye will be saved."

§2. *The Wicked Man*

1. 1. The Blessed Lord while he was on journey gave as was his usual practice the following discourse to the Bhikkhus who were accompanying him.

2. 2. Addressing the Bhikkhus the Lord said:"Do you know how to recognise a wicked man?"“No, Lord”replied the Bhikkhus.

3. 3."I will tell you the characteristics of a wicked man.

4. 4."There is a man who shows up the faults of another even when unasked, not to say when asked. Being indeed asked and plied with questions, he speaks ill of another without suppressing or concealing, but with full details. Brethren, such a man is a wicked man.

5. 5."There is a man who, being asked, does not point out the good qualities of another, not to say when unasked. Being indeed asked and plied with questions, he speaks, well of another.

6. 6." There is a man who, being asked, does not disclose his own bad qualities, not to say when unasked. Being indeed asked and plied with questions, he points out his own bad qualities, but suppresses and conceals them and does not give full details. Brethren, such a man is a wicked man.

7. 7."Then again, brethren, there is a man who, even unasked, discloses his good qualities, not to say when asked. Brethren, being asked and plied with questions, he points out his own good qualities without suppressing or concealing them and giving full details. Brethren, such a man is a wicked man."

§ 3. *The Best Man*

I. The Blessed One while he was on journey gave as was his practice the following discourse to the Bhikkhus who were accompanying him :

1. 2. Addressing the Bhikkhus the Lord said:"There are four classes of persons, brethren, to be found in the world.

2. 3."He who has not striven for his own welfare nor that of others; he who has striven for others' welfare, but not his own; he who has striven for his own welfare but not others'; he who has striven for both his own welfare and that of others.

3. 4."One who has striven neither for his own welfare nor for that of others is like a torch from a funeral pyre, lit at both ends, and in the middle smeared with dung. He kindles no fuel either in village or in forest. He is useless to the world. And he is useless to himself.

4. 5."One who has striven for the welfare of others at the cost of his own is both excellent and eminent of the two.

5. 6."Then again, brethren, in the case of the person who has striven both for his own welfare and for that of others—of these four persons this is best and chief, topmost and highest and supreme."

§ 4. *The Enlightened Man*

I. At one time, the Exalted One had reached the high road between (the two towns of) Ukkattha and Setabbya. Then the Brahmin named Dona had also reached the high road between Ukkattha and Setabbya.

1. 2. Just then the Exalted One left the road and sat down at the foot of a tree cross-legged. Then Dona the Brahman, following the footsteps of the Exalted One, saw Him seated at the foot of that tree resplendent and of a comely ppearance, with sense, controlled, with mind appeased, supremely tamed, restrained and powerful. So seeing he approached where the Exalted One was.

2. 3. Having come he said thus to Him :”Is not the Venerable One a Deva?”“Brahman, I am indeed not a Deva.”“Is not the Venerable One then a Gandhabba?”“Brahman, I am indeed not a Gandhabba.”“Is not the Venerable One then a Yakkha?”“Brahman, I am indeed not a Yakkha.”“Is not the Venerable One then a man?”“Brahman, I am indeed not a man.”

3. 4. Having heard the Blessed One reply thus, the Brahman Dona said:”When Thou art asked: Are ye a Deva?

Thou sayest: No. When Thou art questioned : Are ye a Gandhabba? Thou sayest : No. When Thou art asked: Are ye a Yakkha?

Thou sayest: No. When Thou art questioned : Are ye then a

man? Thou sayest : No. Who then can the Venerable One be?”

1. 5.”Brahman, verily I was a Deva, a Gandhabba, Yakkha, a man, so long as I had not purged myself of the intoxicants. These very intoxicants have I now given up with roots cut out like unto a palm-tree, with its base destroyed and rendered unable to sprout again, so that in future they do not come into existence.

2. 6.”Just as a lotus or a water-lily born of the water, grown in the water, risen out of the water, stands unstained by the water even so, Brahman, being born of the world, grown in the world, having overcome the world I abide unstained by the world.

3. 7.”Therefore, O Brahman, consider me as the Enlightened One.”

§5. *Man—Just and Good*

1. 1. Addressing the Brethren, the Lord said,”There are four classes of persons whom you must learn to distinguish if you wish to ascertain who are good and just.

2. 2."Brethren, there is a class of persons who strive for their own welfare but not that of others.
3. 3."Brethren, herein a certain person practises the extirpation of lust in himself, but does not urge the extirpation of lust in others : practises the extirpation of ill-will in himself but does not urge the extirpation of ill-will in others ; and also practises the extirpation of ignorance in himself but does not urge the extirpation of ignorance in others.
4. 4."Indeed, Brethren, this is the person who pursues his own welfare, but not the welfare of others.
5. 5."Brethren, there is a class of persons who have striven for others' welfare, but not their own.
6. 6."Brethren, herein a certain person does not practise the extirpation of lust, ill-will and ignorance in himself, but urges the extirpation of lust, ill-will and ignorance in others.
7. 7."Indeed, Brethren, this is the person who has. striven for others' welfare, but not his own.
8. 8."Brethren, there is a class of persons who strive not, neither for their own welfare nor that of others.
9. 9."Brethren, herein a certain person practises not the extirpation of lust, ill-will and ignorance in himself nor urges the extirpation of lust, ill-will and ignorance in others.
10. 10."Brethren, this is the person that has not striven for his own welfare nor that of others.
11. 11."Brethren, there is a class of persons who strive for their own welfare as well as that of others.
12. 12."Brethren, herein a certain person both practises the extirpation of lust, ill-will and ignorance in himself and also urges the extirpation of lust, ill-will and ignorance in others.
13. 13."Brethren, this is the person who has striven for his own welfare as well as that of others.
14. 14."This last person is to be deemed just and good."

§ 6. *Need for Doing Good Deeds*

1. 1. On one occasion, thus spake the Exalted One, to the Brethren.
2. 2."Be not afraid of good works, brethren. It is another name for

happiness, for what is desired, beloved, dear and delightful, this word 'good works'. I myself brethren can bear witness to having reaped for many a long day the profit of good works a thing desired, beloved, dear and delightful.

3. 3."I often ask ' Of what deeds is all this the fruit? Of what deed is it the ripening, in that I am now thus happy and contented.'

4. 4."The answer that comes to me is: 'Of three deeds this is the fruit. Of three deeds this is the ripening, the deeds of Charity, Self-taming, and Self-control.'

5. 5."Auspicious, festive, happy, blessed dawn ! Fair day, glad time is that when alms are given to worthy ones : when goodly acts, words, thoughts, right aspirations, bring auspicious gain to those that practise them.

6. 6."Happy are they that win such gain, and prosperous in the way ! So be ye also prosperous in the way free from disease and happy with your kin."

§ 7. *Need for' Making Good Resolutions*

1. 1. Once when he was at Shravasti in Jeta's Grove the Exalted One said to the Brethren :

2. 2. "Brethren, there is a great need of good resolutions to be made and observed for a pure and happy life.

3. 3. "I will tell you what your resolutions should be.

4. "Resolve that, 'all my life long may I support my parents. May I respect the head of my can. May I be of gentle speech. May I speak evil of none. Clearing my heart of the stain of

selfishness, may I dwell at home generous pure-handed, delighting in giving up, may I be a proper man to ask a boon of, delighting in sharing gifts with others.

4. 5."All my life long, may I be angerless, and, if anger arise, may I quickly check it"

5. 6. Such are the seven resolutions Brethren, by undertaking and performing which you will attain the state of happiness and purity.

§1 *What is Righteousness*

1. 1. Once when the Lord was on an alms-pilgrimage in Kosala, with a great train of almsmen, he came to a Brahmin village of the Kosalans named Sala.
2. 2. It came to the ears of the Brahmin heads of families in Sala that the Blessed Lord had come to their village in the course of an alms-pilgrimage in Kosala.
3. 3. They felt it was good to go and visit him. So the Brahmins of Sala went to the Lord and, after exchanging civil greetings, took their seats on one side.
4. 4. They asked the Blessed One if he would explain to them what he meant by righteousness.
5. 5. So to the attentive Brahmins the Lord said :”There are three forms of unrighteousness and wickedness for the body ; four for speech ; and three for thoughts.
6. 6.”As regards bodily unrighteousness, a man (i) may take life, as a hunter with hands bathed in blood, given to killing and slaying, merciless to living creatures ; or (ii) may take what is not his, by appropriating to himself in thievish fashion the belongings of other people in village and jungle ; or (iii) may be a fornicator, having intercourse with girls under the charge of mother or father or brother or sister or relations, yes, with girls affianced and plighted and even wearing the very garlands of betrothal.
7. 7.”As regards unrighteousness of speech a man (i) may be a liar; when cited to give testimony before assembly or village-meeting or family council or royal household or his guild, he may say that he knows when he does not know, or that he does not know when he does know, or that he saw when he did not see, or that he did not see when he did see, deliberately lying in the interests either of himself or of other people or for some trifling gain. Or (ii) he may be a slanderer; repeating here what he has heard elsewhere so as to set one set of people by the ears, and repeating elsewhere what he has heard here so as to set another set of people by the ears ; he is a dissolver of harmony and a omenter of strife; discords prompts his utterances, discord being his pleasure, his joy, and his delight. Or (iii) he may be bitter of tongue; what he says is rough and harsh, hurtful and wounding to others, provocative of anger, and leading to distraction. Or (iv) he may be a tattler talking out of season, without heed to fact, always talking of the unprofitable, never of the Doctrine, never of the Rule,

but ever of the trivial, of the ill-timed of the frivolous, of things leading nowhere, and unprofitable.

8. 8."As regards unrighteousness of thought, a man (i) may be covetous, coveting other people's gear with the yearning that it were all his own. Or (ii) he may be malevolent and wicked of heart,— wishing that creatures around him might be killed, destroyed, annihilated, or cease to be. Or

(iii) he may be wrong in outlook and erroneous in his conceptions—holding that there are no such things as alms or sacrifice or oblations, that there is no such things as the fruit and harvest of deeds good and bad, that there is no such thing as this world or any other, that there are no such things as either parents or relations elsewhere, that there are no such things in the world as recluse and Brahmins who, having trodden the right path and walked aright, have, of and by themselves, comprehended and realized this and other worlds and made it all known to others too.

1. 9."Contrariwise, there are three forms of righteousness and goodness for the body; four for speech and three for thoughts.

2. 10."As regards bodily righteousness, a man (0 puts from him all killing and abstains from killing anything; laying aside cudgel and sword, he lives a life of innocence and mercy, full of kindness and compassion for everything that lives. (ii) Theft he puts from him and eschews taking from others except what is given to him by them, he lives an honest life. *(iii)* Putting from him all sensual misconduct, he abstains from fornication; he has no intercourse with girls under the charge of mother or father or brother or sister or relations, no intercourse with girls affianced and plighted and with the garlands of betrothal upon them.

3. 11."As regards righteousness in speech,(i) a man puts lying from him and abstains from lies; when cited to give testimony before assembly or village-meeting or family council or royal household or his guild he says that he does not know when he does not, and that he does know when he does, says that he did not see when he did not see and that he saw when he did see, never deliberately lying in the interests of himself or of other people or for some trifling gain. (ii) All slander he puts from him and from slandering he abstains; what he hears here he does not repeat elsewhere so to set one set of people by the ears, nor does he repeat here what he hears

elsewhere so as to set another set of people by the ears, he is a promoter of harmony and a restorer of amity, for concord is his pleasure, his joy, and his delight. (iii) There is no bitterness in his tongue and he abstains from bitter speech; what he says is without gall, pleasant, friendly hearty, urbane, agreeable, and welcome to all. (iv) No tattler, he abstains from tattle, speaking in season, according to fact, always of the profitable, of the Doctrine and Rule, in speech which is seasonable and memorable, illuminating, well-marshalled, and of great profit.

4. 12."As regards righteousness in thoughts, (i) a man is devoid of covetousness, never coveting other people's gear with the yearning that it were all his own. (ii) He harbours no malevolence or wickedness of thought; his wish is that creatures around him may live on in peace and happiness, safe, from all enmity and oppression. (iii) He is right in outlook and correct in his conceptions.

5. 13."This is what I mean by righteousness and unrighteousness."

§2. *Need for Righteousness*

1. 1. Then the Exalted One addressed the lay brethren of Pataligama:

2. 2."There are losses, householders, which attend the wicked and immoral man.

3. 3."The wicked, immoral man, as the result of sloth, comes to great loss of wealth.

4. 4."Then again, an evil report prevails about him which defames him in the eyes of the world.

5. 5."Whatever company he may enter, be it a company of the nobles, or the Brahmins, or the housefathers, or a company of recluses, he enters shyly and confused in mind. He is not fearless. This is the third loss.

6. 6."Again, he has no peace of mind and is troubled in mind when he dies. This is the fourth loss.

7. 7."Such, householders, are the losses that attend the wicked and immoral man.

8. 8."Consider the profits which attend the righteous man who lives virtuously.

9. 9. "' The righteous man who lives virtuously comes by a great mass of wealth, due to his own exertions.

10. 10."Then, again, a good reputation prevails about him. He is honoured everywhere.
11. 11."Into whatsoever company he enters, be it of the nobles or the Brahmins or the housefathers or the recluses, he enters bold and confident.
12. 12."Again, he enjoys peace of mind and makes an end with mind untroubled.
13. 13."The fool in doing ill knows not his folly: His own deeds like a fire, the fool consume.
14. 14. He who offends the harmless innocent soon reaches grievous disaster, or a mind distraught, loss of relations, loss of all his wealth.

§ 3. *Righteousness and the Claims of the World*

1. 1. Once when the Lord was staying at Rajagraha in the Bamboo grove where the squirrels were fed, the reverend Sariputta was making an alms pilgrimage with a great train of almsmen among the Southern Hills'
2. 2. On his way he met an almsman who had spent the rainy season at Rajagraha. After interchange of greetings of friendliness and civility, Sariputta enquired after the Master's health and was told he was well, as too was the Confraternity, and also the Brahmin Dhananjani of Tandulapala Gate in Rajagraha concerning whose health too Sariputta had made enquiries.
3. 3. ' And is the Brahmin, Dhananjani, zealous and earnest? ' asked Sariputta further of the Almsman.
4. 4. ' How could earnest zeal possibly dwell in Dhananjani? ' replied the Almsman. ' He uses the king to fleece the Brahmins and householders, and uses them to fleece the king. Also, his pious wife who came of a pious stock is dead now ; and he has taken to himself another wife who is not pious and comes of no pious stock.'
5. 5. ' This is bad news, very bad news to hear of Dhananjani's lack of zeal,' said Sariputta. 'Perhaps, however, at some time and place I may meet him I should like to have a talk with him.'
6. 6. After staying as long as he wanted in the Southern Hills, Sariputta proceeded on his alms pilgrimage till he reached Rajagraha, where he took up his abode in the Bamboo Grove.
7. 7. Early in the morning, bowl in hand and duly robed, he went into

Rajagraha for alms, at a time when the Brahmin Dhananjani was out of the city seeing his cows milked in the byre.

8. 8. On his return after his round and meal, Sariputta sought out the Brahmin. Seeing him coming, the Brahmin came to meet him with the remark that they had time for a draught of milk before meal-time.

9. 9. Not so. Brahmin, I have had my meal today, and shall be resting under the shade of a tree during the noontide. Come to me there.

10. 10. Dhananjani agreed and after his own meal joined Sariputta seating himself by him after friendly greetings.

11. 11. Said Sariputta: "May I rest assured, Dhanan-jani, that zeal and earnestness and righteousness are yours?"

12. 12. "How can that be, when I have to support my parents, my wife and family, and my slaves and serving folk and have to entertain my acquaintances and friends, my kith and kin, and guests, and have also to provide for my kinsfolk dead and gone, and for the deities, and for the king not to speak of supporting myself in meat and drink? "

13. 13. "What think you, Dhananjani? If we suppose a man who, for his parents' sake, has departed from righteousness and equity and is being hauled up would it avail him either to plead on his own behalf that it was for his parents' sake that he had departed from righteousness and equity and that therefore he should not be hauled up?"

14. 14. "No ; despite all appeals, the wardens would cast him into prison."

15. 15. "Would it avail him either to plead on his own behalf, or to have his wife and family plead for him, that it was for their sake he had departed from righteousness and equity?"

16. 16. "No."

17. 17. "Would it avail him if his slaves and serving folk pleaded for him?"

18. 18. "Not a whit"

19. 19. "Or if his friends and acquaintances pleaded for him?"

20. 20. "Not a whit."

21. 21. "Or if his kith and kin, or his guests pleaded for him?"

22. 22. "Not a whit."

23. 23. "Or if his kinsfolk dead and gone, pleaded the claims of his deities, or his monarch's claims on him?"

24. 24. "Not a whit."

25. 25."Would it avail him to plead on his own behalf or to have others pleading for him that it was to support himself in meat and drink that he departed from righteousness and equity?"
26. 26."No."
27. 27."What think you,Dhananjani? Which is the better man? He that for the sake of his parents departs from righteousness and equity or he that no matter what happens to them walks in righteousness and equity?"
28. 28."The latter,"replied Dhananjani,"for to walk in righteousness and equity is better than to depart therefrom."
29. 29."Moreover, Dhananjani, there are other courses of action which are justified and righteous in themselves, whereby he can support his parents and yet avoid evildoing and walk uprightly. Now, does the same reasoning apply to the support of wife and family and everything else?"
30. 30."It does, Sariputta."
31. 31."Hereupon the Brahmin rejoicing in what the reverend Sariputta had said, thanked him, rose up and went his way."

§ 4. *How to Reach Perfection in Righteous Conduct*

1. 1. Once while the Lord was staying at Shravasti in Jeta's Grove there came to him five hundred lay-followers. One of them was Dhammika.
2. 2. Dhammika asked the Lord : "What principles make your followers reach perfection in righteous conduct.
3. 3."I ask thee this question because thou art the most matchless judge of the weal of men.
4. 4."Trained Jains and Mendicants all failed to vanquish thee. Trained Brahmins, ripe in years— with others keen to air their point of view—are led to embrace thy saving truth. For, 'tis thy saving Truth,— subtle, but preached so well for which all yearn. Vouchsafe an answer, Lord, to us !
5. 5. "Let the lay-followers learn from thy lips thy Lore immaculate !"
6. 6. The Blessed Lord in compassion for his lay-followers said : "Give me your ear. I will explain the principles of righteous conduct. Hear and follow them.

"Slay not, nor doom to death, nor sanction slaughter. Do no violence to

ought that lives—strong or weak.

1. 8."No layman, wittingly, should thief, or order theft, or sanction any theft,—take but what others give.
2. 9."And shun incontinence as 'twere a pit of fire, or, failing continence, debauch no wedded wife.
3. 10."In conclaves, courts, or talk let him not lie; let him not prompt or sanction lies—let him renounce untruth.
4. 11."Layman, observe this law: Shun drink; make no man drink; sanction no drinking. Mark how drink to madness leads.
5. 12."Through drink fools sin, and egg lax brethren on to sin. So flee this maddening vice, this folly, bliss of fools.
6. 13."Slay not, nor steal, nor lie; from strong drink keep away; refrain from lechery; touch not wrong meals at night !
7. 14."Eschew both scents and wreaths; spread on the ground thy bed; so make thy sabbath vows as week succeeds to week, and keep with pious hearts this eightfold festival.
8. 15."At morn, these vows performed, with pious, thankful heart be wise and of thy means give Almsmen food and drink.
9. 16."Cherish thy parents well; follow a righteous trade. Thus shall the layman staunch reach realms of light above.

§ 5. *One Need Not Wait for a Companion to Treadon the Path of Righteousness*

1. 1. An elephant in battle bears the arrow at him buried, I must bear men's bitter tongues for every evil in the world.
2. 2. Tamed, they lead him into battle; tamed, the king his back ascends; tamed, is he the best of beings when no bitter speech offends.
3. 3. Good are well-tamed mules, and good are Cindian steeds of lineage famed, good indeed the mighty tusker; best of all the men self-tamed.
4. 4. Yet such mounts can naught avail us, cannot be Nibbana's guide. We can only reach the Path on the self-tamed self-ride
5. 5. Take delight in Earnestness; watch thy thoughts and never tire. Lift thee from the Path of Evil, take the Tusker out of mire.
6. 6. Hast thou found a fellow-traveller, upright, firm, intelligent?

Leaving all thy cares behind thee, gladly walk with him intent.

7. 7. Hast thou found no fellow-traveller, upright, intelligent? As a King deserts his borders, by the enemy pursued, like the tusker* in the forest, so go thy way in solitude.

8. 8. Better is the lonely life, for fools companions cannot be. Live alone and do no evil, live alone with scanty needs, lonely, as the mighty tusker in the forest lonely feeds.

9. 9. Expunge all bad thoughts.

10. 10. Here is the way to expunge.

11. 11. You are to expunge by resolving that, though others may be harmful, you will be harmless.

12. 12. That, though others may kill, you will never kill.

13. 13. That, though others may steal, you will not.

14. 14. That, though others may not lead the higher life, you will.

15. 15. That, though others may lie, traduce, denounce, or prattle, you will not.

16. 16. That, though others may be covetous, you will covet not.

17. 17. That, though others may be malignant, you will be benignant.

18. 18. That, though others may be given over to wrong views, wrong aims, wrong speech, actions, wrong modes of livelihood, wrong effort, wrong mindfulness and wrong concentration you must follow the Noble Eight-fold Path in right outlook, right aims, right speech, right actions, right mode of livelihood, right efforts, right mindfulness and right concentration.

19. 19. That, though others are wrong about the truth and wrong about Deliverance, you will be right about truth and right about Deliverance.

20. 20. That, though others may be possessed by sloth and torpor, you will free yourself therefrom.

21. 21. That, though others may be puffed up, you will be humble-minded.

22. 22. That, though others may be perplexed by doubts, you will be free from them.

23. 23. That, though others may harbour wrath, malevolence, envy, jealousy, niggardliness, avarice, hypocrisy, deceit, imperviousness, arrogance, forwardness, unscrupulousness, lack of instruction, inertness, bewilderment, and unwisdom—you will be the reverse of all these things.

§ 1. *What is Nibbana*

1. 1. Once the Blessed Lord was staying at Shravasti in Anathapindika's Arama where Sariputta was also staying.
2. 2. The Lord addressing the Brethren said: "Almsmen, be ye partakers not of the world's goods but of my doctrine; in my compassion for you all I am anxious to ensure this."
3. 3. Thus spoke the Lord, who thereupon rose and passed to his own cell.
4. 4. Sariputta remained behind and the Brethren asked him to explain what is Nibbana.
5. 5. Then Sariputta in reply to the Brethren said: "Brethren, know you that greed is vile, and vile is resentment.
6. 6. "To shed this greed and this resentment, there is the Middle Way which gives us eyes to see and makes us know, leading us on to peace, insight, enlightenment and Nibbana.
7. 7. "What is this Middle Way? It is naught but the Noble Eight-fold Path of right outlook, right aims, right speech, right action, right means of livelihood, right effort, right mindfulness and right concentration; this. Almsmen is the Middle Way.
8. 8. "Yes, sirs; anger is vile and malevolence is vile, envy and jealousy are vile, niggardliness and avarice are vile, hypocrisy and deceit and arrogance are vile, inflation is vile, and indolence is vile.
9. 9. "For the shedding of inflation and indolence there is the Middle Way—giving us eyes to see, making us know, and leading us on to peace, insight, enlightenment.
10. 10. "Nibbana which is naught but that Noble Eight-fold Path."
11. 11. Thus spoke the reverend Sariputta—glad at heart, the Almsmen rejoiced at what he had said.

§ 2. *The Roots of Nibbana*

(i)

1. 1. Once the venerable Radha came to the Exalted One. Having done so he saluted the Exalted One and sat down on one side. So seated the

venerable Radha thus addressed the Exalted One: "Pray, Lord, what for is Nibbana."

2. 2. "Nibbana means release from passion," replied the Lord.
3. 3. "But Nibbana, Lord,—what is the aim of it?"
4. 4. "Rooted in Nibbana, Radha, the righteous life is lived. Nibbana is its goal. Nibbana is its end."

(ii)

1. 1. Once the Exalted One was dwelling at Shravasti, in Jeta's Grove, at Anathapindika's Park. Then the Exalted One called the brethren, saying, "Brethren! * Yes, Lord," replied those brethren to the Exalted One. The Exalted One thus spake.
2. 2. "Do ye bear in mind, brethren, the Five Fetters that bind to the lower world, as taught by me?"
3. 3. Whereupon the venerable Malunkyaputta said this to the Exalted One :
4. 4. "I, Lord, bear in mind those Five Fetters."
5. 5. "And how, Malunkyaputta, do you bear them in mind?"
6. 6. "I bear in mind, Lord, the view of bodyhood, as taught by the Exalted One, and wavering, and the moral taint of dependence on rite and ritual, the excitement of sensual delight, and malevolence, taught by the Exalted One as fetters that bind to the lower world. These are the Five Fetters that I bear in mind. Lord."
7. 7. "As taught for whom, Malunkyaputta, do you bear in mind these Five Fetters? Will not the wanderers of other views reproach you, using the parable of a tender baby for their reproach and saying thus:
8. 8. "But, Malunkyaputta, there can be no bodyhood for a tender baby-boy, dull of wits and lying on his back. How, then, can there arise in him any view of bodyhood? Yet there is indeed latent in him a tendency to the view of bodyhood."
9. 9. "Likewise, Malunkyaputta, there can be, no mental conditions for a tender baby-boy, dull of wits and lying on his back. How, then, can there be in him any wavering of mental conditions? Yet there is in him a latent tendency to wavering."
10. 10. "So also, Malunkyaputta, he can have no moral practice. How, then, can there be in him any moral taint of dependence on rite and ritual?"

Yet he has a latent tendency thereto.'

11. 11."Again, Malunkyaputta, that tender babe has no sensual passions. How, then, can be known the excitement of sensual delight? But the tendency is there.'

12. 12."Lastly, Malunkyaputta, for that tender babe beings do not exist. How then can it harbour malevolence against beings? Yet the tendency thereto is in him.'

13. 13."Now, Malunkyaputta, will not those wanderers of other views thus reproach you, using for their reproach the parable of that tender baby-boy?"

14. 14. When this was said, the venerable Ananda thus addressed the Exalted One : "Now is the time, Exalted One. O Wayfarer, now is the time for the Exalted One to set."

§ 1. *Why Right Views Rank First*

1. 1. Of the noble Eightfold path the noblest is Right Outlook.

2. 2. Right thinking is the preface and the key to every thing else in the higher life, and ignorance.

3. 3. The lack of understanding is the root of all evil.

4. 4. For developing right outlook one must see all phenomena of life as a process of causal law. To have right outlook is to recognise the law of cause and effect.

5. 5."Whatsoever individual, brethren, follows perverted views, perverted aim, perverted speech or acts or living, perverted effort, attention, and contemplation : whose knowledge and emancipation are perverted, for him every action of deed, word or thought, performed and achieved according to such perverted views ; every willed act, every aspiration, every resolve, all his activities, these things one and all conduce to what is distasteful, unpleasing, repulsive, unprofitable, and painful. And why so? Because of his evil view."

6. 6. To be right is not enough. A baby may be right but that does not mean that a baby knows what is right. To be right one must know what is right.

7. 7."Anarda, who can be rightly described as an almsman? Only he who has mastered what is rationally possible and what is rationally

impossible.”

§ 2. *Why Bother About Life After Death*

1. 1. On a certain occasion the venerable Kassapa the Great and the venerable Sariputta were staying near Benares at Isipatana in the Deer Park.
2. 2. Then the venerable Sariputta rising up at eventide from solitude, went to the venerable Kassapa the Great and sat down on one side.
3. 3. So seated, the venerable Sariputta said to the venerable Kassapa the Great.”How now friend Kassapa? Does the Tathagata exist beyond death?
4. 4.”Undeclared is it, friend, by the Exalted One that the Tathagata exists beyond death,
5. 5.”What then friend? Does the Tathagata both exist and not exist beyond death?
6. 6.”This also, friend, is undeclared by the Exalted One.
7. 7.”How then, friend? Does the Tathagata neither not exist beyond death? That also, friend, is not declared by the Exalted One.
8. 8.”But why, friend, has it not been declared by the Exalted One?”
9. 9.”This is a question not concerned with profit to humanity or with the first principles of holy life. It does not lead to perfect wisdom nor to Nibbana. That, friend, is why it is not declared by the Exalted One.”

§ 3. *Prayers and Invocations to God are a Futility*

1. 1. Once the Blessed Lord speaking to Vasettha said:
2. 2.”If this river Achiravati were full of water even to the brim and overflowing, and a man with business to be done on the further bank of it should come up, and want to cross over :
3. 3.”And standing on that bank, he should invoke the further bank and say : ' Come hither, O further bank ! Come over to this side ! '
4. 4.”Now what think you, Vasettha? Would the further bank of the river Achiravati, by that man's invoking and praying, and hoping, and praising, come over to this side?
5. 5.”In just the same way, Vasettha, do the Brahmins, versed in the three Vedas, omitting the practice of those qualities which really make a

man a Brahmin, and adopting the practice of those qualities which really make men non-Brahmins say thus :

6. 6." Indra we call upon, Brahma we call upon, Isana we call upon, Prajapati we call upon, Brahma, we call upon, we call, we call.'

7. 7."Verily, Vasettha, that these Brahmins, by reason of their invoking .and praying and hoping and praising, should after death become united with Brahma—verily such a condition of things can in nowise be."

§ 4. *It is Not What You Eat that Makes You Holy*

1. 1. A Brahmin happened to meet the Lord and raised the question of the effect of food on a man's character.

2. 2. The Brahmin said : "The millet-grain, palm-nuts, pulse, bulbs, and wilding shoots—this diet rightly got, ever prompts the good life. 'Tis eating carrion that is bad."

3. 3. The Blessed One replied: "Though you (Lord) say you touch no carrion, you eat choice dishes made with flesh of birds—1 ask what you term 'carrion.'"

4. 4."Killing and maiming, stripes, bonds, theft, lies, fraud, deceit, adultery—not meats, but these are carrion.

5. 5."Pursuit of pleasure, lust for guzzlings, life unclean, blatant dissent—not meats, but these are carrion.

6. 6."Backbiting, cruelty, betrayals, ruthless pride, mean stinginess—not meats, but these are carrion.

7. 7."Anger, conceit, revolt, guile, envy, bluster, pride, low company—not meats, but these are carrion.

8. 8."Base living, slander, fraud, cheating, the trickster's wiles, foul infamies—not meats, but these are carrion.

9. 9."This rage to slay and steal, these crimes, are fraught with doom and end in hell—not meats, but these are carrion.

10. 10."No abstinence from meat and fish, no nudity, no topknots, shaven crowns, or garb of pelt, no cult of sacred fire, no stark austerities to purchase future bliss, no rinsing, burnt-offering, rites,' can cleanse the man who doubts.

11. 11."Control thy sense, rule thy powers, hold to Truth, be kind. The saint who leaves all ties and vanquishes all ills, is stained by naught he

either sees or hears.”

12. 12. Hearing the Lord preach these lofty, saving truths, denouncing 'carrion', and sweeping ills away, the Brahmin meekly knelt and asked to be enrolled as Almsman then and there.

§ 5. *Not Food But Evil Actions That Matter*

1. 1. A Brahmin by name Amagandha was an ascetic who lived in the region of Himalayas with his pupils.

2. 2. They ate neither fish nor flesh. Every year they came down from their hermitage in search of salt and acids. The inhabitants of the village received them with honour and gave them hospitality for four months.

3. 3. Then the Blessed Lord with his monks visited the same village. The people on hearing the Lord preach his Dhamma became his followers.

4. 4. That year even Amagandha and his disciples as usual went to the villagers but the villagers did not show the same enthusiasm.

5. 5. Amagandha was disappointed to hear that the Lord did not forbid eating fish and flesh. Wishing to have the matter confirmed he went to Jeta Vana at Shravasti where the Blessed Lord was then staying and said:

6. 6.”Millet, cingula-beans and peas, edible leaves and roots, the fruit of any creeper ; the righteous who eat these, obtained justly, do not tell lies for the sake of pleasures.

7. 7.”Thou eatest whatever food is given by others, which is well prepared, nicely got up, pure and excellent. He who enjoys such food made of rice, he eats, Amagandha. You say that the charge of Amagandha, does not apply to me, while eating rice with well prepared bird's flesh.

8. 8.”I inquire the meaning of this from you, of ' what kind is your Amagandha?”

9. 9. The Lord replied:”Taking life, beating, cutting, binding, stealing, lying, fraud, deceiving, worthless knowledge, adultery ; this is Amagandha and not the eating of flesh.

10. 10.”In this world those individuals, who are unrestrained in sensual pleasures, who are greedy for sweet things, who are associated with impure actions, who are of Nihilistic views, crooked, difficult to follow; this is Amagandha and not the eating of flesh.

11. 11.”In this world those who are rude, harsh, backbiting, treacherous,

unkind, excessively egoistic, ungenerous, and do not give anything to anybody; this is Amagandha, and not the eating of flesh.

12. 12."Anger, pride, obstinacy, antagonism, deceit, envy, boasting, excessive egoism, association with the unrighteous; this is Amagandha, and not eating of flesh.

13. 13."Those who are of bad morals, refuse to pay their debt, slanderers, deceitful in their dealings, pretenders, those who in this world being the vilest of men, commit such wrongdoings, this is Amagandha and not the eating of flesh.

14. 14."Those persons who, in this world, are uncontrolled towards living beings, who are bent on injuring others, having taken their belongings; immoral, cruel, harsh, disrespectful; this is Amagandha and not the eating of flesh.

15. 15."Those who attack these living beings either because of greed or of hostility, and always bent upon (evil), they go to darkness after death and fall into hell headlong ; this is Amagandha and not the eating of flesh.

16. 16."Abstaining from fish or flesh, nakedness, shaving of the head, matted hair, covering with ashes, wearing rough deer skins, attending the sacrificial fire, nor all these various penances in the world (performed) for immortality, neither incantations, oblations, sacrifices nor seasonal observances, purifies a person who has not overcome his doubt.

17. 17."He who lives with his senses guarded and conquered and is established in the Dhamma, delights in uprightness and gentleness, who has gone beyond attachments and has overcome all sorrows; that wise man does not cling to what is seen and heard.

18. 18."It is evilations which constitute Ama-gandha and not the eating of fish or flesh."

§ 6. *Not Enough Is Outward Washing*

1. 1. Once the Exalted One was dwelling at Shravat-si. And the Brahmin Sangarava also dwelt there. Now he was a cleanser by water, and practised cleansing by water. Night and day he abode given to the habit of going down to bathe.

2. 2. Now the venerable Ananda, robing himself at an early hour and taking outer robe and bowl, went forth to Shravatsi to beg. And when he

had gone his rounds in Shravatsi and had eaten his meal, upon his return, he went to the Exalted One, saluted Him, and sat down on one side. So seated, the venerable Ananda said:

3. 3."Lord, there is here one Sangarava, a Brahmin, dwelling at Shravatsi, a cleanser by water, one who practises cleansing by water. Night and day does he abide given to the habit of going down to bathe. Well were it. Lord, if the Exalted One would pay a visit to the Brahmin Sangarava, out of compassion for him."

4. 4. And the Exalted One consented by His silence.

5. 5. So next day at an early hour, the Exalted One robed Himself and taking outer robe and bowl went to the dwelling of the Brahmin Sangarava, and when He got there He sat down on a seat made ready.

6. 6. Then the Brahmin Sangarava came to the Exalted One and greeted Him, and after the exchange of mutual courtesies sat down on one side.

7. 7. As he thus sat, the Exalted One said this to the Brahmin Sangarava : "Is it true, Brahmin, as they say, that thou art a cleanser by water, that thou dost practise cleansing by water, abiding night and day given to the habit of going down to bathe?"

8. 8."True it is, Master Gotama."

9. 9."Now, Brahmin, seeking what profit dost thou so practise the habit of going down to bathe, and so forth? "

10. 10."It is in this way, Master Gotama. Whatsoever evil I do by day, I get it washed away that very evening by my bathing. Whatsoever evil I do by night I get it washed away next morning by my bathing. That is the profit I am looking for in being a cleanser by water and so forth."

11. 11. Then said the Exalted One :

12. 12."The Norm is the pool. It is clear and undefiled."

13. 13."Hither when they have come to bathe, the masters of the lore, are cleansed in every limb, and pass unto the Further Shore."

14. 14. Whereupon the Brahmin Sangarava said to the Exalted One : "Excellent it is, Master Gotama. May the Master Gotama accept me as His follower, from this day forth so long as life doth last, as one who has taken refuge in Him."

§7. *What is Holy Life*

1. 1. Once while the Blessed Lord was on journey he gave, as was his practice, the following discourse to the Bhikkhus who were accompanying him.
2. 2. Addressing the Bhikkhus the Lord said: "0 brethren, this holy life is not practised with a view to deceive people, nor to seek their favour, nor for the purpose of gain, benefit, or fame, nor with the intention of getting out of difficulties in controversy, nor that one may be known as such and such by men. Indeed, brethren, this holy life is practised for the controlling (of body and speech), the cleansing (of corruptions) and the detachment (from) and cessation (of craving)."

§ 1. *Do Not Depend on the Favour of Princes*

1. 1. Once the Exalted One was staying at Rajagraha in the Bamboo Grove in the Squirrels' Feeding ground.
2. 2. At that time Prince Ajatasatru was supporting Devadatta who had turned hostile to the Blessed Lord.
3. 3. He was maintaining the supporters of Devadatta, late and early with five hundred carts, conveying therein food brought in five hundred cooking-pots.
4. 4. Then a number of the brethren came before the Exalted One, saluted Him, and sat down on one side, and there sitting they told all of these things to the Exalted One.
5. 5. Then the Blessed Lord addressing the brethren said : "Do ye not long for gains, favours and flattery from the kings. So long, brethren, as Prince Ajatasatru thus supports Devadatta late and early, with five hundred carts, conveying therein food brought in five hundred cooking-pots, it is ruin, brethren, that may be expected of Devadatta, and not growth in good conditions.
6. 6."Just as if, brethren, one were to crumble liver on a mad dog's nose, the dog would only get the madder, even so, brethren, so long as Prince Ajatasatru thus supports Devadatta it is ruin that may be expected of Devadatta, and not growth in good conditions. Thus terrible, brethren, are gains, favours, and flattery of the princes.
7. 7."They are a bitter, painful hindrance to the attainment of the sure peace that passeth all.

8. 8."Wherefore, brethren, thus must you train yourselves: ' When gains, favours and flattery befall us, we will reject them, and when they do befall us, they shall not 'Tay hold of and be established in our hearts' and make us slaves of the prince.'"

§2. *If the King is Righteous His Subjects will be Righteous*

1. 1. Once the Lord addressing the Almsmen said :

2. 2."Brethren during such time as kings are unrighteous their ministers and officers also become unrighteous. The ministers and officers, brethren, being unrighteous. Brahmins and householders also become unrighteous. The Brahmins and householders, brethren, being unrighteous, the town-folk and villagers become unrighteous.

3. 3."But whenever, brethren, kings are righteous, then kings' ministers and officers also become righteous. Whenever kings' ministers and officers become righteous the Brahmins and householders also become righteous. Whenever Brahmins and householders become righteous, the town-folk and villagers also become righteous.

4. 4. "When kine are crossing, if the **old** bull swerves, they all go swerving, following his lead. So among men, if he who is reckoned chief walks crook-ediy, the others crooked go.

5. 5. "Similarly, the whole realm suffers when the king goes wrong. When kine are crossing, if the bull goes straight they all go straight because his course is straight. So among men, if he who's reckoned chief walks righteously, the others live aright. The whole realm lead happy lives when kings are good."

§3. *It is the Social System on which Depends Political and Military Strength*

1. 1. The Blessed One was once dwelling in Rajagraha, on the hill called the Vultures' Peak.

2. 2. Now at that time, Ajatasatru, the son of the queen consort of Videha origin, the king of Magadha, was desirous of attacking the Vajjins, and he said to himself,"I will root out these Vajjins, mighty and powerful though they be, I will destroy these Vajjins, I will bring these Vajjins to utter ruin !"

3. 3. So he spoke to the Brahmin Vasakara, the Prime Minister of Magadha, and said :

4. 4."Come now, O Brahmin, do you go to the Blessed One, and bow down in adoration at his feet on my behalf and enquire on my behalf whether he is free from illness and suffering and in the enjoyment of ease and comfort and vigorous health.

5. 5."Then tell him that Ajatasatru,' son of Videhi, the King of Magadha, is eager to attack the Vajjins, mighty and powerful though they be, I will destroy these Vajjins, I will bring these Vajjins to utter ruin !

6. 6."And bear carefully in mind whatever the Blessed One may predict and repeat it to me. For the Buddha speaks nothing untrue."

7. 7. Then the Brahmin Vasakara hearkened to the words of the king, saying,"Be it as you say."And ordering a number of magnificent carriages to be ready he went to the Vultures' Peak.

8. 8. On arriving there he exchanged with the Blessed One the greetings and compliments and then delivered to him the message even as the king had commanded.

9. 9. Now at that time the venerable Ananda was standing behind the Blessed One. And the Blessed One said to him:"Have you heard, Ananda, that the Vajjins hold full and frequent public assemblies?

10. 10."Lord, so I have heard,"replied he.

11. 11."So long, Ananda,"rejoined the Blessed One,"as the Vajjins hold these full and frequent public assemblies; so long may they be expected not to decline, but to prosper.

12. 12."So long, Ananda, as the Vajjins meet together in concord, and rise in concord, and carry out their undertakings in concord.

13. 13."So long as they enact nothing not already established, abrogate nothing that has been already enacted and act in accordance with the ancient institutions of the Vajjins as established in former days. 14."So long as they honour and esteem and revere and support the Vajjin Elders, and make it a point of duty to hearken to their words.

14. 15."So long as no women or girls belonging to their clans are detained among them by force or abduction.

15. 16."So long as the Vajjins respect and follow religion.

16. 17."So long, Ananda, the Vajjins may be expected not to decline but to prosper and no one can destroy them."

17. 18. In short, the Blessed Lord declared that so long as the Vajjins believe in democracy and practise democracy there is no danger to their State.

18. 19. Then the Blessed One addressed Vasakara and said:

19. 20."When I was once staying, O Brahmin, at Vaishali I taught the Vajjins these conditions of welfare.

20. 21."We may expect then,"answered the Brahmin,"the welfare and not the decline of the Vajjins, so long as they observe these conditions. So, Gotama, the Vajjins cannot be overcome by the king of Magadha."

21. 22. So Vasakara heard the words of the Blessed One, rose from his seat and went back to Rajagraha to inform the king of what the Lord had said.

§ 4. *War is Wrong*

1. 1. It so happened that Ajatasatru, the king of Magadha, mustering an army of cavalry and infantry, invaded Kasi, a part of the kingdom of king Pasenadi. And Pasenadi, hearing of the expedition, also mustered a similar army and went to meet him.

2. 2. The two fought with one another and Ajatasatru defeated the king Pasenadi, who retreated to his own capital Shravasti.

3. 3. The Bhikkhus who were in Shravasti returning from their alms round came and told the Exalted One of the battle and the retreat.

4. 4."Almsmen, the king of Magadha, Ajatasatru, is a friend of whatever is evil. King Pasenadi is a friend of whatever is good. For the present, Pasenadi will pass the night in misery, a defeated man.

5. 5."Conquest engenders hate; the conquered lives in misery. But whoso is at peace and passionless, happily doth he live ; conquest hath he abandoned and defeat."

6. 6. Again it so happened these two kings met in battle a second time. But in that battle, the Kosala king Pasenadi defeated Ajatasatru and captured him alive. Then king Pasenadi thought:"Although this king injures me who was not injuring him, yet is he my nephew. What if I were now to confiscate his entire army, elephants, horses, chariots and infantry and leave him only his life?"And he did so.

7. 7. And almsmen returning from their alms tour in Shravasti brought

word of this to the Exalted One. Thereupon the Exalted One said:”A man may spoil another, just so far as it may serve his ends, but when he's spoiled by others, he, despoiled, spoils yet again.

8. 8.”So long as evil's fruit is not matured, the fool doth fancy now's the hour, the chance! ' But when the deed bears fruit, he fareth ill.

9. 9.”The slayer gets a slayer in his turn ; the conqueror gets one who conquers him ; the abuser wins abuse from another.

10. 10.”Thus by the evolution of the deed, a man who spoils is spoiled in his turn.”

§ 5. *The Duty of the Victor Who Has Won Peace*

1. 1. When the Victor in war has won the Peace he claims the right further to degrade the vanquished if not to enslave him. The Buddha had a totally different view on the matter. In His view if Peace had any meaning it means that the Victor has a duty to use his victory for the service of the vanquished. This is what he said to the Bhikkhus on this subject :

2. 2.”When Peace is won, the adept in warfare needs to prove an able, upright man, of gracious speech, kind mood, devoid of arrogance, an easy, grateful guest, no busybody wants but few sens-disciplined, quick-witted, bluster-free, never importunate; and let him never stoop to conduct mean or low, evoking grave rebuke.

3. 3.”May creatures all abound, in weal and peace; may all be blessed with peace always, all creatures weak or strong, all creatures great and small ; creatures unseen or seen dwelling afar or near, born or awaiting birth, may all be blessed with peace !

4. 4.”Let none cajole or flout his fellows anywhere ; let none wish others harm in dudgeon or in hate.

5. 5.”Just as with her own life a mother shields from hurt her own, her only child, let all-embracing thoughts for all that lives be thine, an all-embracing love for all the universe in all its heights and depths and breadths, unstinted love, unmarred by hate within, not rousing enmity.

6.”So, as you stand or walk, or sit, or lie, reflect with all your might on this :
' Tis deemed a state divine.”

BOOK V: The Sangh

Part I—The Sangh

Part II—The Bhikkhu—The Buddha's Conception of him.

Part III—The Duties of the Bhikkhu.

Part IV—The Bhikkhu and the Laity.

Part V—Vinaya for the Laity.

PART I :THE SANGH

1. 1. The Sangh and its Organisation.
2. 2. Admission to the Sangh.
3. 3. The Bhikkhu and His Vows.
4. 4. The Bhikkhu and Ecclesiastical Offences.
5. 5. The Bhikkhu and Restraints.
6. 6. The Bhikkhu and Good Conduct Rules.
7. 7. The Bhikkhu and the Trial of Offences.
8. 8. The Bhikkhu and Confession.

§ 1. *The Sangh and Its Organisation*

1. 1. The followers of the Blessed Lord were divided into two classes: BHIKKHUS and Lay Followers called UPASAKAS.
2. 2. The Bhikkhus were organised into a Sangh while the Upasakas were not.
3. 3. The Buddhist Bhikkhu is primarily a Pariv-rajaka. This institution of Parivrajaka is older than that of the Buddhist Bhikkhu.
4. 4. The old Parivrajakas were persons who had abandoned family life and were a mere floating body of wanderers.
5. 5. They roamed about with a view to ascertain the truth by coming into contact with various teachers and philosophers, listening to their discourses, entering into discussion on matters of ethics, philosophy, nature, mysticism, etc.
6. 6. Some of the old type of Parivrajakas lived under a teacher until

they found another. Others lived singly without acknowledging any master.

7. 7. Among these older type of Parivrajakas there were also women wanderers. The female Parivrajakas sometimes lived with men Parivrajakas; sometimes they lived alone and by themselves.

8. 8. These old type of Parivrajakas had no Sangh, had no rules of discipline and had no ideal to strive for.

9. 9. It was for the first time that the Blessed Lord organised his followers into a Sangh or fraternity, and gave them rules of discipline and set before them an ideal to pursue and realise.

§2. *Admission to the Sangh*

1. 1. The Sangh was open to all.

2. 2. There was no bar of caste.

3. 3. There was no bar of sex.

4. 4. There was no bar of status.

5. 5. Caste had no place in the Sangh.

6. 6. Social status had no place in the Sangh.

7. 7. Inside the Sangh all were equal.

8. 8. Inside the Sangh rank was regulated by worth and not by birth.

9. 9. As the Blessed Lord said the Sangh was like the ocean and the Bhikkhus were like the rivers that fell into the ocean.

10. 10. The river has its separate name and separate existence.

11. 11. But once the river entered the ocean it lost its separate name and separate existence.

12. 12. It becomes one with the rest.

13. 13. Same is the case with the Sangh. When a Bhikkhu entered the Sangh he became one with the rest like the water of the ocean.

14. 14. He lost his caste. He lost his status: so said the Lord.

15. 15. The only distinction observed inside the Sangh was that of sex. The Bhikkhu Sangh was separate in its organisation from the Bhikkhuni Sangh.

16. 16. The entrants into the Sangh were divided into two classes: SHRAMANERAS and BHIKKHUS.

17. 17. Anyone below twenty could become a Shramanera.

18. 18. By taking the TRISARANAS and by taking the ten precepts a boy

becomes a Shramanera.

19. 19."I follow the Buddha; I follow the Dhamma; and I follow the Sangh"—are the Trisaranas.

20. 20."I shall abstain from killing; I shall not commit theft; I shall follow Brahmacharya; I shall not tell untruth; I shall abstain from drink."

21. 21."I shall abstain from taking food at an untimely hour; I shall abstain from indecent and immoral acts; I shall abstain from ornamenting and decorating myself; I shall abstain from luxuries; I shall abstain from the love of gold and silver."

22. 22. These are the ten precepts.

23. 23. A Shramanera can leave the Sangh at any time and become a layman. A Shramanera is attached Bhikkhu and spends his time in the service of the Bhikkhu. He is not a person who has taken Parivraja.

24. 24. The status of a Bhikkhu has to be reached in two stages. The first stage is called Parivraja and the second stage is called Upasampada. It is after Upasampada that he becomes a Bhikkhu.

25. 25. A candidate who wishes to take Parivraja with a view ultimately to become a Bhikkhu has to seek a Bhikkhu who has the right to act as an Uppadhya. A Bhikkhu can become an Uppadhya only after he has spent at least 10 years as a Bhikkhu.

26. 26. Such a candidate if accepted by the Uppadhya is called a Parivrajaka and has to remain in the service and tutelage of the Uppadhya.

27. 27. After the period of tutelage ends it is his Uppadhya who has to propose the name of his student to a meeting of the Sangh specially called for the purpose for Upasampada and the student must request the Sangh for Upasampada.

28. 28. The Sangh must be satisfied that he is a fit and a proper person to be made a Bhikkhu. For this purpose there is a set of questions which the candidate has to answer.

29. 29. Only when the Sangh grants permission that Upasampada is granted and the person becomes a Bhikkhu.

30. 30. The rules regulating entry into the Bhikkhuni Sangh are more or less the same as the rules regulating the entry into the Bhikkhu Sangh.

§ 3. *The Bhikkhu and His Vows*

1. 1. A layman or a Shramanera takes precepts. His obligation is to follow them.
2. 2. A Bhikkhu besides taking precepts takes them also as vows which he must not break. If he breaks them he becomes liable to punishment.
3. 3. A Bhikkhu vows to remain celibate.
4. 4. A Bhikkhu vows not to commit theft.
5. 5. A Bhikkhu vows not to boast.
6. 6. A Bhikkhu vows not to kill or take life.
7. 7. A Bhikkhu vows not to own anything except what the rules allow.
8. 8. No Bhikkhu is to possess more than the following eight articles:—

.(1) Three pieces of cloth to cover his body: (i) lower garment called Antarvaska. (ii) upper garment called Uttarasang. (iii) covering garment against cold called Sanghati.

.(2) A girdle for the loins.

.(3) An alms-bowl.

.(4) A razor.

.(5) A needle.

.(6) A water-strainer.

1. 9. A Bhikkhu takes the vow of poverty. He must beg for his food. He must live on alms. He must sustain himself only on one meal a day. Where there is no Vihar built for the Sangh, he must live under a tree.
2. 10. A Bhikkhu does not take a vow of obedience. Outward respect and courtesy to his superiors is expected from the novice. His own salvation and his usefulness as a teacher depend on his self-culture. He is to obey not his superior but the Dhamma. His superior has no supernatural gift of wisdom or of absolution. He must stand or fall by himself. For that he must have freedom of thought.
3. 11. Any breach of a vow taken by a Bhikkhu results in an offence of Parajika. The punishment for Parajika is expulsion from the Sangh.

§ 4. *The Bhikkhu and Ecclesiastical Offences*

1. 1. Any breach of the vows taken by a Bhikkhu is an offence against the Dhamma.

2. 2. In addition to these offences there were certain other offences to which he was also liable. They were called Sanghadisesa—ecclesiastical offences.
3. 3. The list of such offences included in the Vinaya Pitaka are thirteen.
4. They are allied to the Parajika.

§ 5. *The Bhikkhu and Restraints*

1. 1. Besides sailing clear of offences a Bhikkhu must observe certain restrictions and cannot be as free as others.
2. 2. One set of such restrictions are called NISSAGIYA-PACITTIYA. It contains 26 restrictions to be observed by the Bhikkhu.
3. 3. They relate to accepting gifts of robes, woollen mats, bowl and medical requisites.
4. 4. They also relate to the acceptance of gold and silver. Engagement of a monk in buying and selling and appropriation of property given to the Sangh to himself.
5. 5. The punishment for breach of these restrictions is restoration (nissagiya) and expression of repentance (pacittiya).
6. 6. Besides these restrictions there are other restrictions which a Bhikkhu has to observe. They are called PACITTIYA. They number ninety-two.

§ 6. *The Bhikkhu and Good Conduct Rules*

1. 1. A Bhikkhu must behave well. He should be a model person in his mode and manner of behaviour.
2. 2. In order to secure this purpose the Blessed Lord framed a number of Conduct Rules.
3. 3. These **Good** Conduct Rules were called Sekhiya Dhamma. They number seventy-five.

§ 7. *The Bhikkhu and the Trial of Offences*

1. 1. The enactment of these acts and omissions were not a mere formality. They were legal in substance involving a definite charge, trial and punishment.
2. 2. No Bhikkhu could be punished without a trial by a regularly

constituted Court.

3. 3. The Court was to be constituted by the Bhikkhus resident at the place where an offence had taken place.
4. 4. No trial could take place without a proper number of Bhikkhus required to constitute a Court.
5. 5. No trial would be legal without a definite charge.
6. 6. No trial could be legal if it did not take place in the presence of the accused.
7. 7. No trial could be legal if the accused had not been given the fullest opportunity to defend himself.
8. 8. The following punishments could be awarded against a guilty Bhikkhu: (i) Tarjaniya Karma (warn and discharge). (ii) Niyasha Karma (declaring insane). (iii) Pravrajniya Karma (expulsion from the Sangh). (iv) Utskhepnaya Karma (boycott). (v) Parivasa Karma (expulsion from Vihar).
9. 9. Expulsion may be followed by ABBANA KARMA . Abbana Karma means annulment of dismemberment. It may be followed after granting of Pardon granted by the Sangh after being satisfied with the proper performance of Parivasa Karma.

§ 8. *The Bhikkhu and Confession*

1. 1. The most original and unique institution created by the Blessed Lord in connection with the organisation of the Bhikkhus was the introduction of Confession, called UPOSATH.
2. 2. The Blessed Lord realized that it was possible to enforce what he had laid down as offences. But he had laid down certain restrictions which were not offences. He said that the restrictions were most intimately connected with building up of character and maintaining character; and that there was equal necessity to see that they were observed.
3. 3. But the Lord could find no effective way of enforcing them. He therefore thought of Confession in open as a means of organising the Bhikkhu's conscience and making it act as a sentinel to guard him against taking a wrong or false step.
4. 4. The Confession was confined to the transgressions of restrictions (which were called Patimokha).
5. 5. For a Confession there was to be a meeting of the Bhikkhus of a

given locality. There were to be three such meetings in a fortnight, one each on CHATURDASHI, PANCHADASI and ASHATAML. On that day the Bhikkhus may fast. That is why the day is also called UPOSATH.

6. 6. At the meeting a Bhikkhu reads the restrictions one by one contained in the Patimokha. After reading a restriction he says to the assembled Bhikkhus, "I take it that none of you have transgressed this Rule, that is why you are silent." He says this three times. Then deals with the next restriction.

7. 7. A similar Confessional meeting is required of the Bhikkhuni Sangh.

8. 8. On a Confession a charge and trial may follow.

9. 9. On a failure to Confess, any Bhikkhu may report a transgression if he was a witness to it and then a charge and trial may follow.

PART II : THE BHIKKHU—THE BUDDHA'S CONCEPTION OF HIM

1. 1. Buddha's conception of what a Bhikkhu should be.

2. 2. The Bhikkhu and the Ascetic.

3. 3. The Bhikkhu and the Brahmin.

4. 4. The Bhikkhu and the Upasaka.

§ 1. Buddha's Conception of What a Bhikkhu Should Be

1. 1. The Buddha has himself told the Bhikkhus what he expected of them as Bhikkhus. This is what he has said.

2. 2."He who wishes to put on the yellow dress without having cleansed himself from sin, who disregards also temperance and truth, is unworthy of the yellow dress.

3. 3."But he who has cleansed himself from sin, is well grounded in all virtues, and endowed also with temperance and truth, he is indeed worthy of the yellow dress.

4. 4."A man is not a mendicant (Bhikkhu) simply because he asks others for alms; he who adopts the whole law is a Bhikkhu, not he who only begs.

5. 5."He who is above evil, who is chaste, who with care passes through the world, he indeed is called a Bhikkhu.

6. 6."Not only by discipline and vows, not only by much learning, not

by entering into a trance not by sleeping alone, do I earn the happiness of release which no worldling can know. O Bhikkhu, he who has obtained the extinction of desires, has obtained confidence.

7. 7."The Bhikkhu who controls his mouth, who speaks wisely and calmly, who teaches the meaning of the law, his word is sweet.

8. 8."He who dwells in the law, delights in the law, meditates on the law, recollects the law, that Bhikkhu will never fall away from the true law.

9. 9."Let him not despise what he has received, nor ever envy others; a mendicant who envies others does not obtain peace of mind.

10. 10."A Bhikkhu who, though he receives little, does not despise what he has received, even the gods will praise him, if his life is pure, and if he is not slothful. II."He who never identifies himself with name and form, and does not grieve over what is no more, he indeed is called a Bhikkhu.

11. 12."The Bhikkhu who behaves with kindness, who is happy in the doctrine of Buddha, will reach Nibbana—happiness arising from the cessation of natural inclinations.

12. 13."O Bhikkhu, empty this boat ! If emptied, it will go quickly, having cut off passion and hatred, thou wilt go to Nibbana.

13. 14."Cut off the five (fetters), leave the five, rise above the five. A Bhikkhu who has escaped from the five fetters, he is called Oghatinna, ' saved from the flood.'

14. 15."Meditate, O Bhikkhu, and be not heedless ! Do not direct thy thought to what gives pleasure.

15. 16."Without knowledge there is no meditation, without meditation there is no knowledge: he who has knowledge and meditation is near unto Nibbana.

16. 17."A Bhikkhu who has entered his empty house, and whose mind is tranquil, feels a more than human delight when he sees the Dhamma clearly.

17. 18."And this is the beginning here for a wise Bhikku; watchfulness over the senses, contentedness, restraint under the Dhamma; keep noble friends whose life is pure, and who are not slothful.

18. 19."Let him live on charity, let him be perfect in his duties; then in the fulness of delight he will make an end of suffering.

19. 20."Rouse thyself by thyself, examine thyself by thyself, thus self-protected and attentive wilt thou live happily, O Bhikkhu.

20. 21."For self is the lord of self, self is the refuge of self; therefore curb thyself as the merchant curbs a noble horse.
21. 22."A Bhikkhu (mendicant) who delights in earnestness, who looks with fear on thoughtlessness, moves about like fire, burning all his fetters, small or large.
22. 23."A Bhikkhu (mendicant) who delights in reflection, who looks with fear on thoughtlessness, cannot fall away (from his perfect state)—he is close upon Nibbana."
23. 24. The disciples of Gotama (Buddha) are always well awake, and their thoughts day and night are always set on Buddha,
24. 25. The disciples of Gotama are always well awake and their thoughts day and night are always set on the church.
25. 26. The disciples of Gotama are always well awake, and their thoughts day and night are always set on the Dhamma.
26. 27. The disciples of Gotama are always well awake and their thoughts day and night are always set on their body.
27. 28. The disciples of Gotama are always well awake, and their minds day and night always delight in compassion.
28. 29. The disciples of Gotama are always well awake, and their minds day and night always delight in meditation.
29. 30. It is hard to leave the world (to become a friar), it is hard to enjoy the world; hard is the monastery, painful are the houses; painful it is to dwell with equals (to share everything in common), and the itinerant mendicant is beset with pain.
30. 31. A man full of faith, if endowed with virtue and glory, is respected, whatever place he may choose.

§ 2. *The Bhikkhu and the Ascetic*

1. 1. Is the Bhikkhu an ascetic? The answer is in the negative.
2. 2. This negative answer has been given by the Blessed Lord himself in a discussion with Nigrodha the wanderer.
3. 3. The Exalted One was once staying near Rajagraha, on the Vulture's Peak. Now at that time there was sojourning in Queen Udumbarika's Park assigned to the wanderers, the wanderer Nigrodha, together with a great company of wanderers. 4. Now the Exalted One descending from the

Vulture's Peak came to the Peacock's Feeding-Ground on the bank of the Sumagadha and there walked to and fro in the open air. Then Nigrodha saw him thus walking, and on seeing him he called his company to order, saying: "Be still, sirs, and make no noise. The Samana Gotama is by the bank of the Sumagadha." When he had said this the wanderers kept silence.

4. 5. Then the Exalted One went up to Nigrodha the wanderer, and Nigrodha spake thus to him: "Let the Lord, the Exalted One, approach. Welcome is the Lord, the Exalted One! Long has the Lord, the Exalted One, taken ere deciding on this step of coming hither. May it please the Lord, the Exalted One, to take a seat. Here is one ready."

5. 6. The Exalted One sat down on the seat made ready, and Nigrodha, taking a low seat, sat beside him.

6. 7. Thereupon Nigrodha said to the Exalted One: "As the Samana Gotama has come to *out* assembly, we would like to ask him this question: 'What, Lord, is this religion of the Exalted One, wherein he trains his disciples, and which those disciples, so trained by the Exalted One as to win comfort, acknowledge to be their utmost support and the fundamental principles of righteousness?'"

7. 8. "Difficult is it, Nigrodha, for one of another view, of another persuasion, of another confession, without practice and without teaching, to understand that wherein I train my disciples, and which they, so trained as to win comfort, acknowledge to be their utmost support and the fundamental principle of righteousness.

8. 9. "But ask me, Nigrodha, a question about your own doctrine, about austere scrupulousness of life: in what does the fulfilment, in what does the non-fulfilment of these self-mortifications consist?"

9. 10. Then Nigrodha spake thus to the Exalted One: "We, Lord, profess self-mortifying austerities; we hold them to be essential; we cleave to them. In what does the fulfilment, in what does the nonfulfilment of them consist?" 11. "Suppose, Nigrodha, that an ascetic goes naked, is of certain loose habits, licks his hands, respects no approach, sir, nor stop, sir; accepts nothing expressly brought, nor expressly prepared, nor any invitations. He accepts nothing taken from mouth of cooking-pot, nor placed within the threshold, nor within a mortar, nor among sticks, nor within a quern; nor anything from two eating together, nor from a pregnant woman: nor from a nursing mother; nor from a woman in intercourse with

a man; nor food collected in drought; nor from where a dog is; nor from where flies are swarming; nor will he accept fish or meat; nor drink strong drink," nor intoxicants, nor gruel. He is either a one-houser, a one-mouthful man; or a two houser, a two-mouthful man; or a seven-houser, a seven-mouthful man. He maintains himself on one alms, on two, or on seven. He takes food once a day, or once every two days, or once every seven days. Thus does he dwell addicted to the the practice of taking food according to rule, at regular intervals, upto even half a month. He feeds either on potherbs, or wild rice, or nivara seeds, or leather parings, or on hata, or on the powder in rice rusks, on rice-scum, on flour or oil-seeds, on grasses, on cowdung, or fruits and roots from the wood or on windfalls. He wears coarse hempen cloth, coarse mixture cloth, discarded corps-cloths, discarded rags, or tiritabark cloth; or again he wears antelope-hide, or strips of the same netted, or kusa fibre, or bark garments, or shale cloth, or a human-hair blanket, or a horse-hair blanket, or an owl's-feather garment. He is a hair-and-beard plucker, addicted to the practice of plucking out both; a stander-up; a croucher on heels, addicted to exerting himself (to move forward) when thus squatting; a bed-of-thorns man, putting iron spikes or thorns on his couch; he uses a plank-bed; sleeps on the ground; sleeps only on one side; is a dust-and-dirt wearer and an open-airman; a where-you-will sitter; a filth-eater, addicted to the practice of eating such; a nondrinker, addicted to the practice of drinking (cold water); and even-for-third-time-man.

10. 12."After having done this, Nigrodha,"Blessed Lord said,"What think you, Nigrodha? If these things be so, is the austerity of self-mortification carried out, or is it not?" "Truly, Lord, if these things be so, the austerity of self-mortification is carried out."

11. 13."Now I, Nigrodha, affirm that austerity by self-mortification thus carried out, involves blemish in several ways."

12. 14."In what way. Lord, do you affirm that blemish is involved?"

13. 15."In case, Nigrodha, when an ascetic undertakes a course of austerity, he through that course, becomes self-complacent, his aim is satisfied. Now this, Nigrodha, becomes a blemish in the ascetic.

14. 16."And then again, Nigrodha, when an ascetic undertakes a course of austerity, he, through that undertaking exalts himself and despises others. This, too, becomes a blemish in the ascetic.

15. 17.”And again, Nigrodha, when an ascetic undertakes a course of austerity, he, through that undertaking becomes inebriated and infatuated, and grows careless. This, too, becomes a blemish in the ascetic.
16. 18.”And again, Nigrodha, when an ascetic undertakes a course of austerity, it procures for him gifts, attention and fame. Thereby he becomes complacent and his aim is satisfied. This, too, becomes a blemish in the ascetic.
17. 19.”And again, Nigrodha, by the winning of gifts, attention and fame, the ascetic exalts himself and despises others. This, too, becomes a blemish in the ascetic.
18. 20.”And again, Nigrodha, by the winning of gifts, attention and fame, he becomes inebriated and infatuated, and-grows careless. This, too, becomes a blemish in the ascetic.
19. 21.”And again, Nigrodha, when an ascetic undertakes a course of austerity, he comes to make a distinction in foods, saying: 'This suits me; this doesn't suit me. The latter kind he deliberately rejects. Over the former he waxes greedy and infatuated, and cleaves to them, seeing not the danger in them, discern-ing them not as unsafe, and so enjoys them. This, too, becomes a blemish in the ascetic.
20. 22.”And again, Nigrodha, because of his longing for gifts, attentions and fame, he thinks: 'Rajas will pay me attentions, and so will their officials; so too, will nobles. Brahmins, householders and founders of schools This, too, becomes a blemish in the ascetic.
21. 23.”And again, Nigrodha, an asectic gets grumbling at some recluse or Brahmin, saying: ' That man lives on all sorts of things: things grown from tubers, or shoots, or berries, or joints, or fifthly, from seeds, munching them all up together with that wheel-less thunderbolt of a jawbone—and they call him a holy man ! ' This, too becomes a blemish in the ascetic.
22. 24.”And again, Nigrodha, an ascetic sees a certain recluse or Brahmin receiving attentions, being revered, honoured and presented with offerings by the citizens. And seeing this he thinks: 'The citizens pay attention to this fellow who lives in luxury; they revere and honour him, and present him with offerings, while to me who, as ascetic, lives a really austere life, they pay no attentions, nor reverence, nor honour, nor offerings.' And so he cherishes envy and grudging at the citizens. This, too, becomes a blemish

in the ascetic.

23. 25."And again, Nigrodha, the ascetic affects the mysterious. When asked: 'Do you approve of this?' He, not approving, says: 'I do,' or approving, says, 'I do not.' Thus he consciously tells untruths. This, too, becomes a blemish in the ascetic.

24. 26."And again, Nigrodha, the ascetic is liable to lose his temper and bear enmity. This, too, becomes a blemish in the ascetic.

25. 27."And again, Nigrodha, the ascetic is liable to be hypocritical and deceitful, as well as envious and grudging; he becomes cunning and crafty, hard-hearted and vain, he entertains evil wishes and becomes captive to them; he entertains false opinions, becomes possessed of metempirical dogma; misinterprets his experience; is avaricious and adverse from renunciation. This, too, becomes a blemish in the ascetic.

26. 28."What think you of this, Nigrodha? Are these things blemishes in the austerities of self-mortification, or are they not?"

27. 29."Verily, Lord, these things are blemishes in the austerities of self-mortification. It is possible, Lord, that an ascetic may be possessed even of all these blemishes, much more by one or other of them."

28. 30. The Bhikkhus are not to be guilty of these blemishes.

§3. *The Bhikkhu and the Brahmin*

1. 1. Is the Bhikkhu the same as the Brahmin? The answer to this question is also in the negative.

2. 2. The discussion of the subject has not been concentrated at any one place. It is scattered all over. But the points of distinction can be easily summed up.

3. 3. A Brahmin is a priest. His main function is to perform certain ceremonies connected with birth, marriage and death.

4. 4. These ceremonies become necessary because of the doctrines of original sin which requires ceremonies to wash it off, and because of the belief in God and in Soul.

5. 5. For these ceremonies a priest is necessary. A Bhikkhu does not believe in original sin, in God and Soul. There are, therefore, no ceremonies to be performed. He is, therefore, not a priest.

6. 6. A Brahmin is born. A Bhikkhu is made.

7. 7. A Brahmin has a caste. A Bhikkhu has no caste.
8. 8. Once a Brahmin always a Brahmin. No sin, no crime can unmake a Brahmin.
9. 9. But once a Bhikkhu is not always a Bhikkhu. A Bhikkhu is made. So he can be unmade if by his conduct he makes himself unworthy of remaining a Bhikkhu.
10. 10. No mental or moral training is necessary for being a Brahmin. All that is expected (only expected) of him is to know his religious lore.
11. 11. Quite different is the case of the Bhikkhu, mental and moral training is his life-blood.
12. 12. A Brahmin is free to acquire unlimited amount of property for himself. A Bhikkhu on the other hand cannot,
13. 13. This is no small difference. Property is the severest limitation upon the mental and moral independence of man both in respect of thought and action. It produces a conflict between the two. That is why the Brahmin is always opposed to change. For, to him a change means loss of power and loss of self.
14. 14. A Bhikkhu having no property is mentally and morally free. In his case there are no personal interests which can stand in the way of honesty and integrity.
15. 15. They are Brahmins. None the less each Brahmin is an individual by himself. There is no religious organisation to which he is subordinate. A Brahmin is a law unto himself. They are bound by common interests which are material.
16. 16. A Bhikkhu on the other hand is always a member of the Sangh. It is inconceivable that there could be a Bhikkhu without his being a member of the Sangh. A Bhikkhu is not a law unto himself. He is subordinate* to the Sangh. The Sangh is a spiritual organisation.

§ 4. *The Bhikkhu and the Upasaka*

1. 1. In the Dhamma there is a marked distinction between the Dhamma of the Bhikku and the Dhamma of the Upasaka or the layman.
2. 2. The Bhikkhu is bound to celibacy. Not so the Upasaka. He can marry.
3. 3. The Bhikkhu can have no home. He can have no family. Not so

the Upasaka. The Upasaka can have a home and can have a family.

4. 4. The Bhikkhu is not to have any property. But an Upasaka can have property.

5. 5. The Bhikkhu is forbidden from taking life. Not so the Upasaka. He may.

6. 6. The Panchasilas are common to both. But to the Bhikkhu they are vows. He cannot *break* them without incurring penalty. To the Upasaka they are precepts to be followed.

7. 7. The Bhikkhu's observance of the Panchasilas is compulsory. Their observance by the Upasakas is voluntary.

8. 8. Why did the Blessed Lord make such a distinction? There must be some good reason for it. For the Blessed Lord would not do anything unless there was some good reason for it.

9. 9. The reason for this distinction is nowhere explicitly stated by the Blessed Lord. It is left to be inferred. All the same it is necessary to know the reason for this distinction.

10. 10. There is no doubt that the Blessed Lord wanted through his Dhamma to lay the foundation of a kingdom of righteousness on earth. That is why he preached his Dhamma to all without distinction, to Bhikkhus as well as to laymen.

11. 11. But the Blessed Lord also knew that merely preaching the Dhamma to the common men would not result in the creation of that ideal society based on righteousness.

12. 12. An ideal must be practical and must be shown to be practicable. Then and then only people strive after it and try to realise it.

13. 13. To create this striving it is necessary to have a picture of a society working on the basis of the ideal and thereby proving to the common man that the ideal was not impracticable but on the other hand realisable.

14. 14. The Sangh is a model of a society realising the Dhamma preached by the Blessed Lord.

15. 15. This is the reason why the Blessed Lord made this distinction between the Bhikkhu and the Upasaka. The Bhikkhu was the torch-bearer of the Buddha's ideal society and the Upasaka was to follow the Bhikkhu as closely as he could.

16. 16. There is also another question that requires an answer. What is the function of the Bhikkhu?

17. 17. Is the Bhikkhu to devote himself to self-culture or is he to serve the people and guide them?
18. 18. He must discharge both the functions.
19. 19. Without self-culture he is not fit to guide. Therefore he must himself be a perfect, best man, righteous man and an enlightened man. For this he must practice self-culture.
20. 20. A Bhikkhu leaves his home. But he does not retire from the world. He leaves home so that he may have the freedom and the opportunity to serve those who are attached to their homes but whose life is full of sorrow, misery and unhappiness and who cannot help themselves.
21. 21. Compassion which is the essence of the Dhamma requires that every one shall love and serve and the Bhikkhu is not exempt from it.
22. 22. A Bhikkhu who is indifferent to the woes of mankind, however perfect in self-culture, is not at all a Bhikkhu. He may be something else but he is not a Bhikkhu.

PART III : THE DUTIES OF THE BHIKKHU

1. 1. The Bhikkhu's Duty to Convert.
2. 2. Conversion Not to be by Miracles.
3. 3. Conversion Not to be by Force.
4. 4. A Bhikkhu Must Fight to Spread Virtue (Dhamma).

§ 1. The Bhikkhu's Duty to Convert

- 1 The news of the conversion of Yasa and his four friends to the Dhamma spread far and wide. The result was that lay persons belonging to the highest families in the country and to those next to the highest came to be instructed in the doctrine of the Blessed One and to take refuge in Him and in His Dhamma.
1. 2. Many people were coming to Him to receive instruction in the Dhamma. The Lord knew that it was difficult for Him personally to give instruction to each one. He also felt the necessity of organising Parivrajakas whose number was swelling every day into a religious order which He called the Sangh.

2. 3. He accordingly made the Parivrajakas the members of the Sangh and framed rules of discipline called VINAYA and made them binding upon the members of the Sangh.

3. 4. The Blessed Lord later on laid down two stages to be undergone by a disciple before he became a Bhikkhu. First a disciple became a Parivrajaka and remained a Parivrajaka for a certain number of years attached to a Bhikkhu and remaining in training under him. After his training period was over he was allowed to take Upasampada if he satisfied a body of examiners that he was fit for it. It is only then that he was allowed to become a Bhikkhu and a member of the Sangh.

4. 5. There was no time in the early stages of the Dhamma to make such arrangements. The Lord, therefore, made them Bhikkhus and sent them out as Missionaries to spread His religion to anywhere and everywhere.

5. 6. And before sending them out the Blessed One said to the Bhikkhus: "I am delivered, O Bhikkhus, from all fetters, human and divine. You, O Bhikkhus, from all fetters, human and divine. Go ye now, and wander for the gain of the many, for the welfare of the many, out of compassion for the world; for the good, for the gain and for the welfare of gods and men.

6. 7. "Let not two of you go the same way. Preach, Bhikkhus, the doctrine which is glorious in the beginning, glorious in the middle, glorious at the end, in the spirit and in the letter; proclaim a consummate, perfect and pure life of holiness.

8. "Go then through every country, convert those not yet converted; throughout the world that lies burnt up with sorrow, teach everywhere; (instruct) those lacking' right instruction;

1. 9. "Go where there are great Rishis, royal Rishis, Brahman Rishis too, these all dwell there, influencing men according to their schools;

2. 10. "Go, therefore, each one travelling by himself; filled with compassion, go! rescue and receive."

3. 11. The Blessed Lord also told them:

4. 12. "That the gift of the Dhamma exceeds all gifts; the sweetness of the Dhamma exceeds all sweetness; the delight in the Dhamma exceeds all

delights;

5. 13."The fields are damaged by weeds, mankind is damaged by passion: therefore a gift of Dhamma brings great reward.

6. 14."The fields are damaged by weeds, mankind is damaged by hatred: therefore a gift of Dhamma brings great reward.

7. 15."The fields are damaged by weeds; mankind is damaged by vanity: therefore the gift of Dhamma brings great reward.

8. 16."The fields are damaged by weeds, mankind is damaged by lust: therefore a gift of Dhamma brings great reward."

9. 17. Then the sixty Bhikkhus receiving orders to carry on the mission to propagate the Dhamma went through every land.

10. 18. The Lord gave them further instruction in the matter of conversions.

§2. *Conversion Not to be by Miracles*

1. 1. The Exalted One was once staying among the Mallas, at Anapiya, one of their towns.

2. 2. Now the Exalted One, having robed himself, put on his cloak, and took his bowl, and entered the town for alms.

3. 3. The Blessed One thought:"It is too early for me now to go through Anapiya for alms. I might go to the pleasure where Bhaggava, the wanderer dwells, and call upon him."

4. 4. So the Exalted One went to the pleasure and to the place where Bhaggava, the wanderer was.

5. 5. Then Bhaggava spake thus to the Exalted One:"Let my Lord, the Exalted One come near. Welcome to the Exalted One! It is long since the Exalted One has taken the opportunity to come our way. May it please You, Sir, to be seated; here is a seat made ready."

6. 6. The Exalted One sat down thereon, and Bhaggava taking a certain low stool, sat down beside him. So seated, Bhaggava, the wanderer spake thus to the Exalted One:

7. 7."Some days ago, Lord, Sunakkhatta of the Licchavis called on me and spake thus: ' I have now given up the Exalted One, Bhaggava. I am remaining no longer under him as my teacher.' Is the fact really so?"

8. 8."It is just so, Bhaggava, as Sunakkhatta of the Licchavis said.

9. 9."Some days ago, Bhaggava, a good many days ago, Sunakkhatta, the Licchavi, came to call on me, and spake thus: ' Sir, I now give up the Exalted One, I will henceforth remain no longer under him as my teacher.' When he told me this, I said to him: 'But, now, Sunakkhatta, have I ever said to you: ' Come Sunakkhatta, live under me as my pupil?'
10. 10."No, Sir, you have not,' replied Sunakkhatta.
11. 11."Or have you ever said to me: ' Sir, I would fain dwell under the Exalted One (as my teacher)? '
12. 12." No, Sir, I have not,' said Sunakkhatta.
13. 13." But if I said not the one, and you said not the other, what are you and what am I that you talk of giving up? '
14. 14." Well, but. Sir, the Exalted One works me no mystic wonders surpassing the power of ordinary men.'
15. 15."Why, now, Sunakkhatta, have I ever said to you ' Come, take me as your teacher, Sunakkhatta, and I will work for you mystic wonders surpassing the power of ordinary men? '
16. 16." You have not. Sir.'
17. 17."Or have you ever said to me: ' Sir, I would fain take the Exalted One as my teacher for he will work for me mystic wonders beyond the powers of ordinary men? '
18. 18." I have not. Sir.'
19. 19."But if I said not the one, and you said not the other, what are you and what am I, foolish man, that you talk of giving up? What think you, Sunakkhatta?'
20. 20."Whether mystic wonders beyond the power of ordinary men are wrought, or whether they are not, is not the object for which I teach the Dhamma this: that it leads to the thorough destruction of ill for the doer thereof? '
21. 21." Whether, Sir, they are wrought or not, that is indeed the object for which the Norm is taught by the Exalted One.'
22. 22."But Bhaggava, Sunakkhatta went on saying to me, ' Sir, the Exalted One does not reveal to me the beginning of things.'
23. 23."Why now, Sunakkhatta, have I ever said to you: ' Come, Sunakkhatta, be my disciple and I will reveal to you the beginning of things?'
24. 24." Sir, you have not.'

25. 25."Or have you ever said to me: 'I will become the Exalted One's pupil, for he will reveal to me the beginning of things? '

26. 26."Sir, I have not.'

27. 27."But if I have not said the one and you have not said the other, what are you and what am I, foolish man, that you talk of giving up on that account? What you, Sunakkhatta? Whether the beginning of things be revealed, or whether it be not, is the object for which I teach the Dhamma this: that it leads to the thorough destruction of ill for the doer thereof? '

2,8."Whether, Sir, they are revealed or not, that is indeed the object for which the Dhamma is taught by the Exalted One."

1. 29." If then, Sunakkhatta, it matters not to that object whether the beginning of things be revealed, or whether it be not, of what use to you would it be to have the beginning of things revealed? '

2. 30."In many ways have you, Sunakkhatta, spoken my praises among the Vajjins.'

3. 31."In many ways have you, Sunakkhatta, spoken the praises of the Dhamma among the Vajjins.'

4. 32."In many ways have you, Sunakkhatta, spoken the praises of the Order among the Vajjins.'

5. 33."I tell you, Sunakkhatta, I make known to you, that there will be those that shall say concerning you thus: 'Sunakkhatta of the Licchavis was not able to live the holy life under Gotama the recluse. And he, not being able to adhere to it, hath renounced the discipline and turned to lower things.'

6. 34."Thus, Bhaggava, did Sunakkhatta of the Licchavis, addressed by me, depart from this Doctrine and Discipline, as one doomed to disaster."

7. 35. And soon after, leaving the Doctrine and Discipline of the Buddha, Sunakkhatta started telling people that there was nothing superhuman about the Buddha's ennobling gifts of knowledge and insight; that it was his own reasoning which had hammered out a doctrine of his own evolving and of his personal invention, such that whoso hears it preached for his good has only to act up to it to be guided to the utter ending of ill.

8. 36. Although, Sunakkhatta was slandering the Buddha, what he was

telling people was true. For, the Buddha never resorted to the superhuman or the miraculous in propagating his Doctrine.

§ 3. *Conversion Not to be by Force*

1. 1. The Blessed One was once going along the high road between Rajagraha and Nalanda with a great company of the brethren,—with about five hundred brethren. And Suppiya the mendicant, too, was going along the high road between Rajagraha and Nalanda with his disciple, the youth Brahmadata.

2. 2. Now, just then, Suppiya the mendicant was speaking in many ways indispraise of the Buddha, in dispraise of the Doctrine, in dispraise of the Order. But young Brahmadata, his pupil, gave utterance, in many ways, to praise of the Buddha, to praise of the Doctrine, to praise of the Order.

3. 3. Thus they two, teacher and pupil, holding opinions in direct contradiction one to the other, were following, step by step, after the Blessed One and the company of the brethren.

4. 4. Now the Blessed One put up at the royal rest-house in the Ambalathika pleasure to pass the night, and with him the company of the brethren. And so also did Suppiya the mendicant, and with him his young disciple Brahmadata. And there, at the rest-house, these two carried on the same discussion as before.

5. 5. And in the early dawn a number of the brethren, assembled, as they rose up, in the pavilion; and the subject of the talk that sprang up among them was the conversation between Suppiya and Brahmadata.

6. 6. Now the Blessed One, on realising what was the drift of their talk, went to the pavilion, and took his seat on the mat spread out for him. And when he had sat down he said: "What is the talk on which you are engaged sitting here, and what is the subject of the conversation between you?" And they told him all. And he said:

7. 7. "Brethren, if outsiders should speak against me or against the Doctrine, or against the Order, you should not on that account either bear malice, or suffer heart-burning, or feel ill-will.

8. 8. "If you, on that account, should be angry and hurt, that would stand in the way of your own self-conquest. If, when others speak against us, you feel angry at that, and displeased, would you then be able to judge

how far that speech of their's is well said or ill?"

9. 9."That would not be so. Sir."

10. 10."But when outsiders speak in dispraise of me, or of the Doctrine, or of the Order, you should unravel what is false and point it out as wrong, saying: ' For this or that reason this is not the fact, that is not so, such a thing is not found among us, is not in us.'

11. 11."But also, brethren, outsiders may speak in praise of me, in praise of the Doctrine, in praise of the Order. What are the things when they would say praising me you would say?

12. 12."He may say 'Putting away the killing of living things, Gotama the recluse holds aloof from the destruction of life. He has laid the cudgel and the sword aside, and ashamed of roughness, and full of mercy, he dwells compassionate and kind to all creatures that have life.' It is thus that the uncon-verted man, when speaking in praise of the Tathagata, might speak.

13. 13."Or he might say: ' Putting away the taking of what has not been given, Gotama the recluse lived aloof from grasping what is not his own. He takes only what is given, and expecting that gifts will come. He passes his life in honesty and purity of heart.'

14. 14."Or he might say: ' Putting away unchastity, Gotama the recluse is chaste. He holds himself aloof, far off, from the vulgar practice, from the sexual act.'

15. 15."Or he might say: * Putting away lying words, Gotama the recluse holds himself aloof from falsehood. He speaks truth, from the truth he never swerves; faithful and trustworthy, he breaks not his word to the world."

16."Or he might say: 'Putting away slander, Gotama the recluse holds himself aloof from calumny. What he hears here he repeats not elsewhere to raise a quarrel against the people here; what he hears elsewhere he repeats not here to raise a quarrel against the people there. Thus does he live

as a binder together of those who are divided, an encourager of those who are friends, a peacemaker, a lover of peace, impassioned for peace, a speaker of words that make for peace.'

16. 17."Or he might say.: ' Putting away rudeness of speech, Gotama the recluse holds himself aloof from harsh language. Whatsover word is blameless, pleasant to the ear, lovely, reaching to the heart, urbane, pleasing

to the people, beloved of the people— such are words he speaks.'

17. 18."Or he might say : ' Putting away frivolous talk, Gotama the recluse holds himself aloof from vain conversation. In season he speaks, in accordance with the facts, words full of meaning, on religion, on the discipline of the Order. He speaks, and at the right time, words worthy to be laid up in one's heart, fitly illustrated, clearly divided, to the point.'

18. 19."Or he might say: 'Gotama the recluse holds himself aloof from causing injury to seeds or plants. ' He takes but one meal a day, no eating at night, refraining from food after hours (after midday). ' He refrains from being a spectator at shows, at fairs, with nautch dances, singing, and music. ' He abstains from wearing, adorning or orna-menting himself, with garlands, scents, and unguents. He abstains from the use of large and lofty beds. ' He abstains from accepting silver or gold. ' He abstains from accepting uncooked grain. ' He abstains from accepting women or girls. ' He abstains from accepting bond-men or bondwomen. ' He abstains from accepting sheep or goats. ' He abstains from accepting fowls or swine. * He abstains from accepting elephants, cattle, horses and mares. ' He abstains from accepting cultivated fields or waste. ' He abstains from acting as a go-between or messenger. ' He abstains from buying and selling. to judge how far that speech of their's is well said or ill?"

19. 9."That would not be so, Sir."

20. 10."But when outsiders speak in dispraise of me, or of the Doctrine, or of the Order, you should unravel what is false and point it out as wrong, saying: For this or that reason this is not the fact, that is not so, such a thing is not found among us, is not in us.'

21. 11."But also, brethren, outsiders may speak in praise of me, in praise of the Doctrine, in praise of the Order. What are the things when they would say praising me you would say?

22. 12."He may say 'Putting away the killing of living things, Gotama the recluse holds aloof from the destruction of life. He has laid the cudgel and the sword aside, and ashamed of roughness, and full of mercy, he dwells compassionate and kind to all creatures that have life.' It is thus that the unconverted man, when speaking in praise of the Tathagata, might speak.

23. 13."Or he might say: ' Putting away the taking of what has not been given, Gotama the recluse lived aloof from grasping what is not his own. He takes only what is given, and expecting that gifts will come. He passes

his life in honesty and purity of heart.'

24. 14."Or he might say: ' Putting away unchastity, Gotama the recluse is chaste. He holds himself aloof, far off, from the vulgar practice, from the sexual act.'

25. 15."Or he might say: 'Putting away lying words, Gotama the recluse holds himself aloof from falsehood. He speaks truth, from the truth he never swerves; faithful and trustworthy, he breaks not his word to the world."

26. 16."Or he might say: 'Putting away slander, Gotama the recluse holds himself aloof from calumny. What he hears here he repeats not elsewhere to raise a quarrel against the people here; what he hears elsewhere he repeats not here to raise a quarrel against the people there. Thus does he live as a binder together of those who are divided, an encourager of those who are who are friends, a peacemaker, a lover of peace, impassioned for peace, a speaker of words that make for peace.'

27. 17."Or he might say.: ' Putting away rudeness of speech, Gotama the recluse holds himself aloof from harsh language. Whatsoever word is blameless, pleasant to the ear, lovely, reaching to the heart, urbane, pleasing to the people, beloved of the people— such are words he speaks.'

28. 18."Or he might say : ' Putting away frivolous talk, Gotama the recluse holds himself aloof from vain conversation. In season he speaks, in accordance with the facts, words full of meaning, on religion, on the discipline of the Order. He speaks, and at the right time, words worthy to be laid up in one's heart, fitly illustrated, clearly divided, to the point.'

29. 19."Or he might say: 'Gotama the recluse holds himself aloof from causing injury to seeds or plants. ' He takes but one meal a day, no eating at night, refraining from food after hours (after

midday). ' He refrains from being a spectator at shows, at fairs, with nautch dances, singing, and music. ' He abstains from wearing, adorning or ornamenting himself, with garlands, scents, and unguents.

He abstains from the use of large and lofty beds. '

He abstains from accepting silver or gold. '

He abstains from accepting uncooked grain. '

He abstains from accepting women or girls. '

He abstains from accepting bond-men or bondwomen.

' He abstains from accepting sheep or goats. '

He abstains from accepting fowls or swine.

He abstains from accepting elephants, cattle, horses and mares. '

He abstains from accepting cultivated fields or waste. '

He abstains from acting as a go-between or messenger. '

He abstains from buying and selling.

He abstains from cheating with scales or bronzes or measures.

He abstains from the crooked ways of bribery, cheating and fraud. '

He abstains from maiming, murder, putting in bonds, highway robbery, dacoity and violence.'

20."Such are the things, brethren, which an unconverted man, when speaking in praise of the Tathagata, might say. But you should not even on that account, be filled with pleasure or gladness, or be lifted up in heart. Were you to be so, that also would stand in the way of your self-conquest. When outsiders speak in praise of me, or of the Doctrine, or of the Order, you should acknowledge what is right to be the fact, saying: ' For this or that reason this is the fact, that is so, such a thing is found among us, is in us.'"

§ 4. *A Bhikkhu Must Fight to Spread Virtue (Dhamma)*

1. 1. Addressing the Bhikkhus the Lord once said:
2. 2."It is not I, O disciples, that quarrel with the world," said the Lord," but the world that quarrels with me. A teacher of the truth does not quarrel with anyone in the world."
3. 3."Warriors, warriors, Lord, we call ourselves. In what way then are we warriors?"
4. 4."We wage war, O disciples, therefore we are called warriors."
5. 5."Wherefore, Lord, do we wage war?"
6. 6."For lofty virtues, for high endeavour, for sublime wisdom—for these things do we wage war: therefore we are called warriors."
7. 7. Where virtue is in danger do not avoid fighting, do not be mealy-mouthed.

PART IV : THE BHIKKHU AND THE LAITY

1. 1. The Bond of Alms.
2. 2. Mutual Influence.
3. 3. Dhamma of the Bhikkhu and the Dhamma of the Upasaka.

§ 1. The Bond of Alms

1. 1. The Sangh was an organised body the membership of which was not open to all.
2. 2. To be a mere Parivrajaka was not enough to give the Parivrajaka a membership of the Sangh.
3. 3. It is only after the Parivrajaka had obtained Upasampada that he could become a member of the Sangh.
4. 4. The Sangh was an independent body. It was independent even of its founder.
5. 5. It was autonomous. It could admit anyone it liked to its membership. It could dismember any member provided it acted in accordance with the rules of the Vinaya Pitaka.
6. 6. The only cord which bound the Bhikkhu to the Laity was alms.
7. 7. The Bhikkhu depended upon alms and it is the laity who gave alms.
8. 8. The laity was not organised.

9. 9. There was a Sangha-Diksha or a ceremony for marking the initiation of a person in the Sangh.
10. 10. Sangha-Diksha included both initiation into the Sangh as well as into the Dhamma.
11. 11. But there was no separate Dhamma-Diksha for those who wanted to be initiated into the Dhamma but did not wish to become members of the Sangh, one of the consequences of which was to go from home into homelessness.
12. 12. This was a grave omission. It was one of the causes which ultimately led to the downfall of Buddhism in India.
13. 13. For, this absence of the initiation ceremony left the laity free to wander from one religion to another and, worse still, follow at one and the same time.

§ 2. *Mutual Influence* 1 However, the bond of alms was enough for a

Bhikkhu to reform an erring member of the laity.

1. 2. In this connection the following rules mentioned in the Anguttara Nikaya are worthy of attention.
2. 3. In addition to these prescriptions, the laity had a general right to complain against a Bhikkhu to other Bhikkhus, against any mischief or misconduct.
3. 4. The moment the complaint reached the Buddha and he had verified it, the relevant rule in the Vinaya Pithaka was amended to make the repetition of such a conduct, an offence against the Sangh.
4. 5. The Vinaya Pithaka is nothing but redress of the complaints of the laity.
5. 6. Such was the relation between the Bhikkhu and the Laity.

§ 3. *Dhamma of the Bhikkhu and the Dhamma of the Upasaka*

1. 1. Some critics of Buddhism allege that Buddhism is not a religion.
2. 2. No attention should be paid to such criticism. But if any reply is to be given, it is that Buddhism is the only real religion and those who do not accept this must revise their definition of Religion.
3. 3. Other critics do not go so far as this. What they say is that

Buddhism as a religion is concerned only with the Bhikkhu. It does not concern itself with the common man. Buddhism kept the common man outside its pale.

4. 4. The references to the Bhikkhu occur so often in the dialogues of the Buddha that they go to strengthen the criticism.

5. 5. It, therefore, becomes necessary to make the matter clear.

6. 6. Was the Dhamma common to both? **Or** is there any part of the Dhamma which is binding on the Bhikkhu but not so on the laity?

7. 7. Merely because the sermons were addressed to the gathering of the Bhikkhus it must not be supposed that what was preached was intended to apply to them only. What was preached applied to both.

8. 8. That the Buddha had the laity in mind when he preached: (1) The Panchasila, (2) The Ashtanga Marga, and (3) The Paramitas, is quite clear from the very nature of things and no argument, really speaking, is necessary.

9. 9. It is those who have not left their homes and who are engaged in active life that Panchasila, Ashtanga Marga, and Paramitas are essential. It is they who are likely to transgress them and not the Bhikkhu who has left home, who is not engaged in active life and who is not likely to transgress them.

10. 10. When the Buddha, therefore, started preach-ing his Dhamma it must be principally for the laity.

11. 11. It is not, however, necessary to rely merely on inference. There is direct evidence to disprove the criticism.

12. 12. Reference may be made to the following sermon.

13. 13. Once while the Lord was staying at Shra-vasti in Jeta's Grove in Anathapindika's pleasance, there came to him the lay follower Dhammika, with other five hundred lay followers, who after due salutations, took his seat to one side and addressed the Lord as follows :

14. 14."What conduct. Oh Lord, perfects, both those that are Bhikkhus and those that are only Upasakas, i.e., those who are homeless and those who are not.

15. 15."Let the almsmen seated round with these lay followers learn the saving truth."

16. 16. The Blessed Lord said:"Give ear, almsmen. Hear, and keep therules prescribed.

17. 17."Go not thy round when noon is past; betime seek alms. Snares greet the untimely guest.
18. 18."Before thou seek thy meal, clear thou thy mind of zest for forms, sounds, .odours, taste and luck.
19. 19."Thine alms received, return alone, to sit apart and think, with fixed mind that never stays abroad
20. 20."In talk with pious folk, almsmen, let thy theme be the Doctrine.
21. 21."Treat alms, cell, bed, water and rinsings just as means and nothing more.
22. 22."Such reasoned use will leave an almsman as unstained as lotus leaf whereon no drop of water rests.
23. 23."I now pass to the conduct which perfects the lay followers. To them I say:
24. 24."Slay not, nor doom to death, nor sanction slaughter. Do no violence to aught that lives, strong or weak. Love all living beings.
25. 25."No layman wittingly should thief or order theft ; take but what others give.
26. 26."Shun incontinence as it were a pit of fire, on failing continence, debauch no wedded wife.
27. 27."In conclaves, courts, let him not be, let him not prompt or sanction lies; let him renounce untruth.
28. 28."Observe this law : Shun drink, make no man drink ; sanction no drinking. Mark how drink to madness leads.
29. 29."Through drink, fools sin, and egg lax brethren on to sin. So flee this maddening vice, this folly, bliss of fools.
30. 30."Slay not, steal not, lie not ; from strong drink keep away ; refrain from lechery.
31. 31."So make thy sabbath vows as week succeeds week, and keep with pious hearts this eight-fold festival.
32. 32."At morn, these vows performed, with pious, thankful heart, be wise and of thy means give almsmen food and drink.
33. 33."Cherish thy parents well; follow a righteous trade.
34. 34."Thus shall the layman, staunch, reach realms of light above."
35. 35. It will thus be seen that the Dharnma was the same for both.
36. 36. There are of course differences in the call made upon the two.
37. 37. A Bhikkhu must take five vows.

38. 38. He must take the vow that he shall not kill.
39. 39. He must take the vow that he shall not appropriate to himself property of another which has not been given to him.
40. 40. He must take the vow that he shall never tell a lie.
41. 41. He must take the vow that he shall not try to have carnal knowledge of a woman.
42. 42. He must take the vow that he shall never drink any intoxicating drink.
43. 43. All these rules are binding also upon the layman.
44. 44. The only difference lies in this. With the Bhikkhu they are vows which are not to be transgressed, with the layman they are moral obligations to be voluntarily honoured.
45. 45. Besides, there are two other differences which are noteworthy.
46. 46. A Bhikkhu cannot have private property. A layman can have.
47. 47. A Bhikkhu is free to enter parinibbana. Nibbana is enough for a layman.
48. 48. These are the similarities and differences between a Bhikkhu and the layman.
49. 49. Dhamma, however, is the same for both.

PART V : VINAYA FOR THE LAITY

1. 1. Vinaya for the Wealthy.
2. 2. Vinaya for the Householder.
3. 3. Vinaya for Children.
4. 4. Vinaya for Pupil.
5. 5. Vinaya for Husband and Wife.
6. 6. Vinaya for Master and Servant.
7. 7. Conclusions.
8. 8. Vinaya for Girls.

§ 1. Vinaya for the Wealthy

(i)

1. 1. The Blessed Lord did not elevate poverty by calling it a blessed state of life.

2. 2. Nor did he tell the poor that they may remain content for they will inherit the earth.

3. 3. On the contrary, he said riches are welcome. What he insisted upon is that the acquisition of riches must be subject to Vinaya.

(ii)

1. 1. Once Anathapindika came to where the Exalted One was. Having come, he made obeisance to the Exalted One and took a seat at one side and asked, "Will the Enlightened One tell what things are welcome, pleasant, agreeable, to the householder but which are hard to gain."

2. 2. The Enlightened One having heard the question put to him said,— "Of such things the first is to acquire wealth lawfully.

3. 3."The second is to see that your relations also get their wealth lawfully.

4. 4."The third is to live long and reach great age.

5. 5."For a true householder for the attainment of these three things, which in the world are welcome, pleasant, agreeable but hard to gain, there are also four conditions precedent. They are the blessing of faith, the blessing of virtuous conduct, the blessing of liberality and the blessing of wisdom.

6. 6."The blessing of faith and belief consist in the supreme knowledge of the Tathagata which teaches 'This is He, the Exalted One, the Holy One, the Supremely Awakened One, the perfect in Knowledge and in Conduct, the Auspicious, the Knower of all the worlds, the Incomparable Trainer of men, the Teacher of Devas and men.'

7. 7."The blessing of virtuous conduct which abstains from taking life, thieving, unchastity, lying and partaking of fermented liquor.

8. 8."The blessing of liberality consists in the householder living with mind freed from the taint of avarice, generous, open-handed, delighting in gifts, a good one to be asked and devoted to the distribution of gifts.

9. 9."Wherein consists the blessing of Wisdom? Ye know that a householder who dwells with mind overcome by greed, avarice, ill-will, sloth, drowsiness, distraction and flurry, commits wrongful deeds and neglects that which ought to be done, and by so doing is deprived of

happiness and honour.

10. 10."Greed, avarice, ill-will, sloth and drow-siness, distraction and flurry and doubt are stains of the mind. A householder who gets rid of such stains of the mind acquires great wisdom, abundant wisdom, clear vision and perfect wisdom.

II. Thus, to acquire wealth legitimately and justly, earned by great industry, amassed by strength of the arm and gained by sweat (of the brow) is a great blessing. The householder makes himself happy and cheerful and preserves himself full of happiness; also make parents, wife and children, servants and labourers, friends and companions happy and cheerful, and preserves them full of happiness."

§ 2. *Vinaya for the Householder*

On this matter the Buddha's thoughts are embodied in his discourse with Sigala.

1. 1. At one time the Exalted One was in the Squirrels' Feeding-ground in Velu Vana in Rajagraha.
2. 2. Now at this time young Sigala, a householder's son, rising betimes, went forth from Rajagraha, and with wet hair and wet garments and clasped hands uplifted, paid worship to the several quarters of earth and sky—to the east, south, west and north, to the nadir and the zenith.
3. 3. And the Exalted One early that morning dressed himself, took his bowl and robe and entered Rajagraha seeking alms. He saw young Sigala worshipping and asked him, "Why do you worship the several quarters of earth and sky?"
4. 4."My father, when he was dying, said to me : ' Dear son, you should worship the quarters of earth and sky. So I, sir, honouring my father's word worship in this wise.'"
5. 5."But how can this be the true religion of a man of the world"asked the Blessed One."What else can be the religion of man,"replied Sigala."If there is, it would be an excellent thing if the Exalted One would tell me what it is."
6. 6."Hear then young householder, give ear to my words and I will tell

you what it is.”“So be it, Sir,” responded young Sigala. And the Exalted One said:

7. 7.”A religion to be a religion of man must teach him to shun bad conduct. The destruction of life, the taking of what is not given, licentiousness and lying speech are the four vices of conduct which he must avoid.

8. 8.”Know ye, Sigala, evil deeds are done from motives of partiality, enmity, stupidity and fear. If he is not led away by these motives, he will do no evil deed.

9. 9.”A religion to be religion of man must teach him not to dissipate his wealth. Dissipation of wealth results from being addicted to intoxicating liquors, frequenting the streets at unseemly hours, haunting fairs, being infatuated by gambling, associating with evil companions, the habit of idleness.

10. 10.”There are, Sigala, six dangers which follow from being addicted to intoxicating liquors, actual loss of wealth, increase of quarrels, susceptibility to disease, loss of good character, indecent exposure, impaired intelligence.

11. 11.”Six are the perils from frequenting the streets at unseemly hours : he himself is without guard or protection and so also are his wife and children, so also is his property, he, moreover, becomes suspected as the doer of undiscovered crimes, and false rumours fix on him, and many are the troubles he goes out to meet. 12.”Six are the perils from the haunting offairs: he is ever thinking where is there dancing? Where is there singing? where is there music? where is recitation? where are the cymbals? where the tam-tams?

12. 13.”Six are the perils for him who is infatuated with gambling : as winner he begets hatred, when beaten he mourns his lost wealth, his actual substance is wasted, his word has no weight in a court of law, he is despised by friends and officials, he is not sought after by those who would give or take in marriage, for they would say that a man who is a gambler cannot afford to keep a wife.

13. 14.”Six are the perils from associating with evil companions : any gambler, any libertine, any tippler, any cheat, any swindler, any man of violence is his friend and companion.

14. 15.”Six are the perils of the habit of idleness : he says it is too cold

and does no work, he says it is too hot and does no work, he says it is too early or too late and does no work, he says I am too hungry and does no work, he says I am too full and does no work. And while all that he should do remains undone, new wealth he does not get, and such wealth as he has dwindles away.

15. 16."A religion to be a religion of man must teach him to know who is a true friend.

16. 17."Four are they who should be reckoned as foes in the likeness of friends ; to wit, a rapacious person, the man of words not deeds, the flatterer, and the fellow-waster.

17. 18."Of these the first is to be reckoned as a foe in the likeness of a friend: for, he is rapacious, he gives little and asks much ; he does his duty out of fear, he pursues his own interests.

18. 19."A man of words who is not a man of deeds is to be reckoned as a foe in the likeness of a friend : For, he makes a friendly profession as regards the past, he makes friendly profession as regards the future, he tries to gain your favour by empty sayings, when the opportunity for service has arisen he avows his disability.

19. 20."The flatterer is to be reckoned as a foe in the likeness of a friend: for, he both consents to do wrong, and dissents from doing right ; he praises to your face ; he speaks ill of you to others.

20. 21."So also the fellow-waster companion is to be reckoned as a foe in the likeness of a friend ; for, he is your companion when you frequent the streets at untimely hours, he is your companion when you haunt shows and fairs, he is your companion when you are infatuated with gambling.

21. 22."Four are the friends who should be reckoned as sound at heart: the helper ; the friend who is the same in happiness and adversity; the friend of good counsel ; the friend who sympathises.

22. 23."The friend who is a helper is to be reckoned as sound at heart : because, he guards you when you are off your guard, he guards your property when you are off your guard, he is a refuge to you when you are afraid, when you have tasks to perform he provides a double supply of what you may need.

23. 24."The friend who is the same in happiness and adversity is to be reckoned as sound of heart: because, he tells you his secrets, he keeps secret your secrets, in your troubles he does not forsake you, he lays down

even his life for your sake.

24. 25.”The friend who declares what you need to do is sound of heart; because, he restrains you from doing wrong, he enjoins you to do what is right, he informs you of what you had not heard before, he reveals to you the way of heaven.

25. 26.”The friend who sympathises is to be reckoned as sound at heart; because, he does not rejoice over your misfortunes, he rejoices over your prosperity, he restrains anyone who is speaking ill of you, he commends anyone who is praising you.”Thus speaks the Exalted One.

26. 27.”Instead of teaching him to worship the six quarters, a religion which is a religion of man must teach him to respect and revere his parents, his teachers, his wife and children, his friends and companions, his servants and workmen and his religious teachers.”

§ 3. *Vinaya for Children*

1.”A child should minister to his parents saying: 'Once supported by them I will now be their support, I will perform duties incumbent on them; I will keep up the lineage and tradition of my family, I will make myself worthy of my heritage.' For, the parents show their love for him, they restrain him from vice, they exhort him to virtue, they train him to a profession, they contract a suitable marriage for him, and in due time they hand over his inheritance.”

§ 4. *Vinaya for Pupil*

1.”A pupil should minister to his teachers by rising from his seat, in salutation by waiting upon them, by eagerness to learn, by personal service, and by attention when receiving their teaching. For, teachers love their pupil, they train him in that wherein he has been well trained, they make him hold fast that which is well held, they thoroughly instruct him in the lore of every art, they speak well of him among his friends and companions. They provide for his safety in every quarter.”

§ 5. *Vinaya for Husband and Wife*

1. 1."A husband should minister to his wife by showing respect, by courtesy, by faithfulness, by handing over authority to her, by providing her with adornment. For, the wife loves him, her duties are well performed, by hospitality to the kin of both, by faithfulness, by watching over the goods he brings, and by skill and industry in discharging all her business.
2. 2."A clansman should minister to his friends and companions by generosity, courtesy and benevolence, by treating them as he treats himself, and by being as good as his word. For, his friends and familiars love him, they protect him when he is off his guard, and on such occasion guard his property, they become a refuge in danger, they do not forsake him in his trouble and they show consideration for his family."

§ 6. *Vinaya for Master and Servant*

1. 1."A master should minister to his servants and employees by assigning them work according to their strength, by supplying them with food and wages, by tending them in sickness, by sharing with them unusual delicacies, by granting leave at times. For, servants and employees love their master, they rise before him, they lie down to rest after him, they are content with what is given to them, they do their work well, and they carry about his praise and good fame.
2. 2."A clansman should minister to religious teachers by affection in act and speech and mind, by keeping open house to them, by supplying their temporal needs. For, religious teachers restrain him from evil, they exhort him to good, they love him with kindly thoughts, they teach him what he had not heard, they correct and purify what he has heard."

§7. *Conclusions*

1. 1. When the Exalted One had thus spoken Sigala, the young householder said this:"Beautiful, Lord, beautiful! As if one should set up again that which had been overthrown, or reveal that which had been hidden, or should disclose the road to one that was astray, or should carry a lamp into darkness, saying: They that have eyes will see! Even so hath the Truth been manifested by the Exalted One in many ways.
2. 2."And I, even I, do go to him as my refuge, and to the Truth and to

the Order. May the Exalted One receive me as his lay-disciple, as one who has taken his refuge in him from this day forth as long as life endures.”

§ 8. *Vinaya for Girls*

1. 1. Once the Exalted One dwelt near Bhaddiya in Jatiya Wood; and there Uggaha, Mendaka's grandson, paid him a visit and, after saluting, sat down at one side. So seated, he said to the Exalted One:
2. 2.”Lord let the Exalted One accept a meal at my house tomorrow, he as fourth (with us three).”
3. 3. The Exalted One accepted by his silence.
4. 4. Then Uggaha, seeing the Exalted One had accepted, rose from his seat, saluted, and took his leave, keeping the Exalted One on his right.
5. 5. Now when the night was over, the Exalted One, robing himself in the morning, took his bowl and cloak and went to Uggaha's house, and there sat down on the seat made ready. And Uggaha served with his own hand and satisfied the Exalted One with plenty of food.
6. 6. And when the Exalted One had removed his hand from his bowl, he sat down at one side. Thus seated, he said:
7. 7.”Lord, these girls of mine will be going to their husbands' families; Lord, let the Exalted One counsel them, let the Exalted One advise them, for their good and happiness for many a day !”
8. 8. Then the Exalted One spoke to them and said:”Wherefor, girls, train yourselves in this way: 'To whatsoever husband our parents shall give us—wishing our weal, seeking our happiness, compassionate— because of compassion for him we will rise up early, be the last to retire, be willing workers, order all things sweetly and be gentle voiced. Train yourselves thus, girls.'
9. 9.”And in this way also, girls: ' We will honour, revere, esteem and respect all who are our husband's relatives, whether mother or father, recluse or godly man, and on their arrival will offer them a seat and water. Train yourselves thus, girls.'
10. 10.”And in this way also girls: 'We will be deft and nimble at our husband's home-crafts, whether they be of wool or cotton, making it our business to understand the work so as to do and get it done. Train yourselves thus, girls.

11. 11.”And in this way also, girls: 'Messengers and workfolk we will know the work of each by what has been done, their remissness, by what has not been done; we will know the strength and the weakness of the sick; we will divide the hard and soft food, each according to his share.

Train yourselves thus, girls.'

12. 12.”And in this way also, girls: 'The money, corn, silver and 'gold that our husband brings home, we will keep safe, watch and ward over it, and act as no robber, thief, carouser, wastrel therein. Train yourselves thus, girls.'“

13. 13. On hearing this advice, the daughters of Uggaha felt exceedingly happy and were grateful to the Lord.

BOOK VI: He and His Contemporaries

Part I—His Benefactors.

Part II—His Enemies.

Part III—Critics of His Doctrines.

Part IV—Friends and Admirers.

PART I : HIS BENEFACTORS

1. 1. Gift from Bimbisara.
2. 2. Gift from Anathapindika.
3. 3. Gift from Jeevaka.
4. 4. Gift from Ambrapali.
5. 5. Munificence of Vishakha.

§ 1. Gift fro King Bimbisara

1. 1. King Bimbisara was not merely a follower of the Blessed Lord: he was also a great devotee and a great supporter of his Dhamma.

2. 2. After his becoming a lay disciple Bimbisara asked:”Might the Blessed Lord consent to take his meal with me tomorrow together with the fraternity of the monks?”

3. 3. The Blessed One expressed his consent by remaining silent.
4. 4. Then King Bimbisara, when he understood that the Blessed One had accepted his invitation, rose from his seat, respectfully saluted the Blessed One, and, passing round him with his right side towards him, went away.
5. 5. And when the night had elapsed, Bimbisara ordered excellent food to be prepared, and at time announced to the Blessed One in the words: "It is time. Lord, the meal is ready."
6. 6. And in the forenoon the Blessed One, having put on his under-robe, took his alms-bowl, and with his robe on, entered the city of Rajagraha accompanied by monks who had all been Jatilas before.
7. 7. And the Blessed One went to the palace of King Bimbisara. Having gone there, he sat down with the monks who followed him, on seats laid out for them. Then King Bimbisara with his own hands served the fraternity of monks with the Buddha at its head; and when the Blessed One had finished his meal and cleaned his bowl and his hands, he sat down near him.
8. 8. Sitting near him King Bimbisara thought: "Where may I find a place for the Blessed One to live in, not too far from the village and not too near, suitable for going and coming, easily accessible for people who keep on seeking him, by day not too crowded, where there is little sound, little noise by night, sequestered, hidden from men, well fitted for a retired life?"
9. 9. And King Bimbisara thought: "There is the Veluvana, my pleasure garden, which is not too far from the town and not too near, suitable for going and coming. What if I were to make an offering of the Veluvana pleasure garden to the fraternity of monks, with the Buddha at its head?"
10. 10. And King Bimbisara took a golden vessel with water in it, to be poured over the Buddha's hand; and made a gift to the Blessed One, saying, "I give this Veluvana pleasure garden, Lord, to the fraternity of monks with the Buddha at its head." The Blessed One accepted the park.
11. 11. Then the Blessed One, after having taught, incited, animated, and gladdened King Bimbisara by religious discourse, rose from his seat and went away.
12. 12. And in consequence of this event the Blessed One, after having delivered a religious discourse, addressed the monks: ' I allow you monks,

to receive this donation of a park.”

§ 2. *Gift from Anathapindika*

1. 1. After his conversion Anathapindika once went to the Blessed Lord. Taking his seat on his right side, he said:

2. 2.”The Lord knows that I dwell in Shravasti, a land rich in produce, and enjoying peace; Pasendi is the great king thereof.

3. 3.”Now am I wishful to found a Vihar there, I pray you, of your tenderness come to Shravasti and accept it from me.”

4. 4. The Blessed Lord kept silent and thereby showed his willingness to accept the gift”.

5. 5. Anathapindika, the friend of the destitute and the supporter of orphans, having returned home, saw the garden of the heir-apparent, Jeta, with its green groves and limpid rivulets, and thought:”This is the place which will be most suitable as a Vihara for the fraternity of the Blessed One.” And he went to the prince and asked leave to buy the ground.

6. 6. The prince was not inclined to sell the garden for he valued it highly. He at first refused but said at last:”If you can cover it with gold, then, and for no other price, shall you have it.”

7. 7. Anathapindika rejoiced and began to spread his gold; but Jeta said:”Spare yourself trouble for I will not sell.” But Anathapindika insisted. Thus they differed and contended until they resorted to the magistrate.

8. 8. Meanwhile the people began to talk of the unwonted proceeding and the prince hearing more of the details, and knowing that Anathapindika was not only very wealthy, but also straightforward and sincere, inquired into his plans. On hearing the name of the Blessed One, the prince became anxious to share in the foundation and he accepted only one-half of the gold, saying:”Yours is the land but mine are the trees. I will give the trees as my share of the offering to the Lord.”

9. 9. Having made the foundation, they began to build the hall which rose loftily in due proportions according to the directions which the Blessed One had given; and it was beautifully decorated with appropriate carvings.

10. 10. This Vihara was called Jetavana and the friend of the orphans invited the Lord to come to Shravasti and receive the gift. And the Blessed

One left Kapilavastu and came to Shravasti.

11. 11. While the Blessed One entered Jetavana, Anathapindika scattered flowers and burned incense, and as a sign of the gift he poured water from a golden dragon pitcher, saying, "This Jetavana Vihara I give for the use of the brotherhood throughout the world."

12. 12. The Blessed One received the gift and replied: "May all evil influences be overcome; may the offering promote the kingdom of righteousness and be a permanent blessing to mankind in general and especially also to the giver."

13. 13. Anathapindika was one of the eighty chief disciples who bore the title of Chief Airngiver.

§ 3. *Gift from Jeevaka*

1. 1. Jeevaka the physician visited the Blessed One twice a day whenever the Blessed One happened to be in Rajagraha.

2. 2. Jeevaka found the Veluvana gifted away to the Blessed One by King Bimbisara too far away.

3. 3. Jeevaka had his own park in Rajagraha, known as Ambavana, which was much nearer from his place. 4. He thought of building a Vihara with all its adjuncts and present the Ambavana and the Vihara to the Blessed One.

4. 5. With this idea in his mind he approached the Blessed One and requested him to let him fulfil his wishes.

5. 6. The Blessed Lord showed his acceptance by remaining silent.

§ 4. *Gift from Ambrapali*

1. 1. Now the Exalted One was staying at Nadika and was wishing for a change. He addressed Ananda, and said: "Come, Ananda, let us go on to Vesali."

2. 2. "So be it. Lord," said Ananda, in assent, to the Exalted One.

3. 3. Then the Exalted One proceeded, with a great company of the brethren, to Vesali, and there at Vesali, the Exalted One stayed at Ambrapali's grove.

4. 4. Now the courtesan Ambrapali heard that the Exalted One had

arrived at Vesali and was staying there at her mango grove. And ordering a number of state vehicles to be made ready, she mounted one of them, and went forth with her train from Vesali towards her garden. She went in the carriage as far as the ground was passable for carriages; there she alighted and she proceeded on foot to the place where the Exalted One was, and took her seat respectfully on one side. And when she was thus seated the Exalted One instructed her with religious discourse.

5. 5. Then she addressed the Exalted One, and said: "May the Exalted One do me the honour of taking his meal, together with the brethren, at my house tomorrow?"

6. 6. And the Exalted One gave, by silence, his consent. Then when Ambrapali the courtesan saw that the Exalted One had consented, she rose from her seat and bowed down before him, and keeping him on her right hand as she passed him, she departed thence.

7. 7. Now the Licchavis of Vesali heard that the Exalted One had arrived at Vesali, and was staying at Ambrapali's grove. They too wanted to invite the Buddha to their place for a meal. And ordering a number of state carriages to be made ready, they each mounted one of them and went forth with their train from Vesali.

8. 8. They and Ambrapali crossed on the way.

9. 9. And Ambrapali drove up against the young Licchavis, axle to axle, wheel to wheel, and yoke to yoke, and the Licchavis said to Ambrapali the courtesan, "How is it, Ambrapali, that thou drivest up against us thus?"

10. 10. "My Lords, I have just invited the Exalted One and his brethren for their morrow's meal," said Ambrapali.

11. 11. "Ambrapali, sell this honour to us for a hundred thousand," said they.

12. 12. "My Lords, were you to offer all Vesali with its subject territory, I would not give it up."

13. 13. The Licchavis cast up their hands, exclaiming: "We are outdone by this mango girl. We are outreached by this mango girl," and they went on to Ambrapali's grove.

14. 14. Knowing that they were outdone they still thought of approaching the Blessed One in the hope that he might reconsider and give their invitation first preference. So they went on to Ambrapali's grove.

15. 15. When the Exalted One saw the Licchavis approaching in the

distance, he addressed the brethren and said: "Brethren, let those of the brethren who have never seen the devas, gaze upon this company of the Licchavis, behold this company of the Licchavis, compare this company of the Licchavis—for they are even a company of next-world devas."

16. 16. And when they had ridden as far as the ground was passable for carriages the Licchavis alighted there, and then went on foot to the place where the Exalted One was, and took their seats respectfully by his side.

17. 17. Then they addressed the Exalted One, and said: "May the Exalted One do us the honour of taking his meal, together with the brethren, at our house tomorrow?"

18. 18. "I have promised, Licchavis, to dine tomorrow with Ambrapali," was the reply.

19. 19. Then the Licchavis knew that they had failed. And after expressing their thanks and approval of the words of the Exalted One, they rose from their seats and bowed down before the Exalted One, and keeping him on their right hand as they passed him, departed thence.

20. 20. And at the end of the night Ambrapali the courtesan made ready in her mansion sweet rice and cakes, and announced the time to the Exalted One, saying: "The hour, Lord, has come, and the meal is ready."

21. And the Exalted One who had dressed himself early in the morning, took his bowl, and his robe and went with the brethren to the place where Ambrapali's mansion was; and when he had

come there he seated himself on the seat prepared for him. And Ambrapali, the courtesan, set the sweet rice and cakes before the order, with the Buddha at their head, and waited upon them till they refused any more.

21. 22. And when the Blessed One had quite finished his meal and had cleansed the bowl and his hands, the courtesan had a low stool brought, and sat down at his side, and addressed the Exalted One, and said:

22. 23. "Lord, I present my pleasure to you and to the order." And the Exalted One accepted the gift; and after giving a religious discourse he rose from his seat and took her leave.

§ 5. *Munificence of Vishakha*

1. 1. Vishakha was a wealthy woman of Shravasti. She had many

children and grandchildren.

2. 2. When the Blessed One stayed at Shravasti, Vishakha went up to the place where the Blessed One was, and tendered Him an invitation to take his meal at her house, which the Blessed One accepted.

3. 3. And heavy rain fell during the night and the next morning; and the bhikkhus doffed their robes to keep themselves dry and let the rain fall upon their bodies.

4. 4. When the next day the Blessed One had finished his meal, she took her seat at his side and spoke thus; "Eight are the boons, Lord, which I beg of the Blessed One."

5. 5. Then the Blessed One said: "The Tathagatas, O Vishakha, grant no boons unless they know what they are."

6. 6. Vishakha replied: "Proper, Lord, and unobjectionable are the boons I ask."

7. 7. Having received permission to ask the boons, Vishakha said: "I desire, Lord, through all my life to bestow robes for the rainy season on the Sangha, and food for incoming bhikkhus, and food for outgoing bhikkhus and food for the sick, and food for those who wait upon the sick, and medicine for the sick, and a constant supply of rice-milk for the Sangha, and bathing robes for the bhikkhunis, the sisters."

8. 8. "But," said the Lord, "What, O Vishakha, have you in view in asking these eight boons of the Tathagata?"

9. 9. And Vishakha replied: "I gave command, Lord, to my maid-servant, saying, 'Go thou and announce to the fraternity that the meal is ready,' and my maid went, but when she came to the vihara, she observed that the bhikkhus had doffed their robes, while it was raining, and she thought: 'These are not bhikkhus, but naked ascetics letting the rain fall on them.' So she returned to me and reported accordingly and I had to send her a second time.

10. 10. "Impure, Lord, is nakedness, and revolting. It was this circumstance, Lord, that I had in view in desiring to provide the Sangha throughout my life with special garments for use in the rainy season.

11. 11. "As to my second wish. Lord, an incoming bhikku, not being able to take the direct roads, and not knowing the places where food can be procured, comes on his way wearied out by seeking for alms. It was this circumstance, Lord, that I had in view in desiring to provide the Sangha

throughout my life with food for incoming bhikkhus.

12. 12."Thirdly, Lord, an outgoing bhikkhu, while seeking about for alms, may be left behind, or may arrive too late at the place whither he desires to go, and will set out on the road in weariness.

13. 13."Fourthly, Lord, if a sick bhikkhu does not obtain suitable food, his sickness may increase upon him, and he may die.

14. 14."Fifthly, Lord, a bhikkhu who is waiting upon the sick will lose his opportunity of going out to seek food for himself.

15. 15."Sixthly, Lord, if a sick bhikkhu does not obtain suitable medicines, his sickness may increase upon him, and he may die.

16. 16."Seventhly, Lord, I have heard that the Blessed One has praised rice-milk, because it gives readiness of mind, dispels hunger and thirst; it is wholesome nourishment for the healthy and for the sick as a medicine. Therefore I desire to provide the Sangha throughout my life with constant supply of rice-milk.

17. 17."Finally, Lord, the bhikkhunis are in the habit of bathing in the river Archiravati with the courtesans, at the same landing-place, and naked. And the courtesans. Lord, ridicule the bhikkhunis, saying, 'What is the good, ladies, of your maintaining chastity when you are young? When you are old, maintain chastity then; thus will you be obtainers of both ends.' Impure, Lord, is nakedness for a woman, disgusting, and revolting.

18. 18."These are the circumstances, Lord, that I had in view."

19. 19. The Blessed One said:"But what was the advantage you had in view for yourself, O Vishakha, in asking these eight boons of the Tathagatha?"

20. 20. Vishakha replied:"Bhikkhus who have spent the rainy season in various places will come, Lord, to Shravasti to visit the Blessed One. And on coming to the Blessed One they will ask, saying: * Such and such a bhikkhu. Lord, has died. What, now, is his destiny?' Then will the Blessed One explain that he has attained the fruits of conversion; that he has entered Nirvana or attained arhantship, as the case may be.

21. 21."And I, going up to them, shall ask, ' Was that brother, sirs, one of those who had formerly been at Shravasti,' then shall I arrive at the conclusion, 'For a certainty did that brother enjoy either the robes for the rainy season, or the food for the incoming bhikkhus, or the food for the outgoing bhikkhus, or the food for the sick, or the food for those that wait

upon the sick, or the medicine for the sick, or the constant supply of rice-milk.'

22."Then will gladness spring up within me; thus gladdened joy will come to me; and so rejoicing all my frame will be at peace. Being thus at peace I shall experience a blissful feeling of content; and in that bliss my heart will be at rest. That will be to me an exercise of my moral

powers, an exercise of the seven kinds of wisdom ! This, Lord, was the advantage I had in view for myself in asking those eight boons of the Blessed One."

22. 23. Then the Blessed One said:"It is well, it is well, Vishakha. Thou hast done well in asking these eight boons of the Tathagata with such advantage in view. Charity bestowed upon those who are worthy of it is like good seeds sown in good soil that yields an abundance of fruits. But alms given to those who are yet under the tyrannical yoke of the passions are like a seed deposited in bad soil. The passions of the receiver of the alms choke, as it were, the growth of merits."

23. 24. And the Blessed One gave thanks to Vishakha vi in these verses ;"Whatsoever donation a woman upright in life, a disciple of the Blessed One, may bestow in gladness of heart and without stint, her gift is heavenly, destructive of sorrow, and productive of bliss." "A blissful life does she attain entering upon the path that is from corruption and impurity." "Aiming at good, happy does she become; and she rejoices in her charitable actions."

24. 25. Vishakha gave to the Order the Purva-Aram or Eastern Garden, and was the first to become a matron of the lay-sisters.

PART II : HIS ENEMIES

1. 1. Charge of Conversion by Glamour.
2. 2. Charge of being a Parasite !
3. 3. Charge of Breaking Happy Households.
4. 4. Jains and a False Charge of Murder.
5. 5. Jains and a False Charge of Immorality.
6. 6. Devadatta a Cousin and an Enemy.
7. 7. Brahmins and the Buddha.

§ 1. *Charge of Conversion by Glamour*

1. 1. Once the Exalted One dwelt at Vesali, in the Gable-roofed Hall in the Great Wood. Now Bhaddiya the Licchavi came to the Exalted One and said: "Lord! People say ' Gotama the recluse is a charmer and knows a trick of glamour, whereby he entices the followers of other sects.'

2. 2. "They who say this disclaim any desire to misrepresent the Exalted One. Indeed, Lord, we Licchavis do not believe in this charge. But we would like to know what the Exalted One has to say about it."

3. 3. The Lord said: "Come now, Bhaddiya, accept not on hearsay, nor by tradition, nor by what people say. Accept not because it is in the scriptures, by mere logic, nor by inference, nor by consideration of appearances, nor because it accords with your view, nor because you think it must be right, nor out of respect, with the thought that ' One must revere a recluse."

4. 4. "But, Bhaddiya, if at any time you know of yourself by examination of facts that what is being done is sinful or wrongful, that it is reproached by the wise and the result is loss or injury, then, Bhaddiya, eschew them.

5. 5. "Now as to your question, Bhaddiya, what think you; Are not those who accuse me of performing conversion by glamour ambitious persons?" "They are. Lord," replied Bhaddiya.

6. 6. "What think ye, Bhaddiya; Does not an ambitious person, overcome by avarice and with mind overpowered, tell lies or commit crime to achieve his ambition?" "It is so. Lord," replied Bhaddiya.

7. 7. "What think you, Bhaddiya, when thoughts of ill-will and vindictiveness arise in the mind of such a person, does he not instigate others to level accusations against those who come in the way of his ambition?" "That' is so Lord," said Bhaddiya.

8. 8. "Now, Bhaddiya, all I do is to exhort my pupil thus: ' Come you, my dear man, dwell controlling (thoughts of) avarice. So dwelling you will not commit acts born of avarice, either by body, work or thought. Dwell controlling ill-will and ignorance.'

9. 9. "So, Bhaddiya, those recluses and Brahmins, who wrongly reproach me with being a teacher and proclaimer of such views, are false, empty liars, when they say: ' The recluse Gautama is a charmer and knows a trick of glamour, whereby He entices the followers of other sects.'"

10. 10."A lucky thing indeed, O Lord—a fair find is this trick of glamour ! Lord would that my beloved blood-relations were enticed by this same trick of glamour ! It would indeed conduce to their advantage and happiness! Lord, would that all the classes the Brahmins, the Khatiyas, the Vessas and the Suddas were enticed by this same trick of glamour, it would indeed conduce to their advantage and happiness for a long time."

11. 11."It is so, Bhaddiya ! It is so Bhaddiya ! If all the classes enticed by this trick of glamour, were to eschew sinful conditions, my trick would result in great advantage and happiness to the world."

§ 2. *Charge of Being a Parasite!*

1. 1. The Blessed One was accused of being a parasite, living upon others and not earning his living by working for it. The accusation and the reply of the Blessed Lord is set out below :

2. 2. Once the Lord was living among the Magadha folk at Dakkhinagiri in the Brahmin village of Eka-Nala, at a time when the Brahmin Kasi-Bharadvaja's five hundred ploughs were harnessed for the sowing.

3. 3. In the morning early, duly robed and bowl in hand, the Lord went to where the Brahmin was busy, at an hour when a meal was brought forward; and stood there to one side.

4. 4. Observing him standing there for alms, the Brahmin said:"Before I eat, I plough and sow, anchorite; and you too should plough and sow before you eat."

5. 5."I too Brahmin, do plough and do sow before I eat."

6. 6."I fail, however, to see the worthy Gautama's yoke, or plough, or ploughshare, or goad, or ox-team —albeit, he asserts that he ploughs and sows before he eats.

7. 7."You claim to be a tiller, though we see none of your tillage. Tell us how you till; for of your tilling we would fain hear more."

8. 8."My seed is faith; austerity of life my rain; wisdom my yoke and plough; my pole is fear to err; with thought to Strap the yoke; and mindfulness for plough share and the goad,"replied the Lord.

9. 9."Watchful o'er word and deed, and temperate in diet, I make in sight weed my crop, nor rest till final bliss is harvested. Effort is my stout ox, which turns not back at headlands;—straight to Peace he bears me on,

to that last bourne where anguish is no more. Thus, I till with Deathlessness for crop. And who tills as I, is freed from ills.”

10. 10. Thereupon the Brahmin served up milk-rice on a great bronze dish and offered it to the Lord, saying:”Eat this, Gautama, a tiller indeed art thou, in that thou tillest a crop that is Deathless.”

11. 11. But the Lord said:”I take no chanter's fee. Seers countenance it not; the Enlighten'd scout such fees; and while this Doctrine lasts, this practice must hold good. Provided with other fare a sage of holy calm, consummate, cankerless; merit Co reap,— sow there.”

12. 12. On hearing these words the Brahmin went over to the Lord, and, bowing his head at the Lord's feet, cried:”Wonderful, Gautama; quite wonderful. Just as a man might set upright again what had fallen down, or reveal what had been hidden away, or tell a man who had fallen down, or reveal what had been hidden away, or tell a man who had gone astray which was his way, or bring a lamp into darkness so that those with eyes to see might see the things about them,— even so, in many ways has Gautama made his Doctrine clear !

13. 13.”To the reverend Gotama I come for refuge and to his Doctrine and to his community. Be it mine to receive admission and confirmation at the hands of the Lord!”So the Brahmin Kasi-Bharadvaja was admitted and confirmed as an almsman of the Lord.

§3. *Charge of Breaking Happy Households*

1. 1. Seeing that many distinguished young Magadha noblemen had become the disciples of the Blessed One, people became annoyed and angry, saying:”The Samana Gautama causes parents to be childless; the Samana Gautama causes wives to become widows; the Samana Gautama causes the uprooting of families.

2. 2.”Now he has ordained one thousand Jatilas, and he has ordained these two hundred and fifty wandering ascetics who were followers of Sanjaya, and these many distinguished young Magadha clansmen are now leading a holy life under the Samana Gautama. What will happen next? No one can say!”

3. 3. And, moreover, when they saw the monks they chide them in the following terms:”The great Samana has come to Giribhaja (i.e., Ragagaha)

of the Magadha people, leading with him all the followers of Sanjaya ; who will be the next to be led by him?"

4. 4. The monks heard this accusation and they reported it to the Blessed One.

5. 5. The Blessed One replied:"This noise, monks, will not last long; it will last only seven days; after seven days it will be over.

6. 6."And if they chide you, monks, you should reply that it is truly by a good Dhamma that the great heroes, the Tathagatas, lead. Who will murmur at the wise, why grudge the wise leading men righteously? There is no compulsion in my Dhamma. One is free to leave home. One is free to remain attached to his home."

7. 7. When the Bhikkhus replied to the revilers as the Blessed One had directed, then the people understood : "It is by Dhamma, and not unrighteously that the Sakyaputtiya Samana leads men"; and ceased to accuse the Blessed One.

§ 4. *Jains and a False Charge of Murder*

1. 1. The Tirthikas'were beginning to feel that the people no longer respected them with the appearance of Samana Gautama and that even some people did not know of their existence.

2. 2. So,"let us see whether with the connivance of somebody, we can lower his prestige,"thought the Tirthikas."Perhaps with Sundari's help we might succeed."

3. 3. And they approached Sundari and said to her:"Sister, you are extremely beautiful and charming. If you spread a scandal about Samana Gautama, the people might believe it, and it would lower his influence."

4. 4. Sundari used to go every evening towards the Jetavana with garlands, camphor, and sweet scents when the people used to return to the city; and if anybody asked her,"Sundari, where are you going?"she used to answer,"I am going to Samana Gautama to stay with in the garden house (Gandha Kutir)."

5. 5. And staying the night in some gardens of the Tirthikas, she used to return in the morning, and if anybody asked her where she had spent the night, she would say that she had spent the night with Gautama.

6. 6. After a few days the Tirthikas hired a few assassins and told

them:”Kill Sundari and throw her body on the rubbish heap near Gautama's Gandha Kutir.”This the assassins did.

7. 7. Then the Tirthikas brought it to the notice of the officers of peace and justice that Sundari used to frequent Jetavana and she was missing.

8. 8. So with the assistance of the officers they found Sundari's body on the rubbish heap. 9. And the Tirthikas accused the disciples of Gautama to have killed Sundari in order to hide the shame of their leader.

1. 10. But the assassins began to quarrel amongst themselves in a liquor shop about the distribution of the prize money for having killed Sundari.

2. 11. The officers at once arrested them and they admitted their guilt and implicated the Tirthikas at whose instigation they had committed the crime.

3. 12. Thus the Tirthikas lost whatever influence was left for them.

§ 5. *Jains and a False Charge of Immorality*

1. 1. As with the sunrise the glow-worms vanish, so miserable became the situation of the Tirthikas. The people ceased to pay them respects or presents.

2. 2. Standing on the public streets they used to harangue:”If Samana Gautama is enlightened (Buddha), we are also. If you acquire virtue by showering presents on the Buddha, you will get the same by giving us presents. Therefore make gift to us.”

3. 3. But the public paid no heed to it. So they conspired in secret how by spreading scandal on the character of Samana Gautama, they could discredit the Sangha.

4. 4. At that time there used to live in Shravasti a Brahmani Parivrajaka, known as Chinchā. In bodily formation and physical charms she was a seductive beauty. She used to radiate voluptuous grace with her bodily movements.

5. 5. One of the crafty schemers among the Tirthikas said that with the help of Chinchā it would be easy to spread a scandal about Gautama, and thereby discredit him, to which other Tirthikas gave their consent.

6. 6. Then, one day Chinchā came to the park of the Tirthikas and saluting them, sat near them. But nobody talked with her. 7. Surprised at

this she said: "How have I offended you? I have saluted you thrice though you do not say a single word to me."

7. 8. "Sister," the Tirthikas said, "Don't you know that Samana Gautama is causing us harm and loss by his popularity." "I do not know that. And have I got any duty to perform toward its solution?"

8. 9. "Sister, if you mean to do us good, then by your own efforts, spread scandals about Gautama, and thus make him unpopular." "All right ; be content ; and depend that on me," saying thus she left the place.

9. 10. Chinchā was an expert in feminine charms and coquetry. When the citizens of Shravasti used to return from the religious discussions at Jetavana, Chinchā wearing a red garment and with perfumes and garlands in her hands used to go towards it.

10. 11. If anybody asked her: "Where are you going now?" "That's none of your business," she used to answer. Spending the night at the rest house of the Itinerants (Tirthikārama) near Jetavana, she used to return to the city in the morning, when the citizens used to go to the Jetavana to pay respect to the Buddha.

11. 12. If anybody asked her, "Where did you spend the night?" she used to say, "That is none of your business. I spent the night with Samana Gautama in his garden house (Gandha Kutir) at Jetavana." The remark used to create doubts in the minds of some.

12. 13. After four months she used to increase the size of her belly by wrapping round it some old rags, and say that she became pregnant through Samana Gautama. Some began to believe it.

13. 14. In the ninth month, she suspending a wooden protuberance round her belly and having arms swollen through insect bites, appeared before the Buddha when he was making a religious discourse before monks and laymen and said: "Great teacher, you give many people religious lessons. Your voice is sweet, and your lips are very tender. Through cohabitation with you I have been pregnant, and my delivery time is near.

14. 15. "You have not fixed any delivery place for me, nor I do see any medicine for that emergency. If you cannot do that yourself, why don't you appoint one of your disciples, the king of Kosala, Anathpindika or Visakha for that purpose.

15. 16. "It seems you know well how to seduce a girl, but you do not know how to take care of the newborn baby that is born out of the

seduction."The assembly remained silent.

16. 17. The Buddha, breaking the continuity of his lecture, answered her with reserved dignity."Sister, whatever you have said, whether true or false, is only known to us both."

17. 18. Chinchu coughing loudly, said."Yes, O Teacher, such a thing can be known to us only."

18. 19. With her coughing the knot with which the wooden protuberance was tied round her belly slackened, and it fell on her feet to her discomfiture.

19. 20. And she was turned away with stones and sticks.

§ 6. *Devadatta a Cousin and an Enemy*

1. 1. Devadatta was a cousin of the Buddha. But from the beginning he was jealous of the Buddha and disliked him intensely.

2. 2. When the Buddha had left his home, Devadatta tried to make love to Yeshodhara.

3. 3. Once when Yeshodhara was about to retire, he without being intercepted by anybody entered into her chamber in the guise of a monk. She asked him,"Bhikkhu, what do you want? Have you got any message for me from my husband?"

4. 4."Your husband, he cares a damn for you. In your house of happiness he cruelly and wickedly abandoned you,"said Devadatta.

5. 5."But he did it for the good of many,"replied Yeshodhara.

6. 6."Whatever that be, now take revenge on his disdainful cruelty to you,"suggested Devadatta.

7. 7."Stop it, O Monk : your words and thoughts are impure,"countered Yeshodhara.

8. 8."Don't you recognize me, Yeshodhara? I am Devadatta who loves you."

9. 9."Devadatta, I knew you to be false and vile. I thought you would make a bad monk, but did not suspect you to be so mean-minded."

10. 10."Yeshodhara, Yeshodhara, I love you"pleaded Devadatta."And your husband shows you nothing but contempt. He has been cruel to you. Love me and revenge his cruelty."

11. 11. Yeshodhara's pale and emaciated face became tinged with a

purple hue. Tears rolled down her cheeks.

12. 12."Devadatta, it is you who are cruel to me. Even if your love were sincere, it would have been an insult to me. You are simply lying when you say you love me.

13. 13."When I was young and pretty you hardly looked at me. Now I am old, broken down by sorrow and anguish, you have come at night to declare your treacherous and guilty love. You are a base coward."

14. 14. And she shouted:"Devadatta, get out from the place,"and Devadatta left the place.

15. 15. Devadatta was very angry with the Buddha who did not make him the chief in the Sangh and instead made Sariputta and Mogallana the chief men in the Sangh. Devadatta made three attempts on the Buddha's life, but did not succeed in any of them.

16. 16. At one time the Blessed One was walking *up* and down in the shade below the hill called the Vultures Peak (Girdhra Kuta).

17. 17. Devadatta climbed it up and hurled down a large stone with the intention of depriving the Blessed One of his life, but it fell upon another rock and there it was entombed; only a splinter falling from it made the foot. of the Blessed One to bleed.

18. 18. A second time he made an attempt to take the life of the Buddha.

19. 19. This time Devadatta went to Prince Ajata-satru and said:"Give me some men."And Ajatasatru, the prince gave orders to his men :*"Whatsoever the worthy Devadatta tells you, do that."*

20. 20. Then to one man Devadatta gave command:"Go, my friend ; the Samana Gautama is staying at such a place. Kill him."And the man returned and said to him :*"I cannot deprive the Blessed One of his life.*

21. 21. He made a third attempt on the life of the Buddha.

22. 22. This time there was at Rajgraha an elephant named Nalagiri, fierce and a man-slayer.

23. 23. And Devadatta went into Rajgraha and to the elephant stables, and said to the elephant keepers :*"I, my friends, am a relative of the raja, and am able to advance a man occupying a low position to a high position, and to order an increase of his rations or of his pay."*

24. 24. Therefore, my friends' when Samana Gautama shall have arrived at this carriage road, then loose the elephant Nalagiri and let him go down the road.

25. 25. Devadatta engaged archers to kill the Buddha. He had also let loose on his way the mad elephant Nalagiri.
26. 26. But he did not succeed. When these attempts became known, Devadatta lost all the public endowments given to him. And even the king (Ajatasatru) stopped giving him interview.
27. 27. For living he had to beg from house to house. Devadatta received many favours from Ajatasatru, which he could not retain long. Devadatta lost all his influence after the Nalagiri incident.
28. 28. By his acts, Devadatta becoming very unpopular in Magadha left it for Kosala, thinking that Prasenjit might receive him cordially. But he was contemptuously driven out by Prasenjit.

§ 7. *Brahmins and the Buddha*

1. 1. Once when the Blessed One was travelling about in the Kosala country with a large company of the monks, he went down to a Brahmin village named Thuna.
2. 2. The Brahmin householders of Thuna heard the news, "The Samana Gautama, they say, has arrived in the field of our village."
3. 3. Now the Brahmin householders were nonbelievers, holding wrong views and avaricious by nature.
4. 4. They said, "If the Samana Gautama should enter this village and stay two or three days, he would convert all these people. Then the Brahmin religion would have no support. We must, therefore, prevent his entry in our village.
5. 5. To reach the village a river had to be crossed and the Brahmins, in order to prevent the Blessed One from entering the village, took the boats away from the landing places, and made the bridges and causeways unusable.
6. 6. They filled all the wells except one with weeds and the like and concealed the watering-places, rest-houses and sheds.
7. 7. The Blessed One learned of their misdeeds and having compassion on them, crossed the river with his company of monks, went on, and in due course of time reached the Brahmin village of Thuna.
8. 8. He left the road and sat down at the foot of a tree. At that moment many women were passing by near the Blessed One carrying water.

9. 9. And in that village an agreement had been made, "If the Samana Gautama comes there, there is to be no welcome or the like made for him and when he comes to a house, neither to him nor to his disciples is any food or water to be given."

10. 10. Then a certain Brahmin's slave girl, going along with a jar of water, saw the Blessed One and the monks, realized that they were weary and thirsty, and being of devout heart, wanted to give them water.

11. 11. "Even and though the people of this village have resolved that nothing at all is to be given to the Samana Gautama and not even a show of respect is to be made," she said to herself, "yet if after I have found these supreme fields of merit and worthy recipients of meritorious giving, I do not lay the foundation for my salvation by a mere giving of water, when hereafter shall I be released from woe?"

12. 12. "So be it, my masters ! Let every one who lives in the village beat or bind me, still I will give a gift of water to a field of merit such as this."

13. 13. When she had made this resolve, though the other women carrying water tried to stop her, without regard for her life, she lifted down the water jar from her head, placed it on one side, approached the Blessed One, and gave him water; he washed his hands and feet and drank the water.

14. 14. Her master, the Brahmin, heard of her giving water to the Blessed One. "She has broken the rule of the village and I am blamed," he said, and burning with rage and grinding his teeth he buried her to the ground and beat her with hands and feet. Because of that she died.

(ii)

1. 1. Now Brahmin Dona visited the Exalted One and greeted him; and after exchanging the customary words of greetings, sat down at one side. So seated, Brahmin Dona said to the Exalted One :

2. 2. "I have heard it said, Master Gotama, that Master Gotama does not salute aged, venerable Brahmins, well stricken in years, long on life's road, grown old—nor rise up for them, nor offer them a seat.

3. 3. "Master Gotama, it is just so; Master Gotama does none of these things . . . to aged, venerable Brahmins . . . This is not right. Master Gotama."

4. 4."Do you not profess to be a brahmin, Dona?"
5. 5."If of anyone. Master Gotama, in speaking rightly it should be said: 'The brahmin is well born on both sides', pure in descent as far back as seven generations, both of mother and father, unchallenged and without reproach in point of birth; studious, carrying the mantras in mind, a past master in the three Vedas with the indices and ritual, in phonology too, and in the legends; an expert in verse and grammar skilled in reading the marks of a great man, in speculation on the universe' to be sure of me, Master Gotama, in speaking rightly that thing should be said; for I, Master Gotama, am so born . . . so skilled . . ."
6. 6."Dona, those Brahmin-sages of old, mantra-makers, mantra-sayers, whose ancient collection of mantra verses, hymns and sayings. Brahmins know every hymn, every say, every word the word, ever have the sayings said to wit: Atthaka, Vamaka, Vamadeva. Vassamitta, Yamadaggi, Angirasa, Bharadvaja, have declared: the Brahma-like, the deva-like, the bounded, the breaker of bounds, and fifthly, the Brahmin outcast, which of them, Dona, are you?"
7. 7."We know not of these five Brahmins, Master Gotama; yet we know that we are Brahmins. It were well for me if Master Gotama would teach me Dhamma so that I may know of them five."
8. 8."Then listen, Brahma, give heed and I will speak !"
9. 9."Yes sir,"replied he; and the Exalted One said:
10. 10."And how, Dona, becomes a Brahmin Brahma-like?"
11. 11."Take the case, Dona, of a Brahmin who is well born on both sides, pure in descent as far back as seven generations, both of mother and father, unchallenged and without reproach in point of birth—he for eight and forty years leads to the Brahma-life of virginity, applying himself to the teacher's fee for teaching according to Dhamma, not non-Dhamma.
12. 12."And what there is Dhamma, Dona? Never as ploughman nor trader nor cowherd nor bowman nor rajah's man nor by any craft (to get his living), but solely by going about for alms, despising not the beggar's bowl.
13. 13."And he hands over the teacher's fee for teaching, has his hair-beard shaved off, dons the yellow robe and goes forth from the home to the homeless life.
14. 14."And thus gone forth, he abides in mind pervading with amity one

world quarter, so a second, a third, a fourth; then above, below, athwart, everywhere, the whole wide world he pervades with thoughts of amity, far-reaching, expansive, measureless, without hatred or ill-will,

15. 15."He abides in mind pervading with pity . . . sympathy . . . poise, one world quarter, so a second, a third, a fourth; then above, below, athwart, every-where, the whole wide world he pervades with thoughts of pity, sympathy and poise, far-reaching, expansive, measureless, without hatred or ill-will.

16. 16."And having made these four Brahma-abidings become, on the breaking up of the body after death, he arises in the well-faring Brahma world. Thus, Dona, Brahmin becomes Brahma-like.

17. 17."And how, Dona, becomes a Brahmin deva-like?

18. 18."Take the case, Dona, of a Brahmin of similar birth and conduct . . . He does not get a living by ploughing and so forth, but by going about for alms. . . . He hands over the teacher's fee for teaching and seeks a wife according to Dhamma, not non-Dhamma.

19. 19."And what then is Dhamma? Not with one bought or sold, but only with a Brahmani on whom water has been poured. And he goes only to a Brahmani, not to the daughter of an outcast, hunter, bamboo-worker, cart-maker, or aboriginal, nor goes to a woman with child, nor to one giving suck, nor to one not in her season.

20. 20."And wherefore, Dona, goes not a Brahmin to one with child? If he go, the boy or girl will surely be foully born, therefore he goes not. And wherefore goes he not to one giving suck? If he go, the boy or girl will surely be an unclean suckling, therefore he goes not.

21. 21."And wherefore goes he not to one not in her season? If, Dona, a Brahmin go to one not in her season, never for him does the Brahmani become a means for lust, for sport, for pleasure; the Brahmani is for the Brahmin just as a means to beget offspring.

22. 22."And when in wedlock he has begot-ten (a child), he has his hair-beard shaved off. . . and goes forth . . .

23. 23."And being thus gone forth, aloof from sensuous appetites . . . he enters and abides in the first (to the) fourth musing . . . he enters and abides in the first (to the) fourth musing.

24. 24."And having made these four musings become, on the breaking up of the body after death, he arises in the well-faring heaven world.

25. 25."Thus, Dona, a Brahmin becomes deva-like.
26. 26."And how, Dona, becomes a Brahmin Brahmin bounded?
27. 27."Take the case, Dona of a Brahmin of similar birth and conduct . . . who weds in like manner...
28. 28."And when in wedlock he has begotten a child, the fondness for children obsesses him and he settles on the family estate, and does not go forth from the home to the homeless life.
29. 30."Thus, Dona, the Brahmin becomes bounded.
30. 31."And how, Dona, becomes a Brahmin'a breaker of bounds?
31. 32."Take the case, Dona, of a Brahmin of similar birth and conduct. . . He hands over the teacher's fee and seeks a wife either according to Dhamma or non-Dhamma: one bought or sold or Brahmani on whom the water-pouring ceremony has been performed.
32. 33."He goes to a Brahmani or to the daughter of a noble or a low-caste man or a serf; to the daughter of an outcast or a hunter or a bamboo-worker or a cart-maker or an aboriginal; he goes to a woman with child, to one giving suck, to one in her season, to one not in her season; and for him the Brahmani becomes just a means for lust, for sport and for pleasure or to beget offspring.
33. 34."And he keeps not within the ancient Brahmin bounds, but transgresses them; and it is said:'He keeps not within bounds but transgresses,' and therefore he is called a breaker of bounds.
34. 35."Thus, Dona, the Brahmin becomes a breaker of bounds.
35. 36."And how, Dona, becomes a Brahmin a Brahmin outcast?
36. 37."Take the case, Dona, of a Brahmin of similar birth, he for eight and forty years leads the Brahma-life of virginity, applying himself to the mantras; then, completing that course, he seeks the teaching fee for teaching; (he gets his living according to Dhamma or non-Dhamma) as ploughman, trader, cowherd, bowman, rajah's man or by some craft or, despising not the beggar's bowl, just by going about for alms.
37. 38."On handing back the teacher's fee, he seeks a wife according to Dhamma or non-Dhamma; one bought or sold, or a Brahmani on whom water has been poured. He goes to a Brahmani or any other woman . . . one with child, giving suck and so forth. . . and she is for him a means for lust . . . or to beget offspring. He leads a life doing all these things.
38. 39."Then the Brahmans say thus of him: 'How is it that an

honourable Brahmin leads this sort of life?'

39. 40."And to this he replies: 'Just as fire burns clean things or unclean, but not by that is the fire defiled ; even so, good sirs, if a Brahmin lead a life doing all these things, not by that is a Brahmin defiled.'

40. 41. And it is said: 'He leads a life doing all these things,' and therefore he is called a Brahmin outcast.

41. 42."Thus, Dona, a Brahmin becomes a Brahmin outcast.

42. 43."Verily, Dona, those Brahmin sages of old, mantra-makers, mantra-sayers, whose ancient collection hymn, say, word each rest . . . these five Brahmins declared; the Brahma-like, the deva-like. the bounded, the breaker of bounds and, fifthly, the Brahmin outcast.

43. 44."Which of them Dona, are you?"

44. 45." If such there are, Master Gotama, we at least do not fulfil (the ways) of the Brahmin-outcast?

45. 46."But it is marvellous what you say, Master Gotama . . . let Master Gotama take me as a lay-disciple, gone to his refuge, henceforth as long as life lasts."

29."In the bounds of the Brahmin of old he stays nor transgresses them; and it is said: 'Within bounds he keeps and transgresses not.' And therefore the Brahmin is called bounded.

PART III : CRITICS OF HIS DOCTRINES

1. 1. Critics of Open Admission to the Sangh.
2. 2. Critics of The Rule of Vows.
3. 3. Critics of the Doctrine of Ahimsa.
4. 4. Charge of Preaching Virtue and Creating Gloom.
5. 5. Critics of the Theory of Soul and Rebirth.
6. 6. Charge of being an Annihilationist.

§ 1. Critics of Open Admission to the Sangh

1. 1. It was open for the Sangh to admit a layman who was merely a disciple.
2. 2. There were persons who criticised the Lord for making the Sangh a wide open temple for anybody to enter.

3. 3. They argued that under such a scheme it may well happen that after they have been admitted into the Order they give it up, and return again to the lower state and by their back-sliding the people are led to say :”Vain must be this religion of Samana Gotama, which these men have given up.”
4. 4. The criticism was not well founded and had altogether missed the intention of the Blessed Lord in making such a scheme.
5. 5. The Blessed Lord replied that in establishing his religion he had constructed a bathing tank full of the excellent waters of emancipation—the bath of good law.
6. 6. It was the Lord's desire that whosoever is polluted with stains of sin, he, bathing in it, can wash away all his sins.
7. 7. And if anyone, having gone to the bathing tank of good law, should not bathe in it, but turn back polluted as before and return again to the lower state, it is he who is to be blamed and not the religion.
8. 8.”Or could I,”said the Blessed Lord,”after constructing this bathing tank for enabling people to wash away their sins, say : ' Let no one who is dirty go down into this tank ! Let only those whose dust and dirt have been washed away, who are purified and stainless go down into the tank.'
9. 9.”On such terms what good would have been my religion?”
10. 10. The critics forgot that the Blessed Lord did not wish to confine the benefit only to a few. He wanted to keep it open to all, to be tried by all.

§ 2. *Critics of the Rule of Vows*

1. 1. Why are the five precepts not enough? Why vows are felt necessary? These were the questions that were often raised,
2. 2. It 'was argued that if diseases would abate without medicine, what could be the advantage -of weakening the body by emetics, by purges, and other like remedies?
3. 3. Just so, if laymen, living at home and enjoying the pleasures of the senses, can realize in themselves the conditions of peace, the Supreme Good, Nibbana, by taking precepts, what is the need of the bhikkhu taking upon himself these vows?
4. 4. The Blessed Lord devised the vows because of the virtues inherent

in them.

5. 5. A life conditioned by vows is certain to bring with it growth in goodness, it is itself a protection against a fall.
6. 6. Those who take vows and keep them as self-dependents, are emancipated.
7. 7. The keeping of vows is the restriction of lust, and of malice, of pride, the cutting of evil thoughts.
8. 8. Those who take vows and keep them, well guarded are they indeed and altogether pure are they in manners and in mind.
9. 9. Not so with mere taking of precepts.
10. 10. In the case of the precepts there is no protection against moral decline as there is in the case of vows.
11. 11. A life of vows is very difficult and a life of precepts not so. It is necessary for mankind to have some who live the life of vows. So the Blessed Lord prescribed both.

§ 3. *Critics of the Doctrine of Ahimsa*

1. 1. There were persons who objected to the doctrine of Ahimsa. They said that it involved surrender or non-resistance to evil.
2. 2. This is a complete misrepresentation of what the Blessed Lord taught by his doctrine of Ahimsa.
3. 3. The Blessed Lord has made his position clear on various occasions so as to leave no room for ambiguity or misunderstanding.
4. 4. The first such occasion to which reference should be made is the occasion when he made a rule regarding the entry of a soldier in the Sangh.
 5. 5. At one time the border provinces of the kingdom of Magadha were agitated. Then the Magadha king Seniya Bimbisara gave order to the Commander of the army: ' Well now, go and ask your officers to search through the border provinces for the offenders, punish them and restore peace.' The Commander acted accordingly.
 6. 6. On hearing the orders of the Commander the officers found themselves placed in a dilemma. They knew that the Tathagatha taught that those who go to war and find delight in fighting, do evil and produce great demerit. On the other hand, here was the king's order to capture the offenders and to kill them. Now what shall we do, asked the officers to

themselves.

6. 7. Then these officers thought: "If we could enter the order of the Buddha we would be able to escape from the dilemma."

7. 8. Thus these officers went to the bhikkhus and asked them for ordination; the bhikkhus conferred on them the pabbajja and upasampada ordinations and the officers disappeared from the army.

8. 9. The Commander of the army finding that the officers were not to be seen, asked the soldiers: "Why, how is it that the officers are nowhere to be seen?" "The officers, lord, have embraced religious life of the bhikkhus," replied the soldiers.

9. 10. Then the Commander of the army was annoyed, and became very angry: "How can the bhikkhus ordain persons in the royal army?"

10. 11. The Commander of the army informed the king of what had happened. And the king asked the officers of justice: "Tell me, my good sirs, what punishment does he deserve who ordains a person in the royal service?"

11. 12. "The Upagghaya, Your Majesty, should be beheaded; to him who recites (the Kammavaka), the tongue should be torn out; to those who form the chapter, half of their ribs should be broken."

12. 13. Then the king went to the place where the Blessed One was; and after obeisance informed him of what had happened.

13. 14. "The Lord well knows that there are kings who are against the Dhamma. These hostile kings are ever ready to harass the bhikkhus even for trifling reasons. It is impossible to imagine the lengths to which they might go in their ill-treatment of the bhikkhus if they find that the bhikkhus are seducing the soldiers to leave the army and join the Sangh. Pray Lord to do the needful to avert the disaster."

14. 15. The Lord replied: "It was never my intention to allow soldiers under the cloak of Ahimsa or in the name of Ahimsa to abandon their duty to the king or to their country."

15. 16. Accordingly the Blessed One made a rule against the admission of persons in royal service to the Sangh and proclaimed it to the bhikkhus, saying: "Let no one, O Bhikkhus, who is in the royal service, receive the Pabbajja ordination. He who confers the Pabbajja ordination on such a person will be guilty of a dukkata offence."

16. 17. A second time the Blessed One was cross-examined on the subject

of Ahimsa by Sinha, a General in the army, and who was a follower of Mahavir.

17. 18. Sinha asked: "One doubt still lurks in my mind concerning the doctrine of the Blessed One. Will the Blessed One consent to clear the cloud away so that I may understand the Dhamma as the Blessed One teaches it."

18. 19. The Tathagata having given his consent, Sinha said: "I am a soldier, O Blessed One, and am appointed by the king to enforce his laws and to wage his wars. Does the Tathagata, who teaches kindness without end and compassion with all sufferers, permit the punishment of the criminal? And further, does the Tathagata declare that it is wrong to go to war for the protection of our homes, our wives, our children, and our property? Does the Tathagata teach the doctrine of a complete self-surrender, so that I should suffer the evil-doer to do what he pleases and yield submissively to him who threatens to take by violence what is my own? Does the Tathagata maintain that all strifes, including such warfare as is waged for a righteous cause, should be forbidden?"

19. 20. The Lord replied: "The Tathagata says: 'He who deserves punishment must be punished, and he who is worthy of favour must be favoured. Yet at the same time he teaches to do no injury to any living being but to be full of love and kindness. These injunctions are not contradictory, for whosoever must be punished for the crimes which he has committed suffers his injury not through the ill-will of the judge but on account of his evil-doing. His own acts have brought upon him the injury that the executor of the law inflicts. When a magistrate punishes, let him not harbour hatred in his breast, yet a murderer, when put to death, should consider that this is the fruit of his own act. As soon as he will understand that the punishment will purify his soul, he will no longer lament his fate but rejoice at it.'"

20. 21. A proper understanding of these instances would show that the Ahimsa taught by the Blessed Lord was fundamental. But it was not absolute.

21. 22. He taught that evil should be cured by the return of good. But he never preached that evil should be allowed to overpower good.

22. 23. He stood for Ahimsa. He denounced Hirnsa. But he did not deny that Hirnsa may be the last resort to save good being destroyed by evil.

23. 24. Thus it is not that the Blessed Lord taught a dangerous doctrine. It is the critics who failed to understand its significance and its scope.

§ 4. *Charge of Preaching Virtue and Creating Gloom*

(i)

Dukkha as the Cause of Gloom

1. 1. Dukkha in its original sense given to it by Kapila means unrest, commotion.
2. 2. Initially it had a metaphysical meaning.
3. 3. Later on it acquired the meaning of suffering arid sorrow
4. 4. The two senses were not far detached. They were very close.
5. 5. Unrest brings sorrow and suffering.
6. 6. Soon it acquired the meaning of sorrow and suffering from social and economic causes.
7. 7. In what sense did the Buddha use the word sorrow and suffering?
8. 8. There is a sermon on record from which it is clear that the Buddha was very much aware that poverty was a cause of sorrow.
9. 9. In that sermon he says—"Monks, is poverty a woeful thing for a worldly wanton?"
10. 10."Surely, Lord."
11. 11."And when a man is poor, needy, in straits, he gets into debt, and is that woeful too?"
12. 12."Surely, Lord."
13. 13."And when he gets into debt, he borrows, and is that woeful too?"
14. 14."Surely, Lord."
15. 15."And when the bill falls due, he pays not and they press him; is that woeful too?"
16. 16."Surely, Lord."
17. 17."And when pressed, he pays not and they beset him ; is that woeful too?"
18. 18."Surely, Lord."
19. 19."And when beset, he pays not and they bind him; is that woeful too?"

20. 20. "Surely, Lord."
21. 21. "Thus, monks, poverty, debt, borrowing, being pressed, beset and bound are all woes for the worldly wanton.
22. 22. "Woeful in the world is poverty and debt."
23. 23. Thus the Buddha's conception of Dukkha is material.

(2) *Impermanence as the Cause of Gloom*

1. 1. Another ground for this accusation arises from the doctrine that everything which is compound is impermanent.
2. 2. Nobody questions the truth of the doctrine.
3. 3. Everything is impermanent is admitted by all.
4. 4. The doctrine, if it is true, must be told just as truth must be told however unpleasant it may be.
5. 5. But why draw a pessimistic conclusion?
6. 6. If life is short it is short and one need not be gloomy about it.
7. 7. It is just a matter of interpretation.
8. 8. The Burmese interpretation is very much different.
9. 9. The Burmese celebrate the event of death in a family as though it was an event of joy.
10. 10. On the day of death the householder gives a public feast and the people remove the dead body to the graveyard dancing. Nobody minds the death for it was to come.
11. 11. If impermanence is pessimistic it is only because permanence was assumed to be true although it was a false one.
12. 12. Buddha's preaching cannot, therefore, be charged as spreading gloom.

(3) *Is Buddhism Pessimistic?*

1. 1. The Buddha's Dhamma has been accused of creating pessimism.
2. 2. The accusation arises from the first Aryan Truth which says that there is Dukkha (sorrow-misery) in the world.
3. 3. It is rather surprising that a reference to Dukkha should give cause to such an accusation.
4. 4. Karl Marx also said that there is exploitation in the world and the

rich are being made richer and the poor are being made poorer.

5. 5. And yet nobody has said that Karl Marx's doctrine is pessimism.

6. 6. Whythen should a different attitude be shown to the Buddha's doctrine?

7. 7. It may be because the Buddha is reported to have said in his first sermon. Birth is sorrowful, old age is sorrowful, death is sorrowful, that a deeper pessimistic colouring has been given to his Dhamma.

8. 8. But those who know rhetoric know that this is an artifice of exaggeration and that it is practised by skilled literary hands to produce effect.

9. 9. That birth is sorrowful is an exaggeration by the Buddha can be proved by reference to a sermon of his in which he has preached that birth as a human being is a very precious thing.

10. 10. Again, if the Buddha had merely referred to Dukkha such an accusation could be sustainable.

11. 11. But the Buddha's second Aryan Truth emphasises that this Dukkha must be removed. In order to emphasise the duty of removal of Dukkha he spoke of the existence of Dukkha.

12. 12. To the removal of Dukkha the Buddha attached great importance. It is because he found that Kapila merely stated that there was Dukkha and said nothing more about it that he felt dissatisfied and left the Ashram of Muni Alara Kalam.

13. 13. How can this Dhamma be called pessimistic.?

14. 14. Surely a teacher who is anxious to remove Dukkha cannot be charged with pessimism. § 5. *Critics of the Theory of Soul and Rebirth*

1. 1. The Blessed Lord preached that there was no Soul. The Blessed Lord also affirmed that there was rebirth.

2. 2. There were not wanting people who criticised the Lord for preaching what they regarded as two such contradictory doctrines.

3. 3. How can there be rebirth if there is no Soul, they asked.

4. 4. There is no contradiction. There can be rebirth even though there is no Soul.

5. 5. There is a mango stone. The stone gives rise to a mango tree. The mango tree produces mangoes.

6. 6. Here is rebirth of a mango.

7. 7. But there is no Soul.
8. 8. So there can be rebirth although there is no Soul.

§ 6. *Charge of Being an Annihilationist*

1. 1. Once when the Lord was staying at Shravasti in Jeta's grove it was reported to him that a certain bhikkhu by name Arittha had come to certain views about the doctrines taught by the Lord, as the views of the Lord although they were not the views of the Lord.
2. 2. One of the doctrines about which Arittha was misrepresenting the Lord was whether he was an annihilationist.
3. 3. The Blessed Lord sent for Arittha. Arittha came. On being questioned he sat silent and glum.
4. 4. The Lord then said to him :”Some recluses and Brahmins— wrongly, erroneously and falsely— charge me in defiance of facts, with being an annihilationist and with preaching disintegration, and extirpation of existing creatures.
5. 5. It is just what I am not and what I do not affirm.
6. 6. What I have consistently preached both in the past and today is the existence of ill and the ending of ill.

PART IV : FRIENDS AND ADMIRERS

1. 1. Devotion of Dhananjanani—a Brahmini.
2. 2. The Abiding Faith of Visakha.
3. 3. The Devotion of Mallika.
4. 4. The ardent Wish of a Pregnant Mother.
5. 5. Keniya's Welcome.
6. 6. Pasendi in Praise of the Master.

§ 1. *Devotion of Dhananjanani—a Brahmini*

1. 1. The Blessed Lord had many friends and admirers. Among them was Dhananjanani.
2. 2. She was the wife of a Bharadvaja Brahmin. Her husband hated the Lord. But Dhananjanani was a devotee of the Lord. Her devotion is worthy of mention.

3. 3. The Exalted One was once staying near Rajagraha in the bamboo grove at the Vihara known as the squirrels' feeding ground.

4. 4. Now at that time Dhananjanani, a Brahmini, the wife of a certain Brahmin of the Bharadvaja family, was living with her husband in Rajagraha.

5. 5. While her husband was a great opponent of the Buddha, Dhananjanani was a fervent believer in the Buddha, the Dhamma and the Order. She was in the habit of praising, the triple gem. Whenever she broke out in this way in praise, her husband used to close his ears.

6. 6. On the eve of his giving a great banquet to many fellow-Brahmins, he begged her to do what she liked, provided she did not offend his guests by her praises of the Buddha.

7. 7. Dhananjanani would give no such undertaking and he threatened to slice her like a plantain with his dagger. She declared herself ready to suffer, so -she retained her freedom of speech and proceeded to pour forth five hundred verses on her theme, so that he surrendered unconditionally.

8. 8. Bowl and golden spoon were laid down and the guests sat down for food. While serving the guests the dominant impulse arose. In the midst she turned towards the bamboo grove and uttered the praises of the triple gem.

9. 9. The scandalized guests hurried away, spitting out the food defiled by the presence of a heretic and the husband scolded her amid the ruins of his feast.

10. 10. And she, while serving the Bharadvaja with his dinner, came before him and praised the gem. Glory to that Exalted One, the Arahant, the Buddha Supreme! Glory to the Norm ! Glory to the Order!

11. 11. And when she had so said the Bharadvaja Brahmin grew angry and exclaimed:”There now ! You wretch! Must you be singing the praises of that shaveling friar at any and every opportunity? Now, wretch, will I give that teacher of thine a piece of my mind!”

12. 12.”O Brahmin,”replied Dhananjanani,”I know of no one throughout the world of gods, Maras, or Brahmas, recluses or brahmins, no one human or divine, who could so admonish that Exalted One, Arahant, Buddha Supreme. Nevertheless, go thou, Brahmin, and then thou wilt know.”

13. 13. Then the Bharadvaja, vexed and displeased, went to find the Exalted One; and coming into his presence, exchanged with him greetings

and compliments, friendly and courteous, and sat down at one side.

14. 14. So seated, he asked the Exalted One the following questions :”What must we slay if we would happy live? What must we slay if we could weep no more? What is above all other things, whereof the slaughter thou approvest, Gotama?”

15. 15. The Exalted One replied as follows:”Wrath must ye slay if ye would happy live ; Wrath must ye slay if ye would weep no mor.e. Of anger. Brahmin, with its poisoned source, and fevered climax, murder-ously sweet. That is the slaughter by the Ariyans praised. That must ye slay in sooth, to weep no more.”

16. 16. Realising the excellence of the reply given by the Exalted One, the Bharadvaja Brahmin said to him:”Most excellent. Lord, most excellent! Just as if a man were to set up that which had been thrown down, or were to reveal that which was hidden away, or were to point out the right road to him who had gone astray, or were to bring a lamp into the darkness, so that those who had eyes could see external objects—even so. Lord, has the Lord Gotama shown me his doctrine in various ways. I, even I, Lord, betake myself to the Exalted One as my refuge to the Norm and to the Order. I would leave the world under the rule of Gotama; I would take orders.”

17. 17. So Dhananjanani was not only a devotee of the Buddha, she made her husband also a devotee of the Buddha.

§ 2. *The Abiding Faith of Visakha*

1. 1. Visakha was born in the city of Bhadiya in the Anga country.

2. 2. Her father was Dhananjaya and her mother's name was Sumana.

3. 3. Once the Buddha visited Bhadiya with a large company of monks at the invitation of the Brahmin Sela. Visakha his granddaughter was then seven years old.

4. 4. Visakha though only seven expressed to her grandfather Mendaka her desire to see the Buddha. Mendaka allowed her to do so and gave her five hundred companions, five hundred slaves, and five hundred chariots, that she might visit the Buddha.

5. 5. She stopped the chariot some distance away and approached the Buddha on foot.

6. 6. He preached to her the Dhamma and she became his lay disciple.
7. 7. For the next fortnight Mendaka invited the Buddha and his followers daily to his house, where he fed them,.
8. 8. Later, when at Pasendi's request, Bimbisara sent Dhananjaya to live in Kosala, Visakha accompanied her parents and lived in Saketa.
9. 9. Migara, a wealthy citizen of Shravasti, wanted to get his son Punnavadhana married. He had sent a few people to find a suitable bride.
10. 10. The party in search of a bride happened to come to Shravasti. They saw Visakha on her way to the lake to bathe on a feast day.
11. 11. At that moment there was a great shower. Visakha's companions ran for shelter. But Visakha did not. She walked at her usual pace and reached the spot where the messengers were.
12. 12. They asked her why she did not run for shelter and so preserve her clothes. She answered that she had plenty of clothes, but that if she ran she might damage a limb which she could not replace."Unmarried girls,"she said,"are like goods awaiting sale, they must not be disfigured."
13. 13. The party which was already struck by her beauty was greatly impressed by her intelligence. The party offered her a bouquet of flowers which she accepted as a proposal of marriage.
14. 14. After Visakha returned home the marriage party followed her and laid Punnavadhana's suit before Dhananjaya. The proposal was accepted and confirmed by an exchange of letters.
15. 15. When Pasendi heard of it, he offered to accompany Punnavadhana to Saketa, as a mark of signal honour. Dhananjaya welcomed the king and his retinue, Migara, Punnavadhana and their followers with all regard, attending personally to all the details of hospitality.
16. 16. Five hundred goldsmiths were engaged to make ornaments for the bride. Dhananjaya gave his daughter, as dowry, five hundred carts full of money, five hundred with vessels of gold and cattle, etc.
17. 17. When the time came for Visakha to leave, Dhananjaya gave her ten admonitions, which Migara overheard from the next room. These admonitions were: Not to give fire from the house outside: not to take into the house fire from without; to give only to those who gave in return, not to give to those who did not give in return, to give him that gives and to him that gives not; to seat, eat and eat happily; and to tend the fire and to

honour the household deities.

18. 18. On the following day Dhananjaya appointed eight householders to be sponsors to his daughter and inquire into any charges that might be brought against her.

19. 19. Migara wanted that his daughter-in-law should be seen by the public of Shravasti. Visakha entered Shravasti standing in her chariot with the public lining the road on both sides. The public showered gifts on her, but these she distributed among the people.

20. 20. Migara was a follower of the Niganthas and soon after Visakha's arrival in his house, he sent for them and told her to minister to them. But Visakha repulsed by their nudity, refused to pay them homage.

21. 21. The Niganthas urged that she should be sent away, but Migara bided his time.

22. 22. One day as Migara was eating, while Visakha stood fanning him, a monk was seen standing outside the house. Visakha stood aside that Migara might see him. But Migara continued to eat without noticing the monk.

23. 23. Seeing this Visakha said to the monk, "Pass on, sir, my father-in-law eats stale fare." Migara was angry and threatened to send her away, but at her request the matter was referred to her sponsors.

24. 24. They inquired into the several charges brought against her and adjudged her not guilty.

25. 25. Visakha then gave orders that preparations be made for her return to her parents. Both Migara and his wife begged for forgiveness which she granted, on condition that he would invite to the house the Buddha and his monks.

26. 26. This he did, but, owing to the influence of the Niganthas, he left Visakha to entertain them, and only consented to hear the Buddha's sermon at the end of the meal from behind a curtain.

27. 27. He was, however, so convinced by the sermon that he became a convert.

28. 28. His gratitude towards Visakha was boundless. Henceforth he considered her to be his mother deserving all the honours due to a mother. From this time onward she was called Migarmata.

29. 29. Such was the abiding faith of Visakha.

§ 3. *The Devotion of Mallika*

1. Once while the Lord was staying at Shravasti in Jeta's grove the darling son of a certain householder died, and the loss made the father neglect his business and his meals.

2. He was always going to the charnel ground and wailing aloud saying, "Where are you, my son, where are you?"

2. 3. The bereaved father came to the Blessed **Lord** and after due salutations sat on one side.

3. 4. Seeing that his mind was absolutely vacant showing no interest in anything, not telling the purpose for which he had come, the Blessed Lord, noticing his condition, said "You are not yourself ; your mind is all awry."

4. 5. "How could my mind not be awry, sir, when I have lost my darling and only son?"

5. 6. "Yes, householder; our dear ones bring sorrow and lamentation, pain, suffering and tribulation?"

6. 7. "Who sir can entertain such a view?", said the angry householder, "Nay, our dear ones are a joy and happiness to us."

7. 8. And with these words the householder, rejecting the Lord's pronouncement, indignantly got up and departed.

8. 9. Hard by, there were a number of gamblers having a game with dice; and to them came the householder with his story of how he had related his sorrows to the recluse Gotama, how he had been received and how he had indignantly departed.

9. 10. You were quite right, said the gamblers, for our dear ones are a source of joy and happiness to us. So the householder felt he had got the gamblers on his side.

10. 11. Now all this, in due course, penetrated to the private apartments of the palace where the king told Queen Mallika that her recluse Gotama had stated that dear ones bring sorrow and lamentation, pain, suffering and tribulation.

11. 12. "Well, sir, if the Lord said so, so it *is*"

12. 13. "Just as a pupil accepts all his master tells him, saying, 'So it *is*, sir; so it is'—just in the same way Mallika, you accept all the recluse Gotama says with your ' If the Lord said so, so it is'; away with you and begone!"

13. 14. Then the queen told the Brahmin Nali Dhyana to go to the Lord

and in her name, to bow his head at the Lord's feet and, after asking after his health, to enquire whether he had really said what was attributed to him.

14. 15."And be careful,"she added,"to tell me exactly what the Lord answers."

15. 16. In obedience to the queen's commands the Brahmin went off and duly asked the Lord whether he had really said so.

16. 17."Yes, Brahmin; our dear ones do bring sorrow and lamentation, pain, suffering, and tribulation. Here is the proof.

17. 18."Once, here in Shravasti, a woman's mother died and the daughter, crazed and beside herself, went about from street to street, from cross-road to crossroad, saying: 'Have you seen my mother? Have you seen my mother?'

18. 19."Another proof is a woman of Shravasti who lost her father—a brother—a sister—a son—a daughter—a husband. Crazed and beside herself, the woman went about from street to street and from cross-road to cross-road, asking if anyone had seen the dear ones she had lost.

19. 20."Another proof is a man of Shravasti who lost his mother—his father—a brother—a sister—a son—a daughter—a wife, crazed and beside himself, the man went about from street to street and from crossroad to cross-road, asking if anyone had seen the dear ones he had lost.

20. 21."Another proof is the woman of Shravasti who visited her people's home; and they wanted to take her from her husband and marry her to someone else whom she did not like.

21. 22."She told her husband about it, whereupon he cut her into two and then killed himself, so that they might both die together.

22. 23."All this the Brahmin Nali Dhyam duly reported to the queen.

23. 24."The queen then went to the king and asked: * Are you fond, sir, of your only daughter, the princess Vajira.' ' Yes, I am,' replied the king.

24. 25." ' If anything happened to your Vajira would you feel sorry or not?' 'If anything happened to her, it would make a great difference to my life.'"

25. 26." ' Are you fond, sir, of me, ' asked Mallika.'Yes,I am.'

26. 27." ' If anything happened to me would you feel sorry or would you not?' ' If anything happened to you it would make a great difference to my life.'

27. 28.” Are you fond, sir, of the people of Kasi and Kosala?’ ‘Yes,’ replied the king. ‘If anything happened to them would you be sorry or not?’
 28. 29.” If anything happened to them, it would make great difference—how could it be otherwise?’
 29. 30.” Did the Blessed Lord say anything different?’ ‘No Mallika,’ said the king in repentance.”§ 4. *The Ardent Wish of a Pregnant Mother*

1. 1. Once when the Lord was staying in the Bhagga country at Sumsumara-gira in the Bhesakala grove, in the deer-park there. Prince Bodhi's palace, called the Lotus, had just been finished but had not as yet been inhabited by recluse, Brahmin or any other person.
2. 2. Said the prince to a young Brahmin named Sankika-putta:”Go to the Lord and in my name bow your head at his feet, ask after his health and invite him to be so good as to take his meal with me tomorrow and to bring his confraternity with him.”
3. 3. The message was delivered to the Lord who, by silence, signified acceptance—as was duly reported to the prince.
4. 4. When night had passed, the prince, having ordered an excellent meal to be got ready in his palace and a carpeting of white doth to *be* laid to the foot of the stairs of the Lotus palace, told the young Brahmin to announce to the Lord that all was ready.
5. 5. This was done, and early that day the Lord, duly robed and bowl in hand, came to the palace where the prince was awaiting him, outside the portals.
6. 6. Seeing the Lord approaching, the prince advanced and saluted him and moved in his train towards the palace.
7. 7. At the foot of the stairs the Lord stood still. Said the prince:”I beg the Lord to step up on the carpeting; I beg the Blessed One to do this,—to my abiding weal and welfare.”But the Lord kept silent.
8. 8. A second time did the prince appeal, and still the Lord kept silent. A third time he appealed, and now the Lord looked towards Ananda.
9. 9. Ananda understood what the trouble was and asked that the carpeting should be rolled up and removed for the Lord would not tread upon it as he is looking to those that shall follow hereafter.
10. 10. So the prince ordered the carpeting to be rolled up and removed, after which he ordered seats to be set out upstairs in the palace.

11. 11. The Lord then proceeding upstairs, sat down on the seat set for him, with the confraternity.
12. 12. The prince with his own hand served that excellent meal without stint to the Lord and the confraternity.
13. 13. The Lord's meal over and done. Prince Bodhi, seating himself on a low seat to one side, said to the Lord: "My view, sir, is that true weal must be sought not through things pleasant but through things unpleasant."
14. 14. "In days gone by. Prince," said the Blessed One, "I too held the same view in the days before my enlightenment. Time was when being quite young—with a wealth of coal-black hair and in all the beauty of my early prime—despite the wishes of my parents who wept and lamented, I cut off hair and beard, donned the yellow robes and went forth from home to homelessness as a pilgrim. A pilgrim now, in quest of the Good and in search for the road to that utter peace which is beyond all compare.
15. 15. "Now I hold a different view. If a man knows the Doctrine he will find the destruction of all ills."
16. 16. Said the prince to the Lord: "What a doctrine! What an exposition of doctrine! It is so easy to understand."
17. 17. Here the young Brahmin Sankika-putta observed to the prince that, though he had testified thus, yet he had not gone on to say that he sought as a refuge the Lord and his doctrine and his confraternity as he should have.
18. 18. "Say not so, my friend; say not so" said the Prince: "for, I have heard from the lips of my lady mother, how, when once the Lord was staying at Kosambi in the Ghosita pleasance, she, being then pregnant, came to the Lord, saluted him and took a seat to one side, saying: 'Be it a boy or be it a girl that I carry in my womb, my child unborn seeks refuge with the Lord and his doctrine and his confraternity; and I ask the Lord to accept the child as a follower who has found an abiding refuge from this time forth while life lasts.'
19. 19. "Another time, when the Lord was staying here in this Bhagga country at Sumsumara-gira, in the Bhesakala grove, in the deer park there, my nurse carried me to the Lord, and standing before him, said: 'Here is Prince Bodhi who seeks refuge with the Lord and his doctrine and his confraternity.'
20. 20. Now, in person, for the third time I seek such refuge and ask the

Lord to accept me as a follower who has found an abiding refuge while life lasts.”

§ 5. *Keniya's Welcome*

1. 1. There was living at Apanath a Brahmin, Sola, who was versed in all three Vedas, was accomplished in ritual with the glosses thereon, in phonology, and in etymology, with chronicles as a fifth branch; he knew exegesis, and was learned in casuistry and in the signs that mark a superman; he had three hundred young brahmins to whom he taught the runes.

2. 2. Keniya the fire-worshipper was an adherent of this Brahmin Sela. Accompanied by his three hundred pupils, Sela went and saw all the fire-worshippers there busy with their several tasks, with Keniya himself marking off the reserved circles.

3. 3. At the sight of this the Brahmin said to Keniya:”What is all this? Is it a wedding feast? Or is there a great sacrifice afoot? Or have you invited to a repast tomorrow Seniya Bimbisara, king of Magadha, with all his host?”

4. 4.”It is no wedding feast, Sela, nor is the king coming with all his host. But I have got a great sacrifice afoot. For, the recluse Gotama has arrived at Apana, in the course of an alms-pilgrimage, with twelve hundred and fifty alms-men in his train.

5. 5.”Now, such, according to report, is the high repute of this Gotama that he is deemed to be the Lord of Enlightenment.

6. 6.”It is he whom I have invited to tomorrow's meal here, together with his confraternity. The feast that is being prepared is for him.”

7. 7.”Did you attribute to him Enlightenment, Keniya,”asked Sela.”Yes, I did,”replied Keniya.”Did you?””Yes I did”

§ 6. *Pasendi In Praise of the Master*

1. 1. Once the Exalted One was staying near Shravasti, at Jeta's grove, in Anathapindika's park.

2. 2. Now at that time the rajah of Kosala, Pasendi, had just returned from a sham-fight, in which he was victorious, having carried out his

object. And on reaching the park he turned in that way. So far as the cart-road went he rode in his chariot, and then got down and went on foot through the park.

3. 3. On that occasion a number of the brethren were walking up and down in the open air. Then Pasendi, the rajah of Kosala, went up to those brethren and thus accosted them: "Reverend sirs, where now is the Exalted One staying, that Arahant, Buddha Supreme: for Hong to behold Him?"

4. 4. "Yonder, Maharajah, is his lodging, and the door is shut. Do you go up quietly, without nervousness, enter the verandah, cough, and rattle the door-bar.. The Exalted One will open the door to you."

5. 5. So Pasendi, the rajah of Kosala, went up to the lodging as he was told, coughed and rattled the door-bar. And the Exalted One opened the door.

6. 6. Then Pasendi entered the lodging, fell with his head at the feet of the Exalted One, kissed His feet and stroked them with his hands, and announced his name, saying, "Lord, I am Pasendi, the rajah of Kosala."

7. 8. "But, Maharajah, seeing what significance therein, do you show me this profound humanity and pay such affectionate obeisance to this body," said the Lord !

BOOK VII The Wanderer's Last Journey

Part. I—The Meeting of those Near and Dear.

Part II—Leaving Vaishali.

Part III—His End.

PART I : THE MEETING OF THOSE NEAR AND DEAR

1. The Centres of His Preachings.

1. 2. The Places **He** Visited.

2. 3. Last Meeting between Mother and Son and between Wife and Husband.

4. Last Meeting between Father and Son.

5. Last Meeting between the Buddha and Sariputta.

§1. *The Centres of His Preachings*

1. 1. It is not that after the appointment of the missionaries the Lord sat at one place. He too continued to be his own missionary.
2. 2. The Lord seems to have made certain places chief centres of his missionary work.
3. 3. Of such centres, the chief were Shravasti and Rajagraha.
4. 4. He visited Shravasti about 75 times and Rajagraha about 24 times.
5. 5. Certain other places were made minor centres.
6. 6. They were Kapilavastu, which he visited 6 times, Vesali which he visited 6 times, and Kamas-sadhamma, 4 times.

§ 2. *The Places He Visited*

1. 1. Besides these main and minor centres the Blessed Lord visited many other places during the course of his missionary tour.
2. 2. He visited Ukkatha, Nadika, Sal, Assapura, Ghoshitaram, Nalanda, Appana, Etuma.
3. 3. He visited Opasad, Iccha-naukal, Chandal Kuppaa, Kushinara.
4. 4. He visited Devadaha, Pava, Ambasanda, Setavya, Anupiya and Ugunma.
5. 5. The names of the places he visited show that he travelled over the Sakya Desa, the Kuru Desa and Anga Desa.
6. 6. Roughly speaking, he travelled over the whole of Northern India.
7. 7. These appear to be a few places. But what distance do they cover? Rajagraha from Lumbini is not less than 250 miles. This just gives an idea of distances.
8. 8. These distances the Lord walked on foot. He did not even use a bullock-cart.
9. 9. In his wanderings he had no place to stay until later on when his lay disciples built Viharas and resting places which he and his Bhikkhus used as halts on their journeys. Most often he lived under **vii** the shade of

wayside trees.

10. 10. He went from place to place, sometimes from village to village, resolving the doubts and difficulties of those who were willing to accept his message, controverting the arguments of those who were his opponents and preaching his gospel to those who like children came to him for guidance.

11. 11. The Blessed Lord knew that all those who came to listen to him were not all of them intelligent, not all of them came with an open and a free mind.

12. 12. He had even warned the brethren that there were three sorts of listeners.

13. 13. The empty-head, the fool who cannot see,— though oft and oft, unto the brethren going, he hears their talk, beginning, middle, end,—but can never grasp it. Wisdom is not his.

14. 14. Better than he the man of scattered brains, who oft and oft, unto the brethren going, hears all their talk, beginning, middle, end, and seated there can grasp the very words, yet, rising, nought retains. Blank is his mind.

15. 15. Better than these the man of wisdom wide. He, oft and oft unto the brethren going, hears all their talk, beginning, middle, end, and seated there, can grasp the very words, bears all in mind, steadfast, unwavering, skilled in the Norm and what conforms thereto.

16. 16. Notwithstanding this, the Lord was never tired of going from place to place preaching his gospel.

17. 17. As a bhikkhu the Lord never had more than three pieces of clothes. He lived on one meal a day and he begged his food from door to door every morning.

18. 18. His mission was the hardest task assigned to any human being. He discharged it so cheerfully.

§ 3. Last Meeting between Mother and Son and between Wife and Husband

1. 1. Before their death Mahaprajapati and Yesho-dhara met the Blessed Lord,

2. 2. It was probably their last meeting with him.

3. 3. Mahaprajapati went and first worshipped him.
4. 4. She thanked him for having given her the happiness of the good doctrine, for her having been spiritually born through him: for the doctrine having grown in her through him; for her having suckled him, drinking the Dhamma-milk of him; for her having plunged in and crossed over the ocean of becoming through him—what a glorious thing it has been to be known as the mother of the Buddha ! 5. And then she uttered her plea:—
”I desire to die finally having put away this corpse. O sorrow-ender, permit me.”
5. 6. Yeshodhara, addressing the Blessed Lord, said that she was in her seventy-eighth year. The Blessed Lord replied that he was in his eighties.
6. 7. She told him that she was to die that very night. Her tone was more self-reliant than that of Mahaprajapati. She did not ask his permission to die nor did she go to him to seek him as her refuge.
7. 8. On the contrary, she said to him (*me saranam atthano*), ”I am my own refuge.”
8. 9. She had conquered all the cankers in her life.
9. 10. She came to thank him because it was he who had shown her the way and given her the power.

§ 4. *Last Meeting between Father and Son*

1. 1. Once when the Lord was staying at Raja-graha in the bamboo grove Rahula was staying at Ambalathika.
2. 2. The Blessed One arising towards eventide from his meditation went over to Rahula, who seeing the Lord some way off, set a seat for him and water to wash his feet.
3. 3. Seating himself on the seat set for him, the Lord poured water over his feet while Rahula, after salutations, took his seat to one side.
4. 4. Addressing Rahula, the Blessed Lord said ”He who does not shrink from deliberate lying has not—say I—left undone any evil thing which he could. Therefore, you must school yourself never to tell a lie even in jest.
5. 5.”In the same way you must reflect and again in doing every act, in speaking every word and in thinking every thought.
6. 6.”When you want to do anything you must reflect whether it would conduce to your or others' harm or to both, and so is a wrong act

productive of woe and ripening into woe. If reflection tells you that this is the nature of that contemplated act, you should not do it.

7. 7."But if reflection assures you there is no harm but good in it, then you may do it.

8. 8."Grow in loving kindness; for as you do so malevolence will pass away.

9. 9."Grow in compassion; for as you do so vexation will pass away.

10. 10."Grow in gladness over others' welfare; for as you do so aversions will pass away.

11. 11."Grow in poised equanimity; for as you do so all repugnance will pass away.

12. 12."Grow in contemplation of the body's corruption; for as you do so passion will pass away.

13. 13."Grow in perception of the fleeting nature of things; for as you do so the pride of self will fall away."

14. 14. Thus spoke the Lord. Glad at heart, Rahula rejoiced in what the Lord had said.

§ 5. *Last Meeting between the Buddha and Sariputta*

1. 1. The Blessed Lord was staying in Shravasti in the Jetavana in the Gaudhakuti Vihar.

2. 2. Sariputta arrived there with a company of five hundred brethren.

3. 3. After saluting the Blessed One Sariputta told him that the last day of his life on earth had arrived. Will the Blessed Lord be pleased to permit him to give up his mortal coils?

4. 4. The Blessed Lord asked Sariputta if he had selected any place for his parinibbana.

5. 5. Sariputta told the Blessed One,"I was born in the village Nalaka in Magadha. The house in which I was born still stands. I have chosen my home for my parinibbana."

6. 6. The Lord replied,"Dear Sariputta! Do what pleases you."

7. 7. Sariputta fell on the feet of the Blessed Lord and said,"I have practised the paramitas for one thousand Kalpas with only one wish, to have the honour of falling on your feet. I have achieved that end and there is no end to my happiness."

8. 8. "We do not believe in rebirth. Therefore this is our last meeting. Let the Lord forgive me my faults. My last day has come."

9. 9."Sariputta! There is nothing to forgive,"said the Lord.

10. 10. When Sariputta rose to go, the Lord in his honour got up and stood up on the verandah of the Gauohakuti Vihar.

11. 11. Then Sariputta said to the Blessed Lord,"I was happy when I saw you first. I am happy to see you now. I know this is the last *darshan* of you I am having. I shall not have your *darshan* again."

12. 12. Joining together the palms of his hand he walked away without showing his back to the Blessed Lord.

13. 13. Then the Blessed Lord said to the assembled brethren—"Follow your Elder Brother,"and the assembly for the first time left the Blessed Lord and went after Sariputta.

14. 14. Sariputta on reaching his village died in his home in the very room in which he was born.

15. 15. He was cremated and his ashes were taken to the Blessed Lord.

16. On receiving the ashes the Blessed Lord said to the brethren-"He was the wisest, he had no acquisitive instinct, he was energetic and industrious, he hated sin, ye brethren see

his ashes. He was as strong as the earth in his forgiveness, he never allowed anger to enter his mind, he was never controlled by any desire, he had conquered all his passions, he was full of sympathy, fellowship and love."

16. 17. About that time Mahamogallan was then living in a solitary Vihar near Rajagraha. He was murdered by some assassins employed by the enemies of the Blessed Lord.

17. 18. The sad news of his end was conveyed to the Blessed One. Sariputta and Mahamogallan were his two chief disciples. They were called Dharma-Senapati —Defenders of the Faith. The Blessed Lord depended upon them to continue the spread of his gospel.

18. 19. The Blessed Lord was deeply affected by their death in his lifetime.

19. 20. He did not like to stay in Shravasti and to relieve his mind he decided to move on.

PART II : LEAVING VAISHALI

1. 1. Farewell to Vesali.
2. 2. Halt at Pava.
3. 3. Arrival at Klishinara.

§ 1. *Farewell to Vesali*

1. 1. Before he set on his last journey the Blessed Lord was staying at Rajagraha on the Vulture's Peak.
2. 2. After staying there for some time he said: "Come Ananda, let us go to Ambalathika."
3. 3. "So be it Lord!" said Ananda in assent, and the Blessed One, with a large company of the brethren, proceeded to Ambalathika.
4. 4. After staying at Ambalathika he moved on to Nalanda.
5. 5. From Nalanda he went to Pataligama, the capital of Magadha.
6. 6. From Pataligama he went to Kotigam and from Kotigam he went to Nadika.
7. 7. At each of these places he stopped for a few days and delivered a religious discourse either to the brethren or the householders.
8. 8. From Nadika he went to Vesali.
9. 9. Vesali was the birth-place of Mahavira and consequently a stronghold of his faith.
10. 10. But the Blessed Lord soon succeeded in converting the people of Vesali to his own faith.
11. 11. It is said that owing to drought, a famine ravaged the city of Vesali to such an extent that people died in large numbers.
12. 12. The people of Vesali complained of it in a general assembly convoked by them.
13. 13. The assembly after much discussion decided to invite the Blessed Lord to the city.
14. 14. A Lichchavi by name Mahali, a friend of King Bimbisara and son of the chaplain of Vesali, was sent to offer the invitation.
15. 15. The Blessed Lord accepted the invitation and started with five hundred Bhikkhus. As soon as he entered the territory of the Vajjins there was a thunderstorm, rain fell in torrents and famine disappeared.
16. 16. This is the origin of the welcome which the people of Vesali gave to the Blessed Lord.

17. 17. Having won their hearts it was natural that the people of Vesali should give him a warm response.
18. 18. Then came *vasa*. The Blessed Lord went to Beluna for his *vasa* and asked the brethren to make their *vasa* in Vesali.
19. 19. After finishing his *vasa* the Lord came to Vesali with a mind to leave Vesali and move on his journey.
20. 20. So the Blessed Lord early one morning robed himself, and taking his bowl, entered Vesali for alms; and when he had passed through Vesali and eaten his meal he gazed at Vesali with an elephant's look and addressed the venerable Ananda and said: "This will be the last time Ananda that the Tathagatha will behold Vesali."
21. 21. Thus saying he bade farewell to the people of Vesali.
22. 22. He gave to the Lichchavis, when they took leave of him at the old city on their northern frontier, his alms-bowl as a memento.
23. 23. It was his last visit to Vesali. He did not live to return to it again.

§ 2. *Halt at Pava*

1. 1. From Vesali the Blessed Lord went to Bhandagam.
2. 2. From Bhandagam he went to Hatthi-gam to Bhoga-Nagara.
3. 3. And from Bhoga-Nagara he went to Pava.
4. 4. At Pava the Blessed One stayed at the mango grove of one blacksmith by name Chunda.
5. 5. Now Chunda heard that the Blessed One had come to Pava and was staying in his mango grove.
6. 6. Chunda went to the mango grove and sat near the Blessed One, who gave him a religious discourse.
7. 7. Gladdened by it Chunda addressed the Blessed One and said: "May the Blessed One do me the honour of taking his meal together with the brethren, at my house tomorrow."
8. 8. And the Blessed One signified, by silence, his consent. Seeing that the Blessed One had consented, Chunda departed thence.
9. 9. Next day Chunda made ready in his dwelling-place sweet rice and cakes and some preparation of *Sukara-Madhava*. And he announced the hour to the Blessed One, saying: "The hour, Lord, has come, and the meal is ready."

10. 10. And the Blessed One robed himself and taking his bowl went with the brethren to the dwelling-place of Chunda and partook of the food prepared by him.

11. 11. Again after the meal the Blessed One gave a discourse on religion to Chunda, then rose from his seat and departed thence.

12. 12. The food offered by Chunda did not agree with the Blessed One. There fell upon him a dire sickness, the disease of dysentery, and sharp and shooting pain came upon him even unto death.

13. 13. But the Blessed One, mindful and self-possessed, bore it without complaint.

14. 14. Returning to the mango grove and after nature was relieved, the Blessed One told Ananda: "Come let us go to Kushinara" and the party moved from Pava.

§ 3. *Arrival at Kushinara*

1. 1. The Blessed Lord walked for part of the way. He soon felt the need for some rest.

2. 2. On the way the Blessed One went aside from the path to the foot of a certain tree and said to Ananda: "Fold, I pray you, Ananda, the robe; and spread it out for me. I am weary, Ananda, and must rest awhile!"

3. 3. "Even so, Lord!" said the venerable Ananda, in assent, to the Blessed One, and spread out the robe folded fourfold.

4. 4. And the Blessed One seated himself on the seat prepared for him.

5. 5. And when he was seated, the Blessed One addressed the venerable Ananda, and said: "Fetch me. I pray you, Ananda, some water. I am thirsty, Ananda, and would drink."

6. 6. Ananda replied: "This river Kakuttha is not far off, is clear and pleasant, cool and transparent, easy to get down into and delightful. There the Blessed One may both drink the water and cool his limbs. The water of this stream is foul and turbid."

7. 7. The Blessed One was too weak to walk down to the river. He preferred to have the water of the nearby stream.

8. 8. Ananda brought the water and the Blessed One drank it.

9. 9. After resting for a while the Blessed One with the company of the brethren went on to the river Kakuttha; and when he had come there, he

went down into the water, and bathed, and drank. And coming out again on the other side he went on to the mango grove.

10. 10. And when he came there he again asked his robe to be spread out, saying: "I am weary and would lie down." The robe was accordingly spread out and the Blessed One laid himself down on it.

11. 11. After resting for a while the Blessed One got up and said to Ananda: "Let us go on to the Sala grove of the Mallas, the Upavana of Kushinara on the further side of the river Hiranyavatti."

12. 12. On reaching the place in the company of Ananda, he again asked Ananda to spread his robe between the twin Sala trees. "I am weary and would lie down."

13. 13. Ananda spread the robe and the Blessed One laid himself down on it.

PART III : HIS END

1. 1. The Appointment of a Successor.
2. 2. The Last Convert.
3. 3. Last Words.
4. 4. Ananda in Grief.
5. 5. The Lament of the Mallas and the Joy of a Bhikkhu.
6. 6. The Last Rites.
7. 7. Quarrel Over Ashes.
8. 8. Loyalty to the Buddha.

§ 1. The Appointment of a Successor

1. 1. The Exalted One was at one time sojourning among the Sakyans in the mango grove of the Sakyan family named the archers.

2. 2. Now at that time Nataputta the Nigantha had just died at Pava. And at his death the Niganthas became disunited and divided into two parties, in mutual strife and conflict, quarrelling and wounding each other with wordy weapons.

3. 3. Now Chunda, the novice, having passed the rainy season at Pava, came to see the venerable Ananda and said: "Nataputta, sir, the Nigantha had just died at Pava. And he being dead the Niganthas have become

disunited and divided and are quarrelling and wounding one another. This is because they are without a protector.”

4. 4. Then said the venerable Ananda, ”Friend Chunda, this is a worthy subject to bring before the Exalted One. Let us go to him, and tell him about it.”

5. 5.”Very good, sir,” replied Chunda.

6. 6. So the venerable Ananda and Chunda, the novice, sought out the Exalted One and saluting him, told him about the Niganthas and pleaded the necessity of appointing a successor.

7. 7. The Blessed Lord on hearing what Chunda had said, replied:”But consider Chunda, where a teacher hath arisen in the world, Arahata, supremely enlightened: where a doctrine hath been well set forth, well imparted, effectual for guidance, conducive to peace; but where his disciples have not become proficient in good Norm, nor has it been made a thing of saving grace to them, well proclaimed among men when their teacher passes away.

8. 8.”Now for such a teacher to die, Chunda, is a great affliction for his disciples and a great danger to his Dhamma.

9. 9.”But consider, Chunda, where a teacher has appeared in the world who is all-enlightened; where the Norm has been well set forth, well imparted, effectual for guidance, conducive to peace, and where the disciples have become proficient in the good Norm, and where the full scope of the higher life has become manifest to them when that teacher passes away.

10. 10.”Now for such a teacher, Chunda, to die is not an affliction for his disciples. Why then have a successor?”

11. 11. When Ananda raised the same question on another occasion the Blessed Lord said:”What think you Ananda? Do you observe even a couple of almsmen at variance about what I have taught?”

12. 12.”No. But those who are about the Lord might after his death, stir up quarrel in the confraternity respecting the regimen or of the code and such quarrels would make for general grief.”

13. 13.”Of little concern, Ananda, are quarrels respecting rigours of regimen or of the code ; it is possible quarrels in the confraternity about the path which really matter,”said the Blessed Lord.

14. 14.”These disputes about the path cannot be settled by a dictator.

What then a successor can do unless he acts as a dictator.

15. 15.”The controversies regarding the path cannot be settled by a dictator.

16. 16.”The decision of a controversy should be reached by the fraternity. The whole conjoint body should assemble and thrash out the matter till there is agreement and then to settle it conformably with such agreement.

17. 17.”Majority agreements is the way to settle the disputes and not the appointment of a successor.”

§'2. *The Last Convert*

1. 1. Now at that time Subhadda the Wanderer was staying at Kusinara. And Subhadda the Wanderer heard the rumour, ”This very day, it is said, in the last watch of the night will be the final passing away of Gotama the recluse.” Then this thought came to Subhadda the Wanderer.

2. 2. ”Thus have I heard it said by other wanderers who are old and far gone in years, both teachers and disciples; ' Rarely, rarely do Tathagatas arise in the world, they, who are Arahats, fully Enlightened Ones, And here tonight, in the last watch, will be the final passing away of Gotama, the recluse. Now a doubt VII has arisen in my mind and I am assured of Gotama, the recluse. Gotama, the recluse, can show me a teaching, so that I may dispel this doubting state of mine.”

3. 3. Then Subhadda the Wanderer went towards the branch road to the Sala grove of the Mallas, where the venerable Ananda was, and coming there he told the venerable Ananda what he had thought and he exclaimed:”O Master Ananda ! If only I could get a sight of Gotama the recluse !”

4. 4. At these words the venerable Ananda said to Subhadda the Wanderer:”Enough, friend Subhadda! Trouble not the Master! The Exalted One is wearied.”

5. 5. Then a second and yet a third time did Subhadda the Wanderer make the same request, and got the same reply.

6. 6. Now the Exalted One overheard this talk between the venerable Ananda and Subhadda the Wanderer. And He called to the venerable Ananda, saying, ”Enough, Ananda! prevent not Subhadda. Let Subhadda be

permitted to see the Tathagata. Whatsoever Subhadda shall ask of me, he will ask it all from a desire to know, not from a desire to trouble me. And whatever I shall say in answer, that will be quickly understood.”

7. 7. So then the venerable Ananda said to Subhadda the Wanderer, “Go you in, friend Subhadda. The Exalted One gives you leave.”

8. 8. So Subhadda the Wanderer went in to the Exalted One, and coming to Him greeted Him pleasantly, and after the exchange of friendly compliments he sat down at one side. So seated, Subhadda the Wanderer thus addressed the Exalted One:

9. 9. “Master Gotama, all those recluses and Brahmins who have followings and companies of listeners, who are teachers of companies, well known, renowned founders of sects, esteemed as holy men by the multitude, men like Purana Kassapa, Makkhali of the Cow-pen, Ajita of hairshirt, Kacchayana of the Pakudha tree, Sanjaya, son of Belatthi, and Nigantha of the Natha clan,—have all these, as they say, realised by their own knowledge the truth of things, or have they not one and all so realised, or have some realised and others not realised it, by their own knowledge?”

10. 10. “Let be, Subhadda ! Trouble not yourself about such things, as to whether one and all or some have realised or not. I will show you the Norm, Subhadda. Do you listen carefully. Apply your mind. I will speak.”

11. 11. “Even so, Lord,” said Subhadda the Wanderer and gave heed to the Exalted One. Then the Exalted One said this:

12. 12. “In whatsoever Norm-discipline, Subhadda, the Ariyan Eightfold Path is not found, therein also no recluse is found. And in whatsoever Norm-discipline, Subhadda, the Ariyan Eightfold Path is found, therein also is found a recluse.

13. 13. “Now in this Norm-discipline (of mine), Subhadda, the Ariyan Eightfold Path is found. Herein also is found a recluse of these four degrees. Void of recluses are the other sects of disputants. But if, Subhadda, in this one, brethren were to live the perfect life, the world would not be void of arahats.

14. 14. “My age was nine and twenty years when I went forth to seek the Good.

15. 15. “Now fifty years and more are gone, Subhadda, since I left the world to range the Norm of Righteousness.”

16. 16. And when he had thus spoken, Subhadda the Wanderer said to

the Exalted One:”Most excellent are these words of thy mouth, most excellent.

17. 17.”Just as if a man *were* to set up that which is thrown down, or were to reveal that which is hidden away, or were to point out the right road to him who has gone astray or were to bring a lamp into darkness, so that those who have eyes can see. 18.”Just even so, has the truth been made known to me by the Exalted One. And I, even I betake myself to the Exalted One as my refuge, to the truth and to the Order.”

18. 19.”Whosoever, Subhadda, has formerly been a follower of another doctrine and thereafter wishes to VII enter the Order remains on probation for the space of four months.”

19. 20.”If that is the rule I too will remain on probation.”

20. 21. But the Exalted One said,”I acknowledge the difference in persons.”So saying he called the venerable Ananda and told Ananda,”As it is, Ananda, receive Subhadda into the Order.”

21. 22.”Even so. Lord!”said the venerable Ananda, in assent to the Exalted One.

22. 23. And Subhadda the Wanderer said to the venerable Ananda:”Great is your gain, friend Ananda, great is your good fortune, friend Ananda, in that you all have been sprinkled with the sprinkling of discipleship in this brotherhood at the hands of the Master himself.”

23. 24.”The same is true of you, Subhadda,”replied Ananda.

24. 25. So Subhadda the Wanderer was received into the Order under the orders of the Exalted One. He was the last disciple whom the Exalted One himself converted.

§ 3. *Last Words*

1. 1. Then said the Exalted One to the venerable Ananda:

2. 2.”It may be, Ananda, that you will say: ' Gone is the word of the Master: we have no longer any Master now!' But you must not so regard it, Ananda; for the Norm and discipline taught and enjoyed by me, they shall be your teachers when I am gone.

3. 3.”Now, Ananda, whereas the brethren have the habit of calling one another ' friend,'— when I am gone this habit must not be followed. By an elder brother, Ananda, a brother who is a novice should be called by his

name or clan name or by the word ' friend ' : but by a novice, Ananda, an elder brother should be addressed as ' Lord ' or ' Your reverence.'

4. 4."Again, Ananda, if the Order so desires, when I am gone, let it abolish the lesser and minor charges.

5. 5."You know, Ananda, the brother Channa. How obstinate, perverse and devoid of the sense of discipline he is.

6. 6."And to him, Ananda, let the extreme penalty be applied when I am gone."

7. 7."What, Lord, do you mean by ' the extreme penalty '?"

8. 8."The brother Channa, Ananda, whatever he may say, is not to be spoken to, not to be admonished, not to be instructed by the brethren. He should be left alone. It might improve him."

9. 9. Then the Exalted One addressed the brethren :

10. 10."It may be, brothers, that in the mind of some one brother there is doubt or perplexity, either about the Buddha, or about the Norm, or the Order, or the Path, or the Way to the Path. If it be so, brothers, do ye ask now. Be not hereafter remorseful at the thought, ' Here was our Master face to face with us, and yet we had not the heart to question the Exalted One, though we were in His very presence.'"

11. 11. At these words the brethren were silent.

12. 12. Then a second time and yet a third time did the Exalted **One** address the brethren in the same words. And a third time the brethren were silent.

13. 13. Then said the Exalted One:"May be, brethren, it is out of respect for the Master that ye ask not. Speak to me, then, as friend to friend, brethren."

14. 14. Whereat those brethren were silent.

15. 15. Then exclaimed the venerable Ananda to the Exalted One:"Strange it is, Lord ! A marvel it is, Lord! Thus assured am I, Lord, of this Order of Brethren. There is not any one brother that has a single doubt or perplexity as to the Buddha, the Norm, the Order, or as to the Path, or the Way to the Path."

16. 16."You speak out of assurance, Ananda. But in the Tathagata there is knowledge of the fact. There is not in any one brother a single doubt or perplexity as to this. Of these five hundred brethren of mine, Ananda, even he who is the most backward is a stream-winner, one who is assured from

the Downfall, assured of reaching the Supreme Wisdom.”

17. 17. Then said the Exalted One to the brethren :

18. 18.”Come now, brethren, I do remind ye, ' Subject to decay are all compounded things' Do ye abide in heedfulness.”19. Those were the last words of the Exalted One.

§ 4, *Ananda in Grief*

1. 1. As age advanced the Blessed Lord required a personal attendant to look after him.

2. 2. He first chose Nanda. After Nanda he chose Ananda who served as his personal attendant till his death.

3. 3. Ananda was his constant and dearest companion, not merely an attendant.

4. 4. When the Blessed One came to Kushinara and rested between the Sal trees, he saw that his end was coming near, and felt that it was time he took Ananda into confidence.

5. 5. So he called Ananda and said:”And now this Ananda, at the third watch of the night, in the Uppavana of Kushinara. between the twin Sal trees, the utter passing away of the Tathagata will take place.”

6. 6. And when he had thus spoken the venerable Ananda addressed the Blessed One, and said:”Vouchsafe, Lord, to remain during the Kalpa, O Blessed One!, for the good and the happiness of the great multitudes, out of pity for the world, for the good and the gain and the weal of gods and men.”

7. 7. Three times did Ananda make his plea.”Enough now, Ananda, beseech not the Tathagata !”was the reply.”The time for making such request is past.”

8. 8.”I, Ananda, am now grown old, and full of years, my journey is drawing to a close. I have reached my sum of days. I am turning eighty years of age; and just as a worn-out cart must give way some day, methinks, the same must happen to the body of the Tathagata.”Hearing this, Ananda left.

9. 9. Not seeing Ananda, the Blessed One called the brethren, and said:”Where then is Ananda?”“The venerable Ananda is gone and is weeping,”said the brethren.

10. 10. And the Blessed One called a certain brother and said: "Go now brother, and call Ananda in my name and say, ' Brother Ananda, the Master calls for thee '"
11. 11. "Even so, Lord!" said that brother.
12. 12. When Ananda came back he took his seat by the side of the Blessed One.
13. 13. Then the Blessed One said to Ananda: "Enough, Ananda! Do not weep! Have I not already, on former occasions, told you that it is in the very nature of things most near and dear unto us that we must divide ourselves from them, leave them, sever ourselves from them?"
14. 14. "For a long time, Ananda, you have been very near to me by acts of love, kind and good, beyond all measure.
15. 15. "You have done well, Ananda! Be earnest in effort and you too shall be free from the great evils—from sensuality, from individuality, from delusion, and from ignorance."
16. 16. Then addressing the brethren about Ananda the Blessed One said: "He is a wise man, brethren, is Ananda.
17. 17. "He knows when it is the right time to come and visit the Tathagata, and when it is the right time for brethren and sisters of the Order, for devout men and devout women, for a king, or for a king's ministers, for other teachers and disciples, to visit the Tathagata.
18. 18. "Brethren, there are these four special things about Ananda.
19. 19. "All are happy to visit Ananda. They are filled with joy on beholding him; they are happy to hear him. They are ill at ease when Ananda is silent."
20. 20. After this Ananda again returned to the subject of the passing away of the Tathagata. Addressing the Blessed One, he said: "Let not the Blessed One die in this walled and daub town in the midst of the jungle. For Lord there are great cities, such as Champa, Rajagaha, Savathi, Saketa, Kosambi and Benares. Let the Blessed One die in one of them."
21. 21. "Say not so, Ananda! Say not so, Ananda. This Kushinara, Ananda, was the capital of king Maha-Sudassana under the name of Keshavati."
22. 22. Thereafter the Blessed One gave Ananda two errands.
23. 23. He told Ananda to see that belief does not spread that the Blessed One died as a result of the food given to Him by Chunda. He

feared that Chunda might suffer. He asked Ananda to disabuse the mind of the public on this score.

24. 24. The second thing he told Ananda was to inform the Mallas of Kushinara that the Blessed One had arrived there and would pass away in the last watch of the night.

25. 25.”Give no occasion to reproach yourself. The Mallas may say : ' In our own village the death of our Tathagata took place and we did not know and had no opportunity of seeing him in his last hours.'“

26. 26. Thereafter the venerable Anurudha and the venerable Ananda spent the rest of the night in religious discourse.

27. 27. And in the third part of the night, as previously announced, the Blessed One breathed his last.

28. 28. When the Blessed One died, the brethren and Ananda stretched out their arms and wept, and some even fell headlong on the ground, rolling to and fro in anguish, saying:”Too soon has the Blessed One died! Too soon has the Happy One passed away from existence! Too soon has the Light gone out of the world !”29. It was at midnight on Vaishakha Purnima that the Blessed Lord breathed his last. The year of his death was 483 B.C. 30. As the Pali text truly says: *Diva tapati addicco Ratin abhati candima; Sannaddho khathio tapati Jhaya tapati brahamano; Atha Sabbain aborattain Buddho tapati tejasa.*

29. 31.”The sun shines only in the day and the moon makes bright the night. The warrior shines when he is in his armour. And the Brahmin when he is meditating. But the Buddha shines over all by day as well as by night by his own glory.

30. 32.”He was beyond question the light of the world.”

§ 5. *The Lament of the Mallas and the Joy of a Bhikkhu*

1. 1. As desired by the Blessed One, Ananda went and informed the Mallas of the event.

2. 2. And when they heard of this the Mallas, their wives, their young men and maidens were grieved and sad and afflicted at heart.

3. 3. Some of them wept, dishevelled their hair, and stretched forth their arms and fell prostrate on the ground.

4. 4. Then the Mallas, with their young men and maidens and their

wives, went to the Sala grove in the Upavaana to have the last look of the Blessed One.

5. 5. Then the venerable Ananda thought: "If I allow the Mallas of Kushinara one by one it will take a long time for them to pay homage to the dead body of the Blessed One."

6. 6. So he decided to arrange them in groups, family by family. Each family then bowed humbly at the feet of the Blessed One and parted.

7. 7. Now at the time the venerable Maha Kassapa was journeying along the high road from Pava to Kushinara with a great company of the brethren.

8. 8. Just at the time a certain naked ascetic was coming along the high road to Pava.

9. 9. And the venerable Maha Kassapa saw the naked ascetic coming in the distance; and when he had seen him he said to the naked ascetic: "O friend! Surely VII thou knowest our Master?"

10. 10. "Yes, friend ! I know him." "This day the Samana Gotama has been dead a week!"

11. 11. Immediately on hearing the news the brethren were overcome with grief and started weeping.

12. 12. Now at that time a brother named Sub-hadda, who had been received into the Sangh in his old age, was seated in their company.

13. 13. And this Subhadda addressed the brethren and said: "Enough brethren! Weep not, neither lament! We are well rid of the great Samana. We used to be annoyed by being told, * 'This beseems you, this beseems you not.' But' now we shall be able to do whatever we like: and what we do not like, that we shall not have to do ! Isn't it good he is dead? Why weep, why lament? It is a matter of joy."

14. 14. So great and harsh a disciplinarian the Blessed One was.

§ 6. *The Last Rites*

1. 1. Then the Mallas of Kushinara said to the venerable Ananda: "What should be done with the remains of the Tathagata?"

2. 2. "As men treat the remains of a king of kings, so should you treat the remains of the Tathagata" replied Ananda.

3. 3. "And how do they treat the remains of a king of kings?"

4. Ananda told them: "They wrap the body of a king of kings in a new cloth. When that is done they wrap it in cotton-wool. When that is done they wrap it in a new cloth and so on till they have wrapped the body in five hundred successive layers of both kinds. Then they place the body in an oil vessel of iron and cover that close up with another oil vessel of iron.

They then build a funeral pile of all kinds. This is the way in which they treat the remains of a king of kings."

4. 5. "So be it," said the Mallas.

5. 6. Then the Mallas of Kushinara said: "It is VII much too late to burn the body of the Blessed One today. Let us now perform the cremation tomorrow."

6. 7. And the Mallas of Kushinara gave orders to their attendants, saying: "Make preparations for the funeral of the Tathagata and gather perfumes and garlands and the musicians of Kushinara."

7. 8. But in paying honour, reverence, respect, and homage to the remains of the Tathagata with dancing, and hymns and music and with garlands and perfumes; and in making canopies of their garments, and preparing decoration wreath to hand thereon, they passed the second day too, and then the third day, and the fourth and fifth and the sixth day also.

8. 9. Then on the seventh day the Mallas of Kushinara thought: "Let us carry the body of the Blessed One and let us perform the cremation ceremony."

9. 10. And thereupon eight chieftains among the Mallas bathed their heads, and clad themselves in new garments with the intention of acting as pall-bearers carrying the body of the Blessed One.

10. 11. They carried the dead body to the Shrine of the Mallas, called Makuta-bandhana; to the east of the city and there they laid down the body of the Blessed One and set fire to it.

11. 12. After some time the mortal remains of the Blessed One were reduced to ashes.

§ 7. *Quarrel Over Ashes*

1. 1. After the body of the Blessed One had been consumed by fire, the Mallas of Kushinara collected the ashes and the bones of the Blessed One and placed them in their Council Hall with a lattice work of spears

and with a rampart of bows; and guarded them against anybody stealing them or any part of them.

2. 2. For seven days the Mallas paid honour and reverence and respect and homage to them with dance and song and music and with garlands and perfumes.

3. 3. Now the King of Magadha, Ajatasatru, heard the news that the Blessed One had died at Kushinara.

4. 4. He, therefore, sent a messenger to the Mallas with a request for a portion of the relics of the Blessed One.

5. 5. Similarly messengers came from the Licchavis of Vaishali, from the Sakyas of Kapilavastu, from the Bulis of Attakappa, from the Koliyas of Ramagama and from the Mallas of Pava.

6. 6. Among the claimants for ashes there was also a Brahmin of Vethadipa.

7. 7. When they heard these claims, the Mallas of Kushinara said: "The Blessed One died in our village. We will not give away any part of the remains of the Blessed One. They belong to us."

8. 8. Seeing that the situation was tense a Brahmin by name Drona intervened and said: "Hear, reverend sirs, one single word from me."

9. 9. Said Drona: "Forbearance was our Buddha to teach; unseemly is it that over the division of the remains of him who was the best of beings, strife should arise, and wounds and war !

10. 10. "Let us all, sirs, with one accord unite in friendly harmony to make eight portions. Widespread let stupas arise in every land that the Enlightened One from all parts be revered."

11. 11. The Mallas of Kushinara agreed and said: "Do thou then, O Brahmin, thyself, divide the remains equally into eight parts, with fair division."

12. 12. "Be it so, sir!" said Drona in assent.

13. 13. And he divided the remains of the Blessed One equally into eight parts.

14. 14. After making the division Drona said to them: "Give me, sirs, this vessel. I will set up over it a stupa."

15. 15. And they agreed to give the vessel to him.

16. 16. Thus the ashes of the Blessed One were shared and the quarrel was settled peacefully and amicably.

§8. *Loyalty to the Buddha*

1. 1. Shravasti was the occasion (of these events)....
2. 2. Now on that occasion a number of monks were VII busied with .making a robe for the Exalted One, with this idea : When the robe is finished, in three months' time, the Exalted One will go forth on his rounds:
3. 3. Now at that time Isidatta and Purana, the chamberlains, were staying at Sadhuka on some business or other. Then they heard the news:"They say that a number of monks are busied with making a robe for the Exalted One with this idea: When the robe is finished, in three months' time, the Exalted One will go forth upon his rounds."
4. 4. So Isidatta and Purana, the chamberlains, station-ed a man on the high-road (thus instructing him) : "Now, good fellow, as soon as you see that Exalted One, that Arahata, that perfectly Enlightened One coming along, do you come and inform us."
5. 5. So after standing there two or three days that man saw the Exalted One coming along, while yet some distance off, and he went to inform the chamberlains, Isidatta and Purana, saying:"Here comes my lord, the Exalted One, that Arahata, that perfectly Enlightened One ! Now's the time for you to do what you want!"
6. 6. So Isidatta and Purana, the chamberlains, went towards the Exalted One, and on coming to him, saluted him, and followed behind the Exalted One step for step.
7. 7. Then the Exalted One turned aside from the high road and went to the foot of a certain tree and there sat down on a seat made ready. And Isidatta and Purana, the chamberlains, saluting the Exalted One, also sat down at one side. As they thus sat, they said this to the Exalted One:
8. 8."Lord, when we heard of the Exalted One that he would go forth on his rounds among the Ko-salans, at that time we were disappointed and depressed at the thought : the Exalted One will be far from us.
- 9."And when. Lord, we learned that the Exalted One was starting out from Shravasti on his rounds among the Kosalans, again we were disappointed and depressed at the thought: The Exalted One will be far

from us.

1. 10."Again, lord, when we learned that the Exalted One would leave the Kosalans and go on his rounds among the Mallas . . . that he was actually doing so . . . we were disappointed and depressed.

11."On hearing that the Exalted One would leave the Mallas and go on his rounds among the Vajji . . . that he was actually doing so . . . that he would leave the Vajji for Kasi . . . that he was doing so . . . that he would leave the folk of Kasi and go on his rounds in

Magadha . . . that he was actually doing so . . . again we were disappointed and depressed . . .

2. 12."But, Lord, when we heard that the Exalted One would leave the Magadhas for Kasi and was doing so, then we were delighted and elated at the thought: The Exalted One will be quite near us.

3. 13."And when we heard that he was actually going his rounds in Kasi among the Magadhas, we were likewise delighted and elated.

4. 14. (They continue to trace the Master's steps from Kasi to the Vajji . . . from the Vajji to the Mallas . . . from the Mallas to the Kosalans in like terms.)

5. 15."But, Lord, when we heard that the Exalted One would be going on his rounds from the Kosalans to Savatthi, we were delighted and elated at the thought: Now the Exalted One will be quite near us !

6. 16."Then, when we heard: 'The Exalted One is staying at Shravasti, at Jeta grove, in Anathapindika's . Park.' Then, Lord, boundless was our delight and boundless our elation at the thought : The Exalted One is near us !"

BOOK VIII: THE MAN WHO WAS SIDDHARTH GAUTAMA

Part I—His Personality. Part

II—His Humanity. Part

III—His Likes and Dislikes.

EPILOGUE

PART I : HIS PERSONALITY

1. 1. His Personal Appearance.

2. 2. The Testimony of Eye-witnesses.
3. 3. His Capacity to Lead.

1. His Personal Appearance

1. 1. From all accounts the Blessed Lord was a handsome person.
2. 2. His form was like the peak of a golden mountain. He was tall and well built; with a pleasing appearance.
3. 3. His long arms and lion gait, his bull-like eyes, and his beauty, bright like gold, his broad chest, attracted everyone to him.
4. 4. His brows, his forehead, his mouth or his eyes, his body, his hands, his feet or his gait— whatever part of him anyone beheld that at once riveted his eyes.
5. 5. Whoever saw him could not help being struck with his majesty and his strength, his splendid beauty, surpassing all other men.
6. 6. On seeing him, he who was going elsewhere stood still and whoever was standing followed him: he who was walking gently and gravely, ran quickly, and he who was sitting at once sprang up.
7. 7. Of those who met him some revered him with their hands, others in worship saluted him with their heads, some addressed him with affectionate words, not one went on without paying him homage.
8. 8. He was loved and respected by all.
9. 9. Men as well as women were ever ready to hear him.
10. 10. His voice was singularly sweet and deep as a drum, lovely, vibrant and eloquent. It made his speech as though it was heavenly music.
11. 11. His very tones convinced the hearer, and his looks inspired awe.
12. 12. His personality alone sufficed to make him not only a leader but a god to the hearts of his fellows.
13. 13. When he spoke he obtained hearers.
14. 14. It mattered little what he said. He influenced the emotions and bent whoever listened to his will.
15. 15. He could create in the minds of his hearers that what he taught was not only a verity, but the very hope of their salvation.
16. 16. His hearers could recognise in his words the truth that makes of slaves free men.
17. 17. When he talked with men and women his serene look inspired

them with awe and reverence and his lovely voice struck them with rapture and amazement.

18. 18. Who could have converted the robber Augulimala or the Cannibal of Atavi? Who could have reconciled King Pasenjit to his queen Mallika by a single word. To have come under his spell is to be his for ever. So charming was his personality.

§ 2. *The Testimony of Eye-witnesses*

1. 1. This traditional view is supported by the testimony of eye-witnesses who saw him and met him while he was alive.

2. 2. One such eye-witness is a Brahmin by name Sale. After seeing the Blessed One face to face he uttered the following sentiments in praise of him.

3. 3. Arrived in the Lord's presence, the Brahmin, seating himself after greetings, scanned the Lord's body for the two and thirty marks of a Superman, and in time observed them.

4. 4. Quite sure now about the presence of the two and thirty marks, Sale still did not know whether or not he had enlightenment. But he remembered hearing from old and aged Brahmins, teachers of teachers, that those who became Arahats, all enlightened, reveal themselves when their praises are sung, and so he made up his mind to extol the Lord to his face in the following lines of eulogy:

5. 5."Perfect of body, goodly, Lord, art thou, well grown, well liking, golden-hued, with teeth which gleam lustre; vigour fills the frame; the body's full perfection manifests each single sign that marks a Superman.

6. 6."Clear-eyed and handsome, tall, upright art thou, effulgent as a sun among thy train, so debonair, so golden-hued; why waste thy beauty's prime as homeless anchorite.

7. 7."As world-wide monarch thou shouldst ride in State; and indeed from sea to sea should own thy sway. Proud princes shall thy village headmen be; rule thou mankind, as sovereign, king of kings."

8. 8. Ananda describes the colour of his body as exceedingly clear and bright so much so that the pair of, cloth of gold when placed on the body of the Blessed One appears to have lost its splendour.

9. 9. No wonder he was called by his opponents a glamour boy.

§ 3. *His Capacity to Lead*

1. 1. The Sangh had no official head. The Blessed One had no authority over the Sangh. The Sangh was a self-governing body.

2. 2. What was, however, the position of the Blessed One over the Sangh and its members?

3. 3. In this we have the evidence of Sakuldai and Udai, contemporaries of the Blessed One.

4. 4. Once the Lord was staying at Rajagraha in the bamboo grove.

5. 5. One morning the Lord went into Rajagraha for alms; but, deeming the hour too early, he thought of going to Sakuldai in Wanderers' Pleasance; and thither he repaired.

6. 6. At the time, Sakuldai was sitting with a great company of Wanderers, who were making a great noise about being and not being.

7. 7. When from some way off, Sakuldai saw the Lord coming, he hushed his company by saying: "Be quiet, sirs; do not make a noise; here comes the recluse Gotama, who is a lover of silence."

8. 8. So they became silent and the Lord came up. Said Sakuldai: "I pray the Lord to join us; he is truly welcome; it is a long time since he last managed to come. Pray, be seated; here is a seat for the Lord."

9. 9. The Lord sat down accordingly, asking Sakul-dai what had been their theme and what was the discussion which had been interrupted.

10. 10. "Let that pass for the moment," answered Sakuldai; "you can easily gather that later on."

11. 11. Of late, when recluses and Brahmins of other creeds met together in the Discussion Hall, the topic was mooted, what a good thing, what a very good thing, for the Magdha people in Anga, that such recluses and Brahmins—all at the head of confraternities or followings, all well known and famous teachers, all founders of saving creeds, held in high repute by many people should have come to spend the rainy season at Rajagraha.

12. There was Purana Kassappa, Makhali Ghosala, Ajit Kesakambal, Pakudha Kacchayana, Sanjaya Belaiputta, and Nata-putta the Nigantha, all men of distinction and all of them here for the rains; and among them there is also the recluse Gotama

here, at the head of his confraternity and following, a well-known and

famous teacher, a founder of a saving creed, who is held in high repute by many.

12. 13. Now, which of these lords, which of these recluses and Brahmins of such eminence as teachers, is esteemed, respected, venerated and adored by his disciples? And on what terms of esteem and respect do they live with him?

13. 14. Said some: "Purana Kassappa gets no esteem or respect; no veneration or adoration, from his disciples; they live with him on no terms of esteem and respect."

14. 15. Time was when, as he was preaching his doctrine to some hundreds of his following, a disciple broke in with—"Don't question Purana Kassappa, who does not know about it; ask me who do; I will explain everything to your reverences."

15. 16. With arms outstretched Purana Kassappa tearfully remonstrated, saying: "Do be quiet, *sirs*, do not make a noise."

PART II : HIS HUMANITY

1. 1. His Compassion—The Maha Karunik.
2. 2. Healing of the Stricken.
3. 3. His Concern for the Sick.
4. 4. His Tolerance of the Intolerant.
5. 5. His Sense of Equality and Equal Treatment.

§ 1. *His Compassion—The Maha Karunik*

1. 1. When once the Blessed Lord was staying in Shravasti the almsmen came and informed him that they were constantly harassed by the Deva who disturbed them in their meditations.

2. 2. After hearing their stories of harassment the Blessed Lord gave them the following instructions :—

3. 3. "He, who is skilled in his godness, who wishes to attain that calm state, should act thus: he should be able, upright, near perfectly upright, of noble speech, gentle and humble.

4. 4. "Contented, easily supportable, with few duties, of light livelihood, controlled in senses, discreet, not impudent, not greedily attached to families.

5. 5."He should not pursue anything trifling such that other wise men might censure him. He should wish, ' May all beings be happy and secure; may their hearts be wholesome.'
6. 6."Whatever living beings there be—feeble or strong, tall, stout and medium, short, small or large, without exception;
7. 7."Seen or unseen, those dwelling far or near, those who are born, or who are to be born, may all beings be happy.
8. 8."Let none deceive another, nor despise any person whatsoever in any place, let him not" wish any harm to another, out of anger or ill-will.
9. 9."Just as a mother would protect her only child at the risk of her own life, even so let him cultivate a boundless heart towards all beings.
10. 10."Let his thoughts of boundless love pervade the whole world, above, below and across without any obstruction, without any enmity.
11. 11."Whether he stands, walks, sits, lies down, as long as he is awake, he should develop this mindfulness, this they say is the noblest living here.
12. 12."Not falling into error (self-illusion), being virtuous and endowed with insight, by discarding attachment to sense desires never does he come again for conception in a womb."
13. 13. In short, he told them"Love your enemies."

§2. *Healing of the Stricken* A Consummate Healer of Sorrow.

(i) *Consoling Visakha*

1. 1. Visakha was an upasika. It was her routine to give alms to the bhikkhus.
2. 2. One day her grand-daughter, Suddata, who lived with her, fell ill and died.
3. 3. Visakha was unable to bear the grief.
4. 4. After cremation she went to the Buddha and sat on one side sad with tearful eyes.
5. 5."O Visakha,"asked the Blessed One,"wherefore dost thou sit, sad and mournful, shedding tears?"
6. 6. She told him of her grand-daughter's death, saying,"she was a dutiful girl, and I cannot find her like."
7. 7."How many young girls, say, are there dwelling in Shravasti, O Visakha?"

8. 8."Lord, men say there are several kotis (several millions)."
9. 9."If all these were like thy grand-daughter, would thou not love them?"
10. 10."Verily, Lord,"replied Visakha.
11. 11."And how many die daily in Shravasti?"
12. 12."Many, Lord."
13. 13."Then there is never a moment when thou wouldst not be grieving for someone?"
14. 14."True, Lord."
15. 15."Wouldst thou then spend thy life weeping day and night?"
16. 16."I understand Lord ; it is well said !"
- 17."Grieve then, no more."

(ii) *Comforting Kisa Gotami*

17. 1. Kisa Gotami was married to the son of a merchant of Shravasti.
18. 2. Soon after marriage a son was born to her.
19. 3. Unfortunately her child died of a snake-bite before it could walk.
20. 4. She could not believe that her child was really dead as she had not seen death before.
21. 5. The little spot red from the bite of a snake, did not look as if it could be the cause of the child's death.
22. 6. She, therefore, took her dead child and wandered about from house to house, in such a wild state of mind that people believed that she had gone out of her senses.
23. 7. At last one old man advised her to go and seek out Gotama who happened at the time to be in Shravasti.
24. 8. So she came to the Blessed One and asked him for some medicine for her dead child.
25. 9. The Blessed One listened to her story and to her lamentations.
26. 10. Then the Blessed One told her,"Go enter the town, and at any house where yet there has been no death, thence bring a little mustard seed and with that I will revive your child."
27. 11. She thought this was easy and with the dead body of her child she entered the town.
28. 12. But she soon found that she had failed as every house she visited had suffered loss in the death of some member.
29. 13. As one householder told her,"the living are few and the dead are

many.”

30. 14. So she returned to the Blessed Lord disappointed and empty-handed.

31. 15. The Blessed Lord then asked her if she did not then realize that death was the common lot of all and whether she should grieve as though it was her special misfortune.

32. 16. She then went and cremated the child, saying:”All is impermanent; this is the law.”

§ 3. *His Concern for the Sick*

(i)

1. 1. Now at one time a certain brother was suffering from dysentery and lay where he had fallen down in his own excreta.

2. 2. And the Exalted One going on his rounds of the lodgings, with the venerable Ananda in attendance, came to the lodging of that brother.

3. 3. Now the Exalted One saw that brother lying where he had fallen in his own excreta and seeing him he went towards him, and said:”Brother, what ails you?”

4. 4.”I have dysentery. Lord.”

5. 5.”But is there anyone taking care of you, brother?”

6. 6.”No, Lord.”

7. 7.”Why is it, brother, that the brethren do not take care of you?”

8. 8.”I am useless to the brethren. Lord, therefore the brethren do not care for me.”

9. 9. Then the Exalted One said to the venerable Ananda:”Go you, Ananda, and fetch water. I will wash this brother.”

10. 10.”Yes, Lord,”replied the venerable Ananda to the Exalted One. When he had fetched the water, the Exalted One poured it out, while the venerable Ananda washed that brother all over. Then the Exalted One, taking him by the head and the venerable Ananda taking him by the feet, together they laid him on the bed.

11. 11. Then the Exalted One, in this connection and on this occasion, gathered the Order of Brethren together, and questioned the brethren, saying:

12. 12.”Brethren, is there in such and such a lodging a brother who is

sick?"

13. 13."There is, Lord."

14. 14."And what ails that brothea?"

15. 15."Lord, that brother has dysentery."

16. 16."But, brethren, is there anyone taking care of him?"

17. 17."No, Lord."

18. 18."Why not? Why do not the brethren take care of him?"

19. 19."The brother is useless to the brethren, Lord. That is why the brethren do not take care of him."

20. 20."Brethren, ye have no mother and father to take care of you. If ye will not take care of each other, who else, I ask, will do so? Brethren, he who would wait on me, let him wait on the sick.

.21."If he have a teacher, let his teacher take care of him so long as he is alive, and wait for his recovery. If he have a tutor or a lodger, a disciple or a fellow lodger or a fellow disciple, such should take care of him and await his recovery. If no one takes care of him, it shall be reckoned an offence."

.(ii)

21. 1. Once the Exalted One was staying near Rajagraha in the great grove, at the squirrels feeding ground.

22. 2. On that occasion the venerable Vakkali was staying in the potter's shed, being sick, afflicted, stricken with a sore disease.

23. 3. Now the venerable Vakkali called to his attendants, saying:"Come hither, friends! Go ye to the Exalted One and, in my name worshipping at the feet of the Exalted One, say unto Him : "Lord, the brother Vakkali is sick, afflicted, stricken with a sore disease. He worships at the feet of the .Exalted One.' And thus do you say : ' Well, were it. Lord, if the Exalted One would visit brother Vakkali, out of compassion for him.'"

24. 4. The Exalted One consented by His silence. Thereupon the Exalted One robed himself, and, taking bowl and robe, went to visit the venerable Vakkali.

.5. Now the venerable Vakkali saw the Exalted

.One coming while he was yet far off, and on seeing him he stirred upon his bed.

25. 6. Then said the Exalted One to the venerable Vakkali:"Enough, Vakkali ! Stir not on your bed ! There are these seats made ready. I will sit there."And he sat down on a seat made ready. So the Exalted One sat

down and said to the venerable Vakkali:

26. 7."Well, Vakkali, I hope you are bearing up. I hope you are enduring. Do your pains abate and not increase? Are there signs of their abating and not increasing?"

27. 8."No, Lord, I am not bearing up. I am not enduring. Strong pains come upon me. They do not abate. There is no sign of their abating but of their increasing."

28. 9."Have you any doubt, Vakkali? Have you any remorse'."

29. 10."Indeed, Lord, I have no doubt. I have no remorse."

30. 11."Have you not anything, Vakkali, wherein you reproach yourself as to morals?"

31. 12."Nay, Lord, there is nothing wherein I reproach myself as to morals."

32. 13."Then, Vakkali, if that is so, you must have some worry, you must have something you regret."

33. 14."For a long time. Lord, I have been longing to set eyes on the Exalted One, but I had not strength enough in this body to come to see the Exalted One."

.15."Hush, Vakkali; what is there in seeing this vile body of mine? He who seeth the Norm, he seeth me: he who seeth, Vakkali, seeth the Norm. Verily, seeing the Norm, Vakkali, one seeth me : seeing me, one seeth the Norm."

.(iii)

34. 1. Thus have I heard: The Exalted One was once staying among the Bhaggi, at crocodile haunt in Bhesakala grove in the deer-park. Then the housefather, Nakulapita, came to the Exalted One, saluted Him, and sat down at one side.

35. 2. As he sat there, the housefather, Nakulapita, addressed the Exalted One, saying:"Master, I am a broken-down old man, aged, far gone in years, I have reached life's end, I am sick and always ailing. Moreover, Master, I am one to whom rarely comes the sight of the Exalted One and the worshipful brethren. Let the Exalted One cheer and comfort me, so that it be a profit and a blessing unto me for many a long day."

36. 3."True it is, true it is, housefather, that your body is weak and cumbered! For one carrying this body about, housefather, to claim but a moment's health would be sheer foolishness. Wherefore, housefather, thus

should you train yourself: ' Though my body is sick, my mind shall not be sick.' Thus, housefather, must you train yourself."

.4. Then Nakulapita, the housefather, welcomed and gladly heard the words of the Exalted One, and rising from his seat he saluted the Exalted One by the right, and departed.

.(iv)

37. 1. Once the Exalted One was staying among the Sakyans at Kapilavastu, in the fig-tree park.

38. 2. Then on that occasion a number of brethren were busy with making robes for the Exalted One,"For,"said they,"when the three months are over, the Exalted One, his robes being complete, will go forth on his rounds."

39. 3. Now Mahanama, the Sakyan, heard it said,"A number of brethren are busy with making robes, and so forth" . . . and he went to the Exalted One, saluted him, and sat down at one side. So seated, Mahanama, the Sakyan, said :

40. 4."I hear it said. Lord, that a number of the brethren are busy with making robes for the Exalted One, saying, 'when the robes are complete, at the end of the three months, the Exalted One will go forth on his rounds.' Now, Lord, we have never heard from the Exalted One's own lips how a discreet layman who is sick, in pain, grievously afflicted, should be cheered by another discreet lay-brother."

41. 5."A discreet lay-brother, Mahanama, who is sick . . . should be cheered by another discreet lay-brother with the Four Comfortable Assurances, thus: ' Take comfort, good sir, in the Norm, and in the Order of Brethren: likewise in the virtues dear to the Norm kept unbroken and unsoiled which tend to balance of mind.'

42. 6."Then, Mahanama, when a discreet lay-brother who is sick has thus been cheered with the Four Comfortable Assurances by another lay-brother, such should be the words of that other:

43. 7."Suppose the sick man should have a longing for his parents. Then if the sick man says, ' I have a longing for my parents,' the other should reply, 'My dear good man, you are subject to death. Whether you have longing for your parents or not you will die. ' Twere just as well for you to abandon all longing for your parents.'

44. 8."And suppose the sick man says, "That longing for my parents is

now abandoned,' then the other should say, ' Yet my good sir, you still have a longing for your children. As you must die in any case, 'twere just as well for you to abandon longing for your children.'

45. 9."And so also should he speak in respect of the five pleasures of the senses. Suppose the sick man says, ' I have a longing for the five pleasures of sense,' the other should say, ' My friend, heavenly delights are more excellent than the five pleasures of sense, and more choice. 'Twere well for you to remove your mind from human joys and fix it on the joys of the Four Great Deva Kings.'

46. 10."Again, if the sick man say, ' My mind is so fixed,' let the other say, ' Better to fix your mind on the Brahma world,' And then if the sick man's mind is so fixed, let the other say :

47. 11."My good sir, even the Brahma world is impermanent, not lasting, subject to personality. Well for you, dear sir, if you raise your mind above the Brahma world and concentrate on cessation from onal.'

48. 12."And if the sick man says he has done so, then I declare Mahanama, that there is no difference between the lay-brother who can thus aver and the disciple whose mind is freed from the asavas: that is to say, so far as emancipation goes."

§ 4. *His Tolerance of the Intolerant*

1. 1. Once the Blessed Lord was dwelling in the realm of the Yakkha Alavaka in the town of Alavi. Then the Yakkha Alavaka approached the Blessed Lord, and having approached him, said thus:"Get out, O Monk !"

2. 2. The Blessed Lord departed, saying:"Very well, friend."

3. 3. The Yakkha then ordered"Enter, O Monk."

4. 4. The Blessed Lord entered, saying:"Very well, friend."

5. 5. For the second time also the Yakkha Alavaka told the Blessed Lord,"Get out, O Monk!"

6. 6. The Lord departed, saying:"Very well, friend."

7. 7."Enter, O Monk!"said the Yakkha, the second time.

8. 8. The Lord entered, saying:"Very well, friend."

9. 9. For the third time also the Yakkha Alavaka told the Lord,"Get out, O Monk !"

10. 10. The Lord departed, saying:"Very well, friend."

11. 11."Enter, O Monk !"said the Yakkha again.
12. 12. The' Lord entered, saying:"Very well, friend."
13. 13. For the fourth time did the Yakkha tell the Lord,"Get out, O Monk !"
14. 14. This time the Lord replied : "I shall not get out, friend, you may do what you like."
15. 15."I shall put a question to you; monk; if you do not answer my question, I will drive you out of your wits or I will tear your heart, or I will take you by the feet and throw you to the other side of the river,"said the angry Yakkha,
16. 16."I do not see, friend, anyone in the world who could drive me out of my wits or tear out my heart, or take me by the feet and throw me across the river. Still, friend, you may put any question you like."
17. 17. Then the Yakkha Alavaka asked the Lord the following questions :
18. 18."What is the noblest wealth for a man in this world? What pure action brings happiness? What is the sweetest of all tastes? What manner of living is said to be the noblest living?"
19. 19. The Lord replied:"Faith is the noblest wealth for a man in this world. The Dhamma well observed brings happiness. Truth is the sweetest of all tastes. The living endowed with wisdom is said to be the noblest thing.
20. 20. Yakkha Alavaka asked:"How does one cross the flood (rebirth)? How does one cross the sea (existence)? How does one overcome suffering?"
21. 21. The Lord replied:"One crosses the flood by Faith. One crosses the sea by Vigilance. One overcomes suffering by Exertion. One purifies oneself by wisdom.
22. 22. Yakkha Alavaka asked:"How does one acquire knowledge? How does one obtain wealth? How does one attain fame? How does one gain friends? Passing from this world to the other world after death, how does one not repent?"
23. 23. The Lord replied:"Having faith in Arahats and in the Dhamma for the attainment of Nibbana, and by obedience, the diligent, attentive person acquires wisdom.
24. 24."One who does what is proper, one who is resolute, one who is

awake, he acquires wealth. One who gives acquires friends.

25. 25.”The faithful householder in whom truthfulness, righteousness, patience and generosity are found, he does not repent after death.

26. 26.”Come on! Also consult other numerous monks and Brahmins, whether there are any other qualities higher than truth, self-control, charity and patience.”

27. 27. Yakkha Alavaka said:”Now, why should I consult various Brahmins and monks? Today I know the prosperity which belongs to my future good.

28. 28.”indeed ! the Buddha came to the dwelling of Alavi for my benefit. To-day I know, to whom when given, it returns the greatest fruit.

29. 29.”From today I will wander from village to village, from town to town, paying my respect to the fully Enlightened One, and his perfect Doctrine.”

§5. *His Sense of Equality and Equal Treatment*

1. 1. Whatever rules the Blessed Lord had made for the members of the Sangh were voluntarily and willingly accepted by him to be binding on him also.

2. 2. He never claimed any exemption or any special treatment on the ground that he was the acknowledged head of the fraternity and to whom any concession would have been most willingly made by the fraternity out of the boundless love and respect they bore for him.

3. 3. The rule that the members of the Sangh could take only one meal a day was accepted and followed by the Blessed Lord as much as it was by the bhikkhu.

4. 4. The rule that the members of the Sangh should have no private property was accepted and followed by the Blessed Lord as much as it was by the bhikkhu.

5. 5. The rule that no member of the Sangh should have more than three pieces of cloths was accepted and followed by the Blessed Lord as much as it was by the bhikidlu.

6. 6. Once, when the Lord was living in the Sakyan country at Kapilavastu in the banyan grove, Maha-Prajapati Gautami, the mother of the Blessed Lord, came to the Lord with two new lengths of cloth which she begged the Lord to be so good as to accept from her as it was the work

of her own hands at the loom expressly for him.

7. 7. To her the Lord made the answer, "Give it to the confraternity."

8. 8. A second and a third time did Gautami repeat her request, only to receive the same reply.

9. 9. Then Ananda intervened, saying, "Pray accept, sir, the cloth presented by Gautami. She was of great service to the Lord as nurse and foster-mother suckling her nephew when his own mother died." But the Blessed Lord insisted upon the cloth being given to the confraternity.

10. 10. Originally it was the rule of the Sangh that the robes of the members should be made of rags picked up from dung heaps. This rule was made to prevent the wealthier classes from joining the Sangh. 11. Once Jivika prevailed upon the Blessed Lord to accept a robe of newly made cloth. When the Lord accepted it, he at the same time relaxed the original rule and allowed the bhikkhu the same privilege.

PART III : HIS LIKES AND DISLIKES

1. 1. His Dislike of Poverty.
2. 2. His Dislike of the Acquisitive Instinct.
3. 3. His Joy at the Beautiful.
4. 4. His Love for the Lovely.

§ 1. His Dislike of Poverty

1. 1. Once the Exalted One was dwelling near Shravasti in Jeta's grove, at Anathapindika's park; and there Anathapindika, the householder, came and visited him and after saluting, sat down at one side. So seated, he asked the Exalted One to explain why one should acquire riches.

2. 2. "Since you ask me, I will explain.

3. 3. "Take the case of Ariyan disciple with riches gotten by work and zeal, gathered by the strength of the arm, earned by the sweat of the brow; justly obtained in alawful way he makes himself happy, glad, and keeps that great happiness; he makes his parents happy, glad, and keeps them so; so likewise his wife and children, his slaves, workfolk and men. This is the first reason for getting riches.

4. 4. "When riches are thus gotten, he makes his friends and companions happy, glad, and keeps them so. This is the second reason.

5. 5."Again, when riches are thus gotten, ill-luck from fire and water, rajas and robbers, enemies and heirs is warded off, and he keeps his goods in safety. This is the third reason.

6. 6."Then, when riches are thus gotten, he makes the five oblations, that is to say, oblations to kin, guests, pitaras, rajas and devas. This is the fourth reason.

7. 7."Moreover, when riches are thus gotten, the householder institutes offerings, of lofty aim, celestial ripening to happiness, leading heavenward, for all those recluses and godly men who abstain from pride and indolence, who bear all things in patience and humility, each mastering self, each calming self, each perfecting self. This is the fifth reason for getting rich."

8. 8. Anathapindika well understood that the Blessed Lord did not comfort the poor by praising their poverty nor did he sublimate poverty as a happy state for man to live in.

§ 2. *His Dislike of the Acquisitive Instinct*

1. 1. The Exalted One was once staying in the town of Kammassadamma in the country of Kurus.

2. 2. The venerable Ananda came to where the Exalted One was, bowed in salutation before him and took a seat on one side.

3. 3. And so seated he said,"Marvellous is this law of causation which has been taught by the Blessed One. It is so deep. To me it seems as clear as clear can be."

4. 4."Say not so, Ananda, say not so! Deep is this doctrine of events arising from causes. It is through not understanding this doctrine, through not penetrating it, that this generation has become a tangled skein, a matted ball of thread, unable to overpass the way of woe.

5. 5."I have said that craving is the cause of grasping. Where there is no craving of any sort or kind whatever by anyone for anything, would there be any arising of grasping?"

6. 6."There would not. Lord."

7. 7."Craving gives rise to pursuit of gain.

8. 8."Pursuit of gain gives rise to desire **and** passion.

9. 9."Desire and passion give rise to tenacity.

10. 10."Tenacity gives rise to possession.

11. 11."Possession gives rise to avarice and more possession.
12. 12."Possessions lead to keeping watch and ward over possessions.
13. 13."Many a bad and wicked state of things arise from keeping watch and ward over possession, such as blows and wounds, strife, quarrelling, slander and lies.
14. 14."This is the chain of causation, Ananda. If there was no craving, would there arise pursuit of gain? If there was no pursuit of gain, would there arise passion? If there was no passion, would there arise tenacity? If there would be no tenacity, would there arise the love for private possessions? If there would be no possession, would there arise avarice for more possession?"
15. 15."There would not, Lord."
16. 16."If there would not be the love of private possession, would there not be peace?"
17. 17."There would be, Lord."
18. 18."I recognise the earth as earth. But I have no craving for it," said the Lord.
19. 19."Therefore it is, say I, that by extirpating all cravings, by not lusting after them, but by destroying and abandoning and renouncing them all that I acquired enlightenment.
20. 20."Seek to be partakers, brethren, not of the world's goods but of my doctrines. For craving brings about attachment and attachment enslaves the mind."
21. 21. In these words did the Blessed Lord explain to Ananda and the brethren the evils of the acquisitive instinct.

§ 3. *His Joy at the Beautiful*

1. 1. The Buddha was so fond of the beautiful that he might well bear an *alias* and be called Buddha, the Lover of the Beautiful.
2. 2. So he preached to his followers:"Be in the company of the lovely."
3. 3. Addressing the bhikkhus, he said:
4. 4."Monks, I know not of any other single thing of such power to cause the arising of good states if not yet arisen, or the waning of evil states already arisen, as friendship with the lovely.
5. 5."In one who is a friend of what is lovely, good states not arisen do

arise and evil states already arisen wane. Evil states and devotion to evil states wanes, lack of devotion to good states disappears, good states and devotion thereto arise; lack of devotion to evil states increases.

6. 6."Monks, I know not of any other single thing of such power to prevent the arising of the limbs of wisdom, if not yet arisen, or, if they have already arisen, to prevent their reaching fulfilment by cultivation thereof, as unsystematic attention.

7. 7."In him who practices unsystematic attention, monks, the limbs of wisdom if not yet arisen, arise not and if arisen they reach not fulfilment by cultivation thereof.

8. 8."Of slight account, monks, is the loss of such things as relatives. Miserable indeed among losses is the loss of wisdom.

9. 9."Of slight account, monks, is the increase of such things as relatives. Chief of all the increases is that of wisdom.

10. 10."Wherefore I say, monks, ye should train yourselves thus: ' We will increase in wisdom.' You must train yourselves to win that.

II."Of slight account, monks, is the increase of such things as wealth. Chief of all the increases is that of wisdom. Wherefore I say, monks, thus, must ye train yourselves. ' We will increase in wisdom.'"You must train yourselves to win that.

12."Of slight account, monks, is the loss of such things as reputation. Miserable indeed is the loss of wisdom."

§ 4. *His Love for the Lovely*

1. 1. Once the Exalted One was staying among the Sakyans at Sakkara, a Sakyan township.

2. 2. Then the venerable Ananda came to the Exalted One, saluted him and sat down at one side. So seated, the venerable Ananda said this:

3. 3."The half of the holy life, Lord, is friendship with what is lovely, association with what is lovely, intimacy with what is lovely !"

4. 4."Say not so, Ananda! Say not so, Ananda! It is the whole, not the half, of the holy life,—this friendship, this association, this intimacy with what is lovely.

5. 5."Of a monk who is a friend, an associate, an intimate of what is lovely we may expect this,—that he will develop the Ariyan eightfold way,

that he will make much of the Ariyan eightfold way.

6. 6."And how, Ananda, does such a monk develop and make much of the Ariyan eightfold way?

7. 7."Herein, Ananda, he cultivates the right view, which is based on detachment, on dispassion, on cessation, which ends in self-surrender. He cultivates the right aim, which is so based and concerned: likewise right speech, right action, right living, right effort, right mindfulness and right concentration, which ends in self-surrender.

8. 8."That, Ananda, is how a monk who is a friend, an associate, an intimate of what is lovely, cultivates and makes much of the Ariyan eightfold way.

9. 9."This is the method, Ananda, by which you are to understand how the whole of this holy life consists in friendship, in association, in intimacy with what is lovely.

10. 10."Indeed, Ananda, beings liable to decay, liable to death, liable to grief, woe, lamentation and despair, are liberated therefrom because of their friendship with what is lovely.

11. 11."It is by this method, Ananda, that you are to understand how the whole of this holy life consists in friendship, in association, in intimacy with what is lovely."

EPILOGUE

1. 1. Tributes to the Buddha's Greatness.
2. 2. A Vow to Spread His Dhamma.
3. 3. A Prayer for His Return to His Native Land.

§ 1 *Tributes to the Buddha's Greatness*

1. 1. The Buddha was born 2500 years ago.
2. 2. What do modern thinkers and scientists say of him and his Dhamma? An anthology of their thoughts on the subject will be useful.
3. 3. Prof. S. S. Raghavachar says:
4. 4."The period immediately antecedent to the life of the Buddha was one of the darkest ages in the history of India.

5. 5."It was intellectually a backward age. The thought of the time was characterised by an implicit veneration for the authority of the scriptures.
6. 6."Morally it was a dark age.
7. 7."Morality meant for the believing Hindus the correct performance of rites and ceremonies enjoined in the holy texts.
8. 8."The really ethical ideas like self-sacrifice or purity will did not find appropriate positions in the moral consciousness of the time."
9. 9. Mr. R. J. Jackson says:
10. 10."The unique character of the Buddha's teaching is shown forth in the study of Indian Religious thought.
11. 11."In the hymns of the Rig-Veda we see man's thoughts turned outwards, away from

himself, to the world of the gods. 12" Buddhism directed man's search inwards to the potentiality hidden within himself.

1. 13."In the Vedas we find prayer, praise and worship.
2. 14."In Buddhism for the first time we find training of the mind to make it act righteously."
3. 15. Winwood Reade says:
4. 16."It is when we open the book of nature, it is when we read the story of evolution through millions of years, written in blood and tears, it is when we study the laws regulating life, the laws productive of development, that we see plainly how illusive is the theory that God is love.
5. 17."In everything there is wicked profligate and abandoned waste. Of all animals that are born only a very small percentage survives.
6. 18."Eat and be eaten is the rule in the ocean, the air, the forest. Murder is the law of growth."
7. 19. This is what Reade says in his "Martyrdom of Man." How different is the Dhamma of the Buddha.
8. 20. This is what Dr. Ranjan Roy says:
9. 21."Throughout the second half of the nineteenth century the three laws of conservation held sway. Nobody challenged them.
10. 22."They were the laws of matter, mass and energy.
11. 23."They were the trump cards of those idealists who cherished the thought of their being indestructible.
12. 24."Nineteenth century scientists professed them as the governing

factors of creation.

13. 25."Nineteenth century scientists professed them as constituting the fundamental nature of the Universe.

14. 26."They conceived that the Universe was filled with indestructible atoms.

15. 27."Just as the nineteenth century was drawing to a close. Sir J. J. Thompson and his followers began to hammer the atoms.

16. 28."Surprisingly enough the atoms began to break up into fragments.

17. 29."These fragments came to be called electrons, all similar and charged with negative electricity.

18. 30."Atoms hailed by Maxwell as imperishable foundation-stones of the Universe or Reality broke down.

19. 31."They got broken into tiny particles, protons and electrons charged with positive and negative electricity respectively.

20. 32."The concept of a fixed unalterable mass abandoned Science for good. In this century the Universal belief is that matter is being annihilated at every instant.

21. 33."The Buddha's doctrine of Anicca (transitoriness) is confirmed.

22. 34."Science has proved that the course of the Universe is a grouping and dissolution and regrouping.

23. 35."The trend of Modern Science is the trend of an ultimate reality, unity and diversity of ego.

24. 36."Modern Science is the echoing of the Buddhists doctrines of transitoriness (annica) and of egolessness (anatta)."

25. 37. Mr. E. G. Taylor, in his "Buddhism and Modern Thought," says:

26. 38."Man has been ruled by external authority long enough. If he is to be truly civilised, he must learn to be ruled' by his own principles.

Buddhism is the earliest ethical system where man is called upon to have himself governed by himself.

27. 39."Therefore a progressive world needs Buddhism to teach it this supreme lesson."

28. 40. The Reverend Leslie Bolton, unitarian minister, says:

29. 41."I see in the spiritual psychology of Buddhism its most powerful contribution.

30. 42."Unitarian Christians like Buddhists reject the external authority of church books or creeds and find in man himself the guiding lamp.

31. 43."Unitarians see in Jesus and Gautama noble exponents of the way of life."
32. 44. Prof. Dwight Goddard says:
33. 45."Among the world's religious teachers, Buddha alone has the glory of having rightly judged the intrinsic greatness of man's capacity to work out his salvation without extraneous aid."
34. 46."If the worth of a truly great man consists in his raising the worth of all mankind, who is better entitled to be called truly great than the Blessed One.
35. 47."Who instead of degrading him by placing another being over him, has exalted him to the highest pinnacle of wisdom and love."
36. 48. Mr. E. J. Mills, author of "Buddhism," says: 49."In no other religion are the values of knowledge and evil of ignorance so much insisted upon as they are in Buddhism."
37. 50."No other religion lays so much stress upon keeping one's eyes open.
38. 51."No other religion has formulated such deep laid plans for mental culture."
39. 52. Prof. W. T. Stace says in his Buddhist ethics :
40. 53."The Buddhist moral ideal, the Arhat, had to be both morally and intellectually great.
41. 54."He had to be a philosopher, as well as a man of good conduct.
42. 55."Knowledge was always stressed by Buddhism as essential to Salvation, and ignorance as one of the two main causes of failure, to attain it (craving or attachment being the other).
43. 56."On the contrary, knowledge has never been any part of the Christian ideal man."
44. 57."Owing to the unphilosophical character of its founder in the Christian Scheme of thought the moral side of man has been divorced from the intellectual side. 58."Far more of the world's misery is caused by stupidity and blind faith than by wickedness.
45. 59."The Buddha did not allow this."
46. 60. Enough unto this to show how great and how unique is the Buddha and his Dhamma.
47. 61. Who would not say let such a one be our Master?

§ 2. *A Vow to Spread His Dhamma*

1. "There are beings without limit, Let us take the vow to convey them all across.

1. 2. There are depravities in us without number, Let us take the vow to extinguish them all.

2. 3. There are truths without end, Let us take the vow to comprehend them all.

3. 4. There is the Way of Buddha without comparison, Let us take the vow to accomplish it perfectly."

Encyclopadia of Religion & Ethics, Vol. X, p. 168. § 3. A Prayer for His Return to His Native Land

1. "O Exalted One! I trust myself whole-heartedly To the Tathagata whose light pervades, Without any impediment, the regions in the ten quarters,

And express my earnest desire to be born in Thy Land.

2. 2. In realising in vision the appearance of Thy Land, I know that it surpasses all realms in the threefold existence.

3. 3. That it is like sky, embracing all, Vast and spacious without boundaries.

4. 4. Thy mercy and compassion in accordance with the righteous way, Is an outgrowth of the stock of merits (accumulated by Thee), which are beyond all worldly good;

5. 5. And Thy light permeates everywhere, Like the mirrors of the Sun and the Moon.

6. 6. Let me pray that all beings, having been born there, Shall proclaim the Truth, like Buddha Thysfelf.

7. 7. Herewith I write down this essay and utter these verses, And pray that I could see Thee, O Buddha, face to face,

8. 8. And that I could, together with all my fellow-beings, Attain the birth in the Land of Bliss."

Encyclopadia of Religion & Ethics, Vol. X, p. 169.

Editorial Note in the source publication: Dr. Babasaheb Ambedkar: Writings and Speeches, Vol. 3:

The Committee found three different typed copies of an essay on Buddha and Karl Marx in loose sheets, two of which have corrections in the author's own handwriting. After scrutinising these, this essay is compiled incorporating the corrections. The essay is divided into sub-topics as shown below: Introduction

- 1. The Creed of the Buddha*
 - 2. The Original Creed of Karl Marx*
 - 3. What survives of the Marxian Creed?*
 - 4. Comparison between Buddha and Karl Marx*
 - 5. Means*
 - 6. Evaluation of Means*
 - 7. Whose Means are More Efficacious?*
 - 8. Withering away of the State*
- Editors.
-

A comparison between Karl Marx and Buddha may be regarded as a joke. There need be no surprise in this. Marx and Buddha are divided by 2381 years. Buddha was born in 563 BC and Karl Marx in 1818 AD. Karl Marx is supposed to be the architect of a new ideology-polity a new Economic system. The Buddha on the other hand is believed to be no more than the

founder of a religion, which has no relation to politics or economics. The heading of this essay "Buddha or Karl Marx" which suggests either a comparison or a contrast between two such personalities divided by such a lengthy span of time and occupied with different fields of thought is sure to sound odd. The Marxists may easily laugh at it and may ridicule the very idea of treating Marx and Buddha on the same level. Marx so modern and Buddha so ancient! The Marxists may say that the Buddha as compared to their master must be just primitive. What comparison can there be between two such persons? What could a Marxist learn from the Buddha? What can Buddha teach a Marxist? None-the-less a comparison between the two is a attractive and instructive. Having read both and being interested in the ideology of both a comparison between them just forces itself on me. If the Marxists keep back their prejudices and study the Buddha and understand what he stood for I feel sure that they will change their attitude. It is of course too much to expect that having been determined to scoff at the Buddha they will remain to pray. But this much can he said that they will realise that there is something in the Buddha's teachings which is worth their while to take note of.

I THE CREED OF THE BUDDHA

The Buddha is generally associated with the doctrine of Ahimsa. That is taken to be the be-all and end-all of his teachings. Hardly any one knows that what the Buddha taught is something very vast: far beyond Ahimsa. It is therefore necessary to set out in detail his tenets. I enumerate them below as I have understood them from my reading of the Tripitaka :

1. Religion is necessary for a free Society.
2. Not every Religion is worth having.
3. Religion must relate to facts of life and not to theories and speculations about God, or Soul or Heaven *or* Earth.
4. It is wrong to make God the centre of Religion.
5. It is wrong to make salvation of the soul as the centre of Religion.
6. It is wrong to make animal sacrifices to be the centre of religion.
7. Real Religion lives in the heart of man and not in the Shastras.
8. Man and morality must be the centre of religion. If not, Religion is a cruel superstition.
9. It is not enough for Morality to be the ideal of life. Since there is no God it must become the Jaw of life.
10. The function of Religion is to reconstruct the world and to make it happy and not to explain its origin or its end.

11. That the unhappiness in the world is due to conflict of interest and the only way to solve it is to follow the Ashtanga Marga.

12. That private ownership of property brings power to one class and sorrow to another.

13. That it is necessary for the good of Society that this sorrow be removed by removing its cause.

14. All human beings are equal.

15. Worth and not birth is the measure of man.

16. What is important is high ideals and not noble birth.

17. Maitri or fellowship towards all must never be abandoned. One owes it even to one's enemy.

18. Every one has a right to learn. Learning is as necessary for man to live as food is.

19. Learning without character is dangerous.

20. Nothing is infallible. Nothing is binding forever. Every thing is subject to inquiry and examination. 21. Nothing is final.

22. Every thing is subject to the law of causation.

23. Nothing is permanent or sanatan. Every thing is subject to change. Being is always becoming.

24. War is wrong unless it is for truth and justice.

25. The victor has duties towards the vanquished. This is the creed of the Buddha in a summary form. How ancient but how fresh! How wide and how deep are his teachings!

II THE ORIGINAL CREED OF KARL MARX

Let us now turn to the creed of Karl Marx as originally propounded by him. Karl Marx is no doubt the father of modern socialism or Communism but he was not interested merely in propounding the theory of Socialism. That had been done long before him by others. Marx was more interested in proving that his Socialism was scientific. His crusade was as much against the capitalists as it was against those whom he called the Utopian Socialists. He disliked them both. It is necessary to note this point because Marx attached the greatest importance to the scientific character of his Socialism. All the doctrines which Marx propounded had no other purpose than to establish his contention that his brand of Socialism was scientific and not Utopian.

By scientific socialism what Karl Marx meant was that his brand of socialism was *inevitable* and *inescapable* and that society was moving towards it and that nothing could prevent its march. It is to prove this contention

of his that Marx principally laboured. Marx's contention rested on the following theses. They were:—

(i) That the purpose of philosophy is to reconstruct the world and not to explain the origin of the universe.

(ii) That the force which shapes the course of history are primarily economic.

(iii) That society is divided into two classes, owners and workers. (iv) That there is always a class conflict going on between the two classes.

(v) That the workers are exploited by the owners who misappropriate the surplus value, which is the result of the workers' labour.

(vi) That this exploitation can be put an end to by nationalisation of the instruments of production i.e. abolition of private property.

(vii) That this exploitation is leading to greater and greater impoverishment of the workers.

(viii) That this growing impoverishment of the workers is resulting in a revolutionary spirit among the workers *and* the conversion of the class conflict into a class struggle.

(ix) That as the workers outnumber the owners, the workers are bound to capture the State and establish their rule, which he called the dictatorship of the proletariat.

(x) These factors are irresistible and therefore socialism is inevitable.

I hope I have reported correctly the propositions, which formed the original basis of Marxian Socialism.

III WHAT SURVIVES OF THE MARXIAN CREED

Before making a comparison between the ideologies of the Buddha and Karl Marx it is necessary to note how much of this original corpus of the Marxian creed has survived; how much has been disproved by history and how much has been demolished by his opponents.

The Marxian Creed was propounded sometime in the middle of the nineteenth century. Since then it has been subjected to much criticism. As a result of this criticism much of the ideological structure raised by Karl Marx has broken to pieces. There is hardly any doubt that Marxist claim that his socialism was inevitable has been completely disproved. The dictatorship of the Proletariat was first established in 1917 in one country after a period of something like seventy years after the publication of his *Das Capital* the gospel of socialism. Even when the Communism—which is another name for the dictatorship of the Proletariat—came to Russia, it did not come as something inevitable without any kind of human effort. There

was a revolution and much deliberate planning had to be done with a lot of violence and blood shed, before it could step into Russia. The rest of the world is still waiting for coming of the Proletarian Dictatorship. Apart from this general falsification of the Marxian thesis that Socialism is inevitable, many of the other propositions stated in the lists have also been demolished both by logic as well as by experience. Nobody now I accepts the economic interpretation of history as the only explanation of history. Nobody accepts that the proletariat has been progressively pauperised. And the same is true about his other premises.

What remains of the Karl Marx is a residue of fire, small but still very important. The residue in my view consists of four items:

(i) The function of philosophy is to reconstruct the world and not to waste its time in explaining the origin of the world. (ii) That there is a conflict of interest between class and class. (iii) That private ownership of property brings power to one class and sorrow to another through exploitation.

(iv) That it is necessary for the good of society that the sorrow be removed by the abolition of private property.

IV COMPARISON BETWEEN BUDDHA AND KARL MARX

Taking the points from the Marxian Creed which have survived one may now enter upon a comparison between the Buddha and Karl Marx.

On the first point there is complete agreement between the Buddha and Karl Marx. To show how close is the agreement I quote below a part of the dialogue between Buddha and the Brahmin Potthapada.

"Then, in the same terms, Potthapada asked (the Buddha) each of the following questions:

1. Is the world not eternal?
2. Is the world finite?
3. Is the world infinite?
4. Is the soul the same as the body?
5. Is the soul one thing, and the body another?
6. Does one who has gained the truth live again after death?
7. Does he neither live again, nor not live again, after death? And to each question the exalted one made the same reply: It was this.

"That too, Potthapada, is a matter on which I have expressed no opinion".

28."But why has the Exalted One expressed no opinion on that?"(Because) "This question is not calculated to profit, it is not

concerned with (the Dhamma) it does not redound even to the elements of right conduct, nor to detachment nor to purification from lust, nor to quietude, nor to tranquillisation of heart, nor to real knowledge, nor to the insight (of the higher stages of the Path), nor to Nirvana. Therefore it is that I express no opinion upon it." On the second point I give below a quotation from a dialogue between Buddha and Pasenadi King of Kosala:

"Moreover, there is always strife going on between kings, between nobles, between Brahmins, between house holders, between mother *and* son, between son and father, between brother and sister, , between sister and brother, between companion and companion. . ." Although these are the words of Pasenadi, the Buddha did not deny that they formed a true picture of society.

As to the Buddha's own attitude towards class conflict his doctrine ". of Ashtanga Marga recognises that class conflict exists and that it is ; the class conflict which is the cause of misery.

On the third question I quote from the same dialogue of Buddha with Potthapada;

"Then what is it that the Exalted One has determined?" "I have expounded, Potthapada, that sorrow and misery exist!" "I have expounded, what is the origin of misery. I have expounded what is the cessation of misery: I have expounded what is method by which one may reach the cessation of misery.

30. 'And why has the Exalted One put forth a statement as to that?'

' Because that questions Potthapada, is calculated to profit, is concerned with the Dhamma redounds to the beginnings of right conduct, to detachment, to purification from lusts, to quietude, to tranquillisation of heart, to real knowledge, to the insight of the higher stages of the Path and to Nirvana. Therefore is it, Potthapada that I have put forward a statement as to that. '

That language is different but the meaning is the same. If for misery one reads exploitation Buddha is not away from Marx.

On the question of private property the following extract from a dialogue between Buddha and Ananda is very illuminating. In reply to a question by Ananda the Buddha said:

"I have said that avarice is because of possession. Now in what way that is so, Ananda, is to be understood after this manner. Where there is no possession of any sort or kind whatever by any one or anything, then there being no possession whatever, would there, owing to this cessation of possession, be any appearance of avarice?" "There would not. Lord".

'Wherefore, Ananda, just that is the ground, the basis, the genesis, the cause of avarice, to wit, possession.

31. 'I have said that tenacity is the cause possession. Now in what way that is so, Ananda, is to be understood after this manner. Were there no tenacity of any sort or kind whatever shown by any one with respect to any thing, then there being whatever, would there owing to this cessation of tenacity, be any appearance of possession? ' 'There would not. Lord.'

'Wherefore, Ananda, just that is the ground, the basis, the genesis, the cause of possession, to wit tenacity. ' On the fourth point no evidence is necessary. The rules of the Bhikshu Sangh will serve as the best testimony on the subject.

According to the rules a Bhikku can have private property only in the following eight articles and no more. These eight articles are: —

1. I
2. } Three robes or pieces of cloth for daily wear.
3. I
4. A girdle for the loins.
5. An alms-bowl.
6. A razor.
7. A needle.
8. A water strainer.

Further a Bhikku was completely forbidden to receive gold or silver for fear that with gold or silver he might buy some thing beside the eight things he is permitted to have.

These rules are far more rigorous than are to be found in communism in Russia.

V THE MEANS

We must now come to the means. The means of bringing about Communism, which the Buddha propounded, were quite definite. The means can be decided into three parts. Part I consisted in observing the Pancha Silas. The Enlightenment gave birth to a new gospel, which contains the key to the solution *of* the problem, which was haunting him.

The foundation of the New Gospel is the fact that the world was full of misery and unhappiness. It was fact not merely to be noted but to be regarded as being the first and foremost in any scheme of salvation. The recognition of this fact the Buddha made the starting point of his gospel.

To remove this misery and unhappiness was to him the aim and object of the gospel if it is to serve any useful purpose.

Asking what could be the causes of this misery the Buddha found that there could be only two.

A part of the misery and unhappiness of man was the result of his own misconduct. To remove this cause of misery he preached the practice of Panch Sila.

The Panch Sila comprised the following observations: (1) To abstain from destroying or causing destruction of any living things (2) To abstain from stealing i.e. acquiring or keeping by fraud or violence, the property of another: (3) To Abstain from telling untruth: (4) To abstain from lust: (5) To abstain from intoxicating drinks.

A part of the misery and unhappiness in the world was according to the Buddha the result of man's inequity towards man. How was this inequity to be removed? For the removal of man's inequity towards man the Buddha prescribed the Noble Eight-Fold Path. The elements of the Noble Eight-Fold Path are:

(1) Right views i.e. freedom from superstition: (2) Right aims, high and worthy of the intelligent and earnest men; (3) Right speech i.e. kindly, open, truthful: (4) Right Conduct i.e. peaceful, honest and pure; (5) Right livelihood i.e. causing hurt or injury to no living being; (6) Right perseverance in all the other seven; (7) Right mindfulness i.e. with a watchful and active mind; and (8) Right contemplation i.e. earnest thought on the deep mysteries of life.

The aim of the Noble Eight-Fold Path is to establish on earth the kingdom of righteousness, and thereby to banish sorrow and unhappiness from the face of the world.

The third part of the Gospel is the doctrine of Nibbana. The doctrine of Nibbana is an integral part of the doctrine of the Noble Eight-Fold Path. Without Nibbana the realisation of the Eight-Fold Path cannot be accomplished.

The doctrine of Nibbana tells what are the difficulties in the way of the realisation of the Eight-Fold Path.

The chiefs of these difficulties are ten in number. The Buddha called them the Ten Asavas, Fetters or Hindrances.

The first hindrance is the delusion of self. So long as a man is wholly occupied with himself, chasing after every bauble that he vainly thinks will satisfy the cravings of his heart, there is no noble path for him. Only when his eyes have been opened to the fact that he is but a tiny part of a measureless, whole, only when he begins to realise how impermanent a

thing is his temporary individuality can he even enter upon this narrow path.

The second is Doubt and Indecision. When a man's eyes are opened to the great mystery of existence, the impermanence of every individuality, he is likely to be assailed by doubt and indecision as to his action. To do or not to do, after all my individuality is impermanent, why do anything are questions, which make him indecisive or inactive. But that will not do in life. He must make up his mind to follow the teacher, to accept the truth and to enter on the struggle or he will get no further.

The third is dependence on the efficacy of Rites and Ceremonies. No good resolutions, however firm will lead *to* anything unless a man gets rid of ritualism: of the belief that any outward acts, any priestly powers, and holy ceremonies, can afford him an assistance of any kind. It is only when he has overcome this hindrance, that men can be said to have fairly entered upon the stream and has a chance sooner or later to win a victory.

" The fourth consists of the bodily passions... The fifth is ill will towards other individuals. The sixth is the suppression of the desire for a future life with a material body and the seventh is the desire for a future life in an immaterial world.

The eighth hindrance is Pride and ninth is self-righteousness. These are failings which it is most difficult for men to overcome, and to which superior minds are peculiarly liable a Praisical contempt for those who are less able and less holy than themselves.

The tenth hindrance is ignorance. When all other difficulties are conquered this will even remain, the thorn in the flesh of the wise and good, the last enemy and the bitterest foe of man.

Nibbana consists in overcoming these hindrances to the pursuit of the Noble Eight-Fold Path.

The doctrine of the Noble Eight-Fold Path tells what disposition of the mind which a person should sedulously cultivate. The doctrine of Nibbana tells of the temptation or hindrance which a person should earnestly overcome if he wishes to trade along with the Noble Eight-Fold Path

The Fourth Part of the new Gospel is the doctrine of Paramitas. The doctrine of Paraimitas inculcates the practice of ten virtues in one's daily life.

These are those ten virtues—d) Panna (2) Sila (3) Nekkhamma (4) Dana(5) Virya(6) Khanti(7) Succa(8) Aditthana(9) Mettaa-and (10) Upekkha.

Panna or wisdom is the light that removes the darkenss of Avijja, Moha or Nescience. The Panna requires that one must get all his doubts removed

by questioning those wiser than him self, associate with the wise and cultivate the different arts and sciences which help to develop the mind.

Sila is moral temperament, the disposition not to do evil and the disposition to do good; to be ashamed of doing wrong. To avoid doing evil for fear of punishment is Sila. Sila means fear of doing wrong. Nekkama is renunciation of the pleasures of the world. Dana means the giving of one's possessions, blood and limbs and even one's life for the good of the others without expecting anything in return.

Virya is right endeavour. It is doing with all your might with thought never turning back, whatever you have undertaken to do.

Khanti is forbearance. Not to meet hatred by hatred is the essence of it. For hatred is not appeased by hatred. It is appeased only by forbearance.

Succa is truth. An aspirant for Buddha never speaks a lie. His speech is truth and nothing but truth.

Aditthana is resolute determination to reach the goal. Metta is fellow feeling extending to all beings, foe and friend, beast and man.

Upekka is detachment as distinguished from indifference. It is a state of mind where there is neither like nor dislike. Remaining unmoved by the result and yet engaged in the pursuit of it.

These virtues one must practice to his utmost capacity. That is why they are called Paramitas (States of Perfection).

Such is the gospel the Buddha enunciated as a result of his enlightenment to end the sorrow and misery in the world.

It is clear that the means adopted by the Buddha were to convert a man by changing his moral disposition to follow the path voluntarily.

The means adopted by the Communists are equally clear, short and swift. They are (1) Violence and (2) Dictatorship *of* the Proletariat.

The Communists say that there are the only two means of establishing communism. The first is violence. Nothing short of it will suffice to break up the existing system. The other is dictatorship of the proletariat. Nothing short of it will suffice to continue the new system.

It is now clear what are the similarities and differences between Buddha and Karl Marx. The differences are about the means. The end is common to both.

VI EVALUATION OF MEANS

We must now turn to the evaluation of means. We must ask whose means are superior and lasting in the long run. There are, however some misunderstandings on both sides. It is necessary to clear them up. Take

violence. As to violence there are many people who seem to shiver at the very thought of it. But this is only a sentiment. Violence cannot be altogether dispensed with. Even in non-communist countries a murderer is hanged. Does not hanging amount to violence? Non-communist countries go to war with non-communist countries. Millions of people are killed. Is this no violence? If a murderer can be killed, because he has killed a citizen, if a soldier can be killed in war because he belongs to a hostile nation why cannot a property owner be killed if his ownership leads to misery for the rest of humanity? There is no reason to make an exception in favour of the property owner, why one should regard private property as sacrosanct.

The Buddha was against violence. But he was also in favour of justice and where justice required he permitted the use of force. This is well illustrated in his dialogue with Sinha Senapati the Commander-in-Chief of Vaishali. Sinha having come to know that the Buddha preached Ahimsa went to him and asked:

"The Bhagvan preaches Ahimsa. Does the Bhagvan preach an offender to be given freedom from punishment? Does the Bhagvan preach that we should not go to war to save our wives, our children and our wealth? Should we suffer at the hands of criminals in the name of Ahimsa.?"

"Does the Tathagata prohibit all war even when it is in the interest of Truth and Justice?"

Buddha replied. You have wrongly understood what I have been preaching. An offender must be punished and an innocent man must be freed. It is not a fault of the Magistrate if he punishes an offender. The cause of punishment is the fault of the offender. The Magistrate who inflicts the punishment is only carrying out the law. He does not become stained with Ahimsa. A man who fights for justice and safety cannot be accused of Ahimsa. If all the means of maintaining peace have failed then the responsibility for Himsa falls on him who starts war. One must never surrender to evil powers. War there may be. But it must not be for selfish ends...."

There are of course other grounds against violence such as those urged by Prof. John Dewey. In dealing with those who contend that the end justifies the means is morally perverted doctrine, Dewey has rightly asked what can justify the means if not the end? It is only the end that can justify the means.

Buddha would have probably admitted that it is only the end which would justify the means. What else could? And he would have said that if the end justified violence, violence was a legitimate means for the end in view. He certainly would not have exempted property owners from force if

force were the only means for that end. As we shall see his means for the end were different. As Prof. Dewey has pointed out that violence is only another name for the use of force and although force must be used for creative purposes a distinction between use of force as energy and use of force as violence needs to be made. The achievement of an end involves the destruction of many other ends, which are integral with the one that is sought to be destroyed. Use of force must be so regulated that it should save as many ends as possible in destroying the evil one. Buddha's Ahimsa was not as absolute as the Ahimsa preached by Mahavira the founder of Jainism. He would have allowed force only as energy. The communists preach Ahimsa as an absolute principle. To this the Buddha was deadly opposed.

As to Dictatorship the Buddha would have none of it. He was born a democrat and he died a democrat. At the time he lived there were 14 monarchical states and 4 republics. He belonged to the Sakyas and the Sakya's kingdom was a republic. He was extremely in love with Vaishali which was his second home because it was a republic. Before his Mahaparinirbhan he spent his Varshavasa in Vaishali. After the completion of his Varshavasa he decided to leave Vaishali and go elsewhere as was his wont. After going some distance he looked back on Vaishali and said to Ananda."This is the last look of Vaishali which the Tathagata is having". So fond was he of this republic.

He was a thorough equalitarian. Originally the Bhikkus, including the Buddha himself, wore robes made of rags. This rule was enunciated to prevent the aristocratic classes from joining the Sangh. Later Jeevaka the great physician prevailed upon the Buddha to accept a robe, which was made of a whole cloth. The Buddha at once altered the rule and extended it to all the monks.

Once the Buddha's mother Mahaprajapati Gotami who had joined the Bhikkuni Sangh heard that the Buddha had got a chill. She at once started preparing a scarf for him. After having completed it she took to the Buddha and asked him to wear it. But he refused to accept it saying that if it is a gift it must be a gift to the whole Sangh and not to an individual member of the Sangh. She pleaded and pleaded but he refused to yield.

The Bhikshu Sangh had the most democratic constitution. He was only one of the Bhikkus. At the most he was like a Prime Minister among members of the Cabinet. He was never a dictator. Twice before his death he was asked to appoint some one as the head of the Sangh to control it. But each time he refused saying that the Dhamma is the Supreme

Commander of the Sangh. He refused to be a dictator and refused to appoint a dictator.

What about the value of the means? Whose means are superior and lasting in the long run?

Can the Communists say that in achieving their valuable end they have not destroyed other valuable ends? They have destroyed private property. Assuming that this is a valuable end can the Communists say that they have not destroyed other valuable end in the process of achieving it? How many people have they killed for achieving their end. Has human life no value? Could they not have taken property without taking the life of the owner?

Take dictatorship. The end of Dictatorship is to make the Revolution a permanent revolution. This is a valuable end. But can the Communists say that in achieving this end they have not destroyed other valuable ends? Dictatorship is often defined as absence of liberty or absence of Parliamentary Government. Both interpretations are not quite clear. There is no liberty even when there is Parliamentary Government. For law means want of liberty. The difference between Dictatorship and Parliamentary Govt. lies in this. In Parliamentary Government every citizen has a right to criticise the restraint on liberty imposed by the Government. In Parliamentary Government you have a duty and a right; the duty to obey the law and right to criticise it. In Dictatorship you have only duty to obey but no right to criticise it.

VII WHOSE MEANS ARE MORE EFFICACIOUS

We must now consider whose means are more lasting. One has to choose between Government by force and Government by moral disposition.

As Burke has said force cannot be a lasting means. In his speech on conciliation with America he uttered this memorable warning:

“First, Sir, permit me to observe, that the use of force alone is but temporary. It may subdue for a moment; but it does not remove the necessity of subduing again; and a nation is not governed which is perpetually to be conquered.”

“My next objection is its uncertainty. Terror is not always the effect of force, and an armament is not a victory. If you do not succeed, you are without resource, for, conciliation failing, force remains; but force failing, no further hope of reconciliation is left. Power and authority are sometimes bought by kindness; but they can never be begged as alms by an impoverished and defeated violence.

A further objection to force is that you impair the object by your very endeavours to preserve it. The thing you fought for is the thing, which you recover, but depreciated, sunk, wasted and consumed in the contest.”

In a sermon addressed to the Bhikkus the Buddha has shown the difference between the rule by Righteousness and Rule by law i.e. force. Addressing the Brethren he said:

(2) Long ago, brethren, there was Sovereign overlord named Strongtyre, a king ruling in righteousness, lord of the four quarters of the earth, conqueror, the protector of his people. He was the possessor of the celestial wheel. He lived in supremacy over this earth to its ocean bounds, having conquered it, not by the courage, by the sword, but by righteousness.

(3) Now, brethren, after many years, after many hundred years. after many thousand years, king Strongtyre command a certain man, saying:

"Thou should est see, Sir, the Celestial Wheel has sunk a little, has slipped down from its place, bring me word.”

Now after many many hundred years had slipped down from its place On seeing this he went to King Strongtyre and said:”Know. sir, for a truth that the Celestial Wheel has sunk, has slipped down from its place.”

The king Strongtyre, brethren, let the prince his eldest son be sent for and speak thus:

' Behold, dear boy, my Celestial Wheel has sunk a little, has slipped down from its place. Now it has been told me; If the Celestial Wheel of a wheel turning King shall sink down, shall slip down from its place, that king has not much longer to live. I have had my fill of human pleasures; 'It's time to seek after divine joys, Come, dear boy, take thou charge over this earth bounded by the ocean. But I, shaving, hair and beard, and donning yellow robes, will go forth from home into the homeless state.

So brethren. King Strongtyre, having in due form established his eldest son on the throne, shaved hair and bearded, donned yellow robes and went forth from home into homeless state. But on the seventh day after the royal hermit had gone forth, the Celestial Wheel disappeared.

(4) Then a certain man went to the King, and told him, saying: Know, O King, for a truth, that the Celestial Wheel has disappeared!

Then that King, brethren, was grieved thereat and afflicted with sorrow. And he went to the royal hermit, and told him, saying, Know, sir, for a truth, that the Celestial Wheel has disappeared.

And the anointed king so saying, the royal hermit made reply. Grieve thou not, dear son, that the Celestial Wheel has disappeared, nor be afflicted that the Celestial Wheel has disappeared. For no paternal heritage

of thin, dear son, is the Celestial Wheel. But verily, dear son, turn thou in the Ariyan turning of the Wheel-turners. (Act up to the noble ideal of duty set before themselves by the true sovereigns of the world). Then it may well be that if thou carry out the Ariyan duty of a Wheel-turning Monarch, and on the feast of the moon thou wilt for, with bathed head to keep the feast on the chief upper terrace, to the Celestial Wheel will manifest, itself with its thousand spokes its tyre, navel and all its part complete. (5) 'Put what, sire is this Ariya duty of a Wheel-turning Monarch?' This, dear son, that thou, leaning on the Norm (the law of truth and righteousness) honouring, respecting and revering it, doing homage to it, hallowing it, being thyself a Norm-banner, a Norm-signal, having the Norm as thy master, should provide the right watch, ward, and protection for thine own folk, for the army, for the nobles, for vassals, for brahmins and house holders, for town and country dwellers, for the religious world, and for beasts and birds. Throughout thy kingdom let no wrongdoing prevail. And whosoever in thy kingdom is poor, to him let wealth be given.

' And when dear son, in thy kingdom men of religious life, renouncing the carelessness arising from intoxication of the senses, and devoted to forbearance and sympathy, each mastering self, each claiming self, each protecting self, shall come to thee from time to time, and question the concerning what is good and what is bad. what is criminal and what is not, what is to be done and what is to be left undone, what line of action will in the long run work for weal or for woe, thou shouldest hear what they have to say and thou shouldest deter them from evil, and bid them take up what is good. This, dear son, is the Ariyan duty of a sovereign of the world.'

' Even so, ' sire, answered the anointed king, and obeying, and carried out the Ariyan duty of a sovereign lord. To him, thus behaving, when on the feast of the full moon he had gone in the observance with bathed head to the chief upper Terrace the Celestial Wheel revealed itself, with its thousand spokes, its tyre. its naval, and all its part complete. And seeing this is occurred to the king: ' It has been told me that a king to whom on such a occasion the Celestial Wheel reveals itself completely, becomes a Wheel-turning monarch. May I even I also become a sovereign of the world.'

(6) Then brethren, the king arose from his seat and uncovering his robe from one shoulder, took in his left hand a pitcher, and with his right hand sprinkled up over the Celestial Wheel, saying: ' Roll onward, O Lord Wheel! Go forth and overcome, O Lord Wheel ! ' Then, brethren, the Celestial Wheel rolled onwards towards the region of the East. and after it went the Wheel-turning king, and with him his army, horses and chariots

and elephants and men. And in whatever place, brethren, the wheel stopped, there the king, the victorious war-lord, took up his abode, and with him his fourfold army. Then the all, the rival kings in the region of the East came to the sovereign king and said 'Come, O mighty king! Welcome, O mighty king! All is thine, O mighty King! Teach us, O mighty king!'

The king, the sovereign war-lord, speak thus: 'Ye shall slay no living thing. Ye shall not take that which has not been given. Ye shall not act wrongly touching bodily desires. Ye shall speak no lie. Ye shall drink no maddening drink. Enjoy your possessions as you have been wont to do.'

(7) Then, brethren, the Celestial Wheel, plunging down to the Eastern ocean, rose up out again, and rolled onwards to the region of the south... (and there all happened as had happened in the East). And in like manner the Celestial Wheel, plunging into Southern ocean, rose up out again and rolled onward to the region of the West. . . and of the North: and there too happened as had happened in the Southern and West.

Then when the Celestial Wheel had gone forth conquering over the whole earth to its ocean boundary, it returned to the royal city, and stood, so that one might think it fixed, in front of the judgement hall at entrance to the inner apartments of the king, the Wheel-turner, lighting up with its glory the facade of the inner apartments of the king, the sovereign of the world.

(8) And a second king. brethren, also a Wheel-turning monarch,. . . and a third. . . and a fourth. . . and a fifth. . . and a sixth. . . and a seventh king, a victorious war-lord, after many years, after many hundred years, after many thousand years, command a certain man, saying:

'If thou should'st see, sirrah, that the Celestial Wheel has sunk down, has slid from its place, bring me word.' 'Even so, sire.' replied the man.

So after many years, after many hundred years, after many thousand years, that man saw that the Celestial Wheel had sunk down, had become dislodged from its place. And so seeing he went to the king, the warlord, and told him.

Then that king did (even as Strongtyre had done). And on the seventh day after the royal hermit had gone forth the Celestial Wheel disappeared.

Then a certain man went and told the King. Then the King was grieved at the disappearance of the wheel, and afflicted with grief. But he did not go to the hermit-king to ask concerning, the Ariyan Duty of sovereign war-lord. But his own ideas, forsooth, he governed his people; and they so governed differently from what they had been. did not prosper as they used to do under former kings who had carried out the Arivan duty of a sovereign king.

Then, brethren, the ministers and courtiers, the finance officials, the guards and door keepers and they *who* lived by sacred verses came to the King and speak thus:

'Thy people, O king. whilst thou governest them by thine own ideas differently from the way to which they were used when former kings were carrying out the Ariyan Duty prosper not. Now there are in thy kingdom ministers and courtiers, finance officers, guards and custodians, and they who live by sacred verses—both all of us and others—who keep the knowledge of the Ariyan duty of the sovereign king. to ! O king. do thou ask us concerning it: to thee thus asking will we declare it.'

9. Then, brethren, the king, having made the ministers and all the rest sit down together, asked them about the Ariyan duty of Sovereign war-lord. And they declared it unto him. And when he had heard them, he did provide the due watch and ward protection, but on the destitute he bestowed no wealth and because this was not done, poverty became widespread.

When poverty was thus become rife, a certain man took that which others had not given him, what people call by theft. Him they caught, and brought before the king, saying: 'This man, O king has taken that which was not given to him and that is theft'.

Thereupon the king speak thus to the man. 'Is it true sirrah, that thou hast taken what no man gave thee, hast committed what men call theft.' It is true, O king.' 'But why?'

'O king, I have nothing to keep me alive.' Then the king bestowed wealth on that man, saying: 'With this wealth sir, do thou both keep thyself alive, maintain thy parents, maintain children and wife, carry on thy business.' 'Even so, O king,' replied the man.

10. Now another man, brethren, took by theft what was not given him. Him they caught and brought before the king and told him., saying: 'this man, O king, hath taken by theft what was not given him'.

And the king (spoke and did even as he had spoken and done to the former man.)

II. Now men heard brethren, that to them who had taken by theft what was not given them, the King was giving wealth. And hearing they thought, let us then take by theft what has not been given us.

Now a certain man did so. And him they caught and charged before the king who (as before) asked him why he had stolen. 'Because, O king I cannot maintain myself. Then the king thought: If I bestow wealth on anyone so ever who has taken by theft what was not given him, there will

be hereby and increase of this stealing. Let me now put final stop to this and inflict condign punishment on him, have his head cut off!

So he bade his man saying ' now look ye! bind this man's arms behind him with a strong rope and tight knot, shave his head bald, lead him around with a harsh sounding drum, from road to road, from cross ways to cross ways, take him out by the southern gate and to the south of the town, put a final stop to this, inflict on him uttermost penalty, cut of his head.'

' Even so, O king ' answered the men, and carried out his commands.

12. Now men heard, brethren, that they who took by theft what was not given them were thus put to death. And hearing they thought, let us also now have sharp swords made ready for themselves, and them from whom we take what is not given us—what they call them— let us put a final stop to them, inflict on them uttermost penalty., and their heads off.

And they got themselves sharp swords, and came forth to sack village and town and city, and to work highway robbery. And then whom they robbed they made an end of, cutting off their heads.

13. Thus, brethren, from goods not being bestowed on the destitute poverty grieve rife; from poverty growing rife stealing increased, from the spread of stealing violence grew space, from the growth of violence the destruction of life common, from the frequency of murder both the span of life in those beings and their comeliness also (diminished).

Now among humans of latter span of life, brethren, a certain took by theft what was not given him and even as those others was accused before the king and questioned if it was true that he had stolen. 'Nay, O king,' he replied, 'they are deliberately telling lies.' 14. Thus from goods not being bestowed on the destitute, poverty grew rife... stealing... violence... murder... until lying grew common.

Again a certain man reported to the king, saying ' such and such a man, O king! has taken by theft what was not given him '— thus speaking evil of him.

15. And so, brethren, from goods not being bestowed on the destitute poverty grew rife... stealing... violence... murder... lying... evil speaking grew abundant.

16. From lying there grew adultery.

17. Thus from goods not being bestowed on the destitute, poverty... stealing... violence... murder... lying... evil speaking. . . immorality grew rife.

18. Among (them) brethren, three things grew space incest, wanton greed and perverted lust.

Then these things grew apace lack of filial piety to mother and father, lack of religious piety to holy men, lack of regard for the head of the clan.

19. There will come a time, brethren, when the descendants of those humans will have a life-span of ten years. Among humans of this life span, maidens of five years will be of a marriageable age. Among such humans these kinds of tastes (savours) will disappear; ghee, butter, oil of tila, sugar, salt. Among such humans kudrusa grain will be the highest kind of food. Even as to-day rice and curry is the highest kind of food, so will kudrusa grain will be then. Among such humans the ten moral courses of conduct will altogether disappear, the tenimmoral courses of action will flourish excessively; there will be no word for moral among such humans, the ten moral courses of conduct will altogether disappear, the ten immoral courses of action will flourish excessively, there will be no word for moral among such humans—far less any moral agent. Among such humans, brethren, they who lack filian and religious piety, and show no respect for the Head of the clan—'tis they to whom homage and praise will be given, just as to-day homage and praise are given to the filial minded, to the pious and to them who respect the heads of their clans.

20. Among such humans, brethren, there will be no (such thoughts of reverence as are a bar to intermarriage with) mother, or mother's sister, or mother's sister-in-law, or teacher's wife, or father's sister-in-law. The world will fall into promiscuity, like goats and sheep, fowls and swine, dogs and jackals.

Among such humans, brethren keen mutual enmity will become the rule, keen ill-will, keen animosity, passionate thoughts even of killing, in a mother towards her child, in a child towards its father, in brother to brother, in brother to sister, in sister to brother. Just a sportsman feels towards the game that he sees, so will they feel.

This is probably the finest picture of what happens when moral force fails and brutal force takes its place. What the Buddha wanted was that each man should be morally so trained that he may himself become a sentinel for the kingdom of righteousness.

VIII WITHERING AWAY OF THE STATE

The Communists themselves admit that their theory of the State as a permanent dictatorship is a weakness in their political philosophy. They take shelter under the plea that the State will ultimately wither away. There are two questions, which they have to answer. When will it wither away? What will take the place of the State when it withers away? To the first question they can give no definite time. Dictatorship for a short period may

be good and a welcome thing even for making Democracy safe. Why should not Dictatorship liquidate itself after it has done its work, after it has removed all the obstacles and boulders in the way of democracy and has made the path of Democracy safe. Did not Asoka set an example? He practised violence against the Kalingas. But thereafter he renounced violence completely. If our victor's to-day not only disarm their victims but also disarm themselves there would be peace all over the world.

The Communists have given no answer. At any rate no satisfactory answer to the question what would take the place of the State when it withers away, though this question is more important than the question when the State will wither away. Will it be succeeded by Anarchy? If so the building up of the Communist State is an useless effort. If it cannot be sustained except by force and if it results in anarchy when the force holding it together is withdrawn what good is the Communist State. The only thing, which could sustain it after force is withdrawn, is Religion. But to the Communists Religion is anathema. Their hatred to Religion is so deep seated that they will not even discriminate between religions which are helpful to Communism and religions which are not; The Communists have carried their hatred of

Christianity to Buddhism without waiting to examine the difference between the two. The charge against Christianity levelled by the Communists was two fold. Their first charge against Christianity was that they made people otherworldliness and made them suffer poverty in this world. As can be seen from quotations from Buddhism in the earlier part of this tract such a charge cannot be levelled against Buddhism.

The second charge levelled by the Communists against Christianity cannot be levelled against Buddhism. This charge is summed up in the statement that Religion is the opium of the people. This charge is based upon the Sermon on the Mount which is to be found in the Bible. The Sermon on the Mount sublimates poverty and weakness. It promises heaven to the poor and the weak. There is no Sermon on the Mount to be found in the Buddha's teachings. His teaching is to acquire wealth. I give below his Sermon on the subject to Anathapindika one of his disciples.

Once Anathapindika came to where the Exalted One was staying. Having come he made obeisance to the Exalted One and took a seat at one side and asked 'Will the Enlightened One tell what things are welcome, pleasant, agreeable, to the householder but which are hard to gain.'

The Enlightened One having heard the question put to him said 'Of such things the first is to acquire wealth lawfully.'

'The second is to see that your relations also get their wealth lawfully.'

'The third is to live long and reach great age.' 'Of a truth, householder, for the attainment of these four things, which in the world are welcomed, pleasant agreeable but hard to gain, there are also four conditions precedent. They are the blessing of faith, the blessing of virtuous conduct, the blessing of liberality and the blessing of wisdom.

The Blessing of virtuous conduct which abstains From taking life, thieving, unchastely, lying and partaking of fermented liquor.

The blessing of liberality consists in the householder living with mind freed from the taint of avarice, generous, open-handed, delighting in gifts, a good one to be asked and devoted to the distribution of gifts.

Wherein consists the blessing of Wisdom? He know that an householder who dwells with mind overcome by greed, avarice, ill-will, sloth, drowsiness, distraction and flurry, and also about, commits wrongful deeds and neglects that which ought to be done, and by so doing deprived of happiness and honour.

Greed, avarice, ill will, sloth and drowsiness, distraction and flurry and doubt are stains of the mind. A householder who gets rid of such stains of the mind acquires great wisdom, abundant wisdom, clear vision and perfect wisdom.

Thus to acquire wealth legitimately and justly, earn by great industry, amassed by strength of the arm and gained by sweat of the brow is a great blessing. The householder makes himself happy and cheerful and preserves himself full of happiness; also makes his parents, wife, and children, servants, and labourers, friends and companions happy and cheerful, and preserves them full of happiness. The Russians do not seem to be paying any attention to Buddhism as an ultimate aid to sustain Communism when force is withdrawn.

The Russians are proud of their Communism. But they forget that the wonder of all wonders is that the Buddha established Communism so far as the Sangh was concerned without dictatorship. It may be that it was a communism on a very small scale but it was communism I without dictatorship a miracle which Lenin failed to do.

The Buddha's method was different. His method was to change the mind of man: to alter his disposition: so that whatever man does, he does it voluntarily without the use of force or compulsion. His main means to alter the disposition of men was his Dhamma and the constant preaching of his Dhamma. The Buddhas way was not to force people to do what they did not like to do although it was good for them. His way was to alter the disposition of men so that they would do voluntarily what they would not otherwise to do.

It has been claimed that the Communist Dictatorship in Russia has wonderful achievements to its credit. There can be no denial of it. That is why I say that a Russian Dictatorship would be good for all backward countries. But this is no argument for permanent Dictatorship. Humanity does not only want economic values, it also wants spiritual values to be retained. Permanent Dictatorship has paid no attention to spiritual values and does not seem to intend to. Carlyle called Political Economy a Pig Philosophy. Carlyle was of course wrong. For man needs material comforts”But the Communist Philosophy seems to be equally wrong for the aim of their philosophy seems to be fatten pigs as though men are no better than pigs. Man must grow materially as well as spiritually. Society has been aiming to lay a new foundation was summarised by the French Revolution in three words, Fraternity, Liberty and Equality. The French Revolution was welcomed because of this slogan. It failed to produce equality. We welcome the Russian Revolution because it aims to produce equality. But it cannot be too much emphasised that in producing equality society cannot afford to sacrifice fraternity or liberty. Equality will be of no value without fraternity or liberty. It seems that the three can coexist only if one follows the way of the Buddha. Communism can give one but not all.

CASTES IN INDIA

Their Mechanism, Genesis and Development

*Anthropology Seminar
of
Dr. A. A. Goldenweizer at
The Columbia University, New York, U.S.A. on 9th May 1916
Source: Indian Antiquary, May 1917, Vol. XLI*

Many of us, I dare say, have witnessed local, national or international expositions of material objects that make up the sum total of human civilization. But few can entertain the idea of there being such a thing as an exposition of human institutions. Exhibition of human institutions is a strange idea; some might call it the wildest of ideas. But as students of Ethnology I hope you will not be hard on this innovation, for it is not so, and to you at least it should not be strange.

You all have visited, I believe, some historic place like the ruins of Pompeii, and listened with curiosity to the history of the remains as it flowed from the glib tongue of the guide. In my opinion a student of Ethnology, in one sense at least, is much like the guide. Like his prototype, he holds up (perhaps with more seriousness and desire of self-instruction) the social institutions to view, with all the objectiveness humanly possible, and inquires into their origin and function.

Most of our fellow students in this Seminar, which concerns itself with primitive *versus* modern society, have ably acquitted themselves along these lines by giving lucid expositions of the various institutions, modern or primitive, in which they are interested. It is my turn now, this evening, to entertain you, as best I can, with a paper on "Castes in India: Their mechanism, genesis and development"

I need hardly remind you of the complexity of the subject I intend to handle. Subtler minds and abler pens than mine have been brought to the task of unravelling the mysteries of Caste; but unfortunately it still, remains in the domain of the "unexplained", not to say of the "un-understood" I am quite alive to the complex intricacies of a hoary institution like Caste, but I am not so pessimistic as to relegate it to the region of the unknowable, for I believe it can be known. The caste problem is a vast one, both theoretically and practically. Practically, it is an institution that portends tremendous

consequences. It is a local problem, but one capable of much wider mischief, for as long as caste in India does exist, Hindus will hardly intermarry or have any social intercourse with outsiders ; and if Hindus migrate to other regions on earth, Indian caste would become a world problem.” mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/01.Caste in India.htm -_msocom_1 Theoretically, it has defied a great many scholars who have taken upon themselves, as a labour of love, to dig into its origin. Such being the case, I cannot treat the problem in its entirety. Time, space and acumen, I am afraid, would all fail *me*, if I attempted to do otherwise than limit myself to a phase of it, namely, the genesis, mechanism and spread of the caste system. I will strictly observe this rule, and will dwell on extraneous matters only when it is necessary to clarify or support a point in my thesis.

To proceed with the subject. According to well-known ethnologists, the population of India is a mixture of Aryans, Dravidians, Mongolians and Scythians. All these stocks of people came into India from various directions and with various cultures, centuries ago, when they were in a tribal state. They all in turn elbowed their entry into the country by fighting with their predecessors, and after a stomachful of it settled down as peaceful neighbours. Through constant contact and mutual intercourse they evolved a common culture that superseded their distinctive cultures. It may be granted that there has not been a thorough amalgamation of the various stocks that make up the peoples of India, and to a traveller from within the boundaries of India the East presents a marked contrast in physique and even in colour to the West, as does the South to the North. But amalgamation can never be the sole criterion of homogeneity as predicated of any people. Ethnically all people are heterogeneous. It is the unity of culture that is the basis of homogeneity. Taking this for granted, I venture to say that there is no country that can rival the Indian Peninsula with respect to the unity of its culture. It has not only a geographic unity, but it has over and above all a deeper and a much more fundamental unity—the indubitable cultural unity that covers the land from end to end. But it is because of this homogeneity that Caste becomes a problem so difficult to be explained. If the Hindu Society were a mere federation of mutually exclusive units, the matter would be simple enough. But Caste is a parcelling of an already homogeneous unit, and the explanation of the genesis of Caste is the explanation of this process of parcelling.

Before launching into our field of enquiry, it is better to advise ourselves regarding the nature of a caste. I will therefore draw upon a few of the best students of caste for their definitions of it :

(1) Mr. Senart, a French authority, defines a caste as “a close corporation,

in theory at any rate rigorously hereditary : equipped with a certain traditional and independent organisation, including a chief and a council, meeting on occasion in assemblies of more or less plenary authority and joining together at certain festivals : bound together by common occupations, which relate more particularly to marriage and to food and to questions of ceremonial pollution, and ruling its members by the exercise of jurisdiction, the extent of which varies, but which succeeds in making the authority of the community more felt by the sanction of detrain penalties and, above all, by final irrevocable exclusion from the group”.

- (2) Mr. Nesfield defines a caste as”a class of the community which disowns any connection with any other class and can neither intermarry nor eat nor drink with any but persons of their own community”.
- (3) According to Sir H. Risley,”a caste may be defined as a collection of families or groups of families bearing a common name which usually denotes or is associated with specific occupation, claiming common descent from a mythical ancestor, human *or* divine, professing to follow the same professional callings and are regarded by those who are competent to give an opinion as forming a single homogeneous community”.
- (4) Dr. Ketkar defines caste as”a social group having two characteristics : (i) membership is confined to those who are born of members and includes all persons so born; (ii) the members are forbidden by an inexorable social law to marry outside the group”.

To review these definitions is of great importance for our purpose. It will be noticed that taken individually the definitions of three of the writers include too much or too little : none is complete or correct by itself and all have missed the central point in the mechanism of the Caste system. Their mistake lies in trying to define caste as an isolated unit by itself, and not as a group within, and with definite relations to, the system of caste as a whole. Yet collectively all of them are complementary to one another, each one emphasising what has been obscured in the other. By way of criticism, therefore, I will take only those points common to all Castes in each of the above definitions which are regarded as peculiarities of Caste and evaluate them as such.

To start with Mr. Senart. He draws attention to the”idea of pollution”as a characteristic of Caste. With regard to this point it may be safely said that it is by no means a peculiarity of Caste as such. It usually originates in priestly ceremonialism and is a particular case of the general belief in purity.

Consequently its necessary connection with Caste may be completely denied without damaging the working of Caste. The "idea of pollution" has been attached to the institution of Caste, only because the Caste that enjoys the highest rank is the priestly Caste : while we know that priest and purity are old associates. We may therefore conclude that the "idea of pollution" is a characteristic of Caste only in so far as Caste has a religious flavour.

Mr. Nesfield in his way dwells on the absence of messing with those outside the Caste as one of its characteristics. In spite of the newness of the point we must say that Mr. Nesfield has mistaken the effect for the cause. Caste, being a self-enclosed unit naturally limits social intercourse, including messing etc. to members within it. Consequently this absence of messing with outsiders is not due to positive prohibition, but is a natural result of Caste, *i.e.* exclusiveness. No doubt this absence of messing originally due to exclusiveness, acquired the prohibitory character of a religious injunction, but it may be regarded as a later growth. Sir H. Risley, makes no new point deserving of special attention.

We now pass on to the definition of Dr. Ketkar who has done much for the elucidation of the subject. Not only is he a native, but he has also brought a critical acumen and an open mind to bear on his study of Caste. His definition merits consideration, for he has defined Caste in its relation to a system of Castes, and has concentrated his attention only on those characteristics which are absolutely necessary for the existence of a Caste within a system, rightly excluding all others as being secondary or derivative in character. With respect to his definition it must, however, be said that in it there is a slight confusion of thought, lucid and clear as otherwise it is. He speaks of *Prohibition of Intermarriage* and *Membership by Autogeny* as the two characteristics of Caste. I submit that these are but two aspects of one and the same thing, and not two different things as Dr. Ketkar supposes them to be. If you prohibit intermarriage the result is that you limit membership to those born within the group. Thus the two are the obverse and the reverse sides of the same medal.

This critical evaluation of the various characteristics of Caste leave no doubt that prohibition, or rather the absence of intermarriage—endogamy, to be concise—is the only one that can be called the essence of Caste when rightly understood. But some may deny this on abstract anthropological grounds, for there exist endogamous groups without giving rise to the problem of Caste. In a general way this may be true, as endogamous societies, culturally different, making their abode in localities more or less removed, and having little to do with each other are a physical reality. The Negroes and the Whites and the various tribal groups that go by name of

American Indians in the United States may be cited as more or less appropriate illustrations in support of this view. But we must not confuse matters, for in India the situation is different. As pointed out before, the peoples of India form a homogeneous whole. The various races of India occupying definite territories have more or less fused into one another and do possess cultural unity, which is the only criterion of a homogeneous population. Given this homogeneity as a basis, Caste becomes a problem altogether new in character and wholly absent in the situation constituted by the mere propinquity of endogamous social or tribal groups. Caste in India means an artificial chopping off of the population into fixed and definite units, each one prevented from fusing into another through the custom of endogamy. Thus the conclusion is inevitable that *Endogamy is the only characteristic that is peculiar to caste*, and if we succeed in showing how endogamy is maintained, we shall practically have proved the genesis and also the mechanism of Caste.

It may not be quite easy for you to anticipate why I regard endogamy as a key to the mystery of the Caste system. Not to strain your imagination too much, I will proceed to give you my reasons for it. It may not also be out of place to emphasize at this moment that no civilized society of today presents more survivals of primitive times than does the Indian society. Its religion is essentially primitive and its tribal code, in spite of the advance of time and civilization, operates in all its pristine vigour even today. One of these primitive survivals, to which I wish particularly to draw your attention is the *Custom of Exogamy*. The prevalence of exogamy in the primitive worlds is a fact too well-known to need any explanation. With the growth of history, however, exogamy has lost its efficacy, and excepting the nearest blood-kins, there is usually no social bar restricting the field of marriage. But regarding the peoples of India the law of exogamy is a positive injunction even today. Indian society still savours of the clan system, even though there are no clans; and this can be easily seen from the law of matrimony which centres round the principle of exogamy, for it is not that *Sapindas* (blood-kins) cannot marry, but a marriage even between *Sagotras* (of the same class) is regarded as a sacrilege.

Nothing is therefore more important for you to remember than the fact that endogamy is foreign to the people of India. The various *Gotras* of India are and have been exogamous : so are the other groups with totemic organization. It is no exaggeration to say that with the people of India exogamy is a creed and none dare infringe it, so much so that, in spite of the endogamy of the Castes within them, exogamy is strictly observed and that there are more rigorous penalties for violating exogamy than there are

for violating endogamy. You will, therefore, readily see that with exogamy as the rule there could be no Caste, for exogamy means fusion. But we have castes ; consequently in the final analysis creation of Castes, so far as India is concerned, means the superposition of endogamy on exogamy. However, in an originally exogamous population an easy working out of endogamy (which is equivalent to the creation of Caste) is a grave problem, and it is in the consideration of the means utilized for the preservation of endogamy against exogamy that we may hope to find the solution of our problem.

Thus the superposition of endogamy on exogamy means the creation of caste. But this is not an easy affair. Let us take an imaginary group that desires to make itself into a Caste and analyse what means it will have to adopt to make itself endogamous. If a group desires to make itself endogamous a formal injunction against intermarriage with outside groups will be of no avail, especially if prior to the introduction of endogamy, exogamy had been the rule in all matrimonial relations. Again, there is a tendency in all groups lying in close contact with one another to assimilate and amalgamate, and thus consolidate into a homogeneous society. If this tendency is to be strongly counteracted in the interest of Caste formation, it is absolutely necessary to circumscribe a circle outside which people should not contract marriages.

Nevertheless, this encircling to prevent marriages from without creates problems from within which are not very easy of solution. Roughly speaking, in a normal group the two sexes are more or less evenly distributed, and generally speaking there is an equality between those of the same age. The equality is, however, never quite realized in actual societies. At the same time to the group that is desirous of making itself into a caste the maintenance of equality between the sexes becomes the ultimate goal, for without it endogamy can no longer subsist. In other words, if endogamy is to be preserved conjugal rights from within have to be provided for, otherwise members of the group will be driven out of the circle to take care of themselves in any way they can. But in order that the conjugal rights be provided for from within, it is absolutely necessary to maintain a numerical equality between the marriageable units of the two sexes within the group desirous of making itself into a Caste. It is only through the maintenance of such an equality that the necessary endogamy of the group can be kept intact, and a very large disparity is sure to break it.

The problem of Caste, then, ultimately resolves itself into one of repairing the disparity between the marriageable units of the two sexes within it. Left to nature, the much needed parity between the units can be realized only when a couple dies

simultaneously. But this is a rare contingency. The husband may die before the wife and create a *surplus woman*, who must be disposed of, else through intermarriage she will violate the endogamy of the group. In like manner the husband may survive, his wife and be *surplus man*, whom the group, while it may sympathise with him for the sad bereavement, has to dispose of, else he will marry outside the Caste and will break the endogamy. Thus both the *surplus man* and the *surplus woman* constitute a menace to the Caste if not taken care of, for not finding suitable partners inside their prescribed circle (and left to themselves they cannot find any, for if the matter be not regulated there can only be just enough pairs to go round) very likely they will transgress the boundary, marry outside and import offspring that is foreign to the Caste.

Let us see what our imaginary group is likely to do with this *surplus man* and *surplus woman*. We will first take up the case of the *surplus woman*. She can be disposed of in two different ways so as to preserve the endogamy of the Caste.

First : burn her on the funeral pyre of her deceased husband and get rid of her. This, however, is rather an impracticable way of solving the problem of sex disparity. In some cases it may work, in others it may not. Consequently every surplus woman cannot thus be disposed of, because it is an easy solution but a hard realization. And so the *surplus woman* (= widow), if not disposed of, remains in the group : but in her very existence lies a double danger. She may marry outside the Caste and violate endogamy, or she may marry within the Caste and through competition encroach upon the chances of marriage that must be reserved for the potential brides in the Caste. She is therefore a menace in any case, and something must be done to her if she cannot be burned along with her deceased husband.

The second remedy is to enforce widowhood on her for the rest of her life. So far as the objective results are concerned, burning is a better solution than enforcing widowhood. Burning the widow eliminates all the three evils that a *surplus woman* is fraught with. Being dead and gone she creates no problem of remarriage either inside or outside the Caste. But compulsory widowhood is superior to burning because it is more practicable. Besides being comparatively humane it also guards against the evils of remarriage as does burning; but it fails to guard the morals of the group. No doubt under compulsory widowhood the woman remains, and just because she is deprived of her natural right of being a legitimate wife in future, the incentive to immoral conduct is increased. But this is by no means an insuperable difficulty. She can be degraded to a condition in

which she is no longer a source of allurements.

The problem of *surplus man* (= widower) is much more important and much more difficult than that of the *surplus woman* in a group that desires to make itself into a Caste. From time immemorial man as compared with woman has had the upper hand. He is a dominant figure in every group and of the two sexes has greater prestige. With this traditional superiority of man over woman his wishes have always been consulted. Woman, on the other hand, has been an easy prey to all kinds of iniquitous injunctions, religious, social or economic. But man as a maker of injunctions is most often above them all. Such being the case, you cannot accord the same kind of treatment to a *surplus man* as you can to a *surplus woman in a Caste*.

The project of burning him with his deceased wife is hazardous in two ways : first of all it cannot be done, simply because he is a man. Secondly, if done, a sturdy soul is lost to the Caste. There remain then only two solutions which can conveniently dispose of him. I say conveniently, because he is an asset to the group.

Important as he is to the group, endogamy is still more important, and the solution must assure both these ends. Under these circumstances he may be forced or I should say induced, after the manner of the widow, to remain a widower for the rest of his life. This solution is not altogether difficult, for without any compulsion some are so disposed as to enjoy self-imposed celibacy, or even to take a further step of their own accord and renounce the world and its joys. But, given human nature as it is, this solution can hardly be expected to be realized. On the other hand, as is very likely to be the case, if the *surplus man* remains in the group as an active participator in group activities, he is a danger to the morals of the group. Looked at from a different point of view celibacy, though easy in cases where it succeeds, is not so advantageous even then to the material prospects of the Caste. If he observes genuine celibacy and renounces the world, he would not be a menace to the preservation of Caste endogamy or Caste morals as he undoubtedly would be if he remained a secular person. But as an ascetic celibate he is as good as burned, so far as the material wellbeing of his Caste is concerned. A Caste, in order that it may be large enough to afford a vigorous communal life, must be maintained at a certain numerical strength. But to hope for this and to proclaim celibacy is the same as trying to cure atrophy by bleeding.

Imposing celibacy on the *surplus man* in the group, therefore, fails both theoretically and practically. It is in the interest of the Caste to keep him as a *Grabastha* (one who raises a family), to use a Sanskrit technical term. But the problem is to provide him with a wife from within the Caste. At the

outset this is not possible, for the ruling ratio in a caste has to be one man to one woman and none can have two chances of marriage, for in a Caste thoroughly self-enclosed there are always just enough marriageable women to go round for the marriageable men. Under these circumstances the *surplus man* can be provided with a wife only by recruiting a bride from the ranks of those not yet marriageable in order to tie him down to the group. This is certainly the best of the possible solutions in the case of the *surplus man*. By this, he is kept within the Caste. By this means numerical depletion through constant outflow is guarded against, and by this endogamy morals are preserved.

It will now be seen that the four means by which numerical disparity between the two sexes is conveniently maintained are : (1) burning the widow with her deceased husband ; (2) compulsory widowhood—a milder form of burning ; (3) imposing celibacy on the widower and (4) wedding him to a girl not yet marriageable. Though, as I said above, burning the widow and imposing celibacy on the widower are of doubtful service to the group in its endeavour to preserve its endogamy, all of them operate as *means*. But means, as forces, when liberated or set in motion create an end. What then is the end that these means create? They create and perpetuate endogamy, while caste and endogamy, according to our analysis of the various definitions of caste, are one and the same thing. Thus the existence of these means is identical with caste and caste involves these means.

This, in my opinion, is the general mechanism of a caste in a system of castes. Let us now turn from these high generalities to the castes in Hindu Society and inquire into their mechanism. I need hardly premise that there are a great many pitfalls in the path of those who try to unfold the past, and caste in India to be sure is a very ancient institution. This is especially true where there exist no authentic or written records or where the people, like the Hindus, are so constituted that to them writing history is a folly, for the world is an illusion. But institutions do live, though for a long time they may remain unrecorded and as often as not customs and morals are like fossils that tell their own history. If this is true, our task will be amply rewarded if we scrutinize the solution the Hindus arrived at to meet the problems of the *surplus man* and *surplus woman*.

Complex though it be in its general working the Hindu Society, even to a superficial observer, presents three singular uxorial customs, namely : (i) *Sati* or the burning of the widow on the funeral pyre of her deceased husband. (ii) Enforced widowhood by which a widow is not allowed to remarry. (iii) Girl marriage.

In addition, one also notes a great hankering after *Sannyasa* (renunciation)

on the part of the widower, but this may in some cases be due purely to psychic disposition.

So far as I know, no scientific explanation of the origin of these customs is forthcoming even today. We have plenty of philosophy to tell us why these customs were honoured, but nothing to tell us the causes of their origin and existence. *Sati* has been honoured (*Cf.* A. K. Coomaraswamy, *Sati: A Defence of the Eastern Woman in the British Sociological Review*, Vol. VI, 1913) because it is a "proof of the perfect unity of body and soul" between husband and wife and of "devotion beyond the grave", because it embodied the ideal of wifeness, which is well expressed by Uma when she said, "Devotion to her Lord is woman's honour, it is her eternal heaven : and O Maheshvara", she adds with a most touching human cry, "I desire not paradise itself if thou are not satisfied with me !" "Why compulsory widowhood is honoured I know not, nor have I yet met with any one who sang in praise of it, though there are a great many who adhere to it. The eulogy in honour of girl marriage is reported by Dr. Ketkar to be as follows : "A really faithful man or woman ought not to feel affection for a woman or a man other than the one with whom he or she is united. Such purity is compulsory not only after marriage, but even before marriage, for that is the only correct ideal of chastity. No maiden could be considered pure if she feels love for a man other than the one to whom she might be married. As she does not know to whom she is going to be married, she must not feel affection, for any man at all before marriage. If she does so, it is a sin. So it is better for a girl to know whom she has to love before any sexual consciousness has been awakened in her" .

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/01.Caste in India.htm - _msocom_2 .

Hence girl marriage.

This high-flown and ingenious sophistry indicates why these institutions were honoured, but does not tell us why they were practiced. My own interpretation is that they were honoured because they were practiced. Any one slightly acquainted with rise of individualism in the 18th century will appreciate my remark. At all times, it is the movement that is most important; and the philosophies grow around it long afterwards to justify it and give it a moral support. In like manner I urge that the very fact that these customs were so highly eulogized proves that they needed eulogy for their prevalence. Regarding the question as to why they arose, I submit that they were needed to create the structure of caste and the philosophies in honour of them were intended to popularise them, or to gild the pill, as we might say, for they must have been so abominable and shocking to the moral sense of the unsophisticated that they needed a great deal of

sweetening. These customs are essentially of the nature of *means*, though they are represented as ideals. But this should not blind us from understanding the *results* that flow from them. One might safely say that idealization of means is necessary and in this particular case was perhaps motivated to endow them with greater efficacy. Calling a means an end does no harm, except that it disguises its real character; but it does not deprive it of its real nature, that of a means. You may pass a law that all cats are dogs, just as you can call a means an end. But you can no more change the nature of means thereby than you can turn cats into dogs ; consequently I am justified in holding that, whether regarded as ends or as means, *Sati*, *enforced widowhood* and *girl marriage* are customs that were primarily intended to solve the problem of the *surplus man* and *surplus woman* in a caste and to maintain its endogamy. Strict endogamy could not be preserved without these customs, while caste without endogamy is a fake.

Having explained the mechanism of the creation and preservation of Caste in India, the further question as to its genesis naturally arises. The question or origin is always an annoying question and in the study of Caste it is sadly neglected; some have connived at it, while others have dodged it. Some are puzzled as to whether there could be such a thing as the origin of caste and suggest that "if we cannot control our fondness for the word 'origin', we should better use the plural form, viz. 'origins of caste' ". As for myself I do not feel puzzled by the Origin of Caste in India for, as I have established before, endogamy is the only characteristic of Caste and when I say *Origin of Caste* I mean *The Origin of the Mechanism for Endogamy*.

The atomistic *conception* of individuals in a Society so greatly popularised— I was about to say vulgarised—in political orations is the greatest humbug. To say that individuals make up society is trivial ; society is always composed of classes. It may be an exaggeration to assert the theory of class-conflict, but the existence of definite classes in a society is a fact. Their basis may differ. They may be economic or intellectual or social, but an individual in a society is always a member of a class. This is a universal fact and early Hindu society could not have been an exception to this rule, and, as a matter of fact, we know it was not. If we bear this generalization in mind, our study of the genesis of caste would be very much facilitated, for we have only to determine what was the class that first made itself into a caste, for class and caste, so to say, are next door neighbours, and it is only a span that separates the two. *A Caste is an Enclosed Class*.

The study of the origin of caste must furnish us with an answer to the question—what is the class that raised this "enclosure" around itself? The

question may seem too inquisitorial, but it is pertinent, and an answer to this will serve us to elucidate the mystery of the growth and development of castes all over India- Unfortunately a direct answer to this question is not within my power. I can answer it only indirectly. I said just above that the customs in question were current in the Hindu society. To be true to facts it is necessary to qualify the statement, as it connotes universality of their prevalence. These customs in all their strictness are obtainable only in one caste, namely the Brahmins, who occupy the highest place in the social hierarchy of the Hindu society ; and as their prevalence in non-Brahmin castes is derivative of their observance is neither strict nor complete. This important fact can serve as a basis of an important observation. If the prevalence of these customs in the non-Brahmin Castes is derivative, as can be shown very easily, then it needs no argument to prove what class is the father of the institution of caste. Why the Brahmin class should have enclosed itself into a caste is a different question, which may be left as an employment for another occasion. But the strict observance of these customs and the social superiority arrogated by the priestly class in all ancient civilizations are sufficient to prove that they were the originators of this "unnatural institution" founded and maintained through these unnatural means.

I now come to the third part of my paper regarding the question of the growth and spread of the caste system all over India. The question I have to answer is : How did the institution of caste spread among the rest of the non-Brahmin population of the country? The question of the spread of the castes all over India has suffered a worse fate than the question of genesis. And the main cause, as it seems to me, is that the two questions of spread and of origin are not separated. This is because of the common belief among scholars that the caste system has either been imposed upon the docile population of India by a law-giver as a divine dispensation, or that it has grown according to some law of social growth peculiar to the Indian people.

I first propose to handle the law-giver of India. Every country has its law-giver, who arises as an incarnation (*avatar*) in times of emergency to set right a sinning humanity and give it the laws of justice and morality. Manu, the law-giver of India, if he did exist, was certainly an audacious person. If the story that he gave the law of caste be credited, then Manu must have been a dare-devil fellow and the humanity that accepted his dispensation must be a humanity quite different from the one we are acquainted with. It is unimaginable that the law of caste was *given*. It is hardly an exaggeration to say that Manu could not have outlived his law, for what is that class that

can submit to be degraded to the status of brutes by the pen of a man, and suffer him to raise another class *to* the pinnacle? Unless he was a tyrant who held all the population in subjection it cannot be imagined that he could have been allowed to dispense his patronage in this grossly unjust manner, as may be easily seen by a mere glance at his "Institutes". I may seem hard on Manu, but I am sure my force is not strong enough to kill his ghost. He lives, like a disembodied spirit and is appealed to, and I am afraid will yet live long. One thing I want to impress upon you is that Manu did not *give the law* of Caste and that he could not do so. Caste existed long before Manu. He was an upholder of it and therefore philosophised about it, but certainly he did not and could not ordain the present order of Hindu Society. His work ended with the codification of existing caste rules and the preaching of Caste *Dharma*. The spread and growth of the Caste system is too gigantic a task to be achieved by the power or cunning of an individual or of a class. Similar in argument is the theory that the Brahmins created the Caste. After what I have said regarding Manu, I need hardly say anything more, except to point out that it is incorrect in thought and malicious in intent. The Brahmins may have been guilty of many things, and I dare say they were, but the imposing of the caste system on the non-Brahmin population was beyond their mettle. They may have helped the process by their glib philosophy, but they certainly could not have pushed their scheme beyond their own confines. To fashion society after one's own pattern ! How glorious ! How hard ! One can take pleasure and eulogize its furtherance; but cannot further it very far. The vehemence of my attack may seem to be unnecessary ; but I can assure you that it is not uncalled for. There is a strong belief in the mind of orthodox Hindus that the Hindu Society was somehow moulded into the framework of the Caste System and that it is an organization consciously created by the *Shastras*. Not only does this belief exist, but it is being justified on the ground that it cannot but be good, because it is ordained by the *Shastras* and the *Shastras* cannot be wrong. I have urged so much on the adverse side of this attitude, not because the religious sanctity is grounded on scientific basis, nor to help those reformers who are preaching against it. Preaching did not make the caste system neither will it unmake it. My aim is to show the falsity of the attitude that has exalted religious sanction to the position of a scientific explanation.

Thus the great man theory does not help us very far in solving the spread of castes in India. Western scholars, probably not much given to hero-worship, have attempted other explanations. The nuclei, round which have "formed" the various castes in India, are, according to them: (1)

occupation; (2) survivals of tribal organization etc.; (3) the rise of new belief; (4) cross-breeding and (5) migration.

The question may be asked whether these nuclei do not exist in other societies and whether they are peculiar to India. If they are not peculiar to India, but are common to the world, why is it that they did not "form" caste on other parts of this planet? Is it because those parts are holier than the land of the *Vedas*, or that the professors are mistaken? I am afraid that the latter is the truth.

In spite of the high theoretic value claimed by the several authors for their respective theories based on one or other of the above nuclei, one regrets to say that on close examination they are nothing more than filling illustrations—

what Matthew Arnold means by "the grand name without the grand thing in it". Such are the various theories of caste advanced by Sir Denzil Ibbetson, Mr. Nesfield, Mr. Senart and Sir H. Risley. To criticise them in a lump would be to say that they are a disguised form of the *Petitio Principii* of formal logic. To illustrate : Mr. Nesfield says that "function and function only. . . was the foundation upon which the whole system of Castes in India was built up". But he may rightly be reminded that he does not very much advance our thought by making the above statement, which practically amounts to saying that castes in India are functional or occupational, which is a very poor discovery ! We have yet to know from Mr. Nesfield why is it that an occupational group turned into an occupational caste? I would very cheerfully have undertaken the task of dwelling on the theories of other ethnologists, had it not been for the fact that Mr. Nesfield's is a typical one.

Without stopping to criticize those theories that explain the caste system as a natural phenomenon occurring in obedience to the law of disintegration, as explained by Herbert Spencer in his formula of evolution, or as natural as "the structural differentiation within an organism"—to employ the phraseology of orthodox apologists—, or as an early attempt to test the laws of eugenics—as all belonging to the same class of fallacy which regards the caste system as inevitable, or as being consciously imposed in anticipation of these laws on a helpless and humble population, I will now lay before you my own view on the subject.

We shall be well advised to recall at the outset that the Hindu society, in common with other societies, was composed of classes and the earliest known

are the (1) Brahmins or the priestly class; (2) the Kshatriya, or the military class ; (3) the Vaishya, or the merchant class and (4) the Shudra, or the

artisan and menial class. Particular attention has to be paid to the fact that this was essentially a class system, in which individuals, when qualified, could change their class, and therefore classes did change their personnel. At some time in the history of the Hindus, the priestly class socially detached itself from the rest of the body of people and through a closed-door policy became a caste by itself. The other classes being subject to the law of social division of labour underwent differentiation, some into large, others into very minute groups. The Vaishya and Shudra classes were the original inchoate plasm, which formed the sources of the numerous castes of today. As the military occupation does not very easily lend itself to very minute sub-division, the Kshatriya class could have differentiated into soldiers and administrators.

This sub-division of a society is quite natural. But the unnatural thing about these sub-divisions is that they have lost the open-door character of the class system and have become self-enclosed units called castes. The question is: were they compelled to close their doors and become endogamous, or did they close them of their own accord? I submit that there is a double line of answer: *Some closed the door : Others found it closed against them.* The one is a psychological interpretation and the other is mechanistic, but they are complementary and both are necessary to explain the phenomena of caste-formation in its entirety.

I will first take up the psychological interpretation. The question we have to answer in this connection is: Why did these sub-divisions or classes, if you please, industrial, religious or otherwise, become self-enclosed or endogamous? My answer is because the Brahmins were so. Endogamy or the closed-door system, was a fashion in the Hindu society, and as it had originated from the Brahmin caste it was whole-heartedly imitated by all the non-Brahmin sub-divisions or classes, who, in their turn, became endogamous castes. It is "the infection of imitation" that caught all these sub-divisions on their onward march of differentiation and has turned them into castes. The propensity to imitate is a deep-seated one in the human mind and need not be deemed an inadequate explanation for the formation of the various castes in India. It is so deep-seated that Walter Bagehot argues that, "We must not think of . . . imitation as voluntary, or even conscious. On the contrary it has its seat mainly in very obscure parts of the mind, whose notions, so far from being consciously produced, are hardly felt to exist; so far from being conceived beforehand, are not even felt at the time. The main seat of the imitative part of our nature is our belief, and the causes predisposing us to believe this or disinclining us to believe that are among the obscurest parts of our nature. But as to the

imitative nature of credulity there can be no doubt.”
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/01.Caste in India.htm - _msocom_3 This propensity to imitate has been made the subject of a scientific study by Gabriel Tarde, who lays down three laws of imitation. One of his three laws is that imitation flows from the higher to the lower or, to quote his own words, "Given the opportunity, a nobility will always and everywhere imitate its leaders, its kings or sovereigns, and the people likewise, given the opportunity, its nobility."

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/01.Caste in India.htm - _msocom_4 Another of Tarde's laws of imitation is : that the extent *or* intensity of imitation varies inversely in proportion to distance, or in his own words "The thing that is most imitated is the most superior one of those that are nearest- In fact, the influence of the model's example is efficacious inversely to its *distance* as well as directly to its superiority. Distance is understood here in its sociological meaning. However distant in space a stranger may be, he is close by, from this point of view, if we have numerous and daily relations with him and if we have every facility to satisfy our desire to imitate him. This law of the imitation of the nearest, of the least distant, explains the gradual and consecutive character of the spread of an example that has been set by the higher social ranks."

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/01.Caste in India.htm - _msocom_5

In order to prove my thesis—which really needs no proof—that some castes were formed by imitation, the best way, it seems to me, is to find out whether or not the vital conditions for the formation of castes by imitation exist in the Hindu Society. The conditions for imitation, according to this standard authority are: (1) that the source of imitation must enjoy prestige in the group and (2) that there must be "numerous and daily relations" among members of a group. That these conditions were present in India there is little reason to doubt. The Brahmin is a semi-god and very nearly a demi-god. He sets up a mode and moulds the rest- His prestige is unquestionable and is the fountain-head of bliss and good. Can such a being, idolised by scriptures and venerated by the priest-ridden multitude, fail to project his personality on the suppliant humanity? Why, if the story be true, he is believed to be the very end of creation. Such a creature is worthy of more than mere imitation, but at least of imitation ; and if he lives in an endogamous enclosure, should not the rest follow his example? Frail humanity! Be it embodied in a grave philosopher or a frivolous housemaid, it succumbs. It cannot be otherwise. Imitation is easy and invention is difficult.

Yet another way of demonstrating the play of imitation in the formation

of castes is to understand the attitude of non-Brahmin classes towards those customs which supported the structure of caste in its nascent days until, in the course of history, it became embedded in the Hindu mind and hangs there to this day without any support—for now it needs no prop but belief-like a weed on the surface of a pond. In a way, but only in a way, the status of a caste in the Hindu Society varies directly with the extent of the observance of the customs of *Sati*, enforced widowhood, and girl marriage. But observance of these customs varies directly with the *distance* (I am using the word in the Tardian sense) that separates the caste. Those castes that are nearest to the Brahmins have imitated all the three customs and insist on the strict observance thereof. Those that are less near have imitated enforced widowhood and girl marriage; others, a little further off, have only girl marriage and those furthest off have imitated only the belief in the caste principle. This imperfect imitation, I dare say, is due partly to what Tarde calls "distance" and partly to the barbarous character of these customs. This phenomenon is a complete illustration of Tarde's law and leaves no doubt that the whole process of caste-formation in India is a process of imitation of the higher by the lower. At this juncture I will turn back to support a former conclusion of mine, which might have appeared to you as too sudden or unsupported. I said that the Brahmin class first raised the structure of caste by the help of those three customs in question. My reason for that conclusion was that their existence in other classes was derivative. After what I have said regarding the role of imitation in the spread of these customs among the non-Brahmin castes, as means or as ideals, though the imitators have not been aware of it, they exist among them as derivatives ; and, if they are derived, there must have been prevalent one original caste that was high enough to have served as a pattern for the rest. But in a theocratic society, who could be the pattern but the servant of God?

This completes the story of those that were weak enough to close their doors. Let us now see how others were closed in as a result of being closed out. This I call the mechanistic process of the formation of caste. It is mechanistic because it is inevitable. That this line of approach, as well as the psychological one, to the explanation of the subject has escaped my predecessors is entirely due to the fact that they have conceived caste as a unit by itself and not as one within a System of Caste. The result of this oversight or lack of sight has been very detrimental to the proper understanding of the subject matter and therefore its correct explanation. I will proceed to offer my own explanation by making one remark which I will urge you to bear constantly in mind. It is this : that *caste in the singular*

number is an unreality. Castes exist only in the plural number. There is no such thing as a caste : There are always castes. To illustrate my meaning: while making themselves into a caste, the Brahmins, by virtue of this, created non-Brahmin caste; or, to express it in my own way, while closing themselves in they closed others out. I will clear my point by taking another illustration. Take India as a whole with its various communities designated by the various creeds to which they owe allegiance, to wit, the Hindus, Mohammedans, Jews, Christians and Parsis. Now, barring the Hindus, the rest within themselves are non-caste communities.

But with respect to each other they are castes. Again, if the first four enclose themselves, the Parsis are directly closed out, but are indirectly closed in. Symbolically, if Group A wants to be endogamous, Group B has to be so by sheer force of circumstances.

Now apply the same logic to the Hindu society and you have another explanation of the "fissiparous" character of caste, as a consequence of the virtue of self-duplication that is inherent in it. Any innovation that seriously antagonises the ethical, religious and social code of the Caste is not likely to be tolerated by the Caste, and the recalcitrant members of a Caste are in danger of being thrown out of the Caste, and left to their own fate without having the alternative of being admitted into or absorbed by other Castes. Caste rules are inexorable and they do not wait to make nice distinctions between kinds of offence. Innovation may be of any kind, but all kinds will suffer the same penalty. A novel way of thinking will create a new Caste for the old ones will not tolerate it. The noxious thinker respectfully called Guru (Prophet) suffers the same fate as the sinners in illegitimate love. The former creates a caste of the nature of a religious sect and the latter a type of mixed caste. Castes have no mercy for a sinner who has the courage to violate the code. The penalty is excommunication and the result is a new caste. It is not peculiar Hindu psychology that induces the excommunicated to form themselves into a caste⁵; far from it. On the contrary, very often they have been quite willing to be humble members of some caste (higher by preference) if they could be admitted within its fold. But castes are enclosed units and it is their conspiracy with clear conscience that compels the excommunicated to make themselves into a caste. The logic of this obdurate circumstance is merciless, and it is in obedience to its force that some unfortunate groups find themselves enclosed, because others in enclosing, themselves have closed them out, with the result that new groups (formed on any basis obnoxious to the caste rules) by a mechanical law are constantly being converted into castes to a bewildering multiplicity. Thus is told the second tale in the process of Caste formation

in India.

Now to summarise the main points of my thesis. In my opinion there have been several mistakes committed by the students of Caste, which have misled them in their investigations. European students of Caste have unduly emphasised the role of colour in the Caste system. Themselves impregnated by colour prejudices, they very readily imagined it to be the chief factor in the Caste problem. But nothing can be farther from the truth, and Dr. Ketkar is correct when he insists that "All the princes whether they belonged to the so-called Aryan race, or the so-called Dravidian race, were Aryas. Whether a tribe or a family was racially Aryan or Dravidian was a question which never troubled the people of India, until foreign scholars came in and began to draw the line. The colour of the skin had long ceased to be a matter of importance." [f.6] Again, they have mistaken mere descriptions for explanation and fought over them as though they were theories of origin. There are occupational, religious etc., castes, it is true, but it is by no means an explanation of the origin of Caste. We have yet to find out why occupational groups are castes ; but this question has never even been raised. Lastly they have taken Caste very lightly as though a breath had made it. On the contrary. Caste, as I have explained it, is almost impossible to be sustained : for the difficulties that it involves are tremendous. It is true that Caste rests on belief, but before belief comes to be the foundation of an institution, the institution itself needs to be perpetuated and fortified. My study of the Caste problem involves four main points : (1) that in spite of the composite make-up of the Hindu population, there is a deep cultural unity; (2) that caste is a parcelling into bits of a larger cultural unit; (3) that there was one caste to start with and (4) that classes have become Castes through imitation and excommunication-peculiar interest attaches to the problem of Caste in India today; as persistent attempts are being made to do away with this unnatural institution. Such attempts at reform, however, have aroused a great deal of controversy regarding its origin, as to whether it is due to the conscious command of a Supreme Authority, or is an unconscious growth in the life of a human society under peculiar circumstances. Those who hold the latter view will, I hope, find some food for thought in the standpoint adopted in this paper. Apart from its practical importance the subject of Caste is an all absorbing problem and the interest aroused in me regarding its theoretic foundations has moved me to put before you some of the conclusions, which seem to me well founded, and the grounds upon which they may be supported. I am not, however, so presumptuous as to think them in any way final, or anything more than a contribution to a

discussion of the subject. It seems to me that the car has been shunted on wrong lines, and the primary object of the paper is to indicate what I regard to be the right path of investigation, with a view to arrive at a serviceable truth. We must, however, guard against approaching the subject with a bias. Sentiment must be outlawed from the domain of science and things should be judged from an objective standpoint. For myself I shall find as much pleasure in a positive destruction of my own ideology, as in a rational disagreement on a topic, which, notwithstanding many learned disquisitions is likely to remain controversial forever. To conclude, while I am ambitious to advance a Theory of Caste, if it can be shown to be untenable I shall be equally willing to give it up

**COMMERCIAL RELATIONS OF INDIA
IN THE MIDDLE AGES
OR
THE RISE OF ISLAM AND THE EXPANSION OF
WESTERN EUROPE**

The birth of Islam is synchronous with the consolidation of Papal power in Rome under Gregory the Great. It was the era of theocracies and the east was once more spreading a wave of religion that had almost succeeded in Mohomedanizing the entire continent of Europe. Not to speak of Africa and Asia and like many big things ; it had its origin in the small.

Long before Muhamad's birth, Arabia was inhabited by different tribes and enjoyed the prosperity of being the commercial go-between between the East and the West. This early prosperity of the Arabs is attested to by the ruins of rich and splendid cities lined from Petra to Damascus; but according to Strabo, this source of prosperity to the Arabs early dried up when the Romans opened direct trade to India. The products of India and Arabia passed to Myos Hormos on the western shore of the Red Sea and camels to Thebes and thence sailed down to Alexandria through the Nile. As a result of this, the Arabs were reduced to be "the true sons of the desert".

Economically there is no country so poor as Arabia. Arabia, the sandy, stony and happy as Gibbon calls it. Owing to the scarcity of arable land and water, the Arabs could not become a settled people. They continued to be nomads and tribal, having no unity in religion or politics. Owing to their disunion, the Arabs were overrun by foreign invaders many a time. The Abyssinians, the Persians, the Sultans of Egypt and the Turks, all in their turn subjugated the kingdom of Yemen, many a Sythian tyrant had demanded the allegiance of the holy cities of Mecca and Medina and Arabia in part became the province of the Roman empire.

None was able to subdue the Arabs permanently and they have overthrown the suzerainty of powerful monarchs like Sesostris, Cyrus, Pompey and Trojan."The causes of this apparent spirit of independence among the Arabs are to be sought in the geography of their habitat.

Crude and inartistic as was the paganism of the Arabs ritual pomp, elaborate mythology or high philosophical speculation had no place in it."The Religion of the Arabs, as well as of the Indians consisted in the worship of the Sun, the Moon, and the fixed stars." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_1 "Each tribe, each family, each independent

warrior, created and changed the rites and the object of his fantastic worship; but the nation, in every age, has bowed to the religion as well as to the language of Mecca." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial Relations of India in the Middle Ages.htm - _msocom_2](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_2) The conversion of pagan to a new religion is never a hard task, for, pagans are anything but fanatic and most tolerant. The pagan Arabs were living in peaceful relations with the Christian communities in the North and at Najran in the South, with the Jewish communities residing in the North-east and the Zoroastrians living in close proximity to the Persian Gulf. As a result of this propinquity, the interchange of ideas had been working towards a spiritual monotheism among the Arabs long before the birth of Muhamad and is typified by the Hanifs.

Independently or otherwise of the Hanafi movement, Muhamad, an Arab camel driver, conceived the idea of improving the lot of the degraded Arabs constantly fighting among themselves and offering human sacrifices to the numerous idols in Caaba. No man ever arrogated to himself the virtue of being a Prophet with so little equipment, but he made bold and the faith which, under the name of Islam, he preached to his family and nation is compounded of an eternal truth and a necessary fiction." *That there is only one God, and that Mahomet is the apostle of God.*" [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial Relations of India in the Middle Ages.htm - _msocom_3](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_3) The circumstances of Muhamed's birth are seemingly favourable to his proclamation as a Prophet. It will be remembered that Arabia was populated by various tribes all enjoying equal independence. All these tribe"however united to respect the tribe of Koresh which by means, fair or foul, held the custody of the temple of Caaba and the Sacerdotal office of worshipping Caaba had fallen on the family of the Hashemites, chiefly on the grandfather of Mahomed. Taking advantage of his exalted position among the Arabs, Mohomed commenced the preaching of the monotheistic Gospel. There isn't anything new in the Gospel of Mohomed who is the least original of the Prophet. His Koran is a compromise between Judaeism and Christianity. Whatever may be the value of his teachings, the Arabs looked upon it with the utmost hostility, so much so that the Hashemites were lowered in the estimation of their people. The stubbornness of the Arabs grew with the missionary zeal of Mahomed as that of the Hindoos today with the growth of the missionary propaganda. Becoming impatient, the Arabs compelled the Hashemites to expell Mohamed whose very life was near being threatened; Mahomed centred his attention on Medina but was not sure of welcome. He therefore

negotiated with the Medinites through the few disciples he had made in Mecca. After being assured of their kindness, he stationed himself at Medina and saved his cherished and young religion from utter ruin, which would certainly have perished in its cradle, had not Medina embraced with faith and reverence the holy outcasts of Mecca." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_4 His stationing at Medina was of immense advantage to Mohamed. To his sacerdotal office was combined the regal and to the judicial, the executive. He became a missionary monarch strong enough to back his preaching by the cannon."The choice of an independent people had exalted the fugitive of Mecca to the rank of a sovereign and he was invested with the just prerogative of forming alliances and of waging offensive and defensive wars. The imperfection of human rights was supplied and armed by the plentitude of divine power. The Prophet of Medina assured, in his new revelations, a fiercer and more sanguinary tone, which proves that his former moderation was the effect of weakness. The means of persuasion had been tried, the season of forbearance was elapsed, and he was now commanded to propagate his religion by the sword, to destroy the monuments of idolatory, and without regarding the sanctity of days, or months, to pursue the unbelieving nations of the Earth." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_5 So stationed, he began the expansion of his creed and kingdom, first by subjugating the Koreish of Mecca. The Arabs were both merchants and robbers in one, and the disciple of Muhamed at Medina began to harrass the trade of the Koreish passing through Medina. The Koreish, being exasperated at this, began warring against Medina. Muhamed, for a while, was on the defensive but he soon got on the offensive and subjugated the city of his birth. Thus he augmented both his forces and resources."The fair option of friendship, or submission, or battle, was proposed to the enemies of Mahomet. If they professed the creed of Islam, they were admitted to all the temporal and spiritual benefits of his primitive disciples, and marched under the same banner to extend the religion which they had embraced." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_6 Having thus equipped his followers for a career of conquest, Mohamed left his mission to his successors, the Califs."The heroic courage of Ali, the consummate prudence of Moawiyah, excited the emulation of their subjects, and the talents which had been exercised in the schools of civil discord were more usefully applied to propagate the faith and dominion of the Prophet. In the sloth and vanity of

the palace of Damascus, the succeeding princes of the house of Ommiyah were alike, destitute of the qualifications of statesmen and of saints. Yet the spoils of the unknown nations were continually laid at the foot of their throne, and the uniform ascent of the Arabian greatness must be ascribed to the spirit of the nation rather than the abilities of their chiefs. A large deduction must be allowed for the weakness of their enemies. The birth of Mahomet was fortunately placed in the most degenerate and disorderly period of the Persians, the Romans, and the barbarians of Europe. The empire of Trojan, or even of Constantine or Charlemagne, would have repelled the attack of the naked Saracens, and the torrent of fanaticism might have been obscurely lost in the sands of Arabia." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_7 "With the same vigour and success they invaded the successors of Augustus and those of Artaxerxes : and the rival monarchies at the same instant became. The prey of an enemy whom they had been so long accustomed to despise. In the ten years of the administration of Omar, the Saracens reduced to his obedience thirty-six thousand cities or castles, destroyed fourteen thousand churches or temples of the unbelievers, and edified fourteen thousand mosques for the exercise of the religion of Mahomet. One hundred years after his flight in Mecca, the arms and the reign of his successors extended from India to the Atlantic ocean, over the various and distant provinces which may be comprised under the names of (1) Persia, (2) Syria, (3) Egypt, (4) Africa, (5) Spain" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_8 In this great Mahomedan empire," We should vainly seek the indissoluble union and easy obedience that pervaded the government of Augustus and the Antonines; but the progress of the Mahomedan religion diffused over this ample space, a general resemblance of manners and opinions. The language and laws of the Koran were studied with equal devotion at Samarkand and Seville. The Moor and the Indian embraced as countrymen and brothers in the pilgrimage of Mecca; and the Arabian language was adopted as the popular idiom in all the provinces to the westward of the Tigris." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_9

The entire trade of history has been to account for his Saracen expansion purely and simply by Religion; but an economic interpretation of this same phenomenon may also stand the test. A well-known writer says "The sudden surging forward of the Arabs was only apparently sudden. For centuries previously, the Arab migration had been in preparation. It was

the last great Semitic migration connected with the Economical decline of Arabia..... In short, long before Mahomet, Arabia was in a state of unrest, and a slow, uncontrolled infiltration of Arabian tribes and tribal branches had permeated the adjoining civilized lands in Persian as also in the Roman territory, where they had met with the descendents of earlier Semitic immigrants to those parts, the Armaneans who were already long acclimated there.

Hunger and avarice, not religion, are the impelling forces, but religion supplied the essential unity and central power. The expansion of the Saracens* Religion, both in point of time and in itself, can only be regarded as of minor import and rather as a political necessity. The movement itself had been on foot long before Islam gave it a party cry and an Organisation." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_10

Prompted both by the ardour of spreading a new religion and also by the economic forces of the time, within forty-six years after Mahomet's flight from Mecca, the new converts to Muhamedanism appeared in arms before the walls of Constantinople and besieged it (in A. D. 668-675). The siege lasted for 7 years without any decisive result, the besiegers made light of the strength and resources of Constantinople. The Romans rose equal to the danger of their religion and empire and met the onrushing Saracens with numbers and discipline with so much heroism that it revived their population in the East and the West and for awhile, eclipsed the triumphs of the Saracens, who, had they succeeded in capturing Constantinople, would certainly have jeopardised the prospects of Christianity.

The Saracens invaded Constantinople a second time and besieged it (A. D. 716-718) but with the same result

Amidst all these triumphs, the Arabs were being gradually eclipsed by the Seljuks. At the time of their rise, the authority of Quaim, the Abbaside Caliph of Baghdad, was completely overshadowed, first by the Sheite dynasty of the Buyids, and afterwards by the more formidable Fatimite rivals. Placed in such circumstances, the Abbaside Caliph welcomed the rise of the Seljuk Turks, who being the upholders of orthodox Islam were sure to reinvest him all his former power and grandeur."It is their merit from a Mahomedan point of view to have re-established the power of orthodox Islam and delivered the Moslem world from the subversive influence of the ultra-Sheite tenets, which constituted a serious danger to the duration of Islam itself. Neither had civilization anything to fear from them, since they represented a strong neutral power which made the intimate union of Persian and Arabian elements possible, almost at the

expense of the national-Turkish-literary monuments in that language being during the whole period of the Seljuk rule exceedingly rare.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_11 The Seljuks comprised innumerable tribes or families, one of which was known as the Guzz. Among these constantly contending partics, the Guzz family, not in good graces of the rest, rose to power and became a menace to the neighbouring Mohomedan provinces.

Under the leadership of Pigu Arstan Israil, they crossed the Oxus and spread over the Eastern provinces of Persia and having defeated Mahamud, the Gaznavite king in the battle of Mero in 1040, they proclaimed their independence. Within a very short time, the Seljuks secured pre-eminence in the whole of central Asia as far as the Hellespont.”After the great victory of Alp Arsia in which the Greek emperor was taken prisoner (1071), Asia minor lay open to the inroads of the Turks. Hence it was easy for Suleiman, the son of Kutulmish, the son of Arstan Pigu (Israil), to penetrate as far as the Hellespont, the more so after the captivity of Romanas' two rivals, Nicephorus Bryennius in Asia and Nicephorus Botanciates in Europe, disputed the throne with one another. The former appealed to Suleiman for assistance, and was by his aid brought to Constantinople and seated on the imperial throne.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_12 Within a short time they captured Anttioch to give permanance to their Syrian monarchy and brilliantly carried their arms to such an extent by 1234 that the Seljukian empire included almost the whole of Asia minor.

But the Seljukian empire was bound to be short-lived, both because of internal dissensions and external aggressions. The external aggression of the Seljukian empire was headed by the Mongols. The early history of the Mongols is enveloped by obscurity and legend. Chengizkhan, the hero of the Mongols, at his death in the valley of Kilien in 1227”left to his sons an empire which stretched from the China sea to the banks of the Dnieper .”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_13 Chengizkhan appointed Ogdai as the Khakan or his successor and gave parts of his extensive dominion to other claimants. Ogdai tried to extend his dominion.”At the head of a large army, he marched southwards into China to complete the ruin of the Kiu dynasty, which had already been so rudely shaken, while at the same time Tuli advanced into the province of Honan from the side of Shensi. Against this combined attack, the Kiu troops made a vigorous stand, but the skill and courage of the Mongols bore down every opposition and over a hecatomb

of slaughtered foes, they captured Kai-Feng-Fu, the capital of their enemies. From the Kai-Feng-Fu the emperor fled to Juning Fu, whither the Mongols quickly followed. After sustaining a siege for some weeks, enduring all the horrors of starvation, the garrison submitted to the Mongols and at the same time the Emperor committed suicide by hanging." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_14](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_14) Not being satisfied with this, Ogadi in 1235 A. D. sent an army against the Sung Dynasty of China, south of the Yang-se-kiang and in Korea.

Having thus consummated his conquest in 'eastern Asia, Ogadi turned his attention to western Asia.' In 1236 A. D. he invaded Georgia and Great Armenia capturing Tiflis and Kars and sent a large army under Batu his nephew in eastern Europe. Batu captured Bolgari, the capital city of the Bulgar. crossed the Volga and invaded Ryazan which fell on the 21st of December 1237 and perpetrated such atrocities that "no eye remained open to weep for the dead." He carried Moscow which were followed by Vladimir and Kozelsk. Poland and Hungary were overtaken by the same fate.

Contemporaneous with the rise of the Mongols the Turks known as Ottomans were rising in power. They were one of those nomad tribes dwelling between the plains of Sungaria and the desert of Gobi." Legend assigns to Oghuz, son of Kara Khan, the honour of being the father of the Ottoman Turks. Their first appearance in history dates from A. D. 1227. In that year a horde, variously estimated at from two to four thousand souls, with their flocks and their Slaves driven originally from their central Asian homes by the pressure of Mongol invasion, and who had sought in vain a refuge with the Seljukian Sultan Ala-ud-din Kaikobad of Konia, were returning under their chief Suleiman Sha to their native land. They were crossing the Euphrates, not far from the castle of Jaber, when the drowning of their leader by accident threw confusion into their ranks. Those who had not yet crossed the river refused, in face of this omen, to follow their brethren. The little band numbering 400 warriors . . . decided to remain under Ertoghrul, son of the drowned leader. Ertoghrul first camped at Jessin, East of Erzerum. A second appeal to Ala-ud-din was more successful and the numbers of the immigrants had become too insignificant for their presence to be a source of danger. The lands of Karajabagh, near Angora, were assigned to the new settlers, who found there good pasturage and winter quarters. The help afforded by Ertoghrul to the Seljukian monarch on a critical occasion led to the addition of Sugut to his fief, with which he was now formally invested. Here Ertoghrul died

in 1288 at the age of ninety, being succeeded in the leadership of the tribe by his son Osman. When exhausted by the onslaughts of Ghazan Mahmud Khan, ruler of Tabriz, and one of Chengiz Khan's lieutenants, the Seljukian empire was at the point of dissolution, most of its feudatory vassals helped rather than hindered its downfall in the hope of retaining their fiefs as independent sovereigns. But Osman remained firm in his allegiance, and by repeated victories over the Greeks revived the drooping glories of his suzerain. His earliest conquest was Karoja Hissar (1295), where first the name of Osman was substituted for that of the sultan in the weekly prayer. In that year Ala-ud-din Kaikobad II conferred on him the proprietorship of the lands he had thus conquered by the sword and presented him at the same time with the horse-tail, drum and banner which constituted the insignia of independent command. Osman continued his victorious career against the Greeks, and by his valour and also through allying himself with Kensee Mikhal, lord of Harman Kaya, became master of Ainequeui, Bilejik and Yar Hissar . . . In 1300 the Seljuk empire crumbled away, and many small states arose on its ruins. It was only after the death of his protector and benefactor Sultan Ala-ud-din II that Osman declared his independence, and accordingly the Turkish historian dates the foundation of the Ottoman empire from this event.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_15 The empire of the Turks was very extensive.”Turks ruled in Asia minor, Turks governed Egypt, Turks held minor authority under the Mongols in Syria and Mesopotamia, while the descendants of Chengizkhan had succeeded to the dominion of the Kalifs: in Persia, had assumed all the dignity of sovereignty in the wild region of the Volga and the Ural mountains, in the lands of the Oxus, and the deserts of Tartary, had spread across central Asia and had founded an empire in China, and were preparing to establish the long line of Mongol emperors in Hindustan whom we know by the name of the Great Moguls.”mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_16

But the power of the Turks for a time suffered a blow that seemed to end it once for all.”Just at the moment when the Sultan seemed to have attained the pinnacle of his ambition, when his authority was unquestioningly obeyed over the greater part of the Byzantine empire in Europe and Asia, when the Christian states were regarding him with terror as the scourge of the world, another and a greater scourge came to quell him, and at one stroke all the vast fabric of empire which Bayezid had so triumphantly erected was shattered to the ground and this terrible

conqueror was Timur, the Tartar or as we call him "Tamurlane". He established his superiority over the petty chiefs that had arisen out of the ruins of the vast kingdom of Chengizkhan. Tamurlane carried every thing at the point of sword and subdued every province that was under Bayezid. The Tartar and the Turk faced in 1402. As the Turks were engaged in laying seige to Constantinople, the Sultan heard of the news of the victory of Tamurlane over his troops at Siwas. Bayezid collected his troops and hurried to give battle in person but lost it at Angora and the edifice of the Turkish empire crumbled to pieces." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_17](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_17) Reared with consummate skill and maintained with the utmost bravery the Turkish empire succumbed before the "Asiatic Despot", the embodiment of "the wrath of God". "The history of the Ottomans seemed to have suddenly come to an end. Seldom has the world seen so complete, so terrible, a catastrophe as the fall of Bayezid from the summit of the power to the shame of a chained captive." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_18](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_18)

Unfortunately however Tamurlane did not survive to avail the fruits of his victory and his apparent stroke was far from being a final blow to the Ottoman empire. Mr. Lane Poole says "The most astonishing characteristic of the rule of the Turks is its vitality. Again and again its doom has been pronounced by wise prophets, and still it survives. Province after province has been cut off the empire, yet still the Sultan sits supreme over wide dominions, is revered or feared by subjects of many races. Considering how little of the great qualities of the ruler the Turk has often possessed, how little trouble he has taken to conciliate the subjects whom his sword has subdued, it is amazing

how firm has been his authority, how unshaken his power, . . . Within a dozen years the lost provinces were reunited under the strong and able rule of Mahammud I, and the Ottoman Empire far from being weakened by the apparently crushing blow it had received in 1402, rose stronger and more vigorous after his fall, and like a giant refreshed, prepared for new and bolder feats of conquest." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_19](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_19) Cheered up by brilliant prospects Mohammed transferred his capital from Brusa in Asia to Adrianople in Europe. The Seljuk Turks reached the Hellespont but it was left to the Ottomans to cross it. Constantinople was the dream of many a Turkish ruler. They had longed for the possession of that imperial city ever

since Ottoman had dreamed that he grasped it in his hand.”Thunderbolt Bayezid had besieged it. Musa had pressed it hard. Murad n had patiently planned its conquest. There was little to be won beside the city itself, for all the province round about it had long been subdued by the Ottomans, but the wealth and beauty and the strength and position, of the capital itself were quite enough to make its capture the crowning ambition of the Turks.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_20](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_20) With eagerness Mahammud II the sixth of the Ottoman emperors was in watchful waiting for pretext to capture the city. Taking advantage of the hostility of the emperor he prepared to attack the city which fell on the 29th of May 1453. The withstanding of the city for such a long time rather than its fall constitute real wonder for”at this period the state of the Byzantine empire was such as to render its powers of resistance insignificant, indeed the length of time during which it held out against the Turks is to be attributed rather to the lack of efficacious means at the disposal of its assailants than to any qualities possessed by its defenders.’[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_21](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_21) There is perhaps no place in the world more strategic than Constantinople in that it commands the three continents Asia, Europe and Africa, and whoever has had it, has enjoyed supremacy in all these three. Speaking of the physical strength of Constantinople and the attacks it has withstood Dr. Cunningham says,”As each century came, a new horde of invaders appeared. In the fourth century, immediately after its foundation, it was threatened by the Goths ; in the fifth, by Huns and Vandals ; in the sixth, by Slavs; these were succeeded by Arabs and Persians in the seventh, and Magyars, Bulgars and Russians in the eighth and ninth. Even after its prestige had been broken by the success of Venice and the Fourth Crusade, and the establishment of a Latin Kingdom, the restored empire was able to maintain a long resistance against the Turks. It had often been shaken, but not till 1453 did it utterly succumb.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_22](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_22)

It was a great fortune that this imperial city should have withstood these incessant attacks and should have conserved the wreck of the classical civilization. It was also a great fortune for the propagation of Christianity that the wave of Mohomedanism should have been checked long enough before Christianity to have become a real force in Europe. It bore the brunt of barbarism allowed the classic civilization to develop itself. What Constantinople did on the eastern side Tours did on the western side at a very early date, though not perhaps so brilliantly. Being disappointed in

their attempt to take Constantinople the Arabs long before the Turks succeeded in taking it, deployed to the South and carrying their religion triumphantly through Africa thought of entering Europe from the western side through Gibraltar. Here in their preliminary advance they met with little opposition for the kingdom of the West, Goths could hardly defend itself against their masterful onrush and by 711 A. D. Spain- fell into the hands of the Arabs and the Babers and was flooded with Moorish immigrants. Encouraged by success the Arabs thought of crossing over into Gaul but were held in check by the Duke of Aquitaine who however was defeated near Bordeaux in 732. With redoubled energy they advanced to Poitiers and marched for Tours. But here they dashed against a stronger enemy. The Franks under Charles, the Hammer (Mortel) defeated the Arabs at Tours and thus permanently stayed their advance. The Arabs never more made any attempts to cross the Pyrenees. What would have been the fate of European civilization had the Arabs succeeded in subjugating it, is hard to speculate. This much is certain that the Moors were, far in advance of the Franks. Prof. Robinson says, "Historians *commonly* regard it as a matter of great good luck that Charles, the Hammer and his barbarus soldiers succeeded in defeating and driving back the Mohomedans at Tours. But had they been permitted to settle in Southern France they might have developed science and art more rapidly than did the Franks." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_23

While these rapid movements of the Asiatic nomads were upsetting all peaceful activities in central Asia the Roman empire was fast crumbling into decay and Europe fell back into a dull lull broken only by the incessant warfare of the Germanic people.

Under these circumstances commerce was bound to decline. There were innumerable hindrances to mediaeval commerce. Rapidity of exchange was greatly hindered by the lack of money all throughout western Europe. Christianity was anything but an optimistic religion, it was a protest against the comforts of life. Economics was held down by religion. The doctrine of "just price" and the prohibition of whole sale trade greatly depressed commerce. The greatest hindrance that was put in the way of commercial activity was the Christian doctrine of usury. In one sweep the entire mass of people was prohibited to loan money at interest. When combined with the scarcity of money we can realize the retrograding character of this prohibition. The Jews not being within the pale of Christianity were the only people left to 'deal in monetary transaction and their service to economics is immeasurable.' This ill-starred people played a most *important*

part in the Economic development of Europe, but they were terribly maltreated by the Christians, who held them guilty of the supreme crime of putting Christ to death.” mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_24 Added to all these were the annoying transit duties arbitrary in their character. The geographic knowledge of the time was bewilderingly miserable. Dangers of the sea were by no means small and the pirates were the source of constant dread. To crown all the most effective hindrance was the dilapidation of the Roman roads.

Under the combined force of these unfavourable circumstances there is no wonder that since the fall of the Roman Empire, there prevailed in Western Europe a long lull and a dull monotony of static life.

Constantinople did not pay much attention to commerce. Its policy was that of extortion. It never cared to achieve to the full the gains due to its situation on the Bosphorus. There was very little trade between the West and Constantinople military operation constituted the only stimulus to trade activities. (Space left blank-ed.)

Nay the rule of the Saracens in Syria and Egypt was far more enlightened than that of the contemporary rulers of the Byzantine Empire.

But amidst all this ruin Italy conserved the mercantile and intellectual forces of the middle ages. The 9th century A. IX marks *the* rise of real mercantile activity in the North-East and South-West of Italy. It was the Era of the rise of the Italian City-Republic and Eastern commerce was the thing upon which they fed themselves fat. Each city-state rose to hold "The Gorgeous East in fee."

First and foremost is Amalfi. It wrested its independence from the Eastern Empire by 820. Her maritime activity grew so rapidly that within 20 years their navy was powerful enough to fight the Saracens in their naval attacks on Rome. Her factories (agencies of modern days) were scattered in Palermo, Syracuse, Messina, Durazzo and Constantinople and her reputation as a commercial state grew so wide-spread that, "The maritime laws of *Tabula Amalfitana* were current among traders on every coast of the Inland Sea and the coinage of the Republic was the chief medium of exchange between Latin Europe and the Levout." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_25

The smallness of the harbour prevented Amalfi from being a great emporium. She therefore had to give way to her rivals. She fell prey to the

land powers of the Normans who had subdued Naples, Salerno or Brindisi while the sea power was immeasurably outdone by other and better situated city states.

Venice rose as Amalfi went down."From the time of Charlemagne the Queen of the Adriatic began to take a place in the politics as well as in the commerce of the Latine world. Its situation had advantages beyond any other harbour town of Italy. Separated from the mainland by the sea and from the open sea by the low fringing walls of its lagoons, surrounded almost entirely by shallows pierced only by a few deep channels, Venice was usually considered by its own citizens, as by foreigners, to be beyond attack. The political troubles of the continent made it a refuge from the time of Attila, and the absence of any maritime rival on the adriatic left open a valuable and extensive field of operations for commerce, for colonization and even for conquest."mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_26 Her benevolent neutrality and her allegiance to Byzantine greatly augmented her prosperity for on the decline of the Eastern Empire the whole adriatic coast came under her influence and the chief markets of Byzantine coast, Antioch, Inopuesda, Adana, Tarsus, Attalia, Strobilos Chios, Ephesus and Phoeacea Hiraclea and Selymbria, Chrysopolis, Demetrias, Adrianople, Athens, Thebes, Thissalonica, Negropont, Corinth Corfus, Durazzo etc. were opened for Venician trade. Her commercial policy was very farsighted and wise. She laid down the rule"of siding always with the stronger, especially in maritime struggle"and practised it on many an occasion and this by crushing all her enemies and ingratiating herself into the favour of the strong achieved her greatness.

Genoa, another city state came late to share in the oriental trade. 1097 A. D. marks her rise."The origin of the state as an independent body may be found in a *Campagna* or political association, founded at the very close of the eleventh century, controlled by consuls freely elected and supported by the bishops of the city against secular lords, such as Obertimk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_27

From 1097 to 1122 she secured important trading concessions and established factories both on the Levantine Coast as well as on the African. Her trade extended to Egypt through Alexandria, to Tunis and to the Southern Coast towns of France and Spain.

Origin of Pisa which is similar in nature to that of Genoa dates from 1085. By deeds of arms she succeeded in securing commercial privileges

from the Moslems and from the Byzantine Empire. Her commerce was so great that "Western orthodoxy was shocked by the "marine monsters" from the ends of the Earth who thronged the streets of the city; Pagans, Turks, Libyans, Parthians and Chaldeans defiled the town and blackened (her) walls : here, most of all, was to be seen the triumph of commercialism over all the barriers of Latin exclusiveness over, race, religion and language alike." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_28](#) None of the Republics secured more concessions and privileges than Pisa and her maritime activity though short was brilliant.

The commercial activity of these Republics while in their infancy was greatly fostered by the crusades. We are not at all concerned with the military aspects of the crusades though they were perhaps the greatest of military exploits of the time. The commercial aspect of the crusade is what demands our attention.

The sea had its dangers and fears. [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_29](#) Hardly any one tried to take a chance." In that age it might truly be said that no landman went to sea unless obliged to do so, for a voyage was being in prison with the addition charge of being drowned." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_30](#) The importance of water transportation was however demonstrated to the crusaders by the wearisome experience of the landways used in the first Crusade (1096-99) ; and the marine transportation was in the hands of these Italian Republics. The Crusaders therefore began to indent more and more upon these republics who fed fat on this growing commerce.

"By serving the cause of Christendom they (the Republics) served their own. They multiplied, many times over, their carrying trade; they largely increased their export and import commerce. Above all, they acquired a privileged, a more than half political, position on the coasts of the Levant, as time went on, they became more indispensable to the crusading princes, they were able to dictate their terms more freely until the main burden of the Holy war rested upon them as the chief holders of power." [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_31](#) The Crusades seem to have been looked upon with different perspectives. The Catholic Church had a double motive which is well manifested in the words of St. Bernard, respecting the soldiers of the 2nd crusades, when he says, "In that countless multitude you will find few except the utterly wicked and impious, the sacrilegious,

homicides, and perjurers, whose departure is a double gain. Europe rejoices to lose them and Palestine to gain them: They are useful in both ways, in their absence from here and their presence there.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_32](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_32) The discontented noble, the restless who was eager to shun responsibilities and the criminal and the sinful had their points of view of the crusades and the objectives as had the religiously devout and 'naturally romantic. But”the cunning traders and sea men of the commercial republics looked on the crusaders with very different eyes from the average catholic lords and labourers of the inland districts : they were not without religious enthusiasm but they cultivated it rather as a useful commodity than as an inevitable state of feeling; and they felt but little of the blind hatred against Islam, and the passionate veneration for the Gospel sites, which sincerely animated the great body of the warriors and pilgrims they conveyed to Palestine. Merchantile interest was never absent from the minds of those who governed, bought, or sold in Venice and Pisa, in Genoa and Amalfi.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_33](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_33) The results of the Crusades were contrary to expectation. They achieved what was perhaps never intended by the Crusaders and the gain was by no means small.”The heyday of the crusading power on land was also the heyday of the maritime prosperity of many western cities : and at the conclusion of the religious wars the main results of the struggle was to be found in the expansion of the Christian trade, and in the assimilation of no small part of oriental and moorish civilization. For the meeting of east and west in this tremendous conflict brought little permanent gain to Europe and the Catholic world, in the political sense : Through the medium of commerce, on the other hand it directed the energies of the Christian nations to their true future. The frontal attack of the crusaders was unsuccessful, but the crusading struggle imported a new culture and material prosperity, an increased knowledge, an immensely extended wealth, a restless but obstinate ambition, whose results were seen in the Renaissance of the the fifteenth and sixteenth century in the great discoveries both of geography and natural science and in the final triumph of European arms and enterprise throughout the world.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_34](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial_Relations_of_India_in_the_Middle_Ages.htm_-_msocom_34) The above may strike as an exaggerated description of the enduring effects of the Crusades but there is no doubt that they imparted a liberal education to the Europeans and fostered trade by giving a permanent footing to merchants inlands where the dominions

of the Christian rulers had been destroyed.

The Italian Republics were immensely rewarded for their help to the Crusaders. Besides many privileges each one acquired "spheres of influence" exclusive of the other anticipating the modern "Spheres of influence" in China. They all rivalled each other for the control of the marts behind the Levants. "The Moselm hinterland to the Crusading Syria possessed four chief markets—Aleppo, Damascus, Hems or Emesa, and Hawath, beyond which lay the still greater marts of Bagdad and the lesser Emporia of Mosul and Bassora or Basra converging the line of the Tigris, Aleppo was a head centre of the trade route from the Abbasside Caliph's 'metropolis' to Antioch and Laodicea on the western side. This route. . . Edrisi calls the great avenue of the trade of Irak, Persia and Khorasan, and the silk market of Allepi proved its connection with the still more distant countries of the Far East. Even at the close of the thirteenth century many Venetian traders were residents here for the sake of commerce in *Seric* goods, as well as in *alum*. The figments and the pepper found at Antioch by the Crusaders, on the capture of the city, also bore witness to an Indian commerce with the Mediterranean by this path, and the elder Sanuto is probably right when he says (at the beginning of the 14th cen.) 'That in the old time most Oriental goods passed along this way to the Roman Sea.'" mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_35 The rapid movement of troops by Saracens and the Christians did not materially affect the Red sea route to India and Alexandria continued to be the "market of two worlds."

These Italian Republics secured the Oriental commodities and started commerce with "ultra-montane lands in the north of the continent and became "the European staples of Mediterranean track." The north was practically in a semi-barbarous condition. The commercial activity in the Baltic was meagre. The Viking was a "half merchant and half pirate". "So far as we can gather. . . this commercial activity (in the north) was different from that of the Phoenicians and their Greek initiators in two important particulars. It was much less completely organized. The Phoenicians had settled factories at special points, and there were permanent off-shoots of the mother-city in distant lands, and had recognised rights and obligations. But the horse commerce does not appear to have arisen between towns and colonies. The Viking was rather the adventurer who went out to improve his fortunes as best he might, and who it be found a favourable opportunity, established himself on an estate. The Horsemen may have had more aptitude for town life than some of the other Teutons, but they were ready to become cultivators and colonists, and did not confine their

energies and trade." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_36 Nay before their conversion to Christianity, the Horsemen were a great menace to peaceful commerce. Considerably after the conversion of the Horsemen to Christianity signs peaceful commerce began to show among the Flemish towns. This had much to do with the wool productions in England. English was exchanged for Flemish fabrics. The Flemish dealers had organized themselves into what is known as "Flemish House of London" and controlled the trade through the "staple" towns. Beyond Flanders the German trade was controlled by the German House. It was a close confederation of a large number of towns of northern Germany. This German Hanseatic League was the most extended commercial Organisation of middle ages. It gathered the products of the Baltic lands, such as lumber, tar, salt, iron, silver, salted and smoked fish, furs, ambers and certain coarse manufactures which it exchanged for goods brought by the commercial cities of Italy from far off lands. Thus through the agency of these Italian Republics, "the products of Arabia and Persia, India and the East Indian Islands, and even of China, all through the middle ages, as in antiquity, made their way by long and difficult routes to Western Europe. Silk and Cotton, both raw and manufactured into fine goods, indigo and other dyestuffs, aromatic woods and gums, narcotics and other drugs, pearls, rubies, diamonds, sapphires, turquoises, and other precious stones, gold and silver, and above all the edible spices, pepper, ginger cinnamon, cloves, and all-spice, could be obtained only in Asia." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_37 Thus the commerce between Asia and Europe formed a regular living system and was fed by various channel.

But this system was early disturbed by the rise of Islam. When we imagine that trade was carried on by land Caravans with all the cumbersomeness we can imagine the hindrances it must have underwent owing to the rapid military movements of the Saracens We will recall that there were four principal trade routes from Asia to Europe and they all lay through the dominions of the Saracens." During the Crusades, so long as the avenue by the Persian Gulf and the Red Sea were controlled by hostile Mohomedan powers, it became necessary to adopt another more expensive and circuitous route, requiring much land-carriage and several transfers of freight. This route led up the Indus, across the mountains on beasts of burden, thence by the Oxus, and so to the Caspian Sea. This, which was ancient route, was now adopted by Venice and Genoa. From the Caspian it took especially the direction of the Volga, to a place called Zarizn, thence

through the country to the Don, where, at the river's mouth, in the town of Tana, now Azor, both Venice and Genoa had commercial privileges, and the former had a consul from the end of the 12th century. Afterwards an important entrepot for Genoa was Theodosia, now Jatta, in the Crimea.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_38](#)“Islam had hemmed Christendom on every side. On the East as on the South, the Crescent raised a barrier against the advance of the Cross.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_39](#) But in this mighty struggle of the Crescent and the Cross commerce suffered immensely.”The Ottoman seizure or obstruction of the Indian trade routes brought disaster not alone to the Mediterranean republics. The blow fell first on Genoa and Venice, but it sent a shock through the whole system of European commerce. The chief channel by which the products of Asia reached the central and northern nations of Christendom was the Hanseatic League.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_40](#) The Hanseatic had profited mainly owing to its control of Oriental wares coming through Italian Republics. From very early times”Germany and the north Italian upland were dependent on the Republic (Venice) for the products of the east, and when 1017 of ([mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_41](#)) ships laden with spices suffered shipwreck, the event is noticed by a (*[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_42](#)) chronicler as a serious misfortune.”[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_43](#)“The Indian trade formed an important contributory to this Hanseatic commerce. When the eastern traffic began to dry up, its European emporiums declined.”³[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_44](#) In this blockade of old trade routes lies the (*[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_45](#)) expansion of western Europe. The whole situation is well summed up by Prof. A. F. Poland when (*[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_46](#)) as to why America was discovered towards the end of the fifteenth century, he says, (*[mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/47.Commercial Relations of India in the Middle Ages.htm - _msocom_47](#)) would be the paradoxical assertion that

Columbus discovered America in 1492 or thereabouts because the Turks are an obstructive people. The connection is not quite obvious, but obvious connections are always superficial, and this is more profound. The Germans have a proverb *Dermensch est was arisst*— man is what he eats. It might be ([*mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial Relations of India in the Middle Ages.htm - _msocom_48](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/47.Commercial Relations of India in the Middle Ages.htm - _msocom_48)) for a motto by those people. (This seems to be incomplete—ed.)

COMMUNAL DEADLOCK AND A WAY TO SOLVE IT

I

COMMUNAL DEADLOCK AND A WAY TO SOLVE IT

Mr. President,

I am indeed very grateful for your kind invitation to address the Annual Session of the All-India Scheduled Castes Federation. I am happy to see this great gathering of the Scheduled Castes. Having regard to the very short time which has elapsed since its establishment, the growth of the Federation appears by all evidence to be phenomenal. That the Scheduled Castes all over India have rallied round the Federation and are determined to make the Federation their only representative organization is beyond question. The growth of the Federation within so short a time will not be fully appreciated unless the tremendous difficulties in the way of our organization have been fully appreciated. There are agents of other political

organizations which decoy our people by false blandishments, by false promises and by false propaganda. There is the ignorance of our own people, who do not know the critical nature of the times we are living in and who do not know the value of organization for achieving our political objects. There is a lamentable lack of resources at our command. We have no money. We have no press. The crudest of tyrannies and oppressions, to which our people are subjected, day in and day out all over India, are never reported by the Press. Even our views on social and political questions are systematically suppressed by an organized conspiracy on the part of the Press. We have no funds to maintain a machinery, to render help to our people and to educate, agitate and organize them.

These are the odds we have to contend against. That the Federation, notwithstanding these difficulties, should have grown to this dimension is entirely due to our men who have been ceaselessly and unselfishly devoting themselves to the building up of this organization. I am sure you would like me to pay Mr. Ganpat Mahadev Jadhav, the President of the Bombay City Scheduled Castes Federation, our tribute for the work he has done. As everyone knows, he possesses remarkable degree of organizing capacity and I am sure the success of this Session is due to a great extent to his efforts and to those who have been his co-workers.

Ordinarily, at a gathering such as this I would have spoken—and our people would expect me to speak—on any one of the social and political problems of the Scheduled Castes. But I do not propose to engage myself in a discourse on so sectarian a subject. Instead, I propose to speak on a topic, which is general and has a wider appeal, namely the shape and form of the future Constitution of India.

It may be as well for me to explain the reasons for my decision. For the moment, the responsibility for leading the movement of the Scheduled Castes and facing its day-to-day problems does not lie on my shoulders. On account of my office I am out of it and I have no desire to take it up. That is one reason why I do not propose to take up a sectarian subject which is related only to the Scheduled Castes.

The Scheduled Castes are often charged as being selfish, interested only in themselves; that they have no constructive suggestions to make for the solution of the country's political problem. The charge is entirely untrue, and if it is true, the Untouchables will not be the only ones who will be found guilty of it. Most people in India do not make constructive suggestions. The reason is not that there are not people capable of constructive thought. The reason why all constructive thought remains bottled up is because a long and continuous propaganda has inculcated

upon the minds of the generality of the people that nothing should be respected and nothing should be accepted unless it emanates from the Congress. It is this which has killed all constructive thought in this country. At the same time, I believe this charge against the Scheduled Castes should be repelled in a positive way by showing that the Scheduled Castes are capable of putting forth constructive proposals for the general political advancement of the country which the country, if it cares to, may consider. This is the second reason why I have on this occasion chosen this subject of general interest.

II

RESPONSIBILITY FOR FRAMING THE CONSTITUTION

Before I set out in concrete terms the constitutional proposals I have in mind, I wish to raise two preliminary issues. First is : Who should frame a Constitution for India? It is necessary to raise this question because there are quite a lot of people in India who are hoping, if not asking, the British Government to resolve the deadlock and to frame a Constitution for India. I think there is a gross fallacy in such a view which needs to be exposed. A Constitution, framed by the British Government and imposed upon Indian, sufficed in the past. But if the nature of the future Constitution Indians are clamouring for, is borne in mind it will be clear that an imposed Constitution will not do.

The difference between the past Constitutions and the future Constitution of India is fundamental, and those, who still rely on the British for framing a Constitution for India, do not seem to have realized this difference. The difference lies in this that the past Constitutions contained a breakdown clause. But the future Constitution of India cannot contain such a breakdown clause. People in India decry the breakdown clause—by now the notorious section 93 of the Government of India Act, 1935. That is because they do not know the why and the how of its place in the Act. Its importance will become apparent if two important considerations governing the political life of a community are borne in mind. First of these considerations is that Law and Order is the medicine of the body politic, and when the body politic goes sick this medicine must be administered. Indeed, so important is this consideration that failure to administer it must be deemed to be a crime against society and civilization. The second consideration is that though it is true that no government has a vested right to govern, it is equally true that there must always be a government to govern—which I mean maintain Law and Order—until it is displaced by a better government. The breakdown clause serves these two

purposes. As such, it is of the highest value for the peace and tranquillity of the people. It is the one and only means which can save the country from anarchy. For, when Constitutional Government fails, the breakdown clause has at least the merit of maintaining Government.

In the past this distinction between Constitutional Government and Government with the provision for Government stepping in when Constitutional Government failed, was a feasible proposition. It was feasible because while the British Government gave Indians the right to a Constitutional Government, it kept to itself the right to govern, should Constitutional Government fail. In the future Constitution of India, it would not be possible to maintain this distinction. It would not be possible for the British Government to give the Indians the right to Constitutional Government and also to keep to itself the right to govern in case there was a breakdown in the Constitutional Government. The reason is quite obvious. The past Constitutions of India did not treat India as a Dominion. The future Constitution will proceed on the assumption that India will be a Dominion. The breakdown clause or the possibility of Government stepping in, when Constitutional Government has failed, can be reconciled in the case of a country, which has no Dominion Status. But the two are irreconcilable in the case of a Dominion. In the case of a Dominion or for the matter of that in the case of any free country, there is either a Constitutional Government or a Rebellion.

What does this mean? It means that it is impossible to frame a Constitution for an Indian Dominion with a possibility of a breakdown. To put the same thing in a different language the Constitution must be so made that it will not only command the obedience but also the respect of all ; and all or if not all, at any rate, all important elements in the national life of India shall be prepared to uphold it and to give it their support. This can happen only if the Constitution is framed by Indians for Indians and with the voluntary consent of Indians. If the Constitution is imposed by the British Government and is not accepted by one section and is opposed by another, there will arise in the country an element, hostile to the Constitution, and which will devote its energies not to working the Constitution but to breaking it. The anti-constitution party may look upon destroying the Constitution as its only duty and may engage itself in "pronouncing" against a party working the Constitution in the real Latin American fashion.

It is useless for the British to frame a Constitution for India which they will not remain to enforce. The same result will ensue if the Constitution is imposed by one powerful section or a combination of such sections on

other sections. I am, therefore, firmly of opinion that if Indians want Dominion Status, they cannot escape the responsibility of framing their own Constitution. The position is thus inescapable,

III

CONSTITUENT ASSEMBLY

The second question that I wish to raise is : Should there be a Constituent Assembly, charged with the function of making a Constitution? Constituent Assembly is on the lips of everybody. The Congress parties in their resolutions, passed before the Congress ministries resigned, demanded that the Constitution for India should be made by a Constituent Assembly composed of Indians. A Constituent Assembly was included in the Cripps proposals. The Sapru Committee has followed suit.

I must state that I am wholly opposed to the proposals of a Constituent Assembly. It is absolutely superfluous. I regard it as a most dangerous project, which may involve this country in a Civil War. In the first place, I do not see why a Constituent Assembly is at all necessary. Indians are not in the same position as the Fathers of the American Constitution were, when they framed the Constitution of the United States. They had to evolve ideas, suitable for the constitution for a free people. They had no constitutional patterns before them to draw upon. This cannot however be the case for Indians. Constitutional ideas and constitutional forms are ready at hand. Again, room for variety is very small. There are not more than two or three constitutional patterns to choose from. Thirdly, there are hardly any big and purely constitutional questions about which there can be said to be much dispute among Indians. It is agreed that the future Indian Constitution should be Federal. It is also more or less settled what subjects should go to the Centre and what to the Provinces. There is no quarrel over the division of Revenues between the Centre and the Provinces, none on Franchise and none on the relation of the Judiciary to the Legislature and the Executive. The only point of dispute, which is outstanding, centres round the question of the residuary powers—whether they should be with the Centre or with the Provinces. But that is hardly a matter worth bothering about. Indeed, the provision contained in the present Government of India Act could be adopted as the best compromise.

Having regard to this I cannot see why a Constituent Assembly is necessary to incubate a constitution. So much of the Constitution of India has already been written out in the Government of India Act, 1935, that it seems to be an act of supererogation to appoint a Constituent Assembly to do the thing over again. All that is necessary is to delete those sections of the Government of India Act, 1935, which are inconsistent with Dominion

Status.

The only function which could be left to a Constituent Assembly is to find a solution of the Communal Problem. I am quite positive that whatever be the terms of reference of the Constituent Assembly, the Communal Question should not form a part of them. Consider the composition of the Constituent Assembly as suggested by the Sapru Committee. The total membership is fixed at 160. The election is by joint electorates *by* members of the Provincial Legislative Assemblies under a system of proportional representation and the decision is to be by three-fourths of the members present and voting. Can a minority accept this Constituent Assembly as a safe body, in the impartiality of which it can place implicit confidence? The answer to this question must depend upon what answers one can give to two other questions : Does it guarantee that the representatives of a minority elected to the Assembly will be its true representatives? Secondly, does it guarantee that the decision of the Assembly with regard to the claims of any particular minority will not in fact be an imposition on the minority? On neither of these two questions can I confidently say that a minority need have no cause for fear.

Before taking up these questions, let me point out what differences there are between the Cripps Constituent Assembly and the Sapru Constituent Assembly. They may be stated as follows :

(i) The total number for the Constituent Assembly fixed by the Sapru Committee is 160. Sir Stafford Cripps had not fixed any number. But the provision contained in his proposal that the Constituent Assembly shall consist of ten per cent of the total number of members of the Provincial Legislatures virtually fixed the number to about 158—a difference of only 2.

(ii) The method of election to the Constituent Assembly by the Sapru Committee is by joint electorate under the system of proportional representation. In this there is no difference between the Cripps plan and the Sapru plan for the composition of the Constituent Assembly.

(iii) Under the Cripps plan, there was no communal reservation. The Sapru plan departs from the Cripps plan in this respect, in as much as it reserves seats for particular communities in prescribed proportions. This difference is only normal. For, though the Cripps plan did not in terms fix the number, the scheme of proportional representation would have in fact resulted in such reservation. The difference in the quota of representation under the two schemes will be seen from the following table :

Communities and Interests

Quota of seats in the Constituent Assembly

	Under Cripps'	Under Sapru's
Hindus	77	51
Muslims	50	51
Scheduled Castes	15	20
Sikhs	3	8
Indian Christians	2	7
Anglo-Indians	1	2
Europeans	6	1
Aboriginal Tribes	2	3
Special Interests		16
Others	2	1
	158	160

The Sapru Committee has not only fixed the numbers for each Community in the composition of the Constituent Assembly but it has offered the Muslims equality with the Hindus. For this departure the Committee's plea is that in consideration for this offer it has demanded joint electorate as a basis for election to the Constituent Assembly. In this, the Committee must be said to have entirely misunderstood the Cripps proposals. Joint-Electorates were already provided for in the Cripps proposals one clause of which reads—"The members of the Lower Houses of the Provincial Legislatures are to form a single Electoral College". This is simply another way of saying that the election shall be by joint-electorate. It has given something for nothing to one element and thereby put the other Communities in a hazard.

(iv) Under the Cripps proposal the decision of the Assembly was to be by majority of those present and voting. Under the Sapru proposal the decision is to be by a majority of 3/4th of those present and voting.

Now to revert to the two questions. How does the position stand with regard to the first question? To give one's opinion on it, it is first necessary to know the communal distribution of the membership of the Provincial Legislative Assemblies. The following table sums up the position :

Distribution of Seats by Communities in the Provincial Legislative Assemblies

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/09. Communal Deadlock and a Way to Solve It.htm - _msocom_1

Communities	General	Women University Trade	Commerce	Land lords	Total

		Unions					
1	2	3	4	5	6	7	8
Hindus	651	26	7	33	31	22	770
Muslims	482	10	1	5	6	13	517
Schedule d Castes.	151						151
Indian Christians	20	1					21
Anglo- Indians	11	1					12
Sikhs	34	1				1	30
European s	26				19	1	46
Aborigina ls	24						24
Total	1,399	39	8	38	.56	37	1,577

Has the communal reservation made by the Sapru proposal, and which is not to be found in the Cripps proposal, any value? That depends upon how far one community will be able to influence the election of the members of the other communities? What are the prospects in this regard? Let me give another table:

Communities	Voters for Constituent Assembly	Quota of seats in the Constituent Assembly	Number of votes reqd. for electing the quota	(+) Excess of voters over (-) Deficiency of voters below requirement.
1.Hindus	778	51	561	+ 217
2.Muslims	561	51	517	+44
3. Scheduled Castes .	151	20	220	- 69
4. Indian	21	7	77	- 56

Christians .				
5. Sikhs	36	8	88	- 52
6. Europeans	46	1	11	+ 35

From this table the following conclusions emerge :

(i) Taking the total votes to be 1577 and the total number to be elected 160, the quota under the proportional system of representation would roughly come to $10+1 = 11$.

(ii) Taking 11 as the quota, the Hindus will have 217, the Muslims 44 and the Europeans 35 votes to spare, while the Scheduled Castes will be short by 69, the Indian Christians by 56 and the Sikhs by 52 votes.

To put the same thing in a different way :

(i) The Hindus with their excess of 217 votes can elect 20 non-Hindus, who would be dependent upon them ; the Muslims with their excess of 44 votes can elect 4 non-Muslims, who would be dependent upon them and the Europeans with their excess of 35 votes would be able to elect 3 non-Europeans, who would be dependent upon them.

(ii) The Scheduled Castes with a shortage of 69 votes will be able to elect only 13 members on the stock of their own votes and for 7 seats they will have to depend upon Hindu, Muslim or European voters. The Indian Christians with a shortage of 56 votes will be able to elect only 2 seats on the stock of their own voters. For the rest of the 5 seats they will have to depend upon Hindu, Muslim or European voters. Similarly the Sikhs with a shortage of 52 will be able to elect only 3 seats on the stock of their own voters. For the rest of the 5 seats they will have to depend upon Hindu, Muslim or European voters

Such is the position. It is evident that the excess representation granted to the smaller minorities is only an eyewash. Their representation is made so dependent that in no sense can it be called a real representation.

Let me now take the second question. Is the rule of decision adopted by the Sapru Committee for the Constituent Assembly a safe rule? The Cripps proposal had adopted the rule of bare majority. This was an absurd proposition which no sensible man could have proposed. I know of no case where questions relating to the constitution were left to be decided by a simple majority.

The Cripps proposals sought to excuse the adoption of the majority rule on the ground that there was to be a further provision for safeguarding the

interest of the minorities. The provision was to take the form of a Treaty between the British Crown and the Indian Constituent Assembly, before Parliament was to relinquish its sovereignty and make India free. The proposal of a Treaty would have had some sense, if the Treaty was to override the constitution. But the proposal was impossible as under the Cripps scheme India was free to become a Dominion or an Independent country as she pleased. For once India became a Dominion it would *ipso facto* acquire all the legal power necessary to pass an enactment declaring that the Treaty shall not override the constitution. In that case the Treaty would have been no better than a calendar which members of the minorities might, if they wished, hang on the walls of their houses. This was exactly what happened to the Irish Treaty. The Irish Treaty continued to override the Irish Constitution so long as Ireland was not a Dominion. But the moment Ireland became a Dominion the over riding power of the Treaty was taken away by a shore and simple enactment of the Parliament of the Irish Free State and the British Parliament did nothing, for it knew that Ireland was a Dominion and therefore it could do nothing. How so absurd a provision came to be put forth by so eminent a person to assure the minorities, I am unable to understand.

The provisions contained in the Sapru proposals appear to be an improvement. But are they really an improvement? I am sure they are not. A three-fourths majority of 160 means that a view to prevail must have the support of 120 members. Before accepting this as an improvement, one has to have some idea as to how this group of 120 is likely to be formed. If the Hindus and the Muslims combine they will together make up 102 and will need only 18 more to make up 120. Most of the special seats and a few more from others may easily fall into the hands of this combine. If this happens the decision of the Assembly will obviously be an imposition upon the Scheduled Castes, the Sikhs, the Indian Christians etc. Similarly, if the Muslims are isolated the decision will not be a joint decision but an imposition upon the Muslims by non-Muslims. These possibilities of permutation and combination for the purpose of checkmating or out-manoeuvring of some communities by others, I am sorry to say, have not been taken into consideration by the Sapru Committee. There would have been some safety, if the Sapru Committee had provided that the three-fourths majority shall at least include 50 per cent of each element.

Following upon the procedures adopted in the making of the constitution of the United States, the Sapru Committee could have added a further provision for the ratification at any rate of the communal part of the decision of the Assembly by the representatives of the minorities outside

the Assembly. None of these provisions finds a place in the plan of the Constituent Assembly as designed by the Sapru Committee. Consequently the Constituent Assembly has become a snare.

There are many other arguments against the plan of a Constituent Assembly. I may mention one, which I confess has influenced me greatly. When I read the history of the Union between Scotland and England, I was shocked at the corruption and bribery that was practised to win the consent of the Scottish Parliament. The whole of the Scottish Parliament was bought. The chances of corruption and bribery being used in the Indian Constituent Assembly to buy over members to support decisions desired by interested groups are very real. Their effects, I am sure, cannot be overlooked. If this happens, it will not only make mockery of the Constituent Assembly but I feel quite certain that any attempt made to enforce its decisions will result in a civil war. It is my considered opinion that the proposal of Constituent Assembly is more dangerous than profitable and should not be entertained.

IV

NECESSITY OF A NEW APPROACH

I shall be asked that if the Constituent Assembly is not the correct approach, what is the alternative? I know I shall be confronted with such a question. But I am confident in my view that if the Communal Question has become difficult of solution it is not because it is insoluble, nor because we had not yet employed the machinery of Constituent Assembly. It has become insoluble because the approach to it is fundamentally wrong. The defect in the present approach is that it proceeds by methods instead of by principles. The principle is that there is no principle. There is only a series of methods. If one method fails another is tried. It is this swing from one method to another which has made the Communal Problem a jigsaw puzzle. There being no principle there is no guide to tell why a particular method has failed. There being no principle there is no assurance that the new method will succeed.

The attempts at the solution of the Communal Problem are either in the nature of a coward's plan to cow tow to the bully or of bully's plan to dictate to the weak. Whenever a community grows powerful and demands certain political advantages, concessions are made to it to win its goodwill. There is no judicial examination of its claim; no judgement on merits. The result is that there are no limits to demands and there are no limits to concessions. A start is made with a demand for separate electorate for a minority. It is granted. It is followed by a demand for a separate electorate

for a community irrespective of the fact whether it is a minority or majority. That is granted. A demand is made for separate representation on a population basis. That is conceded. Next, a claim is made for weightage in representation. That is granted. It is followed by a demand for statutory majority over other minorities with the right for the majority to retain separate electorate's. This is granted. This is followed by a demand that the majority rule of another community is intolerable, and therefore without prejudice to its rights to maintain majority rule over other minorities, the majority of the offending community should be reduced to equality. Nothing can be more absurd than this policy of eternal appeasement. It is a policy of limitless demand followed by endless appeasement.

Frankly, I don't blame the community that indulges in this strategy. It indulges in it because it has found that it pays, it pursues it because there are no principles to fix the limits and it believes that more could be legitimately asked and would be easily given. On the other hand, there is a community economically poor, socially degraded, educationally backward and which is exploited, oppressed and tyrannized without shame and without remorse, disowned by society, unowned by Government and which has no security for protection and no guarantee for justice, fair play and equal opportunity. Such a community is told that it can have no safeguards, not because it has no case for safeguards but only because the bully on whom the bill of rights is presented thinks that because the community is not politically organized to have sanctions behind its demand he can successfully bluff.

All this differential treatment is due to the fact that there are no principles, which are accepted as authoritative and binding on those who are parties to the Communal Question. The absence of principles has another deleterious effect. It has made impossible for public opinion to play its part. The public only knows methods and notes that one method has failed another is being suggested. It does not know why one method has failed and why another is said to be likely to succeed. The result is that the public, instead of being mobilized to force obstinate and recalcitrant parties to see sense and reason, are only witnessing the discussions of Communal Questions whenever they take place as mere shows.

The approach I am making for the solution of the Communal Problem is therefore based upon two considerations :

(1) That in proceeding to solve the Communal Problem it is essential to define the governing principles which should be invoked for determining the final solution, and

(2) That whatever the governing principles they must be applied to all parties equally without fear or favour.

V

PROPOSALS FOR SOLUTION OF THE COMMUNAL PROBLEM

Having made my position clear on certain preliminary points, I will now proceed to deal with the subject.

The Communal Problem raises three questions : (A) The question of representation, in the Legislature: (B) The question of representation in the Executive; and (C) The question of representation in the Services.

A. REPRESENTATION IN PUBLIC SERVICES

To take the last question first. This can hardly be said to be a subject of controversy. The principle that all communities should be represented in the Public Services in a prescribed proportion and no single community should be allowed to have a monopoly has been accepted by the Government of India. This principle has been embodied in the Government of India Resolutions of 1934 and 1943 and rules to carry it out have been laid down. It has even prescribed that any appointment made contrary to the rules shall be deemed to be null and void. All that is necessary is to convert administrative practice into statutory obligation. This can be done by adding a Schedule to the Government of India Act, which will include the provisions contained in these Resolutions and similar provisions for the different provinces and make the Schedule a part of the Law of the Constitution.

B. REPRESENTATION IN THE EXECUTIVE

This question raises three points :

(i) The quantum of representation in *the* Executive : (ii) The nature of the Executive; (iii) The method of filling the places in the Executive.

(i) *Quantum of Representation*

For the solution of this question, the principle which should be adopted is that the representation of the Hindus, the Muslims and the Scheduled Castes should be equal to the quantum of their representation in the Legislature.

With regard to the other minorities such as the Sikhs, Indian Christians and Anglo-Indians, it is difficult to give them representation in the Executive in strict proportion to their representation in the Legislature. This difficulty arises largely from the smallness of their numbers. If they are to get representation in the Executive in exact proportion to their numbers, the Executive would have to be enlarged to a fantastic degree. All

that can be done, therefore, is to reserve a seat or two for them in the Cabinet for their representation and So establish a convention that they will get a fair portion of representation in the corps of Parliamentary Secretaries that will have to be raised, when the new Constitution comes into existence.

(ii) *Nature of the Executive*

In the Constitution of the Executive, I would propose the adoption, of following principles:

(1) It must be recognised that in a country like India where there is a perpetual antipathy between the majority and the minorities and on which account the danger of communal discrimination by majority against minorities forms an ever-present menace to the minorities, the executive power assumes far greater importance than the legislative power.

(2) In view of (1) above, the system under which a party which has secured a majority at the poll is deemed entitled to form a Government on the presumption that it has the confidence of the majority is untenable in Indian conditions. The majority in India is a communal majority and not a political majority. That being the difference, the presumption that arises in England cannot be regarded as a valid presumption in the conditions of India.

(3) The Executive should cease to be a Committee of the majority party in the Legislature. It should be so constituted that it will have its mandate not only from the majority but also from the minorities in the Legislature.

(4) The Executive should be non-Parliamentary in the sense that it shall not be removable before the term of the Legislature.

(5) The Executive should be Parliamentary in the sense that the members of the Executive shall be chosen from the members of the Legislature and shall have the right to sit in the House, speak, vote and answer questions.

(iii) *Method of Filling Places*

In this connection, I would propose the adoption of the following principles : (a) The Prime Minister as the executive head of the Government should

have the confidence of the whole House.

(b) The person representing a particular minority in the Cabinet should have the confidence of the members of his community in the Legislature.

(c) A member of the Cabinet shall not be liable to be removed except on impeachment by the House on the ground of corruption or treason.

Following these principles, my proposal is that the Prime Minister and the members of the Cabinet from the majority community should be elected by the whole House by a single transferable vote and that the

representatives of the different Minorities in the Cabinet should be elected by a single transferable vote of the members of each minority community in the Legislature.

C. REPRESENTATION IN THE LEGISLATURE

This is the most difficult question. All other questions depend upon the solution of this question, it raises two points : (i) The quantum of representation : and (ii) The nature of the electorate.

(i) *Quantum of Representation*

I would first, put forth my proposals and then explain the principles on which they are based. The proposals are worked out in the following tables which show the scale of representation for the different communities in British India in the Central Legislature as well as in the Provincial Legislature:

Proposed Ratio of Representation in the Legislatures

*N.B.---*The percentages of population in the following Tables differ from the census figures as they have been taken after deducting the population of Aboriginal Tribes :

1. CENTRAL ASSEMBLY

Community	Percentage of population to total	Percentage of Representation
Hindus	54.68	40
Muslims	28.50	32
Scheduled Castes	14.30	20
Indian Christians	1.16	3
Sikhs	1.49	4
Anglo-Indians	0.05	1

2. BOMBAY

Community	Percentage of population to total	Percentage of Representation
Hindus	76.42	40
Muslims	9.98	28
Scheduled Castes	9.64	28
Indian Christians	1.75	2
Anglo-Indians	0.07	1
Parsees	0.44	1

3. MADRAS			
Community		Percentage of population to total	Percentage of Representation
Hindus		71.20	40
Scheduled Castes		16.53	30
Muslims		7-98	24
Indian Christians		4-10	5
Anglo-Indians		0-06	1
4. BENGAL			
Community		Percentage of population to total	Percentage of Representation
Muslims		56-50	40
Hindus		30-03	33
Scheduled Castes		12-63	25
Indian Christians		0-19	1
Anglo-Indians		0-05	1
5. UNITED PROVINCES			
Community		Percentage of population to total	Percentage of Representation
Hindus		62-29	40
Scheduled Castes		21-40	29
Muslims		15-30	29
Indian Christians		0-24	1
Anglo-Indians		0-03	1

6. PUNJAB		
Community	Percentage of population to total	Percentage of Representation
Muslims	57.06	40
Hindus	22-17	28
Sikhs	13-22	21
Scheduled Castes	4-39	9
Indian Christians	1-71	2
7. C P. & BERAR		

Community	Percentage of population to total	Percentage of Representation
Hindus	72-20	40
Scheduled Castes	20-23	34
Muslims	5-70	25
Indian Christians	0-36	1

8. BIHAR

Community	Percentage of population to total	Percentage of Representation
Hindus	70-76	40
Muslims	15.05	30
Scheduled Castes	13.80	28
Indian Christians	1-71	2

9. ASSAM

Community	Percentage of population to total	Percentage of Representation
Hindus	45-60	40
Muslims	44-59	39
Scheduled Castes	8-76	19
Indian Christians	0-48	2

10. ORISSA

Community	Percentage of population to total	Percentage of Representation
Hindus	70.80	40
Scheduled Castes	17-66	36
Muslims	2-07	22
Indian Christians	0-37	2

11.SIND

Community	Percentage population total	Percentage of Representation
Hindus	23.08	40

Muslims	71-30		40
Scheduled Castes	4.26		19
Indian Christians	0.29		1

VI

EFFECT ON MINORITIES

It may be desirable to set out in a tabular form the charges in the representation of the different minorities as prescribed in the Government of India Act, 1935, and as laid down in the proposals—

--

EFFECT ON MUSLIMS

Legislature	Population Ratio	Ratio of Representation	
		Under the Government of India Act, 1935	Under the proposed scheme
Central	28.50	32.00	32
Madras	8.00	13.49	24
Bombay	10.00	17-40	28
U.P.	15.30	28-95	29
C.P.	5.70	12-50	25
Bihar	15.00	26-32	28
Assam	44.60	31.48	38
Orissa	2.00	6.66	22

EFFECT ON SCHEDULED CASTES

Legislature	Population Ratio	Ratio of Representation	
		Under the Government of India Act, 1935	Under the proposed scheme
Central	14.30	7-60	20
Madras	16.50	13-90	30
Bombay	9.60	8.50	28

Bengal	12.60	12.00	25
U.P.	21.40	8-70	29
Punjab	4.40	4-50	9
C.P.	20.20	17-80	34
Bihar	13.80	9-80	28
Assam	8.70	6-50	20
Orissa	17.60	10-00	36
Sind	4.20	Nil	19

EFFECT ON INDIAN CHRISTIANS

Legislature	Population Ratio	Ratio of Representation	
		Under the Government of India Act, 1935	Under the proposed scheme
Central	1.16	3.80	3
Madras	4.10	4.20	5
Bombay	1.70	1.70	2
Bengal	0.19	0.80	1
U.P.	0.24	0.90	1
Punjab	1.70	1.14	2
C.P.	0.35	Nil	1
Bihar	1.70	0.66	2
Assam	0.48	0.90	2
Orissa	0.37	0.16	2
Sind	0.29	Nil	1

EFFECT ON SIKHS

Legislature	Population Ratio	Ratio of Representation	
		Under the Government of India Act, 1935	Under the proposed scheme
Central	1.50	2.40	4
Madras	13.20	18.29	21

EFFECT ON HINDUS

Legislature	Population Ratio	Ratio of Representation	
		Under the Government of India Act, 1935	Under the proposed scheme
Central	30.00	20.00	33
Madras	22.10	20.00	28
Sind	23.80	31.60	40

VII

PRINCIPLES UNDERLYING THE PROPOSALS

I may now proceed to state the principles on which this distribution has been made. They are :

(1) Majority Rule is untenable in theory and unjustifiable in practice. A majority community may be conceded a relative majority of representation but it can never claim an absolute majority.
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/09. Communal Deadlock and a Way to Solve It.htm - _msocom_2

(2) The relative majority of representation given to a majority community in the legislature should not be so large as to enable the majority to establish its rule with the help of the smallest minorities.

(3) The distribution of seats should be so made that a combination of the majority and one of the major minorities should not give the combine such a majority as to make them impervious to the interest of the minorities.

(4) The distribution should be so made that if all the minorities combine they could, without depending on the majority, form a government of their own.

(5) The weightage taken from the majority should be distributed among the minorities in inverse proportion to their social standing, economic position and educational condition so that a minority which is large and which has a better social, educational and economic standing gets a lesser amount of weightage than a minority whose numbers are less and whose educational, economic and social position is inferior to that of the others.

If I may say so, the representation is a balanced representation. No one community is placed in a position to dominate others by reason

of its numbers. The Muslim objection to the Hindu majority and the Hindu and Sikh objections to the Muslim majority are completely eliminated, both in the Central as well as in the Provinces.

VIII NATURE OF THE ELECTORATE

With regard to the question of electorates the following propositions should be accepted:

(1) Joint electorate or separate electorate is a matter of machinery for achieving a given purpose. It is not a matter of principle.

(2) The purpose is to enable a minority to select candidates to the Legislature who will be real and not nominal representatives of the minority.

(3) While separate electorate gives an absolute guarantee to the minority, that its representatives will be no others except those who enjoy its confidence, a system of joint electorates which will give equal protection to the minorities should not be overlooked.

(4) A Four-member constituency, with a right to the minorities to have a double vote and requiring a minimum percentage of minority votes, may be considered as a possible substitute.

IX MATTERS NOT COVERED

(i) QUESTION OF SPECIAL SAFEGUARDS

There are other demands made on behalf of particular minorities such as :

(1) Provision of a Statutory Officer to report on the condition of minorities.

(2) Statutory provision of State aid for education, and

(3) Statutory provision for land settlement. But they are not of a communal character, I do not therefore wish to enlarge upon them here.

(ii) ABORIGINAL TRIBES

It will be obvious that my proposals do not cover the Aboriginal Tribes although they are larger in number than the Sikhs, Anglo Indians, Indian Christians and Parsees. I may state the reasons why I have omitted them from my scheme. The Aboriginal Tribes have not as yet developed any political sense to make the best use of their political opportunities and they may easily become mere instruments

in the hands either of a majority or a minority and thereby disturb the balance without doing any good to themselves. In the present stage of their development it seems to me that the proper thing to do for these backward communities is to establish a Statutory Commission to administer what are now called the 'excluded areas' on the same basis as was done in the case of the South African Constitution. Every Province in which these excluded areas are situated should be compelled to *make* an annual contribution of a prescribed amount for the administration of these areas.

(iii) INDIAN STATES

It will also be noticed that my proposals do not include the Indian States. I am not opposed to the inclusion of the Indian States, provided the terms and conditions of inclusion are such—

(1) that the dichotomy of divided sovereignty between British India and Indian States is completely done away with,

(2) that the judicial and political boundaries which separate British India from Indian States will disappear, that there will be no such entities as British India or Indian States and in their place there will be only one entity namely India, and

(3) that the terms and conditions of inclusion do not prevent India from having full and plenary powers of a Dominion. I have worked out a scheme for the fusion of the Indian States and British India, which will permit the realization of these objects. I do not wish to overburden this address with the details of the plan. For the moment, it is better if British India marches to her goal without complicating its progress by an entanglement with the Indian States.

X

PAKISTAN IN THE LIGHT OF PROPOSALS

My proposals are for an United India. They are made in the hope that the Muslims will accept them in preference to Pakistan as providing better security than Pakistan does. I am not against Pakistan, I believe it is founded on principle of self-determination, which it is now too late to question. I am prepared to give them the benefit of the principle, on condition that the Muslims do not deny the benefit of the principles to the Non-Muslim residents of the Area. But I believe, I am entitled to draw the attention of the Muslims to another and a better plan of security. I claim that my plan is better than the plan of Pakistan. Let me state the points which tell in favour of my plan. They are : (i) Under my proposal the danger of a communal majority, which is the basis of Pakistan is removed. (ii)

Under my proposal the weightage at present enjoyed by the Muslims is not disturbed.

(iii) The position of Muslims in the Non-Pakistan Provinces is greatly strengthened by an increase in their representation, which they may not get if Pakistan comes and which will leave them in a more helpless condition than they are in at present.

XI

A WORD TO HINDUS

Much of the difficulty over the Communal Question is due to the insistence of the Hindus that the rule of majority is sacrosanct and that it must be maintained at all costs. The Hindu does not seem to be aware of the fact that there is another rule which is also operative in fields where important disputes between individuals and nations arise and that rule is a rule of unanimity. If he will take the trouble to examine the position he will realise that such a rule is not a fiction, but it does exist. Let him take the Jury System. In the jury trial the principle is unanimity. The decision is binding upon the judge, only if the verdict of the jury is unanimous. Let him take another illustration that of the League of Nations. What was the rule for decisions in the League of Nations? The rule was a rule of unanimity. It is obvious that if the principle of unanimity was accepted by the Hindus as a rule of decision in the Legislature and in the Executive there would be no such thing as a Communal Problem in India.

One may well ask the Hindu that if he is not prepared to concede constitutional safeguards to the minorities, is he prepared to agree to the rule of unanimity? Unfortunately he is not prepared to accept either.

About the rule of majority the Hindu is not prepared to admit any limitations. The majority he wants is an absolute majority. He will not be satisfied with relative majority. He should consider whether his insistence on absolute majority is a fair proposition, which political philosophers can accept. He is not aware that even the constitution of the United States does not lend support to the absolutistic rule of majority rule- on which the Hindu has been insisting upon.

Let me illustrate the point from the constitution of the United States. Take the clause embodying Fundamental Rights. What does that clause mean? It means that matters included in Fundamental Rights are of such supreme concern that a mere majority rule is not enough to interfere with them. Take another illustration also from

the Constitution of the United States. The Constitution says that no part of the Constitution shall be altered unless the proposition is carried by three-fourths majority and ratified by the States. What does this show? It shows that the United States Constitution recognizes for certain purposes mere majority rule is not competent.

All these cases are of course familiar to many a Hindu. The pity of it is, he does not read from them the correct lesson. If he did, he would realize that the rule of the majority rule is not as sacrosanct a principle as he thinks it is. The majority rule *is* not accepted as a principle but is tolerated as a rule. I *might* also state why it is tolerated. It is tolerated for two reasons; (1) because the majority is always a political majority and (2) because the decision of a political majority accepts and absorbs so much of the point of view of the minority that the minority does not care to rebel against the decision.

In India, the majority is *not* a political majority. In India the majority is born; it is not made. That is the difference between a communal majority and a political majority. A political majority is not a fixed or a permanent majority. It is a majority which is always made, unmade and remade. A communal majority is a permanent majority fixed in its attitude. One can destroy it, but one cannot transform it. If there is so much objection to a political majority, how very fatal must be the objection to a communal majority?

It may be open to the Hindus to ask Mr. Jinnah, why in 1930 when he formulated his fourteen points he insisted upon the principle of majority rule to such an extent that one of the fourteen points stipulated that in granting weightage, limits should be placed whereby a majority shall not be reduced to a minority or equality. It may be open to the Hindus to ask Mr. Jinnah, if he is in favour of a Muslim majority in Muslim Provinces, why he is opposed to a Hindu Majority in the Centre? The Hindu must however realize that -these posers may lead to the conclusion that Mr. Jinnah's position is inconsistent. They cannot lead to the affirmation of the principle of majority rule.

The abandonment of the principle of majority rule in politics cannot affect the Hindus very much in other walks of life. As an element in social life they will remain a majority. They will have the monopoly of trade and business which they enjoy. They will have the monopoly of the property which they have. My proposals do not ask the Hindus to accept the principle of unanimity. My proposals do not

ask the Hindus to abandon the principle of majority rule. All I am asking them is to be satisfied with a relative majority. Is it too much for them to concede this?

Without marking any such sacrifice the Hindu majority is not justified in representing to the outside world that the minorities are holding up India's Freedom. This false propaganda will not pay. For the minorities are doing nothing of the kind. They are prepared to accept freedom and the dangers in which they likely to be involved; provided they granted satisfactory safeguards. This gesture of the minorities is not to be treated as a matter for which Hindus need not be grateful. It may well be contrasted with what happened in Ireland. Mr. Redmond, the leader of the Irish Nationalists once told Carson, the leader of Ulster; "Consent to United Ireland, Ask for any safeguard and they shall be granted to you". He is reported to have turned round and said : "Damn your safeguards ; we don't want to be ruled by you". The minorities in India have not said that. They are ready to be satisfied with safeguards. I ask the Hindus Is this not worth a mass? I am sure it is.

XII CONCLUSION

These are some of the proposals I have had in mind for the solution of the Communal Problem. They do not commit the All-India Scheduled Castes Federation. They do not even commit me. In putting them forth, I am doing nothing more than exploring a new way. My emphasis is more on the principle, I have enunciated, than on the actual proposals. If the principles are accepted then I am sure the solution of the Communal Question will not be as baffling as it has been in the past.

The problem of solving the Indian deadlock is not easy. I remember reading a historian describing the condition of Germany before the Confederation of 1867 as one of 'Divinely Ordained Confusion'. Whether that was true of Germany or not, it seems to me that they form a very accurate description of the present conditions of India. Germany did get out of this confusion, if not at one stroke at least by successive stages until just before the war she became a unified people, unified in mind, unified in outlook and unified by belief in a common destiny. India has not so far succeeded in evolving order out of her confusion. It is not that she had no opportunities to do so. In fact, there have been quite a number. The first opportunity came in 1927, when Lord Birkenhead gave a challenge to Indians asking

them to produce a constitution for India. That challenge was taken up. A committee was formed to frame a constitution. A constitution was produced and was known as ' *The Nehru Constitution* '. It was, however, not accepted by Indians and was buried without remorse. A second opportunity presented itself to *Indians in 1930*, when they assembled at the Round Table Conference. There again, Indians failed to play their part and write out their own Constitution. A third attempt is the one recently made by the Sapru Committee. The proposals of this committee too have fallen flat.

There is neither enthusiasm nor optimism left to indulge in another attempt. One is pursued by a sense of fatality, which suggests that as every attempt is doomed to failure, none need be made. At the same time I feel that no Indian ought to be so down hearted or so callous as to let the deadlock stink, as though it was a dead dog, and say that he is prepared to do nothing more than be a mere witness to the political dog-fight that is going on in this country. The failures of the past need not daunt any body. They do not daunt me. For, I have a feeling that though it is true that all attempts to reach an agreement on the communal question have failed, the failure have been due not so much to any inherent fault of the Indians as they have been due to a wrong approach. I feel confident that my proposals, if considered dispassionately, should be found acceptable. They constitute a new approach and as such I commend them to my countrymen.

Before I conclude, I must, however, warn my critics that they may be able to amend my proposals in some respects; but it will not be easy to reject them. If they do reject them, the first thing they shall have to do is to controvert the principles on which they are based.

ESSAYS ON UNTOUCHABLES

AND UNTOUCHABILITY: RELIGIOUS

Contents

Chapter 1 : Away from the Hindus

Chapter 2 : Caste and conversion

Chapter 3 : Christianizing the untouchables

Chapter 4 : The condition of the convert

Religious

(One of the schemes of Dr. Ambedkar is, "The Conversion of the Untouchables". This scheme includes the following chapters:

- (1) Hinduism as a Missionary Religion.
- (2) Christianising the Untouchables.
- (3) The Condition of the Convert.
- (4) The Eternal Verity.
- (5) The Untouchables and Their Destiny. From these essays, Sr. Nos. 2 and 3 have been received from Shri S. S. Rege and Sr. No. I has been found in our papers under the title ' Caste and Conversion ', which was originally published in the 'Telagu Samachar Special No. of November 1926. One more typed essay entitled "Away from the Hindus", which also deals with religious conversion of the Untouchables, has been found and included in this Book. Rest of the titles mentioned in the above scheme have not been found.)

CHAPTER 1 AWAY FROM THE HINDUS

A large majority of Untouchables who have reached a capacity to think out their problem believe that one way to solve the problem of the Untouchables is for them to abandon Hinduism and be converted to some other religion. At a Conference of the Mahars held in Bombay on 31st May 1936 a resolution to this effect was unanimously passed. Although the Conference was a Conference of the Mahars¹, the resolution had the

support of a very large body of Untouchables throughout India. No resolution had created such a stir. The Hindu community was shaken to its foundation and curses imprecations and threats were uttered against the Untouchables who were behind this move.

Four principal objections have been urged by the opponents against the conversion of the Untouchables:

- (1) What can the Untouchables gain by conversion? Conversion can make no change in the status of the Untouchables.
- (2) All religions are true, all religions are good. To change religion is a futility.
- (3) The conversion of the Untouchables is political in its nature.
- (4) The conversion of the Untouchables is not genuine as it is not based on faith.

It cannot take much argument to demonstrate that the objections are puerile and inconsequential.

To take the last objection first. History abounds with cases where conversion has taken place without any religious motive. What was the

¹mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_1 The Conference was confined to Mahars because the intention was to test the intensity of feeling communitywise and to take soundings from each community.

The typed pages with Sr. Nos. from 279 to 342 have been found in this script which is titled as Chapter XX under the heading 'Away from the Hindus nature of its conversion of Clovis and his subjects to Christianity? How did Ethelbert and his Kentish subjects become Christians? Was there a religious motive which led them to accept the new religion? Speaking on the nature of conversions to Christianity that had taken place during the middle ages Rev. Reichel

says:mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_2

“One after another the nations of Europe are converted to the faith; their conversion is seen always to proceed from above, never from below. Clovis yields to the bishop Remigius and forthwith he is followed by the Baptism of 3,000 Franks. Ethelbert yields to the mission of Augustine and forthwith all Kent follows his example; when his son Eadbald apostatises, the men of Kent apostatise with him. Essex is finally won by the conversion of King Sigebert, who under the influence of another king, Oswy, allows himself to be baptised. Northumberland is temporarily gained by the conversion of its king, Edwin, but falls away as soon as Edwin is dead. It anew accepts the faith, when another king, Oswald,

promotes its diffusion. In the conversion of Germany, a bishop, Boniface, plays a prominent part, in close connection with the princes of the country, Charles Martel and Pepin; the latter, in return for his patronage receiving at Soissons the Church's sanction to a violent act of usurpation. Denmark is gained by the conversion of its kings, Herald Krag, Herald Blastand and Canute, Sweden by that of the two Olofs; and Russian, by the conversion of its sovereign, Vladimir. Everywhere Christianity addresses itself first to kings and princes; everywhere the bishops and abbots appear as its only representatives.

Nor was this all, for where a king had once been gained, no obstacle by the Mediaeval missionaries to the immediate indiscriminate baptism of his subjects. Three thousand warriors of Clovis following the example of their king, were at once admitted to the sacred rite; the subjects of Ethelbert were baptised in numbers after the conversion of their prince, without preparation, and with hardly any instruction. The Germans only were less hasty in following the example of others. In Russia, so great was the number of those who crowded to be baptised after the baptism of Vladimir, that the sacrament had to be administered to hundreds at a time."History records cases where conversion has taken place as a result of compulsion or deceit.

Today religion has become a piece of ancestral property. It passes from father to son so does inheritance. What genuineness is there in such cases of conversion? The conversion of the Untouchables if it did take place would take after full deliberation of the value of religion and the virtue of the different religions. How can such a conversion be said to be not a genuine conversion? On the other hand, it would be the first case in history of genuine conversion. It is therefore difficult to understand why the genuineness of the conversion of the Untouchables should be doubted by anybody.

The third objection is an ill-considered objection. What political gain will accrue to the Untouchables from their conversion has been defined by nobody. If there is a political gain, nobody has proved that it is a direct inducement to conversion.

The opponents of conversion do not even seem to know that a distinction has to be made between a gain being a direct inducement to conversion and its being only an incidental advantage. This distinction cannot be said to be a distinction without a difference. Conversion may result in a political gain to the Untouchables. It is only where a gain is a direct inducement that conversion could be condemned as immoral or criminal. Unless therefore the opponents of conversion prove that the

conversion desired by the Untouchables is for political gain and for nothing else their accusation is baseless. If political gain is only an incidental gain then there is nothing criminal in conversion. The fact, however, is that conversion can bring no new political gain to the Untouchables. Under the constitutional law of India every religious community has got the right to separate political safeguards. The Untouchables in their present condition enjoy political rights similar to those which are enjoyed by the Muslims and the Christians. If they change their faith the change is not to bring into existence political rights which did not exist before. If they do not change they will retain the political rights which they have. Political gain has no connection with conversion. The charge is a wild charge made without understanding.

The second objection rests on the premise that all religions teach the same thing. It is from the premise that a conclusion is drawn that since all religions teach the same thing there is no reason to prefer one religion to other. It may be conceded that all religions agree in holding that the meaning of life is to be found in the pursuit of 'good'. Up to this point the validity of the premise may be conceded. But when the premise goes beyond and asserts that because of this there is no reason to prefer one religion to another it becomes a false premise.

Religions may be alike in that they all teach that the meaning of life is to be found in the pursuit of 'good'. But religions are not alike in their answers to the question 'What is good?' In this they certainly differ. One religion holds that brotherhood is good, another caste and untouchability is good.

There is another respect in which all religions are not alike. Besides being an authority which defines what is good, religion is a motive force for the promotion and spread of the 'good'. Are all religions agreed in the means and methods they advocate for the promotion and spread of good? As pointed out by Prof. [Tielemk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25.Essay on Untouchables and Untouchability_Religious.htm - _msocom_3](http://Tielemk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25.Essay_on_Untouchables_and_Untouchability_Religious.htm_-_msocom_3), religion is:

“One of the mightiest motors in the history of mankind, which formed as well as tore asunder nations, united as well as divided empires, which sanctioned the most atrocious and barbarous deeds, the most libinous customs, inspired the most admirable acts of heroism, self renunciation, and devotion, which occasioned the most sanguinary wars, rebellions and persecutions, as well as brought about the freedom, happiness and peace of nations—at one time a partisan of tyranny, at another breaking its chains, now calling into existence and fostering a new and brilliant civilization, then the deadly foe to progress, science and art.”

Apart from these oscillations there are permanent differences in the methods of promoting good as they conceive it. Are there not religions which advocate violence? Are there not religions which advocate nonviolence? Given these facts how can it be said that all religions are the same and there is no reason to prefer one to the other.

In raising the second objection the Hindu is merely trying to avoid an examination of Hinduism on its merits. It is an extraordinary thing that in the controversy over conversion not a single Hindu has had the courage to challenge the Untouchables to say what is wrong with Hinduism. The Hindu is merely taking shelter under the attitude generated by the science of comparative religion. The science of comparative religion has broken down the arrogant claims of all revealed religions that they alone are true and all others which are not the results of revelation are false. That revelation was too arbitrary, too capricious test to be accepted for distinguishing a true religion from a false was undoubtedly a great service which the science of comparative religion has rendered to the cause of religion. But it must be said to the discredit of that science that it has created the general impression that all religions are good and there is no use and purpose in discriminating them.

The first objection is the only objection which is worthy of serious consideration. The objection proceeds on the assumption that religion is a purely personal matter between man and God. It is supernatural. It has nothing to do with social. The argument is no doubt sensible. But its foundations are quite false. At any rate, it is a one-sided view of religion and that too based on aspects of religion which are purely historical and not fundamental.

To understand the function and purposes of religion it is necessary to separate religion from theology. The primary things in religion are the usages, practices and observances, rites and rituals. Theology is secondary. Its object is merely to nationalize them. As stated by Prof. Robertson Smith :mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_4

“Ritual and practical usages were, strictly speaking the sum total of ancient religions. Religion in primitive times was not a system of belief with practical applications; it was a body of fixed traditional practices, to which every member of society conformed as a matter of course, Men would not be men if they agreed to do certain things without having a reason for their action; but in ancient religion the reason was not first formulated as a doctrine and then expressed in practice, but conversely, practice preceded doctrinal theory.”

Equally necessary it is not to think of religion as though it was supernatural. To overlook the fact that the primary content of religion is social is to make nonsense of religion. The Savage society was concerned with life and the preservation of life and it is these life processes which constitute the substance and source of the religion of the Savage society. So great was the concern of the Savage society for life and the preservation of life that it made them the basis of its religion. So central were the life processes in the religion of the Savage society that every thing which affected them became part of its religion. The ceremonies of the Savage society were not only concerned with the events of birth, attaining of manhood, puberty, marriage, sickness, death and war but they were also concerned with food.

Among the pastoral peoples the flocks and herds are sacred. Among agricultural peoples seedtime and harvest are marked by ceremonies performed with some reference to the growth and the preservation of the crops. Likewise drought, pestilence, and other strange irregular phenomena of nature occasion the performance of ceremonials. As pointed out by Prof. Crawley, the religion of the savage begins and ends with the affirmation and consecration of life.

In life and preservation of life therefore consists the religion of the savage. What is true of the religion of the savage is true of all religions wherever they are found for the simple reason that constitutes the essence of religion. It is true that in the present day society with its theological refinements this essence of religion has become hidden from view and is even forgotten. But that life and the preservation of life constitute the essence of religion even in the present day society is beyond question. This is well illustrated by Prof. Crawley, when speaking of the religious life of man in the present day society he says how:

"man's religion does not enter into his professional or social hours, his scientific or artistic moments; practically its chief claims are settled on one day in the week from which ordinary worldly concerns are excluded. In fact, his life is in two parts; but the moiety with which religion is concerned is the elemental. Serious thinking on ultimate questions of life and death is, roughly speaking, the essence of his Sabbath; add to this the habit of prayer, the giving of thanks at meals, and the subconscious feeling that birth and death, continuation and marriage are rightly solemnized by religion, while business and pleasure may possibly be consecrated, but only metaphorically or by an overflow of religious feeling." Students of the origin and history of religion when they began their study of the Savage society became so much absorbed in the magic, the tabu and totem and the rites and ceremonies connected therewith they found in the Savage society

that they not only overlooked the social processes of the savage as the primary content of religion but they failed even to appreciate the proper function of magic and other supernatural processes. This was a great mistake and has cost all concerned in religion very dearly. For it is responsible for the grave misconception about religion mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_5 which prevails today among most people. Nothing can be a greater error than to explain religion as having arisen in magic or being concerned only in magic for magic sake. It is true that Savage society practises magic, believes in tabu and worships the totem. But it is wrong to suppose that these constitute the religion or form the source of religion. To take such a view is to elevate what is incidental to the position of the principal. The principal thing in the religion of the savage are the elemental facts of human existence such as life, death, birth, marriage, etc., magic, tabu and totem are not the ends. They are only the means. The end is life and the preservation of life. Magic, tabu, etc. are resorted to by the Savage society not for their own sake but to conserve life and to exercise evil influence from doing harm to life. Why should such occasions as harvest and famine be accompanied by religious ceremonies? Why are magic, tabu and totem of such importance to the savage? The only answer is that they all affect the preservation of life. The process of life and its preservation form the main purpose. Life and preservation of life is the core and centre of the religion of the Savage society. That today God has taken the place of magic, does not alter the fact that God's place in religion is only as a means for the conservation of life and that the end of religion is the conservation and consecration of social life.

The point to which it is necessary to draw particular attention and to which the foregoing discussion lends full support is that it is an error to look upon religion as a matter which is individual, private and personal. Indeed as will be seen from what follows, religion becomes a source of positive mischief if not danger when it remains individual, private and personal. Equally mistaken is the view that religion is the flowering of special religious instinct inherent in the nature of the individual. The correct view is that religion like language is social for the reason that either is essential for social life and the individual has to have it because without it he cannot participate in the life of the society.

If religion is social in the sense that it primarily concerns society, it would be natural to ask what is the purpose and function of religion.

The best statement regarding the purpose of religion which I have come across is that of Prof. Charles A

Ellwoodmk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_6. According to him:

“religion projects the essential values of human personality and of human society into the universe as a whole. It inevitably arises as soon as man tries to take valuing attitude toward his universe, no matter how small and mean that universe may appear to him. Like all the distinctive things in human, social and mental life, it of course, rests upon the higher intellectual powers of man. Man is the only religious animal, because through his powers of abstract thought and reasoning, he alone is self-conscious in the full sense of that term. Hence he alone is able to project his values into the universe and finds necessity of so doing. Given, in other words, the intellectual powers of man, the mind at once seeks to universalise its values as well as its ideas. Just as rationalizing processes give man a world of universal ideas, so religious processes give man a world of universal values. The religious processes are, indeed, nothing but the rationalizing processes at work upon man's impulses and emotions rather than upon his precepts. What the reason does for ideas, religion does, then, for the feelings. It universalizes them; and in universalizing them, it brings them into harmony with the whole of reality.”

Religion emphasizes, universalizes social values and brings them to the mind of the individual who is required to recognize them in all his acts in order that he may function as an approved member of the society. But the purpose of religion is more than this. It spiritualizes them. As pointed out by Prof. Ellwood :mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_7

"Now these mental and social values, with which religion deals, men call 'spiritual'. It is something which emphasizes as we may say, spiritual values, that is, the values connected especially with the personal and social life. It projects these values, as we have seen, into the universal reality. It gives man a social and moral conception of the universe, rather than a merely mechanical one as a theatre of the play of blind, purposeless forces. While religion is not primarily animistic philosophy, as has often been said, nevertheless it does project mind, spirit, life, into all things. Even the most primitive religion did this; for in 'primitive dynamism' there was a feeling of the psychic, in such concepts as *mana* or *manitou*. They were closely connected with persons and proceeded from person, or things which were viewed in an essentially personal way. Religion, therefore, is a belief in the reality of spiritual values, and projects them, as we have said, into the whole universe. All religion—even so-called atheistic religions—emphasizes the spiritual, believes in its dominance, and looks to its ultimate triumph.”The

function of religion in society is equally clear. According to Prof. Ellwood¹ the function of religion: "is to act as an agency of social control, that is, of the group

controlling the life of the individual, for what is believed to be the good of the larger life of the group. Very early, as we have seen, any beliefs and practices which gave expression to personal feelings or values of which the group did not approve were branded as 'black magic' or baleful superstitions; and if this had not been done it is evident that the unity of the life of the group might have become seriously impaired. Thus the almost necessarily social character of religion stands revealed. We cannot have such a thing as purely personal or individual religion which is not at the same time social. For we live a social life and the welfare of the group is, after all, the chief matter of concern." Dealing with the same question in another place, he says

"the function of religion is the same as the function of Law and Government. It is a means by which society exercises its control over the conduct of the individual in order to maintain the social order. It may not be used consciously as a method of social control over the individual. Nonetheless the fact is that religion acts as a means of social control. As compared to religion, Government and Law are relatively inadequate means of social control. The control through law and order does not go deep enough to secure the stability of the social order. The religious sanction, on account of its being supernatural has been on the other hand the most effective means of social control, far more effective than law and Government have been or can be. Without the support of religion, law and Government are bound to remain a very inadequate means of social control. Religion is the most powerful force of social gravitation without which it would be impossible to hold the social order in its orbit."

The foregoing discussion, although it was undertaken to show that religion is a social fact, that religion has a specific social purpose and a definite social function it was intended to prove that it was only proper that a person if he was required to accept a religion should have the right to ask how well it has served the purposes which belong to religion. This is the reason why Lord Balfour was justified in putting some very straight-questions to the positivists before he could accept Positivism to be superior to Christianity. He asked in quite trenchant language.

"what has (positivism) to say to the more obscure multitude who are absorbed, and well nigh overwhelmed, in the constant struggle with daily

needs and narrow cares; who have but little leisure or inclination to consider the precise role they are called on to play in the great drama of 'humanity' and who might in any case be puzzled to discover its interest or its importance? Can it assure them that there is no human being so insignificant as not to be of infinite worth in the eyes of Him who created the Heavens, or so feeble but that his action may have consequences of infinite moment long after this material system shall have crumbled into nothingness? Does it offer consolation to those who are bereaved, strength to the weak, forgiveness to the sinful, rest to those who are weary and heavy laden?"

The Untouchables can very well ask the protagonists of Hinduism the very questions which Lord Balfour asked the Positivists. Nay the Untouchables can ask many more. They can ask: Does Hinduism recognize their worth as human beings? Does it stand for their equality? Does it extend to them the benefit of liberty? Does it at least help to forge the bond of fraternity between them and the Hindus? Does it teach the Hindus that the Untouchables are their kindred? Does it say to the Hindus it is a sin to treat the Untouchables as being neither man nor beast? Does it tell the Hindus to be righteous to the Untouchables? Does it preach to the Hindus to be just and humane to them? Does it inculcate upon the Hindus the virtue of being friendly to them? Does it tell the Hindus to love them, to respect them and to do them no wrong. In fine, does Hinduism universalize the value of life without distinction?

No Hindu can dare to give an affirmative answer to any of these questions? On the contrary the wrongs to which the Untouchables are subjected by the Hindus are acts which are sanctioned by the Hindu religion. They are done in the name of Hinduism and are justified in the name of Hinduism. The spirit and tradition which makes lawful the lawlessness of the Hindus towards the Untouchables is founded and supported by the teachings of Hinduism. How can the Hindus ask the Untouchables accept Hinduism and stay in Hinduism? Why should the Untouchables adhere to Hinduism which is solely responsible for their degradation? How can the Untouchables stay in Hinduism? Untouchability is the lowest depth to which the degradation of a human being can be carried. To be poor is bad but not so bad as to be an Untouchable. The poor can be proud. The Untouchable cannot be. To be reckoned low is bad but it is not so bad as to be an Untouchable. The low can rise above his status. An Untouchable cannot. To be suffering is bad but not so bad as to be an Untouchable. They shall some day be comforted. An Untouchable cannot hope for this. To have to be meek is bad but it is not so bad as to

be an Untouchable. The meek if they do not inherit the earth may at least be strong. The Untouchables cannot hope for that.

In Hinduism there is no hope for the Untouchables. But this is not the only reason why the Untouchables wish to quit Hinduism. There is another reason which makes it imperative for them to quit Hinduism. Untouchability is a part of Hinduism. Even those who for the sake of posing as enlightened reformers deny that untouchability is part of Hinduism are to observe untouchability. For a Hindu to believe in Hinduism does not matter. It enhances his sense of superiority by the reason of this consciousness that there are millions of Untouchables below him. But what does it mean for an Untouchable to say that he believes in Hinduism? It means that he accepts that he is an Untouchable and that he is an Untouchable is the result of Divine dispensation. For Hinduism is divine dispensation. An Untouchable may not cut the throat of a Hindu. But he cannot be expected to give an admission that he is an Untouchable and rightly so. Which Untouchable is there with soul so dead as to give such an admission by adhering to Hinduism. That Hinduism is inconsistent with the self-respect and honour of the Untouchables is the strongest ground which justifies the conversion of the Untouchables to another and nobler faith.

The opponents of conversion are determined not to be satisfied even if the logic of conversion was irrefutable. They will insist upon asking further questions. There is one question which they are always eager to ask largely because they think it is formidable and unanswerable; what will the Untouchables gain materially by changing their faith? The question is not at all formidable. It is simple to answer. It is not the intention of the Untouchables to make conversion an opportunity for economic gain. The Untouchables it is true will not gain wealth by conversion. This is however no loss because while they remain as Hindus they are doomed to be poor. Politically the Untouchables will lose the political rights that are given to the Untouchables. This is, however, no real loss. Because they will be entitled to the benefit of the political rights reserved for the community which they would join through conversion. Politically there is neither gain nor loss. Socially, the Untouchables will gain absolutely and immensely because by conversion the Untouchables will be members of a community whose religion has universalized and equalized all values of life. Such a blessing is unthinkable for them while they are in the Hindu fold.

The answer is complete. But by reason of its brevity it is not likely to give satisfaction to the opponents of conversion. The Untouchables need three things. First thing they need is to end their social isolation. The second

thing they need is to end their inferiority complex. Will conversion meet their needs? The opponents of conversion have a feeling that the supporters of conversion have no case. That is why they keep on raising questions. The case in favour of conversion is stronger than the strongest case. Only one does wish to spend long arguments to prove what is so obvious. But since it is necessary to put an end to all doubt, I am prepared to pursue the matter. Let me take each point separately.

How can they end their social isolation? The one and the only way to end their social isolation is for the Untouchables to establish kinship with and get themselves incorporated into another community which is free from the spirit of caste. The answer is quite simple and yet not many will readily accept its validity. The reason is, very few people realize the value and significance of kinship. Nevertheless its value and significance are very great. Kinship and what it implies has been

described by Prof. Robertson Smith in the following terms mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_10:

"A kin was a group of persons whose lives were so bound up together, in what must be called a physical unity, that they could be treated as parts of one common life. The members of one kindred looked on themselves as one living whole, a single animated mass of blood, flesh and bones, of which no member could be touched without all the members suffering."

The matter can be looked at from the point of view both of the individual as well as from that of the group. From the point of the group, kinship calls for a feeling that one is first and foremost a member of the group and not merely an individual. From the point of view of the individual, the advantages of his kinship with the group are no less and no different than those which accrue to a member of the family by reason of his membership of the family. Family life is characterized by parental tenderness. As pointed out by Prof. McDougall mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_11:

"From this emotion (parental tenderness) and its impulse to cherish and protect, spring generosity, gratitude, love, pity, true benevolence, and altruistic conduct of every kind; in it they have their main and absolutely essential root, without which they would not be."

Community as distinguished from society is only an enlarged family. As such it is characterised by all the virtues which are found in a family and which have been so well described by Prof. McDougall.

Inside the community there is no discrimination among those who are

recognized as kindred bound by kinship. The community recognizes that every one within it is entitled to all the rights equally with others. As Professors Dewey and Tufts have pointed out:

“A State may allow a citizen of another country to own land, to sue in its courts, and will usually give him a certain amount of protection, but the first-named rights are apt to be limited, and it is only a few years since Chief Justice Taney's dictum stated the existing legal theory of the United States to be that the Negro 'had no rights which the white man was bound to respect'. Even where legal theory does not recognize race or other distinctions, it is often hard in practice for an alien to get justice. In primitive clan or family groups this principle is in full force. Justice is a privilege which falls to a man as belonging to some group—not otherwise. The member of the clan or the household or the village community has a claim, but the Stranger has nothing standing. It may be treated kindly, as a guest, but he cannot demand 'justice' at the hands of any group but his own. In this conception of rights within the group we have the prototype of modern civil law. The dealing of clan with clan is a matter of war or negotiation, not of law; and the clanless man is an 'outlaw' in fact as well as in name.”

Kinship makes the community take responsibility for vindicating the wrong done to a member. Blood-flood which objectively appears to be a savage method of avenging a wrong done to a member is subjectively speaking a manifestation of sympathetic resentment by the members of the community for a wrong done to their fellow. This sympathetic resentment is a compound of tender emotion and anger such as those which issue out of parental tenderness when it comes face to face with a wrong done to a child. It is kinship which generates, this sympathetic resentment, this compound of tender emotion and anger. This is by no means a small value to an individual. In the words of Prof. McDougall:

"This intimate alliance between tender emotion and anger is of great importance for the social life of man, and the right understanding of it is fundamental for a true theory of the moral sentiments; for the anger evoked in this way is the germ of all moral indignation and on moral indignation justice and the greater part of public law are in the main founded."

It is kinship which generates generosity and invokes its moral indignation which is necessary to redress a wrong. Kinship is the will to enlist the support of the kindred community to meet the tyrannies and oppressions by the Hindus which today the Untouchables have to bear single-handed and alone. Kinship with another community is the best insurance which

the Untouchable can effect against Hindu tyranny and Hindu oppression.

Anyone who takes into account the foregoing exposition of what kinship means and does, should have no difficulty in accepting the proposition that to end their isolation the Untouchables must join another community which does not recognise caste.

Kinship is the antithesis of isolation. For the Untouchables to establish kinship with another community is merely another name for ending their present state of isolation. Their isolation will never end so long as they remain Hindus. As Hindus, their isolation hits them from front as well as from behind. Notwithstanding their being Hindus, they are isolated from the Muslims and the Christians because as Hindus they are aliens to all—Hindus as well as Non-Hindus. This isolation can end only in one way and in no other way. That way is for the Untouchables to join some non-Hindu community and thereby become its kith and kin.

That this is not a meaningless move will be admitted by all those who know the disadvantages of isolation and the advantages of kinship. What are the consequences of isolation? Isolation means social segregation, social humiliation, social discrimination and social injustice. Isolation means denial of protection, denial of justice, denial of opportunity. Isolation means want of sympathy, want of fellowship and want of consideration. Nay, isolation means positive hatred and antipathy from the Hindus. By having kinship with other community on the other hand, the Untouchables will have within that community equal position, equal protection and equal justice, will be able to draw upon its sympathy, its good-will.

This I venture to say is a complete answer to the question raised by the opponents. It shows what the Untouchables can gain by conversion. It is however desirable to carry the matter further and dispose of another question which has not been raised so far by the opponents of conversion but may be raised. The question is: why is conversion necessary to establish kinship?

The answer to this question will reveal itself if it is borne in mind that there is a difference between a community and a society and between kinship and citizenship.

A community in the strict sense of the word is a body of kindred. A society is a collection of many communities or of different bodies of kindreds. The bond which holds a community together is called kinship while the bond which holds a society together is called citizenship.

The means of acquiring citizenship in a society are quite different from the means of acquiring kinship in a community. Citizenship is acquired by what is called naturalization. The condition precedent for citizenship is the

acceptance of political allegiance to the State. The conditions precedent for acquiring kinship are quite different. At one stage in evolution of man the condition precedent for adoption into the kindred was unity of blood. For the kindred is a body of persons who conceive themselves as spring from one ancestor and as having in their veins one blood. It does not matter whether each group has actually and in fact spring from a single ancestor. As a matter of fact, a group did admit a stranger into the kindred though he did not spring from the same ancestor. It is interesting to note that there was a rule that if a stranger intermarried with a group for seven generations, he became a member of the kindred. The point is that, fiction though it be, admission into the kindred required as a condition precedent unity of blood.

At a later stage of Man's Evolution, common religion in place of unity of blood became a condition precedent to kinship. In this connection it is necessary to bear in mind the important fact pointed out by Prof. Robertson Smith mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_12 that in a community the social body is made not of men only, but of gods and men and therefore any stranger who wants to enter a community and forge the bond of kinship can do so only by accepting the God or Gods of the community. The Statement in the Old Testament such as those of Naomi to Ruth saying: "Thy sister is gone back into her people and unto her gods" and Ruth's reply "Thy people shall be my people, and thy God my God" or the calling of the Moabites the sons and daughters of Chemosh are all evidences which show that the bond of kinship in a community is the consequence of their allegiance to a common religion. Without common religion there can be no kinship.

Where people are waiting to find faults in the argument in favour of conversion it is better to leave no ground for fault-finders to create doubt or misunderstanding. It might therefore be well to explain how and in what manner religion is able to forge the bond of kinship. The answer is simple. It does it through eating and drinking together. mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_13 The Hindus in defending their caste system ridicule the plea for inter-dining. They ask: What is there in inter-dining? The answer from a sociological point of view is that is everything in it. Kinship is a social covenant of brotherhood. Like all covenants it required to be signed, sealed and delivered before it can become binding. The mode of signing, sealing and delivery is the mode prescribed by religion and that mode is the participation in a sacrificial meal. As said by

Prof. Smithmk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and Untouchability_Religious.htm - _msocom_14:

“What is the ultimate nature of the fellowship which is constituted or declared when men eat and drink together? In our complicated society fellowship has many types and many degrees; men may be united by bonds of duty and honour for certain purposes, and stand quite apart in all other things. Even in ancient times—for example, in the Old Testament—we find the sacrament of a common meal introduced to seal engagements of various kinds. But in every case the engagement is absolute and inviolable; it constitutes what in the language of ethics is called a duty of perfect obligation. Now in the most primitive society there is only one kind of fellowship which is absolute and inviolable. To the primitive man all other men fall under two classes, those to whom his life is sacred and those to whom it is not sacred. The former are his fellows; the latter are strangers and potential foemen, with whom it is absurd to think of forming any inviolable tie unless they are first brought into the circle within which each man's life is sacred to all his comrades.”If for the Untouchables mere citizenship is not enough to put an end to their isolation and the troubles which ensue therefrom, if kinship is the only cure then there is no other way except to embrace the religion of the community whose kinship they seek.

The argument so far advanced was directed to show how conversion can end the problem of the isolation of the Untouchables. There remain two other questions to be considered. One is, will conversion remove their inferiority complex? One cannot of course dogmatize. But one can have no hesitation in answering the question in the affirmative. The inferiority complex of the Untouchables is the result of their isolation, discrimination and the unfriendliness of the social environment. It is these which have created a feeling of helplessness which are responsible for the inferiority complex which cost him the power of self-assertion.

Can religion alter this psychology of the Untouchables? The psychologists are of opinion that religion can effect this cure provided it is a religion of the right type; provided that the religion approaches the individual not as a degraded worthless outcastes but as a fellow human being; provided religion gives him an atmosphere in which he will find that there are possibilities for feeling himself the equal of every other human being there is no reason why conversion to such a religion by the Untouchables should not remove their age-long pessimism which is responsible for their inferiority complex. As pointed out by Prof. Ellwood

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/25. Essay on Untouchables and

[Untouchability_Religious.htm - _msocom_15](#)

"Religion is primarily a valuing attitude, universalizing the will and the emotions, rather than the ideas of man. It thus harmonizes men, on the side of will and emotion, with his world. Hence, it is the foe of pessimism and despair. It encourages hope, and gives confidence in the battle of life, to the savage as well as to the civilized man. It does so, as we have said, because it braces vital feeling; and psychologists tell us that the reason why it braces vital feeling is because it is an adaptive process in which all of the lower centres of life are brought to reinforce the higher centres. The universalization of values means, in other words, in psycho-physical terms, that the lower nerve centres pour their energies into the higher nerve centres, thus harmonizing and bringing to a maximum of vital efficiency life on its inner side. It is thus that religion taps new levels of energy, for meeting the crisis of life, while at the same time it brings about a deeper harmony between the inner and the outer."

Will conversion raise the general social status of the Untouchables? It is difficult to see how there can be two opinions on this question. The oft-quoted answer given by Shakespeare to the question what is in a name hardly shows sufficient understanding of the problem of a name. A rose called by another name would smell as sweet would be true if names served no purpose and if people instead of depending upon names took the trouble of examining each case and formed their opinions and attitudes about it on the basis of their examination. Unfortunately, names serve a very important purpose. They play a great part in social economy. Names are symbols. Each name represents association of certain ideas and notions about a certain object. It is a label. From the label people know what it is. It saves them the trouble of examining each case individually and determine for themselves whether the ideas and notions commonly associated with the object are true. People in society have to deal with so many objects that it would be impossible for them to examine each case. They must go by the name that is why all advertisers are keen in finding a good name. If the name is not attractive the article does not go down with the people.

The name 'Untouchable' is a bad name. It repels, forbids, and stinks. The social attitude of the Hindu towards the Untouchable is determined by the very name 'Untouchable'. There is a fixed attitude towards 'Untouchables' which is determined by the stink which is imbedded in the name 'Untouchable'. People have no mind to go into the individual merits of each Untouchable no matter how meritorious he is. All untouchables realize this. There is a general attempt to call themselves by some name

other than the 'Untouchables'. The Chamars call themselves Ravidas or Jatavas. The Doms call themselves Shilpakars. The Pariahs call themselves Adi-Dravidas, the Madigas call themselves Arundhatyas, the Mahars call themselves Chokhamela or Somavamshi and the Bhangis call themselves Balmikis. All of them if away from their localities would call themselves Christians.

The Untouchables know that if they call themselves Untouchables they will at once draw the Hindu out and expose themselves to his wrath and his prejudice. That is why they give themselves other names which may be likened to the process of undergoing protective discolouration.

It is not seldom that this discolouration completely fails to serve its purpose. For to be a Hindu is for Hindus not an ultimate social category. The ultimate social category is caste, nay sub-caste if there is a sub-caste. When the Hindus meet 'May I know who are you' is a question sure to be asked. To this question 'I am a Hindu' will not be a satisfactory answer. It will certainly not be accepted as a final answer. The inquiry is bound to be further pursued. The answer

'Hindu' is bound to be followed by another; 'What caste?'. The answer to that is bound to be followed by question: "What subcaste?" It is only when the questioner reaches the ultimate social category which is either caste or sub-caste that he will stop his questionings.

The Untouchable who adopts the new name is a protective discolouration finds that the new name does not help and that in the course of relentless questionings he is, so to say, run down to earth and made to disclose that he is an Untouchable. The concealment makes him the victim of greater anger than his original voluntary disclosure would have done.

From this discussion two things are clear. One is that the low status of the Untouchables is bound upon with a stinking name. Unless the name is changed there is no possibility of a rise in their social status. The other is that a change of name within Hinduism will not do. The Hindu will not fail to penetrate through such a name and make the Untouchable and confer himself as an Untouchable. The name matters and matters a great deal. For, the name can make a revolution in the status of the Untouchables. But the name must be the name of a community outside Hinduism and beyond its power of spoliation and degradation. Such name can be the property of the Untouchable only if they undergo religious conversion. A conversion by change of name within Hinduism is a clandestine conversion which can be of no avail.

This discussion on conversion may appear to be somewhat airy. It is bound to be so. It cannot become material unless it is known which

religion the Untouchables choose to accept. For what particular advantage would flow from conversion would depend upon the religion selected and the social position of the followers of that religion. One religion may give them all the three benefits, another only two and a third may result in conferring upon them only one of the advantages of conversion. What religion the Untouchables should choose is not the subject matter of this Chapter. The subject matter of this Chapter is whether conversion can solve the problem of untouchability. The answer to that question is emphatically in the affirmative.

The force of the argument, of course, rests on a view of religion which is somewhat different from the ordinary view according to which religion is concerned with man's relation to God and all that it means. According to this view religion exists not for the saving of souls but for the preservation of society and the welfare of the individual. It is only those who accept the former view of religion that find it difficult to understand how conversion can solve the problem of untouchability. Those who accept the view of religion adopted in this Chapter will have no difficulty in accepting the soundness of the conclusion.

CHAPTER 2

CASTE AND CONVERSION'

The instinct of self-preservation is responsible for the present upheaval in the Hindu Community. There was a time when the elite of the society had no fear about its preservation. Their argument was that the Hindu community was one of the oldest communities that has withstood the onslaught of many adverse forces and therefore there must be some native strength and stamina in its culture and civilization as to make it survive. They were therefore firm in their belief that their community was destined ever to survive. Recent events seem to have shaken this belief. In the Hindu-Muslim riots that have taken place all over the country in recent times it has been found that a small band of Muslims can beat the Hindus and beat them badly. The elite of the Hindus are therefore reflecting afresh upon the question whether such a kind of survival in the struggle for existence is of any value. The proud Hindu who always harped upon the fact of survival as a proof of his fitness to survive never stopped to think that survival was of many types and not all are of equal value. One can survive by marching against the enemy and conquering him. Or one can survive by beating a retreat and hiding oneself in a position of safety. In

either case there would be survival. But certainly the value of the two survivals is measures apart. What is important is not the fact of survival but the plane of survival? Survive the Hindus may, but whether as free men or slaves is the issue. But the matter seems so hopeless that granting that they manage to survive as slaves it does not seem to be altogether certain that they can survive as *Hindus*. For they are not only beaten by the Muslims in the *physical struggle* but they seem also to be beaten in the *cultural struggle*. There is in recent days a regular campaign conducted vigorously by the Muslims for the spread of Islamic culture, and by their conversion movement, it is alleged, they have made vast additions to their numerical strength by winning over members of the Hindu faith. Fortunately for the Muslims there is a large mass of non-descript population numbering about seven crores which is classed as Hindus but which has no particular affinity to the 'Originally published in the 'Telugu Samachar Special Number', Nov. 1926.

Hindu faith and whose position is made so intolerable by that faith that they can be easily induced to embrace Islam. Some of these are going over to Islam and yet more may go.

This is sufficient to cause alarm among the elite of the Hindus. If with a superiority of numbers the Hindus are unable to face the Muslims what would be their fate if their following was depleted by conversions to Islam? The Hindus feel that they must save their people from being lost to them and their culture. Herein lies the origin of the *Shudhi Movement* or the movement to reclaim people to the Hindu faith.

Some people of the orthodox type are opposed to this movement on the ground that Hindu religion was never a proselytising religion and that Hindu must be so by birth. There is something to be said in favour of this view. From the commencement of time to which memory or tradition can reach back, proselytism has never been the practising creed of the Hindu faith. Prof. Max Muller, the great German Savant and Oriental Scholar in an address delivered by him in the name of the Westminster Abbey on the 3rd of December 1873 Day of Intercession for Missions, emphatically declared that the Hindu Religion was a non-missionary religion. The orthodoxy which refuses to believe in expediency may therefore feel well grounded in its opposition to Shudhi, as a practice directly opposed to the most fundamental tenets of the Hindu faith. But there are other authorities of equally good repute to support the promoters of the Shudhi movement, for it is their opinion that the Hindu Religion has been and can be a missionary religion. Prof. Jolly in an article '*DIE AUSBREITUNG DER INDISCHEN FULTUR*', gives a graphic description of the means and

methods adopted by the ancient Hindu Rulers and Priests to spread the Hindu Religion among the aborigines of the country. The late Sir Alfred Lyall who wrote in reply to Prof. Max Muller also sought to prove that the Hindu religion was a missionary religion. The probability of the case seems to be .definitely in favour of Jolly and Lyall. For unless we suppose that the Hindu Religion did in some degree do the work of proselytization, it is not possible to account for its spread over a vast continent and inhabited by diverse races which were in possession of a distinct culture of their own. Besides, the prevalence of certain *YAJNAS* and *YAGA S* cannot be explained except on the hypothesis that there were ceremonies for the Shudhi of the Vratya. We may therefore safely conclude that in ancient times the Hindu religion was a missionary religion. But that owing to some reason it ceased to be so long back in its historical course.

The question that I wish to consider is why did the Hindu religion cease to be a missionary religion. There may be various explanations for this, and I propose to offer my own explanation for what it is worth Aristotle has said that man is a social being. Whatever be the cogency of the reasons of Aristotle in support of his statement this much is true that it is impossible for any one to begin life as an individualist in the sense of radically separating himself from his social fellows. The social bond is established and rooted in the very growth of self-consciousness. Each individual's apprehension of his own personal self and its interest involves the recognition of others and their interests; and his pursuit of one type of purposes, generous or selfish, is in so far the pursuit of the other also. The social relation is in all cases intrinsic to the life, interests, and purposes of the individual; he feels and apprehends the vitality of social relations in all the situations of his life. In short, life without society is no more possible for him than it is for a fish out of water.

Given this fact it follows that before a society can make converts, it must see to it that its constitution provides for aliens being made its members and allowed to participate in its social life. It must be used to make no difference between individuals born in it and individuals brought into it. It must be open to receive him in the one case as in the other and allow him to enter into its life and thus make it possible for him to live and thrive as a member of that society. If there is no such provision on conversion of an alien the question would at once arise where to place the convert. If there is no place for the convert there can be no invitation for conversion nor can there be an acceptance of it.

Is there any place in the Hindu society for a convert to the Hindu faith? Now the organisation of the Hindu society is characterized by the existence

of castes. Each caste is endogamous and lives by antogony. In other words it only allows individuals born in it to its membership and does not allow any one from outside being brought into it. The Hindu Society being a federation of castes and each caste being self-enclosed there is no place for the convert for no caste will admit him. The answer to the question why the Hindu Religion ceased to be a missionary religion is to be found in the fact that it developed the caste system. Caste is incompatible with conversion. So long as mass conversion was possible, the Hindu Society could convert for the converts were large enough to form a new caste which could provide the elements of a social life from among themselves. But when mass conversions were no more and only individual converts could be had, the Hindu Religion had necessarily to cease to be missionary for its social organisation could make no room for the incoming convert.

I have not propounded this question as to why the Hindu Religion ceased to be missionary simply to find an opportunity for obtaining credit for originality of thought by offering a novel explanation. I have propounded the question and given an answer to it because I feel that both have a very important bearing upon the Shudhi movement. Much as I sympathise with the promoters of that movement, I must say that they have not analysed the difficulties in the way of the success of their movement. The motive behind the Shudhi movement is to increase the strength of the Hindu Society by increasing its numbers. Now a society is strong not because its numbers are great but because it is solid in its mass. Instances are not wanting where a solid organised band of fanatics have routed a large army of disorganised crusaders. Even in the Hindu-Muslim riots it has been proved that the Hindus are beaten not only where they are weak in numbers, but they are beaten by the Muslims even where the Hindus preponderate. The case of Moplahs is in point. This alone ought to show that the Hindus suffer not from want of numbers but from want of solidarity. To increase solidarity of the Hindu Society one must tackle the forces which have brought about its disintegration. My fear is that mere Shudhi, instead of integrating the Hindu Society, will cause greater disintegration and will annoy the Muslim Community without any gain to the Hindus. In a society composed of castes, Shudhi brings in a person who can find no home and who is therefore bound to lead an isolated and separate existence with no attachment or loyalty to any one in particular. Even if Shudhi were to bring into the Hindu fold a mass like the Malkana catch of Shradhanand, it will only add one more caste to the existing number. Now the greater the castes the greater the isolation and the greater the weakness of the Hindu society. If the Hindu society desires to survive it

must think not of adding to its numbers but increasing its solidarity and that means the abolition of caste. The abolition of castes is the real Sanghatan of the Hindus and when Sanghatan is achieved by the abolishing of castes, Shudhi will be unnecessary and if practised, will be gainful of real strength. With the castes in existence, it is impossible and if practised would be harmful to the real Sanghatan and solidarity of the Hindus. But somehow the most revolutionary and ardent reformer of the Hindu society shies at the idea of abolition of the caste and advocates such puerile measures as the reconversion of the converted Hindu, the changing of the diet and the starting of Akhadas. Some day it will dawn upon the Hindus that they cannot save their society and also preserve their caste. It is to be hoped that that day is not far off.

CHAPTER 3

CHRISTIANIZING THE UNTOUCHABLES

1. Growth of Christianity in India. II. Time and money spent in Missionary effort. III. Reasons for slow growth.

How old is Christianity in India? What progress has it made among the people of India? These are questions which no one who is interested in the Untouchables can fail to ask. The two questions are so intimately connected that the endeavour for the spread of Christianity would be hopeless if there were not in India that vast body of untouchables who, by their peculiar circumstances, are most ready to respond to the social message of Christianity.

The following figures will give some idea of the population of Indian Christians as compared with other communities in India according to the Census of 1931.

INDIA AND BURMA

Population by Religion	1891 Census	1921 Census	1931 Census	Increase# Decrease
Hindu		216,734,586	239,195,140	#10.4

Muslims		68,735,233	77,677,545	#13
Buddhist		11,571,268	12,786,806	#10.5
Sikh		3,238,803	4,335,771	#33.9
Primitive Religions		9,774,611	8,280,347	—15.3
Christian		4,754,064	6,296,763	#32.5
Jain		1,178,596	1,252,105	# 6.2
Zoroastrian		101,778	109,752	# 7.8
Jews		21,778	24,141	#10.9
Unreturned		18,004	2,860,187
Total		316,128,72 ¹	352.818,557	#10.6

It is true that during the 1921 and 1931 Christianity has shown a great increase. From the point of growth Sikhism takes the first place. Christianity comes second and Islam another proselytizing religion comes third. The difference between the first and the second is so small that the second place occupied by Christianity may be taken to be as good as first. Again the difference between the second and the third place occupied by Islam is so enormous that Christians may well be proud of their having greatly outdistanced so serious a rival.

With all this the fact remains that this figure of 6,296,763 is out of a total of 352,818,557. This means that the Christian population in India is about 1.7 p.c. of the total.

II

In how many years and after what expenditure? As to expenditure it is not possible to give any accurate figures. Mr. George Smith in his book on "The Conversion of India" published in 1893 gives statistics which serve to give some idea of the resources spent by Christian Nations for Missionary work in heathen countries. This is what he says:

"We do not take into account their efforts, vigorous and necessary, especially in the lands of Asia and North Africa occupied by the Eastern Churches for whom Americans do much, nor any labours for Christians by Christians of a purer faith and life. Leaving out of account also the many wives of missionaries who are represented statistically in their husbands, Rev. J. Vahl, President of the Danish Missionary Society, gives us these results. We accept them as the most accurately compiled, and as almost too

cautiously estimated where estimate is unavoidable. In Turkey and Egypt only work among the Musalmans is reckoned.

	1890	1891
Income (English Money)	£2,412,938	£2,749,340
Missionaries	4,652	5,094
Missionaries unmarried ladies	2,118	2,445
Native Ministers	3,424	3,730
Other Native helpers	36,405	
40,438		
Communicants	966,856	1,168,560

We abstain from estimating in detail the results for 1892, as they are about to appear, and still less for the year 1893, but experts can do this for themselves. This only we would say, that the number of native communicants added in those two years has been very large, especially in India. Allowing for that, we should place them now at 1,300,000 which gives a native Christian community of 5,200,000 gathered out of all non-Catholic lands.

Dean Vahl's statistics are drawn from the reports of 304 mission societies and agencies in 1891, beginning with Cromwell's New England Company, for America, in 1649. On the following page the details are summarised from seventeen lands of Reformed Christendom. The amount raised in 1891 by the 160 Mission Churches and Societies of the British Empire was £ 1,659,830 and by the 57 of the United States of America £ 786,992. Together the two great English speaking peoples spent £ 2,446,822 on the evangelisation of the non-Christian world. The balance 302,518 was contributed by Germany and Switzerland, Netherlands, Denmark, France, Norway, Sweden, Finland and in Asia."It is not possible to give any idea of the resources now utilized in the cause because they are not published. But we have sufficient data to know how many years it has taken to produce these 6 millions of converts.

Of the first missionary to India who came and sowed there the seed of Christianity there is no record. It is believed that Christianity in India is of apostolic origin and it is suggested that the apostle Thomas was the founder of it. The apostolic origin of Christianity is only a legend notwithstanding the existence of what is called St. Thomas's Mount near Madras which is said to be the burial place of the Apostle. There is no credible evidence to show that the Gospel was even preached in India during the first Century. There is some evidence to show that in the second

century the Gospel had reached the ears of the dwellers on the Southern Indian Coast, among the pearl fishers of Ceylon and the cultivators on the coasts of Malabar and Coromandel. This news when brought back by the Egyptian Mariners spread among the Christians of Alexandria. Alexandria was the First to send a Christian Missionary to India, whose name is recorded in history. He was Pantoenus, a Greek stoic who had become a Christian and was appointed by Demetrius, the bishop of Alexandria as the principal and sole catechist of the school of the Catechumens, which had been established for the instruction of the heathen in the facts and doctrines of Christianity. At some time between the years 180 and 190 the Bishop of Alexandria received an Appeal from the Christians in India to send them a Missionary and Pantoenus was accordingly sent. How long he was in India, how far inland he travelled and what work he actually did, there is no record to show. All that is known is that he went back to Alexandria, and took charge of his school and continued to be its principal till 211 A.D.

Little is known of the progress of the Gospel on Indian soil through the third century. But there is this fact worthy of notice. It is this that when the Council of Nicaca was held in 325 A.D. after the conversion of the Emperor Constantine Johannes, one of the Assembled prelates described himself as "Metropolitan of Persian and of the Great India". This fact seems to indicate that there was at that time a Christian Church of some bulk and significance planted on the Indian Coast. On the other hand this probably implied little more than an episcopal claim to what had always, as in the Book of Esther, been considered a province of the Persian Empire.

The scene shifts from Alexandria to Antioch and from the beginning of the third to the end of the fifth century. It is Antioch which took the burden of Christian enterprize upon its own shoulder.

The sixth century was the last peaceful year for Christian propaganda. This seems to mark the end of one epoch. Then followed the rise of the Saracens who carried the Koran and Sword of Mahammad all over Western Asia and Northern Africa, then threatened Europe itself up to Vienna and from Spain into the heart of France. The result was that all the Christian people were distracted and their Missionary effort was held up for several centuries.

The voyage of Vasco de Gama in the year 1497 to India marks the beginning of a new epoch in the history of Christian Missionary effort in India and the most serious and determined effort commenced with the arrival of the great Missionary .Francis Xavier in the year 1542. The Portuguese were the first European power in the East and the earliest

efforts of modern times in the direction of Christianizing the natives of India were made under their auspices. The conversions effected under the auspices of the Portuguese were of course conversions to the Roman Catholic faith and were carried out by Roman Catholic Missions.

They were not, however, left long without rivals. The Protestants soon came into the field. The earliest Protestant propaganda was that of the Lutherans who established themselves in Tranquebar in 1706 under the patronage of the King of Denmark. The able and devoted Schwartz, who laboured in Trichinopoly and Tanjore throughout the second half of the 18th Century was a member of this mission, which has since, to a great extent, been taken over by the Society for the propagation of the Gospel.

Next came the Baptist Mission under Carey who landed in Calcutta in 1793. Last came the Anglican Church which entered the Missionary field in 1813 and since then the expansion of Missionary enterprise was rapid and continuous.

Thus Christian propaganda has had therefore a long run in India. It had had four centuries before the rise of the Saracens who caused a break in the Mission Activity. Again after subsidence of the Saracens it has had nearly four centuries. This total of six millions is the fruit gathered in eight centuries. Obviously this is a very depressing result. It depressed Francis Xavier. It even depressed Abbe Dubois who, writing in 1823 some three hundred years after Xavier, declared that to convert Hindus to, Christianity was a forlorn hope. He was then criticized by the more optimistic of Christian Missionaries. But the fact remains that at the end of this period there are only about 6 million Christians out of a total population of about 358 millions. This is a very slow growth indeed and the question is, what are the causes of this slow growth.

III

It seems to me that there are three reasons which have impeded the growth of Christianity.

The first of these reasons is the bad morals of the early European settlers in India particularly Englishmen who were sent to India by the East India Company. Of the character of the men who were sent out to India Mr. Kaye, an Apologist of the Company and also of its servants speaks in the following terms in his "Christianity in India": "Doubtless there were some honest, decent men from the middle classes amongst them.... But many, it appears from contemporary writers, were Society's hard bargains— youngsters, perhaps, of good family, to which they were a disgrace, and

from the bosom of which therefore they were to be cast out, in the hope that there would be no prodigals return from the ' Great Indies '. It was not to be expected that men who had disgraced themselves at home would lead more respectable lives abroad.

* * *

“There were, in truth, no outward motives to preserve morality of conduct, or even decency of demeanour; so from the moment of their landing upon the shore of India, the first settlers cast off all these bonds which had restrained them in their native villages; they regarded themselves as privileged beings—privileged to violate all the obligations of religion and morality and to outrage all the decencies of life. They who went thither were often desperate adventurers, whom England, in the emphatic language of the Scripture, had spud out; men who sought those golden sands of the East to repair their broken fortunes; to bury in oblivion a sullied name; or to bring, with lawless hand from the weak and unsuspecting, wealth which they had not the character or capacity to obtain by industry at home. They cheated; they gambled; they drank; they revelled in all kinds of debauchery. Associates in vice, linked together by a common bond of rapacity, they still often pursued one another with desperate malice, and, few though they were in numbers, among them there was no fellowship, except a fellowship of crime.”

“All this was against the new comer; and so, whilst the depraved met with no inducement to reform, the pure but rarely escaped corruption. Whether they were there initiated, or perpetrated in destructive error, equally may they be regarded as the victims of circumstance.....

How bad were the morals and behaviour of the early Christians can be gathered from the following instances quoted by Mr. Kaye.”The Deputy-Governor of Bombay was in 1669 charged as under:

That he hath on the Sabbath day hindered the performance of public duty to God Almighty at the accustomed hour, continuing in drinking of health; detaining others with him against their wills; and whilst he drank, in false devotions upon his knees, a health devoted to the Union, in the time appointed for the service belonging to the Lord's day, the unhappy sequel showed it to be but the projection of a further disunion.

“That to the great scandal of the inhabitants of the island, of all the neighbours round about, both popists and others that are idolaters, in dishonour of the sobriety of the Protestant religion, he hath made frequent and heavy drinking meetings, continuing some times till two or three of the

clock in the morning, to the neglecting of the service of God in the morning prayers, and the service of the Company in the meantime had stood still while he slept, thus perverting and converting to an ill private use, those refreshment intended for the factory in general."On these charges he was found guilty.

In the factories of the East India Company there was enough of internecine strife and the factors of the Company committed scandalous outrages in general defiance both of the laws of God and the decencies of man. They fought grievously among themselves; blows following words; and the highest persons in the settlement setting an example of pugnacity with their inferiors under the potent influence of drink.

The report of the following incident is extracted from the records of the Company's factory at Surat [f.16] :

"We send your honours our consultation books from the 21st of August 1695 to 31st December 1696, in which does appear a conspiracy against the President's life, and a design to murder the guards, because he would have opposed it. How far Messrs. Vauxe and Upphill were concerned, we leave to your honours to judge by this and depositions before mentioned. There is strong presumption that it was intended first that the President should be stabbed and it was prevented much through the vigilance of Ephraim Bendall; when hopes of that failed by the guards being doubled, it seems poison was agreed on, as by the deposition of Edmund clerk and all bound to secrecy upon an horrid imprecation of damnation to the discoverer, whom the rest were to fall upon and cut off."In the same document is recorded the complaint of Mr. Charles Peachey against the President of the Council at Surat—

"I have received from you (i.e. the President) two cuts on my head, the one very long and deep, the other a slight thing in comparison to that. Then a great blow on my left arm, which has enflamed the shoulder, and deprived me (at present), of the use of that limb; on my right side a blow on my ribs just beneath the pap, which is a stoppage to my breath, and makes me incapable of helping myself; on my left hip another, nothing inferior to the first; but above all a cut on the brow of my eye."Such was the state of morality among the early English Settlers who came down to India. It is enough to observe that these settlers managed to work through the first eighty years of the seventeenth century without building a Church. Things did not improve in the 18th Century. Of the state of morality among Englishmen in India during the 18th Century this is what Mr. Kaye has to say—

"Of the state of Anglo Indian Society during the protracted Administration of Warren Hastings, nothing indeed can be said in praise. those who ought to have set good example, did grievous wrong to Christianity by the lawlessness of their lives. Hastings took another man's wife with his consent; Francis did the same without it.... It was scarcely to be expected that, with such examples before them, the less prominent members of society would be conspicuous for morality and decorum. In truth, it must be acknowledged that the Christianity of the English in India was, at this time, in a sadly depressed state. Men drank hard and gamed high, concubinage with the women of the country was the rule rather than the exception.

It was no uncommon thing for English gentlemen to keep populous zenanas. There was no dearth of exciting amusement in those days. Balls, masquerades, races and theatrical entertainments, enlivened the settlements, especially in the cold weather; and the mild excitement of duelling varied the pleasures of the season. Men lived, for the most part, short lives and were resolute that they should be merry ones."

* * *

The drunkenness, indeed, was general and obstrusive. It was one of the besetting infirmities—the fashionable vices—of the period. At the large Presidency towns—especially at Calcutta—public entertainments were not frequent. Ball suppers, in those days, were little less than orgies. Dancing was impossible after them, and fighting commonly took its place. If a public party went off without a duel or two, it was a circumstance as rare as it was happy. There was a famous club in those days, called Selby's Club, at which the gentlemen of Calcutta were wont to drink as high as they gamed, and which some times saw drunken bets of 1,000 gold mohurs laid about the merest trifles. Card parties often sat all through the night, and if the night chanced to be a Saturday, all through the next day.

* * *

Honourable marriage was the exceptional state. The Court of Directors of the East India Company. were engaged in the good work of reforming the morals of their settlements; and thinking that the means of forming respectable marriages would be an important auxiliary, they sent out not only a supply of the raw material of soldiers' wives, but some better

articles also, in the shape of what they called gentle women, for the use of such of their merchants and factors as might be matrimonially inclined. The venture, however, was not a successful one. The few who married made out indifferent wives, whilst they who did not marry,—and the demand was by no means brisk,—were, to say the least of it, in an equivocal position. For a time they were supported at the public expense, but they received only sufficient to keep them from starving, and so it happened naturally enough that the poor creatures betook themselves to vicious courses, and sold such charms as they had, if only to purchase strong drink, to which they became immoderately addicted, with the wages of their prostitution.

The scandal soon became open and notorious; and the President and Council at Surat wrote to the Deputy Governor and Council at Bombay, saying: "Whereas you give us notice that some of the women are grown scandalous to our native religion and Government, we require you in the Honourable Company's name to give them all fair warning that they do apply themselves to a more sober and Christian conversation: otherwise the sentence is that they shall be deprived totally of their liberty to go abroad, and fed with bread and water, till they are embarked on board ship for England. [f.17]

How bad were the morals and behaviour of the early Christians can be gathered from the three following instances which are taken from contemporary records.

Captain Williamson in his 'Indian Vade Mecum' published about the year 1809 says—

"I have known various instances of two ladies being conjointly domesticated, and one of an elderly military character who solaced himself with no less than *sixteen* of all sorts and sizes. Being interrogated by a friend as to what he did with such a member,"Oh", replied he, ' I give them little rice, and let them run about '. This same gentleman when paying his addresses to an elegant young woman lately arrived from Europe, but who was informed by the lady at whose house she was residing, of the state of affairs, the description closed with 'Pray, my dear, how should you like to share a sixteenth of Major?'"

Such was the disorderliness and immorality among Englishmen in India. No wonder that the Indians marvelled whether the British acknowledged any God and believed in any system of morality. When asked what he thought of Christianity and Christians an Indian is reported to have said in his broken English—"Christian religion, devil religion; Christian much

drunk; Christian much do wrong; much beat, much abuse others"—and who can say that this judgment was contrary to facts?

It is true that England herself was not at the relevant time over burdened with morality. The English people at home were but little distinguished for the purity of their lives and there was a small chance of British virtue dwarfed and dwindled at home, expending on foreign soil. As observed by Mr. Kaye [f.18]"The courtly licentiousness of the Restoration had polluted the whole land. The stamp of Whitehall was upon the currency of our daily lives; and it went out upon our adventurers in the Company's ships, and was not, we may be sure, to be easily effaced in a heathen land". Whatever be the excuse for this immorality of Englishmen in the 17th and 18th Century the fact remains that it was enough to bring Christianity into disrepute, and make its spread extremely difficult.

The second impediment in the progress of Christianity in India was the struggle between the Catholic and Non-catholic Missions for supremacy in the field of proselytization.

The entry of the Catholic Church in the field of the spread of Christianity in India began in the year 1541 with the arrival of Francis Xavier. He was the first Missionary of the new Society of Jesus formed to support the authority of the Pope. Before the Catholic Church entered this field there existed in India particularly in the South a large Christian population which belonged to the Syrian Church. These Syrian Christians, long seated on the coast of Malabar, traced their paternity to the Apostle Thomas, who it is said "went through Syria and Cilicia conforming the Churches". They looked to Syria as their spiritual home. They acknowledged the supremacy of the Patriarch of Babylon. Of Rome and the Pope they knew nothing. During the rise of the Papacy, the Mahomedan power, which had overrun the intervening countries, had closed the gates of India against the nations of the West. This had saved the Syrian Churches in India from the Roman Catholic Church. As to the question whether the Christianity of the Catholic Church was the true form of Christianity or whether the Christianity of the Syrian Church was the true form I am not concerned here. But the facts remain that the Portuguese who represented the Catholic Church in India were scandalized at the appearance of the Syrian Churches which they declared to be heathen temples scarcely disguised. The Syrian Christians shrank with dismay from the defiling touch of the Roman Catholics of Portugal and proclaimed themselves Christians and not idolators. The other is that the Malabar Christians had never been subject to Roman supremacy and never subscribed to the Roman doctrine.

The elements of a conflict between the two Churches were thus present and the inquisition only gave an occasion for the conflagration.

The inquisitors of Goa discovered that they were heretics and like a wolf on the fold, down came the delegates of the Pope upon the Syrian Churches. How great was the conflict is told by Mr. Kaye in his volume already referred to.

The first Syrian prelate who was brought into antagonism with Rome, expiated his want of courage and sincerity in the dungeons of the Inquisition. The second shared the same fate. A third, whose sufferings are more worth of commiseration, died after much trial and tribulation in his diocese, denying the Pope's supremacy to the last. The churches were now without a Bishop, at a time when they more than ever needed prelatical countenance and support; for Rome was about to put forth a mighty hand and a stretched-out arm. Don Alexis de Menezes was appointed Archbishop of Goa. It was his mission less to make new converts than to reduce old ones to subjection; and he flung himself into the work of persecution with an amount of zeal and heroism that must have greatly endeared him to Rome. Impatient of the slow success of his agents, he determined to take the staff into his own hand. Moving down to the South, with an imposing military force, he summoned the Syrian Churches to submit themselves to his authority. The Churches were under an Archdeacon, who, sensible of the danger that impended over them, determined to temporize, but at the same time to show that he was prepared to resist. He waited on the Archbishop. An escort of three thousand resolute men who accompanied him on his visit to Menezes, were with difficulty restrained, on the first slight and delusive sign of violence, from rushing on their opponents and proving their burning zeal in defence of their religion. It was not a time for Menezes to push the claims of the Romish Church. But no fear of resistance could divert him from his purpose; and he openly denounced the Patriarch of Babylon as a pestilent schismatic, and declared it a heresy to acknowledge his supremacy. He then issued a decree forbidding all persons to acknowledge any other supremacy than that of the Roman Pontiff, or to make any mention of the Syrian Patriarch in the services of their Church; and, this done, he publicly excommunicated the acknowledged head of the Syrian Churches, and called upon the startled Archdeacon to sign the writ of excommunication. Frightened and confused, the wretched man put his name to the apostate document; and it was publicly affixed to the gates of the church.

This intolerable insult on the one hand—this wretched compromise on the other—roused the fury of the people against the Archbishop, and

against their own ecclesiastical chief. Hard was the task before him, when the latter went forth to appease the excited multitude. They would have made one desperate effort to sweep the Portuguese intruders from their polluted shores; but the Archdeacon pleaded with them for forbearance; apologised for his own weakness; urged that dissimulation would be more serviceable than revenge; promised, in spite of what he had done, to defend their religion; and exhorted them to be firm in their resistance of Papal aggression. With a shout of assent, they swore that they would never bow their necks to the yoke, and prepared themselves for the continuance of the struggle.

But Menezes was a man of too many resources to be worsted in such a conflict. His energy and perseverance were irresistible; his craft was too deep to fathom. When one weapon of attack failed, he tried another. Fraud took the place of violence; money took the place of arms. He bribed those whom he could not bully, and appealed to the imaginations of men when he could not work upon their fears. And, little by little, he succeeded. First one Church fell, and then another.' Dangers and difficulties beset them. Often had he to encounter violent resistance, and often did he beat it down. When the strength of the Syrian Christians was too great for him, he called in the aid of the native princes. The unhappy Archdeacon, weary of resistance and threatened with excommunication, at last made submission to the Roman Prelate. Menezes issued a decree for a synod; and, on the 20th June 1599, the Churches assembled at Diamper. The first session passed quietly over, but not without much secret murmuring. The second, at which the decrees were read, was interrupted at that trying point of the ceremony where, having enunciated the Confession of Faith, the Archbishop renounced and anathematized the Patriarch of Babylon. The discontent of the Syrians here broke out openly; they protested against the necessity of a confession of Faith, and urged that such a confession would imply that they were not Christians before the assembling of the Synod. But Menezes allayed their apprehensions and removed their doubts, by publicly making the confession in the name of himself and the Eastern Churches. One of the Syrian priests, who acted as interpreter, then read the confession in the Malabar language, and the assembled multitude repeated it after him, word for word, on their knees. And so the Syrian Christians bowed their necks to the yoke of Rome.

Resolute to improve the advantages he had gained, Menezes did not suffer himself to subside into inactivity, and to bask in the sunshine of his past triumphs. Whether it was religious zeal or temporal ambition that moved him, he did not relax from his labours; but feeling that it was not

enough to place the yoke upon the neck of the Syrian Christians, he endeavoured, by all means, to keep it there. The Churches yielded sullen submission; but there were quick-witted, keen-sighted men among them, who, as the seventeenth century began to dawn upon the world, looked hopefully into the future, feeling assured that they could discern even then unmistakable evidences of the waning glories of the Portuguese in the East. There was hope then for the Syrian churches. The persecutions of Menezes were very grievous—for he separated priests from their wives; excommunicated on trifling grounds, members of the churches; and destroyed all the old Syriac records which contained proofs of the early purity of their faith.

The irreparable barbarism of this last act was not to be forgotten or forgiven; but, in the midst of all other sufferings, there was consolation in the thought, that this tyranny was but for a time."Sixty years of servitude and hypocrisy," writes Gibbon, "were patiently endured, but as soon as the Portuguese empire was shaken by the courage and industry of the Dutch, the Nestorians asserted with vigour and effect the religion of their fathers. The Jesuits were incapable of defending the power they had abused. The arms of forty thousand Christians were pointed against their falling tyrants; and the Indian Archdeacon assumed the character of Bishop till afresh supply of Episcopal gifts and Syriac missionaries could be obtained from the Patriarch of Babylon". Such briefly narrated, were the results of the oppression of Menezes. In the course of six months that ambitious and unscrupulous prelate reduced the Syrian church to bondage, and for sixty years they wore the galling chains of Rome. But Menezes trusted in his own strength; he came as an earthly conqueror, and his reliance was on the arm of temporal authority."His example," writes Mr. Hough, "should be regarded as a beacon to warn future Christian missionaries from the rock on which he foundered. Without faith and godliness nothing can ensure a church's prosperity. Failing in these, the prelate's designs, magnificent as they were deemed, soon came to nothing; and it deserves special remark, as an instructive interposition of Divine Providence, that the decline of the Portuguese interest in India commenced at the very period when he flattered himself that he had laid the foundation of its permanency."

There was no such open conflict between the Catholic Church and the Protestant Missionaries. There was however sufficient rivalry between them to prevent cooperation and conceited activity the lack of which also prevented a rapid growth of Christianity.

The third reason which is responsible for the slow growth of Christianity was the wrong approach made by the Christian Missionaries in charge of

Christian propaganda. The early Christian Missionary started his campaign by inviting public disputations with learned Brahmins on the comparative merits of the Christian and the Hindu religions. This was a strange way of going about his task. But there was a plan behind it. The Christian Missionary felt that his task of converting the masses would be easy of achievement if he succeeded in converting the Brahmin and the higher classes of Hindus. For they and the Brahmins held sway over the masses. And the easiest way of converting the Brahmin was to defeat in disputation and to show him that his religion was an error. The Christian Missionary wanted to get at the Brahmin. Nothing can explain why the Missionaries started so many schools, colleges, hospitals etc., except this namely the Christian Missionary wanted to establish a contact with the Brahmin. That the Christian Missionary has been deceived is now realized by many. The Brahmin and the higher classes have taken full advantage of the institutions maintained by the Christian Missions. But hardly any one of them has given any thought to the religion which brought these institutions into existence.

There is nothing strange in this. The pursuit of the Brahmin and the higher classes of Hindus by the Christian Missionaries was doomed to fail. There would be no common ground for the disputation between Hinduism and Christianity and where there is a common ground the Hindu could always beat the Christian.

That there could be no common ground for disputation between Hindus and Christians is due to the fact that the two have a totally different attitude to the relations of theology to philosophy. As has been well observed by Mr. Burn, [f.19]

“The Educated Hindu, when he considers religious questions, refuses to separate theology from philosophy and demands what shall appear to him a reasonable cosmogony. It has been shown in dealing with Hinduism that its prevailing tendency is pantheistic, and although for at least two thousand years sects have constantly been forming which asserted the duality of God and Spirit, there has always been a tendency to relapse into pantheism, and to regard the present world as an illusion produced by *Maya*. The average Christian however gets on with very little philosophy and regards that as a rule as more speculative than essential to his religious beliefs. The methods of thought which a man has been brought up to regard, inevitably affect the conclusions at which he arrives, and it appears to me that this forms one of the reasons why to the majority of educated Hindus the idea of accepting Christianity is incredible. To take a single concrete example, the ordinary educated Hindu laughs at the belief that

God created the Universe out of nothing. He may believe in a creation, but he also postulates the necessity for both a material cause, *matter* and an efficient cause, the *creator*. Where his belief is purely pantheistic, he also has no regard for historical evidences. A further difficulty on a fundamental point is caused by the belief in transmigration, which is based on the idea that a man must work out his own salvation and thus conflicts entirely with the belief in Divine atonement."

Thus the Hindu speaks in terms of philosophy and the Christian speaks in terms of theology. There is thus no common ground for evaluation, or commendation or condemnation. In so far as both have theology the Christians with their God and Jesus as his son and the Hindus with their God and his Avatars, the superiority of one over the other, depends upon the miracles performed by them. In this the Hindu theology can beat the Christian theology is obvious enough and just as absence of philosophy in Christianity is responsible for its failure to attract the Brahmin and the Educated Hindu. Similarly the abundance of miracles in Hindu theology was enough to make Christian theology pale off in comparison. Father Gregory a Roman Catholic priest seems to have realized this difficulty and as his view is interesting as well as instructive I give below the quotations from Col. Sleeman's book in which it is recorded. Says Col. Sleeman [f.20] .

"Father Gregory, the Roman Catholic priest, dined with us one evening, and Major Godby took occasion to ask him at table, 'What progress our religion was making among the people'?

"Progress"? said he,"why, what progress can we ever hope to make among a people who, the moment we begin to talk to them about the miracles performed by Christ, begin to tell us of those infinitely more wonderful performed by Krishna, who lifted a mountain upon his little finger, as an umbrella, to defend his shepherdesses at Govardhan from a shower of rain.

"The Hindoos never doubt any part of the miracles and prophecies of our scripture—they believe every word of them and the only thing that surprises them is that they should be so much less wonderful than those of their own scriptures, in which also they implicitly believe. Men who believe that the histories of the wars and amours of Ram and Krishna, two of the incarnations of Vishnu, were written some fifty thousand years before these wars and amours actually took place upon the earth, would of course easily believe in the fulfilment of any prophecy that might be related to them out of any other book; and, as to miracles, there is absolutely nothing too extraordinary for their belief. If a Christian of respectability were to tell

a Hindoo that, to satisfy some scruples of the Corinthians, St. Paul had brought the sun and moon down upon the earth, and made them rebound off again into their places, like tennis balls, without the slightest injury to any of the three planets (sic), I do not think he would feel the slightest doubt of the truth of it; but he would immediately be put in mind of something still more extra-ordinary that Krishna did to amuse the milkmaids, or to satisfy some sceptics of his day, and relate it with all the naivete imaginable."

As events in India have shown this was a wrong approach. It was certainly just the opposite to the one adopted by Jesus and his disciples. Gibbon has given a description of the growth of Christianity in Rome which shows from what end Christ and his disciples began. This is what he says—

"From this impartial, though imperfect, survey of the process of Christianity, it may, perhaps seem probable that the number of its proselytes has been excessively magnified by fear on one side and by devotion on the other. According to the irreproachable testimony of Origen, the proportion of the faithful was very inconsiderable when compared with the multitude of an unbelieving world; but, as we are left without any distinct information, it is impossible to determine, and it is difficult even to conjecture, the real numbers of the primitive Christians. The most favourable calculation, however, that can be deduced from the examples of Antioch and of Rome will not permit us to imagine that more than a twentieth part of the subjects of the empire had enlisted themselves under the banner of the cross before the important conversion of Constantine. But their habits of faith, of zeal, and of union seemed to multiply their numbers; and the same causes which contributed to their future increase served to render their actual strength more apparent and more formidable.

"Such is the constitution of civil society that, whilst a few persons are distinguished by riches, by honours, and by knowledge, the body of the people is condemned to obscurity, ignorance and poverty. The Christian religion, which addressed itself to the whole human race, must consequently collect a far greater number of proselytes from the lower than from the superior ranks of life. This innocent and natural circumstance has been improved into a very odious imputation, which seems to be less strenuously denied by the apologists than it is urged by the adversaries of the faith; that the new sect of Christians was almost entirely composed of the dregs of the populace, of peasants and mechanics, of boys and women, of beggars and slaves; the last of whom might sometimes introduce the

missionaries into the rich and noble families to which they belonged. These obscure teachers (such was the charge of malice and infidelity) are as mute in public as they are loquacious and dogmatical in private. Whilst they cautiously avoid the dangerous encounter of philosophers, they mingle with the rude and illiterate crowd, and insinuate themselves into those minds, whom their age, their sex, or their education has the best disposed to receive the impression of superstitious terrors.

"This favourable picture, though not devoid of a faint resemblance, betrays, by its dark colouring and distorted features, the pencil of an enemy. As the humble faith of Christ diffused itself through the world, it was embraced by several persons who derived some consequences from the advantages of nature or fortune. Aristides, who presented an eloquent apology to the emperor Hadrian, was an Athenian philosopher. Justin Martyr had sought divine knowledge in the schools of Zeno, or Aristotle, of Pythagoras, and of Plato, before he fortunately was accosted by the old man, or rather the angel, who turned his attention to the study of the Jewish prophets. Clemens of Alexandria had acquired much various reading in the Greek, and Tertullian in the Latin language; Julius Africanus and Origen possessed a very considerable share of the learning of their times; and, although the style of Cyprian is very different from that of Lactantius, we might almost discover that both those writers had been public teachers of rhetoric. Even the study of philosophy was at length introduced among the Christians, but it was not always productive of the most salutary effects; knowledge was as often the parent of heresy as of devotion, and the description which was designed for the followers of Artemon may, with equal propriety, be applied to the various sects that resisted the successors of the apostles. "They presume to alter the holy scriptures, to abandon the ancient rule of faith, and to form their opinion according to the subtle precepts of logic. The science of the church is neglected for the study of geometry, and they lose sight of Heaven while they are employed in measuring the earth. Euclid is perpetually in their hands. Aristotle and Theophrastus are the objects of their admiration; and they express an uncommon reverence for the works of Galen. Their errors are derived from the abuse of the arts and sciences of the infidels, and they corrupt the simplicity of the Gospel by the refinements of human reason."

"Nor can it be affirmed with truth that the advantages of birth and fortune were always separated from the profession of Christianity. Several Roman citizens were brought before the tribunal of Pliny, and he soon discovered that a great number of persons of every order of men in Bithynia had deserted the religion of their ancestors. His unsuspected

testimony may, in this instance, obtain more credit than the bold challenge of Tertullian, when he addresses himself to the fears as well as to the humanity of the proconsul of Africa, by assuring him that, if he persists in his cruel intentions, he must decimate Carthage, and that he will find among the guilty many persons of his own rank, senators and matrons of noblest extraction, and the friends or relations of his most intimate friends. It appears, however, that about forty years afterwards the emperor Valerian was persuaded of the truth of this assertion, since in one of his rescripts he evidently supposes that senators, Roman knights, and ladies of quality were engaged in the Christian sect. The church still continued to increase its outward splendour as it lost its internal purity; and in the reign of Diocletian the palace, the courts of justice, and even the army concealed a multitude of Christians who endeavoured to reconcile the interests of the present with those of a future life.

And yet these exceptions are either too few in number, or too recent in time, entirely to remove the imputation of ignorance and obscurity which has been so arrogantly cast on the first proselytes of Christianity. Instead of employing in our defence the fictions of later ages, it will be more prudent to convert the occasion of scandal into a subject of edification. Our serious thoughts will suggest to us that the apostles themselves were chosen by providence among the fishermen of Galilee, and that the lower we depress the temporal condition of the first Christians, the more reason we shall find to admire their merit and success. It is incumbent on us diligently to remember that the kingdom of heaven was promised to the poor in spirit, and that minds afflicted by calamity and the contempt of mankind cheerfully listen to the divine promise of future happiness; while, on the contrary, the fortunate are satisfied with the possession of this world; and the wise abuse in doubt and dispute their vain superiority of reason and knowledge." Similarly Hallam in his ' History of the Middle Ages ' speaks of the class from which the early Christians were drawn.

The reason why Christianity became the religion of all citizens of Rome i.e. of the higher classes as well was because of two extraneous reasons. The first reason was the making of Christianity state religion which meant the proscribing every other religion. The second reason was the change in the law of inheritance by the Roman Emperors after they became converts to Christianity a preferential right to inherit the property of the parents over a child which had remained pagan.

This only shows that the people to whom Christianity made a natural appeal were the poorer classes and it is among them that Christianity first spread without the help of law or other extraneous advantage.

The early Christian Missionary began by reversing this natural order of things. I call it natural because it befits human psychology. Prof. Thorndyke [f.21] a great authority on Psychology says—"*That* a man thinks is a biological fact. But *What* he thinks is a sociological fact". This profound observation, the early Christian Missionary absolutely overlooked. Every kind of thought is not agreeable to every person. This is evident from the fact that capitalism appeals to the rich and does not appeal to the poor. On the contrary socialism appeals to the poor but does not appeal to the rich. This is because there is a very intimate connection between the interests of a man and the thoughts which have an adverse effect on his interests. He will not give them any quarters in his mind. Applying this analysis of the working of the human mind it is clear that the Brahmin and the higher classes could never be receptive to the Christian doctrine. It preaches brotherhood of man and when applied leads to equality of man. Now the interests of the Brahmin and the higher classes is to maintain the system of Chaturvarna—which is a system based upon inequality and which in the scale gives them a higher rank, greater opportunity to dominate and exploit the others. How can they be expected to accept Christianity? It means a surrender of their power and prestige. To have pursued them has been a vain effort and if the pursuit had been continued I am sure there would have been no Christians in India at all. The number of Christians we see in India today is due to the fact that some Christian Missionaries saw the futility of this. If they had not realized this error and started to win over the lower classes, there would have been no Christians in India at all. Even today hundreds and thousands of high caste Hindus take advantage of Christian schools, Christian colleges and Christian hospitals. How many of those who reap these benefits become Christian? Every one of them takes the benefit and runs away and does not even stop to consider what must be the merits of a religion which renders so much service to humanity.

CHAPTER 4

THE CONDITION OF THE CONVERT

- I. Gandhi and his opposition to Christianity.
- II. Christianity and social service.
- III. Christianity and Paganism.
- IV. Christianity and the spirit of the Convert.
- V. Christian Community and its social standing.

I

In 1928, there was held a meeting of the International Fellowship, a body devoted to promoting fellow feeling among persons of different faiths. It was attended by Christian missionaries as well as by Hindus and Moslems. Mr. Gandhi was also present. At this meeting the question was raised as to how far the fellowship could remain true to its ideal, if those who belonged to it wished to convert others to their own faith. In the debate that followed, Mr. Gandhi spoke. His friend Mr. C. F. Andrews, writes concerning the discussion as follows: [f.22]

“At the back of this question, there was a definite challenge to the whole Christian Missionary position in India. Missionaries of a liberal type of mind had been finding great joy in the Fellowship Then came Mahatma Gandhi's declaration. He stated that in doing so, or injoining the Fellowship, if there was the slightest wish, or even the slightest thought at the back of the mind, to influence, or convert, any other member of the Fellowship, then the spirit of the movement could be destroyed. Any one who had such a wish ought to leave the Fellowship”.

On being further questioned by Christian Missionaries 'Whether if they possessed the greatest treasure in the World, they would be wrong in wishing to share it, Mr. Gandhi was quick to rebuff their presumption. Mr. Andrews says—"he was adamant". "Even the idea of such a desire was wrong", he said emphatically;"and he would not move from that position at all".

Mr. Gandhi's opposition to Christian conversion is by now quite well known. And since 1936 he has become quite a virulent adversary of all missionary propaganda. He particularly objects to the missionaries spreading the Christian Gospel among the Untouchables. His antagonism to Christian Missions and the conversion of Untouchables to Christianity is based on certain propositions which have been enunciated by him in quite unmistakable terms. I think the following four propositions may be taken to sum up his position. I give them in his own words. He says:

1."My position is that all religions are fundamentally equal. We must have the same innate respect for all religions as we have for our own. Mind you, not mutual toleration but equal respect." [f.23]

II."All I want them (the Missionaries) to do is to live Christian lives, not to annotate them. [f.24]Let your lives speak to us. The blind who do not see the rose, perceive its fragrance. That is the secret of the Gospel of the rose. But the Gospel that Jesus preached is more subtle and fragrant than

the Gospel of the rose. If the rose needs no agents, much less does the Gospel of Christ need agents". [f.25] As to the work of the Christian Missions he says:

III."The social work of the missions is undertaken not for its own sake, but as an aid to the salvation of those who receive social service. [f.26] . . . While you give medical help, you expect the reward in the shape of your patients becoming Christians." [f.27] As to the Untouchables he says—

IV."I do maintain . . . that the vast masses of Harijans and for that matter of Indian humanity, cannot understand the presentation of Christianity, and that, generally speaking, conversion, wherever it has taken place, has not been a spiritual act in any sense of the term. They are conversions of convenience. [f.28] They (the Harijans) can no more distinguish between the relative merits (words omitted?) than can a cow. Harijans have no mind, no intelligence, no sense of difference between God and no-God." [f.29]

Gandhi advises the Christian Missions in the following somewhat offensive terms as to what would be proper for them to do. He says—

"If Christian Missions will sincerely play the game..... they must withdraw from the indecent competition to convert the Harijans.....

"Just..... forget that you have come to a country of heathens and (to) think that they are as much in search of God as you are; just feel that you are not going there to give your spiritual goods to them, but that you will share worldly goods of which you have a good stock. You will then do your work without mental reservation and thereby you will share your spiritual treasures. The knowledge that you have this mental reservation, i.e. you are expecting a man to be a convert in return for service, creates a barrier between you and me."

"The history of India would have been written differently if the Christians had come to India to live their lives in our midst and permeate ours with their aroma, if there was any."2 This hostility of Mr. Gandhi to Christian Missions and their work is of very recent origin. I do not know if it can be traced beyond the Yeola Decision.

It is as recent as it is strange. I do not know of any declaration made by Mr. Gandhi expressing in such clear and determined manner opposition to the conversion of the Untouchables to Islam. The Muslims have made no secret of their plan to convert the Untouchables. The plan was given out openly from the Congress platform by the late Maulana Mohomed Ali when he presided over the annual session of the Congress held at Coconada in 1923. In his Presidential address the Maulana pointed out in clear terms that:

"The quarrels (between Hindus and Musalmans) about *Alams* and *pipal* trees and musical processions are truly childish; but there is one question which can easily furnish a ground for complaint of unfriendly action if communal activities are not amicably adjusted. This is the question of the conversion of the suppressed classes, if Hindu Society does not speedily absorb them. The Christian missionary is already busy and no one quarrels with him. But the moment some Muslim missionary society is organized for the same purpose there is every likelihood of an outcry in the Hindu press. It has been suggested to me by an influential and wealthy gentleman who is able to organize a (Muslim) missionary society on a large scale for the conversion of the suppressed classes, that it should be possible to reach a settlement with leading Hindu gentlemen and divide the country into separate areas where Hindu and Muslim missionaries could respectively work, each community preparing for each year, or longer unit of time, if necessary, an estimate of the numbers it is prepared to absorb, or convert. These estimates would, of course, be based on the number of workers and funds each had to spare, and tested by the actual figures of the previous period. In this way each community would be free to do the work of absorption and conversion, or rather of reform, without chances of collision with one another".

Nothing can be more explicit than this. Nothing can be more businesslike and nothing can be more materialistic than this pronouncement from the Congress platform. But I am not aware that Mr. Gandhi has ever condemned it in the way in which he now condemns the endeavour of Christian Missions to convert the Untouchables. Nobody from Gandhi's camp protested against this outrageous suggestion. Probably they could not because the Congress Hindus believed that it was their duty to help the Musalmans to fulfil what they regarded as their religious duty, and that conversion is a religious duty with the Musalman nobody can deny. At any rate the Hindu leaders of Congress, as stated by George Joseph in 1920, held "that it was the religious duty of the Hindus to help Muslims in the maintenance of the Turkish Khilafat over the Arabs in the Jazirut-al-Arab because Muslim theologians and political leaders assured us that it was their religious duty. It went against the grain because it meant the maintenance of a foreign Government over Arabs; but Hindus had to stomach it because it was urged on them as part of the religious duty of the Hindus [f.30] . If this is true why should Gandhi not help the Christians to carry on conversion because conversion is also a fulfilment of their religious duty.

Why there should be a different measuring rod today because it is the Christians that are involved is more than one can understand. Mr. George

Joseph was well within bounds when he said:

“The only difference is that there are 75 millions of Muslims and there are only 6 millions of Christians. It may be worth-while making peace with Muslims because they can make themselves a thorn in the side of Nationalism: Christians do not count, because they are small in numbers.”

That Mr. Gandhi is guided by such factors as the relative strength of the Musalmans and Christians, their relative importance in Indian politics, is evident from the terms he uses in condemning what he calls “propaganda by villification”. When such a propaganda emanates from Christian missionaries he uses the following, language to condemn it. (*Quotation is not there in the MS.—Ed.*)

On the other hand when he comes out against a propaganda emanating from the Muslim all that he says-. [f.31]

“It is tragic to see that religion is dragged down to the low level of crude materialism to lure people into mission which the most cherished sentiments of millions of human beings are trodden under foot.

“I hope that the pamphlet has no support from thoughtful Musalmans who should read it to realize the mischief such pamphlets can create.

“My correspondent asks me how to deal with the menace. One remedy I have applied, viz, to bring hereby the villifying propaganda to the notice of the responsible Muslim world. He himself can claim the attention of the local Musalman leaders to the publication. The second and the most important thing to do is purification from within. So long as the position of untouchability remains in the Hindu body it will be liable to attacks from outside. It will be proof against such attacks only when a solid and impregnable wall of purification is erected in the shape of complete removal of untouchability.”

The ferocity of the former and the timidity and softness of the latter are obvious enough. Surely Gandhi must be regarded as an astute “respector of persons”.

But apart from this difference in his attitude towards Muslim and Christian propaganda, have Mr. Gandhi's arguments against Christian Missions, which I have summarized above, any validity? They are just clever. There is nothing profound about them. They are the desperate arguments of a man who is driven to wall. Mr. Gandhi starts out by making a distinction between equal tolerance and equal respect. The phrase “equal respect” is a new phrase. What distinction he wants to make thereby is difficult to recognize. But the new phraseology is not without significance. The old phrase “equal tolerance” indicated the possibility of error. “Equal respect” on the other hand postulates that all religions are equally true and

equally valuable. If I have understood him correctly then his premise is utterly fallacious, both logically as well as historically. Assuming the aim of religion is to reach God—which I do not think it is—and religion is the road to reach him, it cannot be said that every road is sure to lead to God. Nor can it be said that every road, though it may ultimately lead to God, is the right road. It may be that (all existing religions are false and) the perfect religion is still to be revealed. But the fact is that religions are not all true and therefore the adherents of one faith have a right, indeed a duty, to tell their erring friends what they conceive to be the truth. That Untouchables are no better than a cow is a statement which only an ignoramus, or an arrogant person, can venture to make. It is arrant nonsense. Mr. Gandhi dares to make it because he has come to regard himself as so great a man that the ignorant masses will not question his declarations and the dishonest intelligentsia will uphold him in whatever he says. Strangest part of his argument lies in wishing to share the material things the Christian Missions can provide. He is prepared to share their spiritual treasures provided the Missionaries invite him to share their material treasures”without obligation”.* (What he minds is an exchange.) It is difficult to understand why Mr. Gandhi argues that services rendered by the Missionaries are baits or temptations, and that the conversions are therefore conversions of convenience. Why is it not possible to believe that these services by Missionaries indicate that service to suffering humanity is for Christians an essential requirement of their religion? Would that be a wrong view of the process by which a person is drawn towards Christianity? Only a prejudiced mind would say. Yes.

All these arguments of Mr. Gandhi are brought forth to prevent Christian Missionaries from converting the Untouchables. No body will deny to Mr. Gandhi the right to save the Untouchables for Hinduism. But in that case he should have frankly told Missions”Stop your work, we want now to save the Untouchables, and ourselves. Give us a chance!”It is a pity that he should not have adopted this honest mode of dealing with the menace of the Missionaries. Whatever anybody may say I have no doubt, all the Untouchables, whether they are converts or not, will agree that Mr. Gandhi has been grossly unjust to Christian Missions. For centuries Christian Missions have provided for them a shelter, if not a refuge.

This attitude of Mr. Gandhi need not deter either the missionaries or the Untouchables. Christianity has come to stay in India and, unless the Hindus in their zeal for nationalism misuse their political, social and economic power to suppress it, will live and grow in numbers and influence for good.

II

What Christianity has achieved in India therefore becomes a proper subject for examination from the points of view both of Christian Missions and of the Untouchables.

That Christian Missions have been endeavouring to provide the *corpus sanum* for the people of India and to create the *Mens Sana* among those who have entered the fold is undeniable. It would be difficult in this place to describe all the activities carried on by Christian Missions in India. The work done by the Missionaries falls under five heads: (1) among children, (2) among young men, (3) among the masses, (4) among women and (5) among the sick.

The work done is vast. The following figures will give an idea of the scale on which the work for education and relieving sickness is being carried on.

1. 1. CHRISTIAN MEDICAL WORK [f.32]

1	Hospitals	
2	Dispensaries	
3	Sanatoriums	
4	Leper Homes	
5	Medical Schools	
6	Number of Hospital ds	
7	Number of Sanatorium Beds	
8	Doctors, Foreign	
9	Doctors, National	
10	Nurses, Foreign	
11	Nurses, National	
12	Student Nurses	
13	Operations, Major	
14	Obstretrics, Total	
15	In—Patients	
16	Out—Patients	

II. CHRISTIAN EDUCATION [f.33]

1	Elementary Schools
2	Secondary Schools
3	

What have the Hindus to show as against this? Historically speaking, service to humanity is quite foreign to Hinduism and to Hindus. The Hindu religion consists primarily, of rituals and observances. It is a religion of temples. Love of man has no place in it. And without love of man how can service to man be inspired? This is well reflected in the purposes and objects for which Hindu charities are given. Very few people, even in India, know the extent to which caste determines the scope and objects of charities provided by the Hindus. It is difficult to get full and precise facts relating to Hindu Charities. However, data collected several years ago, in the City of Bombay, throws a flood of light on the subject. (*Data not typed in the MS.*)

That caste can influence doctors in the ministrations to the sick was a charge made among certain doctors in Bombay in 1918 during the influenza epidemic.

Comparatively speaking, the achievements of Christian Missions in the field of social service are very great. Of that no one except a determined opponent of every thing Christian can have any doubt. Admitting these great services, one may raise two questions. Are these services required for the needs of the Indian Christian Community? Are there any needs of the Indian Christian Community which have not been attended to by Missions?

It is necessary to bear in mind that Indian Christians are drawn chiefly from the Untouchables and, to a much less extent, from low ranking

Shudra castes. The Social Services of Missions must, therefore, be judged in the light of the needs of these classes. What are those needs?

The services rendered by the Missions in the fields of education and medical relief are beyond the ken of the Indian Christians. They go mostly to benefit the high caste Hindus. The Indian Christians are either too poor or too devoid of ambition to undertake the pursuit of higher education. High schools, colleges and hostels maintained by the Missions are, therefore, so much misplaced and misapplied expenditure from the point of view of the uplift of Indian Christians. In the same way much of the medical aid provided by the Missions goes to the Caste Hindus. This is especially the case with regard to hospitals.

I know many missionaries realize this. None the less this expenditure is being incurred from year to year. The object of these services is no doubt to provide occasion for contact between Christian Missionaries and high caste Hindus. I think it is time the Missionaries realized that the pursuit of the Caste Hindus in the hope of converting them to Christianity is a vain pursuit which is sure to end in complete failure. Mr. Winslow, I think, is correct when he concludes his survey of the attitude of the intelligentsia of India towards Christianity by saying: "Whilst the work of Duff and the Serampore Missionaries resulted in some notable conversions and it seemed for a time as though English education were going to lead to many and rapid accessions to the Christian Church from amongst those who received it, a reaction soon set in and the movement died down. Its place was taken by the Theistic Samajes, and in particular by the Brahmo Samaj in Bengal, which enabled those Hindus who through the influence of Western thought had become dissatisfied with idolatry and caste to surrender these without forfeiting entirely their place within the Hindu system. For many years Christian missionaries hoped and believed that the Brahmo Samaj would prove a half-way house to Christianity and that many of its members would in course of time become dissatisfied with an intermediate position and accept the Christian Faith, but this hope has in the main been disappointed, though a few notable converts have come from the rank of the Samajes.

* * * * *

What then, does the educated Indian of today, more particularly the Brahman, think of Christ? It is perhaps foolish to try to generalize.... Yet there are certain broad features in the picture which may be safely described There is a wide-spread acceptance of the main principles of Christ's teaching, particularly of His ethical teaching. It would be generally conceded that the Sermon on the Mount, while not necessarily containing

any thing which might not be paralleled from other sources, is unsurpassable as a directory for human conduct Side by side with this widespread acceptance of Christ's teaching goes a very general reverence for His life and character

On the other hand, the claim that Christ was, and is, in a *unique* sense divine is not one which the majority of Hindus, even of those deeply attracted by His life, would be prepared to accept (They) would set Him side by side with (their) own great Prophet, the Buddha. But the Christian claim that He, and He only, is God Incarnate, and that salvation is to be won through faith in Him, and Him alone, (they) reject as exclusive and narrow Thus the Christian claim to possess the one way of salvation arouses in India an almost instinctive repugnance. The characteristic religious attitude of the educated Hindu to day (is) still, whilst he greatly reverences Christ, and accepts the main principles of His teaching, he is quite content to remain a Hindu."

I have no doubt that this correctly sums up the position. If this is so then the money and energy spent by the Christian Missions on education and medical relief is misapplied and do not help the Indian Christians.

The Indian Christians need two things. The first thing they want is the safeguarding of their civil liberties. The second thing they want is ways and means for their economic uplift. I cannot stop to discuss these needs in all their details. All I wish to point out is that this is a great desideratum in the social work the Christian Missions are doing in India.

While what has been accomplished by Christian Missionaries in the field of education and medical aid is very notable and praise worthy there still remains one question to be answered. What has Christianity achieved in the way of changing the mentality of the Convert? Has the Untouchable convert risen to the status of the touchable? Have the touchable and untouchable converts discarded caste? Have they ceased to worship their old pagan gods and to adhere to their old pagan superstitions? These are far-reaching questions. They must be answered and Christianity in India must stand or fall by the answers it can give to these questions.

The following extracts taken from the memorandum submitted by the Christian Depressed Classes of South India to the Simon Commission throw a flood of light on the position of the Untouchables who have gone into the Christian fold so far as the question of caste is concerned.

"We are by religion Christians, both Roman Catholics and Protestants. Of the total population of Indian Christians of the Presidency the converts from the Depressed Classes form about sixty per cent. When the Christian religion was preached in our lands, we, the Pallas, Pariahs, Malas, Madigas,

etc., embraced Christianity. But others of our stock and origin were not converted and they are known to be the Hindu Depressed classes, being all Hindus or adherents to the Hindus in religion. In spite, however, of our Christian religion which teaches us fundamental truths the equality of man and man before God, the necessity of charity and love for neighbours and mutual sympathy and forbearance, we, the large number of Depressed class converts remain in the same social condition as the Hindu Depressed Classes. Through the operation of several factors, the more important of them being the strong caste retaining Hindu mentality of the converts to Christianity, and the indifference, powerlessness and apathy of the Missionaries, we remain today what we were before we became Christians— Untouchables—degraded by the laws of social position obtaining in the land, rejected by caste Christians, despised by Caste Hindus and excluded by our own Hindu Depressed Class brethren.

"The small proportion of the Christians of South India, whose representatives are found in the Legislative Council, say, in Madras, are caste Christians, a term which sounds a contradiction, but which, unfortunately, is the correct and accepted description of high caste converts from Hinduism, who retain all the rigour and exclusiveness of caste. Particularly in the Mofussil parts and the villages, they who ought to be our fellow Christians follow all the orthodox severity and unreason of caste exclusion; they damn us as "Panchamas or Pariahs" and ignore our Christian claims and in the fulness of their affluence, power, prestige and position exclude us poorer Christians from society, Frequent outbursts of anti-Panchama activity are the scandal of the South Indian Christian life, and the least attempt on our part to better our lot, forward our progress and assert our elementary rights call down the wrath and fury of every man—official and non-official—Christian or Hindu, who claims a foolish superiority of birth. Denying the very foundations of Christianity, contrary to all love and charity and brotherhood, our "fellow-Christians" treat us even in the Churches as Untouchables and Unapproachables, and relegate us to separate accommodation removed from their precincts and barricade their portions by means of iron rails and walls and fencings. There are several such churches.

"In the matter of reception of sacraments, a most ridiculous segregation is practised to avoid pollution; our claims to educate our children and train them for life are ruthlessly denied and through sheer prejudice our children are denied access to schools, convents, hostels, boarding houses, or if admitted, are assigned an ignominious separate accommodation. Tracing his descent from high caste Hindu progenitors the caste Christian looks for

social status and position and finds favour in the eyes of his fellow castemen, the Hindus. He treats the Depressed Class Christians in the same way as the Hindu Depressed Classes are treated by the Hindu Caste people". What is stated here in general terms may be made concrete by reference to the two following incidents. (*Incidents not mentioned in the MS.—Ed.*)

This is a terrible indictment. It is a relief to know that it does not apply to all parts of India nor does it apply to all denominations of Christians. The picture is more true of the Catholics than of the Protestants. It is more true of Southern India than it is of the Northern or even Central India. But the fact remains that Christianity has not succeeded in dissolving the feeling of caste from among the converts to Christianity. The distinction between touchables and untouchables may be confined to a corner. The Church School may be open to all. Still there is no gainsaying the fact that caste governs the life of the Christians as much as it does the life of the Hindus. There are Brahmin Christians and Non-Brahmin Christians. Among Non-Brahmin Christians there are Maratha Christians, Mahar Christians, Mang Christians and Bhangi Christians. Similarly in the South there are Pariah Christians, Malla Christians and Madiga Christians. They would not intermarry, they would not inter-dine. They are as much caste ridden as the Hindus are.

There is another thing which shows that Christianity has not been effective in wiping paganism out of the converts. Almost all the converts retain the Hindu forms of worship and believe in Hindu superstition. A convert to Christianity will be found to worship his family Gods and also the Hindu gods such as Rama, Krishna, Shankar, Vishnu, etc. A convert to Christianity will be found to go on a pilgrimage to places which are sacred to the Hindus. He will go to Pandharpur, and make offerings to Vithoba. He will go to Jejuri and sacrifice a goat to the blood-thirsty god, Khandoba. On the Ganesh Chaturthi he will refuse to see the moon, on a day of eclipse he will go to the sea and bathe—superstitions observed by the Hindus. It is notorious that the Christians observe the social practices of the Hindus in the matter of births, deaths and marriages. I say nothing about the prevalence of the Hindu social practices among the Christians. In as much as these social practices have no religious significance it matters very little what they are. But the same cannot be said of religious observances. They are incompatible with Christian belief and Christian way of life. The question is why has Christianity not been able to stamp them out?

The answer is that the Christian Missionaries although they have been eager to convert persons to Christianity have never put up a determined

fight to uproot paganism from the Convert. Indeed they have tolerated it.

The retention by the Converts to Christianity of Paganism is primarily the legacy of the Jesuit Missions which were the earliest to enter the field in modern times. The attitude of the Catholic mission towards paganism has come down from the outlook and the ways and means adopted by the Madura Mission. This Mission was founded by an Italian Jesuit Father Robert de Nobili. He came to India in 1608. Having learned of the failure of Francis Xavier he worked out a new plan. He decided to follow the footsteps of the Apostle Paul who observed that he must bring all things to all men that he might save some. Fortified with this belief he went to the Court of Ferumal Naik King of Madura and founded the famous Madura Mission. The way he started is graphically told by Dr. J. N. Ogilvie in his 'Apostles of India' in the following passage:

“Through Madura there ran one day a striking piece of news. It was told how a strange ascetic from some far land had arrived, drawn to the holy city by its great repute, and that he had taken up his abode in the Brahman quarter of the city. Soon visitors flocked to the house of the holy man to see what they should see, but only to find that the Brahman's servants would not permit their entrance. 'The master,' they said, 'is meditating upon God. He may not be disturbed.' This merely helped to whet the people's desire and increase the fame of the recluse. The privacy was relaxed, and daily audiences were granted to a privileged few.

"Seated cross legged on a settee the Sanyasi was found by his visitors, conforming in every thing to Brahman usage. Over his shoulder hung the sacred cord of five threads, three of gold to symbolise the Trinity, and two of silver representing the body and soul of our Lord, and from the cord was suspended a small cross. Conversation revealed the Sanyasi's learning, and observation and keen inquiry certified to this frugal and holy life. One meal a day, consisting of a little rice and milk and acid vegetables, was all his food. Soon not only ordinary Brahmins came to see him, but nobles also; and a great bound in his reputation took place when, on being invited to the palace by the King, the Sanyasi declined the invitation lest on going forth the purity of his soul should be sullied by his eyes lighting upon a woman! Never was a holier saint seen in Madura. Where the life bore such testimony to his holiness, how could his teaching be other than true! His statement that he was a "Roman Brahman" of the highest caste was accepted, and to remove any possible doubts that might linger, an ancient discoloured parchment was produced, which showed how the "Brahmans of Rome" had sprung direct from the god Brahma, and were the noblest born of all his issues. To the genuineness of the document the Sanyasi

solemnly swore, and with open minds the people listened to his teaching.

“Book after book was written by the able and daring writer, in which he grafted a modified Christian doctrine on the Hindu stem. Most notable of all such efforts was the forging of a”Fifth Veda”to complete and crown the four Vedas received by Brahmans as direct revelations from heaven. It was an amazing piece of daring as bold and hazardous as it would be for a Hindu to forge for Christian use a fifth Gospel. Yet the forgery held its place for one hundred and fifty years.”

“Brahman disciples were soon freely won; baptisms became fairly numerous, though the identity of the rite with the baptism administered by earlier European Missionaries was disguised; and so far as outward tokens went, the new Missionary method was proving a success. Without a doubt progress was greatly facilitated by the highly significant concessions that were made to Hinduism, especially in connection with Caste. According to de Nobili, caste had little signification. To him it was in the main a social observance, and so regarding it he saw no reason for compelling his converts to break with their caste fellowship or observances. His converts retained the ' Shendi ' or tuft of hair which marked the caste Hindu, they wore a sacred cord indistinguishable from that of their Hindu neighbours, and they bore an oval caste mark on their brow, the paste composing or being made of the ashes of sandalwood instead of as formerly of the ashes of cow dung.

“For forty years de Nobili lived his life: a life of daily hardship, sacrifice and voluntary humiliation, such as has seldom been paralleled. On February 16, 1656, he died, having reached his eightieth year. Nearly one hundred thousand converts have been attributed to him, directly or indirectly, and allowing for much exaggeration their number must have been very great.

"In 1673, John de Britto, belonging to one of the noblest families of Portugal, sailed for India. He is now a saint in the Roman Catholic Church. William Robinson of the London Missionary Society and belonging to our own day said of him, "His eminence as a disciple, intrepid, selfless and enduring in all great qualities that add to the vigour of the Christian life, is assured.

“He and the Christian converts, after the disruption of the Kingdom of Madura and the establishment of petty Kingdoms, were mercilessly persecuted.

“Yet in spite of all that enemies could do, the worker went steadily on with his accepted duty, and wherever he journeyed the same tale of success was told. To the power of the message was added the charm of the

messenger, and his converts were numbered by thousands. When by his hands a prince of Marava, Tadia Tevar, was baptized, measures were quickly taken to secure de Britto's death. He was mercilessly done to death on February 4, 1693.

“Father Joseph Beschi, an Italian priest and successor to de Britto, reached India in 1707. Beschi adhered to the policy of the”Roman Brahmans,”but in his missionary practice differed considerably from his predecessors. De Nobili, so long as it had been possible, acted the part of a devout recluse, a holy Guru; de Britto had been chiefly the wandering Sanyasi, the holy pilgrim and in their personal life both had practised the greatest asceticism and simplicity. But Father Beschi followed a new line. If Hinduism had its ascetics, it had also its high priests, who lived in luxurious comfort, and whose outward surroundings were marked by pomp and circumstance. This was the line chosen by Beschi by magnificence he would dazzle the people. When he travelled it was a costly palanquin. In advance went an attendant bearing an umbrella of purple silk, at each side ran servants with gorgeous fans of peacock's feathers, and in the palanquin, upon a splendid tiger skin and clad in rich and picturesque robes, reclined the mighty Guru! But Beschi was no empty headed poseur. His method was adopted with a full understanding of the people and with many it worked well. Nor does his fame rest on these extravagances; it is based upon his wonderful scholarship. A born linguist he attained so complete a mastery over Tamil that he became the ablest Tamil scholar of his time. No native scholar was his equal.”High” Tamil as well as”Low”, the Tamil of the scholarly Brahman as well as the colloquial language of the people, were equally familiar to Beschi. Dictionaries, grammars, works of poetry and treatises in prose issued from his busy pen, and they are read and valued to the present day. When first issued they delighted the native world of Southern India. So charmed with his learning was Chanda Sahib, the Nabob of Vellore, that he appointed him to high office in the State, and for his support presented him with four villages in the Trichinopoly district, which brought in a revenue of 12,000 rupees. All this fame and material prosperity Beschi loyally used for the furtherance of the Mission. Its palmiest days were in his time, and its rapid decline, leading to its ultimate collapse, dates from about the period of Father Beschi's death, which occurred in 1742.”These Madura Missionaries, in their anxiety to present Christianity to the convert free from any Western customs that might give offence had tolerated among their converts several Hindu Customs as concessions to the converts. Among these concessions were the retention of the sacred thread and the mark on the forehead; the

marrying of children before they attained puberty; the refusal of the sacraments to females at certain times, bathing as a ceremonial purification, and other points; and the refusal to marry and dine outside caste. These were called the "Malbar Rites". They were abrogated on 12th September 1744, by the Bull *Omnium sollicitudinum* issued [f.34] By Pope Benedict XIV and since then every Roman Catholic Missionary is required to take an oath to obey this Bull. All the same the tradition remained that pagan ways and pagan beliefs were not incompatible with Christian faith.

It is no doubt true that a great obstacle in the way of the Missionaries in the 16th Century was not only the evil example shown by bad Europeans but also the dislike with which European customs were viewed by Hindus and Musalman alike. A wicked European of course caused Scandal, but a devout European, who ate beef and drank spirits, offended against Brahmanical and Mohammadan tenets and shocked native prejudices. Thus Christianity was despised as the religion of the ' Feringis ' as Europeans were contemptuously termed. To have cleansed the Christian Missionaries of these impurities and infirmities was very necessary and not only justifiable but commendable. But it was quite shameful and sinful for these Jesuit Missionaries in their zeal for conversion to have gone to the length they did namely, not to mind what the convert thought and did and how he lived so long as he was ready to be baptized, acknowledge Jesus as his saviour and call himself a Christian.

What was the attitude of the Luthern Mission which came into the field soon after the Madura Mission to this great question. Swartz the greatest missionary in India who by his piety became the peace maker between warring kings was not a protagonist of the view adopted by the Madura Mission. But did he believe that Caste and Christianity were two incompatible things and that a true Christian could not believe in Caste much less could he make it a plan of his life? Whatever was his view of the question he certainly did not carry on a campaign in support of it.

What about the Protestant Missions? What attitude did they take towards this question? They have first of all an excuse on their side to plead if they wish to. That they came late on the scene. So far as history goes there is truth behind the assertion that they were prevented from joining the field until 1813. This is due entirely to the attitude taken by the East India Company towards Mission work in their territories in India.

The attitude of all the European powers who went to India were in the beginning of their career greatly fired with an enthusiasm for the conversion of the Indians to the Christian Faith.

Speaking of the Portuguese they were of course the most resolute in their

propagation for Christianity and suppression of paganism. Albuquerque suppressed Suti within Portuguese India in 1510 and anticipated William Bentick by fully three hundred years. As soon as Francis Xavier called out in despair the aid of John III of Portugal for forcible conversion it was given. In the Dutch East Indies the Dutch Government which was a protestant power, similar enthusiasm was displayed and strong, if not drastic, measures were adopted. The principle of state aid for Christian propaganda was accepted in Ceylon right from 1643 when the Dutch occupied that island. The erection of temples and pagan pilgrimages were forbidden, Government appointments were reserved for Christians and non-attendance at religious schools treated as state offence. By 1685, 3,20,000 Cinhalese had yielded to these methods. The same religious fervour was shown by the East India Company. In 1614, an young Indian had been brought to London by the Captain of the Company's ship. The Company educated him at its own expense 'to be an instrument in converting some of his nation '. His baptism was performed at Poplar. The Lord Mayor of London and the Directors of the Company attended the baptism. King James I chose for him the name of Peter and the priest who baptised him presented him to the Audience as ' the first fruit of India '. In 1617 there took place in Surat the conversion of a Mahomedan. Thus the career of the Company began with conversions at both ends. In 1657 the Directors applied to the Universities of Cambridge and Oxford for a Chaplain 'the Company having resolved to endeavour the advance and spreading of the Gospel in India'. In 1698 the Company very readily accepted a clause in her Charter which required the Company's Chaplains 'should apply themselves to learn the languages of the countries, the better to enable them to instruct the Gentoos, who should be the servants of the Company or their agents, in the Protestant religion'.

Suddenly after 1698 the attitude of the Company seems to have undergone a significant though gradual change. While the Portugal and the Dutch Governments were going on with top speed the East India Company was slowing down. In the very year the Company seems to have been of two minds on this question. While it accepted an obligation to train its chaplains in vernaculars of India so as to make them potent instruments of propaganda it allowed a prayer to be drawn up for the Company which said 'that, we adorning the Gospel of our Saviour in all things, these Indian natives among whom we dwell, beholding our good works, may be won over '. This prayer continued to be offered, certainly till 1750. A close scrutiny of the wording of the prayer suggests if it does not avow the complete abandonment of the original idea of active proselytising. This

attitude of the Company soon became a matter of controversy. Friends of conversion were waiting for an opportunity to force the Company to give up this attitude. The Regulating Act of 1773 and Pitt's East India Act had put an end to a 'State disguised as a Merchant' and brought the Company the chartered agent of Parliament to carry on the Government of the Indian Territories. It was provided under the Act that the charter of the Company should be only for 20 years and should be renewed thereafter. The year 1793 was of immense importance since the revision of the charter of the Company was to fall due in that year.

To those who favoured the diffusion of Christian knowledge the task seemed quite easy. Wilberforce, who was in charge of the matter had secured the support of important persons in Parliament. He had obtained Archbishop Moore's blessing, and still more important he had won a promise of support from the minister in charge of the East India Company's Charter Bill. As a preliminary to the passing of this Bill matters to be incorporated in the charter were put in the form of resolutions to be passed by the House of Commons. One of the resolutions passed ran as follows:

"That it was the peculiar and bounden duty of the British Legislature to promote, by all just and prudent means, the interest and happiness of the inhabitants of the British Dominions in India; and that for these ends such measures ought to be adopted as may generally tend to their advancement in useful knowledge and to their religious and more improvement."

"Be it therefore further enacted, that the said Court of Directors shall be and are hereby empowered and required to appoint and send out, from time to time, a sufficient number of fit and proper persons for carrying into effect the purposes aforesaid, by acting as schoolmasters, missionaries, or otherwise every such person, before he is so appointed or sent out, having produced to the said Court of Directors, a satisfactory testimonial or certificate from the Archbishop of Canterbury, or the Bishop of London for the time being, or from the Society in London for the promotion of Christian Knowledge, or from the Society in Scotland for propagating Christian Knowledge, of his sufficiency for these purposes.

And be it further enacted, that the said Court of Directors are hereby empowered and required to give directions to the governments of the respective presidencies in India, to settle the destination and to provide for the necessary and decent maintenance of the persons to be sent out as aforesaid; and also to direct the said governments to consider of and adopt such other measures according to their discretion, as may appear to them most conducive to the ends aforesaid." It was largely due to the support

of Dundas that the House accepted the resolution without demur. Wilberforce was deeply moved. "The hand of Providence", he wrote in his journal, 'was never more visible than in his East Indian Affair,' This confidence was premature. Because, on the third reading of the Bill, the clause was struck out with the consent of Dundas. Wilberforce wrote his friend Gisborne "My clauses thrown out.... Dundas most false and double...."

This change of front was brought about by the Directors of the East India Company. The East India trade was a monopoly of the Company and no Englishman could enter the territories of the East India Company in India without license from the Directors of the Company and any Englishman found in the territories of the Company without a license was liable to be deported. The Company did not take long to realize what the effect of the new clause would be. It knew that the clause would require them to open the gates of India to the flood of the Missionaries and their propaganda. Should the Missionaries be allowed a free hand, was the question of the hour. As was natural this became a subject of a most interesting, instructive and bitter controversy and those who care to know it in its details may usefully refer to the pages of the Edinborough Review and the of the day.

There were three parties to this controversy. There were the Directors of the East India Company whose primary interest was to protect its shareholders who were clamouring for dividends. The second party to the controversy was the English Middle Class which was living on the East India trade and whose sons were finding new avenues for lucrative careers in the territories. Thirdly there was the Church Missionary Society formed in the year. for the purpose of spreading the Christian faith. The interests of the first two coincided. They were for the maintenance of the Empire and therefore wanted peace and tranquility. The third did care for peace but was keen on the substitution of Indian superstition by the Christian faith. The first made a powerful combination and obliged all the forces against the third. The result was that they triumphed and the Church Missionary Society lost. The arguments advanced by the controversialist on the triumphant side are of course the most important and the most instructive part of the controversy.

To the argument that the propaganda in favour of the Christian faith should begin at once, that it was wrong to hold that the truth though sacred should be doled out in such a way and in such bits as to avoid all risk, the reply given by Sydney Smith was a stunning reply. This is what he said:

"When we consider for how many centuries after Christ, Providence allowed the greater part of mankind to live and die without any possibility of their attaining to the knowledge of the sacred truths by any human exertion, we must be satisfied that the rapid and speedy conversion of the whole world forms no part of the scheme of its Almighty Governor, and that it can give no offence in His eyes if we do not desert our domestic duties and expose the lives and worldly happiness of multitudes of our fellow country men to hazard in our attempt to their conversion."

* * *

"The Directors would be doing their duty neither to the shareholders nor the British Nation if they allowed 'itinerant tinkers to preach the natives into insurrection..... The natives must be taught a better religion at a time and in a manner that will not inspire them with a passion for political change.'. Our duties to our families and country are set before us by God Himself. We are not at liberty to desert them in order to give a remote chance of conferring greater benefits on strangers at a distance."It is arguments such as those which prevailed with Parliament and led to the rejection of the Clause in 1793. Wilberforce twitted members of Parliament by reminding them with, their Christianity was not a religion of convenience but it was a religion established by law. But as has been well pointed out,"for the major portion of those 'counted ' .in the eighteenth century the religion accepted by the State and Society as a convenience was something to be used with fact and discretion at home. There was no need to diffuse it recklessly abroad. The general atmosphere, as has often been pointed out, was remarkably like that of Augustan Rome. To the statesman, thinking imperially, all religions were equally useful, each in its proper place.' [f.35]

The attempt to open the door to the Missionaries failed and the Missionary was shut out from India till 1813. Not only was he shut out but the Company's Government kept a strict vigil upon the activities of such stray missionaries who contrived to go to India without their license.

In 1793 Dr. Carey went as an interloper without license. As he was not allowed to enter Calcutta being without license, he made Serampore, 14 miles away from Calcutta as his base of operation. Serampore was a Danish settlement and the Danes had placed no restrictions on missionaries or mission propaganda. On the contrary the Governor of Serampore actively helped them. Carey and his Mission was always suspect in the eyes of the Company's Government. In 1798 the Serampore Mission decided to engage four missionaries who arrived in the year 1800. They went to reside in the

Danish settlement of Serampore. As a matter of fact the Governor General had nothing to do with them. But the unconcealed residence of those unlicensed enthusiasts was too much for the Company's Governor General and Lord Wellesley wrote to the Governor of Serampore, "Would His Excellency see to the expulsion of these interlopers who might at any moment violate the territories of the British East India Company", to which the Danish Governor replied that he would do nothing of the kind [f.36]. Similar action was taken in 1806 when Captain Wickes brought two more Missionaries in the '*Crieterion*' which anchored off Calcutta. Sir George Barlow was then the Governor General. He took a most extraordinary action to prevent the landing of these two missionaries. He ordered that the Captain be not given his clearance papers unless he agreed to take back the two missionaries. Although they had gone to live in Serampore and were in fact under the protection of the Danish Crown. This was not only a more unreasonable attitude towards missionaries but it was also an attitude which could not but be regarded as hostile [f.37].

The Vellore Mutiny among Indian Soldiers which took place in 1806 was quite erroneously attributed to missionary propaganda and Sir George Barlow in a panicky condition proceeded to put the following restrictions on the activities of the Serampore Missionaries:

1. The Missionaries remain at Serampore.
2. They must not preach openly in the bazar.
3. Native converts might preach provided they are not sent forth as emissaries from Serampore. The vehemence with which the Government of Bengal came down upon the Serampore Mission in 1807 for issuing a tract on Islam in which quite inadvertently the prophet Mahomed was called an imposter also furnishes further evidence of the attitude of hostility which Government of the Company bore towards the Missionaries.

The Government of Bengal refused to be satisfied with the apologies of Dr. Carey and insisted upon the transfer of the Press from Serampore to Calcutta in order that Government may be in a better position to control the literature issued therefrom. The news caused dismay for it meant the disruption of the mission. As usual, the Governor of the Danish settlement came to their rescue and told the frightened Serampore Missionaries that he would fight their battle if the Government of Bengal forcibly removed the Press to Calcutta. Subsequently matters were settled and the order was withdrawn³. But the fact remains that the Government of the Company was not a friend of the Missionaries.

So much for the excuse which they can legitimately plead. But what

attitude did they take when they were allowed after 1813 to operate in the field? Did they take the line that caste must go from the thought and life of the Convert? The earliest pronouncement of a Protestant Missionary does not warrant an affirmative answer.

Missionaries intolerating caste : Dr. Heyne in 1814 wrote: Missionaries, in many instances, have fallen into a mistake of a very injurious nature to their rapid or even ultimate success. In converting a Hindu to Christianity, they oblige him to adopt a line of conduct by which he loses his caste; this, in India is considered such a disgrace. that it must present a powerful obstacle to conversion. But the political division of the Hindus is no part of their religious tenets, though it has been so mistaken by the most enlightened. In giving to the Hindus the Christian religion, allow them to retain their caste, and they could be found to embrace it without reluctance, and in considerable numbers.” [f.38]

But I do not wish to judge the attitude of the Protestant Missions to so important a question from so stray a pronouncement of a solitary individual. There is evidence to show that the Protestant Missions were once early in their career called upon to make up their mind on this important issue so that it can be said that the view maintained by the Protestant Mission is a considered view. The time when this issue was discussed seriously was the time when Rev. Heber was appointed the Bishop of Calcutta. He assumed his duties in the year 1823. During his episcopate he toured extensively in the whole of India and in Ceylon. In the course of his tour, he became aware of the sharp conflict of opinion among Protestant Missionaries to the question of toleration of caste among converts. He decided to resolve this difference. How he went about the business is told in the words of Mr. Kaye who has succinctly narrated it:

"There was strife, therefore, among the missionaries, which Heber was anxious to allay. The question had been brought before him, before he quitted Bengal. He had there sought to arm himself with ail the information that he could obtain, respecting not only the practice of the earlier Protestant missionaries, but the true nature of the institution of Caste. There was then in Bishop's College a Christian convert, known as Christian David. He had been a pupil of Schwartz; and was truly a remarkable man. No less distinguished for his intelligence than for his piety, he was regarded by the good Bishop as the one of all others to whom he might most expediency refer for the solution of his doubts. Heber drew up, therefore, a series of questions, which he submitted to the native Christian, and received from him a series of replies, stated not only in excellent English, but with a force and precision which could not be easily

surpassed.

“First, with regard to the nature of Caste, it was declared by Christian David, that it was, among the natives of Southern India,”purely a worldly idea”--”not connected in their minds with any notion of true or false religion,”that the native converts, drawn from the higher castes, were disinclined to intercourse with low-caste proselytes, not on religious or superstitious grounds, but simply for social reasons; that there were certain distinctions between high-caste and low-caste persons not by any means ideal, and that these distinctions were not to be gilded over merely by the acquisition of worldly wealth. He specially set forth that low-caste people indulged habitually in an unseemly mode of speech—frequently using coarse or indecent expressions very revolting to the feelings of high-caste men; and that they were altogether less decorous and self respectful in their way of life. Learning, he said, might elevate them; and if a Pariah became learned he was called a pundit, and respected by the Church; and then his brother converts would associate with him, but still they would not”from worldly fear or pride”eat with him from the same dish. From the days of Ziegenbalg downwards they had been wont to sit at Church in two separate divisions, and had communicated separately at the Lord's table, drinking out of the same cup, but the high-caste converts drinking first. As a proof, however, that these were regarded as merely worldly distinctions, Christian David said that high-caste and low-caste, among the Christian congregations of the South, were buried in a common burial ground, and took part promiscuously in the funeral ceremonies,”as if with the consciousness, contrary to the heathen nations, that death levelled all distinctions.”

“Rather by mild remonstrance and persuasion than by the enactment of any stringent rules, which might have proved great obstructions to Christianity, the elder missionaries had sought to mitigate the evil; and Christian David declared that under the ministration of Schwartz the evil had considerably diminished. But Mr. Rhenius, of the Church Missionary Society, a truly conscientious and devout Christian, had taken other views of the duties of Christian teachers, and had gained over to his opinions the younger missionaries in the South; so that they agreed, as I have said, among themselves, to make the total repudiation of Caste, even in its mere social aspect, an essential condition of admittance to the Christian Church; and they had, moreover, spoken and preached against the elder missionaries—even the most venerated of their predecessors—denouncing them as”corrupters of the Gospel”for having permitted such things to soil the purity of Christianity.

Of all this Christian David spoke with profound regret. His own opinions were naturally inclined towards the doctrine and the practice of his old master Christian Schwartz. The mild interference and affectionate advice of the Bishop might, he thought, dispose the hearts of the younger missionaries towards greater toleration and forbearance.

“Very earnestly and very conscientiously did Heber revolve this important subject in his mind. It is in accordance with all that we know of the character of the man, that he should have inclined towards the more conciliatory practices of the elder missionaries. But he deferred any final decision, until the opportunity should arrive for the collection of further information and the delivery of a sounder and fuller judgment on the spot. When, therefore, he visited the Southern Presidency, he wrote letters of inquiry to some of the principal missionaries and instituted a select committee of the Christian Knowledge Society for the purpose of making further investigation into the subject. From one letter written to the Rev. D. Schrievogel, though little more than a series of questions, the bent of his opinions may be derived. It appeared to him, after much deliberate consideration, that Caste, as represented to exist among the Christian converts on the Coast was in reality an institution differing little in its essential features from the social exclusiveness prevailing in Christian countries. Is there no such thing, he asked himself, as Caste in Europe? Is there no such thing as Caste in America? Do not the high and the low sit apart in our English churches? Do not our well-dressed high-caste folks go up first to the altar to communicate? Do high and low sit down to meat together—do their children attend the same schools? Are there no Pariahs amongst us? In other civilized countries, is there not a prevailing sense of Caste, apart from all associations of worldly distinction? Does not the Spanish hidalgo wear his Caste bravely beneath his threadbare cloak? Is the wealthiest mulatto fit companion for the poorest white? It may be called blood, or anything else in another; but in its essential features the one thing differs but little from the other. It is an intelligible and appreciable Christian principle that all men in the sight of God are equal. But it is equally certain that all are not equal in the sight of Man; and it is a fair presumption that God never intended them to be equal. Social distinctions exist every where; and if, argued the Bishop, the distinctions which exist among the converts on the Southern coast are merely social distinctions, why should we endanger the success of our efforts by endeavouring to enforce a law of equality, which is maintained among no other classes of men?

“In this wise thought Bishop Heber. He had said from the first, that if he

could be of any service to the Christian cause in India, it would be as a moderator—that by a conciliatory course, smoothing down the asperities of the over-zealship, he might hope to do much good as the chief missionary; and now he believed that it was his duty to cast in the weight of his authority upon the side of those who had resolved not to pour too much of new wine into the old bottles."

This view was more forcefully expressed by another Protestant Missionary Rev. Robert Noble who came out to India in 1841 and was in charge of the Church of England Mission Work in Masulipatam made it a rule to exclude Pariahs, leather workers and scavengers from his school. Defending himself against the charge of introducing caste in the Christian fold he defended himself in the following terms: "The humblest and most pious Christian parents in England would not allow their sons, much less their daughters, to be educated with their footmen, with their cooks and their scullery maids. Perhaps I was punished oftener by my pious father for stealing away to play with the boys of the village than on any other account; while in the best ordered Christian family I have ever seen, the children were not allowed to converse with the servants or to descend the second step of the stairs into the kitchen. My father would not have allowed us to mix with the cook's or stable boy's children; nor can I see it right to require of Brahmins that before we will teach them the Gospel, they must sit down on the same form with the pariah and the sweeper. The requirement is to me unreasonable and unchristian."

It is true that many wise and devout Christians since Heber's time believed that he was altogether wrong; and that Bishop Wilson at a later period reversed his decision emphatically pronouncing against all toleration for the inequities of caste on the ground that it was an ingrained part of Hindu religion. But the fact remained not only the official but also the general view of the Protest Missions [f.39] in India regarding the place of caste in Indian Christianity.

Thus all Missionaries agreed that Christianity should be made easy in order that it may spread among India. On this point there seems to be difference of kind among Catholics, Lutherans or Protestants. Such difference as exists is one of degree. If there exists Caste and other forms among Christian converts it is the result of this policy — policy of making Christianity easy. In adopting this policy the Missionaries never thought that some day, somebody would ask them 'What good is Christianity for a Hindu if it does not do away with his Caste'. They misunderstood their mission and thought that making a person Christian was the same thing as making him a follower of Christ.

V

Let us take the second part of the question. Has Christianity been able to save the convert from the sufferings and the ignominy which is the misfortune of every one who is born an untouchable? Can an untouchable after his conversion to Christianity take water from a public well? Are his children admitted to a public school? Can he enter a hotel or tavern which was not open to him? Can he enter a shop and buy things from inside? Will a barber shave him? Will a washerman wash his clothes? Can he travel in a bus? Will he be admitted in Public offices without compunction? Will he be allowed to live in the touchable quarters of the village? Will the Hindus take water from him? Will they dine with him? Will not the Hindu take a bath if he touches him? I am sure the answer to every one of these questions must be in the negative. In other words conversion has not brought about any change in the social status of the untouchable convert. To the general mass of the Hindus the untouchable remains an untouchable even though he becomes a Christian.

The question is, why has Christianity not succeeded in raising the status of the untouchable convert? What are the reasons for this failure? I am not sure that my reasons will be accepted by all those who are interested in the problem. But I will state them for what they are worth. To understand and appreciate what I am going to say I must begin by pointing out that a change in the social status of the convert can be the result of a two-fold change. There must be a change in the attitude of the Hindus. Secondly there must be a change in the mentality of the convert. Status is a dual matter, a matter *inter se* between two persons and unless both move from their old position there can be no change. What has been done by those who are in charge of Christian endeavour to make the parties move on? A consideration of this question will enable us to understand why Christianity has failed to raise the status of the untouchable convert.

Let us consider the question in parts. What has Christianity done to make the Hindus move on? I find they have done nothing. They seem to be depending upon an idea doing the miracle. The faith in an idea doing the work has been well expressed by the late Duke of Argyle when he said:

“There is no method of reform so powerful as this. If alongside any false or corrupt belief, or any vicious or cruel system, we place *one incompatible idea*,—then without any noise of controversy or clash of battle, those beliefs and customs will wave an idea. It was thus that Christianity, without one single word of direct attack, killed off one of the greatest and most

universal curses of the pagan world,—the ever deepening curse of slavery.”
[f.40]

Whatever may be the importance of an idea, I am sure, history does not bear out the conclusion of the Duke of Argyle. It is debatable question whether the end of slavery in the Roman Empire was due to the influence of Christianity. It is beyond doubt that serfdom continued in Europe although Christianity was an established institution for several hundred years. It is an incontrovertible fact that Christianity was not enough to end the slavery of the Negroes in the United States. A civil war was necessary to give the Negro the freedom which was denied to him by the Christians.

The dependence of those in charge of Christian endeavour upon planting of an idea and leaving it to work a miracle is therefore one of the reasons why the untouchable has remained an untouchable notwithstanding his Christian faith.

Let me take the other part of the question. Does Christianity inspire the untouchable to move on? I am constrained to say that (it) does not. So far as I am able to see, Christian preaching to the untouchable is less centered on 'practical' reforms and more centered around the development of Christian social attitudes. Christians who desire the conversion of the untouchables insist on regarding Christianity as purely "spiritual". To teach that Christians have an obligation to love others is no doubt very valuable. But to stop there and argue that spiritual life expressed in a social attitude is quite unrelated to material life and Christians can have nothing to do with it, is in my judgment to preach an empty doctrine. What is the use of a daily exhortation to a wrong doer to be good and just if the exhortation is not followed by action to make the wrong doer just and good. The Christian Missionaries have never thought that it was their duty to *act* and get the injustice that pursues the untouchables even after his conversion to Christianity removed. That Missions should be so inactive in the matter of the social emancipation of the untouchable is of course a very sad thing. But far more painful is the inaction of the untouchable Who becomes a convert to Christianity. It is the saddest thing. He continues to suffer from the Hindus the same disabilities which were his lot before conversion. It is an extraordinary thing that the movement for the redress of wrongs is carried on by the untouchables who have not become converts to Christianity. I have never noticed the untouchable Christians meeting in Conferences for the redress of their social wrongs. That they have grievances is beyond question. That there are many who are educated enough to lead them in their struggle is also well known. Why is it then there has been no movement for the redress of their wrongs?

I see three reasons why the Christian untouchables have failed to raise a movement.

The first reason is to be found in the complete absence of desire on the part of the educated among the Christians to take up the cause of the community and fight for it. This is due in my judgment to the fact that within the Christian Community the educated class and the mass has no kinship. The Christian Community is a composite community. In some places it is divided into touchables and untouchables. In all places it is divided into high class and low class. The educated class is largely drawn from the touchable or the higher class. This educated class being detached from the lower or the untouchable class of Christians is not charged with the wants, the pains, cravings, desires, aspirations of the latter and does not care for their interest. The untouchable Christians are therefore leaderless and therefore unable to mobilize for the redress of their wrongs.

The second reason why there is no movement among the untouchable Christians is due to certain faults in the mental make-up of the convert. The mental make-up of the untouchable Christian is characterized by a complete absence of any urge to break his bonds. What is the reason for this absence of any urge in the untouchable Christian? It seems to me that there are two reasons which account for this. One reason is to be found in the antecedent of the untouchable who becomes a Christian. An untouchable becomes a Christian for some advantage or he becomes a Christian because he *likes* the teaching of the Bible. But the case is very rare of an untouchable becoming a Christian because of a positive discontent or dislike of the Hindu religious teachings. The result is that Christianity becomes only an addendum to his old faith. It does not become a substitute for his old faith. He cherishes both and observes them on occasions appropriate to each.

The second reason for the absence of any urge is due I am afraid to the teachings of the Christian Church. The Christian Church teaches that the fall of man is due to his original Sin and the reason why one must become Christian is because in Christianity there is promise of forgiveness of sins. Whatever may be the theological and evangelistic basis of this doctrine there is no doubt that from a sociological point of view it is a doctrine which is fraught with disaster. This Christian teaching is a direct challenge to sociology which holds that the fall of man is due to an unpropitious environment and not to the sins of man. There is no question that the sociological view is the correct view and the Christian dogma only misleads man. It sets him on a wrong trail. This is exactly what has happened with the untouchable Christians. Instead of being taught that his fall is due to a

wrong social and religious environment and that for his improvement he must attack that environment he is told that his fall is due to his sin.

The consequence is that the untouchable convert instead of being energized to conquer his environment contents himself with the belief that there is no use struggling, for the simple reason that his fall is due to the sin committed not by him but by some remote ancestor of his called Adam. When he was a Hindu his fall was due to his Karma. When he becomes a Christian he learns that his fall is due to the sins of his ancestor. In either case there is no escape for him. One may well ask whether conversion is a birth of a new life and a condemnation to the old.

VI

Does the Indian Christian Community count in India? What importance, what influence does it have in settling the affairs of the country. It ought to have importance and influence both in the country and society. It is undoubtedly the most educated and enlightened community in India. Not only the percentage of literacy among Indian Christians is relatively larger than in many other communities in India but the University Graduate, Doctors, lawyers are far in excess than can be found in communities which are vastly superior to them in number. Not only the men are educated but also women are educated. With all this light and learning the Christians as a community, it must be said, counts for very little—if at all—in the affairs of India. There may be difference of opinion on this. But this is the conclusion I have arrived at after as close and as impartial a study as I have been able to make. My opponent might say that I am mistaken or that I am misrepresenting. But I take comfort in the fact that there are some Indian Christians who share my view and also my regret. Here are two letters which I take from *Young India*.

The first is from an Indian Christian to Mr. Gandhi and published in the *Young India*, August 25, 1921. This is what he says:

“I am sorry to say that you do not take us Indian Christians as the people of India, as I have seen many times *Young India* mentioning Mussalmans, Hindus, Sikhs, etc., but omitting the Christians.

“I should like you to believe that we Indian Christians are also people of India, and take much interest in India's own affairs.”The following is the comment made by Mr. Gandhi on this letter. He says:

“I assure the correspondent and other Indian Christians that noncooperation is no respecter of creeds or races. It invites and admits all to its fold. Many Indian Christians have contributed to the Tilak Swaraj

Fund. There are some noted Indian Christians as non-cooperators in the front rank. There is constant mention of Musalmans and Hindus, as they have hitherto regarded one another as enemies. Similarly there always has been some cause when any race has been specially mentioned in these columns." Apart from the question whether it is true that many Indian Christians have contributed to the Tilak Swaraj Fund and whether it is true or not that noted Christians were front rank non-cooperators, the answer given by Mr. Gandhi to the main question of the correspondent is incorrect if not misleading. If Musalmans are mentioned only because they regard the Hindus as their enemies why were Sikhs mentioned? Surely they did not regard the Hindus as their enemies. Why were they mentioned? The Sikhs were not only mentioned but were treated as an important party without whose active cooperation it was felt that the struggle for Swaraj could not be carried on. And be it remembered that the cooperation given by the Sikhs was not given unconditionally. As is well known the Sikhs had put down two conditions in return for their cooperation [f.41]. One condition was that in designing a national flag for India the Sikh colour which they said was black should find a place in it. Their second demand was that they should be guaranteed by the Congress representation in the legislature. It is thus clear that Sikhs were not mentioned but placated. But the Christians were not even mentioned. Now there are only two explanations for not mentioning the Indian Christians. Either they were with the Congress in the struggle for Swaraj or that they were not worth mentioning as being too insignificant. That they were not with the Congress in this struggle for Swaraj cannot be gainsaid. The following letter written by an Indian Christian written to the Editor of the *Indian Social Reformer* and reproduced in the *Young India* expresses the attitude of the Indian Christians to Swaraj:

"We have positive evidence to show that as early as the second century of Christian era there were Christian settlements in India. Such being the case, Christians in India can claim to have existed in India some centuries earlier than the very birth of Islam. How comes it then that the Indian Christian born and bred on the soil of India and of ancestry purely Indian, has not learnt to cherish the ancient history of this country, its culture and to look upon its people, however different in their religious persuasions, as his bone and of his flesh? Whence is it that unlike him Hindu or Mahomedan fellow citizen he has not watched for, aspired to and eagerly welcomed every stage that adds a cubit to the cultural, social or political statute of his motherland. Why is it that *Vande Mataram* is a national outpouring of the Hindus and Mahomedans only and till now ignored by the Indian

Christian?

Again how comes it that both Hindus and Mahomedans regard the Indian Christian sentiment towards their aspirations as lukewarm if not positively hostile and conversely why is it that the ever-growing height of the national spirit in India makes the Indian Christian feel dwarfed and helpless and suspicious of his security in the future.” [f.42]

Notwithstanding Mr. George Joseph, K. T. Paul, and Dr. S. K. Datta there is no doubt that the Indian Christian Community far from taking active part in the struggle for Swaraj was really afraid of it and that this letter depicts truly the prevailing attitude of the Indian Christians. The reason why the Indian Christians were not mentioned along with the Musalmans and the Sikhs is therefore clear.”The omission to mention them is certainly not due to their being friends of Swaraj. The only conclusion that one can draw for such a omission is that they did not count. It is a sad thing that so enlightened a community should have no importance and no influence in the affairs of the country.

What can be the reasons for such a position? The most obvious reason is of course the smallness of its numbers. The weight of its numbers is too small to make its existence felt as a force in public life as can be the case with the Musalmans or with the Depressed Classes. But this cannot wholly account for their insignificance. There must be other factors to account for this. I see two.

One is this. The Indian Christians are living in sheltered waters. They are, at any rate, a large majority of them are living in the laps of the missionaries. For their education, for their medical care, for religious ministrations and for most of their petty needs they do not look to Government. They look to the Missions. If they were dependent upon Government they would be required to mobilize, to agitate, educate, and organize their masses for effective political action. For without such organization no Government would care to attend to their needs and their requirements. They are not in the current and not being in the current they care not for public life, and therefore no recognized place in the public.

The second reason is that the Indian Christian is a disjointed—it is a better word than the word disunited—Community. All that it has in common is a common source of inspiration. Barring this one thing which they have in common everything else tends to keep them apart. Indian Christians like all other Indians are divided by race, by language and by caste. Their religion has not been a sufficiently strong unifying force as to make difference of language, race and caste as though they were mere distinctions. On the contrary their religion which is their only cement is

infected with denominational differences. The result is that the Indian Christians are too disjointed to have a common aim, to have a common mind and to put a common endeavour. To an Indian Christian from Tamil, a Hindu from Tamil is much nearer than an Indian Christian from the Punjab; An Indian Christian from U.P. feels greater kinship for a Hindu from U.P. than he does for an Indian Christian from say Maharashtra. In short, the term Indian Christian is just a statistical phrase. There is no community feeling behind this phrase. Indian Christians are not bound together by what is consciousness of kind which is the test of the existence of a community.

I do not know what Indian Christians will think of what I have said of the weaknesses which infect their life. One thing I can say. It is this--I am deeply interested in Indian Christians because a large majority of them are drawn from the untouchable classes. My comments are those of a friend. They are not the strictures of an adversary. I have drawn attention to their weaknesses because I want them to be strong and I want them to be strong because I see great dangers for them ahead. They have to reckon with the scarcely veiled hostility of Mr. Gandhi to Christianity taking its roots in the Indian Social structure. But they have also to reckon with militant Hinduism masquerading as Indian Nationalism. What this militant Hinduism will do to Christians and Christianity can be seen from what happened at Brindaban very recently. If newspaper reports are true [f.43] a crowd of mild Hinduism quietly went and burned down the Mission buildings in Brindaban and warned the missionary that if he rebuilt it they would come and burn it down again?! This may be the solitary instance of misguided patriots or this may be just a piece of what the Hindus are planning to get rid of Christians and Christianity. If it is the shadow of events to come then Indian Christians must be prepared to meet them. How can they do that except by removing the weaknesses I have referred to? Let all Indian Christians ponder.

ESSAYS ON UNTOUCHABLES AND UNTOUCHABILITY: SOCIAL

Contents

- Chapter 1 : Civilisation or felony
- Chapter 2 : The house the hindus have built
- Chapter 3 : The rock on which it is built
- Chapter 4 : Touchables v/s untouchables
- Chapter 5 : The curse of caste

Social

(Besides the consolidated scheme on "Untouchables or children of India's Ghetto" included in Book I in this Volume, there are several other essays by Dr. Ambedkar which deal with the subject of 'Untouchables and Untouchability'. These essays are divided into three categories viz., Social, Political and Religious. In Book II, five essays have been included under "Social".)

CHAPTER 1

CIVILISATION OR FELONY

- I. Another cross section view of India's population.
- II. Sunken classes seen through it : (a) Primitive Tribes, (b) Criminal Tribes and (c) Untouchables.
- III. Effect of Hindu Civilisation on the condition of these classes.
- IV. Difference in the problems of these classes.

The population of India is generally classified on a linguistic or on religious basis. These are the only two ways of classifying the people of India, which have been persistently in vogue for a long time. The effect is that outsiders get the impression that, what is of interest and importance to know about the peoples of India is the religions they profess or the languages they speak. Limited by this interest, they remain content with a knowledge they get about the religions and languages that are prevalent in

India. All that the outsider cares to hold in his head is that, in India there are people who are either Hindus or Mahomedans. If he is interested in religion or that there are people in India some of whom speak Marathi, some speak Gujarathi, some Bengali and some Tamil, etc.

Of the two ways of classifying people of India the religious classification is the one which is more impressive and arresting for the foreigner. He is more interested in the religions than in the languages. But even he is not aware of all the religious communities in India. He knows only of Hindus and Mahomedans. He sometimes hears of the Sikhs, very seldom of Christians although they are a growing community and never of the Buddhists who are of course non-existent so far as India of today is concerned* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_1.

The impression of the foreigner is that there are only Hindus and Musalmans in India and that there are none others worth bothering about. That this should be his impression is quite natural. The air is filled with the din and noise of the Hindu-Moslem conflict. How grave the conflict is, can be seen from the number of Hindu-Moslem riots that have taken place in recent years and the casualties and deaths that resulted from them.

But this struggle is a struggle for establishing an empire. There are Hindus who are agitating for establishing in India a Hindu Raj with Mahomedans as subject only. There are Mahomedans who are dreaming of Pan Islamism and of making India a part of a Muslim Empire with a choice for the Hindus between the sword and the Koran. In between these two extremists, there are sober persons who are for a state in which both Hindus and Muslims can live as equal partners. Whether the extremists will succeed or the moderates will succeed time alone can show. In the meantime the extremes in both the camps are making headlines by their blood baths. But, be that as it may, I venture to think that there are many who will not feel much interest in this struggle between the Hindus and the Mahomedans. After all it is a struggle for mastery for dominance.

It is a struggle for liberation. It is a struggle for establishing an empire of one over the other. They will be more interested in the struggles of the down trodden, of those who are fighting to obtain the title deeds to respectable humanity. In describing the old quarrel between the Whigs and Tories in England, Francis Place in describing the political policy of the Whigs said, they were out to crush the king on the one hand and the people on the other hand and establish the aristocracy of the governing class.

Those Hindus and Musalmans who are now fighting have the same policy in Indian politics. They want to establish their classes from them as the governing body. The masses whether of the Hindus or of the Musalmans are merely used for establishing the ascendancy of the classes. This struggle that is going on is really a struggle of the classes. It is not a struggle of the masses.

Those who are interested in the struggle of the masses must learn to look at the population of India from another point of view. They must cease to look at it purely from the point of view of religion. They must look at the population of India from the social and economic point of view. This does not mean that one need not care to know how religion has affected the economic and social life of the people of India. Indeed no study of the Indian people, be they Hindus or Musalmans, can give an adequate picture of their life if religion is kept out of consideration. Because religion is supreme in India as was the Roman Catholic Church in the Middle Ages in Europe. Bryce mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. [Essay on Untouchables and Untouchability_Social.htm - _msocom_2](#) has described the dominance of the Church over the lives of the people in terms that are worth recording "A life in the Church, for the Church, through the

Church; a life which she blessed in mass at morning and sent to peaceful rest by the vesper hyme; a life which she supported by the constantly recurring stimulus of the sacraments, relieving it by confession, purifying it by penance, admonishing it by the presentation of visible objects for contemplation and worship, this was the life which many of the Middle Ages conceived of as the rightful life of the man; it was the actual life of many, the ideal of all"

The dominance of religion on the life of the people of India today is no whit less than the dominance of the Church over the lives of the people in the Middle Ages. It would therefore be a mistake to leave religion out of consideration. But it is equally true to say that a purely religious point of view would give only a superficial picture. What is important to know is how the masses and the classes in India live? What are the social and economic terms of their associated life? To what extent are these influenced by religion? The answer to this question is given by the condition in which we find certain classes who fall within the Hindu fold.

II

It is a pity that Prof. Max Muller did not visit India. On seeing the contrast between theory and practice he might have explained the contrast. For the present the contrast remains a riddle.

This is so in spite of the doctrine of Bramha, asserted by the Brahmins to be residing and pervading every human being. If there is Bramha in a Brahmin so also it is in a Primitive man, in a Criminal Tribes man and so also in an Untouchable? How are these two facts to be reconciled the theory of Bramha and as against it the existence of the Primitive Tribes, the Criminal Tribes and the Untouchables?

This sunken humanity falls into three distinct categories. One such category is comprised of people who are called Primitive Tribes. Communities listed as Criminal classes form a second and separate category and the third category is the one, which covers what are called the Untouchables.

The total population of persons who fall into these three categories is by no means small. The population of the Primitive Tribes in India according to the Census of 1931 comes in round figures to 25 millions. The total population of the Criminal classes now listed as Criminal is somewhere about 41/2 millions. The total population of the Untouchables according to the Census of 1931 is 50 millions in India as a whole. The total of these classes comes to 791/2 millions. And the question is what is the position of these 791/2 million souls?

First as to the Primitive Tribes. In what state of civilization are they?

The name Primitive Tribes is expressive of the present state of people who are called by that name. They live in small-scattered huts in forests. They live on wild fruits, nuts and roots. Fishing and hunting are also resorted to for the purpose of securing food. Agriculture plays a very small part in their social economy. Food supplies being extremely precarious they lead a life of semi-starvation from which there is no escape. As to clothes they economise them to a vanishing point. They move almost in a state of complete nakedness. There is a tribe which is known as "Bonda Porajas" which means "naked Porajas". Of these people it is said that, the women wear a very narrow strip which serves as a petticoat almost identical with what is worn by the Momjak Nagas in Assam, the ends hardly meeting at the top on the left thigh. These petticoats are woven at home out of the fibre of a forest tree. Girls wear a fillet of beads and of palmyra leaf and an enormous quantity of beads and neck ornaments extremely like those worn by many Komjak women. Otherwise the women wear nothing. The women shave their heads entirely..... Of the Chenchus, a tribe residing near Farhabad in the Nizam's Dominions it is said that "their

houses are conical, rather slight in structure made of bamboos sloping to the central point and covered with a thinnish layer of thatch..... They have very little indeed in the way of material effects, the scanty clothes they wear, consisting of a langoti and a cloth in the case of men and a short bodice and a petticoat in the case of women, being practically all, besides a few cooking pots and a basket or two which perhaps sometimes contains grain. They keep cattle and goats and in this particular village do a little cultivation, elsewhere subsisting on honey and forest produce which they sell". Regarding the Morias another Primitive Tribe, it is stated the men generally wear a single cloth round the waist with a flap coming down in the front. They also have a necklace of beads and when they dance, put cock's plums and peacock's feathers in their turbans. Many girls are profusely tattooed, especially on their faces, and some of them on their legs as well. The type of tattooing is said to be according to the taste of the individual and it is done with thorns and needles. In their hair, many of them stick the feathers of jungle cocks and their heads are also adorned with combs of wood and tin and brass.

These Primitive Tribes have no prohibition against eating anything, even worms and insects and in fact there is very little meat that they will not eat, whether the animal has died a natural death or has been killed four days or more before by a tiger.

The religion of these Primitive Tribes is the worship of demons of all denominations and dead ancestors of all antiquity. Witchcraft, sorcery, animal and human sacrifice make up their religion. Without education, with no idea of Science or of the knowledge of the working of nature, steeped in ignorance and superstition, these Primitive Tribes have been living on the outskirts and in close conformity with civilisation in a savage stage which has been their lot for ages. Instead of marching along, they are where they have been all along doing nothing but marking time. The Criminal Classes at one time included such well organised confederacies of Professional Criminals as the Pindharies and the Thugs.

The Pindharies were a predatory body of armed gangsters. Their organisation was an open military organisation of freebooters who could muster 20,000 fine horse and even more. They were under the command of brigand chiefs. Chitu, one of the most powerful commanders had under his single command 10,000 horse, including 5,000 good cavalry, besides infantry and guns. The Pindharies had no military projects for employing their loose hands of irregular soldiery, which developed into bodies of professional plunderers. The Pindharies aimed at no conquests. Their object was to secure booty and cash for themselves. General loot and

rapine was their occupation. They recognised no rulers. They were subjects of none. They rendered loyalty to none. They respected none and plundered all high and low rich and poor without fear or compunction.

The 'Thugs' were a well organised body of professional assassins, who in gangs of from 10 to 200 travelled in various guises throughout India, worked themselves into the confidence of wayfarers of the wealthier class and, when a favourable opportunity occurred, strangled them by throwing a handkerchief or noose round their necks and then plundered and buried them. All this was done according to certain ancient and rigidly prescribed forms and after the performance of special religious rites, in which was the consecration of the pickaxe and the sacrifice of sugar. They were staunch worshippers of Kali, the Hindu Goddess of destruction. Assassination for gain was with them a religious duty, and was considered a holy and honourable profession. They had in fact no idea of doing wrong, and their moral feelings did not come into play. The will of the goddess by whose command and in whose honour they followed their calling was revealed to them through a very complicated system of omens. In obedience to these, they often travelled hundreds of miles in company with, or in the wake of their 1 Encyclopaedia Britannica. 11th Ed., Vol. XXVI, p. 896. Intended victims before a safe opportunity presented itself for executing their design; and when the deed was done, rites were performed in honour of that tutelary deity, and a goodly portion of the spoil was set apart for her. The Thugs had also a jargon of their own, as well as certain signs by which its members recognised each other in the remotest part of India. Even those, who from age or infirmities could no longer take an active part in the operations used to aid the cause as watchmen, spies or dressers of food. It was owing to their thorough organisation, the secrecy and security with which they went to work, but chiefly to the religious garb in which they shrouded their murders, that they could continue for centuries to practise their craft. The extraordinary fact was that Thuggee was regarded as a regular profession by the Indian Rulers both Hindu and Mahomedans. The Thugs paid taxes to the State and the State left them unmolested.

It was not until the British became rulers of the country that any attempt was made to suppress the Thugs. By 1835, 382 Thugs were hanged and 986 were transported or imprisoned for life. Even as late as 1879 the number of registered Thugs was 344 and the Thuggee and the Dacoity department of the Government of India continued to exist until 1904 when its place was taken by the Central Criminal Intelligence Department.

While these open and professional criminals have been suppressed and are no more to exact their toll and disturb the peace, there are still in India

communities whose occupation is crime and who are listed by Government as Criminal Tribes.

The Criminal Tribes live in the plains in close proximity, if not in the midst of, civilized life. Because they subsist by organised robbery and dacoity, they are for this reason proscribed by the Government of India as Criminal Tribes. Hollius in his "Criminal Tribes of the United Provinces" gives an account of their activities. They live entirely by crime. A few may be ostensibly engaged in agriculture but this is only to cover up their real activities. Their nefarious practices found most scope in dacoity or robbery by violence, but being a community organised for crime nothing came amiss to them. On deciding to commit a dacoity in any particular locality, spies would be sent out to select a suitable victim, study the general habits of the villagers and the distance from any effective aid, and enumerate the number of men and firearms. The raid usually took place at midnight. Acting on the information given by the spies, men would be posted at various points in the village and by firing off their guns, attract attention from the main gang which would attack the particular house or houses previously appointed. The gang would usually consist of 30 to 40 men. It is essential to emphasise the great part played by crime in the general life of these peoples. A boy is initiated into crime as soon as he is able to walk and talk. No doubt the motive is practical to a great extent in so far as it is always better to risk a child in petty theft, who if he were caught, would probably be cuffed, while an adult would immediately be arrested. An important part is also played by women, who, although they do riot participate in the actual raids, have many heavy responsibilities. Besides disposing of most of the stolen property, they are also expert shoplifters.

Like the Criminal Tribes the Untouchables also live in the midst of civilized Hindu Society and possess a degree of culture and morality which completely separate them from the Primitive Tribes and the Criminal Tribes. The Untouchables have the culture of the Hindu Community. They observe the religious rites of the Hindu Community. They recognise the sacred as well as the secular laws of the Hindus. They celebrate the Hindu festivities. But they derive no benefit from this. On the contrary they are segregated and shunned because their physical contact is held by the Hindus to cause pollution. There is therefore an interdict on all social intercourse with them except for unavoidable purposes. They live on the outskirts of a village and not in the midst of it. Every village has its Untouchable quarters, they are attached to the village but are not a part of the village. Segregated from the rest of the Hindu population they are

bound down to a code of behaviour, which is appropriate to a servile state. According to this code, an Untouchable may not do anything, which raise him above his appointed station in life. He should not dress in style superior to that of his status, nor should the untouchable woman adorn herself with ornaments after the fashion of the higher class Hindu women. He should not have a house better or bigger than the houses of the rest of the Hindus in the village. In any case he must not have a tiled roof over his house. An Untouchable must not sit in the presence of a Hindu and must always salute him first. An Untouchable must not wear clean clothes, must not use brass or copper pots and must not wear gold or silver ornaments. When some one dies in the family of a Hindu, an Untouchable must go miles to convey the message of the death to the relatives of the family, no matter how far away they might be living, because a Hindu in a village feels disgraced in the eyes of his relatives if he has to communicate such messages by postal communication. An Untouchable must accompany the women folk of the Hindus on their journey from their homes to their parents and *vice versa*. Their dignity requires that they should have a retinue and the Untouchable is the only available class from which such a retinue can be drawn without any cost. At every ceremony at the house of a Hindu, the Untouchables must come and do menial work. An Untouchable must not own and cultivate land and lead an independent life. For his livelihood he must depend upon stale remnants of food left over by the Hindu households and upon meat of cattle that die in the village. These remnants of food he must collect from door to door. For he must go on his begging round every evening. Similarly an Untouchable must carry the dead animals out of the village. Indeed he alone must carry them because no Hindu will agree to do scavenging. An Untouchable should not take to such services as would give him authority and power over caste Hindus. He must be humble and must not ask for more than his lot under this code. It is true that some of the Untouchables have risen above the low status prescribed by this customary code of conduct and have acquired high place, but the majority of them are still socially in the most servile position and economically in abject poverty.

Such is the condition of the 791/2 millions of people. The problem of these deadened, if not dead, souls is no small problem. The total population of these three classes comes to over 60% of the population of the United States but exceeds the population of the whites in the British Empire by 91/2 millions. It also exceeds the population of Japan by 91/2 millions. It exceeds the population of Italy by 37 millions. It exceeds the population of Germany by 131/2 millions and of France by 371/2

millions. It is ten times the population of Belgium and twenty times the population of Denmark. What a colossal total of sunken humanity? III

The saddening and if, one may say, annoying part of the story is that the state of these unfortunate human beings should be what it is although they are surrounded and fed by a high civilisation. But it must strike any impartial observer that there must be something very radically wrong with a civilisation, which has failed to elevate to their manhood 791/2 millions of human beings.

Civilisation as comprising and accumulated store of knowledge of man and nature, of arts and crafts, an ethical code regulating the conduct of man towards his fellows, a social code laying down the forms and conventions to be observed by individuals, a civil code prescribing the rights and duties of the rulers and the ruled and a religious creed relating the natural to the supernatural—is a rare prize. It has not been the good fortune of all races to develop it in all its fullness. Many have stood where they were at the start. Many took one or two steps and have been at a halt. Others have only revolved round and round. The primitive races of Australia and Polenasia, when they were first discovered a few generations ago, were found to have developed articulate speech and to know how to make fire. They had not advanced beyond the middle stage of savagery. The Alliapascous, a Primitive Tribe of the Hudson Bay Territory and the Indians of the valley of Columbia had not gone beyond the stage of the Bow and the Arrow. They knew nothing of pottery, domestication of animals or of the smelting of iron. The civilization of Egypt, Babylonia, Assyria and even of Rome and Greece had only been a revolving civilization. Their progress and achievements are only the elaboration of the details of methods and intentions handed down by man when he was in a Barbaric state. They added nothing revolutionary to the sum total of civilization to which they were heirs. They merely did better what used to be done crudely by their predecessors. Nor have the stages of advancement followed in quick succession. That man was for long ages a savage before he made sufficient progress to be called a Barbarian admits of no doubt. Equally little in doubt is it that other long ages of Barbarism have preceded the final ascent to the lowest stage of civilization. The precise period of time covered by these successive 'ages' is of course only conjectural; but something like one hundred thousand years may perhaps be taken as a safe minimum estimate.

Civilization is indeed no easy gain. But civilization is a very vital thing, not for one generation but also for the next. The civilization of one generation, when inherited becomes the equipment of the next. This social heritage is

absolutely essential for each generation. All progress will die out if this social heritage is destroyed. As has been well put, "If the earth were struck by one of Mr. Wells' comets, and if in consequence every human being now alive were to lose all the knowledge and habits which he had acquired from preceding generations (though retaining unchanged all his own powers of invention and memory, and habituation) nine-tenths of the inhabitants would be dead in a month and 99 per cent of the remaining tenth would be dead in six months. They would have no language to express their thoughts but vague reverie. They would not read notices or drive motor cars or horses. They would wander about, led by the inarticulate cries of a few naturally dominant individuals, drowning themselves, as thirst came on, in hundreds at the riverside landing places. Men could not invent in time to preserve their lives, methods of growing food or taming animals or making fire or clothing themselves. Life would have to be begun over again from the primitive stage. Like the primitive races a generation which has lost its social heritage would have to begin life on wild fruits and worms until they had accumulated a new social heritage. After some thousands of generations they would probably possess some thing which would be recognised as language, and perhaps some art of taming animals and cultivating land. They might or might not have created what we should call a religion or a few of our simpler mechanical inventions and political expedients. They might or might not have such general ideas as law, liberty, and justice. This is the difference, which social heritage makes and the difference is no doubt vast.

It is true that civilisation is not the privilege of all and even to those who are fortunate to have it, it is a matter of slow growth marked by long and monotonous halts. But it is also true that to those who are possessed of civilisation, their civilisation may be a hindrance rather than a help. It might have gone on a wrong track, it might have based itself on false values and false premises. Such a civilisation might easily cause stagnation of the Community and the stunting of the individual. It would be better to be without civilisation than to be burdened and unshackled by such a civilisation.

It is the boast of every patriotic Hindu that the Hindu or the Vedic Civilisation is the oldest in the world. One often hears with fire some repetitions a Hindu stating with a certain degree of malicious pride that India had reached a very high degree of civilisation when other people were leading a primitive life and moving naked. One also hears a Hindu say that his civilisation has inherent strength because it has survived while all other ancient civilisation such as Egypt, Babylon, Judea, Rome and Greece have

vanished. Such a view however legitimate misses the main point. The main point is not whether the civilisation is ancient and whether it has survived.mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_3 The main point is what are the merits of a civilization? What is its worth, if it has survived, on what plain? In other words the principal question is, is this Hindu civilization, the social heritage a burden or a benefit? What does it offer by way of growth and expansion to classes and to individuals?

What is the contribution of Hindu Civilization to the knowledge of man and nature? Many patriotic Hindus like to believe that the knowledge of man and nature began with the Hindus. Granting that it is so it certainly did not advance beyond the most rudimentary stage. Can any Hindu doubt that the Hindu Philology, right or wrong, has remained where Panini and Katyayana left it? Can he deny that Philosophy right or wrong has remained where Kapila and Gautama left it? Can he doubt that literature remained where Vyasa and Valmiki left it. In Metaphysics the Hindus are said to have reached the stage of perfection. This is what Prof. Har Dayal has to say of Hindu Metaphysics.mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_4—

"Metaphysics has been the curse of India. It has blighted her history and compassed her ruin. It has converted her great men into miserable quibblers, and led them into useless channels of inquiry and effort. It has been the dangerous will-o'-the-wisp of Indian intellect during many centuries. It has elevated sophistry to the rank of an Art, and substituted vain fancies for a knowledge. It has condemned Indians intellect to run in the same old roove for hundreds of years. It has blinded her seers and led them to mistake phantoms for realities..... Arrogant, pretentious, verbose and purblind, it has taken its cackling for an oracle and its fantastic word towers for solid piles of thought masonry....."

.....The Upanishads claim to expound 'that by knowing which every thing is known '. This mediaeval quest for 'the absolute ' is the basis of all the superior metaphysics of India. The treatises are full of absurd conceits, quaint fancies, and chaotic speculations. And we have not yet learned that they are worthless."Samadhi" or trance is regarded as the acme of spiritual progress ! How strange it is that a capacity for swooning away should be considered the mark of wisdom! It is very easy to lose consciousness if one has strong emotions and a feeble intellect. That is why ladies faint so often on the slightest provocation. But in India Samadhi is the eighth stage of Yoga, which only '*paramahans* ' can reach. These be thy Gods, O, Israel! To

look upon an abnormal psychological condition produced by artificial means as the sign of enlightenment was a folly reserved for Indian Philosophers."

In the domain of science. Arts and crafts the contribution of the Hindu Civilization is of the most primitive character. Except in some spheres such as weaving, spinning, etc., the Hindu Civilization has not evolved any technical equipment which can aid man in his struggle against nature to make a bare living that can be said to be higher than that of the brute. It is because of the complete absence of scientific and technical equipment and with all the transcendental nonsense that is being perpetrated that famines are desolating the land in all ages. Ignorance, superstition and disease which affect the mind, malaria and plague diseases which affect the body, have hung like a pall over the country throughout the ages.

In the field of Religion and Ethics the Hindus have made their greatest efforts. Of their contributions, these are the most elaborately developed. They are undoubtedly the most vital to man for the simple reason that they help to install in man the springs of thought and action. They are responsible for the outlook which man has on life. They are responsible for the attitude one holds towards his fellow man. They prescribe principles which govern conduct, mould character and implant in man that mysterious thing called conscience which acts as his sentinel and prevents him from going wrong.

It is when one comes to examine this Hindu Civilisation in the matter of its religious content, the way of life it prescribes, that one begins to doubt whether this Hindu Civilisation is at all an advantage to the generations who are fated to inherit it. What does this civilisation offer to the 25 millions of Primitive Tribes who are living on its frontiers? What does it offer to the 5 millions of Criminal Tribes who are living in the midst of that civilisation? What does it offer to the 50 millions of Untouchables who are not only living in the midst of that civilisation but are required to sustain it? What would the Primitive Tribes say of a civilisation which has made no effort to adopt them in its fold? What would the Criminal Tribes say of a civilisation which has driven them to take to criminal ways for earning their livelihood? Would it be unjust if they said that this is not Civilisation, this is infamy?

As to the Untouchables, theirs has been a fate of degradation and destitution in the past and for whom under the Hindu Civilisation there seems to be no escape in the future. Even Indians do not seem to realise the extent of degradation and destitution that is involved in this system of Untouchability. The observations of the Committee appointed by the

Government of Bombay to inquire into the grievances of the Depressed Classes and Aboriginal Tribes in 1928 are very pertinent. It said.

"There is nothing strange in the idea that an unclean person or thing causes repulsion which underlies the idea of pollution. But what is regrettable about it as applied to the (UNTOUCHABLES), is its irrationality. It stamps an individual as untouchable by the mere accident of his birth. A person born Untouchable, remains Untouchable however superior he may be in personal cleanliness to the so-called touchable, and there is no way open to him by which he can escape his fate. What is surprising in all this is that an Orthodox Hindu, notwithstanding the differences between his religious notions and mode of living and outlook in life and those of the Mahomedans, Parsis and Christians treat them as touchables. This has resulted in further aggravating the position of the (Untouchables). For this unjust discrimination on the part of the Orthodox Hindus, in some cases being influenced by the Orthodox Hindus especially in villages, even the Mahomedans, Parsis and Christians observe untouchability towards the (Untouchables) though their religions teach contrariwise. What we are concerned most to point out are the evils attributable to it in so far as Untouchability includes isolation and inferiority. But there are evils specifically attributable to untouchability as such. Pressed to its logical limit, in an Orthodox Hindu Society it would prevent the (Untouchables) from obtaining entry into a public school though it is maintained at the expense of the state, it would prevent them from entering the public services though they may be qualified for it, except for the services customarily allotted to them. It would also prevent them from taking water from the public watering places maintained out of public funds. Looked at from this point of view untouchability is not merely a social problem. It is a problem of the highest political importance and affects the fundamental question of the civic rights of the subjects of the state." This states the hardships only of the Untouchables. But untouchables are not the only people who are subjected to this life of ignominy. There are classes who are placed in a worse position. Untouchables are those who cause pollution only by a physical touch. There are people who cause pollution if they come within a certain distance. They are known as unapproachable. Again there are people who are in a worse position than the unapproachable. They cause pollution if they come within sight. They are known as unseeable. It is said of the Nayadis mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_5—a people who fall into the category of the unapproachable," that they are the lowest caste among the Hindus— the

dogeaters. They are the most persistent in their clamour for charity, and will follow at a respectful distance, for miles together any person walking, driving or boating. If any thing is given to them, it must be laid down, and after the person offering it has proceeded a sufficient distance, the recipient comes timidly forward, and removes it."Of the same people Mr. Thurston says" The subject (i.e. the Nayadis) whom I examined and measured at Shoranur, though living only about three miles off had, by reason of the pollution which they traditionally carry with them to avoid walking over the long bridge which spans the river, and follow a circuitous route of many miles".

In the Tinnevalley District of the Madras Presidency, there is a class of unseeables called Purada Vannas. Of them it is said,"that they are not allowed to come out during day time because their sight is enough to cause pollution. These unfortunate people are 'compelled' to follow the nocturnal habits, leaving their dens after dark and scuttling home at the false dawn like the badger, hyaena, aordvark."What must be the hardships of the unapproachables and unseeables? How must they be passing their lives? If their sight or their approach even is not tolerated, what work can they obtain? What else can they do except to beg and live on dog's meat? Surely no civilisation can be guilty of greater cruelty! It is indeed a great mercy that the population of the unapproachables and of the unseeables is so small. But are 50 millions of Untouchables entitled to any civilisation? An Untouchable cannot escape his fate for he cannot pass off as a Touchable. In the village where he resides he is of course known and there is no room for impersonation while he is there. If he leaves his village and comes to a town there is a chance for him to pass off as Touchable. But he knows what would be his fate if he were discovered. The following incident, which was reported in the papers, will give some idea of the risk involved in any attempt to impersonate:

Orthodoxy Run Mad.

Alleged Barbarious Treatment of "Untouchables": Crime of being Mahars.

Mr. Keshavji Ranchhodji Vaghela from Ahmedabad has informed Dr. B. R. Ambedkar, President, Bahishkrit Hitkarani Sabha as follows:

One Bapoorao Laxman and his brother Kaurao have been residents of Ahmedabad during the last six years. They used to mix with some people from the Deccan belonging to Maratha caste. Kaurao's two sons, viz, Damoo and Laxman, used to take part in the Bhajan parties of the Marathas. The latter, however, recently came to know that the brothers Damoo and Laxman were Mahars by caste and in order to ascertain this, two Mahars employed in the parcel train between Surat and Ahmedabad

were specially called to identify Damoo and Laxman. After it was ascertained that Damoo and Laxman were Mahars they were called at a Bhajan party at Kalupur, Bhandari Pole, at midnight on the 11th instant. Asked as to what caste they belonged to, Damoo and Laxman replied that they were Somavanshis. This reply enraged the Marathas, who freely abused them for having defiled their persons and places. The Mahar brothers were assaulted by the Marathas. One of the brothers had a gold ring on his person. It was forcibly taken away from him and sold for Rs. 11. Out of this amount Rs. 6 was paid to the Mahar who had been called from Surat to identify the brothers. Damoo and Laxman entreated and Marathas were requested to allow them to return to their homes, but the latter refused to do so unless a fine of Rs. 500 was paid. On the Mahar brothers ** Bombay Chronicle 25th Feb. 1938. pleading their inability to pay such a heavy sum, one of the Marathas suggested that the Mahar brothers should be fined only Rs. 125. But then one of the Marathas opposed the proposal for fine saying that they should not be satisfied with fine, but should punish the Mahars severely for their crime of concealing their caste. Having decided upon the course, the Mahar brothers were detained and at about 9 o'clock in the morning they were subjected to barbarous indignities, their moustaches in the left side and eyebrows on the right side were shaved, their bodies besmeared with soot mixed in oil and also with dirt, garlands made of old shoes were put around their necks, and one of them was asked to hold a broom in his hand and the other to hold a placard on which it was written that the punishment was meted out to the culprits for venturing to touch high caste people. The Mahar brothers were taken in procession consisting of about 75 people, a drum being beaten in the front. A complaint has been lodged with the Police by the said two Mahar brothers. The accused in their statement have admitted that Damoo and Laxman were treated in the alleged manner, but pleaded that the complainants had willingly agreed to undergo the punishment. Obviously Damoo and Laxman were helpless when they were abused, assaulted and threatened with severe punishment and actually subjected to barbarous indignities. This case has created a great sensation among the people belonging to the so called Untouchables castes, and efforts are being made to give proper legal aid to the complainants. But the rules of this Hindu Civilisation are so meticulous in regard to untouchability as to leave no possibility for an Untouchable to pose as a Touchable. Consequently there exist rules in certain areas where Untouchables are required to bear a black thread so as to be easily identifiable and to proclaim by word of mouth that he is an Untouchable to prevent a Touchable touching him in ignorance

and thereby getting himself polluted. In the town of Dwarka (in the Bombay Presidency) which is famous as being the shrine of the great Hindu God Krishna it is a rule that every Untouchable while walking in the streets has to clap his hands and say "Post, Post" so as to proclaim the fact that he is an Untouchable and let the Touchables beware of him. The following is recorded of the Cherumans of the Madras Presidency:

"Very low is indeed the social position of these miserable beings. When a Cheruman meets a person of superior caste he must stand at a distance of thirty feet. If he comes within this prohibited distance, his approach is to cause pollution, which is removed only by bathing in water. A Cheruman cannot approach a Brahmin village or temple or tank. If he does so, purification becomes necessary. Even while using the public road, if he sees his lord and master, he has to leave the ordinary way and walk, it may be in the mud, to avoid his displeasure by accidentally polluting him. To avoid polluting the passer-by, he repeats the unpleasant sound, "0, 0" In some places i.e. Palghat, one may see a Cheruman with a dirty piece of cloth spread on the road side, and yelling in a shrill voice, "Ambrane, Ambrane, give me some pice and throw them on the cloth". His position is intolerable in the Native States of Cochin and Travancore, where the Brahman influence is in the ascendant, while in the Palghat Taluka the Cherumans cannot, even to this day enter the bazaar. In Malabar it is stated that "The man of high caste shouts occasionally as he goes along, so that the low caste man can go off the road, and allow him to pass unpolluted. And those of the lowest castes shout, as they go, to give notice of their Pollution bearing presence, and learning the command of the man of high caste, move away from the road. It is common to see people of inferior caste travelling parallel to the road, but not daring to go along it".

What a degradation for these unfortunate souls who have been turned by this Hindu Civilisation into social lepers! To be called an Untouchable is enough of a misfortune. But to require an Untouchable to proclaim by his own mouth his shame that he is an Untouchable is a cruelty to which in my opinion there is no parallel. What would an Untouchable say of this Hindu Civilisation? Would it be wrong if he said that it is felony and not civilisation?

That the condition of the Primitive Tribes, of the Criminal Tribes and of the Untouchables is the result of fundamental doctrines of Hindu Civilisation there can be no manner of doubt.

Why have there been no missions to bring these Primitive Tribes into the Hindu fold?

Why has crime become an occupation for certain tribes? Why have certain classes been treated as unfit for human association, as Untouchables?

The answer to each of these questions will have reference to some basic principle of the Hindu Civilisation.

To the first question the answer is that the caste system prevents the Hindu Religion from becoming a missionary religion and caste is a fundamental part of the Hindu Civilisation. To the second question the answer is that the system of Chaturvarna limits the opportunities which a person can have for earning an honourable living. All learned are the preserve of the Brahmins; all warlike services are the monopoly **Thurston—Tribes and castes of Southern India, Vol. 5, p. 196. of the Kshatriya class; trade is open only to Vaishya, services to the Shudras. Those outside, there being nothing honourable left, have been driven to dishonourable and criminal ways of earning a livelihood. This is the result of Chaturvarna and Chaturvarna is again a fundamental part of Hindu Civilisation.

To the third question the answer is that untouchability is part of the Hindu law as contained in the Smritis which are again a fundamental part of the Hindu Civilisation.

IV

It is true that as for the past the state of degradation has been the common fate of all the three categories of this 791/2 millions of India's population. But it cannot be said that their future destiny will also be common to them. That is because although their condition is apparently similar, their position is essentially different.

The first thing to note is that the Primitive Tribes and the Criminal Tribes are not afflicted by this system of untouchability. To a Hindu they do not cause pollution. Indeed these Primitive and Criminal Tribes observe untouchability towards the Untouchables. The situation is full of humour when one sees members of these Primitive and Criminal Tribes feeling that they would be polluted if they would touch an Untouchable. They are poor, filthy, superstitious, ignorant, far more than the Untouchables yet they pride themselves as socially superior to the Untouchables. This of course is the result of the contagion, which they have from the Hindus. But the point to note is that the Hindu does not treat them as Untouchable. That is an advantage which they have over the Untouchables and which makes their future assured. If the Primitive Tribes have no opportunities for advancement it is because they choose to live in isolation. But once

they come out of their forest recesses and take part in civilisation. There is nothing that will stand in their way. Similarly the Criminal Tribes have their future assured. Government has established settlements where these Criminal Tribes are kept and taught useful trades. There is no doubt that in a very short time they will be completely weaned from their vicious habits.

The case of the Untouchables stands on quite a different footing altogether. Their disabilities are imposed upon them. Their isolation is really segregation which is enforced upon them. The problem of the Untouchables is different from the problem of the Primitive Tribes because in their case the evils of segregation are aggravated by the fact of untouchability and the result is that while in the case of the Primitive Tribes the problem is due to geographical isolation combined with lack of desire to avail themselves of the opportunities for betterment, in the case of the Untouchables the problem is due to positive denial of opportunities.

There does not seem to be much hope for the emancipation of the Untouchables, at any rate their emancipation is far more problematical and distant than the emancipation of the Primitive Tribes. The problem of the slaves was one of denial of political or economic rights. If the problem of the Untouchables was one of denial of political and economic rights, it could be solved by legal and constitutional methods. The denial of political and economic rights is the result of the social psychology of the Hindus. The problem for the Untouchables arises directly out of the social behaviour of the Hindus. Untouchability will vanish only when Hindus will change their mentality. The problem is how to make the Hindus unlearn their way of life. It is no small matter to make a whole nation give up its accustomed way of life. Besides the way of life the Hindus are accustomed to, is a way which is sanctified by their religion, at any rate they believe it to be so. To change their way of life is almost to change their religion.

How can this happen? Only when it is realised that what is tragedy for the Untouchables is the crime of the Hindus. How long shall the Untouchables have to wait for this revolution in the religious psychology of the Hindus? Let those who have a gift for prophecy answer. In the meantime it would be desirable to describe their condition and to state the problems which they and their friends have to face.

CHAPTER 2

THE HOUSE THE HINDUS HAVE BUILT

I

Is there any thing peculiar in the social organisation of the Hindus? An unsophisticated Hindu who is unaware of investigations conducted by scholars will say that there is nothing peculiar, abnormal or unnatural in the organisation of the society to which he belongs. This is quite natural. People who live their lives in isolation are seldom conscious of the peculiarities of their ways and manners. People have gone on from generation to generation without stopping to give themselves a name. But how does the social organisation of the Hindu strike the outsiders, non-Hindus? Did it appear to them as normal and natural?

Megasthenese who came to India as the ambassador of the Greek King Seleukos Nicator to the Court of Chandragupta Maurya some time about the year 305 B.C. did feel that the social organisation of the Hindus was of a very strange sort. Otherwise he would not have taken such particular care to describe the peculiar features of the Hindu social organisation. He has recorded:

"The population of India is divided into seven parts. The philosophers are first in rank, but form the smallest class in point of number. Their services are employed privately by persons who wish to offer sacrifices or perform other sacred rites, and also publicly by the kings at what is called the Great Synod, wherein at the beginning of the new year all the philosophers are gathered together before the King at the gates, when any philosopher who may have committed any useful suggestion to writing, or observed any means for improving the crops and the cattle, or for promoting the public interests, declares it publicly. If any one is detected giving false information thrice, the law condemns him to be silent for the rest of his life, but he who gives sound advice is exempted from paying any taxes or contributions.

"The second caste consists of the husbandmen, who form the bulk of the population, and are in disposition most mild and gentle. They are exempted from military service, and cultivate their lands undisturbed by fear. They never go to town, either to take part in its tumults, or for any other purpose. It therefore not infrequently happens that at the same time, and in the same part of the country, men maybe seen drawn up in array of battle, and fighting at risk of their lives, while other men close at hand are ploughing and digging in perfect security, having these soldiers to protect them. The whole of the land is the property of the King, and the husbandmen till it on condition of receiving one-fourth of the produce.

"The third caste consists of herdsmen and hunters, who alone are allowed to hunt, and to keep cattle, and to sell draught animals or let them out on hire. In return for clearing the land of wild beasts and fowls which devour

the seeds sown in the fields, they receive an allowance of grain from the king. They lead a wandering life and live under tents.

“The fourth class, after herdsmen and hunters, consists of those who work at trades, of those who vend wares, and of those who are employed in bodily labour. Some of these pay tribute, and render to the State certain prescribed services. But the armour-makers and shipbuilders receive wages and their victuals from the king, for whom alone they work. The general in command of the army supplies the soldiers with weapons, and the admiral of the fleet lets out ships on hire for the transport both of passengers and merchandise.

“The fifth class consists of fighting men, who when not engaged in active service, pass their time in idleness and drinking. They are maintained at the King's expense, and hence they are always ready, when occasion calls, to take the field, for they carry nothing of their own with them but their own bodies.

“The sixth class consists of the overseers, to whom is assigned the duty of watching all that goes on, and making reports secretly to the King. Some are entrusted with the inspection of the city, and others with that of the army. The former employs as their coadjutors the courtesans of the city, and the latter the courtesans of the camp. The ablest and most trustworthy men are appointed to fill these offices.

“The seventh class consists of the councillors and assessors of the king. To them belong the highest posts of government, the tribunals of justice, and the general administration of public affairs. No one is allowed to marry out of his own caste, or to exchange one profession or trade for another, or to follow more than one business. An exception is made in favour of the philosopher, who for his virtue is allowed this privilege.”

Alberuni who wrote an account of his travels in India some time about 1030 A.D. must have been struck by the peculiarity of the Hindu Social Organisation. For he too has not omitted to make a note of it. He observed:

"The Hindus call their castes varna, i.e. colours, and from a genealogical point of view they call them jataka, i.e. births. These castes are from the very beginning only four.

1. The highest caste is the Brahmana, of whom the books of the Hindus tell that they were created from the head of Brahman. And a Brahman is only another name for the force called nature, and the head is the highest part of the animal body, the Brahmana are the choice part of the whole genus. Therefore the Hindus consider them as the very best mankind.

II. The next caste are the Kshatriya, who were created, as they say, from the shoulders and hands of Brahman. Their degree is not much below that of the Brahmana.

III. After them follow the Vaisya, who were created from the thigh of Brahman.

IV. The Sudra, who were created from his feet,"Between the latter two classes there is no very great distance. Much, however, as these classes differ from each other, they live together in the same towns and villages, mixed together in the same houses and lodgings.

"After the Sudra follow the people called Antyajaja, who render various kinds of services, who are not reckoned amongst any caste, but only as members of a certain craft or profession. There are eight classes of them who freely intermarry with each other, except the fuller, shoemaker and weaver, for no others would condescend to have anything to do with them. These eight guilds are the fuller, shoemaker, juggler, the basket and shield maker, the sailor, fisherman, the hunter of wild animals and of birds, and the weaver. The four castes do not live together with them in one and the same place. These guilds live near the villages and towns of the four castes, but outside them.

"The people called Hadi, Doma (Domba), Candala and Badhatau (sic) are not reckoned amongst any caste or guild. They are occupied with dirty work, like the cleansing of the villages and other services. They are considered as one sole class, and distinguished only by their occupations. In fact, they are considered like illegitimate children; for according to general opinion they descend from a Sudra father and a Brahmani mother as the children of fornication; therefore they are degraded outcaste.

"The Hindus give to every single man of the four castes characteristic names, according to their occupations and modes of life, e.g. the Brahman is in general called by this name as long as he does his work staying at home. When he is busy with the service of one fire, he is called Ishtin; if he serves three fires, he is called Agnihotrin; if he besides offers an offering to the fire, he is called Dikshita. And as it is with the Brahmana, so is it also with the other castes. Of the classes beneath the castes, the Hadi are the best spoken of, because they keep themselves free from everything unclean. Next follow the Doma, who play on the lute and sing. The still lower classes practise as a trade killing and the inflicting of judicial punishments. The worst of all are the Badhatau, who not only devour the flesh of dead animals, but even of dogs and other beasts.

"Each of the four castes, when eating together, must form a group of themselves, one group not being allowed to comprise two men of different

castes. If, further, in the group of the Brahmana there are two men who live at enmity with each other, and the seat of the one is by the side of the other, they make a barrier between the two seats by placing a board between them, or by spreading a piece of dress, or in some other way; and if there is only a line drawn between them, they are considered as separated. Since it is forbidden to eat the remains of a meal, every single man must have his own food for himself; for if any one of the party who are eating should take of the food from one and the same plate, that which remains in the plate becomes, after the first eater has taken part, to him who wants to take as the second, the remains of the meal, and such is forbidden."

Alberuni did not merely content himself with recording what struck him as peculiar in the Hindu Social organisation. He went on to say:

"Among the Hindus institutions of this kind abound. We Muslims, of course, stand entirely on the other side of the question, considering all men as equal, except in piety; and this is the greatest obstacle which prevents any approach or understanding between Hindus and Muslims."

Duarte Barbosa who was Portuguese official in the service of the Portuguese Government in India from 1500 to 1517 has left a record of his impressions of Hindu Society. This is what struck him:

"And before this kingdom of Guzerate fell into the hands of the Moors, a certain race of Heathen whom the Moors called Resbutos dwelt therein, who in those days were the knights and wardens of the land, and made war where so ever it was needful. These men kill and eat sheep and fish and all other kinds of food; in the mountains there are yet many of them, where they have great villages and obey not the king of Guzerate, but rather wage daily war against him: who, do what he may, is yet not able to prevail against them, nor will do so, for they are very fine horsemen, and good archers, and have besides divers other weapons to defend themselves withal against the Moors, on whom they make war without ceasing; yet have they no king nor lord over them.

"And in this kingdom there is another sort of Heathen whom they call Baneanes, who are great merchants and traders. They dwell among the Moors with whom they carry on all their trade. This people eat neither flesh nor fish, nor anything subject to death; they slay nothing, nor are they willing even to see the slaughter of any animal; and thus they maintain their idolatry and hold it so firmly that it is a terrible thing. For often it is so that the Moors take to them live insects or small birds, and make as though to kill them in their presence, and the Baneanes buy these and ransom them, paying much more than they are worth, so that they may save their lives

and let them go. And if the King or a Governor of the land has any man condemned to death, for any crime, which he has committed, they gather themselves together and buy him from justice, if they are willing to sell him, that he may not die. And divers Moorish mendicants as well, when they wish to obtain alms from this people, take great stones wherewith they beat upon their shoulders and bellies as though they would slay themselves before them, to hinder which they give them great alms that they may depart in peace. Others carry knives with which they slash their arms and legs, and to these too they give large alms that they may not kill themselves. Others go to their doors seeking to kill rats and snakes for them, and to them also they give much money that they may not do so. Thus they are much esteemed by the Moors!

"When these Baneanes meet with a swarm of ants on the road they shrink back and seek for some way to pass without crushing them. And in their houses they sup by daylight, for neither by night nor by day will they light a lamp, by reason of certain little flies which perish in the flame thereof; and if there is any great need of a light by night they have a lantern of varnished paper or cloth, so that no living thing may find its way in, and die in the flame. And if these men breed many lice they kill them not, but when they trouble them too much they send for certain men, also Heathen, who live among them and whom they hold to be men of a holy life; they are like hermits living with great abstinence through devotion to their gods. These men louse them, and as many lice as they catch they place on their own heads and breed them on their own flesh, by which they say they do great service to their Idol. Thus one and all they maintain with great self-restraint their law of not killing. On the other hand they are great usurers, falsifiers of weights and measures and many other goods and of coins; and great liars. These heathen are tawny men, tall and well looking, gaily attired, delicate and moderate in their food. Their diet is of milk, butter, sugar and rice, and many conserves of divers sorts. They make much use of dishes of fruit and vegetables and potherbs in their food. Where so ever they dwell they have orchards and fruit gardens and many water tanks wherein they bathe twice a day, both men and women; and they say when they have finished bathing that they are clear of as many sins as they have committed up to that hour. These Baneanes grow very long hair, as women do with us, and wear it twisted up on the head and made into a knot, and over it a turban, that they may keep it always held together; and in their hair they put flowers and other sweet scented things.

"They use to anoint themselves with white sandalwood mixed with saffron and other scents. They are very amorous people. They are clad in

long cotton and silken shirts and are shod with pointed shoes of richly wrought cordwain; some of them wear short coats of silk and brocade. They carry no arms except certain very small knives ornamented with gold and silver, and this for two reasons: First, because they are men who make but little use of weapons; and secondly, because the Moors defend them.

“Bramenes. And there is here another class of Heathen whom they call Bramenes, who are priests among them, and persons who manage and rule their houses of prayers and idol-worship, which are of great size and have great revenues; and many of them also are maintained by alms. In these houses are great numbers of wooden Idols, and others of stone and copper and in these houses or monasteries they celebrate great ceremonies in honour of these idols, entertaining them with great store of candles and oil lamps, and with bells after our fashion. These Bramenes and Heathen have in their creed many resemblance to the Holy Trinity, and hold in great honour the relation of the Triune Three, and always make their prayers to God, whom they confess and adore as the true God, Creator and maker of all things, who is three persons and one God and they say that there are many other gods who are rulers under him, in whom also they believe. These Bramenes and heathen wheresoever they find our churches enter them and make prayers and adoration to our Images, always asking for Santa Maria, like men who have some knowledge and understanding of these matters; and they honour the Church as is our manner, saying that between them and us there is little difference. These men never eat anything subject to death, nor do they slay anything. Bathing they hold to be a great ceremony and they say that by it they are saved.

“There is also in this same Kingdom of Calicut a caste of people called Bramenes who are priests among them (as are the clergy among us) of whom I have spoken in another place.

"These all speak the same tongue, nor can any be a Bramene except he be the son of a Bramene. When they are seven years of age they put over their shoulder a strip of two fingers in breadth of untanned skin with the hair on it of a certain wild beast, which they call Cryvamergam, which resembles a wild ass. Then for seven years he must not eat betel for which time he continues to wear this strap. When he is fourteen years old they make him a Bramene, and taking off their leather strap they invest him with the cord of three strands which he wears for the rest of his life as a token that he is a Bramene. And this they do with great ceremonial and rejoicings, as we do here for a cleric when he sings his first mass. Thereafter he may eat betel, but not flesh or fish. They have great honour among the Indians and as I have already said, they suffer death for no cause whatsoever, their own

headman gives them a mild chastisement. They marry once only in our manner, and only the eldest son marries, he is treated like the head of an entailed estate. The other brothers remain single all their lives. These Bramenes keep their wives well guarded, and greatly honoured, so that no other men may sleep with them; if any of them die, they do not marry again, but if a woman wrongs her husband she is slain by poison. The brothers who remain bachelors sleep with the Nayre women, they hold it to be a great honour, and as they are Bramenes no woman refuses herself to them, yet they may not sleep with any woman older than themselves. They dwell in their own houses and cities, and serve as clergy in the houses of worship, whither they go to pray at certain hours of the day, performing their rituals and idolatries.

“Some of these Bramenes serve the Kings in every manner except in arms. No man may prepare any food for the King except a Bramene or his own kin; they also serve as couriers to other countries with letters, money or merchandise, passing wherever they wish to go in safety, and none does them any ill, even when the Kings are at war. These Bramenes are learned in their idolatry, and possess many books thereof. The Kings hold them in high esteem.

“I have already spoken many times of the Nayres, and yet I have not hitherto told you what manner of men they are. You are to know that in this land of Malbar there is another caste of people, called Nayres, and among them are noble men who have no other duty than to serve in war, and they always carry their arms whither so ever they go, some swords and shields, others bows and arrows, and yet others spears. They all live with the King, and the other great Lords; nevertheless all receive stipends from the King or from the great Lords with whom they dwell. None may become a Nayre, save only he who is of Nayre lineage. They are very free from stain in their nobility. They will not touch any one of low caste, nor eat, nor drink save in the house of a Nayre.

“These men are not married, their nephews (sisters' sons) are their heirs. The Nayre women of good birth are very independent, and dispose of themselves as they please with Bramenes and Nayres, but they do not sleep with men of caste lower than their own under pain of death. When they reach the age of twelve years their mothers hold a great ceremony. When a mother perceives that her daughter has attained that age, she asks her kinsfolk and friends to make ready to honour her daughter, then she asks of the kindred and especially of one particular kinsman or great friend to marry her daughter; this he willingly promises and then he has a small jewel made, which would contain a half ducat of gold, long like a ribbon, with a

hole through the middle which comes out on the other side, string on thread of white silk. The mother then on a fixed day is present with her daughter gaily decked with many rich jewels, making great rejoicing with music and singing, and a great assembly of people. Then the Kinsman or friend comes bringing that jewel, and going through certain forms, throws it over the girl's neck. She wears it as a token all the rest of her life, and may then dispose of herself, as she will. The man departs without sleeping with her inasmuch as he is her kinsman; if he is not, he may sleep with her, but is not obliged to do so. Thenceforward the mother goes about searching and asking some young man to take her daughter's virginity; they must be Nayres and they regard it among themselves as a disgrace and a foul thing to take a woman's virginity. And when any one has once slept with her, she is fit for association with men. Then the mother again goes about enquiring among other young Nayres if they wish to support her daughter, and take her as a Mistress so that three or four Nayres agree with her to keep her, and sleep with her, each paying her so much a day; the more lovers she has the greater is her honour. Each one of them passes a day with her from midday on one day, till midday on the next day and so they continue living quietly without any disturbance nor quarrels among them. If any of them wishes to leave her, he leaves her, and takes another, and she also if she is weary of a man, she tells him to go, and he does so, or makes terms with her. Any children they may have stay with the mother who has to bring them up, for they hold them not to be the children of any man, even if they bear his likeness, and they do not consider them their children, nor are they heirs to their estates, for as I have already stated their heirs are their nephews, sons of their sisters, (which rule whosoever will consider inwardly in his mind will find that it was established with a greater and deeper meaning than the common folk think) for they say that the Kings of the Nayres instituted it in order that the Nayres should not be held back from their service by the burden and labour of rearing children.

“In this Kingdom of Malabar there is also another caste of people whom they call Biabares, Indian Merchants, natives of the land. They were there ere foreign nations had sailed to India. They deal in goods of every kind both in the seaports and inland, where so ever their trade is of most profit. They gather to themselves all the pepper and ginger from the Nayres and husbandmen, and oftentimes they buy the new crops beforehand in exchange for cotton clothes and other goods which they keep at the seaports. Afterwards they sell them again and gain much money thereby. Their privileges are such that the King of the country in which they dwell cannot execute them by legal process.

"There is in this land yet another caste of folk known as Cuiavern. They do not differ from the Nayres, yet by reason of a fault which they committed, they remain separate from them. Their business is to make pottery and bricks for roofing the houses of the Kings and idols, which are roofed with bricks instead of tiles; only these, for as I have already said, other houses are thatched with branches. They have their own sort of idolatry, and their separate idols.

"There is another Heathen caste which they call Mainatos, whose occupation is to wash clothes for the Kings, Bramenes and Nayres. By this they live, and may not take up any other.

"There is another lower caste than these which they call Caletis, who are weavers who have no other way of earning save by weaving of cotton and silk cloths, but they are low caste folk and have but little money, so that they clothe the lower races. They are apart by themselves and have their own idolatry.

"Besides the castes mentioned above, there are eleven others lower than they within whom the others do not associate, nor do they touch them under pain of death; and there are great distinctions between one and another of them, preserving them from mixture with one another. The purest of all these low, simple folk they call Tuias. Their work is mainly that of tending the palm-groves, and gathering the fruit thereof, and carrying it away for wages on their backs, for there are no beasts of burden in the land.

"There is another caste still lower than these whom they call Manen (Mancu in the printed text) who neither associate with others nor touch them, nor do the others touch them. They are washermen for the common people, and makers of sleeping mats, from which occupations all but they are barred; their sons must perforce follow the same trade; they have their own separate idolatry.

"There is another caste in this land still lower whom they call Canaquis. Their trade is making buckles and umbrellas. They learn letters for purposes of astronomy, they are great astrologers, and foretell with great truth things that are to come; there are some lords who maintain them for this cause.

"There is also another lower caste, also Heathens, called Ageres. They are masons, carpenters, smiths, metal workers and some are goldsmiths, all of whom are of a common descent, and a separate caste, and have their idols apart from other folk. They marry, and their sons inherit their property, and learn their fathers' trade.

“There is another caste still lower in this country called Mogerres, they are almost the same as the Tuias, but they do not touch one another. They work as carriers of things belonging to the Royal State when it moves from one place to another, but there are very few of them in this land; they are a separate caste; they have no marriage law; the most of them gain their living on the sea, they are sailors, and some of them fishers; they have no idols. They are as well slaves of the Nayres.

"There is another caste yet lower whom they call Monger, fishers who have no other work than fishing, yet some sail in the Moors' ships and in those of other heathens, and they are very expert seamen. This race is very rude. They are shameless thieves; they marry and their sons succeed them, their women are of loose character, they sleep with any one-so ever, and it is held no evil. They have their own idolatry.

“In this land of Malabar there is another caste of Heathen even lower than these, whom they call Betunes. Their business is salt making and rice growing, they have no other livelihood.

“They dwell in houses standing by themselves in the fields away from the roads, whither the gentlefolk do not walk. They have their own idolatry. They are slaves of the Kings and Nayres and pass their lives in poverty. The Nayres make them walk far away from them and speak to them from afar off. They hold no intercourse with any other caste.

“There is another caste of Heathen, even lower and ruder, whom they call Paneens, who are great sorcerers, and live by no other means.

"There is another caste lower and ruder than they, named Revoleens, a very poor folk, who live by carrying firewood and grass to the towns, they may touch none, nor may any touch them under pain of death. They go naked, covering only their private parts with scant and filthy rags, the more part of them indeed with leaves of certain trees. Their women wear many brass rings in their ears; and on their necks, arms and legs necklaces and bracelets of heads.

"And there is yet another caste of Heathens lower than these whom they call Poleas, who among all the rest are held to be accursed and excommunicate; they dwell in the fields and open campaigns in secret lurking places, whither folk of good caste never go save by mischance, and live in huts very strait and mean. They are tillers of rice with buffaloes and oxen. They never speak to the Nayres save from off, shouting so that they may hear them, and when they go along the roads they utter loud cries, that they may be let past, and whosoever hears them leaves the road, and stands in the wood till they have passed by: and if any one, whether man or woman, touches them his kinsfolk slay them forthwith, and in vengeance

therefore they slay Poleas until they are weary without suffering any punishment.

"Yet another caste there is even lower and baser called Pareens, who dwell in the most desert places away from all other castes. They have no intercourse with any person nor any one with them they are held to be worse than devils, and to be damned. Even to see them is to be unclean and out-caste. They eat yams and other roots of wild plants. They cover their middles with leaves, they also eat the flesh of wild beasts.

"With these end the distinctions between the castes of the Heathen, which are eighteen in all, each one separate and unable to touch others or marry with them; and besides these eighteen castes of the Heathen who are natives of Malabar, which I have now related to you, there are others of outlandish folk, merchants and traders in the land, where they possess houses and estates, living like the natives, yet with customs of their own."

These foreigners were not able to give a full and detailed picture of caste. This is understandable. For to every foreigner the private life of the Hindu is veiled and it is not possible for him to penetrate it. The social organism of India, the play of its motive forces, is moreover, regulated infinitely more by custom, varying according to locality and baffling in its complexity, than by any legal formula which can be picked out of a legal text book. But there is no doubt that caste did appear to the foreigners as the most singular and therefore the most distinguishing feature of Hindu Society. Otherwise they would not have noted its existence in the record they made of what they observed when they came to India.

Caste therefore is something special in the Hindu Social organization and marks off the Hindus from other peoples. Caste has been a growing institution. It has never been the same at all time. The shape and form of caste as it existed when Magasthenes wrote his account was very different from what the shape and form it has taken when Alberuni came and the appearance it gave to the Portuguese was different from what it was in the time of Alberuni. But to understand caste one must have more exact idea of its nature than these foreigners are able to give.

To follow the discussion of the subject of caste it is necessary to familiarise the readers with some basic conceptions, which underlie the Hindu Social organisation. The basic conception of social organisation which prevails among the Hindus starts with the rise of our classes or varnas into which Hindu society is believed to have become divided. These four classes were named: (1) Brahmins, the priestly and the educated class, (2) The Kshatriyas, the Military Class, (3) The Vaishyas, the trading class and, (4) The Shudras, the servant class. For a time these were merely

classes. After a time what were only Classes (Varnas) became Castes (Jatis) and the four castes became four thousand. In this way the modern Caste System was only the evolution of the ancient Varna System.

No doubt the caste system is an evolution of the Varna System. But one can get no idea of the caste system by a study of the Varna System. Caste must be studied apart from Varna.

2

An old agnostic is said to have summed up his philosophy in the following words:

"The only thing I know is that I know nothing; and I am not quite sure that I know that"

Sir Denzil Ibbetson undertaking to write about caste in the Punjab said that the words of these agnostic about his philosophy expressed very exactly his own feelings regarding caste. It is no doubt true that owing to local circumstances there does appear a certain diversity about caste matters and that it is very difficult to make any statement regarding any one of the castes absolutely true as it may be as regards one locality which will not be contradicted with equal truth as regards the same caste in some other area.

Although this may be true yet it cannot be difficult to separate the essential and fundamental features of caste from its non-essential superficial features. For easy approach to this to ascertain by asking what are the matters for which a person is liable to be excluded from caste. Mr. Bhattacharya has stated the following as causes for expulsion from caste: (1) Embracing Christianity or Islam, (2) Going to Europe or America, (3) Marrying a widow, (4) Publicly throwing the sacred thread, (5) Publicly eating beef, pork or fowl, (6) Publicly eating *Kaccha* food prepared by a Mahomedan, Christian or low caste Hindu, (7) Officiating at the house of a very low caste Sudra, (8) By a female going away from home for immoral purposes and (9) By a widow becoming pregnant. This list is not exhaustive and omits the two most important causes which entail expulsion from caste. They are (10) intermarrying outside caste, (II) Interdining with persons of another caste, (12) Change of occupation. The second defect in the statement of Mr. Bhattacharya is that it does not make any distinction between essentials and (un)^{*}mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23.Essay on Untouchables and Untouchability_Social.htm - _msocom_61essentials. Of course when a person is expelled from his caste the penalty is uniform. His friends, relatives, and fellow men refuse to partake of his hospitality. He is not invited to entertainment in their houses. He cannot obtain brides or

bridegrooms for his children. Even his married daughters cannot visit him without running the risk of being excluded from caste. His priest, his barber and washer man refuses to serve him. His fellow caste men sever their connection with him so completely that they refuse to assist him even at the funeral of a member of his household. In some cases the man excluded from caste is debarred access to public temples and to the cremation or burial ground.

These reasons for expulsion from caste indirectly show the rules and regulations of the caste. But all regulations are not fundamental. There are many which are unessential. Caste can exist even without them.

The essential and unessential can be distinguished by asking another question. When can a Hindu who has lost caste regain his caste. The Hindus have a system of *Prayaschitas* which are penances and which a man who has been expelled from caste must perform before he can be admitted to cast fellowship. With regard to these *Prayaschitas* or Penances certain points must be remembered. In the first place there are caste offences for which there is no *Prayaschita*. In the second place the *Prayaschitas* vary according to the offence. In some cases the *Prayaschita* involves a very small penalty. In other cases the penalty involved is a very severe one.

The existing of a *Prayaschita* and its absence have a significance which must be clearly understood. The absence of *Prayaschita* does not mean that any one may commit the offence with impunity. On the contrary it means that the offence is of an immeasurable magnitude and the offender once expelled is beyond reclamation. There is no reentry for him in the caste from which he is expelled. The existence of a *Prayaschita* means that the offence is compoundable. The offender can take the prescribed *Prayaschita* and obtain admission in the caste from which he is expelled.

There are two offences for which there is no penance. These are (1) change from Hindu Religion to another religion, (2) Marriage with a person of another caste or another religion. It is obvious if a man loses caste for these offences he loses it permanently.

Of the other offences the *Prayaschitas* prescribed are of the severest kind are two: (1) Interdining with a person of another caste or a non-Hindu and (2) Taking to occupations which is not the occupation of the caste. In the case of the other offences the penalty is a light one almost nominal.

The surest clue to find out what are the fundamental rules of caste and what caste consists in is furnished by the rules regarding *Prayaschitas*. Those for the infringement of which there is no *Prayaschita* constitute the very soul of caste and those for the infringement of which the *Prayaschita* is of the severest kind make up the body of caste. It may therefore be said without

any hesitation that there are four fundamental rules of caste. A caste may be defined as a social group having (a) belief in Hindu Religion and bound by certain regulations as to, (b) marriage, (c) food and (d) occupation. To this one more characteristic may be added namely a social group having a common name by which it is recognised.

In the matter of marriage the regulation lays down that the caste must be endogamous. There can be no intermarriage between members of different castes. This is the first and the most fundamental idea on which the whole fabric of the caste is built up.

In the matter of food the rule is that a person cannot take food from and dine with any person who does not belong to his caste. This means that only those who can intermarry can also interdine. Those who cannot intermarry cannot interdine. In other words caste is an endogamous unit and also a communal unit.

In the matter of occupation the regulation is that a person must follow the occupation which is the traditional occupation of his caste and if the caste has no occupation then he should follow the occupation of his father.

In the matter of status of a person it is fixed and is hereditary. It is fixed because a person's status is determined by the status of the caste to which he belongs. It is hereditary because a Hindu is stamped with the caste to which his parents belonged, a Hindu cannot change his status because he cannot change his caste. A Hindu is born in a caste and he dies a member of the caste in which he is born. A Hindu may lose his status if he loses caste. But he cannot acquire a new or a better or different status.

What is the significance of a common name for a caste? The significance of this will be clear if we ask two questions, which are very relevant, and a correct answer to each is necessary for a complete idea of this institution of caste. Social groups are either organised or unorganised. When the membership of the group and the process of joining and leaving the groups, are the subject of definite social regulations and involve certain duties and privileges in relation to other members of the group then the group is an organised group. A group is a voluntary group in which members enter with a full knowledge of what they are doing and the aims which the association is designed to fulfil. On the other hand there are groups of which an individual person becomes a member without any act of volition, and becomes subject to social regulation and traditions over which he has no control of any kind.

Now it is hardly necessary to say that caste is a highly organised social grouping. It is not a loose or a floating body. Similarly it is not necessary to say that caste is an involuntary grouping. A Hindu is born in a caste and he

dies as a member of that caste. There is no Hindu without caste, cannot escape caste and being bounded by caste from birth to death he becomes subject to social regulations and traditions of the caste over which he has no control.

The significance of a separate name for a caste lies in this, namely it makes caste an organised and an involuntary grouping. A separate and a distinctive name for a caste make caste asking to a corporation with a perpetual existence and a seal of separate entity. The significance of separate names for separate castes has not been sufficiently realised by writers on caste. In doing that they have lost sight of a most distinctive feature of caste social groups there are and there are bound to be in every society. Many social groups in many countries can be equated to various castes in India and may be regarded as their equivalent. Potters, Washermen, Intellectuals, as social groups are every where. But in other countries they have remained as unorganised and voluntary groups while in India they have become organised and involuntary i.e. they have become castes is because in other countries the social groups were not given name while in India they did. It is the name which the caste bears which gives it fixate and continuity and individuality. It is the name which defines who are its members and in most cases a person born in a caste carries the name of the caste as apart of his surname. Again it is the name which makes it easy for the caste to enforce its rules and regulations. It makes it easy in two ways. In the first place, the name of the caste forming a surname of the individual prevents the offender in passing off as a person belonging to another caste and thus escape the jurisdiction of the caste. Secondly, it helps to identify the offending individual and the caste to whose jurisdiction he is subject so that he is easily handed up and punished for any breach of the caste rules.

This is what caste means. Now as to the caste system. This involves the study of the mutual relations between different castes. Looked at as a collection of caste the caste system presents several features, which at once strike the observer. In the first place there is no inter-connection between the various castes, which form a systems each caste is separate and distinct. It is independent and sovereign in the disposal of its internal affairs and the endorsement of caste Regulations. The castes touch but they do not interpenetrate. The second feature relates to the order in which one caste stands in relation to the other castes in the system. That order is vertical and not horizontal.

In other words castes are not equal in status. Their order is based on inequality. One caste is higher or lower in relation to another. Castes form

an hierarchy in which one caste is at the top and is the highest, another at the bottom and it is the lowest and in between there are castes every one of which is at once above some caste and below some caste, The caste system is a system of gradation in which every caste except the highest and the lowest has a priority and precedence over some other caste:

How is this precedence or this superiority determined? This order of superiority and inferiority or this insubordination is determined by Rules (1) which are connected with religious rites and (2) which are connected with commonality.

Religion as a basis of Rules of precedence manifests itself in three ways. Firstly through religious ceremonies, secondly through incantations that accompany the religious ceremonies and thirdly through the position of the priest.

Beginning with the ceremonies as a source of rules of precedence it should be noted that the Hindu Scriptures prescribe sixteen religious ceremonies. Although those are Hindu ceremonies every Hindu Caste cannot by right claim to perform all the sixteen ceremonies. Few can claim the right to perform all. Some are allowed to perform certain ceremonies, some are not allowed to perform certain of the ceremonies. For instance take the ceremony of Upanayan, wearing the sacred thread. Some castes can't. Precedence follows this distinction in the matters of right to perform the ceremonies. A caste which can claim to perform all the ceremonies is higher in status than the caste which has a right to perform a few.

Turning to the Mantras it is another source for rules of precedence. According to the Hindu Religion the same ceremony can be performed in three different ways: (1) Vedokta, (2) Shastrokta and (3) Puranokta. In the Vedokta form the ceremony is performed with Mantras (incantations) from the Vedas. In the Shastrokta form the ceremony is performed with Mantras (incantations) from the Shastras. In the Puranokta form the ceremony is performed with Mantras (incantations) from the Puranas. Hindu Religious Scriptures fall into three distinct categories: (1) The Vedas which are four, (2) The Shastras which are six and (3) The Puranas which are eighteen. Although they are all respected as scriptures they do not all have the same sanctity. The Vedas have the highest sanctity. The Shastras stand next in order of sanctity and the Puranas have the lowest sanctity. The way the Mantras give rise to social precedence will be obvious if it is borne in mind that not every caste is entitled to have the ceremony performed in the Vedokta form. Three castes may well claim the right to the performance of one of the sixteen ceremonies. But it will be that one of it is entitled to perform it in the Vedokta form, another in the Shastrokta form and the

third only in the Puranokta form. Precedence goes with the kind of Mantra that a caste is entitled to use in the performance of a religious ceremony. A caste which is entitled to use Vedic Mantra is superior to a caste which is entitled to use Shastrik Mantra and a caste which is entitled to use Shastrik Mantras is higher than a caste which is entitled to use only Puranokta Mantras.

Taking the priest as third source of precedence connected with Religion Hinduism requires the instrumentality of a priest for the derivation of the full benefit from the performance of a religious ceremony. The priest appointed by the scriptures is the Brahmin. A Brahmin therefore is indispensable. But the scriptures do not require that a Brahmin shall accept the invitation of any and every Hindu irrespective of his caste to officiate at a religious ceremony. The invitation of which caste he will accept and of which he will refuse is a matter left to the wishes of the Brahmin. By long and well-established custom it is now settled at which caste he will officiate and at which caste he will not. This fact has become the basis of precedence as between castes. The caste at which a Brahmin will officiate is held as superior to a caste at whose religious functions a Brahmin will not officiate.

The second source for rules of precedence is commonality. It will be noticed that rules of marriage have not given rise to rules of precedence as rules of commonality have. The reason lies in the distinction between the rules prohibiting intermarriage and interdining. That difference is obvious. The prohibition on intermarriage is such that it can not only be respected but it can be carried out quite strictly. But the prohibition of interdining creates difficulties. It cannot be carried out quite strictly in all places and under all circumstances. Man migrates and must migrate from place to place. In every place he happens to go he may not find his castemen. He may find himself landed in the midst of strangers. Marriage is not a matter of urgency but food is. He can wait for getting himself married till he returns to the society of his castemen. But he cannot wait for his food. He must find it from somewhere and from someone. Question arises from which caste he can take food if he has to. The rule is that he will take food from a caste above his but will not take food from a caste, which is below his. There is no way of finding how it came to be decided that a Hindu can take food from one caste and not from another. By long series of precedent every Hindu knows from what caste he can take food and from what caste he cannot. This is determined chiefly by the rule followed by the Brahmin. A caste is higher or lower according as the Brahmin takes from it food or not. In this connection the Brahmin has a very elaborate set of

rules in the matter of food and water. (1) He will take only water from some and not from others. (2) A Brahmin will not take food cooked in water by any caste. (3) He will take only food cooked in oil from some castes. Again he has as a set of rules in the matter of the vessel, in which he will accept food and water. He will take food or water in an earthen vessel from some caste, only in metallic vessel from some and only in glass vessel from others. This goes to determine the level of the caste. If he takes food cooked in oil from a caste its status is higher than the caste from which he will not. If he takes water from a caste it is higher than the caste from which he will not. If he takes water in a metallic vessel that caste is higher than the caste from which he will take water in an earthen vessel and the caste from which he will take water in an earthen vessel is higher than the caste from which he will take water in a glass vessel. Glass is a substance which is called *Nirlep* (which conserves no stain) therefore a Brahmin can take water in it even from the lowest. But other metals do conserve stains. Contaminating character of the stain depends upon the status of the person who has used it. That status depends upon the Brahmin's will to accept water in that vessel.

These are some of the factors which determine the place and status of a caste in this Hindu hierarchical system of castes.

Such is caste and such is caste system. Question is, is this enough to know the Hindu Social Organisation. For a static conception of the Hindu Social Organisation an idea of the caste and the caste system is enough. One need not trouble to remember more than the facts that the Hindus are divided into castes and that the castes form a system in which all hang on a thread which runs through the system in such a way that while encircling and separating one caste from another it holds them all as though as it was a string of tennis balls hanging one above the other. But this will not be enough to understand caste as a dynamic phenomenon. To follow the workings of caste in action it is necessary to note one other feature of caste besides the caste system, namely class-caste system.

The relationship between the ideas of caste and class has been a matter of lively controversy. Some say that caste is analogous to class. Others hold that the idea of caste is analogous to class and that there is no difference between the two. Others hold that the idea of caste is fundamentally opposed to that of class. This is an aspect of the subject of caste about which more will be said hereafter. For the present it is necessary to emphasis one feature of the caste system which has not been referred to here in before. It is this. Although caste is different from and opposed to the notion of class yet the caste-system as distinguished from caste

recognises a class system which is somewhat different from the graded status referred to above. Just as the Hindus are divided into so many castes, castes are divided into different classes of castes. The Hindu is caste conscious. He is also class conscious. Whether he is caste conscious or class conscious depends upon the caste with which he comes in conflict. If the caste with which he comes in conflict is a caste within the class to which he belongs he is caste conscious. If the caste is outside the class to which he belongs he is class conscious. Any one who needs any evidence on this point may study the Non-Brahmin Movement in the Madras and Bombay Presidency. Such a study will leave no doubt that to a Hindu caste periphery is as real as class periphery and caste consciousness is as real as class-consciousness.

Caste, it is said, is an evolution of the Varna System. I will show later on that this is nonsense. Caste is a perversion of Varna, at any rate it is an evolution in the opposite direction. But while Caste has completely perverted the Varna System it has borrowed the class system from the Varna System. Indeed the Class-Caste System follows closely the class cleavages of the Varna System.

Looking at the caste system from this point of view one comes across several lines of class cleavage which run through this pyramid of castes dividing the pyramid into blocks of castes. The first line of cleavage follows the line of division noticeable in the ancient Chaturvarna system. The old system of Chaturvarna made a distinction between the first three Varnas, the Brahmins, Kshatriyas, Vaishyas, and the fourth Varna namely the Shudras. The three former were classes as the Regenerate classes. The Shudra was held as the unregenerate class. This distinction was based upon the fact that the former were entitled to wear the sacred thread and study the Vedas. The Shudra was entitled to neither and that is why he was regarded as the unregenerate class. This line of cleavage is still in existence and forms the basis of the present day class division separating the castes which have grown out of the vast class of Shudras from those which have grown out of the three classes of Brahmins, the Kshatriyas and Vaishyas. This line of class cleavage is the one which is expressed by the terms High Castes and Low Castes and which are short forms for High Class Castes and Low Class Castes.

Next after this line of cleavage there runs through the pyramid a second line of class cleavage. It runs just below the Low Class Castes. It sets above all the castes born out of the four Varnas i.e. The High Castes as well as the Low Castes above the remaining Castes, which I will merely describe as the 'rest'. This line of class cleavage is again a real one and follows the well

defined distinction which was a fundamental principle of the Chaturvarna System. The Chaturvarna System as is pointed out made a distinction between the four Varnas putting the three Varnas above the fourth. But it also made an equally clear distinction between those within the Chaturvarna and those outside the Chaturvarna. It had a terminology to express this distinction. Those within the Chaturvarna high or low. Brahmins or Shudras were called *Savarna* i.e. those with the stamp of the Varna. Those outside the Chaturvarna were called *Avarna* i.e. those without the stamp of Varna. All the Castes, which have evolved out of the four Varnas, are called *Savarna Hindus*—which is rendered in English by the term caste Hindus. The 'rest' are the *Avarnas* who in present parlance spoken of by Europeans as Non-Caste Hindus i.e. those who are outside the 4 original castes or Varnas.

Much that is written about the Caste System has reference mostly to the Caste-System, among the *Savarna Hindus*. Very little is known about the *Avarna Hindus*. Who are these *Avarna Hindus*, what is their position in Hindu Society, how are they related to the *Savarna Hindus*, are questions to which no attention has so far been paid. I am sure that without considering these questions no one can get a true picture of the social structure the Hindus have built. To leave out the Class cleavage between the *Savarna Hindus* and the *Avarna Hindus* is to relate Grimm's Fairy Tale which leaves out the witches, the goblins and the ogres.

The *Avarna Hindus* comprise three divisions (1) Primitive Castes, (2) Criminal Castes and (3) The Untouchable Castes. The total population of persons comprising these three classes is by no means small. The population of the Primitive Tribes in India according to the Census of 1931 is stated to be about 25 millions. The total population of persons listed as Criminal is somewhere about 4 1/2 millions. The total population of Untouchables in 1931 was about 50 millions. The grand total of these three comes to 79 1/2 millions.

What is the relation of the *Savarna Castes* to the *Avarna Castes*? The cleavage between the *Savarna Castes* and the *Avarna Castes* is not uniform in its consequences with the result that the position created is not easy to grasp. The line of the cleavage running between the *Savarna Castes* and the *Avarna Castes* produces a relationship between the *Savarna Castes* and the two *Avarna Castes*—the Primitive and the Criminal Castes which is different from the relationship which it produces between the *Savarna Castes* and the last of the *Avarna Castes* namely the Untouchables. This line of cleavage between the *Savarna Castes* and the first two of the *Avarna Castes* is a cleavage between kindred and friends. It does not make

intercourse on respectful terms between the two impossible. The cleavage between the Savarna Castes and the Untouchables is of a different kind. It is a cleavage between two non-kindred and hostile groups. There is no possibility of friendly intercourse on respectable terms.

What is the significance of this line of cleavage? On what is it based? Although the cleavage is definite the basis of it has not been defined. But it seems that the basis of cleavage is the same as that which exists between the Dwijas and the Shudras. Like the Shudras the Avarna Castes are composed of unregenerate people. They are not twice born and have no right to wear the sacred thread. This also brings out two facts which otherwise are lost sight of. The first fact is that the difference between the Shudra Castes of the Savarna division of cast's and the Primitive and the Criminal Castes of the Avarna division is very thin. Both are touchable and both are unregenerate. The difference is one of cultural development. But although the cultural difference between the two sections is great—as great as there is between a highly cultured and the unmitigated barbarian—from the point of view of the orthodox Hindu, the difference between them is one of degree. It is to mark this difference in culture that the Hindus invented a new terminology which recognised two classes of Shudras, (1) Sat-Shudras and (2) Shudras. Calling the old body of Shudras as Sat Shudras or cultured Shudras and using the term Shudras to those comprising the Primitive Castes who had come within the pale of Hindu Civilisation. The new terminology did not mean any difference in the rights and duties of Shudras. The distinction pointed out those Shudras who were fit for associated life with the Dwijas and those who were less fitted for it.

What is the relation of Avarna Castes to one another? Do they exist as mere collection of castes or have they any class cleavages? They are certainly mere collection of Castes. There are certainly lines of class cleavages running through this block of Avarna Castes. Whether there is a line of class cleavage running between the Primitive Castes and the Criminal Castes may be a matter of some doubt. Perhaps the line is faint. But there is no doubt that there is a very definite a very broad and a very emphatic line of cleavage between the Primitive Castes and the Criminal Castes and the Untouchables. The former two have a very clear notion that they are the higher classes and the Untouchables are the lower classes within this block of Avarna Castes.

The discussion carried on so far reveals three characteristic features of Hindu Social Organisation: (1) Caste, (2) A hierarchical System of Castes and (3) A Class System cutting into the Caste System. Undoubtedly the structure is a very complicated one and it is perhaps difficult for one who

has not been woven into it to form a true mental picture of the same. Perhaps a diagrammatic presentation may be helpful. I give below one such representation which in my judgment is calculated to give the idea of this social structure of the Hindus.

A Caste Hindus : C Caste Hindus		: E	Non-Caste Hindus Avarna Castes'	G Non-caste Hindus
Savarna Castes	Savarna Castes			
Class 1	Class 11		Class III	Class IV
High Castes Dwijas— Castes evolved out of	Low Caste : Shudras-' Castes evolved		Primitive Castes Criminal Castes	Untouchables
the three Varnas.	out of the			
Brahmins,	4th Varna			
Kshatriyas and Vaishas.	namely Shudras.	1		

This diagram is left blank in the MS.—Ed.

This diagram presents a Class-Caste-System of the Hindus and is so drawn as to give a true and a complete picture of their social organisation. This diagram brings out several of its important features. It shows that there are two divisions of Hindus (1) Savarna Hindus and (II) Avarna Hindus. It shows that within the first division there are two classes of Castes (1) Dwijas and (2) Shudras and within the second division there are two Classes of castes (1) Primitive and Criminal Castes and (2) The Untouchable Castes. The next thing to note is that each caste is enclosed and separated from the rest a fact which is not shown in the diagram each of the four classes of Castes is grouped together and placed within a class enclosure. This enclosure segregates a class of a Caste and marks it off from another class. A class of Castes is not as organised as a Caste is. But a feeling of Class is there. The third thing to note is the nature of partitions used for the enclosures. They are of various strengths, some are

permanent, some are temporary. The partition between the Dwijas Castes and the Shudras Castes is not a partition at all. It is only a curtain. It is not a partition at all. It is intended to keep them aloof. It is not intended to cut them as under. The line of cleavage between the Shudra Castes and the first two of the Avarna Castes is a regular partition. But it is both thin and small. It can be jumped over. The partition separates but does not cause severance. But the partition between these three classes and the Untouchables is a real and irremovable partition. It is a barbed wire fence and its intention is to mark a severance. To express the same thing in a different way the first three enclosures are so placed that they are one within the other. The first partition between the Dwijas and the Shudra Castes may be removed the two become the occupants of one enclosure instead of two separate enclosures. Similarly the second partition may be removed in which case the Castes which are Dwija, Shudra, Primitive and Criminal form one whole—if not a single whole—occupying one single enclosure. But the third partition can never be removed. Because all three Classes of Castes are united on one issue namely that they shall not be *one* (*This space is left blank in the typed copy of MS. The word 'one' is introduced by us.—Ed.*) with the Untouchables as one united body of people. There is a bar sinister, which serves the Untouchables from the rest and compels them to be apart and outside.

The diagram shows the different Classes of Castes one above the other. This is done to mark the hierarchy, which is an important feature of the Caste System. I have described the two classes of the Savarna Castes as High Class Castes and Low Class Castes. But I have not described the other two classes of Avarna Castes as lower Class Castes and lowest Class Castes. In a sense this would have been correct. In general social esteem they are no doubt lower and lowest in status. But in another sense this would not be appropriate. The terminology of high, low, lower and lowest assumes that they are parts of one whole. But are the Avarna Castes and the Savarna Castes parts of one whole? They were not. The Primitive and the Criminal Castes were not in contemplation when the plan of the Varna System, the parent of the present caste system, was laid. Consequently nothing is said about their status and position in the rules of the Varna System. But that is not the case with the Untouchables. They were within the contemplation of the Varna System and the Rule of the Varna System with regard to the Untouchables is very clear and very definite. The rule as laid down by Manu the Hindu Law giver is that there are only four Varnas and that there is not to be a fifth Varna. The reformers who are friends of Mr. Gandhi in his campaign for removal of Untouchability are

endeavouring to give a new meaning to the statement of Manu. They say that Manu has been misunderstood. According to Manu there is no fifth Varna and therefore he intended to include the Untouchables into the 4th Varna namely the Shudras. But this is an obvious perversion. What Manu meant was there were originally four Varnas and four they must remain. He was not going to admit the Untouchables into the House the ancient Hindus had built by enlarging the Varna System to consist of five Varnas. That is what he meant when he said that there is not to be a fifth Varna. That he wanted the Untouchables to remain out of the Hindu social structure is clear from the name by which he describes the Untouchables. He speaks of them as Varna—Bahyas (those outside the Varna System). That is the difference between the Primitive and Criminal Castes and the Untouchables. There being no positive injunction against their admission in Hindu Society they may in course of time become members of it. At present they are linked to Hindu Society and hereafter they may become integrated into it and become part of it. But the case of the Untouchables is different. There is positive injunction against their incorporation in Hindu Society. There is no room for reform. They must remain separate and segregated without being a part of the Hindu Society. The Untouchables are not a part of the Hindu Society. And if they are a part they are a part but not of the whole. The idea showing the connection between the Hindus and the Untouchables was accurately expressed by Ainapure Shastri the leader of the orthodox Hindus at a Conference held in Bombay. He said that the Untouchables were related to the Hindus as a man is to his shoe. A man wears a shoe. In that sense it is attached to man and may be said to be a part of the man. But it is not part of the whole for two things that can be attached and detached can't be said to form parts of one whole. The analogy though is none the less accurate.

CHAPTER 3

THE ROCK ON WHICH IT IS BUILT

Hindu Society is a house of Castes. Hindus are not a people. They are the aggregates of groups of people formed into castes. This is its peculiarity. This is what has struck the stream of foreigners who have visited India in the course of history. Notwithstanding this there are however people who endeavour to say that there is nothing peculiar about caste. For instance Prof. Baines remarks:

"There is little in the system which is not to be found, or which has not at some time or other existed, in other countries, even of the West, though it

has there been long ago worn away by other influences. The crystallisation of certain bodies into definite orders or classes, for instance, is a common, almost a universal, trait and among them the tendency to become hereditary and as exclusive or aspiring as circumstances allow may almost be called natural". The argument may be strengthened by reference to the social organisation of Primitive peoples. In Primitive Society man is never found alone.

The commonest and therefore the most natural condition of men are to live in-groups. This social grouping has taken many forms in the course of history. The family is one such social group which is universal and which has survived. The group larger than the immediate family was the clan. In its lowest terms, the clan (which also called kin, sept or sib) was supposed to be a group of individuals related to one another either through the mother or through the father. Far distant cousins might be considered in the relationship, and were regarded as members of the group. Again, the relationship may be purely fictitious, but from the social point of view this was as real a bond as that made by common blood. The next larger division than the clan is a social grouping of the clans. When the clans are organised into two groups each group is called a moiety. When it is organised in more than two groups each is called a phratry. This dual system was not by any means world-wide in distribution and the functions which the phratry or the moiety was intended to perform are not quite definitely known. But there is no doubt that each moiety and phratry was a social grouping in which there was a feeling of brotherhood between the members of clans associated together. The tribal groups come next. There were wide differences in the nature, character and structure of tribes. Tribes may be made up of village communities with no divisions into clans or moieties. They may have clans and no moieties, or moieties and no clans; or they may have both moieties and clans. Tribal consciousness was sometimes strong or some time weak. Although in the formation of tribal groups there was neither a definite rule nor a single line of evolution, there were certain common features present namely a common dialect, common customs, a more or less definite territory and some form of Government to which the whole tribe was present. Larger than the tribe was the confederacy or union of Tribes. But this was very uncommon. A loose and informal alliance to meet some specific danger may bring about a union of tribes. It is very seldom that a definite compact is found among the primitive peoples. The famous Iroquois confederacy is one of the exceptions.

These are social groups based either upon the idea of kindred or on that of locality. There were groups among primitive peoples, where the cleavage

is along other lines. These other lines of grouping took as its basis sex, age or some other criteria. As a form of social grouping, there is nothing new or nothing peculiar in this institution of caste. A caste is like a clan and like the clan it is only a form of social grouping.

The analogy between caste and clan may be admitted although it must be strongly insisted that as to meaning and purpose, caste is antagonistic to clan. There is no clan system comparable to the caste system. There is no gradation of clans as there is no Class-Clan System to match the Class-Caste System. Indeed the clan organisation of the Primitive people is a complete antithesis of the caste organisation of the Hindus. I admit the analogy only to drive my point. To my mind the question whether the institution of caste is natural or unnatural, peculiar or common is no doubt an interesting and instructive. But it is not as important as the question I want to raise. That question is why has caste endured, remained in tact when similar social groupings which were existing in other countries have vanished with the growth of civilisation.

The Romans had a Social organisation very similar to the Hindus. When all similar institutions have vanished why has caste alone endured? Why do people obey its rules, what is the sanction for Caste?

Obedience by men to rules of society is everywhere secured by means of four sanctions. They are (1) the natural, (2) popular, (3) legal and (4) religious. Which of these supports the caste system? But before going into that question it would be desirable to describe the manner each of these sanctions operates.

The natural sanction operates through habit. When a person is habituated to act in a certain way nothing is required to force him to act in that way. He becomes automation and the regularity of the act is guaranteed as a matter of routine.

Popular sanction works through public opinion. It was the sense of approbation and disapprobation prevalent in Society in relation to certain ways and practices. A certain way becomes folkway and Acts in conformity with an established folkway, receives approbation and an Act contrary to it is regarded with disapprobation.

There is nothing special either in the natural sanction or popular sanction. They are to be found everywhere and behind everything that is social in its import. Their native force is precarious and wherever it possesses more than its ordinary efficacy it is only when they are derived from either of the other two sanctions. Legal sanction and Religious sanction are the only two sanctions, which are capable of sustaining any given institution.

There is no doubt that caste had the sanction of Hindu Law. Every Hindu Law Book has recognised Caste as a legal institution a breach of which was an offence and entailing punishment. The Law Book of Manu called Manav Dharma Shastra is the oldest and the most authoritative Law Book of the Hindus. It would be enough to quote from it texts showing that Caste was recognised by Law.

Manu, the Hindu Lawgiver gives legal recognition to the institution of the four Varnas. To lay down the law of the four Varnas seems to be the principal object of Manu's code. This is clear from the opening verses of the Code. They state that:

I.1. The great sages approached Manu, who was seated with a collected mind, and, having duly worshipped him spoke as follows:

I.2."Deign, divine one, to declare to us precisely and in due order the sacred laws of each of the (four chief) castes (varna) and of the intermediate ones."

Not only he gives it his legal sanction, he makes it incumbent upon the King to uphold the institution:

VII.35. The king has been created (to be) the protector of the castes (varna) and orders, who, all according to their rank, discharge their several duties."

VIII.24. All castes (varna) would be corrupted (by intermixture), all barriers would be broken through, and all men would rage (against each other) in consequence of mistakes with respect to punishment."

Manu makes breach of Caste a sin and prescribes three different punishments to one who has become a Patit by loss of caste.

The first punishment is punishment after death. Manu says:

"XII.60. He who has associated with outcasts, he who has approached the wives of other men, and he who has stolen the property of a Brahmana becomes Brahmarakshasa." In this life the punishment which a Patit has to undergo was twofold. One was excommunication. The nature and character of excommunication prescribed by Manu has been prescribed by him in the following terms:

"XI. 181. He who associates with an outcast, himself becomes an outcast after a year, not by sacrificing for him, teaching him, or forming a matrimonial alliance with him, but by using the same carriage or seat, or by eating with him.

"XI. 182. He who associates with any one of those outcasts, must perform, in order to atone for (such) intercourse, the penance prescribed for that (sinner).

"XI. 183. The Sapindas and Samanodakas of an outcast must offer (a libation of) water (to him, as if he were dead), outside (the village), on an inauspicious day, in the evening and in the presence of the relatives, officiating priests, and teachers.

"XI. 184. A female slave shall upset with her foot a pot filled with water, as if it were for a dead person; (his Sapindas) as well as the Samanodakas shall be impure for a day and a night.

"XI. 185. But thenceforward it shall be forbidden to converse with him, to sit with him, to give him a share of the inheritance, and to hold with him such intercourse as is usual among men.". The other was disinheritance.

"IX.201. Eunuchs and outcasts, (persons) born blind or deaf, the insane, idiots and the dumb, as well as those deficient in any organ (of action or sensation), receive no share".

"XI. 186. And (if he be the eldest) his right of primogeniture shall be withheld and the additional share, due to the eldest son, and in his stead a younger brother, excelling in virtue, shall obtain the share of the eldest".

The only way to avoid these two punishments of excommunication and disinheritance was to do penance in the prescribed form. Penance was the only remedy. Says Manu:

"XI. 187. But when he has performed his penance, they shall bathe with him in a holy pool and throw down a new pot, filled with water.

"XI. 188. But he shall throw that pot into water, enter his house and perform, as before, all the duties incumbent on a relative".

There was a distinction between a male Patit and a female Patit. Neither was exempt. The Rule applies to both, for Manu says:

"XI. 189. Let him follow the same rule in the case of female outcast; but clothes, food, and drink shall be given to them, and they shall live close to the (family) house". There can be no doubt that the legal sanction was powerful sanction. The punishment prescribed by law for breach of Caste was two folds. It involved excommunication and loss of right to inherit. How formidable these punishments were has been well described by Sir Thomas Strange in his treatise on Hindu Law. Referring to the subject he says:

"It remains to consider one case, that may be said to be, with reference to personal delinquency, *instar omnium*—occurring in every enumeration on the subject as a cause of exclusion, namely: degradation, or the case of the outcaste. Accompanied with certain ceremonies, its effect is, to exclude him from all social intercourse, to suspend in him every civil function, to disqualify him for all the offices, and all the charities of life;—he is to be deserted by his connections, who are from the moment of the sentence

attaching upon him, to desist from speaking to him, from sitting in his company, from delivering to him any inherited, or other property, and from every civil or usual attention, as inviting him on the first day of the year, or the like, so that a man under these circumstances, might as well be dead; which, indeed, the Hindu Law considers him to be, directing libations to be offered to Manes, as though he were naturally so. This system of privations, mortifying as it must be, was enforced under the ancient law, by denouncing a similar fate to any one, by whose means they were endeavoured to be eluded; but this severity was moderated at the beginning of the present age, in which it is said "the sinner alone bears his guilt", the law deeming so seriously of non-intercourse, that if one who ought to associate at meals with another, refuses to do so, without sufficient cause, he is punishable. And, in the Bombay reports, there is an instance of an action of damages, for a malicious expulsion from caste.

The analogy between degradation by the Hindu law, and excommunication, as it prevailed formerly among us, holds, not merely in the general nature and effect of the proceeding, but in the peculiar circumstance of the one and the other being two-fold. As, with us, there was the less, and the greater excommunication, so, of offences considered with reference to their occasioning exclusion from inheritance among the Hindus, they may also be regarded in a two-fold point of view.

This we learn from a case that was before the Sudder Dewanny Adawlut of Bengal, in 1814, in which the official Pundits, having been referred to, distinguished between "those which involve partial and temporary degradation, and those which are followed by loss of caste", observing that "in the former state, that of partial degradation, when the offence which occasions it is expiated, the impediment to succession is removed; but in the latter, where the degradation is complete, although the sinfulness of the offence may be removed by expiatory penance, yet the impediment to succession still remains, because a person finally excluded from his tribe must ever continue to be an outcaste".

In the case alluded to, the party in question having been guilty of a series of profligate and abandoned conduct, having been shamefully addicted to spirituous liquors, having been in the habit of associating and eating with persons of the lowest description, and most infamous character; having wantonly attacked and wounded several people at different times; having openly cohabited with a woman of the Mahomedan persuasion; and having set fire to the dwelling house of his adoptive mother, whom he had more than once attempted to destroy by other means", the Pundits declared that "of all the offences proved to have been committed by Sheannauth,

one only, namely, that of cohabiting with a Mahomedan woman, was of such a nature, as to subject him to the penalty of expulsion from his tribe irrevocably,"and of this opinion was the Court.

The power to degrade is, in the first instance, with the Castes themselves, assembled for the purpose, from whose sentence, if not acquiesced in, there lay an appeal to the King's Courts. In the case that has been cited, the question arose incidentally, upon a claim of inheritance, and that case shews that the power amounts to a species of Censorship, applicable to the morals of the people, in instances to which the law, strictly speaking, would not perhaps otherwise extend. The sentences can be inflicted only for offences committed by the delinquent in his existing state; and, where the offence is of an inferior nature, to justify it, it must have been repeated. What distinguishes degradation from other causes of exclusion is, that it extends its effects to the son, who is involved in his father's forfeiture, if born subsequent to the act occasioning it. Born before, he is entitled to inherit, and takes, as though his father were dead.

Whereas, in every other instance of exclusion, the son, if not actually in the same predicament with his father, succeeds, maintaining him; the same right extending as far as the great grandson. And, with regard to the father, or delinquent himself, where the exclusion from inheriting is not for natural defects, the cause must have arisen, previous to the division, or descent of the property; if it do not occur till after, the succession is not divested by it. Hence, adultery in the wife during coverture, bars her right of inheritance; divesting it also, after it has vested; the Hindu widow resembling, in this respect, the condition of ours in most instances of copyhold dower, and holding it, like her, *Dum casta fuerit* only; according to an opinion of great respectability, that for loss of caste, unexpiated by penance, and unredeemed by atonement, it is forfeited. In general, the law of disqualification applies alike to both sexes.

"It appearing, then, that the incapacity to inherit, except in the instance of the outcaste, is personal merely; that one excluded may be said, in every case, to be entitled to be maintained; and that, in most, it is in his power, at any time, to restore himself to his rights; whatever may be thought of the wisdom of some of these provisions, it cannot be said that they are universally destitute of justice, or, in any instance, totally devoid of humanity. Nor, in comparing this part of the law with our own, ought we to forget, that the latter has made none, for preventing the absolute disinheriting of children by will.

"It will appear, in a subsequent chapter, that, on entry into either of the two religious orders, the devotee (like the professed monk with us before

the Reformation) becomes *Civiliter mortuus*; and the next heir succeeds, as though he were naturally deceased. and, as the devotee himself, abdicating secular concerns, is incapacitated from inheriting, so is the religious pretender, and the eventual Apostate. Under the former term may be included Hypocrites and Impostors, used synonymously for those who, usurping sacred marks, practise austerities with an interested design.

The remaining cause of exclusion to be noticed, is, an Incompetent marriage; that is, where the husband and wife are descended from the same Stock. Such a marriage being incongruous, the issue of it cannot inherit, excepting among Shudras. And the consequence is the same, where the marriage has not been according to the order of Class.

"The heir, or heirs, under no disability, having succeeded to the inheritance, it is next to be seen, to what charge this is liable." Has Caste also a religious sanction? The Vedas recognise Caste. The Rig Vedas recognised Caste and also explains its origin in the following passage:

“1. Purusha has a thousand heads, a thousand eyes, a thousand feet. On every side enveloping the earth, he overpassed (it) by a space of ten fingers.

2. Purusha himself is this whole (universe), whatever has been and whatever shall be. He is also the lord of immortality, since (or, when) by food he expands.

3. Such is his greatness, and Purusha is superior to this. All existences are a quarter of him; and three fourths of him are that which is immortal sky.

4. With three-quarters Purusha mounted upwards. A quarter of him was again produced here. He was then diffused everywhere over things, which eat, and things, which do not eat.

5. From him was born Viraj, and from Viraj, Purusha. When born, he extended beyond the earth, both behind and before.

6. When the gods performed a sacrifice with Purusha as the oblation, the spring was its butter, the summer its fuel, and autumn its (accompanying) offering.

7. This victim, Purusha, born in the beginning, they immolated on the sacrificial grass. With him the gods, the Sadhyas, and the rishis sacrificed.

8. From that universal sacrifice were provided curds and butter. It formed those aerial (creatures) and animals both wild and tame.

9. From that universal sacrifice sprang the *rich* and *saman verses*, the *metres*, and *yajush*.

10. From it sprang horses, and all animals with two rows of teeth; kine sprang from it; from it goats and sheep.

11. When (the gods) divided Purusha, into how many parts did they cut him up? What was his mouth? What arms (had he)? What (two objects) are said (to have been) his thighs and feet?

12. The Brahman was his mouth; the Rajanya was his arms; the being (called) the Vaishya, he was his thighs, the Shudra sprang from his feet.

13. The moon sprang from his soul (manas), the sun from his eye, Indra and Agni from his mouth and Vayu from his breath.

14. From his navel arose the air, from his head the sky, from his feet the earth, from his ear the (four) quarters; in this manner (the gods) formed the worlds.

15. When the gods, performing sacrifice, bound Purusha as a victim, there were seven sticks (stuck up) for it (around the fire), and thrice seven pieces of fuel were made.

16. With sacrifice the gods performed the sacrifice. These were the earliest rites. These great powers have sought the sky, where are the former Sadhyas, gods."

The Brahmanas also recognise Caste. In the Satapatha-Brahmanas Caste is mentioned in the following terms:

"23. Brahma (here, according to the commentator, existing in the form of Agni, and representing the Brahman caste was formerly this (universe), one only. Being one, it did not develope. It energetically created an excellent form, the Kshattra, viz., those among the gods, who are powers (Kshattrani), Indra, Varuna, Soma, Rudra, Parjanya, Yama, Mrityu, Isana. Hence nothing is superior to the Kshattra. Therefore the Brahman sits below the Kshattriya at the rajasuya-sacrifice; he confers that glory on the Kshattra (the royal power). This, the Brahma, is the source of Kshattra. Hence, although the king attains supremacy, he at the end resorts to the Brahman as his source. Whoever destroys him (the Brahman) destroys his own source. He becomes most miserable, as one who has injured a superior.

24. He did not develope. He created the Vis.—viz., those classes of gods who are designated by troops, Vasus, Rudras, Adityas, Visvedevas, Maruts.

25. He did not develope. He created the Shudra Class, Pushan. This earth is Pushan; for she nourishes all that exists.

26. He did not develope. He energetically created an excellent form, Justice (Dharma). This is the ruler (kshattra) of the ruler (kshattra), namely Justice. Hence nothing is superior to justice. Therefore the weaker seeks (to overcome) the stronger by justice, as by a king. This justice is truth. In consequence they say of a man who speaks truth, 'he speaks justice'; or of man who is uttering justice, 'he speaks truth'. For this are both of these.

27. This is the Brahma, Kshattra, Vis and Sudra. Through Agni it became Brahma among the gods, the Brahman among men, through the (divine) Kshattriya a (human) Kshattriya, through the (divine), Vaishya a (human) Vaisya, through the (divine) Sudra a (human) Sudra. Wherefore it is in Agni among the gods and in a Brahman among men, that they seek after an abode."

Taittiriya Brahmana, i. 2, 6, 7. *daiyyo vai varno brahmanh assuryyo sudrah.*"The Brahman caste is sprung from the gods; the Sudra from the Asuras."

It must be admitted that the legal and the religious sanction were both powerful engines to keep caste going. But there is no doubt that the religious sanction was the primary sanction and caste has been maintained solely by the force of Religious Sanction. This is clear from two circumstances. That the legal sanction was very seldom invoked will have to be admitted. That means that the maintenance of caste was secured by other means. Secondly this legal sanction was in use only till 1850. It was lifted or rather done away with by the Caste Disabilities Removal Act passed in that year by the British Government. Although the legal sanction is withdrawn, caste has gone on without abatement. That could not have happened if caste had not in the Religious Sanction another and more powerful sanction independent of the legal sanction.

That the Religious Sanction is the highest sanction which an institution or a belief can have to support and sustain it, is beyond question. Its power is boundless in its measure and tremendous in its curb. But it is very seldom understood how and whence this Religious Sanction gets this high-grade horsepower. To appreciate this it is necessary to note that the source of authority behind the Religious Sanction is two-fold.

In the first place what is Religious is also social. To quote Prof. Durkheim* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_7

"The really religious beliefs are always common to a determined group, which makes profession of adhering to them and of practising the rites connected with them. They are not merely received individually by all the members of this group; they are something belonging to the group, and they make its unity. The individuals which compose it feel themselves united to each other by the simple fact that they have a common faith." In the second place what is Religious is Sacral. To quote Durkheim again: mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_8

"All known religious beliefs whether simple or complex, present one common characteristic; they presuppose a classification of all the things,

real and ideal, of which men think, into two classes or, opposed groups, generally designated by two distinct terms- which are translated well enough by the words *profane* and *sacred* In all the history of human thought there exist no other example of two categories of things so profoundly differentiated or so radically opposed to one another. The traditional opposition of good and bad is nothing besides this; for the good and the bad are only two opposed species of the same class, namely morals, just as sickness and health are two different aspects of the same order of facts, life, while the Sacred and the profane have always and everywhere been conceived by the human mind as two distinct classes, as two worlds between there is nothing in common. Religious beliefs are the representations which express the nature of sacred things and the relations which they sustain, either with each other or with profane things (while) rites are the rules of conduct which prescribe how a man should comfort himself in the presence of these Sacred objects."

From this it will be clear that the Social, Religious and Sacral beliefs are closely knit. Religious is social though all that is social is not religious. Sacral is social though all that is social is not sacral. On the other hand the religious is both social and sacral.

One source of authority behind the religious sanction comes from the fact, that is, religion is social and the religious beliefs are social beliefs. Religious beliefs are enforced on the individual by the group in the same manner and for the same reasons which leads it to enforce its other non-religious and purely social beliefs. The object is to maintain the integrity of the group and as the integrity of the group is more closely bound up with its religious beliefs, the strictness and severity with which a group punishes the breach of a religious belief is usually greater than the degree of strictness and severity it employs for the chastisement of a person guilty of a breach of a non-religious belief. Social force has an imperative authority before which the individual is often powerless. In the matter of a religious belief the imperative authority of the social force is tempered as steel is by the feeling that it is a breach of a graver kind and gives religious sanction a far greater force than a purely social sanction has.

The Sacral source of the authority behind religious sanction comes primarily from the individual and only secondarily from the group. That is the noteworthy peculiarity of the social source of religious sanction. It prepares the individual to uphold the religious beliefs. It dispenses with the necessity of the group using its social group. That is why the sacral source of its authority makes religious sanction of such high order as to supersede all other sanctions indeed to dispense with them. That is why the Religious

sanction alone becomes sufficient to maintain the integrity of religious beliefs which even time and circumstances have proved powerless to affect. The way this happens is easy to follow. The Sacred inspires in the individual the sentiment of reverence and deference, which he certainly has not for the profane. To use the language of Durkheim,

"The simple defence inspired by men with high social functions is not different in nature from religious respect (for the sacred). It is expressed by the same movements: a man keeps at a distance from high personage; he approaches him only with precautions; in conversing with him, he used other gestures and language than that used with ordinary mortals."

The Sacred creates the sentiment of Reverence. It also creates the sentiment that it is inviolate. When a belief becomes consecrated as a sacred thing, it is forbidden to touch it, to deny it or to contest it. There is a prohibition of criticism of the Sacred. The Sacred is 'untouchable and above discussion'. When an individual is saturated with these sentiments, when these sentiments become a part of his being, he himself becomes an upholder and protector of what he is taught to regard as something sacred.

This is exactly what the Hindus have done in the matter of Caste. They have given caste a place in the Vedas. Caste has thereby become sacred because the Vedas are Sacred. It would be wrong to say that the Vedas are sacred because they are religious. The position is that they are religious because they are sacred.

It might appear that the Hindus have no name for the Veda directly expressing the feeling of sacredness, which the Hindu entertains towards the Vedas. Veda simply means knowledge. That may be so. But there can be no doubt that they regard the Vedas as sacred. Indeed the term they apply to Vedas expresses a far greater degree of reverence than the word sacred does. They call the Vedas *Shruti*, which means the word of God heard by (i.e. revealed to) man. In the primitive religion the Sacred is what man has made. In the Hindu religion the Sacred is what God has appointed it to be.

The Hindus regard the Vedas as the Sacred Book of their religion. They put the Vedas in a class by themselves. The Hindus hold mk:@MSITStore:C:\important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_9 that there are cycles of creations called *Kalpas*. At the end of every cycle there is a deluge and a new cycle of creation begins. At the end of a *Kalpa*, the Vedas are destroyed in the deluge. At the beginning of every *Kalpa* they are revealed by God. Accordingly the *Vedas* were destroyed in the deluge at the end of the last *Kalpa* and that the beginning of the present *Kalpa* commencing with the

Krita Yug, they were revealed by God to the *Rishis*. The Vedas are regarded by the Hindus as *Nitya* (eternal) *Anadi* (beginningless) and *Apaurusheya* (not made by man), In short the Vedas are the words of God and constitute God's ordinances to man.

Even if the Vedas were not called *Shruti* they would have had the impressiveness of the 'Sacred'. Religions have been variously classified by Prof. Max Muller. [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_10](#) Natural as against Revealed is one way of classifying them. Individual as against National is another way. The third way of classifying them is to call them Atheistic, Deistic, Dualistic, Polytheistic, Monotheistic, Henotheistic and Animistic. True and False is also another way of classifying Religions. Bookless Religions and Religions with books are two classes into which Religion could be grouped. This probably does not exhaust the ways of classifying Religions. For there remains one more distinction to be made, namely Religions which have founders and religions which have no founders.

These distinctions have social significance except two. They are the distinctions between Natural and Revealed and that between Bookless Religion and Book Religion. They differ in their function although that difference is not often noted.

The Book religion has a definite advantage over a Bookless religion. A Book religion is a Religion with a written constitution. A Bookless Religion is a Religion without a written constitution. A book religion creates the impression that it is true which a bookless religion cannot. By comparison with a book religion, a bookless religion wears the inferiority complex of being false. In the language of Max Muller Religions with books are alone "considered as real religions, and though they may contain false doctrines, they are looked upon as a kind of aristocracy to whom much may be forgiven, while the vulgar crowd of bookless or illiterate religions are altogether out of Court". [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_11](#) It is easy to understand the superiority accorded to a religion with a book over a bookless religion. When 'black on white' has become synonymous with true, it may seem very natural that a religion which is written, which is something black on white is not false. The Book serves as the voucher for truth. A religion without a book has no voucher.

The social significance of a religion with a book lies in the fact that it controls the mind of the people by giving them the impression that the religion contained in the book is true. It gives Religion authority over people and induces willing obedience in them.

But however a Religion may appear to be true by reason of the fact that it is a book religion, such appearance cannot save Religion from going under, if beliefs and rites empirically erroneous have crept into it. Man may go wrong in theory but his practical instincts will seldom allow him to go after a wrong theory for a long time. Unless therefore the religious beliefs of a social group are true, practically Religion must in the long run give way.

Herein comes the social significance of the distinction between Natural Religion and Revealed Religion. A Revealed Religion has superiority over Natural Religion. Natural Religion is used by several writers to certain historical forms of religion. Something which has grown along with the growth of people as result of the interaction between the needs of the peoples and the environment in which they are placed. A natural religion is made by man. Its sanction is the sense of truth and the voice of conscience that is to be found in man. A Revealed Religion does not rest on the authority of man. It is not man-made, it is God-made. Its sanction is God who is absolute truth and absolute good. The function of Revealed Religion is to make religion sacred therefore inviolate and immune from criticism.

The Vedas have the characteristics of both. They have the advantage, which a Religion with a book has over the Bookless Religion. They have the advantage, which a Revealed Religion has over Natural Religion.

This discussion is intended to enforce the conclusion that Caste being preached by the Vedas, it automatically gets the authority of the written book and the sanctity of the divine word. As a scheme propounded by the Veda it is doubly protected. Every one must accept Caste because it is divine truth and no body must attack it as an error without being guilty of sacrilege because it is sacred.

This is the Hindu view of Caste and the average Hindu is not impressed by the modern explanation of it by Risley with his racial theory, by Senart with his occupational theory, by Nesfield with his functional theory. He knows and he believes that Caste must have been created by God, because it is mentioned in the Vedas which is *Shruti* or the word of God. It is therefore eternal and true.

That Caste is divine, that caste is sacred and that caste must therefore remain eternal has been the line of defence adopted by the Brahmins whenever they have been called out to defend 'Caste' against the criticism of its opponents. This view of Caste comes out in its luminous colours in the controversy that once raged on the subject of Caste between Brahmins on the one hand and Buddha and his followers, on the other i.e.:

“If the belief was once established, that not only the simple effusions of the Rishis, but the pointed doctrines of the Brahmanas also, emanated from a divine source mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_12 and could not therefore be attacked by human reasoning, it is clear that every opposition to the privileges which the Brahmans claimed for themselves, on the sacred authority of the Veda, became heresy; and where the doctrines of the Brahmans were the religion of the people, or rather of the king, such opposition was amenable to the hierarchical laws of the state. The Brahmans themselves cared much more to see the divine authority of the Sruti as such implicitly acknowledged, than to maintain the doctrines of the Rishis in their original simplicity and purity. In philosophical discussions, they allowed the greatest possible freedom; and, although at first three philosophical systems only were admitted as orthodox (the two Mimansas and the Nyaya), their number was soon raised to six, so as to include the Vaiseshika, Sankhya, and Yoga-schools. The most conflicting views on points of vital importance were tolerated as long as their advocates succeeded, no matter by what means, in bringing their doctrines into harmony with passages of the Veda, strained and twisted in every possible sense. If it was only admitted that besides the perception of the senses and the induction of reason, revelation also, as contained in the Veda, furnished a true basis for human knowledge, all other points seemed to be of minor importance. Philosophical minds were allowed to exhaust all possible views on the relation between the real and transcendental world, the Creator and the created, the divine and the human nature. It was not from such lucubrations that danger was likely to accrue to the caste of the Brahmans. Nor was the heresy of Buddha Sakya Muni found so much in his philosophical doctrines, many of which may be traced in the orthodox atheism of Kapila. His real crime lay in his opposition to the exclusive privileges and abuses of the Brahmans. These abuses were sanctioned by the divine authority of the Veda, and particularly of the Brahmans. In attacking the abuses, Buddha attacked the divine authority on which they were founded, and the argument was short: he is a heretic; anathema etc.

“Buddha was Kshatriya. He was of principal origin, and belonged to the nobility of the land. He was not the first of his caste who opposed the ambition of the Brahmans. Several centuries before Buddha, Visvamitra, who, like Buddha, was a member of the royal caste, had to struggle against the exclusiveness of the priests. At that early time, however, the position of the Brahmans was not yet impregnable; and Visvamitra, although a Kshatriya, succeeded in gaining for himself and his family the rights for

which he struggled, and which the Brahmans had previously withheld from all but their own caste. King Janaka of Videha again, whose story is given in the Brahmanas, refused to submit to the hierarchical pretensions of the Brahmans, and asserted his right of performing sacrifices without the intercession of priests. However great the difference may have been between the personal character of these two men and of Buddha, the first principle of their opposition was the same. All three were equally struggling against the over-winning pretensions of a selfish priesthood.

“But while Visvamitra contented himself with maintaining the rights of his tribe or family, and became reconciled as soon as he was allowed to share in the profits of the priestly power, while King Janaka expressed himself satisfied with the homage paid to him by Yajnavalkya and other Brahmans, while, in short, successive reformers as they appeared were either defeated or gained over to the cause of the Brahmans, the seeds of discontent were growing up in the minds of the people. There is a dark chapter in the history of India, the reported destruction of all the Kshatriyas by Parsurama. It marks the beginning of the hierarchical supremacy of the Brahmans. Though the Brahmans seem never to have aspired to the royal power, their caste, as far as we know the history and traditions of India, has always been in reality the ruling caste. Their ministry was courted as the only means of winning divine favour, their doctrines were admitted as infallible, their gods were worshipped as the only true gods, and their voice was powerful enough to stamp the simple strains of the Rishis, and the absurd lucubrations of the authors of the Brahmanas, with a divine authority. After this last step, however, the triumph of Brahmanism was preparing its fall. In India, less than in any other country, would people submit to a monopoly of truth; and the same millions who were patiently bearing the yoke of a political despotism threw off the fetters of an intellectual tyranny. In order to overthrow one of the oldest religions of the world, it was sufficient that one man should challenge the authority of the Brahmans, the gods of the earth (Bhudeva), and preach among the scorned and degraded creatures of God the simple truth that salvation was possible without the mediation of priests, and without a belief in books to which these very priests had given the title of revelation. This man was BUDDHA, a SAKYA MUNI. Now if we inquire how Buddha's doctrines were met by the Brahmans, it is true that here and there in their philosophical works, they have endeavoured to overthrow some of his metaphysical axioms by an appeal to reason. An attempt of this kind we have, for instance, in Vachaspati Misra's commentary on the Vedanta Sutras. In commenting on the tenets of Buddha, that” ideas like those of

being, and not being, &c., do not admit of discussion", Vachaspati observes that the very fact of speaking of these ideas, includes the possibility of their conception; nay, that to affirm they do not admit of reasoning, involves an actual reasoning on them, and proves that the mind can conceive the idea of being as different from that of not-being.

"Such, however, were not the usual weapons with which Brahmanism fought against Buddhism. The principal objection has always been, that Buddha's teaching could not be true, because it did not derive its sanction from Sruti or revelation. The Brahmans, as a caste, would readily have allowed being and not being, and the whole of Buddha's philosophy, as they did the Sankhya philosophy, which on the most important points is in open opposition to the Vedanta. But while Kapila, the founder of the Sankhya school, conformed to the Brahmanic test by openly proclaiming the authority of revelation as paramount to reasoning and experience, Buddha would not submit to this, either for his philosophical (abhidharma), or for his much more important moral and religious doctrines (vinaya). No doubt it would have been easy for him to show how some of his doctrines harmonised with passages of the Veda, as in the Veda all possible shades of the human mind have found their natural reflection. If he had done so only for some of his precepts, such, for instance, as, "Thou shall not murder", "Thou shall not drink", "Thou shall eat standing", the Brahmans would readily have passed over other doctrines, even such as came into practice after Buddha's death, like "Who longs for heaven, shall worship the holy sepulchre", "He shall pull out his hair", &c. As he refused to do so, the line of argument taken by the Brahmans was simply confined to an appeal to revelation, in disproof of the possibility of the truth of Buddha's doctrines.

"There must be something very tempting in this line of argument, for we see that in later times the Buddhists also endeavoured to claim the same divine character for their sacred writings which the Brahmans had established for the Veda. A curious instance of this is given in the following discussion, from Kumarila's Tantra-varttika. Here the opponent (purva-paksha) observes, that the same arguments which prove that the Veda is not the work of human authors, apply with equal force to Sakya's teaching. His authority, he says, cannot be questioned, because his precepts are clear and intelligible; and as Sakya is not the inventor, but only the teacher of these precepts, and no name of an author is given for Sakya's doctrines, the frailties inherent in human authors affect them as little as the Veda. Everything, in fact, he concludes, which has been brought forward by the Mimansakas to prove the authority of the Veda, proves in the same

way the authority of Buddha's doctrine, Upon this, the orthodox Kumarila grows very wroth, and says: "These Sakyas, Vaiseshikas, and other heretics who have been frightened out of their wits by the faithful Mimansakas, prattle away with our own words as if trying in lay hold of a shadow.

They say that their sacred works are eternal; but they are of empty minds, and only out of hatred they wish to deny that the Veda is the most ancient book. And these would-be logicians declare even, that some of their precepts (which they have stolen from us,) like that of universal benevolence, are not derived from the Veda, because most of Buddha's other sayings are altogether against the Veda. Wishing, therefore, to keep true on this point also, and seeing that no merely human precept could have any authority on moral and supernatural subjects, they try to veil their difficulty by aping our own argument for the eternal existence of the Veda. They know that the Mimansakas have proved that no sayings of men can have any authority on supernatural subjects; they know also that the authority of the Veda cannot be contradicted, because they can bring forward nothing against the proofs adduced for its divine origin, by which all supposition of a human source have been removed.

Therefore, their hearts being gnawed by their own words, which are like the smattering of children, and having themselves nothing to answer, because the deception of their illogical arguments has been destroyed, they begin to speak like a foolish suitor who came to ask for a bride, saying, 'My family is as good as your family'. In the same manner they now maintain the eternal existence of their books, aping the speeches of others. And if they are challenged and told that this is our argument, they brawl, and say that we, the Mimansakas have heard and stolen it from them. For a man who has lost all scheme, who can talk away without any sense, and tries to cheat his opponent, will never get tired, and will never be put down!" Towards the end of this harangue, Kumarila adds, what is more to the point, that the Buddhas, who ascribe to everything a merely temporary existence, have no business to talk of an eternal revelation."

From the foregoing discussion it will be seen that Caste is born in religion which has consecrated it and made it Sacred so that it can be rightly and truly said that Religion is the Rock on which the Hindus have built their social structure.

Does this not show that Caste is a very peculiar institution not to be compared with other forms of social grouping? I venture to say that any one who maintains that there is nothing strange in caste simply does not know what Caste is. I repeat that Caste is Sacred, which is its distinguishing feature. Caste is Sacred, which is what makes it abiding.

Prof. Max Muller makes some very instructive observations on the effects of Religion with Sacred books on the progress of Society. Says Max Muller:

“History, however, teaches us another lesson, namely that codes of law are apt to become a kind of fetish, requiring an implicit and unquestioning submission, that their historical or natural origin is often completely forgotten, and that the old ideas of what is right and just are almost absorbed, nay, almost annihilated, in the one idea of what is written and legal.

“The study of Eastern religions teaches us the same lesson. Sacred books often become a kind of fetish, requiring an implicit and unquestioning faith; their historical or natural origin is often completely forgotten, and the old ideas of what is true and divine are almost absorbed in the one idea of what is written and orthodox.

“And there is a third lesson which history teaches us. The sense of responsibility of every citizen for the law under which he lives is in great danger of becoming deadened, when law becomes a profession and is administered with mechanical exactness rather than with a strong human perception of what is right and what is wrong. Nor can it be denied that the responsibility of every believer for the religion under which he lives is in the same danger of becoming deadened, when religion becomes a profession, and is administered with ceremonial exactness rather than with a strong human perception of what is true and what is false.

“My object, however, is not to show the dangers which arise from sacred books, but rather to protest against the prejudice which prevails so widely against religions which have no sacred books.

“There is great difference between book-religions and bookless religions, and the difference offers, from an historical point of view, a very true ground of division. But because the book-religions have certain advantages, we must not imagine that the bookless religions are mere outcasts. They have their disadvantages, no doubt; but they have a few advantages also.

“A Blackfoot Indian, when arguing with a Christian missionary, described the difference between his own religion and that of the white man in the following words:

“There were two religions given by the Great Spirit, one in a book for the guidance of the white men who, by following its teachings, will reach the white man's heaven; the other is in the hands of the Indians, in the sky, rocks, rivers, and mountains. And the red men who listen to God in nature will hear his voice, and find at last the heaven beyond.’

“Now that religion which is in the head and in the heart, and in the sky, the rocks, the rivers and the mountains is what we call Natural Religion. It

has its roots in nature, in human nature, and in that external nature which to us is at the same time the veil and the revelation of the Divine. It is free, it grows with the growth of the human mind, and adapts itself to the requirements of every age. It does not say, 'Thou shall, but rather, 'I will'. These natural or bookless religions are not entirely without settled doctrines and established customs. They generally have some kind of priesthood to exercise authority in matters of faith, morality, and ceremonial. But there is nothing hard and unchangeable in them, nothing to fetter permanently the growth of thought. Errors when discovered, can be surrendered, a new truth, if clearly seen and vigorously defended, can be accepted. If, however, there is once a book, something black on white, the temptation is great, is almost irresistible, to invest it with a more than human authority in order to appeal to it as infallible, and as beyond the reach of human reasoning. We can well understand what the ancient poets of the Veda meant by calling their hymns God-given, or by speaking of them as what they had seen or heard, not what they had elaborated themselves. But a new generation gave a new meaning to these expressions, and ended by representing every thought and word and letter of the Veda as ' God-given,' or revealed. This was the deathblow given to the Vedic religion, for whatever cannot grow and change must die. From this danger the bookless religion are exempt.”Similar observations are made by Sir William Muir. Speaking of Islam he has given powerful expression to the dangers arising from Sacred Codes of Religion. Sir William Muir says:

“From the stiff and rigid shroud in which it is thus swathed, the religion of Mahomed cannot emerge. It has no plastic power beyond that exercised in its earliest days. Hardened now and inelastic, it can neither adapt itself, nor yet shape its votaries, nor even suffer them to shape themselves, to the varying circumstances, the wants and developments of mankind”. (Quoted by E de Bunsen in an article in the Asiatic Quarterly Review, April, 1889, Mahomed's Place in the Church, p. 287.)

Every one who is interested in the progress of humanity cannot fail to echo these sentiments regarding the social consequences of Sacred Codes of Religion. But it seems to me that a further distinction is possible within the Class of Religion with Sacred Codes. It is a pity that Prof. Max Muller did not pursue the matter further. But it is worth pursuing because it discloses a difference which is very real which marks off the Hindus as a people with a Sacred Code of Religion from other people also possessing a Sacred Code of Religion. The difference will be clear if one begins to examine the different religions to find out what are the objects which religions have sought to consecrate.

Such an examination will show that there are instances where Society has consecrated inanimate things and inculcated on the minds of its members the religious belief that they are sacred. There are cases where stones, rivers, trees are made gods and goddesses. There are instances where Society has consecrated living things and inculcated on the minds of its members the religious belief that they are sacred. There are cases of animals which have become clan totems. There are instances where Society has consecrated human beings and inculcated the religious beliefs that they are sacred. But there are no instances where a particular Social Order has been consecrated by Religion and made Sacred. The primitive world had its clan order and its tribal order. But the clan or the tribal order was only a social order and was never consecrated by religion and made sacred and inviolate. The ancient world countries like Egypt, Persia, Rome, Greece etc., each had its social order in which some were free and some were slaves, some were citizens, some were aliens, some of one race, some of another. This class order again was only a social order and was never consecrated by religion and made sacred and inviolate. The modern world has its order, in some it is Democracy, in some Fascism, in some Nazism and in some Bolshevism. But here again the order is only Social order. It is not consecrated by religion and made sacred and inviolate.

Nowhere has Society consecrated its occupations, the ways of getting a living. Economic activity has always remained outside the sanctity of religion. Hunting society was not without religion. But hunting as an occupation was not consecrated by religion and made sacred. Pastoral Society was not without religion. But pasturage was not consecrated by religion and made sacred. Farming as an occupation did not become consecrated by religion and made sacred. Feudalism with its gradations, with its Lords, villains and serfs was a purely social in character. There was nothing sacred about it.

The Hindus are the only people in the world whose Social order the relation of man to man is consecrated by religion and made sacred eternal and inviolate. The Hindus are the only people in the world whose economic order the relation of workman to workman is consecrated by religion and made sacred, eternal and inviolate.

It is not therefore enough to say that the Hindus are a people with a sacred code of Religion. So are the Zoroastrians, Israelites, Christians and Muslims. All these have sacred codes. They consecrate beliefs and rites and make them sacred. They do not prescribe, nor do they consecrate a particular form of social structure the relationship between man and man in a concrete form and make it sacred inviolate. The Hindus are singular in

this respect. This is what has given caste its abiding strength to defy the ravages of time and the onslaughts of time.

There is one other respect in which Hindus differ from other folk possessing codified religions similar to that of the Hindus. The Hindu Code of Religion is a revelation from God. That is why the Vedas are called Shruti (what is heard). So are the Codes of Religions accepted by the Zoroastrians, Jews, Christians and Muslims. Ask to whom this God's word sent to the Zoroastrian, Jews, Christians, and Muslims was revealed, who heard this word of God? The Zoroastrian will say that the word of God contained in their Religious Code was heard by Zoroaster. The Jews will say it was heard by Moses, Christians will say it was heard by Jesus and Muslims will say it was heard by Muhammad. Now ask the Hindu who heard the word of God contained in the Vedas, to whom was it revealed. The Hindu has no answer. He cannot name the person who heard this word of God. Now the Mantras contained in the Vedas have their authors mentioned in the Vedas themselves. But the Hindus will not say that these are the persons who heard the word of God, which is contained in the Vedas. This difference goes a great way to protect the sacred character of the Vedas. For the Bible as a Sacred Book can be attacked by attacking the character of Moses or Jesus. Similarly the Koran as a Sacred Book can be attacked by attacking the character of Mahomed. But the Veda cannot be attacked by attacking the character of the messenger or the founder. For the simple reason that there is none.

As I have said Religion is the Rock on which the Hindus have built their house. It will now be seen that it is not an ordinary sort of hard Rock. It is granite.

CHAPTER 4

TOUCHABLES V/S UNTOUCHABLES

I

A relationship of touchables against untouchables may cause surprize. Such a surprize will not be altogether without reason. The touchables are not one uniform body of people. They are themselves divided into innumerable castes. Each Hindu is conscious of the caste to which he belongs. Given this heterogeneity it does seem that to include all the touchable castes into one group and put them as forming a block against the untouchables is to create a division which can have no meaning. But

although this division of touchables against untouchables may require explanation, the division so far as modern India is concerned is real and substantial.

The explanation of how the touchables have now become one block and are conscious of their being different from the untouchables means nothing but recounting the mutual relationship of the four Varnas.

At the outset it must be borne in mind that those who like Mr. Gandhi accept the Chaturvarna as an ideal form of society, either do not know the history of the mutual relations of the four Varnas or are cherishing an illusion or conjuring up a vision for purposes which they are out to serve. For, the fact is that the four Varnas never formed a society based on loving brotherhood or on economic organisation based on co-operative effort. The four Varnas were animated by nothing but a spirit of animosity towards one another. There would not be the slightest exaggeration to say that the social history of the Hindus is a history not merely of class struggle but class war fought with such bitterness that even the Marxist will find it difficult to cite parallel cases to match.

It seems that the first class struggle took place between the Brahmins, Kshatriyas and Vaishyas on the one hand and the Shudras on the other.

In Katyayana's Srauta Sutras, it is said, that men with the exception of those whose members are defective, who have not read the Veda, eunuchs, and Shudras, have a right to sacrifice. It is Brahmanas, Rajanyas and Vaishyas (only who) according to the Veda (possess this privilege)".

We are told by Manu that (*Quotation not given in the MS.*). *mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_13 Manu also says that (*Quotation not given in the MS.*). Compare with this the following instances and statements relating to the status of the Shudra occurring in the Vedic literature of a period earlier than Manu and even earlier than Katyayana.

Prof. Max Muller calls attention to two instances showing that Shudras were admitted to great sacrifices such as "*gavedhukacharu*". One is that of Rathakara and the other of Nishadasthapati, both Shudras.

It might however be supposed that this was a concession made to the exceptional men from the Shudras. That it was not a mere concession but a right enjoyed by the Shudras is beyond question. In the Satapatha Brahmana which is a part of the Veda, the formula for the Brahmin Priest to call the sacrificer to come and make the oblation is given. He is asked to say *ehi*, come, in the case of a Brahman; *Agahi* 'come hither', in the case of a Vaishya; *Adrava*, 'hasten hither' in the case of a Kshatriya and *Adhava*, 'run hither' in the case of a Shudra.

This passage is of very great importance. It shows that the Shudra had at one time the right to sacrifice. Otherwise a form of address for a Shudra sacrificer could not have found a place in the Vedic precept. If the Shudra had a right to sacrifice, they also must have had a right to study the Vedas.

For, according to Katyayana, only those who had the right to read the Vedas were entitled to perform the sacrifice. That the Shudras were at one time entitled to read the Vedas is a fact which is well supported by tradition which is referred to in the Shanti Parva of the Mahabharat, where the sage Bhrigu answers the question "How is Varna to be determined?" in the following terms:

"There is no difference of castes; this world, having been at first created by Brahma entirely Brahmanic, became (afterwards) separated into castes in consequence of works. 6940. Those Brahmans (lit. twice born men), who were fond of sensual pleasure, fiery, irascible, prone to violence, who had forsaken their duty, and were red-limbed, fell into the condition of Kshatriyas. Those Brahmans, who derived their livelihood from kine, who were yellow, who subsisted by agriculture, and who neglected to practise their duties, entered into the state of Vaisyas. Those Brahmans, who were addicted to mischief and falsehood, who were covetous, who lived by all kinds of works, who were black and had fallen from purity, sank into the condition of Sudras. Being separated from each other by these works, the Brahmans became divided into different castes. Duty and the rites of sacrifice have not been always forbidden to (any of) them. Such are four classes for whom the Brahmanic Sarasvati was at first designed by Brahma, but who through their cupidity fell into ignorance."

Interpreting the word "Brahmanic" Sarasvati the Commentator says:

"Sarasvati, consisting of the Veda, was formerly designed by Brahma for all the four castes; but the Shudras having through cupidity fallen into 'ignorance i.e. of darkness,' lost their right to the Veda."

After the Shudra was reduced came the turn of the Vaishya. The bitterest class war took place between the Brahmins and the Kshatriyas. The classical literature of the Hindus abounds in reference to class wars between these two Varnas. First was the conflict between the Brahmins and King Vena.

"There was formerly a Prajapati (lord of creatures), a protector of righteousness, called Anga, of the race of Atri, and resembling him in power. His son was the Prajapati Vena, who was but indifferently skilled in duty, and was born of Sunitha, the daughter of Mritya. This son of the daughter of Kala (death), owing to the taint derived from his maternal grandfather, threw his duties behind his back and lived in covetousness

under the influence of desire. This king established an irreligious system of conduct; transgressing the ordinances of the Veda, he was devoted to lawlessness. In his reign men lived without study of the sacred books and without the vashatkara, and the gods had no Soma-libations to drink at sacrifices. 'I, he declared, 'am the object, and the performer of sacrifice, and the sacrifice itself, it is to me that sacrifice should be presented, and oblations offered. ' This transgressor of the rules of duty, who arrogated to himself what was not his due, was then addressed by all the great rishis, headed by Marichi: 'We are about to consecrate ourselves for a ceremony which shall last for many years, practice not unrighteousness, o Vena; this is not the eternal rule of duty. Thou art in very deed a Prajapati of Atri's race, and thou hast engaged to protect thy subjects. ' The foolish Vena, ignorant of what was right, laughingly answered those great rishis who had so addressed him: ' Who but myself is the ordainer of duty? Or who ought I to obey? Who on earth equals me in sacred knowledge, in prowess, in austere fervour, in truth? Yet who are deluded and senseless know not that I am the source of all beings and duties. Hesitate not to believe that I, if I willed, could burn up the earth, or deluge it with water, or close up heaven and earth '. When owing to his delusion and arrogance Vena could not be governed, then the mighty rishis becoming incensed, seized the vigorous and struggling king, and rubbed his left thigh. From this thigh, so rubbed, was produced a black man, very short in stature, who, being alarmed, stood with joined hands. Seeing that he was agitated, Atri said to him 'Sit down''(nishida). He became the founder of the race of the Nishadas, and also progenitor of the Dhivaras (fisherman), who sprang from the corruption of Vena. So too were produced from him the other inhabitants of the Vindhya range, the Tukharas and Turnburas, who are prone to lawlessness. Then the mighty sages, excited and incensed, again rubbed the right hand of Vena, as men do the Arani wood, and from it arose Pritha, respondent in body, glowing like the manifested Agni."

"The son of Vena (Prithu) then, with joined hands, addressed the great rishis: ' A very slender understanding for perceiving the principles of duty has been given to me by nature; tell me truly how I must employ it. Doubt not that I shall perform whatever you shall declare to me as my duty, and its object.' Then those gods and great rishis said to him: 'Whatever duty is enjoined perform it, without hesitation, disregarding what thou may est like or dislike, looking on all creatures with an equal eye, putting far from the lust, anger, cupidity, and pride. Restrain by the strength of thin arm all those men who swerve from righteousness, having a constant regard to duty. And in thought, act, and word take upon thyself, and continually

renew, the engagement to protect the terrestrial Brahman (Veda or Brahmans?)..... And promise that thou wilt exempt the Brahmans from punishment, and preserve society from the confusion of Castes'. The son of Vena then replied to the gods, headed by the rishis: 'The great Brahmans, the chief of men, shall be revered by me'. 'So be it,' rejoined those declares of the Veda. Sukra, the depository of divine knowledge, became his purohita: the Balakhilyas and Sarasvetyas his ministers; and the venerable Garga, the great rishi, his astrologer."The second conflict took place between the Brahmins and the Kshatriya king Pururavas. A brief reference to it occurs in the Adiparva of the Mahabharat.

"Subsequently the wise Pururavas was born of 11, who, as we have heard, was both his father and his mother. Ruling over thirteen islands of the ocean, and surrounded by being who were all superhuman, himself a man of great renown, Pururavas, intoxicated by his prowess, engaged in a conflict with the Brahmans, and robbed them of their jewels, although they loudly remonstrated. Sanatkumara came from Brahma's heaven, and addressed to him an admonition, which, however, he did not regard. Being then straightway cursed by the incensed rishis, he perished, this covetous monarch, who, through pride of power, had lost his understanding. This glorious being (virat), accompanied by Urvashi, brought down for the performance of sacred rites the fires which existed in the heaven of the Gandharvas, properly distributed into three."

A third collision is reported to have occurred between the Brahmins and King Nahusha. The story is given in great details in the Udyogaparva of the Mahabharata. It is there recorded:

"After his slaughter of the demon Vrittra, Indra became alarmed at the idea of having taken the life of a Brahmin (for Vrittra was regarded as such), and hid himself in waters. In consequence of the disappearance of the king of gods, all affairs, celestial as well as terrestrial, fell into confusion. The rishis and gods then applied to Nahusha to be their king. After at first excusing himself on the plea of want of power, Nahusha at length, in compliance with their solicitations, accepted the high function. Up to the period of his elevation he had led a virtuous life, but he now became addicted to amusement and sensual pleasure; and even aspired to the possession of Indrani, Indra's wife, whom he had happened to see. The queen resorted to the Angiras Vrihaspati, the preceptor of the gods, who engaged to protect her. Nahusha was greatly incensed on hearing of this interference; but the gods endeavoured to pacify him, and pointed out the immorality of—appropriating another person's wife. Nahusha, however, would listen to no remonstrance, and insisted that in his adulterous designs

he was no worse than Indra himself; 373. The renowned Ahalya, a rishi's wife, was formerly corrupted by Indra in her husband's lifetime; Why was he not prevented by you? 374. And many barbarous acts, and unrighteous deeds, and frauds, were perpetrated of old by Indra; Why was he not prevented by you? The gods, urged by Nahusha, then went to bring Indrani; but Vrihaspati would not give her up. At his recommendation, however, she solicited Nahusha for some delay, till she should ascertain what had become of her husband. This request was granted. The gods next applied to Vishnu on behalf of Indra; and Vishnu promised that if Indra would sacrifice to him, he should be purged from his guilt, and recovers his dominion, while Nahusha would be destroyed. Indra sacrificed accordingly: and the result is thus told;”Having divided the guilt of Brahmanicide among trees, rivers, mountains, the earth, women, and the elements, Vasava (Indra), lord of the gods, became freed from suffering and sin, and self-governed.”Nahusha was by this means, shaken from his place. But (unless this is said by way of prelepsis, or there is some confusion in the narrative) he must have speedily regained his position, as we are told that Indra was again ruined,, and became invisible. Indrani now went in search of her husband; and by the help of Upasruti (the goddess of night and revealer of secrets) discovered him existing in a very subtle form in the stem of a lotus growing in a lake situated in a continent within an ocean north of the Himalaya. She made known to him the wicked intention of Nahusha, and entreated him to exert his power, rescue her from danger, and resume his dominion. Indra declined any immediate interposition on the plea of Nahusha's superior strength; but suggested to his wife a device by which the usurper might be hurled from his position. She was recommended to say to Nahusha that”if he would visit her on a celestial vehicle borne by rishis, she would with pleasure submit herself to him”. The question of the gods accordingly went to Nahusha, by whom she was graciously received, and made this proposal:”I desire for thee, king of the gods, a vehicle hitherto unknown, such as neither Vishnu, nor Rudra, nor the asuras, nor the rakshases employ. Let the eminent rishis, all united, bear thee, lord, in a car: this idea pleases me”. Nahusha receives favourably this appeal to his vanity, and in the course of his reply thus gives utterance to his self-congratulation:”He is a personage of no mean prowess who makes the munis his bearers. I am a fervid devotee of great might, lord of the past, the future and the present. If I were angry the world would no longer stand; on me everything depends.... Wherefore, O goddess, I shall, without doubt, carry out what you propose. The seven rishis, and all the Brahman-rishis, shall carry me. Behold beautiful goddess, my majesty, and my

prosperity.”The narrative goes on:”Accordingly this wicked being, irreligious, violent, intoxicated by the force of conceit, and arbitrary in his conduct, attached to his car the rishis, who submitted to his commands, and compelled them to bear him”. Indrani then again resorts to Vrihaspati, who assures her that vengeance will soon overtake Nahusha for his presumption: and promises that he will himself perform a sacrifice with a view to the destruction of the oppressor, and the discovery of Indra's lurking place. Agni is then sent to discover and bring Indra to Vrihaspati; and the latter, on Indra's arrival, informs him of all that had occurred during his absence. While Indra with Kuvera, Yama, Soma, and Varuna, was devising means for the destruction of Nahusha, the sage Agastya came up, congratulated Indra on the fall of his rival, and proceeded to relate how it had occurred. Wearied with carrying the sinner Nahusha, the eminent divine rishis, and the spotless brahman-rishis asked that divine personage Nahusha (to solve) a difficulty;”Dost thou, a Vasava, most excellent of conquerors, regard as authoritative or not those Brahmana texts which are recited at the immolation of kine?’ ‘No’, replied Nahusha, whose understanding was enveloped in darkness. The rishis rejoined: ‘Engaged in unrighteousness, thou attainest not unto righteousness: these texts, which were formerly uttered by great rishis, are regarded by us as authoritative.’ The (proceeds Agastya) disputing with the munis, Nahusha, impelled by unrighteousness, touched me on the head with his foot. In consequence of this the king's glory was smitten and his prosperity departed. When he had instantly become agitated and oppressed with fear, I said to him, ‘ Since thou, O fool, contemnest that sacred text, always held in honour, which has been composed by former sages, and employed by brahman-rishis, and has touched my head with thy foot, and employest the Brahma—like and irresistible rishis as bearers to carry thee, therefore, shorn of thy lustre and all thy merit exhausted, sink down, sinner, degraded from heaven to earth. For then thousand years thou shalt crawl in the form of a huge serpent. When that period is completed, thou shalt again ascend to heaven ‘. So fell that wicked wretch from the sovereignty of the gods.”

Next there is reference to the conflict between King Nimi and the Brahmins. The Vishnu Puran relates the story as follows:

“Nimi had requested the Brahman-rishi Vashishtha to officiate at a sacrifice, which was to last a thousand years, Vashishtha in reply pleaded a pre-engagement to Indra for five hundred years, but promised to return at the end of that period. The king made no remark, and Vashishtha went away, supposing that he had assented to this arrangement. On his return, however, the priest discovered that Nimi had retained Gautama (who was,

equally with Vashishtha a Brahman-rishi) and others to perform the sacrifice; and being incensed at the neglect to give him notice of what was intended, he cursed the king, who was then asleep, to lose his corporeal form. When Nimi awoke and learnt that he had been cursed without any previous warning, he retorted, by uttering a similar curse on Vashishtha, and then died."In consequence of this curse"(proceeds Vishnu Purana, iv. 5, 6)"the vigour of Vashishtha entered into the vigour of Mitra and Varuna. Vashishtha, however, received from them another body when their seed had fallen from them at the sight of Urvashi". Nimi's body was embalmed. At the close of the sacrifice which he had begun, the gods were willing, on the intercession of the priests, to restore him to life, but he declined the offer, and was placed by the deities, according to his desire, in the eyes of all living creatures. It is in consequence of this fact that they are always opening the shutting (Nimishas means "the twinkling of the eye")".

Manu mentions another conflict between the Brahmins and King Sumukha. But of this no details are available.

These are instances of conflict between the Brahmins and the Kshatriya Kings. From this it must not be supposed that the Brahmins and the Kshatriyas as two classes did not clash. That there were clashes between these two classes as distinguished from conflicts with kings is abundantly proved by material the historic value of which cannot be doubted. Reference may be made to three events.

First is the contest between the Vishvamitra the Kshatriya and Vashishtha the Brahmin. The issue between the two was whether a Kshatriya can claim Brahminhood. The story is told in Ramayana and is as follows:

"There was formerly, we are told, a king called Kusa, son of Prajapati, who had a son called Kushanabha, who was father of Gadhi, the father of Vishvamitra. The latter ruled the earth for many thousand years. On one occasion, when he was making a circuit of the earth, he came to Vashistha's hermitage, the pleasant abode of many saints, sages, and holy devotees, where, after at first declining he allowed himself to be hospitably entertained with his followers by the son of Brahma. Vishvamitra, however, coveting the wondrous cow, which had supplied all the dainties of the feast, first of all asked that she should be given to him in exchange for a hundred thousand common cows, adding that "she was a gem, that gems were the property of the king, and that, therefore, the cow was his by right". On this price being refused the king advances immensely in his offers, but all without effect. He then proceeds-very ungratefully and tyrannically, it must be allowed to have the cow removed by force, but she breaks away from his attendants, and rushes back to her master,

complaining that he was deserting her. He replies that he was not deserting her, but that the king was much more powerful than he. She answers, "Men do not ascribe strength to a Kshatriya: the Brahmans are stronger. The Strength of Brahmans is divine, and superior to that of Kshatriya. Thy strength is immeasurable. Vishvamitra, though of great vigour, is not more powerful than thou. Thy energy is invincible. Commission me, who have been acquired by thy Brahmanical power, and I will destroy the pride, and force, and attempt of this wicked prince". She accordingly by her bellowing creates hundreds of Pahalvas, who destroy the entire host of Vishvamitra, but are slain by him in their turn. Sakas and Yavans, of great power and valour, and well armed, were then produced, who consumed the king's soldiers, but were routed by him.

The cow then calls into existence by her bellowing, and from different parts of her body, other warriors of various tribes, who again destroyed Vishvamitra's entire army, foot soldiers, elephants, horses, chariots, and all. A hundred of the monarch's sons, armed with various weapons, then rushed in great fury on Vashishtha, but were all reduced to ashes in a moment by the blast of that sage's mouth. Vishvamitra, being thus utterly vanquished and humbled, appointed one of his son to be regent, and travelled to the Himalaya, where he betook himself to austerities, and thereby obtained a vision of Mahadeva, who at his desire revealed to him the science of arms in all its branches, and gave him celestial weapons with which, elated and full of pride, he consumed the hermitage of Vashishtha, and put its inhabitants to flight. Vashishtha then threatens Vishvamitra and uplifts his Brahmanical mace. Vishvamitra too, raises his fiery weapon and calls out to his adversary to stand. Vashishtha bids him to show his strength, and boasts that he will soon humble his pride.

He asks: "What comparison is there between a Kshatriya's might, and the great might of a Brahman? Behold, thou contemptible Kshatriya, my divine Brahmanical power. The dreadful fiery weapon uplifted by the son of Gadhi was then quenched by the rod of the Brahman, as fire is by water." Many and various other celestial missiles, as the nooses of Brahma, Kala (time), and Varuna, the discuss of Vishnu, and the trident of Siva, were hurled by Vishvamitra at his antagonist, but the son of Brahma swallowed them up in his all-devouring mace. Finally, to the intense consternation of all the gods, the warrior shot off the terrific weapon of Brahma (brahmastra): but this was equally ineffectual against the Brahmanical sage.

Vashishtha had now assumed a direful appearance: "Jets of fire mingled with smoke darted from the pores of his body; the Brahmanical mace

blazed in his hand like a smokeless mundane conflagration, or a second sceptre of Yama." Being appeased, however by the munis, who proclaimed his superiority to his rival, the sage stayed his vengeance; and Vishvamitra exclaimed with a groan: "Shame on a Kshatriya's strength: the strength of a Brahman's might alone is strength: by the single Brahmanical mace all my weapons have been destroyed." No alternative now remains, to the humiliated monarch, but either to acquiesce in this helpless inferiority, or to work out his own elevation to the Brahmanical order. He embraces the latter alternative: "Having pondered well this defeat, I shall betake myself, with composed senses and mind, to strenuous austere fervour, which shall exalt me to the rank of a Brahman".

Intensely vexed and mortified, groaning and full of hatred against his enemy, he travelled with his queen to the south, and carried his resolution into effect; and we are first of all told that three sons Havishyanda, Madhusyanda, and Dridhanetra were born to him. At the end of a thousands years Brahma appeared, and announced that he had conquered the heaven of royal sages (rajarshis); and, in consequence of his austere fervour, he was recognised as having attained that rank. Vishvamitra, however, was ashamed, grieved, and incensed at the offer of so very inadequate a reward, and exclaimed; "I have practised intense austerity, and the gods and rishis regard me only as a rajarshi. Austerities, it appears, are altogether fruitless". Notwithstanding this disappointment, he had ascended one grade, and forthwith recommenced his work of mortification.

"At this point of time his austerities were interrupted by the following occurrences: King Trisanku, one of Ikshvaku's descendants, had conceived the design of celebrating a sacrifice by virtue of which he should ascend bodily to heaven. As Vashishtha, on being summoned, declared that the thing was impossible (asakyam), Trisanku travelled to the south, where the sage's hundred sons were engaged in austerities, and applied to them to do what their father had declined. Though he addressed them with the greatest reverence and humility, and added that "the Ikshvaku regarded their family-priests as their highest resource in difficulties, and that, after their father, he himself looked to them as his tutelary deities" he received from the haughty priests the following rebuke for his presumption: "Asakyam" "Fool, thou hast been refused by thy truth speaking preceptor. How is it that, disregarding his authority, thou has resorted to another school (sakha). The family priest is the highest oracle of all the Ikshvakus; and the command of those veracious personages cannot be transgressed. Vashishtha, the divine rishi, has declared that 'the thing cannot be'; and how can we undertake thy

sacrifice? Thou art foolish king; return to thy capital. The divine (Vashishtha) is competent to act as priest of the three worlds; how can we shew him disrespect?"Trisanku then gave them to understand that as his preceptor and his preceptor's sons had declined compliance with his requests, he should think of some other expedient."In consequence of his venturing to express this presumptuous intention, they condemned him by their imprecation to become a Chandala. As this curse soon took effect, and the unhappy king's form was changed into that of a degraded outcast, he resorted to Vishvamitra (who, as we have seen, was also dwelling at this period in the south), enlarging on his own virtues and piety, and bewailing his fate. Vishvamitra commiserated his condition, and promised to sacrifice on his behalf, and exalt him to heaven in the same Chandala-form to which he had been condemned by his preceptor's curse."Heaven is now as good as in thy possession, since thou hast resorted to the son of Kusika".

He then directed that preparations should be made for the sacrifice, and that all the rishis, including the family of Vashishtha, should be invited to the ceremony. The disciples of Vishvamitra, who had conveyed his message, reported the result on their return in these words : "Having heard your message, all the Brahmans are assembling in all the countries, and have arrived, excepting Mahodaya (Vashishtha). Hear what dreadful words those hundred Vashishthas, their voices quivering with rage, have uttered: 'How can the gods and rishis consume the oblation at the sacrifice of that man, especially if he be a Chandala, for whom a Kshatriya is officiating priest? How can illustrious Brahmans ascend to heaven, after eating the food of a Chandala, and being entertained by Vishvamitra?' These ruthless words all Vashisthas, together with Mahodaya, uttered, their eyes inflamed with anger. Vishvamitra, who was greatly incensed on receiving this message, by a curse doomed the sons of Vashishtha to be reduced to ashes, and reborn as degraded outcasts (mritapah) for seven hundred births, and Mahodaya to become a Nishada. Knowing that this curse had taken effect, Vishvamitra thereafter eulogizing Trisanku, proposed to the assembled rishis that the sacrifice should be celebrated. To this they assented, being actuated by fear of the terrible sage's wrath. Vishvamitra himself officiated at the sacrifice as yajakas; and the other rishis as priests (ritvijah) with other functions) performed all the ceremonies. Vishvamitra next invited the gods to partake of the oblations:"When, however, the deities did not come to receive their portions, Vishvamitra became full of wrath, and raising aloft the sacrificial ladle, thus addressed Trisanku: ' Behold, O monarch, the power of austere fervour acquired by my own efforts. I myself, by my own energy, will conduct thee to heaven. Ascend to that celestial region which is

so arduous to attain in an earthly body. I have surely earned some reward of my austerity "Trisanku ascended instantly to heaven in the sight of munis. Indra, however, ordered him to be gone, as person who, having incurred the curse of his spiritual preceptors, was unfit for the abode of the celestials; and to fall down headlong to earth. He accordingly began to descend, invoking loudly, as he fell the help of his spiritual patron. Vishvamitra, greatly incensed, called out to him to stop:"Then by the power of his divine knowledge and austere fervour created, like another Prajapati, other Seven Rishis (a constellation so called) in the southern part of the sky. Having proceeded to this quarter of the heavens, the renowned sage, in the midst of the rishis, formed another garland of stars, being overcome with fury. Exclaiming, 'I will create another Indra, or the world shall have no Indra at all,' he began, in his rage, to call gods also into being. The rishis, gods (Suras), and Asuras now became seriously alarmed and said to Vishvamitra, in a conciliatory tone, that Trisanku,"as he had been cursed by his preceptors, should not be admitted bodily into heaven, until he had undergone some lustration". The sage replied that he had given a promise to Trisanku, and appealed to the gods to permit his protege to remain bodily in heaven and the newly created stars to retain their places in perpetuity. The gods agreed that"these numerous stars should remain, but beyond the Sun's path, and that Trisanku, like an immortal, with his head downwards should shine among them, and be followed by them,"adding"that his object would be thus attained, and his renown secured, and he would be like a dweller in heaven". Thus was this great dispute adjusted by a compromise, which Vishvamitra accepted.

"This story of Trisanku, it will have been observed, differs materially from the one quoted above from the Harivarnsa; but brings out more distinctly the character of the conflict between Vashishtha and Vishvamitra.

"When all the gods and rishis had departed at the conclusion of the sacrifice, Vishvamitra said to his attendant devotees;"This has been a great interruption (to our austerities) which has occurred in the southern region: we must proceed in another direction to continue our penances". He accordingly went to a forest in the west, and began his austerities anew. Here the narrative is again interrupted by the introduction of another story, that of king Ambarisha, king of Ayodhya, who was, according to the Ramayana, the twentyeighth in descent from Ikshvaku, and the twentysecond from Trisanku. Vishvamitra is nevertheless represented as flourishing contemporaneously with both of these princes. The story relates that Ambarisha was engaged in performing a sacrifice, when Indra carried away the victim. The priest said that this ill-omened event had

occurred owing to the king's bad administration; and would call for a great expiation, unless a human victim could be produced. After a long search the royal rishi (Ambarisha) came upon the Brahman-rishi Richika, a descendant of Bhrigu, and asked him to sell one of his sons for a victim, at the price of a hundred thousand cows. Richika answered that he would not sell his eldest son; and his wife added that she would not sell the youngest: "eldest sons," she observed, "being generally the favourites of their fathers, and youngest sons of their mothers". The second son, Sunassepa, then said that in that case he regarded himself as the one who was to be sold, and desired the king to remove him. The hundred thousand cows, with the millions of gold-pieces and heaps of jewels, were paid down, and Sunassepa carried away. As they were passing through Puskara Sunassepa beheld his maternal uncle Vishvamitra who was engaged in austerities there with other rishis, threw himself into his arms, and implored his assistance, urging his orphan, friendless, and helpless state, as claims on the sage's benevolence. Vishvamitra soothed him; and pressed his own sons to offer themselves as victims in the room of Sunassepa. This proposition met with no favour from Madhushyanda and the other sons of the royal hermit, who answered with haughtiness and derision: "How is it that thou sacrifices thine own sons, and seeks to rescue those of others? We look upon this as wrong, and like the eating of one's own flesh". The sage was exceedingly wroth at this disregard of his injunction, and doomed his sons to be born in the most degraded classes, like Vasishtha's sons, and to eat dog's flesh, for a thousand years. He then said to Sunassepa: "When thou art bound with hallowed cords decked with a red garland, and anointed with unguents, and fastened to the sacrificial post of Vishnu, then address thyself to Agni, and sing these two divine verses (gathas), at the sacrifice of Ambarisha; then shall thou attain the fulfilment (of thy desire)".

Being furnished with the two gathas, Sunassepa proposed at once to king Ambarisha that they should set out for their destination. When bound at the stake to be immolated, dressed in a red garment, "he celebrated the two gods, Indra and his younger brother (Vishnu), with the excellent verses. The thousand-eyed (Indra) was pleased with the secret hymn, and bestowed long life on Sunassepa". King Ambarisha also received great benefits from this sacrifice. Vishvamitra meanwhile proceeded with his austerities, which he prolonged for a thousand years.

"At the end of this time the gods came to allot his reward; and Brahma announced that he had attained the rank of a rishi, thus apparently advancing an additional step. Dissatisfied, as it would seem, with this, the sage commenced his task of penance anew. After a length of time he

beheld the nymph (Apsara) Menka, who had come to bathe in the lake of Pushkara. She flashed on his view, unequalled in her radiant beauty, like lightning in a cloud. He was smitten by her charms, invited her to be his companion in his hermitage, and for ten years remained a slave to her witchery, to the great prejudice of his austerities. At length he became ashamed of this ignoble subjection, and full of indignation at what he believed to be a device of the gods to disturb his devotion; and, dismissing the nymph with gentle accents, he departed for the northern mountains, where he practised severe austerities for a thousand years on the banks of the Kausiki river.

The gods became alarmed at the progress he was making, and decided that he should be dignified with the appellation of great rishi (maharshi); and Brahma, giving effect to the general opinion of the deities, announced that he had conferred that rank upon him. Joining his hands and bowing his head, Visvamitra replied that he should consider himself to have indeed completely subdued his senses, if the incomparable title of Brahman-rishi were conferred upon him. Brahma informed him in answer, that he had not yet acquired the power of perfectly controlling his senses; but should make further efforts with that view.

The sage then began to put himself through a yet more rigorous course of austerities, standing with his arms erect, without support, feeding on air, in summer exposed to five fires (i.e. one on each of four sides, and the sun overhead), in the rainy season remaining unsheltered from the wet, and in winter lying on a watery couch night and day. This he continued for a thousand years. At last Indra and the other deities became greatly distressed at the idea of the merit he was storing up, and the power which he was thereby acquiring; and the chief of the celestials desired the nymph Rambha to go and bewitch him by her blandishments.

She expressed great reluctance to expose herself to the wrath of the formidable muni, but obeyed the repeated injunction of Indra, who promised that he and Kandarpa (the god of love) should stand by her, and assumed her most attractive aspect with the view of overcoming the sage's impassability. He, however, suspected this design, and becoming greatly incensed, he dommed the nymph by a curse to be turned into stone and to continue in that state for a thousand years. The curse took effect, and Kandarpa and Indra slunk away. In this way, though he resisted the allurements of sensual love, he lost the whole fruit of his austerities by yielding to anger; and had to begin his work over again. He resolved to check his irascibility, to remain silent, not even to breathe for hundreds of

years; to dry up his body; and to fast and stop his breath till he had obtained the coveted character of a Brahman.

He then left the Himalaya and travelled to the east, where he underwent a dreadful exercise, unequalled in the whole history of austerities, maintaining silence, according to a vow, for a thousand years. At the end of this time he had attained to perfection, and although thwarted by many obstacles, he remained unmoved by anger. On the expiration of this course of austerity, he prepared some food to eat; which Indra, coming in the form of a Brahman, begged that he would give him. Visvarnitra did so, and though he had none left for himself, and was obliged to remain fasting, he said nothing to the Brahman, on account of his vow of silence. As he continued to suspend his breath, smoke issued from his head, to the great consternation and distress of the three worlds. The gods, rishis, etc., then addressed Brahma: "The great muni Visvamitra has been allured and provoked in various ways, but still advances in his sanctity. If his wish is not conceded, he will destroy the three worlds by the force of his austerity. All the regions of the universe are confounded, no light anywhere shines; all the oceans are tossed, and the mountains crumble, the earth quakes, and the wind blows confusedly. We cannot, O Brahma, guarantee that mankind shall not become atheistic.... Before the great and glorious sage of fiery form resolves to destroy (everything) let him be propitiated." The gods, headed by Brahma, then addressed Visvamitra: "Hail Brahman rishi, we are gratified by thy austerities; O Kausika, thou hast, through their intensity, attained to Brahmanhood. I, O Brahman, associated with the Maruts, confer on thee long life. May every blessing attend thee; depart wherever thou wilt.' The sage, delighted, made his obeisance to the gods, and said : ' If I have obtained Brahmanhood, and long life, then let the mystic monosyllable (omkara) and the sacrificial formula (vashatkara) and the Vedas recognise me in that capacity. And let Vasishtha, the son of Brahma, the most eminent of those who are skilled in the Kshattria-veda, and the Brahma-veda (the knowledge of the Kshatriya and the Brahmanical disciplines), address me similarly.'.... Accordingly Vasishtha, being propitiated by the gods, became reconciled to Visvamitra, and recognised his claim to all the prerogatives of a Brahman rishi. . . . Visvamitra, too, having attained the Brahmanical rank, paid all honour to Vasishtha." The second event has reference to the slaughter of the Brahmins by the Kshatriyas. It is related in the Adiparva of the Mahabharat from which the following account is taken:

There was a king named Kritvirya, by whose liberality the Bhrigus, learned in the Vedas, who officiated as his priests, had been greatly

enriched with corn and money. After he had gone to heaven, his descendants were in want of money, and came to beg for a supply from the Bhrigus, of whose wealth they were aware. Some of the latter hid their money under ground, others bestowed it on Brahmans, being afraid of the Kshatriyas, while others again gave these last what they wanted. It happened, however, that a Kshatriya, while digging the ground, discovered some money buried in the house of a Bhrigu. The Kshatriyas then assembled and saw this treasure, and, being incensed, slew in consequence all the Bhrigus, whom they regarded with contempt, down to the children in the womb. The widows, however, fled to the Himalaya mountains. One of them concealed her unborn child in her thigh. The Kshatriyas, hearing of its existence from a Brahmani informant, sought to kill it; but it issued forth from its mother's thigh with lustre, and blinded the persecutors. After wandering about bewildered among the mountains for a time, they humbly supplicated the mother of the child for the restoration of their sight; but she referred them to her wonderful infant Aurva into whom the whole Veda, with its veda Vyas had entered, as the person who (in requisition of the slaughter of his relatives) had robbed them of their eyesight, and who alone could restore it.

They accordingly had recourse to him, and their eyesight was restored. Aurva, however, meditated the destruction of all living creatures, in revenge for the slaughter of the Bhrigus, and entered on a course of austerities which alarmed both gods, asuras, and men; but his progenitors (Pitris) themselves appeared, and sought to turn him from his purpose by saying that they had no desire to be revenged on the Kshatriyas :”It was not from weakness that the devout Bhrigus overlooked the massacre perpetrated by the murderous Kshatriyas. When we became distressed by old age, we ourselves desired to be slaughtered by them. The money which was buried by some one in a Bhrigu's house was placed there for the purpose of exciting hatred, by those who wished to provoke the Kshatriyas. For what had we, who were desiring heaven, to do with money?”They added that they hit upon this device because they did not wish to be guilty of suicide, and concluded by calling upon Aurva to restrain his wrath; and abstain from the sin he was meditating:”Destroy not the Kshatriyas, O son, nor the seven worlds. Suppress thy kindled anger which nullifies the power of austere-fervour.”Aurva, however, replies that he cannot allow his threat to remain un-executed. His anger, unless wreaked upon some other object, will, he says, consume himself. And he argues on grounds of justice, expediency, and duty, against the clemency, which his progenitors recommend. He is, however, persuaded by the Pitris

to throw the fire of his anger into the sea, where they say it will find exercise in assailing the watery element, and in this way his threat will be fulfilled."

The third event has reference to the slaughter of the Kshatriyas by the Brahmins. This story is told in several places in the Mahabharata.

"The magnificent and mighty Kartavirya, possessing a thousand arms, was lord of this whole world, living in Mahishmati. This Haihaya of unquestioned valour ruled over the whole sea-girt earth, with its oceans and continents". He obtained boons from the muni Dattatreya, a thousand arms whenever he should go into battle power to make the conquest of the whole earth, a disposition to rule it with justice and the promise of instruction from the virtuous in the event of his going astray." Then ascending his chariot glorious as the resplendent sun, he exclaimed in the intoxication of his prowess, 'Who is like me in fortitude, courage, fame, heroism, energy, and vigour?' At the end of this speech a bodiless voice in the sky addressed him: 'Thou knowest not, O fool, that a Brahman is better than a Kshatriya. It is with the help of the Brahman that the Kshatriya rules his subjects.' Arjuna answers: 'If I am pleased, I can create, or, if displeased, annihilate, living beings; and no Brahman is superior to me in act, thought or word.'

The first proposition is that the Brahmans are superior; the second that the Kshatriyas are superior; both of these thou hast stated with their grounds, but there is a difference between them (in point of force). The Brahmans are dependent on the Kshatriyas and not the Kshatriyas are beaten up by the Brahmans, who wait upon them, and only make the Vedas a pretence. Justice, the protection of the people, has its seat in the Kshatriyas. From them the Brahmans derived their livelihood; how then can the latter be superior? I always keep in subjection to myself those Brahmans, the chief of all beings, who subsist on alms, and who have a high opinion of them selves. For truth was spoken by that female the Gayatri in the sky. I shall subdue all those unruly Brahmans clad in hides.

No one in the three worlds, god or man can hurl me from my royal authority; wherefore I am superior to any Brahman. Now shall I turn the world in which Brahmans have the upper hand into a place where Kshatriyas shall have the upper hand; for no one dares to encounter my force in battle.' Hearing this speech of Arjuna, the female roving in the night became alarmed. Then Vayu hovering in the air, said to Arjuna: 'Abandon this sinful disposition, and do obeisance to the Brahmans. If thou shalt do them wrong, thy kingdom shall be convulsed. They will subdue thee: those powerful men will humble thee, and expel thee from

thy country."The king asks him, 'Who art thou?' Vayu replies, 'I am Vayu, the messenger of the gods, and tell thee what is for thy benefit.' Arjuna rejoins, 'Oh, thou displayest today a great warmth of devotion to the Brahmans. But say that a Brahman is like (any other) earth-born creature."

This king came into conflict with Parasuram the son of a Brahman sage Jamadagni. The history of this conflict is as follows:

"There lived a king of Kanyakubja, called Gadhi, who had a daughter named Satyavati. The marriage of this princess to the rishi Richika, and the birth of Jamadagni, are then told in nearly the same way as above narrated. Jamadagni and Satyavati had five sons, the youngest of whom was the redoubtable Parasuram. By his father's command he kills his mother (who, by the indulgence of impure desire, had fallen from her previous sanctity), after the four elder sons had refused this matricidal offence, and had in consequence been deprived of reason by their father's curse. At Parasuram's desire, however, his mother is restored by his father to life, and his brothers to reason; and he himself is absolved from all the guilt of murder; and obtains the boon of invincibility and long life from his father. His history now begins to be connected with that of king Arjuna (or Kartavirya). The latter had come to Jamadagni's hermitage, and had been respectfully received by his wife; but he had requited this honour by carrying away by force the calf of the sage's sacrificial cow, and breaking down his lofty trees. On being informed of this violence, Parasurama was filled with indignation, attacked Arjuna, cut off his thousand arms, and slew him. Arjuna's sons, in return, slew the peaceful sage Jamadagni, in the absence of Parasurama."

"Rama, after performing, on his return, his father's funeral obsequies, vowed to destroy the whole Kshatriya race; and executed his threat by killing first Arjuna's sons and their followers. Twenty one times did he sweep away all the Kshatriyas from the earth, and formed five lakes of blood in Samantapanchaka; in which he satiated the manes of the Bhrigus, and beheld face to face (his grand-father), Richika, who addressed himself to Rama. The latter gratified Indra by offering to him a grand sacrifice, and gave the earth to the officiating priests. He bestowed also a golden altar, ten fathoms long and nine high, on the mighty Kasyapa. This, by his permission, the Brahmans divided among themselves, deriving thence the name of Khandavavanas. Having given away the earth to Kasyapa, Parasurama himself dwells on the mountain Mahendra. Thus did enmity arise between him and Kshatriyas, and thus was the earth conquered by Rama of boundless might."The Kshatriyas who were slain by Parasuram are described in the Dronaparvan of the Mahabharat as of various

provinces, viz., Kasmiras, Darads, Kuntis, Kshudrakas, Malavas, Angas, Vangas, Kalingas, Videhas, Tamraliptakas, Marttikavatas, Sivis and other Rajanyas.

The means by which the Kshatriya race was restored is also told as part of this story of annihilation of the Kshatriyas by the Brahmins. It is said:

“Having one and twenty times swept away all the Kshatriyas from the earth, the son of Jamadagni engaged in austerities on Mahendra the most excellent of mountains. After he had cleared the world of Kshatriyas, their widows came to the Brahmins, praying for offspring. The religious Brahmins, free from any impulse of lust, cohabited at the proper seasons with these women, who in consequence became pregnant, and brought forth valiant Kshatriya boys and girls, to continue the Kshatriya stock. Thus was the Kshatriya race virtuously begotten by Brahmins on Kshatriya women, and became multiplied and long-lived. Thence there arose four castes inferior to the Brahmins.”

CHAPTER 5

THE CURSE OF CASTE

As I have said in the first Essay* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_14 there cannot be a caste in the single number. Caste can exist only in the plural number. Caste to be real can exist only by disintegrating a group. The genius of caste is to divide and to disintegrate. It is also the curse of caste. Few, however, realise how great is this curse of caste. It is therefore necessary to illustrate the vastness of this curse by reference to the disintegration brought about by caste. It is impossible to deal with each caste to show the evolution of its disintegration. One must content him self with presenting the caste history of one caste. I take the case of the Brahmins who have been the originators and upholders of caste to show how they themselves have been overwhelmed by what I call the curse of caste. The Brahmins of India are divided into two distinct fraternities. One fraternity is called the Dravidas and the other fraternity is called the Gaudas.

It must not, however, be supposed that the Dravidas and Gaudas are single homogeneous unit. They are divided and sub-divided in units so numerous that it is difficult to imagine their numbers unless one has actual lists of their sub-divisions before his eye. In the following pages an attempt

is made to give the list of castes and sub-castes into which each sub-division of the fraternity is divided.

I

THE DRAVIDA BRAHMINS

The fraternity of Dravidas consists of five sub-divisions who are collectively styled the Panch Dravidas. The five sub-divisions are called:

- (1) The Maharashtrians
- (2) The Andhras
- (3) The Dravidians (proper)
- (4) The Karnatakas
- (5) The Gurjaras

We may next proceed to note the castes and sub-castes into which each of these sub-divisions of the Panch Dravidas have disintegrated.

1. THE MAHARASHTRA BRAHMINS

The Maharashtra Brahmins have among them the following castes and sub-castes:

(1) The Deshasthas, (2) The Konkanasthas, (3) The Karhadas, (4) The Kanvas, (5) The Madhyandinas, (6) The Padhyas, (7) The Devarukhas, (8) The Palashas, (9) The Kirvantas, (10) The Tirgulas, (11) The Javalas, (12) The Abhiras, (13) The Savashas, (14) Kastas, (15) The Kunda Golakas, (16) The Randa Golakas, (17) The Brahmana-Jais, (18) The Soparas, (19) The Khistis, (20) The Huseinis, (21) The Kalankis, (22) The Maitrayanias, (23) The Varadis-Madhyandin-Yaj'ur-Vedi, (24) The Varadis-Madhyandin-Rig Vedi, (25) The Jhade. The Shenvis are further divided into nine sub-castes called (26) Narvankar, (27) Keloskar, (28) Bardeshkar, (29) Kudaldeshkar, (30) Pednekar, (31) Bhalavelekar, (32) Kushasthali, (33) Khadape and (34) Khajule.

2. THE ANDHRA BRAHMINS

The following is the list of castes and sub-castes which make up the Andhra Brahmins—

(1) The Varnasalus, (2) The Kamarukubi, (3) The Karanakamulu, (4) The Madhyandians, (5) The Tailangas, (6) The Murakanadus, (7) The Aradhyas, (8) The Yajnavalkyas, (9) The Kasaranadu, (10) The Velandus, (11) The

Venginadus, (12) The Vedinadus, (13) The Samavedis, (14) The Ramanujis, (15) The Madhavacharis, (16) The Niyogis.

3. THE TAMIL BRAHMINS

They consist of the following castes— (1) The Rig-Vedis, (2) The Krishna Yajur-Vedis, (3) The Shukia Yajur-Vedis—Madhyandinas, (4) The Shukla Yajur-Vedis-Kanvas, (5) The Sama Vedis, (6) The Atharva, (9) The Vaishnavas, (10) The Vira Vaishnavas, (11) The Shri-Vaishnavas, (12) The Bhagvatas, (13) The Shaktas.

4. THE KARNATIK BRAHMINS

They include the following castes—

(1) The Rig Vedis, (2) The Krishna Yajur-Vedis, (3) The Shukia Yajur-Vedis Madhyandinas, (4) The Shukla Yajur-Vedis Kanvas, (5) The Sama Vedis, (6) The Kume Brahmins and (7) The Nagara Brahmins.

5. THE GURJARA BRAHMINS

The list of castes which compose the Gurjara Brahmins is as follows : 1. The Andichya Brahmins. They are divided into the following sub-castes:

(1) Siddhpura Andichya, (2) Sihor Andichya, (3) Tolkiya Andhichya, (4) Kunbigor, (5) Inochigor, (6) Darjigor, (7) Grandhrapagor, (8) Koligor, (9) Marwadi Andichya, (10) Kachhi Andichya, (11) Vagdiya Andichya. II. The Nagar Brahmins. The following are the sub-castes of the Nagar Brahmins:

(12) The Vadanagar Brahmins, (13) The Vishalnagar Brahmins, (14) The Sathodra Brahmins, (15) The Prashnoras, (16) The Krishnoras, (17) The Chitrodas, (18) The Baradas. There are also three other divisions among the Nagar Brahmins. They are called—

(19) Gujarathi Nagars, (20) Sorathi Nagars and (21) Nagars of other Towns.

III. The Girnar Brahmins. They are divided among the following castes: (22) The Junagadhya Girnars, (23) The Chorvada Girnars, (24) The Ajakiyas.

IV. The Mevadas Brahmins. They are distributed among the following castes:

(25) The Bhata Mevadas, (26) The Trivadi Mevadas, (27) The Charosi Mevadas.

V. The Deshavala Brahmins. They have one sub-caste which is called:

(46) The Deshavala Brahman Surati. VI. The Rayakavala Brahmins. They are divided into two subcastes :

(47) The Navas (new ones) and (48) The Mothas (old ones).

VII. The Khedvala Brahmins. They are divided into five subcastes :

(49) The Khedvala Bajas, (50) The Khedvala Bhitaras, (51) The Khedva Bajas, (52) The Khedva Bhitaras.

VIII. The Modha Brahmins. They are divided into eleven subcastes :

(53) The Trivedi Modhas, (54) The Chaturvedi Modhas, (55) The Agihans Modhas, (56) The Tripal Modhas, (57) The Khijadiya Sanvana Modhas, (58) The Ekadashdhra Modhas, (59) The Tandulotha Modhas, (60) The Utanjaliya Modhas, (61) The Jethimal Modhas, (62) The Chaturvedi Dhinoja Modhas, (63) The Dhinoja Modhas.

IX. The Shrimali Brahmins. The Shrimali Brahmins are divided into the following castes:

(64) The Marwadi Shrimali, (65) The Mevadi Shrimali, (66) The Kachhi Shrimali, (67) The Kathiavadi Shrimali, (68) The Gujarathi Shrimali. The Gujarathi Shrimali are further sub-divided into

(69) Ahamadabadi Shrimali, (70) Surati Shrimali, (71) Ghoghari Shrimali and (72) The Khambhati Shrimali. The Khambhati Shrimali are again sub-divided into—

(73) Yajurvedi Khambhati Shrimali, (74) Samavedi Khambhati Shrimali.

X. The Chovisha Brahmins. They are divided into two subcastes : (75) Mota (Great ones), (76) Lahana (small ones).

XI. The Sarasvata Brahmins. They are divided into two subcastes : (77) Sorathiya Sarasvata, (78) Sindhava Sarasvata.

XII. The following is the list of castes of Gujaratha Brahmins which have not developed sub-castes:

- | | |
|--------------------------------|--|
| (79) The Sachora Brahmins, | (80) The Udambara Brahmins, |
| (81) The Narsipara Brahmins, | (82) The Valadra Brahmins, |
| (83) The Pangora Brahmins, | (84) The Nandodra Brahmins, |
| (85) The Vayada Brahmins, | (86) The Tamil (or Dradvida) Brahmins, |
| (87) The Rodhavala Brahmins, | (88) The Padmivala Brahmins, |
| (89) The Gomativala Brahmins, | (90) The Itavala Brahmins, |
| (91) The Medhatavala Brahmins, | (92) The Gayavala Brahmins, |
| (93) The Agastyavala Brahmins, | (94) The Pretavala Brahmins, |
| (95) The Unevala Brahmins, | (96) The Rajavala Brahmins, |

- (97) The Kanojiya Brahmins, (98) The Sarvariya Brahmins,
 (99) The Kanoliya Brahmins, (100) The Kharkheliya Brahmins,
 (101) The Parvaliaya Brahmins, (102) The Sorathiya Brahmins,
 (103) The Tangamadiya Brahmins, (104) The Sanodiya Brahmins,
 (105) The Motala Brahmins, (106) The Jhalora Brahmins,
 (107) The Rayapula Brahmins, (108) The Kapila Brahmins,
 (109) The Akshayamangala Brahmins, (110) The Gugli Brahmins,
 (111) The Napala Brahmins, (112) The Anavala Brahmins,
 (113) The Valmika Brahmins, (114) The Kalinga Brahmins,
 (115) The Tailinga Brahmins, (116) The Bhargava Brahmins,
 (117) The Malavi, (118) The Banduan Brahmins,
 (119) The Bharathana Brahmins, (120) The Pushkarana Brahmins,
 (121) The Khadayata Brahmins, (122) The Maru Brahmins,
 (123) The Dahima Brahmins, (124) The Chovisa Brahmins,
 (125) The Jambu Brahmins, (126) The Maratha Brahmins,
 (127) The Dadhicha Brahmins, (128) The Lalata Brahmins,
 (129) The Valuta Brahmins, (130) The Borshidha Brahmins,
 (131) The Golavala Brahmins, (132) The Prayagvala Brahmins,
 (133) The Nayakvala Brahmins, (134) The Utkala Brahmins,
 (135) The Pallivala Brahmins, (136) The Mathura Brahmins,
 (137) The Maithila Brahmins, (138) The Kulabha Brahmins,
 (139) The Bedua Brahmins, (140) The Ravavala Brahmins,
 (141) The Dashahara Brahmins, (142) The Karnatika Brahmins,
 (143) The Talajiya Brahmins, (144) The Parashariya Brahmins,
 (145) The Abhira Brahmins, (146) The Kundu Brahmins,
 (147) The Hirayajiya Brahmins, (148) The Mastava Brahmins,
 (149) The Sthitisha Brahmins, (150) The Predatvala Brahmins,
 (151) The Rampura Brahmins, (152) The Jila Brahmins,
 (153) The Tilotya Brahmins, (154) The Durmala Brahmins,
 (155) The Kodva Brahmins, (156) The Hanushuna Brahmins,
 (157) The Shevada Brahmins, (158) The Titraga Brahmins,
 (159) The Basuladas Brahmins, (160) The Magmarya Brahmins,
 (161) The Rayathala Brahmins, (162) The Chapila Brahmins,
 (163) The Baradas Brahmins, (164) The Bhukaniya Brahmins,
 (165) The Garoda Brahmins, (166) The Taporana Brahmins. II

THE GAUDA BRAHMINS

Like the Dravida Brahmins the Gauda Brahmins also consist of a fraternity of five different groups of Brahmins. These five groups are known as:

- (1) The Sarasvata Brahmins, (2) The Kanyakubja Brahmins,
- (3) The Gauda Brahmins, (4) The Utkala Brahmins,
- (5) The Maithila Brahmins.

An inquiry into the internal structure of each of these five groups of Panch Gaudas reveals the same condition as is found in the case of the five groups, which form the fraternity of Panch Dravidas. The only question is whether the internal divisions and sub-divisions are fewer or larger than are found among the Panch Dravidas. For this purpose it is better to take each group separately.

THE SARASVATA BRAHMINS

The Sarasvata Brahmins fall into three territorial sections:

- (1) The Sarasvatas of the Punjab, (2) The Sarasvatas of Kashmir and (3) The Sarasvatas of Sindh.

1. THE SARASVATAS OF PUNJAB

There are three sub-sections of the Sarasvatas of the Punjab:

- (A) Sarasvatas of the districts of Lahore, Arnritsar, Batala, Gurdaspur, Jalandar, Multan, Jhang and Shahpur. They are again divided into High Caste and Low Caste.

HIGH CASTES

- (1) Navale, (2) Chuni, (3) Ravade, (4) Sarvaliye, (5) Pandit,
- (6) Tikhe, (7) Jhingan, (8) Kumadiye, (9) Jetle, (10) Mohle or Mole,
- (11) Tikhe-A'nde, (12) Jhingan-Pingan, (13) jetli-Petli,
- (14) Kumadiye-Lumadiye, (15) Mohle-Bohle, (16) Bage,
- (17) Kapuriye, (18) Bhaturiye, (19) Maliye, (20) Kaliye,
- (21) Sanda, (22) Pathak, (23) Kural, (24) Bharadwaji,
- (25) Joshi, (26) Shori, (27) Tiwadi, (28) Marud, (29) Datta,
- (30) Mujhal, (31) Chhibar, (32) Bali, (33) Mohana, (34) Lava,
- (35) Vaidya, (36) Prabhakar, (37) Shame-Potre, (38) Bhoja-Potre,
- (39.) Singhe-Potre, (40) Vatte-Potre, (41) Dhannan-Potre,

(42) Dravade, (43) Gaindhar, (44) Takht Laladi, (45) Shama Dasi, (46) Setpal (or Shetpal), (47) Pushrat, (48) Bharadvaji, (49) Katpale, (50) Ghotke, (51) Pukarne.

LOWER CLASSES

(52) Diddi, (53) Shridhara, (54) Vinayaka, (55) Majju, (56) Khindariye, (57) Harad, (58) Prabhakar, (59) Vasudeva, (60) Parashara, (61) Mohana, (62) Panjan, (63) Tivara, (64) Kapala, (65) Bharkhari, (66) Sodhi, (67) Kaijar, (68) Sangad, (69) Bharadvaji, (70) Nage, (71) Makavar, (72) Vashishtha, (73) Dangaval, (74) Jalap, (75) Tripane, (76) Bharathe, (77) Bansale, (78) Gangahar, (79) Jotashi, (80) Rikhi (or Rishi), (81) Mandar, (82) Brahmi, (83) Tejpal, (84) Pal, (85) Rupal, (86) Lakhanpal, (87) Ratanpal, (88) Shetpal, (89) Bhinde, (90) Dhami, (91) Chanan, (92) Randeha, (93) Bhuta, (94) Rati, (95) Kundi, (96) Hasadhir, (97) Punj, (98) Sandhi, (99) Bahoye, (100) Virad, (101) Kaland, (102) Suran, (103) Sudan, (104) Ojhe, (105) Bramha-Sukul, (106) Hariye, (107) Gajesu, (108) Bhanot, (109) Tinuni, (110) Jalli, (111) Tole, (112) Jalap, (113) Chitchot, (114) Padhe or Pandhe, (115) Marud, (116) Laladiye, (117) Tote, (118) Kusarit, (119) Ramtal, (120) Kapale, (121) Masodare, (122) Ratniye, (123) Chandan, (124) Churavan, (125) Mandahar, (126) Madhare, (127) Lakarphar, (128) Kund, (129) Kardam, (130) Dhande, (131) Sahajpal, (132) Pabhi, (133) Rati, (134) Jaitke, (135) Daidriye, (136) Bhatare, (137) Kali, (138) Jalpot, (139) Maitra, (140) Sankhatre, (141) Ludra, (142) Vyasa, (143) Paitu, (144) Kirar, (145) Puje, (146) Isar, (147) Latta, (148) Dhami, (149) Kalhan, (150) Madarkhamb, (151) Bedesar, (152) Salvahan, (153) Dhande, (154) Marud, (155) Bature, (156) Joti, (157) Soyari, (158) Tejpal, (159) Kuralpal, (160) Kalas, (161) Jalap, (162) Tinmani, (163) Tanganivate, (164) Jalpot, (165) Pattu, (166) Jsrava, (167) Jayachand, (168) Sanwal, (169) Agnihotri, (170) Agraphakka, (171) Ruthade, (172) Bhaji, (173) Kuchhi, (174) Sali, (175) Bhambi, (176) Medu, (177) Mehad, (178) Yarnye, (179) Sangar, (180) Sang, (181) Nehar, (182) Chakpaliye, (183) Bijraye, (184) Narad, (185) Kutwal, (186) Kotpal, (187) Nabh, (188) Nad, (189) Parenje, (190) Kheti, (191) A'ri, (192) Chavhe, (193) Bibde,

(194) Bandu, (195) Machhu, (196) Sundar, (197) Karadage, (198) Chhibbe, (199) Sadhi, (200) Tallan, (201) Karddam, (202) Jhaman, (203) Rangade, (204) Bhog, (205) Pande, (206) Gande, (207) Pante, (208) Gandhe, (209) Dhinde, (210) Tagale, (211) Dagale, (212) Lahad, (213) Tad, (214) Kayi, (215) Ludh, (216) Gandar, (217) Mahe, (218) Saili, (219) Bhagi, (220) Pande, (221) Pipar, (222) Jathee.

(B) Sarasvata Brahamins of Kangada and the adjacent Hill Country. These too are divided into High Class and Low Class.

HIGH CASTES

(1) Osdi, (2) Pandit Kashmiri, (3) Sotri, (4) Vedve, (5) Naga, (6) Dikshit, (7) Misri Kashmiri, (8) Madihatu, (9) Panchkarn, (10) Raine, (11) Kurudu, (12) A'Chariye.

LOWER CLASSES

(13) Chithu, (14) Panyalu, (15) Dumbu, (16) Dehaidu, (17) Rukhe, (18) Pambar, (19) Gutre, (20) Dyabhudu, (21) Make, (22) Prot (Purohita) Jadtrotiye, (23) Visht Prot, (24) Padhe Saroj, (25) Padhe Khajure, (26) Padhe Mahite, (27) Khajure, (28) Chhutwan, (29) Bhanwal, (30) Rambe, (31) Mangrudiye, (32) Khurvadh, (33) Galvadh, (34) Dangmar, (35) Chalivale.

(C) Sarasvata Brahmins of Dattarpur, Hoshyarpur and the adjacent Country.

These are also divided into High Class and Low Class.

1. HIGH CASTES

(1) Dogre, (2) Sarmayi, (3) Dube, (4) Lakhanapal, (5) Padhe Dholbalvaiya, (6) Padhe Ghohasniye, (7) Padhe Dadiye, (8) Padhe Khindadiya, (9) Khajurive.

II. LOWER CLASSES

(10) Kapahatiye, (11) Bharadhiyal, (12) Chaprohiye, (13) Makade,

- (14) Kutallidiye, (15) Sarad, (16) Dagadu, (17) Vantade, (18) Muchle, (19) Sammol, (20) Dhose, (21) Bhatol, (22) Rajohad, (23) Thanik, (24) Panyal, (25) Chibbe, (26) Madote, (27) Misar, (28) Chhakotar, (29) Jalreiye, (30) Lahad, (31) Sel, (32) Bhasul, (33) Pandit, (34) Changhial, (35) Lath, (36) Sand, (37) Lai, (38) Gadottare, (39) Chirnal, (40) Badhie, (41) Shridhar, (42) Patdu, (43) Juwal, (44) Maite, (45) Kakliye, (46) Tak, (47) Jhol, (48) Bhadoe, (49) Tandik, (50) Jhummutiyar, (51) A'l, (52) Mirat, (53) Mukati, (54) Dalchallie, (55) Bhatohaye, (56) Tyahaye, (57) Bhatore.

2. THE SARASVATAS OF KASHMIR

There are two sub-sections of the Sarasvatas of Kashmir. (A) Sarasvata Brahamans of Jammu, Jasrota and the neighbouring Hill Country.

They are divided into three classes. High, Middle and Low.

1. HIGH CASTES

- (1) Amgotre, (2) Thappe, (3) Dube, (4) Sapoliye Padhe, (5) Badiyal, (6) Kesar, (7) Nadh, (8) Khajure Prahot, (9) Jamval Pandit, (10) Vaidya, (11) Lava, (12) Chibar, (13) aliye, (14) Mohan, (15) Bambhaval.

II. MIDDLE CASTES

- (16) Raine, (17) Satotre, (18) Katotre, (19) Lalotre, (20) Bhangotre, (21) Samnotre, (22) Kashmiri Pandit, (23) Pandhotre, (24) Vilhanoch, (25) Badu, (26) Kernaye Pandit, (27) Danal Padhe, (28) Mahite, (29) Sudhraliye, (30) Bhatiad, (31) Puroch, (32) Adhotre, (33) Mishra, (34) Parashara, (35) Bavagotre, (36) Mansotre, (37) Sudathiye.

III. LOWER CLASSES

- (38) Sudan, (39) Sukhe, (40) Bhure, (41) Chandan, (42) Jalotre, (43) Nabhotre, (44) Khadotre, (45) Sagdol, (46) Bhuriye, (47) Baganachhal, (48) Rajuliye, (49) Sangde, (50) Munde, (51) Surnachal, (52) Ladhanjan, (53) Jakhotre, (54) Lakhanpal, (55) Gauda Purohita, (56) Shashgotre, (57) Khanotre, (58) Garoch, (59) Marotre, (60) Upadhe, (61) Khindhaye Padhe,

- (62) Kalandari, (63) Jarad, (64) Udihal, (65) Ghode,
 (66) Basnotre, (67) Barat, (68) Chargat, (69) Lavanthe,
 (70) Bharangol, (71) Jaranghal, (72) Guhaliye, (73) Dhariancha,
 (74) Pindhad, (75) Rajuniye, (76) Badakulive, (77) Sirkhandiye,
 (78) Kirpad, (79) Balli, (80) Salurn, (81) Ratanpal, (82) Banotre,
 (83) Yantradhari, (84) Dadorich, (85) Bhaloch, (86) Chhachhiale,
 (87) Jhangotre, (88) Magdol, (89) Phaunphan, (90) Saroch,
 (91) Gudde, (92) Kirle, (93) Mansotre, (94) Thammotre,
 (95) Thanmath, (96) Bramiye, (97) Kundan, (98) Gokuliye Gosain,
 (99) Chakotre, (100) Rod, (101) Bargoutre, (102) Kavde,
 (103) Magdiyaliye, (104) Mathar, (105) Mahijiye, (106) Thakure Purohita,
 (107) Galhal, (108) Cham, (109) Rod, (110) Labhotre, (111) Redathiye,
 (112) Patal, (113) Kamaniye, (114) Gandhargal, (115) Prithvipal,
 (116) Madhotre, (117) Kambo, (118) Sarmayi, (119) Bachhal,
 (120) Makhotre, (121) Jad, (122) Batialiye, (123) Kudidab,
 (124) Jambe, (125) Karanathiye, (126) Suthade, (127) Sigad,
 (128) Garadiye, (129) Machhar, (130) Baghotre, (131) Sainhasan,
 (132) Utriyal, (133) Suhandiye, (134) Jhindhad, (135) Battal,
 (136) Bhainkhare, (137) Bisgotre, (138) Jhalu, (139) Dabb,
 (140) Bhuta, (141) Kathialu, (142) Paladhu, (143) Paladhu,
 (144) Jakhotre, (145) Pange, (146) Solhe, (147) Suguniye,
 (148) Sanhoch, (149) Duhal, (150) Bando, (151) Kanungo,
 (152) Jhavdu, (153) Jhaphacu, (154) Kaliye, (155) Khaphankho.

(B) THE SARASVATAS OF KASHMIR

mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_15

The following is a list of Kashmiri Brahmins.

- (1) Kaul, (2) Rajdan, (3) Guriti, (4) Jitish, (5) Dar, (6) Trakari,
 (7) Mujhi, (8) Munshi, (9) Butal, (10) Javi, (11) Bajai, (12) Rei,
 (13) Hundo, (14) Dipti, (15) Chhichvali, (16) Rugi, (17) Kall,
 (18) Sum, (19) Hanji, (20) Hastivali, (21) Mutu, (22) Tikku,
 (23) Gais, (24) Gadi, (25) Brari, (26) Ganj, (27) Vangan,
 (28) Vagana, (29) Bhut, (30) Bhairava, (31) Madan, (32) Dina,
 (33) Shargal, (34) Hakchar, (35) Hak, (36) Kukar, (37) Chhatari,
 (38) Saunpuri, (39) Matti, (40) Khush, (41) Shakdar,
 (42) Vaishnava, (43) Kotar, (44) Kak, (45) Kachari, (46) Tote,
 (47) Saraph, (48) Gurah, (49) Thanthar, (50) Khar, (51) Thaur,
 (52) Teng, (53) Saiyad, (54) Trupuraya, (55) Muthi, (56) Saphai,

- (57) Bhan, (58) Vanya, (59) Garial, (60) Thapal, (61) Nauri,
 (62) Masaldan, (63) Mushran, (64) Turki, (65) Photedar,
 (66) Kharu, (67) Karbangi, (68) Bhath, (69) Kichilu, (70) Chhan,
 (71) Mukdam, (72) Khapari, (73) Bulaki, (74) Kar, (75) Jelali,
 (76) Saphayu, (77) Batphali, (78) Hukhi, (79) Kukpari, (80) Kali,
 (81) Jari, (82) Ganj, (83) Kim, (84) Mundi, (85) Jangal, (86) Jati,

3. THE SARASVATAS OF SINDH

The Sarasvatas of Sindh are sub-divided as follows:

- (1) Shikarpuris, (2) Barovis, (3) Ravanjahis, (4) Shetpalas
(5) Kuvachandas, and (6) Pokharana.

11. THE KANYAKUBJA BRAHMINS

The Kanuakubjas take their name from the town Kanoj which was the capital of the Empire. They are also called Kanoujas. There are two denominations of the Kanyakubja Brahamins. One is called the *Sarvariyas* and the other is called the *Kanyakubjas*. The Sarvariyas got their name from the ancient river Saryu to the east of which they are principally found. They are a provincial offset from the Kanaujas, with whom they do not now intermarry. The sub-divisions among the Sarvariyas are generally the same as those found among the Kanaujas. It is therefore enough to detail the sub-divisions among the Kanaujas. There are ten divisions of the Kanyakubja Brahmins:

- (1) The Mishra, (2) The Shuklas, (3) The Tivaris, (4) The Dubes,
(5) The Pathaks. (6) The Pande, (7) The Upadhya, (8) The Chaubes,
(9) The Dikshitas, (10) The Vajapeyis.

Each of these sub-divisions has many sub-divisions. They are mentioned below:

1. THE MISHRAS

The Mishras consist of the following sections:

- (1) The Madhbani, (2) The Champaran, (3) The Patlal or Patlayala,
(4) The Ratanvala, (5) The Bandol, (6) The Matol or Matevala,
(7) The Katariya of the same Veda, (8) The Nagariya of the Vatsa Gotra,
(9) The Payasi of the Vatsa Gotra, (10) The Gana,
(11) The Teunta or the Tevanta, (12) The Marjani, (13) The Gurha,
(14) The Markara, (15) The Jignya, (16) The Parayana, (17) The Pepara,
(18) The Aterva or Atharva, (19) The Hathepara, (20) The Suganti,
(21) The Kheta, (22) The Grambasi, (23) The Birha, (24) The Kausi,
(25) The Kevati, (26) The Raisi, (27) The Bhahajiya, (28) The Belva,
(29) The Usraina, (30) The Kodiya, (31) The Tavakpuri, (32) The
Jimalpuri,
(33) The Shringarpuri, (34) The Sitapuri, (35) The Putavha,
(36) The Sirajpuri, (37) The Bhampuri, (38) The Terka,
(39) The Dudhagaumi, (40) The Ratnapuri, (41) The Sunhanla.

2. THE SHUKLAS

The Shukias consist of the following sections:

- (1) The Khakhayijkhor named from two villages,
- (2) The Marnkhor named from two villages, (3) The Tipti,
- (4) The Bhedi, (5) The Bakaruva, (6) The Kanjahi, (7) The Khandail,
- (8) The Bela, (9) The Change the Avasthi, (10) The Tevarasi Parbhakar,
- (11) The Mehuliyar, (12) The Kharbahiya, (13) The Chanda,
- (14) The Grga, (15) The Gautami, (16) The Parasa, (17) The Tara,
- (18) The Barikhpuri, (19) The Karyava, (20) The Ajmadgadhya,
- (21) The Pichaura, (22) The Masauvas, (23) The Sonthianva,
- (24) The Aukin, (25) The Bir, (26) The Gopinath.

3. THE TIVARIS

The Tivaris consist of the following sections:

- (1) The Lonakhar, (2) The Lonapar, (3) The Munjauna, (4) The Mangraich,
- (5) The Jhunadiya, (6) The Sohgaura, (7) The Tara, (8) The Gorakhpuriya,
- (9) The Daurava, (10) Pendi, (11) The Sirjam, (12) The Dhatura,
- (13) The Panauli, (14) The Nadauli or Tandauli, (15) The Burhiyabari,
- (16) The Gurauli, (17) The Jogiya, (18) The Dikshita, (19) The Sonaura,
- (20) The Agori, (21) The Bhargava, (22) The Bakiya, (23) The Kukurgariya,
- (24) The Dama, (25) The Gopala, (26) The Govardhana, (27) The Tuke,
- (28) The Chattu, (29) The Shivali, (30) The Shakharaj, (31) The Umari,
- (32) The Manoha, (33) The Shivarajpur, (34) The Mandhna,
- (35) The Sape, (36) The Mandan Tirvedi, (37) The Lahari Tirvedi,
- (38) The Jethi Tirvedi.

4. THE DUBES

The Dube's consist of the following sections:

- (1) The Kanchani, (2) The Singhva, (3) The Belava, (4) The Parava,
- (5) The Karaiya, (6) The Bargainya, (7) The Panchani, (8) The Lathiahi,
- (9) The Gurdvan, (10) The Methiber, (11) The Barhampuriya,
- (12) The Singilava, (13) The Kuchala, (14) The Munjalva, (15) The Paliya,
- (16) The Dhegava, (17) The Sisra, (18) The Sinani, (19) The Kudavarye,
- (20) The Kataiya, (21) The Panva.

5. THE PATHAKS

The following are the sections composing of the Pathakas:

- (1) The Sonaura, (2) The Ambatara, (3) The Patakhavaliya,
- (4) The Dhigavach, (5) The Bhadari.

6. THE PANDES

The Pande's are divided into the following sections:

- (1) The Tirphala or Triphala, (2) The Jorava, (3) The Matainya,
- (4) The Toraya, (5) The Nakchauri, (6) The Parsiha, (7) The Sahankol,
- (8) The Barhadiya, (9) The Gegas, (10) The Khoriya, (11) The Pichaura,
- (12) The Pichaura Payasi, (13) The Jutiya or Jatya, (14) The Itar or Intar,
- (15) The Beshtaul or Beshtavala, (16) The Charpand, (17) The Sila,
- (18) The Adhurj, (19) The Madariya, (20) The Majgaum,
- (21) The Dilipapar, (22) The Payhatya, (23) The Nagav, (24) The Talava,
- (25) The Jambu.

7. THE UPADHYAS

There are five sections among the Upadhyas:

- (1) The Harainya or Hiranya, (2) The Devarainya, (3) The Khoriya,
- (4) The Jaithiya, (5) The Dahendra, (6) The Gorat, (7) The Ranisarap,
- (8) The Nizamabad, (9) The Dudholiya, (10) The Basgava.

8. THE CHAUBES

The principal sub-divisions of the Chaube's are:

- (1) The Nayapuras, (2) The Rargadis, (3) The Chaukhar, (4) The Katayas,
- (5) The Rampuras, (6) The Paliyas, (7) The Hardaspuras, (8) The Tibaiyas,
- (9) The Jamadugas, (10) The Gargeya.

9. THE DIKSHITAS

The Dikshitas have the following sub-divisions:

- (1) The Devagaum, (2) The Kakari, (3) The Nevarshiya, (4) The Anter,
- (5) The Sukanta, (6) The Chaudhari, (7) The Jujatvatiyas.

10. THE VAJPEYIS

The Vajapeyi's consist of the following sub-divisions:

(1) The Unche, or the High, (2) The Niche or the Low. Besides the divisions and sub-divisions of the Kanyakubjas mentioned above there are Kanyakubjas who are regarded as inferior and therefore isolated from the main divisions and sub-divisions. Among them are the following:

- (1) The Samdariya, (2) The Tirguvati, (3) The Bhaurha, (4) The Kabisa,
- (5) The Kevati, (6) The Chandravala, (7) The Kusumbhiya,
- (8) The Bisohya, (9) The Kanhali, (10) The Khajuvai, (11) The Kisirman,

(12) The Paihtiya, (13) The Masonad, (14) The Bijara, (15) The Ansnaura.

III. THE GAUDA BRAHMINS

The Gauda Brahmins derive their name from the Province and (now ruined) city of Gauda, for long the capital of Bihar and Bengal (the seat of the *Angas* and *Vangas* or *Bangas*). The subdivisions among the Gauda Brahmins are very considerable in number. The most conspicuous of them are the following:

- (1) The Gaudas or Kevala Gaudas, (2) Adi-Gaudas,
- (3) Shukiavala Adi-Gaudas, (4) Ojhas, (5) Sanadhya Gauda,
- (6) Chingalas, (7) Khandevalas, (8) Daymias, (9) Shri-Gaudas,
- (10) Tamboli Gaudas, (11) Adi-Shri Gaudas, (12) Gurjar Gaudas,
- (13) Tek Bara Gaudas, (14) Chamar Gaudas, (15) Hariyana Gaudas,
- (16) Kirtanya Gaudas, (17) Sukul Gaudas.

IV. THE UTKAL BRAHMINS

Utkal is the ancient name of Orissa and Utkal Brahmins means Brahmins of Orissa. They are divided into:

- (1) The Shashani Brahmins, (2) The Shrotriya Brahmins,
- (3) The Panda Brahmins, (4) The Ghatiya Brahmins,
- (5) The Mahasthana Brahmins, (6) The Kalinga Brahmins.

The *Shashani* Brahmins have the following sub-divisions.

- (1) The Savanta, (2) The Mishra, (3) The Nanda, (4) The Pate,
- (5) The Kara, (6) The Acharya, (7) The Satapasti, (8) The Bedi,
- (9) The Senapati, (10) The Parnagrahi, (11) The Nishank,
- (12) The Rainipati.

The *Shrotriya Brahmins* have the four following sub-divisions:

- (1) Shrotriyas, (2) Sonarbani, (3) Teli, (4) Agrabaksha.

V. THE MAITHILYA BRAHMINS

The Maithilya Brahmins derive their designation from Mithila, an ancient division of India and which includes a great portion of the modern districts of Tirhut, Saran, Purnea and also parts of the adjacent tracts of Nepal. The following are the sub-divisions of the Maithilya Brahmins:

- (1) The Ojhas, (2) The Thakurs, (3) The Mishras, (4) The Puras,
- (5) The Shrotriyas, (6) The Bhuiharas.

Of these the Mishras have the following sub-sections:

- (1) The Chandharis, (2) The Rayas, (3) The Parihastas, (4) The Khanas,
(5) The Kumaras.

III

OTHER BRAHMINS

The Panch Dravidas is a generic name for Brahmins living below the Vindhya and the Panch Gaudas is a generic name for Brahmins living above the Vindhya. In other words, Panch Gauda is a name for Northern Brahmins and Panch Dravidas, a name for Southern Brahmins. What is, however, to be noted is that the five divisions of Brahmins composing the Northern Fraternity and Southern Fraternity of Brahmins do not exhaust all the divisions of Brahmins living in Northern or Southern India. To complete the subject it is necessary not only to refer to them but also to record their sub-divisions.

OTHER BRAHMINS OF SOUTH INDIA

In this category fall the following:

- (1)(1) The Konkani Brahmins
mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/23. Essay on Untouchables and Untouchability_Social.htm - _msocom_16

(7)(7) The Nambudri

The Nambudri Brahmins are the principal group of Brahmins living in Malabar. Besides the Nambudris there are also other sections of Brahmins. They are:

- (1) The Pottis, (2) The Muttadus, (3) The Fledus, (4) The Ramnad-writ Parasahas, (5) The Pattaras, (6) The Ambalvasis.

OTHER RAJPUTA BRAHMINS

The Varieties of Rajputa Brahmins not mentioned in the list of Gurjar Brahmins are:

- (1) The Shrimalis Brahmins, (2) The Sachoda Brahmins,
- (3) The Pallivalar Brahmins, (4) The Nandanas Brahmins,
- (5) The Pushakars Brahmins, (6) The Pokhar Sevakas Brahmins,
- (7) The Medatvala, (8) The Parikha Brahmins, (9) The Lavanas Brahmins,
- (10) The Dakotas Brahmins, (II) The Garudiyas Brahmins,
- (12) The Acharjas, (13) The Bura Brahmins, (14) The Kapidas,
- (15) The Dahimas, (16) The Khandelvalas, (17) The Divas,
- (18) The Sikavadas, (19) The Chamatvalas, (20) The Marus,
- (21) The Shrivantas, (22) The Abhiras, (23) The Bhartanas,
- (24) The Sanacadas, (25) The Vagadis, (26) The Mewadas,
- (27) The Rajgurus, (28) The Bhats, (29) The Charanas.

ESSAYS ON UNTOUCHABLES

AND UNTOUCHABILITY: POLITICAL

Contents

- Chapter 1 : From millions to fractions
- Chapter 2 : The revolt of the untouchables
- Chapter 3 : Held at bay
- Chapter 4 : Their wishes are laws unto us
- Chapter 5 : Under the providence of Mr. Gandhi
- Chapter 6 : Gandhi and his fast
- Chapter 7 : A warning to the untouchables

Political

(Seven essays on the political issues previously not published have been included under the category 'Political' in this Book.)

CHAPTER 1

FROM MILLIONS TO FRACTIONS

- I. Population of the Untouchables long unknown.
- II. The Census of 1911 and the first attempt at separate enumeration.
- III. Confirmation of the findings of 1911 Census.
- V. Lothian Committee and the Hindu cry of "no Untouchables".
- V. Reasons for the cry.
- VI. Attitude of the Backward Classes and the Muslims.

What is the total population of the Untouchables of India? This is bound to be the first question that a person who cares to know anything about them is sure to ask. It is now easy to answer this question. For the Census of India taken in 1931 gives it as 50 millions. While it is possible now to give more or less exact figures of the Untouchable population in India it was not possible to do so for a long time.

This was due to various causes. Firstly untouchability is not a legal term. There is no exact legal definition of untouchability whereby it could be possible to define who is an Untouchable and who is not. Untouchability is a social concept which has become embodied in a custom and as custom varies so does untouchability. Consequently there is always some difficulty in the way of ascertaining the population of the Untouchables with mathematical exactitude.

Secondly there has always been serious opposition raised by high caste Hindus to the enumeration by caste in the Census Report. They have insisted on the omission of the question regarding caste from the schedules and the suppression of the classification of the population by caste and tribe. A proposal to this effect was made in connection with the 1901 Census mainly on the ground that the distribution of various castes and tribes in the population changed at large intervals and that it was not necessary to obtain figures at each decennial enumeration.

These grounds of objection did not have any effect on the Census Commissioner. In the opinion of the Census Commissioner enumeration by caste was important and necessary. It was argued by the Census Commissioner that,

“Whatever view may be taken of the advantages or disadvantages of caste as a social institution, it is impossible to conceive of any useful discussion of the population questions in India in which caste would not be an important element. Caste is still 'the foundation of the Indian social fabric,' and the record of caste is still 'the best guide to the changes in the various social strata in the Indian Society'. Every Hindu (using the term in its most elastic sense) is born into a caste and his caste determines his religious, social, economic and domestic life from the cradle to the grave. In western countries the major factors which determine the different strata of society, viz. wealth, education and vocation are fluid and catholic and tend to modify the rigidity of birth and hereditary position. In India spiritual and social community and traditional occupation override all other factors. Thus, where in censuses of western countries, an economic or occupational grouping of the population affords a basis for the combination of demographic statistics, the corresponding basis in the case of the Indian population is the distinction of religion and caste. Whatever view may be taken of caste as a national and social institution, it is useless to ignore it, and so long as caste continues to be used as one of the distinguishing features of an individual's official and social identity, it cannot be claimed that a decennial enumeration helps to perpetuate an undesirable institution.”

The objections to the enumeration by castes in the census were urged with greater force on the occasion of the census of 1911 when the special questionnaire containing ten tests was issued for the purpose of grouping together castes which satisfied those tests. There was no doubt that those tests were such as would mark off the Depressed Classes from the Caste Hindus. It was feared by the Caste Hindus that this circular was the result of the Muslim Memorial to the Secretary of State and its aim was to separate the Depressed Classes from the Hindus and thereby to reduce the strength of the Hindu Community and its importance.

This agitation bore no fruit and the objection of separately enumerating in the Census Report those castes which satisfied those ten tests was carried out. The agitation however did not die out. It again cropped up at the Census of 1920. At this time, effort was made to put forth the objection to the caste return in a formal manner. A resolution was tabled in the Imperial Legislative Council in 1920 attacking the caste inquiry on the grounds (a) that it was undesirable to recognise and perpetuate, by official action, the system of caste differentiation and (b) that in any case the returns were inaccurate and worthless, since the lower castes took the opportunity of passing themselves as belonging to groups of higher status. If this resolution had been carried, it would not have been possible to know the population of the Untouchables. Fortunately owing to the absence of the mover, the resolution was not discussed and the Census Commissioner of 1921 remained free to carry out his inquiries in the usual manner.

Thirdly no attempt was made for a separate enumeration of the Untouchables by any of the Census Commissioners previous to the year 1911. The first general Census of India was taken in the year 1881. Beyond listing the different castes and creeds and adding up their numbers so as to arrive at the total figure of the population of India, the Census of 1881 did nothing. It made no attempt to classify the different Hindu castes either into higher and lower or Touchable and Untouchable. The second general Census of India was taken in the year 1891. It was at this census that an attempt to classify the population on the basis of caste and race and grade was made by the Census Commissioner for the first time.

The third general Census of India was taken in 1901. At this census a new principle of classification was adopted namely "Classification by Social precedence as recognised by native public opinion." For a society like the Hindu society which does not recognise equality and whose social system is a system of gradation of higher and lower, this principle was the most appropriate one. Nothing can present a more intelligible picture of the

social life and grouping of that large proportion of the people of India which is organised admittedly or tacitly on the basis of caste as this principle of social precedence.

II

The first attempt of a definite and deliberate kind to ascertain the population of the Untouchables was made by the Census Commissioner in 1911.

The period immediately preceding the Census of 1911 was a period during which the Morley-Minto Reforms were in incubation. It was a period when the Mahomedans of India had started their agitation for adequate representation in the legislatures by separate electorates. As a part of their propaganda, the Mahomedans waited upon Lord Morley, the then Secretary of State for India in Council, in deputation and presented him a Memorial on the 27th January 1909. In that memorial there occurs the following statement: (*The statement is not recorded in the MS.—Ed.*) Whether there was any connection between what the Muslim deputation had urged in their memorial regarding the Untouchables in 1907 and the idea of the Census Commissioner four years after to make a separate enumeration of the Untouchables, is a matter on which nothing definite can be said. It is possible that what the Census Commissioner proposed to do in 1911 was only a culmination of the

ways adopted by his predecessors in the matter of the demographic study of the population. Be that as it may, there was a great uproar on the part of the Hindus when the Census Commissioner announced his plan of separate enumeration of the Untouchables. It was said that this attempt of the Census Commissioner was the result of a conspiracy between the Musalmans and the British Government to divide and weaken the Hindu Community. It was alleged that what was behind this move was not a genuine desire to know the population of the Untouchables but the desire to break up the solidarity of the Hindu Community by separating the Untouchables from the Touchables. Many protest meetings were held all over the country by the Hindus and condemned in the strongest terms this plan of the Census Commissioner.

The Commissioner of Census however undaunted by this storm of protest decided to carry out his plan. The procedure adopted by him for a separate enumeration of the Untouchables was of course a novel one. The Census Superintendents for different Provinces were instructed by the Census Commissioner to make separate enumeration of castes and tribes

classed as Hindus but who did not conform to certain standards or who were subject to certain disabilities.

Under these tests the Census Superintendents made a separate enumeration of castes and tribes who (1) denied the supremacy of the Brahmins, (2) did not receive the Mantra from Brahmana or other recognized Hindu Guru, (3) denied the authority of the Vedas, (4) did not worship the great Hindu Gods, (5) were not served by good Brahmanas, (6) have no Brahman priests at all, (7) have no access to the interior of the ordinary Hindu temple, (8) cause pollution, (9) bury their dead and (10) eat beef and do not revere the cow.

The investigation conducted by the Census Commissioner left no room for guessing. For he found as a fact what the population of the Untouchables was. The table below gives the population of the Untouchables, province by province, as found by the Census Commissioner of 1911. mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_1

Province	Total Population in Millions	Population of Depressed Classes in Millions	Total seats	Seats for the depressed classes
Madras	39.8	6.3	120	2
Bombay	19.5	0.6	113	1
Bengal	45.0	9.9	127	1
United Provinces	47.0	10.1	120	1
Punjab	19.5	1.7	85	
Bihar and Orissa	32.4	9.3	100	1
Central Provinces	12.0	3.7	72	1
Assam	6.0	0.3	54	
Total	221.2	41.9	791	7

An outsider might not realise the significance and the bearing of these tests. They might ask what all this got to do with untouchability. But he will realise the significance and the bearing on the question of ascertaining the population of the Untouchables. As has been said there is no legal

definition of untouchability and there cannot be any. Untouchability does not express itself through the hair of the head or the colour of the skin. It is not a matter of blood. Untouchability expresses itself in modes of treatment and observance of certain practices. An Untouchable is a person who is treated in a certain way by the Hindus and who follows certain practices, which are different from the Hindus. There are definite ways in which the Hindus treat the Untouchables in social matters. They are definite practices, which are observed by the Untouchables. That being so the only method of ascertaining who are Untouchables is to adopt their ways and practices as the criteria and find out the communities which are subject to them. There is no other way. If the outsider bears this in mind, he will understand that even though the tests prescribed by the Census Commissioner do not show any colour of untouchability, they are in fact the hall marks of untouchability. That being so, there can be no manner of doubt that the procedure was proper and the tests were correct. Consequently it can be truly said, the results of this investigation were valuable and the figures obtained were accurate as far they can be in a matter of this sort.

III

The findings of the Census Commissioner of 1911 regarding the total population of the Untouchables were confirmed by the Census Commissioner of 1921.

The Census Commissioner of 1921 also made an investigation to ascertain the population of the Untouchables. In this Report Part I para 1931 the Census Commissioner observed:

“It has been usual in recent years to speak of certain section of the community as 'depressed classes'. So far as I am aware, the term has no final definition nor is it certain exactly whom it covers. In the Quinquennial Review on the Progress of Education from 1912/17 (Chapter XVIII paragraph 505) — the depressed classes are specifically dealt with from the point of view of Educational assistance and progress and in Appendix XIII to that Report a list of the castes and tribes constituting this section of the Community is given. The total population classed according to these lists as depressed amounted to 31 million persons or 19 per cent of the Hindu and Tribal population of British India. There is undoubtedly some danger in giving offence by making in a public report social distinction which may be deemed invidious; but in view of the lists already prepared and the fact that the “Depressed Classes” have, especially in South India, attained a class consciousness and a class organisation, are served by special

missions,"raised"by philanthropic societies and officially represented in the Legislative Assemblies, it certainly seems advisable to face the facts and to attempt to obtain some statistical estimate of their numbers. I therefore asked Provincial Superintendents to let me have an estimate based on census figures of the approximate strength of the castes who were usually included in the category of "depressed".

"I received lists of some sort from all provinces and states except the United Provinces, where extreme delicacy of official sentiment shrank from facing the task of attempting even a rough estimate. The figures given are not based on exactly uniform criteria, as a different view is taken of the position of the same groups in different parts of India, and I have had in some cases to modify the estimates on the basis of the figures in the educational report and of information from the 1911 reports and tables. They are also subject to the general defect, which has already been explained, that the total strength of any caste is not recorded. The marginal statement gives however a rough estimate of the *minimum* members which may be considered to form the "depressed classes" of the Hindu community. The total of these provincial figures adds up to about 53 millions. This, however, must be taken as a low and conservative estimate since it does not include (1) the full strength of the castes and tribes concerned and (2) the tribal aborigines more recently absorbed in Hinduism, many of whom are considered impure. We may confidently place the numbers of these depressed classes all of whom are considered impure, at something between 55 and 60 millions in India proper."

Then came the inquiry by the Simon Commission which was appointed by the British Parliament in 1929 to examine the working of the Reforms introduced by the Government of India Act of 1919 and to suggest further reforms.

At the time when the reforms which subsequently became embodied in the Act of 1919 were being discussed, the authors of the Montague-Cheirnsford Report clearly recognised the problem of the Untouchables and the authors pledged themselves to make the best arrangement for their representation in the Legislatures. But the Committee that was appointed under the chairmanship of Lord Southborough to devise the franchise and the electoral system ignored them altogether. The Government of India did not approve of this attitude and made the following comments:

"They (Untouchables) are one fifth of the total population and have not been represented at all in the Morley-Minto Councils. The Committee's report mentions them (Untouchables) twice, but only to explain that in the absence of satisfactory electorates they have been provided for by

nomination. It does not discuss the position of these people, or their capacity for looking after themselves. Nor does it explain the amount of nomination which it suggests for them..... The measure of representation which they propose..... suggested that one fifth of the entire population of British India should be allotted seven seats out of practically eight hundred. It is true that in all the Councils there will be roughly speaking a one-sixth proportion of officials who may be expected to bear in mind the interests of the (Untouchables); but that arrangement is not, in our opinion, what the Report on reforms aims at. The authors stated that the (Untouchables) also should learn lessons of self-protection. It is surely fanciful to hope that this result can be expected from including a single member of the community in an assembly where there are sixty or seventy caste Hindus. To make good the principles of the Report we must treat the outcastes more generously”.

The Government recommended that the seats allotted to the Untouchables by the Committee should be doubled. Accordingly in place of seven they were given fourteen seats. It will be seen that the generosity of the Government of India when put into practice did not amount to much. It certainly did not do to the Untouchables the justice that was their due.

Among the problems that were not properly settled in 1919, was the problem of the Untouchables, which was bound to loom large before the Simon Commission. Quite unexpectedly the problem received a special emphasis at the hands of the late Lord Birkenhead who was then the Secretary of State for India. In a speech which he made on mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_2' just before the appointment of the Simon Commission he said— (*Left blank in the MS.—Ed.*).

Naturally the problem became a special task of the Simon Commission. Although the problem as presented was one of providing representation—and in that sense a political problem at the bottom it was a problem, of ascertaining the population of the untouchables, Because unless the population was ascertained, the extent of representation in the legislature could not be settled.

The Simon Commission had therefore to make a searching inquiry into the population of the untouchables. It called upon the various provincial governments to furnish returns showing the numbers of untouchables residing in their area and it is well known that the provincial governments took special care in preparing these returns. There can therefore be no question regarding the accuracy of the figure of the total population of the

untouchables.

The *following* [tablemk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_3](mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_3) gives the figures for the population of the untouchables as found by the Southborough Committee and by the Simon Commission.

IV

It is thus clear that the population of the Untouchables has been estimated to be somewhere about 50 millions. That this is the population of the Untouchables had been found by the Census Commissioner of 1911 and confirmed by the Census Commissioner of 1921 and by the Simon Commission in 1929. This fact was never challenged by any Hindu during the twenty years it stood on the record. Indeed in so far as the Hindu view could be gauged from the reports of the different Committees appointed by the Provincial and Central Legislatures to co-operate with the Simon Commission, there can be no doubt that they accepted this figure without any demur.

Suddenly however in 1932, when the Lothian Committee came and began its investigation, the Hindus adopted a challenging mood and refused to accept this figure as the correct one. In some provinces the Hindus went to the length of denying that there were any Untouchables there at all. This episode reveals the mentality of the Hindus and as such deserves to be told in some details.

The Lothian Committee was appointed in consequence of the recommendations made by the Franchise Sub-Committee of the Indian Round Table Conference. The Committee toured the whole of India, visited all the Provinces except Central Provinces and Assam. To aid the Committee, there were constituted in each Province by the provincial Government, Provincial Committees comprising, so far as possible, spokesmen of the various schools of thought and of the various political interests existing in each Province. These Provincial Committees were in the main composed of members of the Provincial Councils with non-officials as Chairmen. With a view to concentrating discussion, the Indian Franchise Committee issued a questionnaire covering the field included in its terms of reference. The procedure laid down by the Franchise Committee was that Provincial Governments should formulate their own views on the points raised in the questionnaire and discuss them with the Committee and that the Provincial Committees who were regarded as the authoritative advisers should independently formulate their views and

should at their discretion conduct a preliminary examination of witnesses on the basis of their written statements. The Report of the Indian Franchise Committee was therefore a thorough piece of work based upon detailed investigation.

The letter of instruction sent by the Prime Minister to Lord Lothian as Chairman of the Indian Franchise Committee and which constituted the terms of reference of the Committee contained the following observation:

“It is evident from the discussions which have occurred in various connections in the (Indian Round Table) Conference that the new constitution must make adequate provision for the representation of the depressed classes and that the method of representation by nomination is no longer regarded as appropriate. As you are aware, there is a difference of opinion whether the system of separate electorates should be instituted for the depressed classes and your committee's investigation should contribute towards the decision of this question by indicating the extent to which the depressed classes would be likely, through such general extension of the Franchise as you may recommend, to secure the right to vote in ordinary electorates. On the other hand, should it be decided eventually to constitute separate electorates for the depressed classes, either generally or in those Provinces in which they form a distinct and separate element in the population, your Committee's inquiry into the general problem of extending the franchise should place you in possession of facts which would facilitate the devising of a method of separate representation for the depressed classes”. Accordingly in the questionnaire that was issued by the Indian Franchise Committee there was included the following Question:

“What communities would you include as belonging to Depressed Classes? Would you include classes other than Untouchables, and if so which”?

I was a member of the Indian Franchise Committee. When I became a member of the Committee, I was aware that the principal question on which I should have to give battle with the Caste Hindus was the question of joint versus separate electorates for the Untouchables. I knew, that in the Indian Franchise Committee, the odds would be heavily against them. I was to be the only representative of the Untouchables in the Committee as against half a dozen of the Caste Hindus. Against such an unequal fight I had prepared myself. Before accepting membership of the Indian Franchise Committee, I had stipulated that the decision of the question whether the Untouchables should have joint or separate electorates should not form part of the terms of reference to the Committee. This was accepted and the

question was excluded from the purview of the Indian Franchise Committee. I had therefore no fear of being out voted on this issue in the Committee—a strategy for which the Hindu Members of the Committee did not forgive me. But there arose another problem of which I had not the faintest idea. I mean the problem of numbers. The problem of numbers having been examined between 1911 to 1929 by four different authorities, who found that the population of Untouchables was somewhere about 50 millions, I did not feel that there would be any contest over this issue before the Indian Franchise Committee.

Strange as it may appear the issue of numbers was fought out most bitterly and acrimoniously before the Indian Franchise Committee. Committee after Committee and witness after witness came forward to deny the existence of the Untouchables. It was an astounding phenomenon with which I was confronted. It would be impossible to refer to the statement of individual witnesses who came forward to deny the existence of such a class as the Untouchables. It would be enough if I illustrate my point by referring to the views of the Provincial Franchise Committees and their members relating to the question of the population of the Untouchables.

PUNJAB

Opinion of the Punjab Government.

"The Punjab Government is of opinion that the enfranchisement of the tenant will give the vote to a considerable number of the Depressed Classes and to that extent will give them influence in the election of representatives to the Council." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_4

"As regards the Depressed Classes, the Punjab Government has no reason to depart from the view which it has already expressed in para 25 of the Memorandum containing the opinions of the official members of the Government on the recommendations of the Indian Statutory Commission, that these classes are not a pressing problem in the Punjab and will get some representation as tenants." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_5 *Opinion of the Punjab Provincial Franchise Committee.*

"K. B. Din Mahomed and Mr. Hansraj (who represented the Untouchables on the Committee) held that, while there are no depressed classes among the Musalmans, there exist depressed classes among the

Hindus and Sikhs..... Their total number being 1,310,709. Mr. Hansraj considers this list incomplete."

"They held that provision should be made for separate representation by treating the depressed classes as a separate community. Mr. Nazir Husain, Rai Bahadur Chaudhri Chhotu Ram, Mr. Own Roberts, K. B. Muhammad Hayat, Mr. Qureshi, Mr. Chatterji, Sardar Bhuta Singh and Pandit Nanak Chand held that it is impossible to say that there are depressed classes in the Punjab in the sense that any person by reason of his religion suffers any diminution of civic rights..... The Chairman, Pandit Nanak Chand and Sardar Bhuta Singh are of opinion that the depressed classes do not exist in the sense in which they exist in Southern India, and that, while there are in the villages certain classes who occupy a very definitely inferior economic and social position, it is not possible to differentiate the Hindu leather worker or Chamar who is claimed as a depressed class from the Musalman leather worker or Mochi who no one alleges belongs to a separate class." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_6

It will thus be seen that the Punjab Provincial Government avoided to answer the question. The Punjab Provincial Committee by a majority denied that there existed a class such as depressed or untouchable.

UNITED PROVINCES

Opinion of the Provincial Franchise Committee.

"The United Provinces Franchise Committee is of opinion that only those classes should be called "depressed" which are untouchable. Judged by this test, the problem of untouchability is non-existent in these provinces except in the case of Bhangis, Doms and Dhanuks, whose total population, including those sections which are touchable is only 582,000." mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_7

Babu Ram Sahai, a member of the United Provinces Provincial Franchise Committee representing the untouchable classes, in his minute of dissent gave the numbers mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_8 of the Untouchables in U. P. as 11,435,417. Rai Sahib Babu Ramcharan another member of the United Provinces Provincial Franchise Committee representing the Depressed Classes in his minute of dissent gave the numbers mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_9 of the Depressed Classes in U.P. as 20 millions.

The Government of the United Provinces reported mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_10 that the maximum estimate amounts to 17 million persons; the minimum something less than one million. In its opinion the least number was 6,773,814.

BENGAL

The Bengal Provincial Franchise Committee in its first Report mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_11 said.

“The Committee could come to no decision on this question and resolved to put it back for consideration along with the Central Committee.” In its final Report the same Committee said—

“According to the criterion laid down viz, untouchability and unapproachability, as these terms are understood in other parts of India, the Committee consider that, except Bhumalis only, there is no such class in Bengal.” mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_12

Mr. Mullick who was a representative of the Depressed Classes on the Bengal Provincial Franchise Committee in his minute of dissent gave a list of 86 castes as belonging to the Untouchable Classes.

BIHAR AND ORISSA

The population of the Depressed Classes in Bihar and Orissa according to the Census of 1911 was 9,300,000 mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_13 and according to the Census of 1921 was 8,000,000.

But the Bihar and Orissa Provincial Franchise Committee in its provincial memorandum⁷ observed—

“It is difficult to give an exhaustive list of the castes or sects who come under the definition of Depressed Classes. The only classes which can be called depressed are *Mushabars*, *Dusadhs*, *Chamars*, *Doms* and *Mehtars*. Their number is not sufficiently large to justify their being grouped in a separate electoral roll. The problem of Depressed Classes is not so acute in Bihar as in Bombay or South India. The Committee considers that there is no need for special representation of the Depressed Classes.”

The same Committee in its final report mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_14 said :

"The classes which are commonly regarded as Untouchables are Chamar, Busadh, Dom, Halalkhor, Hari, Mochi, Mushahar, Pan Pasi. . . . The majority of the Committee, however consider that there is no need for special representation as the Depressed Classes as their grievances are not so acute here as in Bombay or South India".

Why did the Hindus suddenly turn to reduce the population of the Untouchables from millions to fractions? The figure of 50 millions had stood on the record from 1911. It had not been questioned by any one. How is it that in 1932 the Hindus made so determined an effort without any regard to the means to challenge the accuracy of this figure?

The answer is simple. Up to 1932 the Untouchables had no political importance. Although they were outside the pale of Hindu Society which recognises only four classes namely Brahmins, Kshatriyas, Vaishyas and Shudras, yet for political purposes they were reckoned as part of the Hindu Society. So that for political purposes such as representation in the Legislature etc., the question of the population of the Untouchables was of no consequence. Up to 1932 the political question was one of division of seats in the Legislature between Hindus and Musalmans only and as there was no question of the seats that came to the lot of the Hindus being partitioned between the Touchables and the Untouchables and as the whole share went to the Touchables they did not care to inquire what the population of the Untouchables was. By 1932 the situation had completely altered. The question of partition was no longer a question between Hindus and Musalmans. The Untouchables had begun to claim that there should not only be a partition between the Hindus and Musalmans but that the share allotted to the Hindus should be further partitioned and the share of the Untouchables given to them to be enjoyed by them exclusively. This claim to separation was recognised and the Untouchables were allowed to be represented by members of their own class at the Indian Round Table Conference. Not only was the separate existence of the Untouchables thus recognised but the Minorities Subcommittee of the Indian Round Table Conference had accepted the principle that under the new Constitution the depressed classes should be given representation in all Legislatures in proportion to their population. It is thus that the population of the Untouchables became a subject of importance. The less the population of the Untouchables the greater the share of the political representation that would go to the Touchable Hindus. This will explain why the Touchables

who before 1932 did not care to quarrel over the question of the population of the Untouchables, after 1932 began denying the very existence of such a class as Untouchables.

The ostensible grounds urged by the Hindus before the Lothian Committee for reducing the population of the Untouchables were two. One was that the figures given by the Census Commissioner were for Depressed Classes and not for Untouchables and that Depressed Classes included other classes besides Untouchables. The second ground urged by them was that, the definition of the word should be uniform throughout all India and should be applied in all Provinces in determining the population of the Untouchables. In other words they objected to a local test of untouchability.

The first contention was absolutely untrue. The term Depressed Classes was used as a synonym for Untouchables and the term Depressed Classes was used instead of the term Untouchables because the latter it was felt, would give offence to the people meant to be included under the term. That, it was used to denote only the Untouchables and it did not include the Aborigines or the Criminal Tribes was made clear in the debate that took place in the Imperial Legislative Council in 1916 on the Resolution moved by the Honourable Mr. Dadabhoi. The second contention of the caste Hindus was that the test of untouchability should be uniform. The object of putting forth this contention was to reduce the number of Untouchables. It is well known that there are variations in the forms which untouchability assumes in different parts of India. In some parts of India, Untouchables are un-seeables i.e. they cause pollution if they come within the sight of a Touchable Hindu. In some parts Untouchables are unapproachables i.e. they cause pollution if they come within a certain distance of a Touchable Hindu. Of these unapproachables there are two classes. There is a class of unapproachables who cannot come within a certain fixed distance of a Touchable Hindu. There is another class of unapproachables who cannot come so near a Hindu as to let his shadow fall upon him. In some parts of India an Untouchable is not an unseeable or unapproachable. It is only his physical contact which causes pollution. In some parts an Untouchable is one who is not allowed to touch water or food. In some parts an Untouchable is one who is not allowed to enter a temple. With these variations it is clear, that if unseeability was taken as the only test of untouchability, then the unapproachables would have to be excluded from the category of Untouchables. If unapproachability was taken as a test, then those whose touch only caused pollution will have to be excluded from the category of Untouchables. If causing pollution by

touch be taken as a test, then those whose disability is that they are not allowed to touch water or food or those whose only disability is that they are not allowed to enter the temple, shall have to be excluded. This is what the Hindus wanted to do. By insisting upon uniform test they wanted to eliminate certain classes from the category of Untouchables and thereby reduce the population of the Untouchables. Obviously their point of view was fallacious. Untouchability is an outward expression of the inner repulsion which a Hindu feels towards a certain person. The form which this repulsion takes is comparatively a matter of small moment. The form merely indicates the degree of repulsion. Wherever there is repulsion there is untouchability. This simple truth the Hindus knew.

But they kept on insisting upon uniformity of test because they wanted somehow to reduce the population of the Untouchables and to appropriate *to* themselves a larger share of political representation.

VI

This struggle between the Hindus and the Untouchables constituted undoubtedly the main episode. But within this episode there was another which though of a smaller character, was yet full of significance. It was the struggle between the Backward Classes and the Untouchables. The representatives of the Backward Classes contended that the category known as Depressed Classes should not only include Untouchables in the strict sense of that term but should also include those classes which are economically and educationally backward.

The object of those that wanted, that not only the Untouchables but also those who are educationally and economically backward shall also be given separate representation, was a laudable one. In putting forth this contention they were not asking for anything that was new. Under the reformed constitution that came into operation in 1920, the right of the economically and educationally backward communities was recognised in the two provinces of India namely Bombay and Madras. In Bombay the Marathas and allied castes and in Madras the Non-Brahmins were given separate representation on the only ground that they were economically and educationally backward.

It was feared that if special representation was not given to those communities, they would be politically suppressed by the minority of high caste Hindus such as Brahmins and allied castes. There are many communities in other Provinces who are in the same position and who need special political representation to prevent their being suppressed by

the higher castes. It was therefore perfectly proper for the representatives of the Backward Classes from the Hindus to have claimed special representation for themselves. mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_15 If their point of view had been accepted the total number of Depressed Classes would have swelled to enormous proportions.

But they received no support either from the Untouchables or from the high caste Hindus. The Hindus were opposed to the move which was calculated to increase the population of the Depressed Classes. The Untouchables did not want to be included in their category any class of people who were not really Untouchables. The proper course for these backward communities was to have asked to make a division of Touchable Hindus into advanced and backward and to claim separate representation for the Backward.

In that effort the Untouchables would have supported them. But they did not agree to this and persisted in being included among the Depressed Classes largely because they thought that this was easier way of securing their object. But as the Untouchables opposed the backward communities turned and joined the Hindus in denying the existence of Untouchables, more vehemently than the Hindus.

In this struggle between the Touchables and Untouchables the latter did not get any support from the Mahomedans. It will be noticed that in the Punjab Provincial Franchise Committee, only one Mahomedan supported the representative of the Untouchables in his assertion that there are in the Punjab communities, which are treated as Untouchables. The rest of the Mahomedan members of the Committee did not join. In Bengal the Hindu and the Mahomedan members of the Bengal Provincial Franchise Committee agreed not to express any view on the matter.

It is rather strange that the Mahomedans should have kept mum. It was in their interest that the Untouchables should be recognized as a separate political community. This separation between the Touchables and the Untouchables was to their benefit. Why did they not help the Untouchables in this struggle for numbers? There were two reasons why the Mahomedans took this attitude. In the first place the Mahomedans were asking for more than their population ratio of representation. They were asking for what in Indian political parlance is known as weightage.

They knew that their weightage must involve a loss to the Hindus and the only question was which section of the Hindus should bear the loss. The Touchable Hindus would not mind the weightage if it could be granted

without reducing their share. How to do this was the problem and the only way out of it was to reduce the share of the Untouchables. To reduce the share meant to reduce the population. This is one reason why the Mahomedans did not help the Untouchables in this struggle for numbers. The second reason why the Mahomedans did not help the Untouchables was the fear of exposure by the Hindus. Although Islam is the one religion which can transcend race and colour and unite diverse people into a compact brotherhood, yet Islam in India has not succeeded in uprooting caste from among the Indian Musalmans. Caste feeling among the Musalmans is not so verulent as it is among the Hindus. But the fact is that, it exists. That this caste feeling among the Musalmans leads to social gradation, a feature of the Muslim Community in India, has been noticed by all those who have had an occasion to study the subject. The Census Commissioner for Bengal in his report says: (*The quotation is not recorded in the MS.—Ed.*)

These facts are quite well known to the Hindus and they were quite prepared to cite them against the Muslims if the Muslims went too far in helping the Untouchables in this struggle for numbers and thereby bringing about a diminution of the seats for Caste Hindus in the Legislature. The Mahomedans knew their own weak points. They did not wish to give an excuse to the Hindus to rake up the social divisions among the Musalmans and thought that their interest would be best served by their taking a non-partisan attitude.

The Untouchables were thus left to themselves to fight for their numbers. But even they could not be depended upon to muster for the cause. When the Hindus found that they could not succeed in reducing the number of the Untouchables, they tried to mislead the Untouchables. They began telling the Untouchables that Government was making a list of the Untouchable communities and it was wrong to have a community's name entered in such list because it would perpetuate untouchability. Acting on this advice, many communities who were actually an Untouchable community would send a petition stating that it was not classed as Untouchable and should not be listed. Much effort had to be made to induce such communities to withdraw such petitions by informing them that the real purpose was to estimate their numbers in order to fix their seats in the Legislature.

Fortunately for all, this struggle is now over and the controversy is closed and the population of the Untouchables can never be open to dispute. The Untouchables are now statutorily defined. Who are Untouchables is laid down by a schedule to the Government of India Act 1935, which describes

them as Scheduled Castes. But the struggle reveals a trait of Hindu character. If the Untouchables make no noise, the Hindu feels no shame for their condition and is quite indifferent as to their numbers. Whether they are thousands or millions of them, he does not care to bother. But if the Untouchables rise and ask for recognition, he is prepared *to* deny their existence, repudiate his responsibility and refuse to share his power without feeling any compunction or remorse.

CHAPTER 2

THE REVOLT OF THE UNTOUCHABLES

The movement of the Untouchables against the injustice of the Hindu Social Order has a long history behind it, especially in Maharashtra. This history falls into two stages. The first stage was marked by petitions and protests. The second stage is marked by open revolt in the form of direct action against the Hindu Established Order. This change of attitude was due to two circumstances. In the first place it was due to the realisation that the petitions and protests had failed to move the Hindus. In the second place Governments had declared that all public utilities and public institutions are open to all citizens including the Untouchables. The right to wear any kind of clothes or ornaments are some of the rights which the British Indian Law gives to the Untouchables along with the rest. To these were added the rights to the use of public utilities and institutions, such as wells, schools, buses, trams. Railways, Public offices, etc., were now put beyond the pale of doubt. But owing to the opposition of the Hindus the Untouchables cannot make any use of them. It is to meet the situation, the Untouchables decided to change the methods and to direct action to redress their wrongs. This change took place about 1920.

I

Of such attempts at direct action only few can be mentioned so as to give an idea of the revolt of the Untouchables against the Hindu Social Order. Of the attempts made to vindicate the right to use the public roads, it is enough to mention one, most noteworthy attempt in this behalf was that made by the Untouchables of Travencore State in 1924 to obtain the use of the roads which skirted the temple *at* Vaikorn. These roads were public roads maintained by the State for the use of everybody, but on account of their proximity to the temple building, the Untouchables were not allowed to use certain sections, which skirted the temple too closely. Ultimately as a result of Satyagraha, the temple compound was enlarged and the road was

realigned so that there the Untouchables even if they used it were no longer within the polluting distance of the temple.

I

Of the attempts made to vindicate the right to take water from the public watering places, it is enough to mention the case of the Chawdar Tank.

This Chawdar Tank is situated in the town of Mahad in the Kolaba District of Bombay Presidency. The tank is a vast expanse of water mainly fed by the rains and a few natural springs. The sides of the tank are embanked. Around the tank there are small strips of land on all sides belonging to private individuals. Beyond this strip of land lies the Municipal road which surrounds the tank and beyond the road are houses owned by the Touchables. The tank lies in the heart of the Hindu quarters and is surrounded by Hindu residence.

This tank is an old one and no one knows who built it or when it was built. But in 1869 when a Municipality was established by the Government for the town of Mahad, it was handed over to the Municipality by the Government and has since then been treated as a Municipal i.e., public tank.

Mahad is a business centre. It is also the headquarters of a taluk. The Untouchables either for purposes of doing their shopping and also for the purpose of their duty as village servants had to come to Mahad to deliver to the taluka officer either the correspondence sent by village officials or to pay Government revenue collected by village officials. The Chawdar tank was the only public tank from which an outsider could get water. But the Untouchables were not allowed to take water from this tank. The only source of water for the Untouchables was the well in the Untouchables quarters in the town of Mahad. This well was at some distance from the centre of the town. It was quite choked on account of its neglect by the Municipality.

The Untouchables therefore were suffering a great hardship in the matter of water. This continued till matters got going. In 1923 the Legislative Council of Bombay passed a resolution to the effect that the Untouchable classes be allowed to use all public watering places, wells, Dharmashalas which are built and maintained out of public funds, or are administered by bodies appointed by Government or created by Statutes as well as public schools, courts, offices and dispensaries. Government accepted the resolution and issued the following orders:

"In pursuance of the foregoing Council Resolution the Government of Bombay are pleased to direct that all heads of offices should give effect to

the resolution so far as it related to the public places, institutions belonging to and maintained by Government. The Collectors should be requested to advise the local bodies in their jurisdiction to consider the desirability of accepting the recommendations made in the Resolution.”In accordance with this order of the Government, the Collector of Kolaba forwarded a copy thereof to the Mahad Municipality for consideration. The Mahad Municipality passed a resolution on 5th January 1924 to the effect that the Municipality had no objection to allow the Untouchables to use the tank. Soon after this resolution was passed there was held at Mahad, a Conference of Untouchables of the Kolaba District over which I presided. The Conference met for two days, the 18th and 20th March 1927. This was the first Conference of the Untouchables held in the Kolaba District. Over 2,500 Untouchables attended the Conference and there was great enthusiasm. On the first day of the Conference, I delivered my presidential address, in which I exhorted them to fight for their rights, give up their dirty and vicious habits and rise to full manhood. Thereafter high caste Hindus who were present and, who held out that they were the friends of the Untouchables, addressed the gathering and told the Untouchables to be bold and exercise the right that is given to them by law. With this, the proceedings of the first day were closed. The subject committee met at night to consider the resolution to be moved in open conference the next day. In the Subject Committee, attention was drawn by some people to the fact that there was great difficulty at Mahad for the Untouchables in the matter of obtaining water for drinking purposes, and that this difficulty was felt particularly by the members of the Reception Committee of the Conference which had to spend Rs. 15 an enormous amount to employ caste Hindus to dole out water in sufficient quantity to satisfy the needs of those who had attended the Conference.

Next day on the 20th, the Conference met about 9 in the morning. The resolutions agreed upon in the Subject Committee were moved and passed by the Conference. It took about three hours in all. In the end one of my co-workers in moving a vote of thanks to the President and others who had helped to make the Conference a success referred to the question of the difficulty in the matter of getting water and exhorted the Untouchables present to go to the tank and exercise their right to take water from Chawdar tank, especially as the Municipality had by resolution declared it open to the Untouchables and that their Hindu friends were ready to help them. The Hindus who had exhorted them to be bold and begin fearlessly to exercise their rights, instantly realised that this was a bombshell and immediately ran away. But the effect upon the Untouchables was very

different. They were electrified by this call to arms. To a man they rose and the body of 2,500 Untouchables led by me and my co-workers marched in a procession through the main streets. The news spread like wild fire while crowds thronged the streets to witness it.

The Hindu inhabitants of the town saw the scene. They were taken by storm. They stood aghast witnessing this scene which they had never seen before. For the moment they seemed to be stunned and paralysed. The procession in form of fairs marched past and went to the Chawdar tank, and the Untouchables for the first time drank the water. Soon the Hindus, realising what had happened, went into frenzy and committed all sorts of atrocities upon the Untouchables who had dared to pollute the water. These atrocities will be narrated in their proper places.

The assault committed by the Hindus on the Untouchables at Mahad when they entered the Chawdar tank was undoubtedly a challenge to the Untouchables. The Untouchables on the other hand were determined not to be satisfied with merely exercising their right but to see it established. They naturally felt that they must take up the challenge thrown at them by the Hindus. Accordingly a second Conference of the Untouchables was called. The Untouchables were told that they must come fully prepared for all eventualities for Satyagraha (i.e., for civil disobedience and even for going to gaol).

The Hindus, when they came to know of this, applied to the District Magistrate of Kolaba for issuing an order under Section 144 of the Criminal Procedure Code against the Untouchables, prohibiting them from entering the Chawdar Tank and polluting its water. The District Magistrate refused and said that the tank was a public tank open to all citizens and he could not by law prevent the Untouchables from taking water therefrom. He advised them to go to a Court of law and get their right of exclusive user established. The dates fixed for the Conference were 25th, 26th, 27th of December 1927. As these dates drew near, and as they heard that the Untouchables were quite in earnest, and knowing that the District Magistrate had refused to come to their rescue, they did the only thing that was open to them, namely, to get their right to exclude the Untouchables from a public tank established by law. Accordingly, nine Hindus drawn from different castes joined as Plaintiffs in filing on 12th December 1927 a suit No. 405 of 1927 as representatives of the Hindus, in the Court of Sub-Judge of Mahad. I and four others were made defendants as representing the Untouchables. The suit was for obtaining a declaration 'that the said Chawdar tank is of the nature of private property of the Touchable classes only and that the Untouchable classes have no right to go to that tank nor

take water therefrom and also for obtaining a perpetual injunction restraining the defendants from doing any of those acts.' On the same day on which the suit was filed, the plaintiffs applied to the Court for a temporary injunction against the defendants restraining them from going to the tank and taking water therefrom pending the decision of the suit. The judge holding that it was a fit case, granted a temporary injunction against me and the other defendants on the 14th December 1927.

The temporary injunction issued by the Judge was sent to Bombay and was served upon me two or three days before the Conferences actually met. There was no time to have consultation and no time to postpone the Conference either. I decided to leave the matter to the Conference to decide.

The Conference was called with the specific object of establishing the right to take water from the tank, which was challenged by the Hindus last time. The District Magistrate had left the way open. But here was a Judge who had issued an order banning such action. Naturally, when the Conference met, the first question it was called on to consider was whether to disobey the order of injunction issued by the Court and enter the tank. The District Magistrate who had been favourable to the Untouchables now took a different view. He explained his view very clearly to the Conference, which he came and addressed personally. He said that if the Civil Court had not issued an injunction, he would have helped the Untouchables in their attempt to enter the tank as against the caste Hindus, but that as the Sub-Judge had issued his order, his position had become different. He could not allow the Untouchables to go to the tank because such an act would amount indirectly to help them to break the order of His Majesty's Court with impunity. He therefore felt bound to issue an order prohibiting the Untouchables, should they insist on going to the tank notwithstanding the injunction not because he wanted to favour the Hindus but because he was bound to maintain the dignity of the Civil Court by seeing to it that its order was respected.

The Conference took what the Collector had said into its consideration and also the reaction of the Hindus to the attempt of the Untouchables going to the tank in defiance of the order of the Court, which they had obtained. In the end, the Conference came to the conclusion that it was better and safer for them to follow law and see how far it helped them to secure their rights. It was therefore decided to suspend civil disobedience of the order of the Judge till the final decision of the suit.

The occasion for civil disobedience never came because the Untouchables won the suit and the Hindus lost it. One of the principal reasons which led

the Untouchables to follow law and suspend civil disobedience was that they wanted to have a judicial pronouncement on the issue whether the custom of untouchability can be recognised by the Court of law as valid. The rule of law is that a custom to be valid must be immemorial, must be certain and must not be opposed to morality or public policy. The Untouchables' view is that it is a custom which is opposed to morality and public policy. But it is no use unless it is declared to be so by a judicial tribunal. Such a decision declaring the invalidity of the custom of untouchability would be of great value to the Untouchables in their fight for civil rights because it would seem illegal to import untouchability in civic matters. The victory of the Untouchables in the Chawdar tank dispute was very great. But it was disappointing in one way that the Bombay High Court did not decide the issue whether the custom of untouchability was valid or not. They decided the case against the Hindus on the ground that they failed to prove that the custom alleged by them in respect of the tank was not immemorial. They held that the custom itself was not proved. The tank became open to the Untouchables. But the Untouchables cannot be said to have gained their point. The main issue was whether the custom of untouchability was a legal custom. Unfortunately the High Court avoided to give judgement on that issue. The Untouchables had to continue their struggle.

IV

The next item in this history of direct action which is worthy of mention relates to the entry in the famous Hindu Temple at Nasik known as the Kala Ram Temple. These are instances of direct action aimed to achieve specific objects. The movement includes two cases of direct action aimed at the demolition of the Hindu Social Order by applying dynamite to its very foundations. One is the burning of the Manu Smriti and the second is the mass refusal by the Untouchables to lift the dead cattles belonging to the Hindus and to skin them.

The Burning of Manu Smriti took place at Mahad on the 20th of December 1927. The function was a part of the campaign for establishing the right to take water from the Chawdar tank. The Burning of the Manu Smriti took place publicly and openly in a Conference of Untouchables. Before burning the Manu Smriti, the Conference passed certain resolutions. As these resolutions form a land mark in the history of the movement of the Untouchables they are given below:

"Resolution 1.—*Declaration of the rights of a Hindu.* This conference is firmly of opinion that the present deplorable condition of the Hindu Community

is only an illustration of how a community becomes fallen by reason of its tolerating social injustice, following erroneous religious beliefs and supporting economic wrongs. The fall of the Hindu community is due entirely to the fact that the masses have not cared to know what are the birth-rights of a human being and much less have they cared to see that they are recognised and not set at naught the base acts and deeds of selfish people. To know what are these birth-rights of man and to endeavour to see that they are not trampled upon in the struggle between man and man and class and class, are the sacred duties of every person. In order that every Hindu may not know what are in the opinion of the Conference the inalienable birthrights of man, this Conference resolves to issue the following proclamation containing a list thereof—

(i) All Hindus have the same social status from birth. This equality of social status is an attribute, which they retain till death. There may be distinctions and differences between them in point of their functions in society. But that must not cause differences in their social status. This Conference is therefore opposed to any action—whether in the political, economic or social field of life— which would result in producing a difference in social status.

(ii) The ultimate aim of all political, economic or social changes should be to maintain intact the equal status of all Hindus. That being the view of the Conference, the Conference strongly disapproves of all literature of the Hindus, whether ancient or modern, which supports in any way the pernicious doctrine of inequality underlying the Hindu social system.

(iii) All power is derived from the people. The privileges claimed by any class or individual have no validity if they are not granted by the people. This Conference therefore repudiates the social and religious privileges enjoyed by some classes of Hindus in as much as they are founded upon the Vedas, Smritis and Puranas and not upon the free consent of the people.

(iv) Every person is entitled as his birthright to liberty of action and speech. This liberty could be limited only for the purpose of saving the right of another person to his liberty and for no other purposes. Further this limitation can be imposed only with the sanction of the people and not by any injunction of the Hindu Shastras. This Conference therefore repudiates all restraints on religious, social and economic freedom imposed upon the thought and action of the Hindus in as much as they are imposed by the Shastras and not by the people.

(v) Hindus can be deprived of their rights other than their birthrights only by law. What is not prohibited by law, a Hindu must be free to do and

what is not obligatory by law, a Hindu must not be forced to do. For this reason there must be no obstruction to persons using public roads, public wells and tanks, public temples and all other public utilities. Persons, causing obstruction in matters where law has laid down no prohibition, are in the opinion of this Conference enemies of the public.

(vi) Law is not a command of an individual or a body of individuals. Law is the peoples prescription for change. That being so, law to be respected, must be made with the consent of all and must have equal application to all without any distinction. Social divisions if they are necessary for the ends of society can only be made on the basis of worth and not of birth. This Conference repudiates the Hindu caste-system firstly as being detrimental to society, secondly as being based on birth and thirdly as being without any sanction from the people.”The Second Resolution passed by the Conference was worked as follows:

“*Resolution No. 2.*—Taking into consideration the fact that the laws which are proclaimed in the name of Manu, the Hindu lawgiver, and which are contained in the Manu Smriti and which are recognised as the Code for the Hindus are insulting to persons of low caste, are calculated to deprive them of the rights of a human being and crush their personality. Comparing them in the light of the rights of men recognised all over the civilised world, this conference is of opinion that this Manu Smriti is not entitled to any respect and is undeserving of being called a sacred book to show its deep and profound contempt for it, the Conference resolves to burn a copy thereof, at the end of the proceedings, as a protest against the system of social inequality it embodies in the guise of religion.”A cursory reading of these resolutions will show the line which the Conference adopted. Although the Conference met to redress a particular wrong, it showed that it was not going to be satisfied with the redress of petty wrongs. The Conference felt that the time had arrived for laying down the goal of the Untouchables. The goal laid down by it was far-reaching. The Conference proclaimed that the Untouchables wanted a complete overhauling of the Hindu social system. It proclaimed that this reconstruction must not be on the old foundation of Shastras. It proclaimed that whatever character of the new foundations, they must be consonant with justice and equity between Hindu and Hindu and to leave no doubt that in the matter of this reconstruction, they would not consent to the Hindu shastras being drawn upon. The Conference not only repudiated them but actually went to the length of burning them to ashes.

It was an echo of Voltare's denunciation of the Catholic Church of his time. For the first time a cry was raised against the Hindu Social

Order" *Ecrasez la Infame*". It is also clear that these resolutions were absolutely revolutionary in character.

The rock on which the Hindu Social Order has been built is the Manu Smriti. It is a part of the Hindu Scriptures and is therefore sacred to all Hindus. Being sacred it is infallible. Every Hindu believes in its sanctity and obeys its injunctions. Manu not only upholds caste and untouchability but gives them a legal sanction. The burning of the Manu Smriti was a deed of great daring. It was an attack on the very citadel of Hinduism. The Manu Smriti embodied the spirit of inequality which is at the base of Hindu life and thought just as the Bastille was the embodiment of the spirit of the Ancient regime in France. The burning of the Manu Smriti by the Untouchables at Mahad in 1927 is an event which has the same significance and importance in the history of the emancipation of the Untouchables which the Fall of Bastille had in the liberation of the masses in France and Europe.

The second instance of direct action against the frame of the Hindu Social Order itself is the refusal to skin the dead animals belonging to the Hindus and carrying them.

One often hears the Untouchables being condemned for having brought upon themselves the curse of untouchability. The main ground on which this accusation rests is the adoption by the Untouchables as their occupation, the carrying of the dead animals of the Hindus and skinning them and eating the carrion.

Even so great a friend of the downtrodden as the Abe Dubois writing about the *Pariahs* of the Madras Presidency said:

"What chiefly disgusts other natives is the revolting nature of the food which the Pariahs eat. Attracted by the smell, they will collect in crowds round any carrion and contend for the spoil with the dogs, jackals, crows and other carnivorous animals. They then divide the semi-putrid flesh and carry it away to their huts, where they devour it, often without rice or anything else to disguise the flavour. That the animal should have died of disease is of no consequence to them, and they sometimes secretly poison cows or buffaloes so that they may subsequently feast on the foul, putrefying remains. The carcasses of animal's that die in a village belong by right to the *thoti* or scavenger, who sells the flesh at a very low price to the other Pariahs in the neighbourhood. When it is impossible to consume in one day the stock of meat thus obtained, they dry the remainder in the sun, and keep it in their huts until they run short of their food. There are few Pariah houses where one does not see festoons of these horrible fragments hanging up; and though the Pariahs themselves do not seem to be affected

by the smell, travellers passing near their village quickly perceive it and can tell at once the caste of the people living there....

Is it to be wondered at, after what has been just stated that other castes should hold this in abhorrence? Can they be blamed for refusing to hold any communication with such savages, or for obliging them to keep themselves aloof and to live in the separate hamlets?...."

It is true that this occupation has created a feeling of repugnance against the Untouchables in the mind of the Hindus. But the Abe or those who adopt his reasoning forget to raise two very important questions. First is why do the Untouchables eat carrion? Will the Hindus allow the Untouchables the freedom to give up skinning and carrying their dead animals? The answer to the question why the Untouchables eat carrion has already been given in previous chapters.

No one would prefer carrion to flesh meat if it is available. If the Untouchables have been living on carrion it is not because they like it. They eat carrion, because there is nothing else on which they can live. This will be clear to anyone who realises that on account of untouchability they have no way left to earn a living. All professions have been closed to them. There is no land on the produce of which they can live. There is no trade, which they can engage in. Their main stay is therefore the food they collect from the villagers and the carrion, which is left to them. Without carrion they would literally die of starvation. It is therefore clear that the fault does not lie with the Untouchables. If the Untouchables eat carrion it is because the Hindus have left no honourable way of earning a living open to them.

To the second question the answer is equally clear. If the Untouchables skin and carry the dead animals of the Hindus, it is because the Untouchables have no choice. They are forced to do it. They would be penalised if they refused to do it. The penalty is legal. In some provinces the refusal to do this dirty work is a breach of contract. In other provinces it is a criminal offence involving fines. In

Provinces like Bombay the Untouchables are village servants. In their capacity as village servants they have to serve the Government as well as the Hindu public. In return for this service they are given lands which they cultivate and on the produce of which they maintain themselves. One of the duties of the Untouchables is to skin and carry the dead animals of the Hindus in the villages. If the Untouchables refuse to perform these duties to the Hindu public, the land which they live on is liable to be confiscated. They have to choose between doing the dirty work or facing starvation.

In Provinces like the United Provinces, refusal to do scavenging by sweeper is made an offence. The United Provinces Municipalities Act II of 1916 contains the following provisions:

Section 201(1).—"Should a sweeper who has a customary right to do the house-scavenging of a house of building (hereinafter called the customary sweeper) fail to perform such scavenging in a proper way, the occupier of the house or building or the board may complain to a Magistrate."

(2)"The Magistrate receiving such complaint shall hold an inquiry and should it appear to him that the customary sweeper has failed to perform the house-scavenging of the house or building in a proper way or at a reasonable intervals, he may impose upon such a sweeper a fine which may extend to ten rupees, and upon a second or any later conviction in regard to the same house or building, may also direct, the right of the customary sweeper to do the house scavenging the house or building to be forfeited and thereupon such right shall be forfeited."

Exactly similar provision is to be found in Section 165 of the Punjab Municipalities Act of 1911. The Punjab Act is an advance over the U. P. Act, in as much as it provides for punishment of a sweeper who is not customary sweeper but a contract-sweeper. The Punjab Act adds:

"(3) Should any sweeper (other than a customary sweeper), who is under a contract to do house-scavenging of a house or a building, discontinue to do such house-scavenging without fourteen days' notice to his employer or without reasonable cause, he shall on conviction be punishable with a fine which may extend to Rs. ten."

"227. Every order of forfeiture under Section 165 shall be subject to an appeal to the next superior court, but shall not be otherwise open to appeal."

People may be shocked to read that there exists legal provision which sanctions forced labour. Beyond doubt, this is slavery. The difference between slavery and free labour lies in this. Under slavery a breach of contract of service is an offence which is punishable with fine or imprisonment. Under free labour a breach of contract of service is only a civil wrong for which the labourer is liable only for damages. Judged in the light of this criterion, scavenging is a legal obligation imposed upon the Untouchables which they cannot escape.

Given these conditions, how can the Untouchables be accused of doing these dirty work voluntarily?

The question whether the Untouchables can be accused of having invited the curse of untouchability upon themselves for doing the dirty work of the Hindus is really beside the point. What is important to note is that the

Conference of the Untouchables which met in Mahad resolved that no Untouchable shall skin the dead animals of the Hindus, shall carry it or eat the carrion. The object of these resolutions was two-fold. The one object was to foster among the Untouchables self-respect and self-esteem. This was a minor object. The major object was to strike a blow at the Hindu Social Order. The Hindu Social Order is based upon a division of labour which reserves for the Hindus clean and respectable jobs and assigns to the Untouchables dirty and mean jobs and thereby clothes the Hindus with dignity and heaps ignominy upon the Untouchables. The resolution was a revolt against this part of the Hindu Social Order. It aimed at making the Hindus do their dirty jobs themselves.

This is a brief summery of the history of the revolt of the Untouchables against the established order of the Hindu. It originated in Bombay. But it has spread to all parts of India.

CHAPTER 3

HELD AT BAY

- I. Hindu reaction to the revolt of the untouchables.
- II. Lawless means for ruthless repression.
- III. Untouchables, a weak force.
- IV. Officers who are shameless partisans.
- V. A weapon which is made blunt.

I

The story of the revolt of the Untouchables tells how the old is ringing out and the new is ringing in. What is the reaction of the Hindus to this revolt? No one who knows anything about it can have any hesitation in answering this question. For it is clear that his attitude is one of opposition. It might be difficult to understand why the Hindus should oppose. But there can be no manner of doubt that he is opposed.

The reasons why the Hindus are opposed to this fight for rights of the untouchables for their rights will not be difficult to understand if certain important features of the relationship that is now subsisting between the Caste Hindus and the Untouchables are borne in mind.

The first and foremost consideration that must never be forgotten is the sharp division between the Touchables and the Untouchables. Every village has two parts, the quarters of the Touchables and quarters of the Untouchables. Geographically the two are separate. There is always an appreciable distance between the two. At any rate there is no contiguity or

proximity between them. The Untouchables have a distinct name for their quarters such as Maharwada, Mangwada, Chamrotti, Khaykana, etc. *De Jure* for the purposes of revenue administration or postal communication the quarters of the Untouchables are included in the village. But *de facto* it is separate from the village. When the Hindu resident of a village speaks of the village he means to include in it only the Caste Hindu residents and the locality occupied by them. Similarly when the Untouchable speaks of the village he means to exclude from it the Untouchables and the quarters they occupy. Thus, in every village the Touchables and Untouchables form two separate groups. There is nothing common between them. They do not constitute a folk. This is the first thing, which must be noted.

The second things to note with regard to this division of the village into two groups is that these groups are real corporations which, no one included within them, can escape. As has been well said the American or European belongs to groups of various kinds, but he "joins" most of them. He of course is born into a family, but he does not stay in it all his life unless he pleases. He may choose his own occupation, residence, wife, political party, and is responsible, generally speaking, for no one's acts but his own. He is an "individual" in a much fuller sense because all his relationships are settled by himself for himself. The Touchables or Untouchables are in no sense individuals because all or nearly all of their relationships are fixed when they are born in a certain group. Their occupation, their dwelling, their gods and their politics are all determined for them by the group to which they belong. When the Touchables and Untouchables meet, they meet not as man to man, individual to individual, but as members of groups or as nationals of two different states.

This fact has an important effect upon the mutual relationship between the Touchables and Untouchables in a village. The relationship resembles the relationship between different clans in primitive society. In primitive society the member of the clan has a claim, but the stranger has no standing. He may be treated kindly, as a guest, but he cannot demand "justice" at the hands of any clan but his own. The dealing of clan with clan is a matter of war or negotiations, not of law; and the clanless man is an outlaw, in fact as well as in name, and lawlessness against the stranger is therefore lawful. The Untouchable, not being a member of the group of Touchables, is a stranger. He is not a kindred. He is an outlaw. He cannot claim justice nor any rights which the Touchable is bound to respect.

The third thing to note is that the relationship between the two, the Touchables and the Untouchables, has been fixed. It has become a matter

of status. This status has unmistakably given the Untouchables a position of inferiority *vis-a-vis* the Touchables. This inferiority is embodied in a code of social conduct to which the Untouchables must conform. What kind of code it is, has already been stated. The Untouchable is not willing to conform to that code. He is not prepared to render unto Caesar what is claimed by Caesar. The Untouchable wants to have his relationship with the Touchables by contract. The Touchable wants the Untouchables to live in accordance with the rules of status and not rise above it. Thus, the two halves of the village, the Touchables and the Untouchables, are now struggling for resettling what the Touchable thinks is settled forever. The conflict is centred round one question—What is to be the basis of this relationship? Shall it be contract or shall it be status?

That is the question, which is agitating the Hindus. The Hindu does not look at the revolt of the Untouchables as an attempt on the part of the latter for social and economic improvement of their people. He looks at it as an attempt directed against him, an attempt to equalise. That is why he is opposed.

II

The opposition of the Hindus is a determined opposition bent on stamping out the revolt at any cost. In this, they are prepared to use any means and to go to any length. This revolt of the Untouchables has been met with equally determined attack on the part of the Hindus. How cruel the Hindus can be in suppressing this revolt of the Untouchables will appear from one or two cases.

On the occasion of the entry of the Untouchables in the Chawdar Tank at Mahad, in the exercise of their right to take water from a public place, the assault made upon the Untouchables who had attended the Conference and taken part in the march upon the Tank has been described in the Bombay Chronicle in the following terms:

"The procession was a most peaceful one and everything passed off quietly. But after about two hours some evil minded leaders of the town raised a false rumour that the depressed classes were planning to enter the temple of Vireshwar, whereupon a large crowd of riffraff had collected all armed with bamboo sticks. The crowd soon became aggressive and the whole town at once became a surging mass of rowdies, who seemed to be out for the blood of the depressed classes.

The depressed classes were busy in taking their meal before dispersing to their village. When a large part of them had left the town, the rowdies

entered the kitchen where the depressed classes were taking their food. There would have been a regular battle between the two forces, but the depressed classes were held back by their leaders, and thus a far more serious riot was averted. The rowdies, finding no occasion for provocation, began patrolling the main street and assaulting the members of the depressed classes who, in stray batches, were passing along on their way to their villages, and committed trespass in the houses of several depressed class people and gravely assaulted them. In all, the number of wounded among the depressed classes is supposed to be as large as 20. In this, the attitude of the depressed classes was as commendable as the attitude of many of the upper classes was unworthy. The depressed classes assembled vastly outnumbered the upper classes. But as the object of their leaders was to do everything in a non-violent and absolutely constitutional manner, they set their faces against any aggression on the part of the depressed classes. It speaks a great deal in favour of the depressed classes, that, although the provocation given to them was immense, they kept their self-control. The Mahad Conference has shown that the upper classes are not willing to allow the depressed classes to enjoy such elementary civic rights as taking water from public water sources.

The most reprehensible part of the conduct of the upper caste Hindus in Mahad and Kolaba district was that, messages were sent immediately to the different villages asking the upper class people there to punish the delegates of the Conference as soon as they returned to their respective villages. In obedience to this mandate, assaults were committed on a number of Mahars returning from the Conference either before or after they reached their villages, where the depressed classes have the disadvantage of being overwhelmingly outnumbered by the upper caste Hindus. The leaders of the Depressed Classes have appealed to the authorities for protection and the District officials, including the District Superintendent of Police are making inquiries on the spot. It must, however be stated that, if the Resident Magistrate had not allowed two precious hours to pass without doing anything, the riot would have probably been averted."

The assault committed on the Untouchables as a result of the Kalaram Temple Satyagraha was no less severe.

The third instance is more recent and occurred in the year 1935 in the village of Kavitha in Dholka Taluka of the Ahmedabad District of the Bombay Presidency.

The Bombay Government having issued orders requiring the admission of the children of the Untouchables in public schools, it is reported that :

"On August 8th, 1935, the Untouchables of the village Kavitha took four of their children to be admitted in the village school. Many caste Hindus from the village had gathered near the school to

1 This account of the incident is a translation of the Statement sent to me by the Secretary of the Nava Yuga Mandal of Dholka witness this. This occasion for admission passed off quietly and nothing untoward happened."

The next day however the caste Hindus of the village withdrew their children from the school, as they did not like their children sitting with those of the Untouchables and getting themselves polluted.

Some time thereafter, an Untouchable from the village was assaulted by a Brahmin. On August 12th. the male members of the Untouchables of the village had come to Dholka to file a criminal complaint against the Brahmin in the Court of the Magistrate. Coming to know that the adult members of the Untouchables were absent, the Hindus of the village invaded the quarters of the Untouchables. They were armed with sticks, spears and swords. Among the invaders were caste Hindu women. They started attacking the old men and women of the Untouchables. Some of these victims fled to the jungles some shut themselves up. These invaders directed their vehemence against those Untouchables who were suspected of having taken a lead in the matter of the admission of their children in the village school. They broke open their doors and not finding them in, they broke the tiles and rafters of the roofs over their houses.

Terror-stricken, these Untouchable men and women who are assaulted and beaten were anxious about the safety of those of their elders who had gone to Dholka and who were expected back that night. The caste Hindus knowing that the leaders of the Untouchables who had gone to Dholka would be returning sometime in the night went out of the village fully armed to assault them and had concealed themselves behind the bushes and shrubs on the way to the village. Having come to know of this, an old Untouchable woman crept out of the village in the dark, met the leaders who were returning and informed them that armed gangs of caste Hindus were hiding themselves to waylay them and that therefore they should not come into the village.

They refused to listen, fearing that the caste Hindus might do greater mischief in their absence. At the same time they were afraid that if they did enter they might be assaulted. They therefore decided to wait outside the village in the fields till after midnight. In the meantime, the gang of caste Hindus who were in ambush waited and waited and finally gave up the game and retired. The leaders of the Untouchables entered the village after

about 3 a.m. in the night. If they had come earlier and met the murderous gang they would probably have been done to death. On seeing the harm done to person and property, they left the village for Ahmedabad before daybreak and informed the Secretary of the Harijan Seva Sangh, a body organised by Gandhi to look after the welfare of the Untouchables. But the Secretary was helpless. Not only did the caste Hindus use physical violence, but they conspired to make the life of the Untouchables intolerable. They refused to engage them as labourers; they refused to sell them foodstuff. They refused to give them facilities for grazing their cattle and they committed stray assaults on Untouchable men and women. Not only this, but the caste Hindus in their frenzy poured kerosene oil in the well from which the Untouchables had to get their supply of drinking water. This they did for days together. The result was that the Untouchables of the village had no water. When things reached this stage, the Untouchables thought of filing a criminal complaint before a Magistrate which they did on 17th October, making some of the caste Hindus as the accused. The strange part of the case is the part played by Gandhi and his Lieutenant, Sardar Vallabhbhai Patel. With all the knowledge of tyranny and oppression practised by the caste Hindus of Kavitha against the Untouchables, all that Mr. Gandhi felt like doing, was to advise the Untouchables to leave the village. He did not even suggest that the miscreants should be hauled up before a Court of Law. His henchman, Mr. Vallabhbhai Patel, played a part which was still more strange.

He had gone to Kavitha to persuade the caste Hindus not to molest the Untouchables. But they did not even give him a hearing. Yet this very man was opposed to the Untouchables hauling them up in a court of law and getting them punished. The Untouchables filed the complaint notwithstanding his opposition. But he ultimately forced them to withdraw the complaint against the caste Hindus making some kind of a show of an undertaking not to molest, an undertaking, which the Untouchables can never enforce. The result was that the Untouchables suffered and their tyrants escaped with the aid of Mr. Gandhi's friend, Mr. Vallabhbhai Patel.

This systematic suppression of the Untouchables is resorted to by the caste Hindus even in small matters such as the wearing of better clothes or the wearing of jewellery. Two such instances may be cited.

III

To whom the victory will go in the end is an interesting speculation, and those who are leading the movement of the Untouchables, are carefully

watching the situation. Whatever the ultimate result, one thing is plain, that in this struggle, the odds are heavily against the Untouchables.

In this conflict with the Hindus, the Untouchables are always at bay. As against caste lawlessness, the Untouchables are always helpless. The question is, why are the Untouchables always beaten, why are they always at bay? The question is an important question and needs to be answered.

The reasons why the Untouchables are at bay in this struggle with the caste Hindus are quite obvious. The first reason is that the two groups are unequally matched so far as numbers are concerned. In no village do the Untouchables constitute a considerable body of people as compared with the Caste Hindus. Most often they are composed of a few families and their number is very small, too small to give them any power to repel an attack of the caste Hindus. Although the Untouchables number 50 millions, which appears in lump to be a formidable figure, in fact they are scattered all over the villages in India so that in each village they form a small minority pitted against a great majority of the caste Hindus. Strategically speaking the forces are so badly distributed that they cannot but be overwhelmed by the caste Hindus.

The Mahomedans in the village of some provinces are in the same position as the Untouchables so far as numbers are concerned. They are also scattered throughout the villages and in some villages the population of the Mahomedans is much smaller than the population of the Untouchables. Yet the Mahomedans are not subjected by the Hindus to the disabilities and the indignities to which the Untouchables are subjected. This is rather strange, because there is as deep an antagonism between the Hindus and the Muslims as there is between the Hindus and the Untouchables. This difference in treatment is due to an advantage which the Muslims have but which the Untouchables do not have.

It was a rule in all ancient societies that a stranger was sacred. His person must be guarded from insult and injury. The Romans had their *dii hospitales* and the duties towards a stranger were even more stringent than those towards a relative. "He who has a spark of caution in him," says Plato "will do his best to pass this life without sinning against the stranger." It is strange that so much sanctity should have been attached to the person of a stranger. There is no doubt that this sanctity of the stranger's person was not due to pure kindness. The whole conduct of group life is opposed to a general spirit of consideration for those who are outside the group. The real reason why the stranger was treated as sacred and his person inviolate was because he belonged to a hostile group, and any injury to him was sure

to lead to bloodshed. It was the fear of a blood feud, which was the cause of this attitude towards the stranger.

The same thing applies to the Mahomedan in a village. In the eyes of the Hindus he is a stranger. But the Hindus dare not molest him because they know that any injury to him will be avenged by Muslims in a blood feud with the Hindus. The communal riots between the Hindus and Mahomedans are really blood feuds and they are caused by some injury done to a Mahomedan or to some Mahomedan interests. It is this fear of a blood feud, which makes the life of a Muslim in a Hindu village safe.

There is nobody to avenge an injury done to an Untouchable. There is no fear of a blood feud. The Hindus therefore can commit any wrong against the Untouchables with impunity. This is because the Mahomedans are a solid mass, held together with a deep consciousness of kind, ready to act as one man to vindicate any wrong to the community or to a member thereof. The Untouchables, on the other hand, are a disunited body, they are infested with the caste system in which they believe as much as does the caste Hindu. This caste system among the Untouchables has given rise to mutual rivalry and jealousy and it has made common action impossible. The Mahomedans have also a caste system among themselves. Like the Untouchables they are also scattered all over the country. But their religion is a strong unifying force, which gives them the feeling that, if they are parts, they are parts of one Muslim Community. There is nothing to instil such a feeling among the Untouchables. In the absence of any unifying force, the Untouchables are just fragments with no cement to bind them and their numbers are therefore of no advantage to them.

A large majority of the Untouchables in the villages are either village servants or landless labourers. As village servants, they depend upon the Hindus for their maintenance, and go from door to door every day and collect bread or cooked food from the Hindus in return for certain customary services rendered by them to the Hindus. This is a part of their remuneration. A part also of their remuneration consists in quantities of grain given to them by the Hindus at the harvest time. Whenever there is a disagreement between the Hindus and the Untouchables, the first thing the Hindus do is to stop giving bread, stop the payment of the harvest share and stop employing the Untouchables on any job. The result is that the struggling hoards of the Untouchables are face to face with starvation.

The Untouchables have no way of earning a living open to them in a village. He cannot do any business such as selling milk or vegetables. Because he is an Untouchable no one will buy these things from him. He cannot take to any trade because, all trades being hereditary, no one will

accept his service. His economic dependence upon the Hindu is complete and the Hindu takes a complete advantage of it whenever the Untouchables prove arrogant, or naughty in the eyes of the Touchables.

Not only is the Untouchable dependent upon the Touchable for earning his livelihood but the Untouchable is also dependent upon the Touchables for the purchase of his necessaries of life. In a village all shops belong to the Touchables. Trade is, and must necessarily be, in the hands of the Touchables. An Untouchable has to depend upon the Touchable shopkeepers for their shopping. If the Touchable shopkeeper is willing to sell, the Untouchables can obtain the necessaries of life. If the shopkeeper refuses to sell, the Untouchable must starve although they might have money to live on. Now whenever any dispute arises between the Touchables and the Untouchables the one thing the Touchables never fail to do is to command the shopkeepers not to sell anything to the Untouchables. The Touchables constitute an organised conspiracy to bring about a cessation of all economic relationship with Untouchables. A war is proclaimed against the Untouchables. The means used for reducing the "enemy" is to send a "punitive expedition" consisting of rascals into the Untouchable quarters who ruthlessly carry on arson of destruction of property and shamelessly commit acts of violence against all including women and children.

The more common and the more effective weapons is the declaration of complete boycott against the offending Untouchables. The horrors of the boycott, which is merely another name for Gandhi's "noncooperation", can hardly be adequately described. The Committee appointed by the Government of Bombay to inquire into the grievances of the Backward Classes speaks of the social boycott in the following terms:

"Although we have recommended various remedies to secure to the Untouchables their rights to all public utilities we fear that there will be difficulties in the way of their exercising them for a long time to come. The first difficulty is the fear of open violence against them by the orthodox classes. It must be noted that the Untouchables are a small minority in every village, opposed to which is a great majority of the orthodox who are bent on protecting their interests and dignity from any supposed invasion by the Untouchables at any cost. The danger of prosecution by the police has put a limitation upon the use of violence by the orthodox classes and consequently such cases are rare.

The second difficulty arises from the economic position in which the Untouchables are found today. The Untouchables have no economic independence in most parts of the Presidency. Some cultivate lands of the

orthodox classes as their tenants at will. Others live on their earnings as farm labourers employed by the orthodox classes, and the rest subsist on the food or grain given to them by the orthodox classes in lieu of service rendered to them as village servants. We have heard of numerous instances where the orthodox classes have used their economic power as a weapon against those Depressed classes in their villages, when the latter have dared to exercise their rights and have evicted them from their land, and stopped their employment and discontinued their remuneration as village servants. The boycott is often planned on such an extensive scale as to include the prevention of the Untouchables from using the commonly used paths and the stoppage of the sale of the necessaries of life by the village bania or shopkeeper. According to the evidence small causes suffice for the proclamation of a social boycott against the Untouchables. Frequently it follows on the exercise by the Untouchables of their right to the use of the common well, but cases have been by no means rare where stringent boycott has been proclaimed simply because an Untouchable man has put on a sacred thread, has bought a piece of land, has put on good clothes or ornaments, or has led a marriage procession with the bride-groom on the horse through the public street.

We do not know of any weapon more effective than this social boycott which could have been invented for the suppression of the Untouchables. The method of open violence pales away before it, for it has the most far reaching and deadening effects. It is the more dangerous because it passes as a lawful method consistent with the theory of freedom of contract. We agree that this tyranny of the majority must be put down with a firm hand if we are to guarantee to the Untouchables the freedom of speech and action necessary for their uplift."

IV

The third circumstance which adds to the helplessness of the Untouchables is the impossibility for the Untouchables to obtain any protection from the police or justice from the courts. The police are drawn from the ranks of the caste Hindus. The Magistracy is drawn from the ranks of the Caste Hindus. The police and the magistracy are the kith and kin of the caste Hindus. They share the sentiments and the prejudices of the caste Hindus against the Untouchables. If an Untouchable goes to a police officer with a complaint against the caste

Hindus instead of receiving any protection he will receive plenty of abuse. Either he will be driven away without his complaint being recorded or, if it

is recorded, it would be recorded quite falsely to provide a way of escape to the Touchable aggressors. If he prosecutes his offenders before a Magistrate the fate of his proceedings could be foretold. He will never get Touchable witnesses because of the conspiracy of the villagers. If he brings witnesses from the Untouchables the Magistrate will not accept their testimony because they are interested and not independent witnesses or, if they are independent witnesses, the Magistrate has an easy way of acquitting the accused by simply saying that the complainant Untouchable did not strike him as a truthful witness. He can do this fearlessly because he knows full well that the higher tribunal will not reverse his finding because of the well-established rule which says that an appellate court should not disturb the finding of a Magistrate based upon the testimony of witness whose demeanour he had observed. This fact has now been admitted even by Congress workers among the Untouchables.

The Annual Report of the Tamil Nad Harijan Sevak Sangh for the year ending September 30, 1937, says: "The political consciousness of the Harijan having been roused by the rights, in the remotest villages where it is only the policeman that reigns, it is not always possible for the Harijan to do this, for the assertion of his rights means a clash between him and the castemen, in which it is always the latter that have the upper hand. The natural consequence of this scuffle is a complaint either to the police or the magistrate. The latter course is beyond the means of a Harijan, while the former resort is worse than useless. The complaints are in many cases not inquired into at all, while in others a verdict favourable to the castemen is entered. Our complaints to the police also meet with similar fate. The trouble seems to us to be this : there is no change in the mentality of the lower policemen. Either he is unaware of the rights of the Harijans of which he is supposed to be the guardian, or he is influenced by castemen. Or it may also be that he is absolutely indifferent. In other cases corruption is responsible for this taking the side of the richer castemen". (Hindu, March 7, 1938).

This means that the official is anti-Untouchable and pro-Hindu. Whenever he has any authority or discretion it is always exercised to the prejudice of the Untouchable.

The police and the magistrate are sometimes corrupt. If they were only corrupt, things would not perhaps be so bad because an officer who is corrupt is open to purchase by either party. But the additional misfortune is that the police and magistrates are often more partial than corrupt. It is this partiality to the Hindus and his antipathy to the Untouchables, which results in the denial of protection and justice to the Untouchables. There is

no cure to this partiality to the one and antipathy to the other. It is founded in the social and religious repugnance, which is inborn in every Hindu. The police and the Magistrate by reason of their motives, interest and their breeding do not sympathise with the living forces operating among the Untouchables. They are not charged with the wants, the pains, the cravings and the desires, which actuate the Untouchables. Consequently they are openly hostile and inimical to their aspirations, do not help them to advance, disfavour their cause and snap at everything that smacks of pride and self-respect. On the other hand they share the feelings of the Hindus, sympathise with them in the attempt to maintain their power, authority, prestige and their dignity over the Untouchables. In any conflict between the two they act as the agents of the Hindus in suppressing this revolt of the Untouchables and participate quite openly and without shame in the nefarious attempt of all Hindus to do everything possible by all means, fair or foul, to "teach the Untouchables a lesson", and hold them down in their own place.

The worst of it is that all this injustice and persecution can be perpetrated within the limits of the law. A Hindu may well say that he will not employ an Untouchable, that he will not sell him anything, that he will evict him from his land, that he will not allow him to take his cattle across his field, without offending the law in the slightest degree. In doing this he is only exercising his right. The law does not care with what motive he does it. The law does not see what injury it causes to the Untouchable. The police may misuse his power and his authority. He may deliberately falsify the record by taking down something which has not been stated or by taking down something which is quite different from what has been stated. He may disclose evidence to the side in which he is interested. He may refuse to arrest. He may do a hundred and one things to spoil the case. All this he can do without the slightest fear of being brought to book. The loopholes of law are many, and he knows them well. The magistrate has vested in him an enormous amount of discretion. He is free to use it. The decision of a case depends upon the witnesses who can give evidence. But the decision of the case depends upon whether the witnesses are reliable or not. It is open to the magistrate to believe one side and disbelieve the other side. He may be quite arbitrary in believing one side, but it is his discretion, and no one can interfere with it. There are innumerable cases in which this discretion has been exercised by the Magistrate to the prejudice of the Untouchables. However truthful the witnesses of the Untouchables, the magistrates have taken a common line by saying "I disbelieve the

witnesses”, and no body has questioned that discretion. What sentence to inflict is also a matter of discretion with the magistrate.

There are sentences which are appealable and there are sentences which are non-appealable. An appeal is a way of getting redress. But this way may be blocked by a magistrate by refusing to give an appealable sentence. Such are the forces which are arrayed against the struggling Untouchables. There is simply no way to overcome them because there is no legal way of punishing a whole society which is organized to set aside the law.

V

One way of lessening these difficulties they certainly cannot be overcome was open to the Untouchables. That way lay through politics and through effective use of political power. But in this matter the Untouchables have been foiled.

CHAPTER 4

THEIR WISHES ARE LAWS UNTO US

- I. Adharma for Dharma.
- II. Manu and Dharma.
- III. Modern Counterparts.
- IV. Effect of Dharma on character and outlook.

Any one who reads of the lawlessness of the Hindus in suppressing the movement of the untouchables, I am sure will be shocked. Why does the Hindu indulge in this lawlessness is a question he is sure to ask and none will say that such a question will not be a natural question and in the circumstances of the case a very pertinent question—Why should an untouchable be tyrannized if he wears clean clothes? How can it hurt a Hindu. Why should an untouchable be molested because he wants to put a tiled roof on his house? How can it injure a Hindu? Why should an untouchable be persecuted because he is keen to send his children to school? How does a Hindu suffer thereby? Why should an untouchable be compelled to carry dead animals, eat carrion, and beg his food from door to door? Where is the loss to the Hindu if he gives these things up. Why should a Hindu object if an untouchable desires to change his religion? Why should his conversion annoy and upset a Hindu? Why should a Hindu feel outraged if an untouchable calls himself by a decent, respectable name?

How can a good name taken by an untouchable adversely affect the Hindu? Why should the Hindu object if an untouchable builds his house facing the main road? How can he suffer thereby? Why should the Hindu object if the sound made by an untouchable falls upon his ears on certain days? It cannot deafen him. Why should a Hindu feel resentment if an untouchable enters a profession, obtains a position of authority, buys land, enters commerce, becomes economically independent and is counted among the well-to-do? Why should all Hindus whether officials or non-officials make common cause to suppress the untouchables? Why should all castes otherwise quarreling among themselves combine to make, in the name Hinduism, a conspiracy to hold the untouchables at bay?

All this of course sounds like a fiction. But one who has read the tales of Hindu tyranny recounted in the last chapter will know that beneath these questions there is the foundation of facts. The facts, of course, are stranger than fiction. But the strangest thing is that these deeds are done by Hindus who are ordinarily timid even to the point of being called cowards. The Hindus are ordinarily a very soft people. They have none of the turbulence or virulence of the Muslims. But, when so soft a people resort without shame and without remorse to pillage, loot, arson and violence on men, women and children, one is driven to believe that there must be a deeper compelling cause which maddens the Hindus on witnessing this revolt of the untouchables and leads them to resort to such lawlessness.

There must be some explanation for so strange, so inhuman a way of acting. What is it?

If you ask a Hindu, why he behaves in this savage manner, why he feels outraged by the efforts which the untouchables are making for a clean and respectable life, his answer will be a simple one. He will say: "What you call the reform by the untouchables is not a reform. It is an outrage on our Dharma". If you ask him further where this Dharma of his is laid down, his answer will again be a very simple one. He will reply, "Our Dharma is contained in our Shastras". A Hindu in suppressing what, in the view of an unbiased man, is a just revolt of the untouchables against a fundamentally wrong system by violence, pillage, arson, and loot, to a modern man appears to be acting quite irreligiously, or, to use the term familiar to the Hindus, he is practising *Adharma*. But the Hindu will never admit it. The Hindu believes that it is the untouchables who are breaking the *Dharma* and his acts of lawlessness which appear as *Adharma* are guided by his sacred duty to restore Dharma. This is an answer, the truth of which cannot be denied by those who are familiar with the psychology of the Hindus. But

this raises a further question: What are these Dharma which the Shastras have prescribed and what rules of social relationship do they ordain? II

The word *Dharma* is of Sanskrit origin. It is one of those Sanskrit words which defy all attempts at an exact definition. In ancient times the word was used in different senses although analogous in connotation. It would be interesting to see how the word *Dharma* passed through transitions of meaning* mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm:/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_16. But this is hardly the place for it. It is sufficient to say that the word dharma soon acquired a definite meaning which leaves no doubt as to what it connotes. The word Dharma means the privileges, duties and obligations of a man, his standard of conduct as a member of the Hindu community, as a member of one of the castes, and as a person in a particular stage of life. The principal sources of Dharma, it is agreed by all Hindus, are the Vedas, the Smritis and customs. Between the Vedas and Smritis, so far as Dharma is concerned, there is however this difference. The rules of Dharma, as we see them in their developed form, have undoubtedly their roots in the Vedas, and it is therefore justifiable to speak of the Vedas as the source of Dharma. But the Vedas do not profess to be formal treatises on *Dharma*. They do not contain positive precepts (*Vidhis*) on matters of Dharma in a connected form. They contain only disconnected statements on certain topics concerned with *Dharma*. On the other hand, Smritis are formal treatises on Dharma. They contain enactments as to the Dharma. They form the law of the Dharma in the real sense of the term. Disputes as to what is Dharma and what is not Dharma (Adharma) can be decided only by reference to the text of the law as given in the Smritis. The Smritis form, therefore, the real source of what the Hindu calls Dharma, and, as they are the authority for deciding which is Dharma and which is not, the Smritis are called Dharmashastras (scriptures) which prescribe the rules of Dharma.

The number of Smritis which have come down from ancient times have been variously estimated. The lowest number is five and the highest a hundred. What is important to bear in mind is that all these Smritis are not equal in authority. Most of them are obscure. Only a few of them were thought to be authoritative enough for writers to write commentaries thereon. If one is to judge of the importance of a Smriti by the test as to whether or not it has become the subject matter of a commentary, then the Smritis which can be called standard and authoritative will be the Manu Smriti, Yajnavalkya Smriti and the Narada Smriti. Of these Smritis the Manu Smriti stands supreme. It is pre-eminently the source of all Dharma.

To understand what is the Dharma for which the Hindu is ready to wage war on the untouchables, one must know the rules contained in the Smritis, particularly those contained in the Manu Smriti. Without some knowledge of these rules, it would not be possible to understand the reaction of the Hindus to the revolt of the untouchables. For our purpose it is not necessary to cover the whole field of Dharma in all its branches as laid down in the Smritis. It is enough to know that branch of the Dharma which in modern parlance is called the law of persons, or to put it in non-technical language, that part of the Dharma which deals with right, duty or capacity as based on status.

I therefore propose to reproduce below such texts from Manu Smriti as are necessary to give a complete idea of the social organization recognized by Manu and the rights and duties prescribed by him for the different classes comprised in his social system.

The social system as laid down by Manu has not been properly understood and it is therefore necessary to utter a word of caution against a possible misunderstanding. It is commonly said and as commonly believed that what Manu does is to prescribe a social system which goes by the name of Chaturvarna a technical name for a social system in which all persons are divided into four distinct classes. Many are under the impression that this is all that the Dharma as laid down by Manu prescribes. This is a grievous error and if not corrected is sure to lead to a serious misunderstanding of what Manu has in fact prescribed and what is the social system he conceived to be the ideal system.

I think this is an entire misreading of Manu. It will be admitted that the divisions of society into four classes comprised within Chaturvarna is not primary with Manu. In a sense this division is secondary to Manu. To him it is merely an arrangement *inter se* between those who are included in the Chaturvarna. To many, the chief thing is not whether a man is a Brahman, Kshatriya, Vaishya or Shudra. That is a division which has existed before him. Manu added, accentuated and stratified that difference. The division did not originate with him. But what did originate with Manu is a new division between (1) those who are within the pale of Chaturvarna and (2) those who are outside the pale of Chaturvarna. This new social division is original to Manu. This is his addition to the ancient Dharma of the Hindus. This division is fundamental to Manu because he was the first to introduce it and recognize it by the stamp of his authority.

The texts which have a bearing on the subject must therefore be arranged under two heads (1) texts relating to those who are within the Chaturvarna and (2) texts relating to those who are outside the Chaturvarna.

I. *Those within the Pale of the Chaturvarna. Their origin and their duties*

- (1) (1) [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_17](#) This (Universe) existed in the shape of Darkness, unperceived, destitute of distinctive marks, untenable by reasoning, unknowable, wholly immersed, as it were in a deep sleep.
- (2) [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_18](#) Then the divine self existent (Svayambhu, himself) indiscernible (but) making (all) this, the great elements and the rest discernible, appeared with irresistible (creative) power, dispelling the darkness.
- (3) [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_19](#) But for the sake of the prosperity of the worlds, he caused the Brahmana, the Kshatriya, the Vaishya, and the Shudra to proceed from his mouth, his arms, his thighs and his feet.
- (4) [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_20](#) But in order to protect this Universe. He, the most resplendent one, assigned separate (duties and) occupations to those who sprang from his mouth, arms, thighs and feet.
- (5) [mk:@MSITStore:C:\Important\Writing_Of_Babasaheb.chm::/24. Essay on Untouchables and Untouchability_Political.htm - _msocom_21](#) To the Brahmans he assigned teaching and studying (the Vedas), sacrificing (performing sacrificial ceremonies) for their own benefit and for others, giving and accepting (of alms).
